The word but not the month mentioned in Bible (Ezk 8¹⁴). Mishna, *Ta'anith* iv. 5; Bab. *du-uzu*. LXX has *Θαμμοζ*.

(5) **Ab** (אָב), *Ἀφῶς*, July-August.

Not mentioned in Bible. Mishna, *Pesachim* iv. 5, etc.; Bab. *a-bu*; Jos. *Ant.* iv. iv. 7; *Aḥa* (Niese reads *Σαβῆ*). Delitzsch derives from Assy. *abu* 'hostile' (from excessive heat of month), Haupt from *abs* 'bulrushes' (cf. Job 32³ 7²⁸), the season in which bulrushes were cut for building purposes. This, with two other months, was consecrated by the Babylonians to building.

(6) **Elul** (אֱלוּל), *Γορπιαῖος*, August-September.

Neh 6¹⁵; Mishna, *Shekalim* iii. 1, etc.; *Ἐλαῖ*, 1 Mac 14⁹⁷; Bab. *ulu-lu*. Perhaps from *ll* (*alalu*) 'to shout for joy,' inasmuch as the month represented the resurrection of Tammuz-Adonis (Muss-Arnolt).

(7) **Tishri** (תִּשְׁרִי), *Ῥεπρεπαιος*, September-October.

Not named in Scripture. Mishna, *Shekalim* iii. 1, etc.; Gr. *Θισρι*; Jos. *Ant.* viii. iv. 1 (as amended by Hudson; Niese reads *Ἀθρι*); Bab. *tish-ri-tum*. From *surru* 'begin,' 'dedicate.' The Assyrians, like the Jews, had two new year days—Nisan for the sacred year, Tishri for the civil. The Seleucid year began in Nisan, the Aramaean with Tishri (Epping and Strassmaier, *Astronomisches aus Babylon*, p. 177). The month was dedicated to the sun-god, and Halévy (*Mélanges de critique et d'histoire*, p. 178) conjectures that this originated the later Jewish association of Tishri with the Creation and the Day of Judgment.

(8) **Marcheshvan** (מַרְחֶשְׁבָּן), *Διος*, October-November.

Not named in Scripture. Mishna, *Ta'anith* i. 3, etc.; Jos. *Μαργουανης*; Bab. *arashsanma* ('eighth month') = *רִחְשָׁן* (v) and *ḥ* being often interchanged in later Babylonian). Modern Hebrew regarded Heshvan as the name of the month (*mar* being taken to mean 'drop,' 'rainy season'). Dillmann and Stade see in the Bab. name of this month a relic of the oldest method of counting the months by numbers and not by names. See Siegfried-Stade, *Dict.* s.v. *רִחְשָׁן*.

(9) **Kislev** (כִּסְלֵב), *Ἀρελλαῖος*, November-December.

Zec 7¹, Neh 1¹; Mishna, *Rosh Hashana* i. 3, etc.; Gr. *Χισλιῶς* (1 Mac 13⁴ etc.; Jos. *Ant.* xii. v. 4, *χισλιῶς*); in Palmyrene Inscriptions כִּסְלֵב; Bab. *kislīnu*. Derivation uncertain.

(10) **Tebeth** (תֵּבֶת), *Ἀύθυναος*, December-January.

Est 2¹⁶; Mishna, *Ta'anith* iv. 5, etc.; Jos. *T.βῆθ* (*Ant.* xi. v. 4, but see Niese); Bab. *tebetum*. *Tebu* (Heb. תֵּבּוּ) = 'to sink,' 'dip.' The rainy season begins in 10th month.

(11) **Shebat** (שֶׁבַת), *Περῖτιος*, January-February.

Zec 1⁷; Mishna, *Rosh Hashana* i. 1; Gr. *Σαβῆρ* (1 Mac 16¹⁴); Bab. *sha-ba-tu*.

(12) **Adar** (אָדָר), *Δύστηρος*, February-March.

Freq. in Euth., Ezr 6¹⁵; Mishna, *Shekalim* i. 1, etc.; *Ἀδάρ*, 1 Mac 7¹³; Jos. *Ant.* iv. viii. 49, etc.; Bab. *addaru*. Delitzsch derives from a root 'to be dark' in contrast to *aru*. It was, says Muss-Arnolt, the name of this month that induced former investigators to derive the Heb. names from Persian, for Adar is also a Persian month name. (See Benfey, *Monatsnamen einiger alter Völker*). The intercalated month was a second Adar (Heb. אָדָר שֶׁנִּי, *Megilla* i. 4, or *רִבְעִי*).

iv. WEEKS AND DAYS.—The week of seven days (שָׁבָעַת) is an obvious derivative of the lunar month, for the week corresponds roughly to the phases of the moon. The discrepancy would not affect the Hebrew week, for there is no indication that the new moon in historical times coincided with the beginning of the week. The Assyrians and Babylonians knew the seven-day week, and the week began with the moon, whereas the Hebrew week ran regularly through the whole year, especially when the weekly Sabbath replaced the new moon in importance as a sacred day. Nowack (ii. 215) unnecessarily assumes that the Israelites probably borrowed the week from the Babylonians. He, with others (see Holzinger on Ex 12³), detects

traces of an older Hebrew week of *ten* days (Gn 24⁴⁸, Ex 12²), but this is very doubtful. It would perhaps fit in with the idea of a year of 360 days (traces of a thirty-day month being detected by Nowack in Nu 20²⁸, Dt 34⁸, cf. 21¹², as well as in the Flood narrative). Driver holds that 'it is difficult not to agree with Schrader, Sayce, and other Assyriologists in regarding the week of seven days, ended by a Sabbath, as an institution of Babylonian origin' (*op. cit.* p. 18). The week thus is presupposed by the Creation narrative, and is not derived from it. 'In other words, the week determined the "days" of Creation, not the days of Creation the week' (*ib.*). This may well be, and yet the Hebrew week not necessarily a derivative from Babylon. (Jastrow has shown that the Hebrew Creation narrative is more independent of Babylonian parallels than has usually been supposed. *JQR* xiii. p. 620 ff.). See, further, on this subject, Jensen in *Ztschr. f. deutsche Wortforschung*, Sept. 1900, p. 153 ff.; and art. SABBATH above, p. 319.

In the NT (as in neo-Hebrew) the week is termed *σάββατον*, and the days of the week were numbered, not named. The eve of the Sabbath (Friday) was called *παρασκευή* (Mt 27², Lk 23⁵⁴, Jn 15^{31.42}; *παρασάββατον* Mk 15⁴², Jth 8⁶). Mondays and Thursdays acquired special importance in the later Jewish life, for the public reading of the Law and the holding of law-courts occurred on those days (see Schürer, ii. 1-83, 190). Schwarz (*Jüdische Kalender*, p. 7) suggests that the numbering of the Christian *Feriae* was derived from the Heb. usage *רביעי* *שבת* *חמישי* *שבת* *שבת* *שבת* *שבת* *שבת*. See, however, Ideler, *Handbuch*, ii. 180.

The Babylonians divided the day (יום) into equal parts by sun-watches, and were also acquainted with the 60 system (minutes and seconds). The Syrian peoples may have acquired similar knowledge from the Babylonians, but there is no trace of this among the Israelites in the pre-exilic period. There was an important difference between the Israelites and Babylonians, for, while the former began the day at sunset, the latter began the day with the morning. There are, according to most modern commentators, indications of the Babylonian reckoning in the first chapter of Genesis and, according to Dillmann, in Ex 12^{16.18}, Lv 23³². The chaotic darkness (Gn 1⁵) lies behind the reckoning; with the creation of light began the first morning, and the first day extended till the next morning (so Dillmann). The reckoning from evening to evening became the exclusive Jewish method 'with the triumph of the Law.' The system is also met with among the Arabs, Athenians, and Gauls (cf. Pliny, *HN* ii. 79). The evening-morning day was the *קרב* *בקר* of Dn 8⁴ (though Driver and others explain the phrase in Daniel to mean half-days). Cf. the *νυκθήμερον* of 2 Co 11²⁸. There was no exact division of the day into parts before the Exile, the natural order being followed: *ערב* 'evening,' *בקר* 'morning,' and *צהרים* 'mid-day.' The day declined (Jg 19⁶), perhaps with reference to shadows on a sundial (so Moore, but cf. Jer 6⁴; see DIAL), the evening turned in *ערב* *חמה* (Gn 24²⁰); there were also terms for the evening twilight when the cool sea-breeze blew (*קור* Job 24¹³, cf. *לוח* *היום* Gn 3⁸); the dawn ascended (*עלה* *הצחק* Gn 19¹⁵ 32²⁴); compare such expressions as 'when the day was hot' (*היום* *הם* Gn 18¹, cf. 1 S 11⁹). In neo-Hebrew there were other phrases of a similar nature (Mishna, *Berakhoth* i.). We meet in the Bible with parts of the day described as the time when certain occupations were usual; as the time when girls were accustomed to fetch the water required for domestic use (Gn 24¹¹); 'while the day was still great' (Gn 29⁷) is another similar phrase, but it indicates an earlier point in the afternoon;

the time of bringing the meal-offering (1 K 18²⁰) and of the evening sacrifice (Ezr 9⁴, Dn 9²¹). These last two refer to the same point of time. *יום* sometimes means 'day' in contradistinction to 'night' (*לילה*) Gn 29⁷, sometimes it represents the civil day of 24 hours, including night (Gn 1⁵ etc.). The phrase *בין הערבים* 'between the two evenings' (Ex 16¹³ etc.), the time at which the paschal lamb and (Ex 29²⁸ etc.) the daily evening offering were brought, represents some period in the late afternoon.

The Hebrews also had terms for the days in relation to one another—*שבת* 'the previous evening,' *מחר* or *מחרת* 'yesterday,' *מחר* 'to-morrow,' *מחרת* 'the day before yesterday.' But they did not divide the days into hours until late; in fact, the custom long persisted of counting by portions of the day. The term *רגל* (in derivation = 'moment,' *momentum*) meant an 'instant,' or a longer, but still very brief, interval of time, the chief idea being suddenness or rapid passage. *שעה* 'hour' is Aramaic (Dn 3⁶), and is common in Syr. and in later Hebrew. 'Originally it denoted any small interval of time, and was only gradually fixed to what we call an "hour"' (Driver). The hours of the Mishna differed in duration, as they were reckoned as $\frac{1}{12}$ th of the actual day. Earlier than the division of the day into hours was the division of the night into three watches (*לילה* *שעה* *שעה* *שעה*, La 2¹⁹, Jg 7¹⁹, Ex 14²⁴, 1 S 11¹¹). The threefold division continued into post-Roman times, 1st cent. (*Berakhoth* 3b); but the Roman division into four watches was also known (*ib.*; cf. Mk 13³⁵, where all four watches are referred to: 'in the evening' *δψή*, 'at midnight' *μεσονύκτιον*, 'at cock-crowing' *ἀλεκτροφωνίας*, or 'in the morning' *πρωί*), and these extended from six to six o'clock. Cock-crow is an interesting note of time (Lk 22³⁰), to which considerable importance was attached by Rabbinical Jews. There is still a morning benediction in the Jewish liturgy to be recited at cock-crow.

I. ABRAHAMS.

TIMNA (תִּמְנָה, *Ṭamna*). — Concupine of Eliphaz, Esau's son, and mother of Amalek, Gn 36¹². The branch of the Amalekites in question was closely associated with the Horites, Gn 36^{22.40}, 1 Ch 1^{38.51}. In all these passages the spelling should be Timna, the Heb. being everywhere תִּמְנָה. RV has inadvertently followed AV spelling *Timnah* in Gn 36⁴⁰. See TIMNAH, No. 3.

TIMNAH (תִּמְנָה 'lot,' 'portion'). — 1. A place on the N. boundary of Judah, situated between Bethshemesh and 'the side of Ekron' (Jos 15¹⁰ B *לְשֵׁנָה*, A *לְשֵׁנָה*, *Thamnā*). It was a Philistine town (Jg 14¹ *Ṭamnatā*, *Thamnathā*), within the territory of Dan (Jos 19⁴² B *Ṭamnatā*, A *Ṭamnatā*, *Thamnathā*), to which Samson went down from Zorah to take his wife (Jg 14^{1.2.5}; Jos. *Ant.* v. viii. 5, 6), whose father is called the **Timnite** in Jg 15⁶. There Samson slew the young lion, and propounded his well-known riddle at the marriage-feast. Timnah was taken by the Philistines during the reign of Ahaz, not long after they had been completely subdued by Uzziah (2 Ch 28¹⁸ *Ṭamnatā*, *Thamnā*); and later it was occupied by Sennacherib after he had defeated the Egyptians at Elteke (*Altaku*). It is called in the inscriptions *Tamnd*, and is mentioned as lying between Elteke and Ekron (Schrader, *KAT* 170).

Timnah retains its old name almost unchanged, and is now *Tibneh*, on the S. side of the valley of Sorek (*Wady es-Sur*) and to the W. of Bethshemesh (*Ain Shems*). The site is deserted, but is marked by ruined walls and rock-hewn caves, cisterns, and wine-presses. On the N. side of the ruins is a spring. Vineyards and olive groves still cover the hill-slopes between *Tibneh* and *Wady es-Sur* (*PEF Mem.* ii. 417, 441).

2. (B *Θαμναθ*, A *Θαμν*; *Thamna*) A town in the hill-country of Judah, mentioned with Cain and Gibeah (Jos 15²⁷). It is now *Tibna* near *Jeb'a* (Gibeah), and about 8 miles west of Bethlehem. The site is marked by a few foundations only, and is reached by a path from *Beit Nettif*, about 2½ miles to the west (*PEF Mem.* iii. 53). This is probably the Timnah (Gn 38^{12, 13, 14}, *Θαμν*, *Thamnatha*), to which Judah 'went up' to visit his sheep-shearers. The narrative gives no other indication of position.

3. (דָּמָא; *Θαμν*; *Thamna*) The name of one of the 'dukes' of Edom, and probably also of a town or district (Gn 36⁴⁰, 1 Ch 1²¹; cf. Gn 36^{12, 21}, 1 Ch 1²⁰). See also art. TIMNA. Eusebius and Jerome (*Onom.*) identify it with *Thamna*, a town of Edom in their day. C. W. WILSON.

TIMNATH (AV *Thamnatha*; *Θαμναθα*; *Thamnatha*).—One of the strong cities in Judaea built by Bacchides (1 Mac 9²⁰). The name occurs between Bethel and Pharathon. Pharathon may perhaps be a corruption of Ephraim (*et-Taiyibeh*), and in this case Timnath would be *Thamna*, now *Tibneh*, on the Roman road from Antipatris to Jerusalem, which Josephus says was the chief town of a toparchy (*BJ* III. iii. 5). G. A. Smith (*HGHL* 355 n.) considers that the two names Timnath and Pharathon should not be separated, and that they represent one place, —Pharathon being *Wady Far'ah*, and Timnath being recognized in the name *Tammūn*, so common now at the head of *Wady Far'ah*. But this position is too far N. to have been in Judaea. C. W. WILSON.

TIMNATH-HERES (תִּמְנַת הָרֵשׁ 'portion of the sun'; B *Θαμναθρες*, A *Θαμναθρ*; *Thamnath Sare*).—The name of Joshua's inheritance and burial-place (*Jg* 2⁹), which is called *Timnath-serah* in Jos 19⁵⁰ and 24³⁰. *Heres* is supposed by some commentators (Ewald, Bertheau, Mühlau, etc.) to be a very early copyist's error for *Serah*. On the other hand, it is held to be the correct form of the name by the Jews and Samaritans, who identify the place with *Kefr Hâris*.* But see TIMNATH-SERAH. C. W. WILSON.

TIMNATH-SERAH (תִּמְנַת שֶׂרָא; B *Θαμναθσarah*, *Θαμναθσarah*, A *Θαμναθσarah*, *Θαμναθσarah*; *Thamnath Serea*, *Thamnath Sare*).—The place given by the children of Israel to Joshua as an inheritance, and in the border of which he was buried. It was in the hill-country of Ephraim, and on the north side of the mountain of Gaash (Jos 19⁵⁰ 24³⁰). In *Jg* 2⁹ the name is written *Timnath-Heres* (see preceding art.). According to Josephus, Joshua was buried at *Thamna* (*Θαμν*), a city of Ephraim (*Ant.* v. i. 29). This is apparently identical with *Thamna*, the chief town of a toparchy (*BJ* III. iii. 5), which adjoined the toparchy of Lydda (*Onom.*), and was reduced to subjection by Vespasian before he marched on Lydda and Jamnia (*BJ* IV. viii. 1). *Thamna*, now *Tibneh*, occupied an important position on the road from Jerus. to Antipatris and Caesarea. It was taken by Cussius (*Ant.* XIV. xi. 2), and was occupied by John the Essene, at the commencement of the Jewish war (*BJ* II. xx. 4). Eusebius and Jerome (*Onom.* s. *Θαμναθσarah*) say that Timnath-serah, the town of Joshua, where his tomb was shown, was in the hill-country, and that it was in the territory of Dan. They identified it with the *Thamna* to which Judah went up to visit his sheep-shearers (Gn 38¹²), and placed it in Dan, or Judah, on the border of Lydda, and on the road from that place to Jerus. (*Onom.* *Θαμν*).

* It is not improbable that by an intentional metathesis, to avoid anything that savoured of idolatry, *Timnath-Heres*, 'portion of the sun,' was changed into *Timnath-serah*. See *HERES*, ad *Am.*; and cf. Moore on *Jg* 2⁹.

Elsewhere (s. *Paas*) they state that Joshua's tomb was shown near *Thamna*, on the N. side of *Gaas*, a mountain of Ephraim. Jerome takes St. Paula to Timnath-serah after leaving Bethel, and before reaching Shiloh (*Ep. Paul.* xv.). The place referred to by Eusebius and Jerome is *Tibneh*.

Two sites have been proposed for Timnath-serah, and their claims may be thus stated—

(1) *Tibneh* is an old *Tibnath*, and the position, guarding an approach to the interior of the country, is a suitable one for the home of the great Jewish warrior. Josephus probably, and early Christian tradition certainly, identifies it with the city of Joshua. In the north face of a hill to the S. of the ruins there is a remarkable group of rock-hewn tombs; a great oak tree near the tomb is called *Sheikh et-Teim*, 'the chief servant of God'; and about 3 miles to the E. is *Kefr Ishua*, or Joshua's village (*PEF Mem.* ii. 374-378; Guérin, *Samarie*, ii. 89, etc.). The identification with *Tibneh* is accepted by most moderns, e.g. Dillm. (on Jos 19⁵⁰), Moore, Mühlau (in Riehm's *HWB*), Buhl (170).

(2) *Kefr Hâris*, about 9 miles south of *Nâblus*, is, according to existing Samaritan tradition, the burial-place of Joshua and Caleb. It is also the *Kefr Cheres* of the Jewish pilgrims, Rabbi Jacob (A.D. 1258), hap-Parchi, etc., which Schwarz (151) places S. of *Nâblus*. To the E. of the village there are two sacred places (*mukâms*)—one named *Neby Kifl*, the 'Prophet of the Division by Lot,' the other *Neby Kulda*, or *Kunda*. Conder identifies the first with Joshua, the second he takes to be a corruption of Caleb (*PEF Mem.* ii. 378). If the identification with *Kefr Hâris* be accepted, it must be supposed that the name of the place, *Timnath*, has disappeared whilst its distinctive title, *Heres* or *Serah*, has survived. C. W. WILSON.

TIMON (Τίμων).—One of the seven elected (Ac 6³) to assist the apostles by 'serving tables.' Later legends about him will be found in the *Acta Sanctorum* under April 19, when he was commemorated.

TIMOtheus (Τιμόθεος).—1. A leader of the Ammonites who was defeated in many battles by Judas Maccabæus (1 Mac 5⁵⁸, 2 Mac 8³⁰ 9³ 10²⁴⁻²⁷). According to 2 Mac 10²⁷ he was slain at the capture of Gazara by the forces of Judas. For the unchronological setting of the narrative in 2 Mac. see vol. iii. p. 191^b. 2. The AV form of the name TIMOTHY everywhere in NT except 2 Co 1¹, 1 Ti 1³, 2 Ti 1³, Philem¹, He 13²³.

TIMOTHY (Τιμόθεος), St. Paul's young and trusted companion, was a native of Lystra, or possibly of Derbe (Ac 16¹ 20^a, where see Blass); the son of a Greek father and of a mother who was a Jewess at least by religion (2 Ti 1³) and probably also by birth. The son of a mixed marriage, he received a name which was fairly common in Greek (1 Mac 5⁵⁸, 2 Mac 8³⁰), but which by its significance would be acceptable to a religious Jewess; he was trained by his mother in the OT Scriptures (2 Ti 3¹⁵), but was not circumcised. When St. Paul reached Lystra on his First Missionary Journey, the young Timothy accepted Christianity, being converted by St. Paul (1 Co 4¹⁴⁻¹⁷), and probably was a witness of his sufferings at this time (2 Ti 3^{10, 11}, cf. Ac 14²²). By the time of the Second Missionary Journey he was a disciple well known to the Christians both in Lystra and in Iconium: the mention of his mother first, the description of her in some MSS of the Western text as 'a widow,' and perhaps the use of *ἡ μήτηρ* (Ac 16¹), make it probable that his father was already dead.

St. Paul was attracted by Timothy, and wished to have him as a travel-companion to take the place of John Mark, if not of Barnabas. If we

may refer to this occasion the language of 1 Ti 1¹⁸ 4¹⁴, 2 Ti 1⁶. St. Paul was not left unaided in this decision. Prophetic utterances, perhaps those of Silas, who was himself a prophet (Ac 15²²), led Paul to him: the local presbyters laid their hands upon him (cf. Ac 13³); Paul joined in the formal setting apart of 'his son' for the task; he himself witnessed a noble confession in their presence (1 Ti 6¹³); and thus received a formal ministry (2 Ti 4⁶, Ac 19²²), perhaps with the title of 'evangelist' (2 Ti 4⁵), but in 1 Th 2⁶ he is loosely classed with Paul and Silas as an 'apostle.' In one respect Timothy was not fitted for the task: St. Paul's plan was to preach first to the Jews, and they would be offended by the presence of one who was half-Jew by birth and yet never circumcised, so St. Paul took him and perhaps with his own hand circumcised him (cf. Hort, *Judaistic Christianity*, pp. 84-87; *The Christian Ecclesia*, pp. 178-188; and, as against the historical character of this incident, Holtzmann, *Die Pastoral-Briefe*, pp. 67-78). Timothy now became a loyal companion, slaving for St. Paul as a son for a father (Ph 2²²); he took an active part in preaching at Thessalonica (1 Th 1. 2 *passim*); accompanied Paul to Beroëa, and stayed there when St. Paul was obliged to withdraw to Athens, but at the apostle's request followed him speedily thither. Thence he was despatched at once on an important mission to strengthen the Thessalonians who were suffering under persecution, and on returning with his report found St. Paul already removed to Corinth. His presence and the news he brought gave St. Paul new life, for Timothy joined him in preaching Jesus Christ the Son of God (2 Co 1¹⁹): he was associated with Paul and Silvanus in both letters to the Thessalonians, and was perhaps the scribe in each case, though there is not sufficient ground for accepting Spitta's theory (*zur Gesch. des Urchristentums*, i. p. 110) that 2 Thess. was his composition. After this time he is not mentioned again until we find him with Paul at Ephesus on the Third Missionary Journey (Ac 19²²); he may have been with him all the time, or may have stayed at Ephesus, a stay which would have qualified him for his later work there. On this occasion he was sent again on a mission—this time with Erastus and apparently other brethren (1 Co 16¹¹) to Macedonia and thence to Corinth (1 Co 4¹⁷). The mission took place shortly before the writing of 1 Cor. (4¹⁷); its purpose was to remind the Corinthians of St. Paul's 'ways in Christ'; St. Paul was anxious about the result; he was afraid that Timothy would be timid, and that others might set him at nought, and he bespoke a kindly reception for him (1 Co 16^{10, 11}). The effect of his mission was not successful; he brought back news which caused Paul great anxiety and necessitated a mission of Titus; it is possible that a personal attack was made on Timothy, and that he is δδίκηθης of 2 Co 7¹² in whose interests Paul had demanded sharp punishment on the offender (see PAUL, vol. iii. p. 711^b). However this may be, he followed Paul to Macedonia, was associated with him there in the writing of 2 Cor., and was with him in Corinth as an active worker (ὁ συνεργός μου) who sends greeting to the Christians at Rome (Ro 16²¹, if this chapter belongs to this date). When Paul started on his last journey to Jerusalem, Timothy was one of his party, and was with him at Troas (Ac 20^{4, 5}); but he is not mentioned again in the Acts, though he probably completed the journey to Jerusalem. He must also have joined Paul in his imprisonment at Rome, as he is associated with him in writing Col. (1¹), Philemon (v. 1), and Philippians (1¹); and St. Paul contemplates sending him on a mission to the Philippian Church (2¹⁹⁻²⁴). Of this no more is heard; but on the sup-

position of the genuineness of the Pastoral Epistles, Paul when released joined Timothy in the East, and while on a journey to Macedonia left him in charge of the Church of Ephesus (1 Ti 1³). His task was to be the representative of the absent apostle, who was hoping to return shortly; he was to check false teaching, to order public worship, to regulate the requisite qualifications for the ministry, and to exercise discipline over all orders in the Church. It may be that for this task he was formally set apart by laying on of hands both of the apostle and of the presbyters (1 Ti 1¹⁰ 4¹⁴, 2 Ti 1⁶, but see above). As the apostle might be delayed from returning, he wrote 1 Timothy to lay stress on the points of primary importance and to strengthen and embolden Timothy. Not long thereafter Paul was arrested a second time and carried to Rome; thence he wrote 2 Timothy, begging Timothy not to be ashamed of the gospel, but to come with Mark to help him in his imprisonment, and, before he leaves, to secure the transmission of true teaching by ordaining trustworthy ministers. It may have been on this visit to Rome that Timothy was himself arrested on the occasion on which the writer of the Ep. to the Hebrews mentions his release (He 13²⁴).

Of Timothy's subsequent history little can be said with certainty. He may be (but this is very unlikely) the 'angel' of the Church of Ephesus addressed in Rev 2:1-7; he may be one of the sources from which St. Luke gained information for the composition of the Acts, though there is no ground for regarding him as the author of the book or of the 'We' sections (see Zahn, *Einführung*, ii. p. 424). Church tradition regarded him as having continued bishop of Ephesus until his death (*Const. Apostol.* vii. 46; Euseb. iii. 46), as having been martyred in a popular tumult when he tried to dissuade the people from taking part in the violent and coarse orgies of the *μεταγυγνεις* (a festival of which there is no mention elsewhere), and his bones are said to have been transferred to Constantinople by Constantius (Polycrates and Simeon Metaphrastes quoted in the *Acta Sanctorum*, iii. pp. 176-183, *Menaion*, ad Jan. 22; Lipsius, *Die Apocryphen Apostelgesch.* ii. 2, 372-400).

Though Titus is a stronger man and more able to deal with crises, yet Paul's love and affection goes out more lavishly to the younger Timothy, whose character is clearly marked. He is affectionate to tears (2 Ti 1⁴), delicate and often ill (1 Ti 5²⁰), timid (1 Co 16¹⁰), shrinking from a proper assertion of his own authority (1 Ti 4¹²), needing to be warned against youthful lusts (2 Ti 2²²), to be encouraged to face shame for Christ's sake (2 Ti 1⁸). Yet he has been Paul's loyal follower and imitator from the first (2 Ti 3¹⁰); he is his 'genuine' son (1 Ti 1²), his loved son (2 Ti 1²), his son loved and faithful in the Lord (1 Co 4¹⁷); of one mind with himself (Ph 2²⁰), 'working the Lord's work as I do' (1 Co 16¹⁰); 'my fellow-worker' (Ro 16²¹); 'our brother and God's minister' (1 Th 3²); 'the slave of Jesus Christ' (Ph 1¹), who 'seeks the things of Jesus Christ' (ib. 2²¹).

Timothy's death is commemorated in the Greek and Armenian Churches on Jan. 22, in the Coptic Church on Jan. 23, in the Latin and Maronite Churches on Jan. 24, though the earlier Latin calendars place it on Sept. 27, perhaps as following the day of the commemoration of St. John, who was thought of as his predecessor in the see of Ephesus (Lipsius, *l.c.* p. 392; Nilles, *Kalendarium Manuale utriusque Ecclesie*, Innsbruck 1896).

Literature.

i. HISTORICAL SITUATION. — St. Paul had recently been with Timothy: either they had been together in Ephesus, or Timothy had come from

Ephesus to meet Paul at some point on his journey to Macedonia (cf. the situation of Ac 20¹⁷ with 1³). St. Paul was bound to go forward, but hoped to return shortly: yet he was so much impressed with the dangerous tendencies of some false teachers at Ephesus, who were tempting the brethren there from walking in 'sober gospel ways,' that he pressed Timothy to stay on in order to counteract them.

Some time elapsed. Paul may have heard that all was not prospering at Ephesus, possibly through a letter from Timothy himself, or his natural anxiety (cf. 1 Thess.) may have prompted him to write. Timothy was, indeed, a 'genuine son'; he had witnessed a good confession in the past, prophecies had pointed him out for the task, he had received a special gift for his ministry by the laying on of hands (1²⁻¹³ 4¹⁴ 6¹²); yet he was naturally timid, he was young (4¹²), he had frequent attacks of illness (5²³), he might be misled (5⁷ 6¹¹); St. Paul's own return might be delayed (3¹⁶): so he writes this letter to press his original charge more solemnly on Timothy, to encourage him in his work, to guide him in his teaching and dealing with various classes in the Church, and to regulate certain points of Church order, which needed organization without delay.

The central purpose is summed up in 3¹⁵ *ἵνα εὐδῇς πῶς δεῖ ἐν αὐτῇ θεοῦ ἀναστρέφεσθαι*.

The subjects are miscellaneous, and no very exact analysis can be expected; but three points stand out clearly in the structure. (1) There is a rough correspondence between the introductory and the concluding sections; cf. 13¹¹ with 6³⁻¹⁰, 18²⁰ with 6¹¹⁻¹⁶ 20²¹. These form a framework for the central part. (2) The central part falls into clearly-marked halves, and the kernel of the whole Epistle, which divides these halves, is 3¹⁶. The mystery of the Incarnate, Risen, and Ascended Lord is the fact on which Christian life and teaching is to be based, by which the Christian minister is to be inspired. (3) 6¹⁷⁻¹⁹ is a postscript, which would more naturally have been placed before or after 6¹⁻², but which was added as an after-thought, perhaps first suggested as needing treatment by 6¹⁹.

ii. ANALYSIS.—

11. 2. Greeting.

Introductory. 13-20.

(a) Reminder of the purpose for which Timothy was left at Ephesus (2), description of the false teaching as speculative rather than ministering to the spiritual life (4-5), as ignorantly taught by teachers who lay stress on law (6-7) without knowing the true purpose of law and its relation to the gospel (8-11).

(b) Personal expression of Paul's own gratitude to Christ Jesus, who had entrusted him with the ministry in spite of his past sin, as a proof of God's long-suffering and as an encouragement to others, for the gospel is summed up in the *faithful saying*, *Χρῆστις Ἰησοῦς ἠγάπη ἐν τῇ σωτηρίᾳ ἡμῶν ἀποκαλύπτει τὸν σώτηρα* (12-17).

[This section is not only a personal digression called out by the thought of God's mercy to himself, but is intended to point Timothy to the same source of strength for his task (*ἰδὲναμεν* 2², cf. II 2¹), and to fix his mind on the central message of the gospel as a gospel of salvation from sin (cf. 5 and 19)].

(c) Reiteration of the charge to Timothy, and enforcement of it by (1) a reminder of the past prophecies about him (18); (2) warning drawn from the fate of two false teachers (19-20).

Formal advice, 21-25. A. General, 21-25. B. Personal, 26-28.

A. General regulations of Church Life.

I. *The proper scope of Public Prayer*.—This is to include all mankind, and specially rulers, that Christians may live a quiet life (21-2). This is based on God's desire to save all men (3-4), which itself rests on (1) the unity of God (2); (2) the nature of Christ representing both God and man (4b); (3) the conscious purpose of Christ's death, who died for all, and commissioned Paul to teach this truth (4-7).

II. *The position of men and women at Public Prayer*.—Men are to lead the prayers (9);

Women to dress modestly and avoid ostentation (9-10), to listen in silence and subjection (11-12). This is based on the order of creation (13), and woman's action at the Fall (14). Yet woman too will share the Christian salvation, if she abide in

a Christian life, for the *faithful saying* declares *σωτηρίαν δεῖ τῇ σωτηρίᾳ* (15).

III. Rules for the choice of ministers.

(1) For the *ἐπίσκοπος*. His position is one of honour and of work (8¹), hence he must be tested as to his private character (2-3); as to his power of ruling his own family well (4-5); he must not be a new convert (6), he must have won the respect of the heathen world (7).

(2) For *διάκονοι*: their private character must be tested (8-10), and their relation to their own family (12). For their office, too, may be one of honour, and will raise their status in Christ's sight (14).

(3) For *γυναῖκες*. They too, if in any official position, must have a high character (11).

The purpose of all these regulations is to secure a right moral life and intercourse in God's family, because it is His Church, and the upholder of the Truth. This truth is summed up in the well-known hymn about Christ—

*ἰσχυρότης ἐν σωτηρίᾳ,
δικαιοσύνη ἐν πίστει,
ἀγάπη ἀγνότητος,
ἡμῶν ἐν ἰσχύρι,
ἡμῶν ἐν ἀγάπῃ,
ἀνελκόμεθα ἐν δόξῃ.*

Warning.—Yet there are symptoms of false teaching, that will contradict this great truth, depreciating marriage and food, though they are God's creatures, God's gifts, capable of sanctification, if received with prayer and thanksgiving (41-5).

[This section forms the transition from A to B. It stands in contrast to 3¹⁶ (41-5), but leads on to 48 (26-28)].

B. Personal advice to Timothy.

(a) *With regard to his own teaching and conduct*.—He is to be loyal to these truths (5), to avoid foolish fables (7), to exercise a true asceticism, such as will produce true holiness—for holiness, according to the *faithful saying*, *ἡλικία ἐξ ἡλικίας τῶν ἐν σοφίᾳ καὶ τῇ μαλακίᾳ*,—and any effort is worth while, for our hope rests on a God of life, a Saviour of all mankind (6-11). He is to assert himself, in spite of his youth; to be a model of Christian character; to attend to public reading, exhortation, teaching; to remember the gift given him for his task, and to throw his whole heart into his work (12-16).

(b) *For his dealings with various classes of people.*

1. *Men*, old and young (5).—2. *Women*, old and young (7).—3. *Widows*, who are to be supported by the Church, only if their own families cannot do so (8 and 9), who are to lead a religious life of prayer (8-9). There is to be kept a list of widows above 60 years of age, of good character; but younger widows are not to be enrolled upon it, but are to be encouraged to marry (7-10).—4. *Presbyters*: the hard-working are to be rewarded (17-18); the sinful to be formally tried and punished impartially (19-21); he must not ordain (remit penalties) hastily, lest he should be entangled in the sins of others (22); but he must keep himself pure; though this need not imply total abstinence (23), and he will need caution in judgment, whether for praise or blame (24-25).—5. *Slaves*, whether under heathen or Christian masters (61-2).

Conclusion.

(a) Further denunciation of the false teachers, as conceited, ignorant, excited about questions which only produce envy and strife, striving to make money, knowing nothing of true Christian content, but ruining themselves through the desire of gain (2-10-13-16).

(b) Solemn appeal to Timothy to avoid such teaching; to aim at spiritual qualities, to lay hold of eternal life, remembering his past confession; and to hold fast Paul's commandment with the thought of the future appearance of the Lord (11-14-118-20).

Doxology (15-16).

Postscript.—Further advice as to the teaching which Timothy is to give to the rich (17-19).

Final appeal to Timothy to guard the deposit and to avoid false claims to knowledge (26-21).

Salutation.

This analysis will have shown that the primary interest is ethical and spiritual. Morality, Salvation, Truth are the keynotes; the Church worship and Church ministries are to minister to them. The kernel is the great hymn of 3¹⁶, but each section has some great doctrinal statement or some faithful saying embedded in it, which leads up to or away from that climax (1¹⁵ 2⁴⁻⁵ 2¹⁵ 4⁴ 5-11 6⁶). The Epistle is full of the thought of the Salvation of all mankind, the consecration of all Creation.

At the same time it is personal throughout; and it is hard to believe that it was intended to be read out as it stands, in public; though a greeting to the whole Church is added (6²¹), and though the substance of the teaching was meant to be conveyed

to the Church (4¹¹ 5⁷ 6¹⁻¹⁷), and though certain sections (2¹⁻¹⁵ 3¹⁻¹⁵ 5¹⁻¹⁶) are necessarily of a general kind. In these it is hard to feel sure whether the writer has only the local needs of Ephesus in his mind, or whether he was consciously framing rules which would be of universal application and obligation (cf. 1 Co 7¹⁷). The phrase *ἐν παντί* (2⁸) favours the latter view; so perhaps does the use of *ἐκκλησία* in 3¹⁰; and some of the rules deal with such essential doctrines or points of morality that the writer may have regarded them as *ipso facto* binding on every one; but his primary thought was probably only for the church or churches of which Timothy was in charge.

iii. LITERARY DEPENDENCE.—The OT is quoted as authoritative only once, 5¹⁵ = Dt 25⁴ (cf. 1 Co 9⁹); but its language is consciously adapted or its history appealed to in—

2¹⁹ = Gn 2²³ (cf. 1 Co 11⁸).

2¹⁴ = Gn 3⁸ (cf. 2 Co 11³).

4⁴ = Gn 1³¹.

5⁸ = Ps 4⁶ (?) (cf. 1 P 3⁵).

5¹⁹ = Dt 19¹⁵ (cf. 2 Co 13¹).

6¹ = Is 52⁶ (cf. Ro 2²⁴).

It will be noticed that nearly every passage had been used in earlier Pauline Epistles.

In 2¹³⁻¹⁴ we have perhaps a later Jewish adaptation of the OT history. A Christian rhythmical hymn is quoted in 3¹⁶; Christian sayings in 1¹⁹ 2¹⁵ (?) 4⁹ (?) (*πιστὸς ὁ λόγος*); Christian prophecy in 4¹ (cf. 1¹⁸ 4¹⁴); liturgical doxologies are used, which had probably passed from Jewish into Christian worship, in 1¹⁷ 6¹⁵⁻¹⁶; traces of a creed seem to underlie 6¹³; and Greek proverbial sayings, 1⁹ (?) 4⁶ 6⁷.

With regard to writings of the NT, there are interesting parallels with the Gospels, especially with St. Luke, which in 5¹⁸ may possibly be treated as 'Scripture' on a level with the OT; but none of the other parallels give the impression of literary quotation, so that it is probably not so here.

Cf. 2⁵ with Mk 10²⁶.

4⁸ " " Lk 18³⁰.

5⁸ " " 2²⁷.

5¹⁸ " " 10⁷ (where Luke agrees verbally with 1 Tim., but Matt. differs).

5²¹ " " 9³⁶.

6¹⁷⁻¹⁹ " " 12²⁰⁻²¹.

There are striking points of contact with 1 Peter; cf. 2⁹⁻¹¹ with 2 P 3¹⁻⁶, 3¹⁴ with 1 P 3¹⁸⁻²², 5⁸ with 1 P 3⁸; but it is not clear whether they do (so von Soden) or do not (so Jülicher) imply literary acquaintance: if they do, the priority seems to be clearly on the side of 1 Timothy.

On the other hand, 'an intimate acquaintance with the Pauline letters must be assumed on the part of the writer' (Jülicher). There are certainly conscious parallels with Romans and 1 and 2 Corinthians.

Cf. 1¹ with Ro 16²⁶. 1¹² with 1 Co 7²⁶ 15¹⁰.

1⁸ " " 13⁹. 2¹¹⁻¹² " " 11¹² 14³⁴.

1⁸ " " 7¹⁶. 4⁴ " " 10³⁰.

1¹⁰ " " 13¹⁰. 4⁸ " " 9²⁵ (?).

1¹⁷ " " 16²⁸. 5¹⁸ " " 9⁹.

2⁶ " " 3³⁰. 5¹⁹ " " 9¹⁴.

2⁷ " " 9¹. 1¹¹ " " 2 Co 4⁴.

The likeness culminates in the relation to Titus and 2 Timothy.

Cf. 1¹ and 1¹¹ with Tit 1³. 1¹² with 2 Ti 1³.

2⁶ " " 2¹⁴. 2⁷ " " 1¹¹.

3²⁻⁴ " " 1⁶⁻⁸. 3⁷ " " 2²⁶.

4¹¹ " " 2¹⁵. 4¹ " " 3¹.

4¹² " " 2⁷ and 18. 4¹⁴ " " 1⁶.

5¹³ " " 1¹¹. 5¹³ " " 3⁷.

6¹ " " 2⁶. 5²¹ " " 4¹.

6² " " 2¹⁵. 6¹¹ " " 2²².

6¹⁴ " " 2¹³. 6¹² " " 4⁷.

The parallels with Romans and 1 and 2 Cor. are explicable either as deliberate adaptations by some later writer or as the reiterations of the same thought by Paul himself. Those with 2 Tim. and Titus are stronger, and either point to nearly contemporary composition by one writer or to a deliberate adaptation. It has been held by von Soden (*Hdcom.* p. 154), Moffatt (*Historical NT*, p. 560), McGiffert (*Apost. Age*, p. 413), that 1 Tim. is the latest of the three, and based on 2 Tim. and Titus; but a mere comparison of style does not indicate any priority as between 1 Tim. and Titus, and favours the priority of 1 Tim. to 2 Timothy. The other points of difference—fuller organization in 1 Tim., fuller description of the false teachers, etc.—are as explicable by the difference of circumstances in each place as by a difference of date.

iv. SITUATION IMPLIED AT EPHESUS.—(a) *The False Teachers*.—The primary purpose of the letter is to remind Timothy of the charge given to him to check certain false teachers; but, as he is assumed to know them, they are described in such general terms that it is difficult for us to identify them. It is not, indeed, necessary to assume that all the descriptions apply to one set; Ephesus supplied a great variety of forms of religion, heathen, Jewish, and Christian (Ac 19); and 4¹⁻³ (cf. Tit 1¹⁰, 2 Ti 3¹) perhaps implies a separate development in the future; yet the probability is in favour of one main tendency. The teachers were prominent in the Church (1⁶): they may have held office [cf. the stress on the discipline over presbyters (5²⁰⁻²²), and the need of more careful choice of ministers (3¹⁻¹³)] two of them had already been 'handed over to Satan' (1²⁰): and they may have attempted to attack St. Paul's own apostleship (1¹ 2¹ 1²⁰ *μὴ θλασθῆμεν*). They are untrue to the central Christian temper (1⁵), they do not listen to the dictates of their own conscience (1¹⁹ 4²), are ignorant (1⁷), influenced by the desire of making gain out of their religion (6⁵⁻¹⁰), living in a state of feverish excitement (6⁴ *ροσῶν*), suggesting curious disputations and investigations which are 'other' than the deposit (1³ 6²⁰), and producing an atmosphere of strife, jealousy, and suspicion (6⁴). In the substance of their teaching a few details emerge.

(1) They claimed to be 'teachers of law' (1⁷): misinterpreting the OT in some way for purposes other than those for which it was intended (cf. 2 Ti 3¹⁶⁻¹⁷): possibly depreciating law in an antinomian spirit, so that the writer has to insist on its real value (1⁸⁻¹⁰): or, more probably, exaggerating its value, so that he has to point out its limitations, as intended only for *δικαί* (1⁸).

(2) They laid stress on *μύθοι καὶ γενεαλογίαι* (1⁴ 4⁷). The reference of this is also ambiguous. The words would be applicable to the speculative theories of Gnosticism, with its legends about the creation of the world and the relationships of the various æons which separated God from matter. and the Christian writers of the 2nd cent. constantly made this application (Irenæus, *adv. Hær.* Præf.; Tertullian, *c. Valent.* 3, *de Anima*, 18, *de Præscriptione*, 33, *adv. Marcionem*, i. 9; Epiphanius, *Hær.* 33. 8).

But the context connects them with teaching about the Law (1⁷): Titus speaks of *Ἰουδαϊκοὶ μύθοι* (1¹⁴), and connects *γενεαλογίαι* with *μάχαι νομικαὶ* (3⁹); and Ignatius (*ad Magn.* 8) uses exactly similar language of the Judaizers of his day. They are therefore Jewish in origin, and were probably speculations based upon the legendary history of the patriarchs and their descendants, akin to the Jewish Haggadoth, and illustrated by the Book of Enoch, the Book of Jubilees, and the treatise on Biblical Antiquities attributed to Philo [cf. Hort, *Judaistic Christianity*, pp. 130-146]. The

reference to Jannes and Jambres (2 Ti 3⁸⁻⁹) will then be a half-ironical *ad hominem* illustration from one of their own favourite myths.

(3) They laid a special claim to *knowledge* (6²⁰). This again would have a peculiar applicability to any form of Gnosticism, and it is so applied by Hegesippus *ap. Euseb.* iii. 32; but it is equally applicable to the Rabbinic claim to special knowledge (Lk 11¹³, Jn 7²², Ro 2²⁰). The word *ἀντιθέσεις* in 6²⁰ offers an easy suggestion to the *ἀντιθέσεις*, 'Contradictions between OT and NT,' of Marcion; but such an allusion is inconsistent with the stress on Jewish law (cf. 2), and impossible in date, unless the verse be a subsequent interpolation. It may either refer to 'Rival theses,' i.e. conflicting decisions of the Jewish Rabbis on the application of the Law, the Jewish Halakha, the 'tradition of the elders' (so Hort, *l.c.*); or it may be translated 'oppositions' (cf. 2 Ti 2²⁵), and if so, gives no clue to the nature of the opposition.

(4) They taught a false *asceticism*, prohibiting marriage, requiring abstinence from certain foods (4¹⁻⁴), and perhaps from wine (5²), and that on the ground that matter was evil (4⁴⁻⁵, cf. 4⁷⁻⁸ 6¹⁷). This particular teaching is ascribed to *δαίμονια*, and so probably came from a heathen source; and it is quoted as a prophecy of the future, and so is perhaps separable from the rest. But the writer is probably quoting a *past* prophecy as being fulfilled in the present, and it is placed in close connexion with the 'myths' (4⁷). This teaching, again, is exactly parallel to the teaching of later Gnostics (cf. Clem. Alex. *Strom.* iii. 3; Tert. *adv. Marcionem*, i. 14; Irenaeus, *Hær.* i. 28); but it may equally have arisen from an exaggeration of the Jewish law, with a mixture of Oriental speculation, coming perhaps through Essenism (cf. 1 Co 7 and 8, Ro 14, Col 2, He 13).

It is perhaps legitimate to read allusions to the false teachers in the regulations of chs. 2, 3, which follow so directly upon the warning against them. If so, their teaching was characterized by an exclusiveness, limiting God's universal salvation, whether from a Gnostic or a Jewish standpoint, and perhaps denying the salvation of women; perhaps also by a low standard of morals.

The main tendency, then, is that of a Rabbinic speculative Judaism, playing with historical legends and casuistry, and coloured by an asceticism borrowed from some heathen source, perhaps through Essenism (cf. Lightfoot, *Col.* 'On the Colossian Heresy,' *Biblical Essays*, xi., Ignatius, i. pp. 359-374).

(6) *Organization of the Church.*—The Church forms one organized community, described as God's family (3¹⁵), an 'ecclesia' of a God of life (*ib.*); its members are of *ἀδελφοί* (4⁹), of *πίστοι* (4¹² 5¹⁶ 6²¹), *ἀγαπῶντες* (5¹⁰). They meet for common worship, and apparently up to the time of this letter men and women alike had been wont to teach and to lead the prayers, but the writer limits this right to the men (2⁸⁻¹²). At the worship there are reading, exhortation, and teaching (4¹³), prayers, intercessions, thanksgivings (2¹ 5²). Over this body the apostle is supreme: he hands over offenders to Satan (*παρέδωκεν*, 1²⁰); but this would not necessarily exclude the co-operation of the Church, as in 1 Co 5⁴; his exhortations (2¹) and wishes (2²⁵) are authoritative; the true teaching is the gospel, which has been entrusted to him (1¹¹ 2⁷). Timothy is his delegate, 'the instrument of an absent rather than a wielder of inherent authority' (Moberly), commissioned to ordain ministers (though the whole community would have a voice in the choice of them, cf. 3² and 10), to exercise discipline over them, to regulate worship, to control teaching, and hand on the traditions of the apostle. His exact status is not clear: he may have been a temporary dele-

gate for a special work, as he had been before to Corinth (1 Co 4¹⁴⁻¹⁷) and Philippi (Ph 2¹⁹), and as Titus had been twice or thrice to Corinth (2 Co 7 and 8); or he may have been permanently set apart as St. Paul's delegate for the higher functions of ministerial work, unlimited by any local sphere, but sent from time to time to various places; or, again, he may have received a permanent commission to represent the apostle and a permanent localization at Ephesus, or possibly throughout Asia Minor. Either view is tenable, but the first springs most naturally out of the language of 1³ 4¹⁴.

It is also uncertain whether he had received special ordination for this task. He had received a special gift, given by laying on of the hands of the presbyters, and prophecies had led Paul to choose him (1¹⁶ 4¹⁴); but the reference may be either to consecration for *this* piece of work, or to formal ordination when he first became Paul's helper (Ac 16¹⁻⁴). His position seems to be that of a vicar apostolic rather than of a localized bishop, though it is the germ out of which the later localized and monarchical episcopate developed.

The more permanent ministry under Timothy is assumed to be already in existence. There are no directions to establish any new office, unless it be that of the church-widows, but only to regulate and spiritualize those that exist. These are—

(1) The *ἐπίσκοπος*. He occupies a prominent position in the eyes of the Church and the heathen world; he must have high moral qualifications: from these it may be inferred that his duties will be to entertain travelling brethren (*φιλόξενος*), to teach (*διδασκτικός*), perhaps to control the finances (*ἀφιδάργυρος*), to preside and care for the Church (*προσέηται, ἐπιμελεῖσθαι*).

(2) *πρεσβύτεροι*, who are formally ordained (?) for the position (5²²), who also preside (*προεστῶτες*), who also preach and teach (*ἐν λόγῳ καὶ διδασκαλίᾳ*), who receive maintenance in return for their work, and who are under Timothy's discipline. (There is not, as often assumed, a contrast in 5¹⁷ between teaching and non-teaching presbyters, but only between those who take pains with their teaching and those who do not).

Are these two different orders of ministers, or only two names for one order? This question, too, cannot be positively answered. The fact that *πρεσβύτεροι* are not mentioned in ch. 3; that the *ἐπίσκοπος* is not mentioned in ch. 5; that the same functions of presiding and teaching are attributed to both; the *prima facie* meaning of Tit 1⁵⁻⁷, cf. Ac 20¹⁷⁻²⁸—these favour the identification of the two. On the other hand, the constant use of the singular *ἐπίσκοπος* and of the plural *πρεσβύτεροι*, and the usage of the 2nd cent., favour the separation, and leave it a tenable view that out of the many presbyters one bishop was already chosen at Ephesus in order to preside over the whole and to represent them to the outer world.

(3) *διάκονοι*. Subordinate officers, whose character has to be tested before the whole community before they enter on office. Their duties are not defined; but they perhaps have to administer the finances under the *ἐπίσκοπος* (*μὴ αἰσχροκερδεῖς*), and to teach, as a successful diaconate gives them boldness of speech. After their diaconate they may perhaps hope to rise to a higher position (*βαθμὸς*) in the Church (3⁸⁻¹⁰, 12, 13).

(4) *γυναῖκες* are also mentioned in the official ministry, between two sections dealing with *διάκονοι*: i.e. probably 'women who are deacons,' deaconesses; but possibly only 'wives of deacons.' A high character is required of them, but their duties are not defined.

(5) *χήραι*. The regulations for widows are described at fuller length, and give the impression that the writer is introducing a fresh organization in this case. There is probably a distinction to be drawn between lonely widows who are the

objects of charity, and who devote their time to prayer (5⁴⁻⁶), and active widows who are church workers, whose names are entered on a church list, after careful examination of their antecedents (5⁹⁻¹⁰). The distinction is not, however, clearly marked. See also art. WIDOW.

[Cf. Gore, *The Church and the Ministry*, ch. v.; Moberly, *Ministerial Priesthood*, ch. v.; Hort, *Christian Ecclesia*, chs. xi. xii.; J. H. Bernard in *Camb. Gr. Test.* pp. lvi-lxxiv; Weiss, § 4; Zahn, *Eint.* i. 459-466].

v. AUTHORSHIP.—The Epistle claims to be by St. Paul, and is directly attributed to him by Irenæus (Præf. ii. xiv. 7, iv. xvi. 3), Tertullian (*de Præscr.* c. 25), Clement Alex. (*Strom.* ii. p. 457, iii. p. 534), and the Muratorian Canon; it was included in the Latin and Syriac versions, and this implies an acceptance of its Pauline claim. It was known to Marcion (c. 140); there are many parallels to its regulations in the earliest documents that underlie the *Apostolic Constitutions* (cf. Harnack, *TU* II. v. pp. 50-52, or *Chron.* i. p. 483): these may be due to independent treatment of some earlier list of regulations, but the more prob. view is that the *Apost. Const.* give a later and fuller adaptation of 1 Timothy; and there are parallelisms to its language in the Epistle of Vienne and Lyons (Eus. v. 1), Hege-sippus (Eus. iii. 22), Justin Martyr (*Dial.* vii. 17, xxxv. 3(?)), and above all in Polycarp (cc. 4. 5. 8. 9. 12), Ignatius (*ad Trall.*, *Inscr. ad Magn.* 8, *ad Polyc.* 3), and Clement of Rome (7. 21. 54. 61), which make it probable that it was known to all these writers, and well known in Asia Minor before A.D. 115, and perhaps at Rome before A.D. 95. For an instructive comparison of the Pastoral Epistles with Ignatius, cf. von der Goltz in *TU* XII. iii. pp. 107-118, 186-194.

On the other hand, it was rejected with 2 Tim. by Tatian (Jerome, *Prolog. ad Titum*), by 'certain heretics' (Clem. Alex. *Strom.* ii. 11), and with both 2 Tim. and Titus by Marcion (Tertull. *adv. Marcionem*, v. 21) and Basilides (Jerome, *l.c.*). Tertullian implies that the reason of the rejection was that they were private letters; but it may have been due to a dislike of their teaching, or, if they were not Pauline, to a real knowledge of their origin. The external evidence is as strong in church writers as for any Epistle; but it is met by a persistent rejection on the part of some heretics.

The internal evidence permits two alternatives. Either the author is Paul, or he is some later writer anxious to support Christian morality and orthodox teaching against growing heretical tendencies, and for this purpose composing the letter, possibly with the help of some genuine Pauline fragments, and certainly with a deliberate use of the Pauline letters. In deciding between these two alternatives it is not possible to appeal to points of similarity with Pauline language or with St. Paul's character, as they are assumed on both sides; on the other hand, differences from the known facts of St. Paul's life are as much an argument against the second alternative as against the first.

(1) The historical situation cannot be fitted into the account of St. Paul's life in the Acts. This is true in spite of recent attempts to place it at the time of Ac 20²⁸ (Bartlett, *Apostolic Age*, pp. 179-182, 511-515; Bowen, *The Dates of the Pastoral Epistles*, London, 1900); yet the Acts is incomplete even over the ground which it traverses, e.g. it makes no mention of the intricate circumstances connected with the mission of Titus to Corinth, i.e. it helps us to understand 2 Cor. as little as this Epistle. Further, it confessedly ends before the death of St. Paul. There are other grounds

for believing in a release of St. Paul after Ac 28 (cf. art. PAUL), and the situation implied here may easily fall in the interval between that release and his death, about the same time as Titus but before 2 Tim., as this Epistle gives no trace of the danger of persecution.

(2) The style is unlike St. Paul's more argumentative passages, but it resembles that of the more practical sections of the earlier Epistles, e.g. 1 Th 5, Ro 12-16, 1 Co 16, 2 Co 8. 9. The general structure, the quick passage from practice to doctrinal basis, the personal interludes (1¹² 2⁷), the frequent repetition of a word and its cognate forms (*πίστις*, 1¹²⁻¹⁷; *πᾶς*, 2¹⁻⁷; *πλοῦτος*, 6¹⁷⁻¹⁸), the fondness for sharp antithesis (5⁵ 5¹³ 6¹⁹), the use of the language of the OT and of Greek proverbs, are subtle points that might escape an imitator. But two points of difficulty remain. (a) The vocabulary is largely different. The average of *ἁπλᾶ λεγόμενα* is one for every verse and a half: a large group of words (34 in the three Pastoral Letters) is not found elsewhere in St. Paul, but is found in St. Luke's writings; and many characteristically Pauline words are absent (cf. Holtzmann, *Eint.* pp. 318, 319, *Past. Briefe*, p. 100; W. H. Simcox in *Expositor*, 1888, p. 180).

But the argument from the mere use of words is always precarious (cf. an illustration from Shakespeare in the *Expos. Times*, June 1896, p. 418, and from Dante in Butler's 'Paradise,' p. xi); St. Paul's language elsewhere shows great variation, even within the compass of one letter (cf. 2 Co 8. 9 with 10-13); the proportion of *ἁπλᾶ λεγόμενα* is—

1 for 1.55 verses in the Past. Epp.;

1 „ 3.06 „ „ 2 Cor.;

1 „ 5.53 „ „ 1 Cor.;

hence the difference between 2 Cor. and 1 Cor. is as great as that between the Past. Epp. and 2 Cor. (Kölling ap. Weiss, p. 51). Within the Pastorals 72 words are found in 1 Tim. only, 44 in 2 Tim. only, 26 in Titus; 10 are peculiar to 1 Tim. and Titus; 8 to 1 and 2 Tim.; 3 to 2 Tim. and Titus. *ὠφέλιμος*, *εὐσεβεία*, *διάβολος* as adjective, are common to the three, and they all have some word cognate to *σώφρων*, and the phrases *πιστὸς ὁ λόγος*, *ἐπίγνωσις ἀληθείας*, *ἡ ὑγιαίνουσα διδασκαλία*, *ὁ νῦν αἰὼν*. There is no word which is of clearly later date: many of the differences arise from difference of subject, esp. in 2⁹⁻¹⁰ 5²⁻¹⁶ where they are most frequent; some occur in phrases which seem to be quotations (see above). Many are words common in the Greek of the Apocrypha (cf. the instances from 2 Mac. in *Camb. Gr. Test.* p. xxxix). Some few are Latinisms (*χάριν ἔχω*, *πρόκριμα*), due perhaps to residence in Rome; others are medical metaphors (*ὑγιαίνειν*, *νοσεῖν*), due perhaps to intimacy with St. Luke; while it is difficult to estimate how far the mere wording of a letter was due to the amanuensis employed. [The question of the vocabulary is carefully treated in Findlay's Appendix to Sabatier, *The Apostle Paul*].

(b) But many of the phrases seem technical and stereotyped: *Ἰησοῦς ἡ ἐλπίς ἡμῶν* (1¹); notice the advance on Col 1²⁷), *ἡ παραγγελία* (1²), *ἡ ὑγιαίνουσα διδασκαλία* (1¹⁰), *πιστὸς ὁ λόγος* (1¹⁵ etc.), *τὴν καλὴν στρατείαν*, *τὴν πίστιν* (1¹⁹), *ὁ σωτὴρ ἡμῶν θεὸς* (2⁹), *τὸ μαρτύριον κατὰ ἰδίους ἰδίοις* (2¹⁰), *ἡ τεκνογονία* (?) (2¹⁰), *τὸ μυστήριον τῆς πίστεως* (3⁹), *τὸ τῆς εὐσεβείας μυστήριον* (3¹⁶), *ἡ καλὴ διδασκαλία* (4⁹), *ἡ διδασκαλία* (6¹), *ἡ εὐεργεσία* (?) (6³), *ἡ ἐντολή* (6¹⁴), *ἡ παραθήκη* (6²⁰); there is an articulated fixity about them which seems to mark a late date, and to be unlike the freshness of the earlier style. This, again, is true; but the date on any hypothesis is later, the diction is that of 'the old man' less 'eloquent,' and he is writing to an intimate companion, so that his language may naturally have somewhat of an esoteric stamp.

(3) The tone of the religious life implied shows a similar development. It is in all essentials Pauline; for it consists of life eternal, won by Christ's death, which has brought salvation to all mankind; and this life must show itself by a high Christian morality, and be ready to face the appearance of Jesus Christ. But there is more stress on the value of law; on the need of good works, or attractive works, *καλὰ ἔργα* (4 times in 1 Tim., 3 in Tit., elsewhere not in St. Paul); religion is described as *εὐσέβεια* (8 times in 1 Tim., once in 2 Tim. and Tit., not elsewhere) or *θεοσέβεια* (1 Ti 2¹⁰ only); the favourite qualities are those of a sober, orderly loyalty. Yet each point could be illustrated from St. Paul (1 Co 6⁴, Ro 3²¹ 7¹³, Gal 1⁸ 5²²⁻²³, Eph 2¹⁰), and there is a uniform tendency in the earlier Epistles to pass onward from the strain of the first conversion to the quiet ordered after-life, and to bring every sphere of human relationship under the control of Christian discipline (cf. W. Lock, *St. Paul, the Master Builder*, ch. 4).

(4) So, too, with regard to Church organization. There are more details of it, and more stress upon it; yet the details can be paralleled elsewhere: cf. Ac 14²³ 21¹⁷, Ja 5¹⁴ (*πρεσβύτεροι*), Ac 20²⁸, Ph 1¹ (*ἐπισκοποι*), Ph 1¹ (*διδάκοντα*), Ro 16¹ (deacons), Ac 6¹ 9³⁶, 1 Co 7 (*χῆραι*). St. Paul organized some ministry from the first (1 Th 5¹³, 1 Co 12²⁸); his influence from the first had been used to check the irregular utterances of the spirit and to lay greater stress on the ordered ministry (1 Co 12-14); and the further stress upon it is natural with the lapse of time bringing new developments of false teaching and the prospect of his own death.

The prominence of prophecy, the uncertainty about the exact status of Timothy, about the presence of a monarchical episcopate, about the distinction between *ἐπισκοπος* and *πρεσβύτερος*, the need of regulation of public speaking by women, all favour a date considerably earlier than the Ignatian letters.

Certainly the letter gives the impression of a Church well established; the functions of the various ministers are implied as already fixed, the *ἐπισκοπή* is an object of desire (3¹), Timothy can choose between novices and older members of the Church (3²), the Church widow must be of 60 years of age (5⁴), there has been sad experience of the falling away of Christian widows (5¹²⁻¹³); but none of these points carry us beyond the possible conditions of a flourishing community in a large city which may have been established at least ten years, at a time of quick development such as is stamped on every page of the NT.

The advice of 5¹⁴ is inconsistent with that of 1 Co 7⁴⁰, but there the advice is confessedly a counsel of perfection (cf. v. 30), and given in face of a special necessity.

A comparison with other documents connected with Ephesus, e.g. Ac 20¹⁸⁻³⁵, esp. 30, the Prologue of St. John (with the stress on God's creation of all things (cf. 4¹), of the manifestation of Christ in flesh (cf. 3¹⁶), of the contrast between the Law and grace and truth and glory (cf. 1⁹⁻¹¹), and with the Ep. to Eph. (with its stress on the Ascended Lord as the source of spiritual strength, on the importance of the ministry, of the Church, of family life, its witness to the growth of Christian psalms and hymns), shows that the writer knows the conditions of Ephesus in the 1st century.

(5) The teaching of the false teachers has been shown to be compatible with the Pauline authorship, and it may be added that the very vagueness of it suits an earlier rather than a later date, while the absence of any certain or probable allusion to Docetism, which was the prevalent danger in Ephesus and its neighbourhood at the time of

1 John and of the Ignatian letters, is in favour of placing this Epistle before those.

(6) Some critics feel an artificiality in the situation implied. Paul is about to return shortly, yet troubles to write on points like those of 2¹⁻³¹³, which could afford to wait; yet the circumstances of the writing of 1 Cor. and 1 Thess. (1 Co 4¹⁰, 1 Th 3¹¹) are exactly analogous. Again, Timothy is placed in a position of very great importance, yet is distrusted as young, liable to be weak, and to be misled; but this corresponds to the little we know of Timothy's character elsewhere, and it is probable that he had failed to deal with a crisis at Corinth (cf. TIMOTHY); and both these are objections to any unity of authorship; indeed, if anything, it is more probable that St. Paul should have spoken thus in a private letter to Timothy, than that a later writer, who was *ex hypothesi* using Timothy as a type of an important official, treated as being the recipient of important instructions, should have thus weakened his character.

The conclusion is difficult. The Epistle marks at all points an advance on the earlier Epp. of St. Paul. In style, in organization, in stereotyped fixity of teaching, in the character of the teachers opposed, there are marked differences. On the other hand, in all these points it also offers marked differences from any writings of the 2nd cent. It falls within a period in which we have little to guide us. 'The secularization of Christianity is in full swing' (Jülicher), but there were the beginnings of this in 1 Cor. and Ephesians. 'The writer is a type of a time when the ethical voice of a noble Hellenism and the Roman instinct for organization are uniting themselves with the Christianity which had sprung as religion out of Judaism, in order to build up the old-catholic Church' (von Soden); but such incorporation of Greek and Roman thought had taken place in Paul's time, and was mainly due to his genius. It is Pauline in claim; admittedly Pauline in central doctrine; 'their author was an adherent of the apostle's who reproduced his master's ideas' (Moffatt, *l.c.* p. 561). He has an intimate acquaintance with the Pauline letters: the letter was accepted as Pauline by those who most represented Paul's teaching. Whether we can take the further step and assert that it is Paul's own work, depends upon the question whether the stress on organization, authority, teaching, loyalty, can fall within his lifetime; and whether he was one who could forget the controversies of the past and devote himself in the face of a new danger to lay stress on the foundation already laid, and to try to secure a high moral and spiritual tone within the Churches under his control by enforcing more strictness in worship and in the qualifications for the ministry. The points of comparison with the earlier Epistles can scarcely be urged in favour of the authorship; indeed in one or two places, 1¹¹ 2⁷ (esp. the parenthesis, *ἀλλήθειαν λέγω, οὐ ψεύδομαι*), the language seems scarcely explained by the circumstances of the time, but to be due to a mere extract from earlier letters, and if so, would be an argument *against* genuineness; but these phrases may be reminiscences in St. Paul's own mind of a past controversy (cf. Eph 2⁹) rather than extracts from his letters; while the differences, e.g. in the salutation (1¹), in the deeper description of his own sinfulness (1¹²⁻¹³), side by side with the stronger assurance of the truth of his message, the boldness of the criticism on Timothy, the personal reference to his illnesses and his water-drinking, the affectionateness of the last appeal (6²⁰),—all these are subtle points, which are more natural at first than at second hand, and which seem to bring us face to face with Paul himself.

vi. INTEGRITY. — There is no MS ground for

doubting the integrity of the Epistle; nor is there any intrinsic inconsistency or lack of arrangement—given the ordinary discursiveness of a letter—which would suggest interpolation. For the awkward anacoluthon 1², cf. Eph 3¹; 3¹¹ comes in awkwardly between 1¹⁰ and 1¹², and may need transposition, but 3¹² may be an after-thought (cf. 1 Co 1¹⁶); for 6¹⁷⁻¹⁹ cf. Ro 16¹⁷⁻²⁰.

But the doubt has arisen in connexion with the authorship. On the theory of the Pauline authorship, it has been suggested that the sections which imply a late date may be later additions to a genuine letter. Thus 3¹⁻¹² is of a quite general character: it has no personal expression: it could be dropped without destroying the sequence of thought. 2¹⁻⁷, 8-15 5¹⁻¹⁶, 17-22 are almost as general; and the personal expressions παρακαλῶ 2¹, βούλομαι 2² 5¹⁴, ἐπιτρέπω 2¹², διαμαρτύρομαι 5²¹, might be those of Timothy himself or of some later authority, laying down detailed instructions in accordance with the general principles enunciated by St. Paul. This would meet the difficulty of the large number of non-Pauline words in these sections; but that may be met by the fact that Paul is treating of new subjects, and is perhaps borrowing from half-stereotyped lists of virtues required of candidates for office, perhaps based on Jewish requirements, perhaps on Gentile analogies (for the correspondence between the requirements of 3¹⁻¹² and the characteristics of the Stoic wise man, cf. *Camb. Gr. Test.* p. 57): besides, it makes it necessary to treat 2⁷ as a deliberate insertion, with a view to claim Pauline authorship for the section [cf. Harnack (*Chron.* pp. 482-484), who treats 3¹⁻¹² 5¹⁷⁻²⁰ as fragments later than 138 A.D.]. Again, on the theory of the non-Pauline authorship, it is necessary to explain the personal allusions. Some of these (1⁴, 12-16 2⁷) may be borrowed from or based upon previous letters, but 5²² cannot be; it cannot have been invented by a forger; it must be genuine, and the very awkwardness of its insertion at this point is against the theory of a second-hand compiler, who might more naturally have inserted it in 4⁹⁻¹⁶. The command and the insertion of the command here depend upon some intimate acquaintance between the writer and Timothy, and intimate knowledge of the conditions at Ephesus.

The most elaborate attempt to resolve the letter into its constituent factors is that of Knoke (*Commentar zu den Pastoralbriefen*, 1889), who assumes a combination of three letters—two of them from Paul to Timothy, the third the final redaction in the 2nd cent., in the interests of Church organization. An attempt to read these letters consecutively as arranged by him,

- (a) 1³, 4, 12, 210 3¹⁴, 412 5¹⁻³, 5, 6, 11-15, 19-24,
(b) 1¹²⁻¹⁷ 3¹⁴, 411, 15-16 2¹²⁻¹⁵ 5⁷⁻⁹ 6¹⁷⁻¹⁹,
(c) 3¹⁻⁹, 12, 10, 13 2¹¹ 5⁹, 10, 16, 4, 17 6¹, 2,

will show the arbitrariness of the division, and the possibility on such a test of subdividing the three still further. For exact details of suggested theories cf. Moffatt, *l.c.* p. 702; Clemens, *Die Einheitlichkeit der paul. Briefe*, pp. 143-175; McGiffert, pp. 405-412; Harnack, *Chron.* i. pp. 480-484.

vii. VALUE.—The intrinsic value is partly independent of its authorship, for the Pastoral Epistles, even if not written as proofs of love and affection by Paul to Timothy and Titus, 'in honore tamen ecclesie catholice in ordinatione ecclesiasticæ disciplinæ sanctificatæ sunt' (Murator. Canon). But its witness is not so much to details of ecclesiastical order (for these are ambiguous), as to principles.

(a) It witnesses, more fully than even Titus and 2 Tim., to the principle of the delegation of apostolic authority. The highest duty of ordaining, and exer-

cising discipline over all the officers, is not inherent in a Church already possessing presbyters and deacons, but is delegated from above to a representative of the apostle. On the Pauline authorship the fact that this was Paul's view, on the non-Pauline authorship the belief in the fact is testified. St. Paul acts as St. John acted in the presence of the growing needs of the Church (Clem. Alex. *Quis Dives*, c. 42).

(b) It witnesses that a highly ethical and spiritual conception of religion is consistent with and is safeguarded by careful regulations about worship, ritual and organized ministry. There is no opposition between the outward and the inward, between the spirit and the organized body.

(c) It breathes a healthy manly impatience of intellectual quibbles and sophistries, which are divorced from a moral life. It is akin to St. Paul's protest against *σοφία* and *γνώσις* in 1 Co 1 and 7, but it carries it into a different region.

(d) In details it has had a direct influence upon the position and dress of Christian women in worship—though here it does not add anything to 1 Cor.—upon the subjects of prayer in all Christian liturgies, making them universal and loyal, and so contributing to a missionary feeling and to a conciliatory attitude of the Church to its rulers. It is again the first handbook of Church discipline, and its direct influence may be seen in the *Apostolic Constitutions* and subsequent legislation, mainly in requiring high moral qualifications in all Christian officials, and in insisting on a high standard of justice and impartiality in dealing with them. Even more is it the germ of treatises on the qualifications of the ministerial office, such as St. Chrysostom's *περὶ λειτουργίας*; St. Ambrose, *de Officiis Ministrorum*; St. Gregory, *de Pastoralis Cura*.

LITERATURE.—A very full account of previous literature will be found in Holtzmann's or in Mangold's *Einführung*. It will be sufficient here to mention as the best modern statements of the problems connected with the Epistle: (1) against the Pauline authorship, Holtzmann, *Die Pastoralbriefe* (1886); von Soden in the *Hand-Commentar*; Harnack, *Chronologie*, i. pp. 483-485 (1897); Jülicher, *Einführung*, pp. 135-156 (1901); McGiffert, *History of Christianity in the Apostolic Age*, pp. 383 ff. (Edin. 1897); Moffatt, *Historical NT*, pp. 556-563 (Edin. 1901).

(2) For the Pauline authorship, Weiss in Meyer's *Commentar zum NT*; Riggenbach in the *Kurzgef. Comm.* (semi-Pauline); Zahn, *Einführung*, i. pp. 393-489 (1897); Salmon, *Intro. to NT*, c. xx.; Findlay's Appendix attached to the translation of Sabatier's *The Apostle Paul* (1891); Lightfoot, *Biblical Essays*, chs. xi, xii, and Hort's *Judaistic Christianity and The Christian Ecclēsia*.

For exegesis: Theodore of Mopsuestia with Swete's notes (Cambridge, 1882) is indispensable as representing the Patristic views. Theodoret and Ambrosiaster are terse and sensible, and St. Chrysostom's homilies are illuminating and edifying. Of modern commentators von Soden for keen penetration, Weiss and Riggenbach for well-balanced judgment, are pre-eminent, and H. P. Liddon for careful analysis and Patristic illustrations (1897). Elliott, Alford, Wace (in the *Speaker's Commentary*) are careful and learned; Plummer in the *Expositor's Bible* interesting and suggestive; J. H. Bernard in *Camb. Gr. Test.* (1899) and A. E. Humphreys in *Camb. Bible for Schools* (1897) are excellent school manuals; R. F. Horton in the *Century Bible* (1901) is interesting, but inexact and inconsistent. Useful notes on special verses will be found in Westcott-Hort, ii. App. p. 133, and Field's *Opus Norwicense*, iii. pp. 203-214.

W. LOCK.

TIMOTHY, SECOND EPISTLE TO.—

- i. Historical Situation of the writer.
- ii. Analysis.
- iii. Literary Dependence.
- iv. Situation at Ephesus.
 - (a) False Teaching.
 - (b) Church Organization.
- v. Authorship.
- vi. Integrity.
- vii. Value.

i. HISTORICAL SITUATION.—St. Paul is in prison at Rome, bound with a chain, and had been a prisoner for some length of time (1², 16, 17 2⁹). He had incurred imprisonment in the cause of Christ (1²) as an apostle and teacher of the gospel (1¹² 2¹⁰); perhaps some definite charge of misdemean-

our had been made against him (*ὡς κακούργος*, 2^o; cf. *κακωαὶός*, 1 P 2¹² 4¹⁸), but this may be no more than a simile). But the place and circumstances of his arrest are not clear. He had been travelling through Asia Minor and Greece with a band of fellow-travellers (cf. Tit 3¹³ *οἱ μετ' ἐμοῦ ὁδοιῖται*), including Demas, Crescens, Titus, Tychicus, Erastus, and Trophimus; apparently he had been opposed at Troas by Alexander, and obliged to leave hastily (4^{13, 14}): in Asia he was deserted by those to whom he looked for support (1¹⁵): at Miletus he left Trophimus ill: at Corinth Erastus stayed behind: the rest probably moved forward to Nicopolis (Tit 3¹²): and there, or perhaps at Rome itself, he may have been arrested: Demas deserted him: Crescens was despatched to Galatia (?Gaul): Titus to Dalmatia: Tychicus to Ephesus: and when he writes Luke is with him single-handed. An Asiatic Christian, Onesiphorus, had found him out, though with difficulty, had cheered his loneliness, and perhaps was enabled to better his condition (1¹⁶): the Roman Christians are in touch with him, and he is able to send a word of greeting from all of them (4²¹). Perhaps his trial had already begun and been adjourned (4^{16, 17}), but cf. Zahn, *Eintl.* i. p. 402, and Spitta, *Zur Gesch. des Urchristentums*, i. pp. 35-50, who make out a good case for referring this to his trial in the previous imprisonment: at any rate he regards his death as certain and as not far off (4^{8, 9}). So in his loneliness he wants help, and his mind turns to his 'beloved son' Timothy, and to Mark, to whom he had been reconciled. Timothy was at the time somewhere in Asia Minor, —probably at Ephesus, as he is in a position of authority, where he has to teach and hand on his teaching, cf. 1¹⁸ 2^{2, 14} 3¹ 4^{2, 19}, —and Paul writes to beg him to come, and to come quickly before the winter, to pick up Mark by the way, and to stop at Troas for the cloak and books and parchments left there. But Timothy was of a timid nature, and the journey was one which would imply peril, and possibly he may arrive too late to see St. Paul, or may have to face death himself; so he exhorts him to have courage and to provide others who will be able to teach the truth, and warns him against the special dangers which are likely to beset his teaching. The interest of the Epistle oscillates between St. Paul's desire for sympathy and his wish to strengthen Timothy's hands and to guard the deposit of the truth.

ii. ANALYSIS.

1¹⁻². Greeting.

3-5. Thanksgiving for Timothy's past affection and faith, and desire to see him again.

A. 16-213. Exhortations based mainly on St. Paul's position.

B. 214-48. Exhortations based mainly on the position of Timothy.

A. Exhortation (1) to stir up his ministerial gift (6): remembering the nature of the Spirit given by the laying on of the apostle's hands (7).

(2) to be bold to face suffering (8): remembering (a) the power and grace of God, which has conquered death and brought life and immortality to light (9, 10).

(b) the example of Paul himself, who has faced suffering with perfect trust in God (11, 12).

(3) to hold fast the truth entrusted to him (13), in the strength of the indwelling Spirit (14).

These exhortations are enforced by an appeal to the example of others:

(a) as a warning—the disloyalty of the Asiatic Christians (15).

(b) as an encouragement—the boldness and affection and kindly help of Onesiphorus (16-18).

(4) to be strong in the power of grace (21).

(5) to commit the true teaching to others and secure its tradition (22).

(6) to be ready to face suffering,—like a noble soldier (3), which implies whole-hearted service (4); like an athlete, who must keep the rules of the game (5); like a husbandman, who is only rewarded if he toil well (6, 7): remembering (a) the gospel of the Risen

Christ, which has enabled Paul himself to face suffering for the elect's sake (8-10).

(b) the faithful saying—with its encouragement to all who suffer with Christ, and its warning to all who deny Him (11-13).

B. Exhortations, mainly dealing with the nature of the teaching to be given by Timothy—

(1) to urge Christians to avoid idle and useless discussions (14).

(2) to be himself a true worker, rightly teaching the truth and avoiding profane babblings (15, 16): remembering that (a) such discussions lead to impiety and spread quickly to the ruin of faith (17, 18).

(b) whereas God's foundation rests upon His knowledge of His own, and their abatement from iniquity (19).

(c) in every house there are good and bad vessels, and a man must cleanse himself from evil to be a good vessel (20, 21).

(3) to avoid youthful passions, and to aim at the true spiritual qualities (22).

(4) to avoid foolish investigations (23): for they cause strife, and hinder the true character and patient hopeful work of the servant of the Lord (24-26).

(5) to avoid false teachers: for,

(a) there lies in the future a great growth of empty profession of Christianity combined with selfishness and a low standard of morality (31-3).

(b) this will be ministered to by false and vain teachers, deluding their votaries and opposing the truth, like Jannes and Jambres, who will, however, be soon exposed (34-8).

(6) to abide loyally by his past teaching: remembering (a) their past common experience of suffering, and of God's protection from it (10, 11).

(b) that suffering is a universal law for Christians (12).

(c) that deceivers will grow worse (13).

(d) the teachers from whom he has learnt even from childhood the real spiritual value and purpose of all Scripture (14-17).

So fulfil his whole duty, as an evangelist, with patience, sobriety, and courage (41-3):

remembering (a) that people will grow impatient of sound teaching (2, 4).

(b) that Paul himself is passing: his work is done: he can only look forward to the crown of righteousness (6, 7).

(c) that that crown will be given to all who love the Lord's appearing (9).

49-21. Personal messages.

Appeal to Timothy to come quickly, because of Paul's loneliness (8, 10): to bring Mark also (11), and to stop at Troas for his cloak and books (12): to avoid Alexander (14, 15).

Reminder of the way in which the Lord had protected him in the past in spite of men's desertion, and trust in Him for the future (16-18).

Special greetings to and from individuals (19-21), with further account of his fellow-travellers (20), and a renewed appeal to come soon.

22. Final Salutation to Timothy and to those with him.

With the exception of the last word the Epistle is a personal letter throughout, and was probably never intended to be read aloud to the Church under Timothy's care. The note in 2⁷ emphasizes this esoteric character.

iii. LITERARY DEPENDENCE.—The Epistle is so personal and so little argumentative that there is little direct quotation in it, even from the OT, the importance of which is so strongly insisted upon (314-17). The allusions to it are subconscious and secondary. This may be partly accounted for by the fact that the writer was without his books and parchments (413); yet his mind is thoroughly steeped in it. Nu 16⁸, Is 26¹³ lie behind 2¹⁹, but mediated through Christ's saying in Mt 7^{28, 29}, Lk 13²⁵⁻²⁷: Wis 15⁷ lies behind 2²⁰, perhaps mediated through Ro 9²¹: Ps 62¹² is adapted in 4¹⁴: Ps 22²²⁻²⁹ colours the whole language and thought of 4^{17, 18}; and perhaps Is 42¹⁻⁶ affects the description of the servant of the Lord in 2²⁴⁻²⁶.

Jewish tradition—whether written or unwritten is uncertain (cf. Thackeray, *Relation of St. Paul to Contemporary Jewish Thought*, pp. 215-222)—is quoted in 3^{8, 9}.

One 'faithful saying' is quoted in 2¹¹⁻¹³, possibly a fragment of a Christian hymn based on Ro 6⁸ 8¹⁷, Mt 10²³, Lk 12² (cf. CGT, *ad loc.*): the 'seals' in 2¹⁹, while based on the OT, were probably already stereotyped as Christian watchwords: 2²⁵ reads like a reminiscence of some early form of creed (cf. Burn, *Introduction to the Creeds*, pp. 27-30): 4¹⁻⁵ is perhaps a quotation from some Christian prophet (cf. Jude 17): 4⁸ from some *ἀγραφον* of the Lord (cf. Resch, *Agrapha*, p. 253): 4¹⁶ recalls the end of the Lord's Prayer.

There are many parallelisms with the earlier Pauline Epistles.

| | |
|---|--|
| 13 ² cf. Ro 18 ⁷ . | 211-13 cf. Ro 6 ⁸ 8 ¹⁷ . |
| 17 " Ro 8 ¹⁸ . | 216 " Tit 3 ⁹ . |
| 18 " Ro 11 ⁶ , Eph 4 ¹ . | 222 " 1 Ti 6 ¹¹ . |
| 19 " Ro 16 ²⁵ , Eph 14 ²⁸ . | 35 " Tit 11 ⁶ . |
| 111 " 1 Ti 2 ⁷ . | 37 " Tit 11 ⁶ 31. |
| 114 " Ro 8 ¹¹ . | 46 " Ph 13 ² 217. |
| 24-6 " 1 Co 9 ²⁷ . | |

Of all these passages Ph 1² 2¹⁷, 1 Ti 2⁷ 6¹¹ alone suggest a conscious literary imitation; and they are equally consistent, if not more consistent, with the hypothesis that they are the entirely independent utterances of the same writer. The correspondences with the Acts are mainly with the speeches of St. Paul there (1¹, cf. Ac 23¹ 24¹⁴; 4⁷, cf. Ac 20²⁴), but they are not close enough to be extracts; and if they need any explanation, it is very possible that St. Luke was preparing the Acts at this time.

iv. SITUATION IMPLIED AT EPHEBUS (?). — (a) *False Teachers*.—The warning against false teachers is less prominent than in 1 Tim. or Titus: they are in the background, and their features are seen with less distinctness; yet, so far as they can be described, they may be identified as the same as there. Their chief characteristic is to 'strive about words' (2¹⁴), to indulge in 'profane babblings' (2¹⁶), in 'foolish and ignorant questionings' (2²³), in 'fables' (4⁴): they are 'corrupted in mind' (3⁸), unspiritual (2¹⁶), tending to a low standard of morality (2¹⁹): attracting silly women by professions of knowledge, yet unable to satisfy their desire for it (3⁷). These tendencies will increase hereafter (3¹ ἐν ἑξῆς ταῖς ἡμέραις, perhaps an application of some previous prophecy: perhaps little more than 'hereafter,' cf. Pr 31²⁶), but within Timothy's own lifetime (3⁸ ἀπορρέου, 4²⁻⁵). In all these points they resemble the teachers of 1 Tim. and Titus. There are, however, two distinctive traits. (1) They are γόητες (3¹³), i.e. either, loosely, 'seducers' (AV), 'impostors' (RV): or, more exactly, 'magicians,' 'jugglers,' carrying on, even in their professed Christianity, the old Jewish sorcery or the magical formulae of the 'Ephesian letters,' akin to Simon Magus, Elymas, the sons of Sceva, or those who practised 'curious arts' at Ephesus. The analogy of Jannes and Jambres (3⁸) makes it probable that the more exact sense is right.

(2) Two of them, Hymeneus and Philetus, taught definitely that 'the resurrection is already past.' Such an assertion must have sprung from a low view of matter, shrinking from belief in a literal resurrection of the body, and either (a) asserting that the only resurrection is the resurrection of the spirit to newness of life in baptism—a view which springs from the same source as the difficulties about the resurrection in 1 Co 15, and may have been based on a misrepresentation of St. Paul's own teaching (Ro 6⁴), and which was a common tenet in Gnostic teaching (cf. Iren. i. 23, ii. 31; Tert. *de Resurr.* 19, *de Præscript.* 3; Justin, *Dial.* 80; Polyc. c. 7; 2 Clem. Rom. 9), but would also find sympathy in Jewish thought; or (b) asserting that a man only rose and lived again in his posterity, an explanation which is found in *Acta Thecla* 14, ἡμεῖς σε διδάσκοντες ἡν λέγει οὗτος ἀνθρώπων γίνεσθαι οὐκ ἥδη γέγονεν, ἐφ' οἷς ἐχόμεν

τέκνους—a view which would be akin to earlier Jewish thought, but is a less natural perversion of any Christian theory (see Zahn, *Einf.* i. p. 486).

There is, then, nothing to dissociate the teachers of this Epistle from those of 1 Tim. and Tit.; and the importance laid on the true spiritual purposes of the OT, as well as the *ad hominem* appeal to the Jewish Haggada (3⁸⁻⁹), make it probable that they were perverting the spiritual value of the OT by the introduction of worthless Rabbinic legends and speculations.

(b) *Church Organization*.—On this there is little stress and few details of it. Timothy represents St. Paul; he is to uphold the deposit, the teaching received from Paul, Paul's gospel (1¹² 13 2² 3¹⁶ 14); he is to guide the teaching of others (2¹⁴), to exercise discipline (4³). He has received a spiritual qualification for his task conferred by the imposition of St. Paul's hands (1⁵, but see 1 TIMOTHY): his task is described as a *διακονία*, he himself as an *εὐαγγελιστής*: he is being summoned away for a special visit to St. Paul, but it seems to be assumed that he will return (3¹⁻⁵ 4²⁻⁵). Meanwhile he is to secure a sure succession for St. Paul's teaching by entrusting it to others, who will be able to hand it on in their turn to others (2²). The suggestion of this Epistle, in contrast to that of 1 Tim., is distinctly against the idea that Timothy was a temporary delegate, and favours the theory that he held a permanent office and a permanent localisation of the office.

v. *AUTHORSHIP*.—The external evidence for the Pauline authorship is much the same as that for 1 Timothy, save that the allusions to its language in writers of the first quarter of the 2nd cent. are less unequivocal. It was possibly known by Ignatius, more probably by Polycarp (c. 5=2¹⁵, c. 9=4¹⁰), but the conscious borrowing from the Epistle is not certain in either writer. This difference may be due to the fact that it is a more private letter than 1 Timothy.

On the other hand, the intrinsic evidence of genuineness is much stronger than in 1 Tim. or in Titus. Positively, there are personal touches throughout; negatively, there is less to be urged against the genuineness. The picture of Timothy as young, timid, affectionate, is of a piece with what is known of him elsewhere: the allusions in 1¹²⁻¹³ 2¹⁵ 4¹⁰⁻¹⁶ 19-21 bear the stamp of truth, giving a picture of desertion and cowardice in some Christians which could scarcely have been invented, and they are independent of the Acts and of all other known sources. So with regard to the writer; in character—the affection for his fellow-workers, the gratitude for kindness, the sensitiveness to desertion (cf. 2 Cor.), the prayer for those who have deserted him, the sense of the importance of his own mission, the appeal to his own teaching and his own sufferings, the self-sacrifice for the elect's sake, the assurance of the Lord's protection and of the reward which he shall receive at the last day; in method of teaching—the loyalty to Judaism (1¹³=Ph 3³), the value attached to the OT (3¹⁶ 17, cf. Ro 15⁴), the use of Jewish traditions (4⁹), the masculine contempt for trivialities of argument (2¹⁶); in the substance of the doctrines taught—the stress on God's purpose and grace, on the conquest of death, on the risen Christ as the inspirer of confidence, on the need of suffering and of courage, on the moral tests of faith,—all these point clearly to St. Paul. There is no objection, on the side of Church organization or of the doctrines assailed, to be raised against his authorship. The slight distrust of Timothy's courage and conduct (1⁵ 2²²) may surprise us, but they would be more surprising in a forger: the repetition to him of the names of his mother and grandmother (1⁵) are indeed unnecessary, but very natural in an old man recalling

his old converts; the assertion of his apostleship (1¹¹) is natural to one who is enforcing the duty of loyal adherence to his teaching: the vague generalities about the false teaching and the absence of controversial argument in refutation of them are natural in writing to one who knew all the circumstances. The reference to the persecutions in Antioch, Iconium, and Lystra *only* (3¹¹), is explicable, as they were the first which Timothy had witnessed, and is very like that in 2 Co 11^{22, 23}. The only ground of suspicion lies in the style—partly in the large number of ἀπαξ λεγόμενα (44 in this Epistle alone: ἀλλεῖν, ἀκαίρως, ἀκρατής, ἀνασωπυρεῖν, ἀνάλυσιν, ἀνανήψαι, ἀνανύχειν, ἀνεξίκακος, ἀνεπαίσχυντος, ἀνημερος, ἀντιδιατίθεσθαι, ἀπαίδευτος, ἀποτρέπεσθαι, ἄρτιος, ἀφιλάγαθος, βέλτιον, γάγγραινα, γῆς, γυναικάρων, δειλία, ἐκδῆλος, ἐλεγμός, ἐνδύειν, ἐπανάρθωσις, ἐπισωρεύειν, θεσπενυστος, καταφθεῖρειν, κηθεῖν, λογομαχεῖν, μάμμη, μέμβρανα, νεωτερικὸς, ὀρθοτομεῖν, πιστοῦσθαι, πραγματία, στρατολογεῖν, συγκακοπαθεῖν, σωφρονισμός, φελόνης, φιλαντοί, φιλήδονος, φιλόθεος, χαλκεύς, χρήσιμος, no one of which, however, suggests a later date), and more definitely, in the many words or phrases—either Latinisms (χάρων ἔχων, δι' ἣν αἰτίαν) or half-stereotyped formulae (καθαρὰ συνειδήσεις, καθαρὰ καρδία, ἐπίγνωσις ἀληθείας, παραθήκη, ὑγιαίνοντες λόγοι, ἡ ὑγιαίνουσα διδασκαλία, πιστὸς ὁ λόγος, βεβήλοι κενοφύται, ἡ τοῦ διαβόλου παγίς, ὁ τοῦ θεοῦ ἄνθρωπος, ὁ νῦν αἰὼν)—which suggest a later writer at a rather later stage of Christianity. With regard to these the suggestions urged on 1 Tim. will hold good, and it will perhaps be felt that, if they stood alone, they would not be so striking as when placed side by side with 1 Tim. and Titus. They would be scarcely a serious objection to this Epistle, on the hypothesis that those were later imitations of this.

The difficulty of inserting the historical situation in the time covered by the Acts, or of placing the date of the Epistle in the first Roman imprisonment, seems insuperable, and, if it is genuine, it presupposes a later imprisonment (cf. 1 TIMOTHY).

vi. INTEGRITY.—The MSS supply no hint of interpolation or of 'contamination' in the Epistle, neither does any internal necessity require such an hypothesis. But there are certain facts which have not unnaturally raised doubts about the integrity. Thus (1) the Epistle varies between two main purposes, and there is a possibility of contradiction between them. The greater part is an instruction to Timothy about his teaching at Ephesus, and it seems to be assumed that he will remain there; the latter part summons him to leave and join the writer. These two purposes are obviously capable of being combined, and the appeals in chs. 1 and 2 may naturally be interpreted 'show courage by coming to join me in my prison,' 'entrust your teaching to others in my own absence or in the prospect of your own death'; but this is not said, as might have been expected in the face of 4⁹.

(2) Again, sections of the Epistle are personal and distinctly Pauline throughout; while others (2¹⁴⁻³⁹) consist of vague generalities, consistent with Pauline authorship, but not demanding it.

(3) There are some apparent contradictions, e.g. 3⁶ as contrasted with 2¹⁷ (but they are not necessarily spoken of the same persons, and, while 3⁶ refers to external success, 2¹⁷ refers mainly to internal degeneracy): again, 4¹¹ as contrasted with 4²¹ (but Luke may have been St. Paul's only attendant in prison, Eubulus and the others Roman Christians who had access to him from outside).

(4) The construction of the opening sentence is difficult, and has suggested that it has been carelessly reconstructed from some earlier form; but its difficulty does not go beyond that of many

Pauline paragraphs. Again, 1¹⁵⁻¹⁸ is easily separable from the surrounding context, and its connexion with it is not at first sight obvious: yet there is a real connexion (see the analysis), and the difficulty of its position will remain on any theory of construction.

These facts have given rise to attempts of two kinds to resolve the Epistle into separate parts.

(1) It consists of two, or possibly more, letters by St. Paul himself, which have been accidentally combined. In this case 1¹⁻⁴⁹ with, perhaps, 4¹⁹⁻²¹ and 2²⁰ might form one letter, written from the Roman imprisonment, and 4¹⁻¹⁸ with 4²² will be a second letter, perhaps written earlier, at the time of the imprisonment in Caesarea (Clemen), or even later in the Roman imprisonment. This theory meets many difficulties, would imply very little dislocation of MSS, and very possibly has an analogy in the end of the Epistle to the Romans.

(2) It consists of genuine fragments of Pauline letters, worked up into one whole by some later writer, say of the time of Domitian (Clemen), with the object of strengthening Christians in the face of persecution, and securing the tradition of apostolic doctrine against innovating tendencies. We might then have (a) 4⁹⁻¹⁸, 19-21, 22a a short letter, calling Timothy to rejoin him, written at some time in the third missionary journey (McGiffert, Bartlet); (b) 1¹⁻²³ 3¹⁰⁻⁴⁹ and 4¹⁶⁻¹⁸ a letter of encouragement to Timothy, written at the end of the Roman imprisonment; (c) 2¹⁴⁻³⁹ the addition of the ultimate redactor. Further and more detailed suggestions of the possibility of reconstruction will be found in Clemen (*Die Einheitlichkeit der Paul. Briefe*, pp. 142-156); McGiffert (*The Apostolic Age*, pp. 404-414); Moffatt (*The Historical New Testament*, pp. 700-704). But there is no sufficient reason for treating any part of the Epistle as un-Pauline: the theories of interweaving of document with document are too intricate to be probable, and no one theory has commanded anything like a common assent. Jülicher (*Einführung*, pp. 155, 156) entirely rejects the theory, because of the unity of each of the Pastoral Epistles, and regards them throughout as purely inventions attributed to the apostle.

vii. VALUE.—The importance of the Epistle is not great on doctrinal or ecclesiastical grounds: doctrinally, indeed, it adds the fullest statement of the inspiration of the OT and of its primary value to a Christian teacher that is to be found in the NT: it probably bears witness to the practice of prayer to God for mercy to the dead (1¹⁸), and it shows the power of the Christian doctrine of a Risen Christ to support a Christian in the face of death: ecclesiastically, it shows the value attached to the imposition of the apostle's hands, and to a succession of ministers as a means of securing the tradition of sound teaching; but none of these points are peculiar to this Epistle. Its real value is historical and personal. Assuming the Pauline authorship, it is the chief source of evidence for Paul's life after the close of the Acts, supporting the theory of a second imprisonment, giving details of the last trial, implying further missionary work to the east, and possibly to the west (4¹⁹) of Rome, testifying to his reconciliation with John Mark, and giving glimpses of some of his friends, who are not known to us from other sources. On the non-Pauline authorship, its witness to these historic facts may be trusted, and it would also be a witness to the tone of ecclesiastical thought in Pauline Churches at the end of the 1st or beginning of the 2nd cent. But its main interest is one of character, and two portraits emerge from it. (1) The portrait of the ideal Christian minister. He is, like Christ Himself, to reproduce the features of Isaiah's ideal of 'The

Servant of the Lord,' patient, gentle, hopeful, interceding (2⁴): he is to be God's man, His loyal liegeman (3¹⁷); like a soldier, unentangled with civil duties (2¹⁴); like an athlete, obeying loyally the rules of the contest (2⁹); like a husbandman, toiling hard, and, if so, earning his reward (2⁹); like a tradesman, honestly cutting out his goods (2¹⁸?); like a fisherman, trying to catch back those who have been caught by the devil (2²⁸?): he needs courage, gentleness in face of opposition, willingness to face suffering, hopefulness for those who have gone wrong: he is to be serviceable (εὐχρηστος, 4¹¹), thoroughly equipped for every good work (3¹⁷), to keep himself free from moral evil (2²²), to rekindle the grace given by ordination, remembering that it was the gift of a spirit of love and power and discipline (1⁷). In teaching, he is to avoid idle speculations and restless innovations, to be loyal to the truth, to be long-suffering and yet bold in rebuke; the remembrance of the Risen Christ is to be ever before him; and he is to take for his standard of life and teaching (a) the facts of the apostle's life (3¹⁰), (b) the outline of the apostle's teaching, (c) the OT Scriptures, which are not only able to make him wise unto salvation, but also to guide him in his discipline of others.

(2) The portrait of the Christian minister, with his work done, facing death (cf. 1 John and 2 Peter). He acquiesces gladly in the present, but his eyes are turned mainly to the past or to the future. He recalls the way in which he from his youth, and his ancestors before him, have worshipped God (1³): he dwells on God's power (1⁷, 8, 12, 2¹, 4¹⁷) as having protected him in all past dangers (3¹¹), as communicated to himself (4¹⁷), and yet independent of himself—God may imprison His preachers, but His word is never fettered (2⁹): he reviews his whole course, he has no doubt of his reward; and so he looks into the future, he anticipates the false teaching that will arise (3¹), he warns against it, he provides for a succession of teachers to whom the truth can be entrusted (2²): he strengthens his favourite son for his task: he is sure that God will protect him from every evil work that may meet him in this life, and he looks beyond the grave: he sees God's sure foundation firmly standing (2¹⁹): he sees God protecting the teaching which he has handed back to His care (1¹³): he sees God rewarding evil-doers according to their work (4¹⁴): he sees the heavenly kingdom, eternal glory, life and immortality; he sees the coming in brightness (ἐπιφάνεια) of the Righteous Judge, and the crown of righteousness given to him and to all who have loved that coming (4⁸).

The Epistle is the letter of a good shepherd who is laying down his life for his sheep to one whom he is training to be also a good shepherd and to lay down his life for his sheep, and is inspired by the remembrance of 'the Good Shepherd' who had laid down His life and risen from the grave.

LITERATURE.—For the literature cf. 1 Timothy and Titus.

W. LOCK.

TIN (כֶּסֶף *bēdkhil*) was known as an alloy with copper at least as early as 1600 B.C. in Egypt, and probably before 2000 B.C. in Europe. It was also prepared pure in Egypt at least by 1400 B.C. The source of it is much debated. Banca, Spain, and Britain have all been proposed. That it appears as an alloy earlier in Europe than in Egypt shows that it was European; and the nearest source of it to the early bronze lands of Europe is in the tin mines of Bohemia and Saxony. Tin (Gr. *κασσίτερος*) in the literal sense is mentioned in Nu 31²² (P) along with brass, iron, and lead, and along with the same metals is used fig. of Israel in Ezk 22¹⁸ (cf. v. 2⁹); and it appears in Ezk 27¹³ along with silver, iron, and lead, as an article of commerce brought to Tyre from Tarshish. In Is 1²⁵

'alloy' would be a better rendering than 'tin.' In Zec 4¹⁰ כֶּסֶף וְכֶסֶף = *plummet*. See further under MINES, MINING. W. M. FLINDERS PETRIE.

TIPHSAH (תִּפְסָח = 'the ford').—The name of two places.

1. (Θαψά; *Thapsa*) The northern limit of Solomon's dominions west of the Euphrates—the southern limit being Gaza (1 K 4³⁶). It is identified by nearly all commentators with Thapsacus, on the right bank of the Euphrates, above the confluence of the *Belik*. Tiphshah was the lowest ford across the Euphrates, and the point at which Cyrus the younger forded the river, the water being breast-high (Xen. *Anab.* i. iv. 11). At the same place Darius crossed before and after Issus, and Alexander crossed in pursuit, on two bridges (Arrian, iii. 7). Tiphshah was the most important crossing-place in the middle course of the Euphrates, and on one of the great commercial routes between the East and the West. In the time of Xenophon it was great and prosperous, and it is mentioned later as the point at which river-borne goods from the lower Euphrates were landed and shipped. Under the Seleucids it was called *Amphipolis*. The town was at or near *Kalat Dibse*, about eight miles below *Mesikine* (Peters, *Nippur*).

2. (Β Θερὰ, Α Θαψά [i.e. תִּרְזַח *Tirzah*]; *Thapsa*) A town, apparently near Tirzah, which was taken by Menahem after he had dispossessed Shallum and seized the throne (2 K 15¹⁶). Josephus (*Ant.* ix. xi. 1) writes the name Θαψά as if it were Thapsacus. Thénien suggests that the name was originally written *Tappuah* (cf. Luc. Ταφωφ). The site is unknown. C. W. WILSON.

TIRAS (תִּירָס; Θερὰς, Luc. Θιράς).—A son of Japheth, Gn 10² [P], 1 Ch 1⁵. Ethnologically, the name should probably be identified with the *Turusha*, a seafaring people mentioned in the Egyptian inscriptions of the 13th cent., the *Tuporpoi* of the Greeks (so Ed. Meyer [*Gesch. d. Alterthums*, i. 260], followed by Dillm., Holzinger, Gunkel, et al.). Jensen (*Theol. Litzg.* 1899, 3, col. 70) makes it = Tarsus; W. Max Müller (*Orient. Litzg.* Aug. 1900, col. 290) takes it as a doublet of Tarshish of v. 4, which he identifies with Turs, i.e. the land of the Tyrrhenians or Italy. There are the strongest objections to the view of Josephus (*Ant.* i. vi. 1), Jerome (on Gn 10²), and the Targg., that *Tiras* = the Thracians. J. A. SELBIE.

TIRATHITES (תִּירָתִיטִי; BA'Apvαθίτι, Luc. Θαπαθίτι).—A family of scribes that dwelt at Jabez, 1 Ch 2²⁶. The passage is very obscure. See SHIMEATHITES, and cf. GENEALOGY, vol. ii. p. 128^a, and Wellh. *de Gentibus*, 30 ff.

TIRE.—The Eng. word 'tire,' which occurs as a subst. = headdress in Is 3¹⁸, Ezk 24^{17, 22}, Jth 10¹⁶, is simply an aphetic form of 'attire'; it has nothing to do with 'tier' or 'tiara,' though its special application to the dress for the head is perhaps due to such a fanciful connexion. Cf. Adams, *II Peter*, 70, 'They metamorphose their heads, as if they were ashamed of the head of God's making, proud of the tire-woman's. Sometimes one tire is half the husband's rent-day'; also Spenser, *FQ II.* ix. 19—

'Her yellow golden beare
Was trimly woven, and in tresses wrought,
No other tire she on her head did weare,
But crowned with a garland of sweete rosiere.'

The verb 'to tire' is used more generally = dress, adorn, as 1 P 3³ Tind., 'For after this manner in the olde tyme dyd the holy women which trusted in God, tyer them selves, and were obedient to their

husbandes'; though its only occurrence in AV has the sense of attiring the head, 2 K 9³⁰ 'And she painted her face, and tired her head, and looked out at a window.' The Heb. verb in this last passage is *תָּרַח*, lit. to make a thing good, right, beautiful (LXX ἀγαθόν); cf. its use in Ex 30¹ (of trimming a lamp) and Hos 10¹ (of erecting goodly *mazzēbahs*). The nouns rendered 'tire' are—1. *תָּרָח* Ezk 24^{17, 22}. This word prob. denotes a *tiara* or *turban* of an ornate character. Its other occurrences are Ex 39²⁸, Ezk 44¹⁸ (both of the headdress of the priests), Is 3³⁰ (worn by fashionable ladies) 61^{3, 10} (in the last the bridegroom 'makes his headdress priestly,' in allusion to the splendour of, or the special way of folding, the priestly turban [unless, with Marti, *et al.*, we read *תָּרַח* for *תָּרַח*]). 2. *תָּרָח* Is 3¹⁸. See CRESCENTS. 3. *תָּרַח*, Jth 10⁸ 16⁸.

J. HASTINGS.

TIRHAKAH (תִּרְחָקָה), king of Cush (Θαρῃ [so B in 2 Kings; A Θαρῃ], which is read also by B in Isaiah; Luc. Θαρῃ) βασιλεὺς Αἰθιοπίας, marched out from Egypt against Sennacherib during the expedition of the latter against Judaea, in the reign of Hezekiah (2 K 19⁸, Is 37³⁶), immediately before the destruction of Sennacherib's army in the night by the angel of the Lord at Libnah. Herodotus (ii. 141) relates that Sethos or Sethon, king of Egypt and priest of Hephæstus, obtained the destruction of the army of Sennacherib from his god, who at night-time sent a host of field mice into the invaders' camp at Pelusium. The mice devoured the bow-strings and harness, and left the foe helpless. 'Sethon' seems to be simply the title of the priest of 'Hephæstus,' i.e. Ptah of Memphis (see Griffith, *Stories of the High Priests of Memphis*, p. 8), and this title is hardly compatible with that of king. If Sennacherib's expedition be that of B.C. 701,—the only expedition to these parts recorded in his annals (see art. SENNACHERIB),—it must have taken place before the reign of Tirhakah, which began in 691. This evidence combined points to the following hypothetical reconstruction of the episode: Tirhakah, before his elevation to the Ethiopian-Egyptian throne, was governor of Lower Egypt; and at its capital, Memphis, he was high priest of Ptah when Sennacherib threatened invasion (Griffith, *l.c.* p. 10). After some signal and unexpected disaster on the frontier of Palestine or Egypt, Sennacherib was compelled to retreat hastily.

To return to facts: Sennacherib died in B.C. 682. Tirhakah (Egyp. THRQ), who was the last king but one of the 25th (Ethiopian) Dynasty,—founded by Shabaka,—began to reign in 691. His monuments are found at Gebel Barkal in Nubia, as well as throughout Egypt. In Egyptian documents Tirhakah is entitled 'Pharaoh'; but, though probably long resident in Egypt before ascending the throne (Schaefer, *Aegyp. Ztschr.* 1900, 51), he was essentially an Ethiopian, and was for some time excluded from Egypt by the Assyrians. Outside Egypt, doubtless, he was known as 'king of Cush.' After sustaining several attacks, Taharqa (Assyr. Tarkū) was driven out of Egypt in 670 by Esarhaddon, who plundered Memphis and Thebes, and divided the government among 20 rulers—chiefly native—tributary to Assyria. This arrangement was of short duration. Tirhakah seems to have returned to Egypt after Esarhaddon had withdrawn, and Esarhaddon was on his way to punish the Egyptian revolt when he died in Nov. 669 (Johns in *Enc. Bibl. s.v.* 'Esarhaddon'). The first expedition of his successor, Assurbanipal, was against Egypt. It was on a great scale, and overwhelmed both Lower and Upper Egypt. Tirhakah fled from Memphis to Thebes, and from Thebes to Ethiopia, whence he at once commenced intriguing with the princes of the Delta. The plot was frustrated, and soon afterwards Tirhakah died. He was succeeded by Tanut-Amon

(Assyr. Tandamane), who recovered Egypt, but was driven out by Assurbanipal in the last Assyrian expedition ever made against that country.

F. LL. GRIFFITH.

TIRHANAH (תִּרְחָנָה; B Θαρῃ, A Θαρῃ, Luc. Θαρῃ).—A son of Caleb by his concubine, Maacah, 1 Ch 2²⁶.

TIRIA (תִּרְיָה, but Baer תִּרְיָה; B om., A Θηρῃ, Luc. Θηρῃ).—A son of Jehallelel, 1 Ch 4¹⁸.

TIRSHATHA (תִּרְשָׁתָה).—The word occurs in five places; the LXX omits it altogether in Neh 8⁹ 10¹; reads on the doubtful authority of a late corrector 'Αθαρσάθ in Neh 7²⁰; and in Ezr 2²⁸, Neh 7²⁸ fluctuates between A 'Αθαρσάθ, B 'Αθαρσάθ, and 'Ασερσάθ. The term occurs also under the disguised form of Attharías in 1 Es 5⁴⁰ and of Attharates in 1 Es 9²⁰ (cf. vol. i. p. 203). That the word is the name of an office, is indicated by the constant presence of the article; but Ewald's (*HI*, Eng. tr. v. 87) conjecture of the high-shrievalty is not happy. The word is genuine Persian, a modified form of a hypothetical Old Pers. *tarsāta* (cf. J. Scheftelowitz, *Arisches im AT*, p. 93), of which 'his reverence' in its literal sense and not in its ecclesiastical usage may be taken as a close modern equivalent. In Neh 12²⁶ and elsewhere, for the Persian term is substituted the Semitic תִּרְשָׁתָה (see GOVERNOR), which is the title of the prefect or viceroy, with both civil and military functions, of a province or smaller district under either Assyrian or Persian rule. The appointment was made directly by the king; and when for any reason such an official was sent on special service, his relation to the chief of the province was not always clearly defined, and friction and jealousy followed (Ezr 5³ to 6¹⁴). The title is derived from the Assyrian *paḫāḫ*, through the Babylonian *paḫāt* (see Delitzsch, *Heb. Lang. in Light of Assyrian Research*, pp. 12, 13; Schrader, *COT* i. 175, 176), and is neither post-exilic nor Persian in its origin. Its use dates from the time of Jeremiah, and continued into the Talmudic period, when the term was used as equivalent to ἀρχιεπίς (*Bikkurim*, iii. 3). On the whole the Tirshatha appears to have been a royal commissioner or plenipotentiary, invested with the full powers of a satrap or viceroy, and employed on a special mission with the accomplishment of which his appointment ceased.

R. W. MOSS.

TIRZAH (תִּרְצָה, Θερῃ).—1. Mentioned Jos 12²⁴ as one of the 31 places whose kings Joshua smote. Tirzah afterwards became the capital of Jeroboam I., presumably of his son Nadab, and certainly of the three adventurers, Baasha, Elah, and Zimri (1 K 14¹⁷ 15^{21, 23} 16^{6, 8, 9, 15}). In 1 K 14¹⁷ the reading of the LXX (A) is Ζαρῃ, i.e. Zereda, Jeroboam's birthplace. Baasha was buried at Tirzah (1 K 16⁹), probably Elah also, as it was there he was slain while drinking in the house of one of his officers (v. 26). The Omrides transferred the seat of government to Samaria (vv. 24, 29), but Tirzah retained its importance probably as a fortress, as it was there [if MT be correct, but cf. LXX and Buhl, p. 247] that Menahem gathered a force to attack Shallum (2 K 15¹⁴). After this Tirzah drops out of history.

In Ca 6⁴ the Shulammitte is declared to be beautiful as Tirzah, comely as Jerusalem. The Heb. custom of personifying cities as women robs this comparison of the strangeness it would else have for us. It may be the glory and prestige of the capital that led to the simile, quite as much as the circumstance that Tirzah had a reputation for beauty, or that it occupied a site renowned for its loveliness.*

* Neither LXX nor Vulgate take Tirzah here as a proper name. A derivation from תִּרְצָה, to delight, is implied in their renderings (*uideria*, *suavia*).

The site of Tirzah has not yet been recovered beyond doubt. *Telasir*, a fortress on the high road from Shechem to Bethshan at its junction with the Abel-meholah road (see G. A. Smith, *HGHL* 355), seems too far north to suit 2 K 15¹⁴, and generally farther north than Jeroboam would be likely to fix his home. Robinson (*BRP*³ iii. 302 f.) suggests the identification of Tirzah with *Tulluzah*, a town on a hill not far north of Mt. Ebal, which agrees with the position assigned to *Thera* by Brocardus (*Descriptio*, vii.), 3 leagues east of Samaria. A. Socin in Baedeker's *Pal. and Syr.* accepts this identification; but Buhl (*GAP* 203) is inclined to identify Tirzah with the modern *et-Tire*, the Tirathana of Jos. (*Ant.* XVIII. iv. 1) in the neighbourhood of Gerizim.

2. One of the five daughters of Zelophehad whose case decided woman's rights in property among the Jews. The order of their names (Nu 26³³ 27¹ 36¹¹, Jos 17³, all P) differs in 36¹¹ from that of the other lists, and Heb. and LXX do not agree.

A. S. AGLEN.

TISHBITE.—See ELIJAH, vol. i. p. 687; and cf. Ed. König in *Expos. Times*, xii. (1901) 383.

TISHRI (Month).—See TIME.

TITANS.—A Greek word (*T(e)tranes*), mythological in its history and meaning, used in the LXX in translating the term 'valley of Rephaim' in 2 S 5^{18, 22}. It is also used in Judith (16⁷), in the encomium upon the heroine—

'For their mighty one fell not by young men,
Neither did sons of Titans smite him,
Nor tall giants set upon him;
But Judith,' etc.

These passages are principally interesting as showing how the Hellenistic Jews who translated the OT, and who wrote Judith, connected in thought the *rephā'im* of their scriptures with the dim and mighty figures of the Greek mythological legends. See REPHAIM, GIANT.

W. J. BEECHER.

TITHE (תִּשְׁבֵּי, δέκατη).—The payment of tithe is a practice both ancient and widespread, being found among many peoples, Semitic and non-Semitic. The choice of a tenth as the portion due to God was dictated by obvious considerations. The history of the tithe in Israel is in many respects obscure. In the strange, and probably late, document, Gn 14, we read that Abraham paid tithes of the spoil to Melchizedek; and Jacob at Bethel makes a conditional vow to pay God a tenth of all that He gives to him (Gn 28²² E). But these narratives cannot be taken as evidence for patriarchal times. The latter is one of several which carry back the practice of the narrator's own time to an origin in the patriarchal age, and is illustrated by Am 4⁴, which shows that tithes were paid at some of the N. Isr. sanctuaries in the reign of Jeroboam II. (see Driver, *ad loc.*). It is accordingly remarkable that no reference is made to tithes in the Bk of the Covenant. This is usually explained on the theory that the tithes were originally identical with the first-fruits, and that the need of more strictly defining the amount that should be paid, led, in the later legislation, to the use of the term which had already been employed in the N. Isr. sanctuaries. W. R. Smith, on the contrary, thinks that the tithe was a fixed tribute, comparatively modern in its origin. At an earlier period the tribute took the form of first-fruits, which were a private offering. When this was no longer adequate to meet the expenses of a more elaborate cultus, the tithe was charged as a fixed burden on land. We know from 1 S 8¹⁶ that a tithe was paid to the king, and, if he devoted this to the support of the royal sanctuaries, the transition to a tithe paid by

the farmers directly to the sanctuaries is readily accounted for. Unlike the first-fruits, the tithe was used to provide the public banquets at sacred festivals (see W. R. Smith, *RS*² 245-254). The later legislation and practice were as follows:—

(a) *In Deuteronomy.*—In 14²²⁻²⁷ it is enacted that each year the produce of the soil should be tithed, and the tithe taken to the central sanctuary and there eaten; or, if this be inconvenient by reason of distance, it may be turned into money, which must be spent on a sacrificial banquet at the central sanctuary. To this the Levite, since he has no portion, is to be invited. It must be noticed that the tithe is not used for public feasting, but is to be consumed by the farmer and his household. This regulation may be a reform due to the fact that in earlier times the ruling classes, while not furnishing the provisions for the feast, secured the best for themselves. Further, the tithe is not used for the support of the priesthood or the temple services. The Levite has a moral claim to a share in the banquet, but it rests with the farmer himself whether this is recognized. In the following verses (14^{28, 29}) and in 26¹²⁻¹⁵ it is enacted that every third year, called the year of tithing, all the tithe shall be laid up in the towns and distributed to the Levite, the stranger, the fatherless, and the widow. It is generally agreed that Deuteronomy does not contemplate two tithes,—one to be consumed each year, including the third, at the central sanctuary, and the other to be levied for charity every third year,—but rather a different destination for the same tithe, so that in the third year it shall be kept at home and devoted exclusively to charity. The origin of this regulation is perhaps to be found in the abolition of the old public banquets, and consequent necessity that some other provision should be made for the poor. Since there would be no tithe in the Sabbatical year, when the land lay fallow, the year of tithing would probably coincide with the third and sixth years in each cycle of seven years. The question remains whether the tithe in Deuteronomy is to be identified with the first-fruits. In favour of this view it may be urged that it is not probable that a double tribute should be exacted from the crops, and that the close connexion of the law of first-fruits with that of tithes in Dt 26¹⁻¹⁵ shows that the two are really identical. The basket of first-fruits presented to the priest must be assumed in that case to be a portion of the first-fruits taken from the tithe. The command to 'rejoice in all the good which J^h thy God hath given unto thee,' implies that a feast followed the presentation of the basket of first-fruits, and this would correspond to the banquet on the tithe enjoined 14²²⁻²⁷. The introduction of the term 'tithe' will then have been due to the necessity of fixing with precision the amount of the first-fruits. On the other hand, 18⁴ ordains that the first-fruits shall be given to the priest, but this was certainly not the case with the tithe. And the feast referred to in 26¹¹ may not have been a feast on the first-fruits. It is difficult to decide between the two views, but it seems safer on account of 18⁴ (which would otherwise have to be regarded as probably later) to distinguish between the tithe and the first-fruits. The objection based on the improbability that a double tribute would be exacted, falls to the ground if the first-fruits consisted merely of the basket of fruit, etc., presented at the central sanctuary.

(b) *In the Priestly Code (P).*—In the legislation of Ezekiel, which forms the transition to P, there is no law as to tithes. P exhibits a great advance on the earlier regulations. According to Nu 18²¹ 'all the tithe in Israel' is given to the tribe of Levi 'for an inheritance.' The Levites are in their turn to give a tenth of this ('a tithe of the 'tithe')

to the priests ('a heave-offering to Aaron the priest,' Nu 18²⁸⁻²⁹). The origin of this is probably to be sought in an extension of the charity tithe enjoined in Deuteronomy, which is now devoted to the Levites exclusively, and used for this purpose, not once in three years, but every year. Lv 27^{30, 31} ordains that, if the tithe is redeemed, one-fifth of the value shall be added. It is generally agreed that a tithe of cattle is not contemplated, but only of agricultural produce. It is true that in Lv 27^{32, 33} cattle are included, and rules are given as to the selection, and to prevent any exchange. But this law stands by itself, it is not referred to in Neh 10^{37, 38} 12⁴⁴ 13^{12, 13}, and is first mentioned 2 Ch 31^{5, 6}. It is probably a later addition inserted between the time of Nehemiah and that of the Chronicler. Attempts have been made to reconcile the regulations of the Priestly Code with those of Deuteronomy. It has been supposed that Deuteronomy refers to a second tithe distinct from that in P and to be levied on the nine-tenths remaining after the tithe to the Levites had been deducted. Against this the following considerations are decisive. No hint is given in Deuteronomy that such a second tithe is spoken of, nor can such an interpretation be fairly put on the passage, for a reference to the assumed first tithe would have been necessary. Nor is it probable that a tax of nearly one-fifth of the whole produce should be imposed on the farmers. Nor is it credible that the Levites should participate in the second tithe because, like the poor and defenceless, they were dependent on charity, if they were in possession of a tithe already made over to them. And, lastly, the language of Nu 18²¹ 'unto the children of Levi, behold, I have given all the tithe in Israel for an inheritance,' utterly excludes any tithe which was devoted, as the Deuteronomic tithe, to other purposes. Here, as elsewhere, the explanation is that the regulations belong to different stages of legislation.

(c) *In later Judaism.*—Two tithes were levied—one for the Levites in accordance with the law of P, the other to be consumed by the offerer in accordance with that of D. The tithe was the most valuable part of the income of the Levites. The Mishna laid down this rule: 'Everything which may be used as food, and is cultivated and grows out of the earth, is liable to tithe' (*Maaserot* i. 1). The Pharisees evinced their scrupulous adherence to the Law by offering tithes of 'mint, anise, and cummin' (Mt 23²³). The second tithe was of course consumed by the offerer, and with it the tithe of cattle was usually reckoned, though Philo apparently includes it in the perquisites of the priests. If the second tithe was converted into money, one-fifth of the value had to be added; and the money could be spent only on food, drink, and ointment necessary for the sacrificial feast. The charity tithe (or 'third tithe') was levied for the poor every third year.

LITERATURE.—Nowack, *Heb. Archäol.* ii. 257-259; Wellhausen, *Prolegom.* pp. 156-158; Driver, *Deut.* pp. 166-173; W. R. Smith, *RS* pp. 245-253; Schürer, *HJP* ii. i. 231.

A. S. PEAKE.

TITLE ON CROSS.—It was customary in the Roman empire, when a criminal was going to execution, for a board (called *scaris*), on which the ground of condemnation (*acta, causa*) was written, to be carried before him or hung round his neck—the inscription being known as *titulus* (Gr. *τίτλος*). Instances of this custom will be found in Suet. *Calig.* 32—'*præcedente titulo qui causam pænæ indicaret.*' Domit. 10; Eusebius, *HE* v. i (see Swete, *St. Mark*, p. 359). All four evangelists mention that the custom was observed at the crucifixion of Jesus Christ, though they describe the title as affixed to the cross, without referring to its being carried on the way to Golgotha. They have

various styles of indicating it. As usual, St. Mark's description is the fullest. He calls it 'the superscription of his accusation' (*ἡ ἐπιγραφὴ τῆς αἰτίας αὐτοῦ*, Mk 15²⁶); in the First Gospel it is 'his accusation' (*αἰτίαν αὐτοῦ*, Mt 27³⁷); and in the Third it is simply 'a superscription' (*ἐπιγραφὴ*, Lk 23³⁸). The Fourth Gospel calls it by the technical name (*τίτλος*), and states that it was written in three languages—Hebrew (i.e. Aramaic, the language of the Jews of Palestine), Latin (the official language), and Greek (the language current throughout the East), Jn 19^{19, 20}. The four Gospels also vary in their statements of the words of the title, viz.:—

Mk = 'The king of the Jews' (*ὁ βασιλεὺς τῶν Ἰουδαίων*).

Mt = 'This is Jesus the king of the Jews' (*οὗτός ἐστιν Ἰησοῦς ὁ βασιλεὺς τῶν Ἰουδαίων*).

Lk = 'This is the king of the Jews' (*ὁ βασιλεὺς τῶν Ἰουδαίων οὗτος*).

Jn = 'Jesus of Nazareth the king of the Jews' (*Ἰησοῦς ὁ Ναζωραῖος ὁ βασιλεὺς τῶν Ἰουδαίων*).

It is not easy to determine which of these was the original form of words. The instance from the *Letter of the Churches of Vienne and Lyons*, where the martyr's name is given (*οὗτός ἐστιν Ἀττάλιος ὁ Χριστιανός*, Eusebius, *HE* v. 1), would suggest (1) that Mt and Lk are right in giving the word 'this' (*οὗτος*), and (2) that Mt and Jn are right in giving the name—'Jesus.' Since Mt is the only Gospel that has both the forms found in the passage cited from Eusebius, the preference seems to lie with the phrase as given in that Gospel. But then we cannot be sure that the same form of words was used in all cases, or that the *Letter of the Churches of Vienne and Lyons* gives it with verbal accuracy. Moreover, it may have been variously phrased in the three languages. The following arrangement has been suggested:—

ישע הנצרי מלך היהודים

ΟΥΤΟΣ ΕΤΙΝ ΙΗΣΟΥΣ Ο ΒΑΣΙΛΕΥΣ ΤΩΝ ΙΟΥΔΑΙΩΝ.

REX JUDAEORUM.

(See Geikie, *Life and Words of Christ*, ch. lxiii. note e).

The variations are quite immaterial. In all four accounts the essential words are the same. The title describes Jesus as 'King of the Jews.' It makes no mention of sedition or usurpation; the phrase is absolute. Plainly, it was a sarcastic expression; but it was perceived at once that the point of the sarcasm was against the Jews rather than against their Victim. This is shown by St. John, who narrates how the chief priests requested Pilate to change the title to 'He said, I am king of the Jews,' and how Pilate haughtily refused to alter what he had written (Jn 19^{21, 22}).

W. F. ADENEY.

TITTLE.—The Eng. word 'tittle' is simply a various spelling of 'title.' One of the uses of 'title' (after Lat. *titulus* in late use, and Fr. *titre*) was to denote the stroke above an abridged word. It was thence used for any trifling stroke or mark which distinguished one letter from another, and was chosen by Wyclif and Tindale to translate the Gr. *κεφαλαί* (WH *κεφα*, see vol. ii. App. p. 151) in its only occurrences Mt 5¹⁸, Lk 16⁷. All the Eng. VSS up to and including AV (1611), except the Rhemish, spell the word with one t. So Tindale in his address to the Reader, *Pentateuch* (Mombert's Reprint, p. 3), 'For they which in tymes paste were wont to loke on no more scrip-

ture then they founde in their duns or soch like develysh doctryne, have yet now so narowlye looked on my translatyon, that there is not so moch as one I therin if it lacke a tytyle over his hed, but they have noted it, and nombre it unto the ignorant people for an heresyse.' But, in quoting Mt 5¹⁸ three pages later, he spells the word 'tittle'.

The Gr. *κεφα* (lit. 'little horn') was used by grammarians to denote the Gr. accents and any small stroke distinguishing one Heb. letter from another, as 1 from 2. On the importance attached to these marks by the Rabbins see Lightfoot on Mt 5¹⁸ (vol. xi. p. 99 ff.). J. HASTINGS.

TITUS (*Títos*).—A companion of St. Paul, who is always mentioned by him with great affection and confidence, yet whose name appears but on rare occasions in the Epistles and never in the Acts. On account of this silence of the Acts it has been conjectured that Titus is the second name of some one of St. Paul's companions who are mentioned there, and attempts have been made to identify him with Timothy, with Silas, and with Titus (or Titius) Justus (Ac 18⁷); but none of these conjectures has met with acceptance (cf. Zahn, *Einleitung*, i. pp. 149, 190; Holtzmann, *Pastoralbriefe*, p. 81). The name is Latin, but, as with *Paul*, this proves little: his birthplace is unknown; later legends place it in Crete; St. Chrysostom in Corinth; and the Acts of Thecla (c. 2) speak of him as living with Onesiphorus at Iconium at the time of St. Paul's first visit there. All that can be said for certain is that he was a Gentile (Gal 2³), probably converted by St. Paul himself (*γυναιὶν τέκνον*, Tit 1⁴), and living at Antioch fourteen years after St. Paul's conversion, when the dispute arose about the circumcision of the Gentiles. At this time Paul took him with him to Jerusalem: there an attempt was made to compel him to be circumcised; St. Paul resisted the compulsion, and probably Titus was never circumcised, though the ambiguity of St. Paul's words leaves it just possible that he was circumcised as a voluntary concession on St. Paul's part (cf. Lightfoot on Gal 2¹⁻⁴; Hort, *Judaistic Christianity*, pp. 78-83).

Titus remained St. Paul's companion, being perhaps with him when he wrote Galatians [may *ὁ σὺν ἐμῷ* (2³) mean 'who is with me still'? cf. *οἱ σὺν ἐμῷ* of 1⁷], but not mentioned again until the time of the incidents which caused the writing of 1 and 2 Corinthians. At this time he paid two, if not three, visits to Corinth.—(a) In the year before the writing of 2 Cor. (*ἀρδὲ πέποι*, 8¹⁰) he went at Paul's request (2 Co 12¹⁸) with one other brother to Corinth, perhaps carrying 1 Cor. with him, perhaps also authorized to explain the method of the collection for the saints alluded to in 1 Co 16¹⁻³: at any rate he did organize it, and that on a religious basis (*προεκήρυξεν*, 2 Co 8⁶), and returned to St. Paul with news of the zeal shown in the matter at Corinth.—(b) Probably after he had left Corinth there arose some serious opposition to St. Paul there; perhaps Timothy was insulted and set at nought [cf. 2 CORINTHIANS and PAUL], and Titus, who was already known there, was despatched from Ephesus to deal with the crisis, carrying the letter referred to in 2 Co 2 and 7. St. Paul had often boasted to Titus of the loyalty of his Corinthian converts (2 Co 7¹⁴); but he was afraid now lest his boast would be proved empty: he waited, restless and anxious for the return of Titus; he expected to meet him at Troas, but Titus did not appear; apparently, the crisis required a longer time than Paul had expected: he moved on to Macedonia; and there Titus arrived, and with good news. The majority of the Corinthian Church had formally punished the offender: they had received Titus with fear

and trembling: they had shown regret for their previous conduct, indignation against the offender, enthusiasm for St. Paul: Paul's boast had been justified: Titus had been overjoyed: St. Paul was comforted (2¹⁴ 7¹¹⁻¹⁵).—(c) On the receipt of this news Paul wrote 2 Cor. and requested Titus, who gladly accepted the request, to go, accompanied by two other brethren, on a fresh visit to Corinth and to complete the collection for the saints. Titus was to represent the apostle; the two brethren represented Churches, probably those of Macedonia (8²³).

The next reference to Titus is in the letter to him. This implies that St. Paul, after the release from his first Roman imprisonment, had travelled with Titus in the East, that they had landed at Crete and had evangelized several towns (*κατὰ πόλιν*, 1⁵), but that St. Paul had been unable to remain longer, and had therefore left Titus behind to appoint presbyters and to complete the organization of the Church. Titus found considerable opposition, especially from the Jews (1¹⁰), and much tendency to insubordination, and possibly had written to St. Paul to report this and to ask for his advice (so Zahn, *Einleitung*, i. p. 430). Whether this were so or not, St. Paul wrote a short letter pressing him to complete the organization, to ordain presbyters, to teach sound doctrine and avoid empty disputations, and to exercise his authority firmly. The letter was probably sent by Zenas and Apollos (3¹²), and Titus was requested to be ready to leave Crete and join St. Paul at Nicopolis as soon as he should receive a further message through Artemas or Tychicus (3¹²). Probably it was thence that St. Paul despatched him on a mission to Dalmatia (2 Ti 4¹⁰).

A comparison of 1 Ti 3¹² with Tit 2¹⁵ perhaps suggests that Titus was older than Timothy, and the relations of the two with the difficulties at Corinth imply that he was the stronger man (cf. 1 Co 16¹⁰ with 2 Co 7¹⁸). He volunteers readily for a delicate task (2 Co 8¹⁷), is full of affection and enthusiasm for the Corinthians (*ἰδ.* 7¹⁵); he is effective, free from all sordid motives, sharing St. Paul's spirit, walking in his steps (12¹⁸), his genuine son (Tit 1⁴), his brother (2 Co 2¹²), his partner and fellow-helper (8²³).

The omission of his name in the Acts is scarcely remarkable when the references in the Epistles are considered: if the incident of Gal 2 is to be identified with that of Ac 15, he is alluded to, without name, in *ἡμεῖς ἀλλοὺς ἐξ αὐτῶν* (v. 2); the incidents of 1 and 2 Cor. are wholly omitted in the Acts; and those of the Epistle to Titus and of 2 Tim. fall without its scope.

It is interesting to note that Titus, the Gentile, is chiefly employed in missions to the mainly Gentile Church of Corinth: that his principal work there was organizing the collection for the saints, carrying out the injunction to 'remember the poor,' laid upon St. Paul in his presence at Jerusalem (Gal 2¹⁰); and that at Crete he finds his chief opponents among those of the circumcision, (Tit 1¹⁰).

Subsequent Church historians treated Titus as bishop of Crete and living a celibate life to an old age in the island (Eusebius, *HE* III. iv. 6; *Const. Apost.* vii. 46; pseudo-Ign. *Ad Philad.* c. 3; and for fuller details, Lipsius, *Die Apokryph. Apostelgeschichte*, ii. 2, pp. 401-406). An interesting panegyric on him is found in the works of Andrew of Crete (Migne, *Patr. Gr.* vol. 97). His name is given still to churches in Crete: it was appealed to as a battle-cry in the struggles of the Cretans with the Venetians; his body was said to have been retained at Gortyna for many centuries; the head was carried away by the Venetians, and is still preserved at St. Mark's. His death is com-

memorated on Jan. 4 in the Latin Church, on Aug. 25 in the Greek, Syriac, and Maronite Churches (*Acta Sanctorum*, i. pp. 163, 164; Nilles, *Kalendarium Manuale*). W. LOCK.

TITUS, EPISTLE TO.—

- i. Historical Situation of the Letter.
- ii. Analysis.
- iii. Literary Dependence.
- iv. Situation at Crete: (a) false teaching; (b) organization.
- v. Authorship.
- vi. Integrity.
- vii. Value.

Literature.

i. HISTORICAL SITUATION.—Paul and Titus had been together in Crete. It is probable that they found the island already evangelized before their arrival (cf. Ac 2¹¹); for by the time this letter is written whole families (1^{6, 11}), and people of all classes and ages (2¹⁻¹⁰), consisting both of Jews and Gentiles (1¹⁰), belong to the Church. But the communities were unorganized, and there were false teachers. St. Paul himself began to complete the organization; probably meeting with opposition from the false teachers (3^{10, 11}), and calling out hearty affection from others (3^{14, 15}). But for some reason he could not stay to finish his work, and left Titus with definite instructions to complete it (1⁵). Time elapsed after he left, but apparently only a short time, before this letter was written. St. Paul was moving about with some of his disciples (3¹⁵),—perhaps in Macedonia (if we may argue from the likeness to 1 Tim.),—intending to winter at Nicopolis. Possibly he received some communication from Titus, reporting progress at Crete (so Zahn, *Eint.* i. p. 430; but unconvincingly). More likely, he took the opportunity of the fact that Zenas and Apollos were starting on a journey which would take them past Crete to send a letter to Titus in order to prepare him to join him in Nicopolis, and to strengthen him to enforce a high moral standard in Crete, in spite of the dangerous tendencies of the false teachers.

The dates both of the visit to Crete and of the composition of the letter are uncertain. The organization of the Church is so little advanced that it might easily fall within the period covered by the Acts; and it is possible that the visit may be that of Ac 27⁹ (Ἰκάρου χερσὶν), and that this letter was written early in the Roman imprisonment (so Bartlett, *Apostolic Age*, p. 182); but Titus is not mentioned as being present at the time of Ac 27, and the surest indication for the date of the letter is its likeness to 1 Tim.; so that probably both the visit and the letter fall after the release from the Roman imprisonment [see 1 TIM.].

ii. ANALYSIS.—

11-14. Salutation (with special emphasis on the writer's own apostleship and on the common faith).

15-311. Advice to Titus.

A. 15-16. Need of appointing proper ministers.

Reminder of Paul's past instructions to appoint presbyters (2).

Importance of high moral character in an overseer (5-8), that he may (a) strengthen the sound teaching, (b) refute the opponents of it (9).

Description of these opponents, as insubordinate, quibbling, money-making, caring for fables and commandments of men, forgetting the great Christian truth—'All things pure to the pure,'—inconsistent and worthless (10-16).

B. 21-311. Sketch of the true features of the Christian character which Titus is to enforce.

(a) For Christians among themselves (21-15); for the elder men and women, for the younger women and men, for Titus himself, and for slaves,—all are to live a life true to the sound teaching: (1) in order to avoid giving offence to the heathen world around (8, 9, 10); (2) because the saving grace of God and Christ's atonement have trained us to rise above sin, and live an attractive life (11-14).

(b) For Christians in relation to the outer world (31-5): (a) subordination to authority (1); (2) gentleness to all men (2).

Reason—God's loving-kindness to us has raised us from the old heathen life of hatred to a new life of righteousness; so that believers in God are bound to set an example of noble and useful lives (3-5).

(c) For Titus himself.—He is to avoid foolish questionings (9), and to reject from the Church a 'heretic' who refuses to listen to his admonition (10, 11).

Personal message about his own movements (12, 13).

Final word of advice to those who obey him at Crete (14).

Salutation (15).

Like 1 Tim., it is essentially a private letter of instructions, probably never intended to be read aloud in the churches at Crete, though a word of greeting to the whole Church (or possibly only to Titus and his helpers) is added (3¹⁵). The main stress is throughout on character, on a useful fruitful life, as the outcome of a wholesome teaching; and (as in 1 Tim.) each section culminates in an important doctrinal statement—1⁵ 2¹¹⁻¹⁴ 3⁴⁻⁷, the last saying being called 'faithful' (πιστὸς ὁ λόγος).

iii. LITERARY DEPENDENCE.—One Christian saying is quoted (πιστὸς ὁ λόγος, 3⁹), and one line of Epimenides (1¹⁵). The OT is never appealed to in direct quotation, but its language is consciously used in 1⁴=Is 29¹³ (cf. Mt 15⁹, Mk 7⁷, Col 2²²), 2⁹=Is 52⁵ (cf. Ro 2²¹, 1 Ti 6¹), 2¹⁴=Ps 130⁸, Dt 14⁷, cf. Ezk 37²³ (cf. 1 P 2⁹), 3⁹=Jl 3¹ (cf. Ac 2^{17, 18}); all of them passages which belong to the common stock of early Christian writers, and half of which are used in the Pauline Epistles.

Reminiscences of our Lord's teaching may be found in 1⁵ (= Mk 7¹³, Lk 11⁴), 3⁵ (= Jn 3⁵), 3¹⁰ (= Mt 18¹⁵⁻¹⁷), but are not such as to imply literary dependence on the written Gospels. The same is true of points of similarity with 1 Peter, which are very slight: 1⁵⁻⁹ = 1 P 5¹⁻⁴, 3¹ = 1 P 2¹³, 3⁴⁻⁷ = 1 P 1²⁻⁵. (But see Bigg, *International Critical Commentary on 1 and 2 Peter*, p. 21, who would regard 1 Peter as older than and as having influenced this Epistle). There are more verbal points of contact with the earlier Pauline Epistles; cf.

1¹⁻⁴ with Ro 1¹ 16²⁵⁻²⁷.

1¹⁵ " " 14²⁰.

2¹⁴ " " Gal 1⁴ (?)

3¹ " " Ro 13¹.

3⁹ " " Eph 2⁸, 1 Co 6⁹⁻¹¹.

3¹⁵ " " 2⁹ 5²⁵.

But they all suggest the same mind dealing with the same subject at a different time, rather than a different writer borrowing from literature.

The relation to 1 Tim. and, in a less degree, to 2 Tim. is more complex. As compared with 1 Tim. the purpose is the same, and the structure is the same; the warning against false teachers forming a framework in which the rules about organization and character are inserted; in the same way each section culminates in a doctrinal climax. There is also verbal similarity of a marked type.

Cf. Tit 1¹⁻⁴ with 1 Ti 1^{1, 2}.

" 1⁵⁻⁹ " " 3¹⁻⁷.

" 1¹¹ " " 3⁹, 2 Ti 3⁶.

" 2¹⁻⁶ " " 5^{1, 2}.

" 2⁷ " " 4¹².

" 2^{9, 10} " " 6¹.

" 2¹⁴ " " 2⁹.

" 2¹⁵ " " 4¹² 5³⁰ 6³.

" 3¹ " " 2 Ti 2²¹ 3¹⁷.

" 3⁵ " " 1⁹.

" 3⁹ " " 1 Ti 4⁷ 6¹¹, 2 Ti 2^{16, 22}.

In nearly every case there is a freshness of treatment which is against the theory of deliberate borrowing; even in 1⁵⁻⁸, the most continuous instance of similarity, there are changes (e.g. the omission of *μη νεόφρονος*, 1 Ti 3⁹) which are suitable to the circumstances of a comparatively new Church, and this list of requirements may easily have been drawn up in a written form by St. Paul for frequent use, and be partly indebted to Jewish or Gentile lists of official requirements (cf. 1 TIM.).

The more complex organization and the fuller

details about worship in 1 Tim. apparently favour the priority of Titus; but all the differences may be due to the different circumstances of the two delegates and the two Churches. There is nothing in the letters to make it improbable that they were written on the same day and sent by the same messenger.

The analogy of the relation of Ephesians to Colossians is the nearest in the NT.

iv. SITUATION IMPLIED IN CRETE.—(a) *The false teachers* are partly Jews, partly Gentiles; the Jews being the more prominent. They are influential, upsetting whole families (1¹¹), opposing sound teaching (1⁹), tending to reject the authority of Titus (1¹⁰ 2¹⁵ 3¹⁰), quibbling, misleading, money-seeking (1¹⁰⁻¹³), inconsistent in their lives with their professed knowledge of God (1¹⁵, but these words do not necessarily apply to the teachers). The substance of their teaching consists of foolish and profitless investigations, genealogies, questions connected with the Law (3⁹⁻¹⁰), Jewish legends, and commands of men (1¹⁴), apparently laying stress on the requirements of a Levitical purity (1¹⁰). In contrast with 1 Tim., there is in this Epistle no trace of anything akin to 2nd cent. Gnosticism. Each phrase is not only capable of a Jewish explanation, but calls for it as its natural meaning. The question of purity (1¹⁰) is on a par with our Lord's treatment of Pharisaism (Mk 7); the confession of a knowledge of God is more naturally attributable to Jews, 1¹⁶ (cf. Ro 2¹⁷), than to Gentiles; and the genealogies and legends will probably be those connected with the patriarchal history (cf. 1 TIMOTHY).

(b) *Organization*.—As with Timothy at Ephesus, the exact position held by Titus himself at Crete is not clear. He represents the apostle and his teaching; he has authority (ἐπιταγή, 2¹⁵), which is not confined to one place, but extends over the whole island (1⁵): it extends to ordaining presbyters, to correcting and exercising discipline over 'heretics' (2¹⁵ 3¹¹), to enforcing the lines of teaching and the features of Christian character (2^{passim}); but whether the position was permanent or temporary is not clear: the most probable inference from 1⁵ and 3¹² is that the delegation of power was for a temporary purpose only. Nothing is said about any ordination for the work.

For permanent organization, he is to appoint presbyters (whether one or more is not stated) in each city; and apparently the presbyter in each city is the same as the ἐπίσκοπος (1⁵⁻⁷, but see 1 TIMOTHY). Their moral qualifications for office are stated; and it may be inferred that their duties were to teach (1⁹), perhaps to control the finances of the community (1⁷ μὴ ἀσχοκερδῆ, but 1¹¹ shows that this is not a necessary inference), and to be hospitable, ready to welcome Christians from other Churches (cf. Ramsay, *The Church in the Roman Empire*, p. 368).

There is no mention of deacons, deaconesses, or widows. The Christians are called ἐκλεκτοὶ θεοῦ (1¹), λαὸς περιούσιος (2¹⁴) (both OT titles for Israel), οἱ πεπιστευκότες θεῷ (3⁹), and perhaps — by a title which suggests the new family of God — οἱ ἡμέτεροι (3¹⁴). There is no reference to common worship, except as implied in the references to teaching and exhortation. Baptism is referred to as the instrument of salvation (3⁵); perhaps 1¹⁸ (ὁμολογούσων) points to some public confession of faith.

v. AUTHORSHIP.—The external evidence is much the same as in 1 Timothy. The evidence of its rejection is less, but the parallels to its language are also fewer. It is quoted as Pauline in Irenaeus (i. 16. 3, iii. 3. 4), Clem. Alex. (*Strom.* i. p. 350), Tertull. (*de Præscript.* 6, *adv. M.* 5. 21), and the Muratorian Canon. It was accepted by Tatian in spite of his re-

jection of 1 and 2 Tim., but rejected by Marcion and Basilides (Tert. *adv. Marcionem*, v. 21). It was embodied in the Syriac and Old Latin Versions, and parallels to its language are found in Justin Martyr (*Dial. c. Tryph.* 47) and Theophilus (*ad Autolyc.* iii. p. 126, where the command of 3¹ is quoted as a θεῖος λόγος); and perhaps in Ign. (*ad Magnes.* c. 8 = 3⁹) and Clem. Rom. (i. 2 = 3¹).

It claims to be by St. Paul in 1⁴; and implicitly in 3¹²⁻¹⁴, passages which are indeed separable from the rest. But in the body of the letter there is nothing in tone, teaching, or circumstance inconsistent with his authorship. The character of Titus corresponds to the little known of him elsewhere (cf. TITUS): the character of the writer, his insistence on his own teaching and wishes (cf. 1 Cor.), the sharpness of tone against false teachers (cf. Gal., 2 Cor.), the quick passage from moral inference to doctrinal premises, the quotation from Greek poetry, the adaptation of OT language, the sense of his own sinfulness (3⁹), are quite Pauline. So, too, the bases of doctrine, — the purity of all created things to the pure (cf. Ro 14): the eternal promise of life, the manifestation of it in due time, the saving grace, its universal efficacy (2¹¹), the redeeming death of Christ, the gift of the Spirit in baptism, the power to live a new life of love, the looking forward to the Coming of Christ, are quite true to the earlier letters, though the expressions are never borrowed. The false teaching implied at Crete and the organization of the Church, each simpler than in 1 Tim., can clearly fall within his lifetime.

The only ground of suspicion lies in the vocabulary and its relation to that of 1 and 2 Timothy.

(a) There are 26 ἀπαξ λεγόμενα in 46 verses, αἰρετικός, ἀκατάγνωστος, αὐτοκατάκριτος, ἀφθορία, ἀψευδής, βδελυκτός, ἐγκρατής, ἐκστρέφωμαι, ἐπιδιόρθω, ἐπιστομίζω, ἱεροπρεπής, Ἰουδαϊκός, καλοδιδάσκαλος, ματαιολόγος, οἰκουργός, ὀργίλος, πρεσβύτερος, στυγνός, σωτήριος, σωφρονίζω, σωφρονικός, φιλάγαθος, φιλάνθρωπος, φιλότεκνος, φρεναπάτης (Gal 6³ φρεναπατάω), φρονεῖν. Yet none of these betrays a late date. αἰρετικός, the only one that suggests a later ecclesiastical meaning, is earlier in existence than St. Paul, and the new meaning given to it here is akin to his own use of αἰρεῖς, and apparently means 'factious' rather than 'heretical'; and it is still an adjective.

(b) There is, as in 1 Tim., a fixity of phrase which suggests lateness, e.g. ἐπίγνωσις ἀληθείας, ἀλήθεια ἢ κατ' ἐσέβειαν, καιροὺς ἰδίους (1 Tim. only, but καιροὺς ἰδίους, Gal 6³), ὁ σωτὴρ θεός (applied both to God the Father and to Christ here: in 1 Tim. only to the Father, in 2 Tim. only to Christ), μᾶς γυναικὸς ἀνὴρ (1 Tim. only), ἡ διδασκαλία ἡ ὑγιαίνουσα (1 and 2 Tim.), καλὰ ἔργα (1 Tim.), ὁ νῦν αἰὼν (1 Tim., 2 Tim.), ὁ μέγας θεός, λουτρὸν πλυνγερείας, πιστὸς ὁ λόγος (1 Tim., 2 Tim.).

We are in the presence of a large vocabulary, fresh, fixed, and shared to a great extent by the writer of 1 and 2 Timothy. The alternatives of authorship are either that it is by Paul himself, writing late in his life, and writing to an intimate companion, — and there can be little doubt that if the Epistle stood alone, this would be the natural explanation; or by some later writer, essentially Pauline in spirit, perhaps using genuine Pauline fragments (see below), and wishing to obtain Pauline authority for securing a sober useful standard of Christian life and high standard of clerical morality, as against a revival of a Rabbinical Judaism. On this latter supposition the priority of Titus to 1 Tim. would seem almost certain, as there would be so little reason for the same writer composing it if 1 Tim. were in existence, and intended as a general treatise.

vi. INTEGRITY.—The MSS suggest no insertion or dislocation in the text; nor does the sequence of

thought require such a theory. 17-9 is indeed easily separable from the rest, but no conclusive reason requires its separation; and 314 comes in awkwardly after 313, but there is a possible connexion of thought between them, and such postscripts are found elsewhere, Ro 16¹⁷⁻²⁰, 1 Ti 6¹⁷⁻¹⁹.

The question of the integrity has arisen only on the theory of a non-Pauline authorship: for critics are almost entirely agreed in regarding 312-15 or 312-15 as Pauline, and the question arises whether there are other Pauline fragments, and whether they are separable.

The chief attempts to distinguish are these—

11-6. Pauline (McGiffert, Harnack, Clemen); but expanded from some simpler form by a late hand (von Soden).

17-9. Non-Pauline (ib.), added to strengthen the episcopate in the 2nd cent. (Harnack); but the distinction between the *ἐπιστολὴ* and *παράκλησις* would have been clearer.

17-11. Non-Pauline (Hesse, Clemen).

112-13, 16. Pauline. 114-15 non-Pauline (ib.) (as not suiting the other descriptions of the false teachers; but there is no real inconsistency).

2. Non-Pauline (Hesse).

31-7. Pauline (McGiffert). Non-Pauline (Clemen): partly because 347 is a repetition of 211-14, but there is a difference in the motive appealed to, which suits the exhortation of 31-2.

38-11. Non-Pauline. 312-13 Pauline (Harnack, McGiffert, Clemen).

The Pauline fragment so obtained is supposed to be a letter from Paul written to Titus at Corinth after 2 Cor.; this was developed into a letter to Crete at the end of the 1st cent. because of the outbreak of Judaism there (Clemen). There is, however, no substantial ground for distinguishing between Pauline and non-Pauline, except in 11-4 and 312-13: the grounds for separation elsewhere are hypercritical and the divisions arbitrary.

For fuller details cf. McGiffert, *Apostolic Age*, p. 400; Harnack, *Chronologie*, i. p. 480; Clemen, *Die Einheitlichkeit der Paul. Briefe*, pp. 157-163; Moffatt, *Historical NT* p. 700.

vii. VALUE.—As with 1 Tim. (which see), the value is a good deal independent of its authorship, and due to the fact of its canonization. On the point of the organization of the Church it adds nothing to that in detail or principle; but it has a historical value as showing the method of organizing communities in a very early stage of development, as showing the persistence of Judaism as a danger to the early Church; and the atmosphere of a suspicious and critical heathenism in which it lived. In such an atmosphere, and dealing with communities of rough islanders on a low social level and disposed to anarchy, the writer, while laying stress on faith and the salvation wrought by the appearance of Christ, organizes a ministry, insists on moral qualifications for it, and tries to develop an orderly, disciplined, useful, fruitful life in all ages and classes, and inspires even slaves with the hope that they may adorn the true teaching: it is an attempt to convert heathenism by the attractive beauty of an ordered family life and a loyal citizenship. Doctrinally, the Epistle offers no new point of interest unless it be the identification of Christ with 'the Great God,' 2¹³ (but see Ezra Abbot, *Critical Essays*, xviii.), or the reference to baptism as *λουτρὸν παλιγγενεσίας*, 3⁴.

LITERATURE.—The same introductions and commentaries as are referred to under 1 TIMOTHY are useful for this Epistle, with the exception of H. P. Liddon; to the Patristic commentaries should be added a short commentary by Jerome, and a long extract on 310-11 from Origen's lost commentary preserved in a Latin translation by Pamphilus. W. LOCK.

TITUS JUSTUS.—See JUSTUS, No. 2. **TITUS MANIUS.**—See MANIUS.

TIZITE (תִּזְיִת; Bó 'Israel, A ó 'Θωσael, Luc. 'Αθωσι).—A designation, whose origin is unknown, applied to JOHA, one of David's heroes, 1 Ch 11⁴.

TOAH.—See NAHATH.

TOB, THE LAND OF (טוֹב אֶרֶץ 'land of good'; טָב; טוב; *terra Tob*).—The place to which Jephthah fled for refuge from his brethren, and in which he

was living when the elders of Gilead went to fetch him on the occasion of the Ammonite invasion of Gilead (Jg 11³⁻⁵). At a later date, 12,000 'men of Tob' (AV Ish-tob) formed part of the force raised by the Ammonites in their war with David (2 S 10⁶⁻⁸ B *Elorab*). They are here associated with the Syrians of Beth-rehob and Zolah, and the king of Maacah—all small Aramaean states. The 'land of Tobias' (AV 'places of Tobie'), in which all the Jews were put to death by the Gentiles (1 Mac 5¹³), was apparently the same place. In 2 Mac 12¹⁷ Charax, a place 750 stadia from the strong town of Gephyrum, or Caspin, is said to have been occupied by Jews called Tubieni, i.e. 'men of Tob.'

Possibly Θαῦβα, which, according to Ptolemy (v. 19), was S.W. of Zobah, is identical with Tob. The Jerusalem Talmud explains 'land of Tob' by *Susitha*—the 'province of Hippene' (Neubauer, *Geog. du Talm.* 239). In this case Tob would be Hippos, or Susitha, now *Súsiyeh*, on the E. side of the Sea of Galilee, and not far from Gamala, *Kal'at el-Husn*. Conder (*Hbk. to Bible*, 295) and G. A. Smith (*HGHL* 587) identify Tob with *et-Tayyibeh*, about 10 miles south of Gadara (*Umm Keis*). De Saulcy identifies it with *Thaban*, about 9 miles east of the bridge over the Jordan called *Jisr Bendt Yakub*. C. W. WILSON.

TOB-ADONIJAH (טוֹב אֲדוֹנִיָּה 'good is the Lord Jah' [Gray, *HPN* 140, n. 3]; B *Ṭwṣadwṣeid*, A and Luc. *Ṭwṣadwṣid*).—One of the Levites sent by king Jehoshaphat to teach in the cities of Judah, 2 Ch 17⁸.

TOBIAH (טוֹבִיָּה and טוֹבִיָּה 'Jah is [my?] good').—1. The eponym of a family which returned from exile, but could not trace their genealogy, Ezr 2⁶⁰ (B *Ṭwṣeid*, A *Ṭwṣias*, Luc. *Ṭwṣias*) = Neh 7⁶² (BA *Ṭwṣid*, Luc. *Ṭwṣias*). 2. The Ammonite who, in conjunction with SANBALLAT and others, persistently opposed the work of Nehemiah, Neh 2¹⁰⁻¹⁹ 4³⁻⁷ 6¹⁷ 13⁴⁻⁵ (*Ṭwṣid*, *Ṭwṣias*). For details see art. NEHEMIAH.

TOBIAS (Τωβ(ε)λας, *Ṭwṣels*).—1. The son of Tobit, To 1⁹ and often; see art. TOBIT (Book of). 2. The father of HYRCANUS, 2 Mac 3¹¹.

TOBIEI (Τωβιηλ, i.e. טוֹבִיָּה 'El is [my?] good'; cf. the name TABELL).—The father of Tobit, To 1¹.

TOBIJAH (טוֹבִיָּה).—1. One of the Levites sent by Jehoshaphat to teach in the cities of Judah, 2 Ch 17⁸ (LXX om.). 2. One of a deputation that came from Babylon to Jerusalem with contributions of gold and silver, from which a crown was ordered to be made either for Zerubbabel and Joshua (Ew. Hitz.) or for Zerub. and not Joshua (Wellh. Now., cf. G. A. Smith, ii. 308 f.), and laid up in the temple as a memorial of the donors, Zec 6¹⁰⁻¹⁴ (LXX in both passages tr. טוֹבִיָּה by *χρησίμοι*, i.e. *ḥitzi*).

TOBIT, BOOK OF (Α βιβλος λεγομενη Τωβιτ, B *Ṭwṣelr*, N *Ṭwṣelθ*; Lat. *liber Tobiae*, *liber Tobit et Tobiae*, *liber utriusque Tobiae*; = Heb. טוֹבִיָּה = 'Jehovah is my good,' and טוֹבִיָּה, dropping the theophoric affix ת).—One of the deuterocanonical books of the OT, containing, according to Jewish conceptions, an idyllic picture of pious home life in the Captivity.

1. TEXTS AND VERSIONS.—The popularity of the story of Tobit is attested by the number of variations in which it exists in several languages. We shall, in the course of this article, endeavour to prove that the book was originally composed in Aramaic; though all trace of the original is lost, and the Aramaic MS, now extant, is somewhat late, and was not taken directly from it.

(1) *Greek Version*.—Of this we have three texts: (a) that of AB. The differences between these two

MSS are few and unimportant. (b) That of \aleph , which while giving little additional matter, adopts a more verbose style than AB. Whether AB or \aleph presents the earlier text is much disputed. Fritzsche, Nöldeke, Grimm support AB; Ewald, Reusch, Schürer, Nestle, Harris, \aleph . (c) A recension of 6⁹-13⁹, found only in three cursives: the Zittau Cod. 44 and the Ferrara Codd. 106, 107, and given at length by Fritzsche (*Handbuch z. d. Apokr.*). These present a composite Greek text. From 6⁹ to 7¹⁷ it presents many features of originality, but contains many of \aleph 's additions to the text of B, e.g. 6¹⁴. 7¹¹⁻¹². From 8¹ to 12⁶ it agrees closely with the Syriac, which, as we shall see, during this section transfers its allegiance from B to \aleph . From 12⁶ to 13⁹ it presents some readings of B, as 12⁸ 13³⁻⁸, but agrees in the main with Syr., even when Syr. differs from both B and \aleph , as in 12¹²⁻¹⁹. Before 6⁹ and after 13⁹ our cursives present the text of B.

(2) *Latin Versions.*—(a) *Vetus Itala* or Old Latin, which Ilgen, in 1800, correctly surmised was based on a then unknown Gr. text, which has proved to be that of \aleph . Though all codices of this Version agree substantially with \aleph , there are clearly three recensions. (a) It. I., the text edited by Sabatier (*Bibliorum sacrorum Latinae versiones antiquae*, Paris, 1751) and by Neubauer (in his excellent little work, *The Book of Tobit*). It is based on a Parisian Codex, Regius 3654, and on Cod. 4 in the library of S. Germain. (b) It. II., a text found in Cod. Vat. 7 which contains only 1-6¹², and once belonged to queen Christina of Sweden. It was collated by Sabatier in the above work, and was edited by Bianchini, Rome, 1740. (c) Fragments of a third recension (It. III.) are given in the *Speculum* of Augustine, edited by Mai (*Spicilegium*, ix.).—(b) *The Vulgate.* Jerome affirms that he translated Tobit in one day from the Syro-Chaldee. As he was not familiar with this language, a Jew, who knew both languages, translated it for him into Hebrew, from which he made his Latin translation. There are many readings in Vulg. that were not found in any other text, until Gaster, 1893, discovered a Heb. MS, which in the narrative, as distinct from the exhortations and prayers, agrees in the main with Vulg. (see below, HL).

(3) *Syriac Version.*—This has been edited by Walton in his Polyglot; and by Lagarde in *Libri apokr. Syriace*. As far as 7¹¹ it is a close translation of B. After that, it agrees with \aleph or the Gr. cursives. It lacks 13⁹⁻¹⁸.

(4) *Chaldee or Aramaic Version (Aram.).*—This was first edited by Neubauer from a collection of Midrashim, copied in the 15th cent. in Greek-rabbinical characters. The Book of Tobit is an extract from the *Midrash rabbah-de-rabbah* on Genesis, and forms a haggāda on Jacob's promise to give a tenth of his proceeds to God (Gn 28²²). Neubauer thinks that the Chaldee text of Jerome was Aram. in a fuller form; but in the view of the present writer there are facts which seem to imply that the Aram. is a translation from the Greek. The facts that the dat. 'Πέλος (4¹ 5³) is found in Aram. as גרסא, and 'Εκβαδόνος (3⁷ 6²) as אבנחניס, and the acc. Τύπαι (6¹) as תיפין; and that the Gr. words ἀριστον (2¹) and σμεῖνον (5²) are transliterated in Aram., afford strong proof that Aram. is based on a Greek text: not on \aleph (as Schürer), for Aram. agrees more often with B than with \aleph ; but on a briefer text than either, and more free from Christian influences.

(5) *Hebrew Versions.*—(a) Heb. Munsteri (HM), so called because it was published, with a Lat. tr., by Seb. Münster, at Basle, in 1542. The first edition, however, was printed at Constantinople in 1516. It is included in Walton's Polyglot, and also in Neubauer's *Tobit*. Neubauer gives, in the footnotes, various readings from No. 1251 of the Heb.

MSS in the National Library at Paris: from a Persian tr. from the Heb. which is No. 130 in the same Library; and No. 194 of de Rossi's catalogue, at Parma. It is noteworthy that HM usually agrees with Aram. when the latter dissents from the Greek. In chs. 12, 13, where Aram. is lacking, HM presents an eclectic text, agreeing in the main with Syr., but for 13³⁻¹⁸ it has an original and very brief doxology, and omits ch. 14 altogether. Ginsburg assigns it to the 5th century.—(b) Heb. Fagii (HF). This is a free, independent translation, made perhaps in the 12th century. The translator was a learned Jewish scholar, fond of precise, technical terms; very familiar with the Heb. Bible, and fond of introducing suitable Bible texts, and of reducing the text of Tobit to biblical phraseology. This is also given in Walton's Polyglot.—(c) Heb. Londinii (HL) is a text found by Gaster in the British Museum, Add. 11,639. A description and translation of the MS, which belongs to the 13th cent., is given by Gaster in *PSBA*, vol. xviii. 208 ff., 259 ff., and vol. xx. 27 ff. So far as the exhortations, prayers, and doxologies are concerned, they are certainly late. They develop, in a remarkable degree, the tendency observable in HF to reduce the text to biblical phraseology. In the exhortations, etc., HL gives us a cento of Scripture texts, skillfully selected as being most cognate to the Gr. text. As to the narrative, it is intensely interesting to note how closely HL agrees with Vulg., and Gaster claims for the MS as a whole a close relationship to the 'Syro-Chaldee' used by Jerome. As to the narrative portions, the author of HL certainly may have used an Aramaic or Heb. text closely related to Jerome's 'Syro-Chaldee,' though, if the doxologies, etc., are of late composition, one cannot escape the unpleasant surmise that HL may be drawn from the Vulg. itself.—(d) Heb. Gasteri (HG). This was copied some years ago by Gaster from a Midrash on the Pentateuch, which he fears has now perished. It is a condensation in Heb. of the narrative portions of Aram., with the exhortations, prayers, and doxologies rigorously excluded, and all approach to verbosity in the narrative sternly checked. It is possible that the author of HL may have possessed a similar History, exhibiting those peculiarities of the Vulg. which, until the publication by Gaster of the translation of HL, were considered unique in the Vulgate. The tr. of HG is given in *PSBA* vol. xix. 33 f. Its agreements with Aram. are very significant.

ii. THE NARRATIVE.—Tobit, a pious Jew of the tribe of Naphtali, very scrupulous as to feasts and tithes, was, with his wife Anna and his son Tobias, taken into captivity by Enemessar (Shalmaneser) to Nineveh. Even there he remained loyal to Mosaicism, abstaining from eating the food of the Gentiles; and yet became in time the king's purveyor. Once when travelling in Media, he deposited 10 talents of silver with a brother Jew named Gabael, at Rhagae (RAGES). When Senacherib (who is called in 1¹⁵ Enemessar's son) returned from Judah, Tobit fell into disfavour, chiefly from his habit of burying Jews who were assassinated in the king's fury. Tobit fled, but, on the entreaty of his nephew Achiacharus (Abihkar), was reinstated by king Sarchedonus (Esarhaddon) (ch. 1). At a feast of Pentecost he sent out his son to bring in some poor Jew to dine with him. Tobias returned, saying there was a Jew lying in the street strangled. Tobit rose at once, hid him, and at night buried him. Being thus rendered unclean, he slept in the courtyard; and sparrows 'muted warm dung into his eyes' and blinded him (2¹⁻¹⁰). Reduced to poverty again, Anna wove and spun for hire, and one day, under provocation, she reproached her husband for his blind-

ness; whereupon he prayed to die (31⁶). The same day, in Ecbatana of Media, Sarah, the daughter of Raguel and Edna, who had been married seven times, but whose husbands had all died on the bridal night, was reproached by a maid for having slain them; whereas it was Asmodeus, the arch-demon, who slew them. She also prayed to die (37¹³). The prayers of both were heard, and Raphael was sent to deliver both of them. Tobit, in view of his death, wished to send Tobias to Rhage, to fetch the silver, and gave him a long exhortation (ch. 4). When Tobias sought a guide, Raphael offered his services, pretending to be Azarias, a kinsman. The guide's wages being fixed, the two set out with a favourite dog for Media (ch. 5). On the way, while Tobias was bathing in the Tigris, a great fish threatened him, but he caught it; and on Raphael's advice cut out its heart, liver, and gall for medicinal use later on (ch. 6). Passing through Ecbatana, they stayed with Raguel; and Tobias asked for Sarah in marriage. He had been previously instructed by Raphael how to exorcise the demon from Sarah, and before night the marriage was celebrated (ch. 7). Raguel naturally is apprehensive, and digs a grave at midnight; but the odour of the heart and liver of the fish, when burnt on ashes, caused Asmodeus to flee to Egypt, whither Raphael follows him and binds him; and Tobias and Sarah, after uniting in prayer, pass the night in peace (81¹⁰). Edna satisfies herself on this during the night, and Raguel, after previously thanking God, fills in the grave and prepares the nuptial festivities, which he swears must last 14 days (81²¹). Raphael goes forward to Rhage, secures the silver, still sealed in bags, from Gabael, and brings him back to the wedding, where he pours his blessings on the bridal pair (ch. 9). The festivities over, Raguel sends forth Tobias and his wife in peace to Nineveh, and gives them half his wealth (107¹²). Anna has for days been very miserable, and has stood all day on the highway watching, at intervals reproaching poor blind Tobit for allowing their son to go (101²⁵). When at length she sees Tobias and Azarias who had come on in front, she runs to tell Tobit. Tobias skilfully applies the gall of the mysterious fish to his father's eyes; a white film peels off and his sight is restored. Then Tobit and Anna welcome Sarah with pious wishes (ch. 11). All that remains is to reward the faithful Azarias. Father and son agree to give him half of all they have. Whereupon he discloses his identity and returns to heaven (ch. 12). In ch. 13 we have a Song of Thanksgiving from Tobit; and in ch. 14 Tobit, being now very old, gives to his son and grandsons his dying valedictions, and urges them to leave Nineveh for Media. After his death they go to Media, and arrive in time to witness the death of Raguel and Edna. Tobias lives to a ripe old age, and is allowed to hear the glad news of the destruction of Nineveh.

VARIATIONS OF THE NARRATIVE IN THE SEVERAL VERSIONS.

—If we compare the Jewish VSS with the Gr. and Lat. we find three interesting variations: (a) Aram. and Heb. VSS all omit reference to the dog, which the other VSS mention. (b) In 87 the Jewish VSS (as also Syr.) narrate that after Tobias' prayer in the bridal chamber, 'Sarah said Amen'; the rest, that 'they both together said Amen.' (c) In 53⁹⁰ Aram., HM, HF say that Gabael gave Tobit his bag as a token, not his bond.

Aram., HL, HG, and Vulg. differ from the rest in that throughout they speak of Tobit in the third person, whereas all other texts make Tobit speak in the first person as far as 31⁶. The third is used afterwards.

[N.B.—Except when quoting from the Vulg., the verses are those of the RV.]

Peculiarities of text.—(a) B stands alone (except HG) in omitting the blessing of Gabael, 9⁶; and in its condensation of Edna's prayer, 101²; though HL and Vulg. omit this entirely. Unique readings are: glory of the great Raphael, 31⁶; Jonah, 14⁵; Naboth, 111⁸; Aman, 141¹⁰; 158 years old, 141¹¹.—(b) M. There are scores of *επιζεις* added by M to the text of B. A few may be noted: 12 This is 'west of Phogor'; 15 Israel sacrificed to the calves 'on all the Mts. of Galilee'; 211 'on the 7th

of the month Dystus she cut the web'; 53 Raguel and Tobit divided the bond into two, and each took half; 56 the mendacious angel says, 'I have come here to work'; 68 'blow on the films'; cf. also 101² 123 131⁶. M omits 47¹⁹ (owing probably to a leaf being lost) and 136¹⁰⁻¹¹. In 131⁸ it gives the correct spelling *Αζαριε*, and gives a fuller account of him than B.—(c) *Greek cursives.* A remarkable Gnostic reading occurs in 81⁶. 'Let all the *Æons* praise thee, and let thy angels bless thee.' This is the only Gr. text which says 'the dog ran before them' (111⁴).—(d) *Syriac*, which is really two recensions connected at 71¹, shows the fact in change of spelling: Achior, 210; Ahikar, 141¹⁰; Ragu, 41²⁰; Arag, 9⁶; Edna, 72; Edna, 714. Alterations:—102 years, 14²; 107 years, 141⁴; 10 days, 82⁰. Additions:—Edna dressed Sarah, 71⁸; Anna put on a veil before going to meet her son, 11⁹. Omissions:—136¹⁰⁻¹¹, where Tobit exults in the glories of the future Jerusalem; 143 'Jonah' and also 'Nahum'; 149 the words, 'but not like to the former house'; 149 that all nations shall forsake idolatry; 713 the marriage contract.—(e) *Aramaic* is embedded in a Midrash, and is inserted there to show the merit of giving tithes. The moral at the end also is: 'Behold we learn how great is the power of alms and tithes,' and Gn 14²⁰ 26¹² 28²² are cited in confirmation. Its chief peculiarity is that the MS virtually closes with ch. 11. A few lines, in place of Greek ch. 12, state that Raphael did not go into the house, but went his way; and when Tobias went out to seek him he could not find him, nor had any one seen him; and thus Tobit knew he was an angel. In place of ch. 14, Aram. states that, when Tobit fell sick, he called for his son and impressed on him the importance of almsgiving from the example of the three patriarchs. Aram. omits Tobit's genealogy, 11; Ahikar's offices, 12; Elymais, 210; and the dog, 517 624 114. On the other hand, it expands Sennacherib's return, 118; Anna's welcome to Sarah, 119; and Tobit's thanksgiving, 1114. In 107 Aram. and HM say, 'Anna ate nothing but tears.' Aram. abridges the destination of the three tithes, 16⁸; calls Asmodeus 'king of shedim', 38 17⁴; and renders 518 'without money, God has fed us.' It contains 47¹⁹ lacking in M; and agrees with B against M about as often as with M against B.—(f) *Heb. Munsteri* is remarkable for its omissions from the Gr., sometimes pruning its redundancies as in 48 111¹⁶ 611 14⁴. With Aram. it omits 121; Elymais, 210. It omits Sarah's intention to hang herself, 310; and her going to meet Tobias, 71. It omits 'Noah' from 412; the citation of Gn 218 in 84; Tobit's conversation with Anna, 102³; and Ahikar's visit, 1118. It abridges Tobit's prayer for death, 36; and the prayers in 85 81⁴ 126⁶. But HM has also several original enlargements: notably after 12, where we have a Midrash on the mischief caused by Sennacherib. After 34 it cites Is 19, and Ps 171⁸ after 410. It abridges and modifies the Song in ch. 13 (omitting ch. 14), and its last words are, 'O Lord of the world! show us in our days salvation and redemption by the coming of our Redeemer and the building of Ariel'; then citing Jer 23⁶, Ps 147². Theological features are the thrice repeated prayer for 'children devoted to the Law', 87 96 101¹; the designation of Raphael as 'prince', 317 121⁶; Jerusalem as 'Ariel', 131⁶; and Jehovah as 'the Holy One, blessed be he', 419 121⁴+. A play on words occurs in 37 'It is not meet to call thee Sarah, but Zarah (distress)'. Instances in which HM agrees with Aram. against the Gr. are: 110 (dwell), 113 (until his death), 210 (every morning), 53 92⁵ (bag), 316 1211 (throne), 617 (under her clothes), 618 ('foreseen' for 'foreordained'), 107 (nothing but tears).—(g) *Heb. Fapi* differs from B very considerably. It is fond of inserting OT texts: 36 Ps 4013, 36 Ps 63³, 413 Pr 1018, 419 Pr 3⁶, 136 Ps 3618 908 7210, Jer 3117. It aims at precision: in speaking of 'peace-offerings', 14; 'a beka' for 'a drachma', 514; 'the right of redemption', 317 710; 'the eternal home', 38; 'the Torah and the Halakah', 712; the seven blessings, 713; the cemetery, 89; and especially in 18, where it assigns the third tithe 'for the repair of the breaches of the house', cf. 2 K 22⁵. Interesting theological allusions occur: 316 prayer was heard before our Father in heaven, 411 the judgment of Gehinnom, 86 the first Adam, 617 the union of Tobias and Sarah was foreseen from the 6th day of creation, 810 the *Æons* of the Gr. cursives are described as 'those who are exalted above all blessing and praise', 145 'the house shall stand until the completion of one son.' But the learned Rabbi was no geographer. He gives Alemania=Germany for Elymais in 210; Midian for Media, 114; and Laodicea (?), 62. The latter part of ch. 14 is meagre. Ahikar is omitted 111⁸ 1410.—(h) *Heb. Lond.* is, as we have said, remarkable for presenting many readings heretofore found only in Vulgate. Such, e.g., are 114 'power to go where he wished +', 121 Tobit fled naked with wife and son, 212⁶ the parallel between Tobit and Job, 310 Sarah spent 3 days in prayer, 618⁶ Raphael advises 3 nights of continence. HL also agrees with Vulg. in omitting Ahikar in B 210 and the doctors in M 210, as well as in many other omissions; but HL gives the absurd amount of 1000 talents in 114; it narrates Sarah's intended suicide, which Vulg. omits, 316; it states that Anna went to the outskirts of the town, 616; and that a large party went with the bridal pair a day's journey homewards; and every one gave a ring of gold and a *kēteah* and a piece of silver, 111; it also introduces two long original prayers, by Tobias and Sarah, in the bridal chamber, ch. 8. Vulg. only gives Sarah's prayer thus: 'Be merciful to us, O Lord, be merciful, and let us both grow old healthily together', 810.—(i) *Heb.* has a few unique readings: e.g. 'dust' for 'dung', 210; 'ring' for 'bond', 53; and that Tobias put the heart of the fish on a censor and burnt it under Sarah's clothes. It is very brief, but agrees closely with Aram.: e.g. HG and Aram. only say that

Messianic hope, from which it seems to have been written before the persecution of Antiochus. (6) Its soteriological and ethical tone closely resembles that of other works known to have been written about a century B.C. This we will now try to prove.

vi. **TOBIT AND CONTEMPORARY JEWISH LITERATURE.**—1. *Sirach*. There is, as Fuller has shown (*Speaker's Apoc.* i. 160), a great resemblance between the thought of Tobit and Sirach.

(1) As to the saving value of good works. Both emphasize the value of almsgiving: it is a good gift in God's sight, To 411, fills the doer with life, cleanses away all sin and delivers from death, 129; cf. Sir 320 2912 4294. Sinners are enemies of their own life, 1210; cf. Sir 1821 2815. (2) The eschatology of Sir. and of Tobit are on the same plane. Both regard Sheol as the abode of joyless shades: it is *ś alimūt rīrāt*, 38, where even the righteous go, 310 133; cf. Sir 4619 1416 1728. (3) Both insist on reverent interment of the dead. Very pathetically does Tobit ask to be buried, 43, and for Sarah to be buried beside him, 44; he risks his life to inter his brethren, 117 23 7, and urges his son to place cakes (and wine, Aram., HF, It., Vulg.) on the graves of the righteous [cf. Tylor's *Primitive Culture*, i. 435 ff., ii. 30 ff.]; cf. Sir 733 3018 3816. (4) Both set value on the same ethical duties: purity of marriage, 412 38, Sir 726 3624; honesty to servants, 414, Sir 7207; the true estimate of wealth, 518, Sir 51; benevolence, 47 14 17, Sir 114 124 3510. (5) Both base all virtue on the fear of God, 48 6 19, Sir 537 3510 3715.

2. *The Story of Ahikar*.—In this work, recently published by Camb. Univ. Press, Ahikar is a pious vizier of Sennacherib, who, being childless, adopted a boy, Nadan, and took much pains with his instruction; but when Nadan grew up he incriminated his adoptive father by false letters, and caused him to be sentenced to death. The executioner spared his life, and imprisoned him in a cellar under his (Ahikar's) house. At length he was released, and vengeance was executed on Nadan. This is the story which is alluded to in 1410, more fully in 8 than B.

Ahikar, in 'the Story,' bemoans himself thus: 'I have no son to bury me, nor a daughter, and my possessions no one inherits.' Read with this To 112 27 318 43. There are many features of resemblance between Ahikar's moral teaching to Nadan, and Tobit's to Tobias. In the Syriac Version of Ahikar (*op. cit.* 61) we read: 'My son, eat thy portion, and despise not the righteous' (cf. To 413); 'Do not eat bread with a shameless man' (cf. To 417 Vulg.); 'Associate with a wise man and thou wilt become like him' (cf. To 418); 'My benevolence has saved me' (cf. To 410); 'My son, flee from whoredom' (*op. cit.* 5); cf. 412; and notably, 'Pour out thy wine on the graves of the righteous, rather than drink it with evil men'; cf. 417 'Pour . . . give (it) not to sinners.' Harris discusses the two texts of 8 and B in the *Story of Ahikar*, ch. v., and also in the *Amer. Journ. of Theology*, iii. 541.

3. *The Book of Jubilees* contains passages probably known to the author of Tobit.

To 412 states that Noah took a wife from his relatives. Of course there is no Scriptural warrant for this; but Jubilees (ch. 4) furnishes us with the names of the wives of all the patriarchs from Adam to Noah, and each one married a very near relative. Again, when Jacob left home for Haran, Isaac (Jub 2710) uses words to Rebekah which resemble To 5207 106 'My sister, weep not: he has gone in peace, and in peace will he return (so 8 521). The Most High will preserve him from all evil. For I know his way will be prospered . . . and he will return in peace to us (To 520); for he is on the straight path (419). He is faithful (8 106), and will not perish.' In Jub 2216 we read, 'Separate thyself from the nations, and eat not with them, and become not their associate (To 110): they offer their sacrifices to the dead, and eat over their graves' (To 417).

4. *The Testament of Job* has the foll. parallels:—

Job's wife begged bread for him (ch. 22); Job sang a hymn (ch. 33); in ch. 45 Job, when dying, says, 'Behold, I die; only forget not the Lord (To 43); do good to the poor (416); despise not the helpless (419); take not to yourselves wives from strangers (412); and, lo, I distribute to you all as much as belongs to me' (416).

5. *Judith* (83) attaches importance to the fact that she and her husband were 'of the same tribe and family.'

vii. **TOBIT IN THE CHURCH.**—The *Didachē* (12) gives this advice, 'Whatever thou wishest not to happen to thee, do not thou to another'; To 413 gives this form, 'What thou hatest, do not to another' (so also Hillel [Taylor, *Pirke Aboth*, 37]).

Did 4^{a-b} is also an adaptation of To 410^a. Polycarp (*ad Phil.* ch. 10) says, 'When ye can do good, defer it not, for almsgiving delivers from death'; cf. To 129. Pseudo-Clem. (*ad Cor.* 16) seems to quote 129 thus: 'Almsgiving is as good as repentance for sin; fasting is better than prayer, but almsgiving (is better) than both. Love covereth a multitude of sins. Prayer from a good conscience saveth from death.' Harris (*Amer. Journ. Theol.* iii. 546 ff.) suggests to read 'prayer' for the first 'almsgiving'; and thinks we have the original reading of To 129 in the Gr. cursives. 'Good is prayer with fasting, and almsgiving with righteousness better than both.' Clem. Alex. quotes 416 as *ἡ γὰρ ἀφ' ἧς* (*Strom.* ii. 23, § 139). Origen (*Ep. ad Afric.* xiii.) and Athanasius (*Apol. c. Arian.* xi.) use Tobit as canonical, though theoretically they did not include it in the Canon, because it was not in the Heb. Bible. Cyprian treats it as authoritative in his work on the Lord's Prayer (c. 32). Hilary cites it to prove the intercession of angels (*in Ps.* 129). Ambrose (*de Tobia*, l. 1) treated the book as prophetic, and Augustine included it among the Apoc. of the LXX which 'the Christian Church received' (*de Doctr. Christ.* ii. 8). Jerome (*Præf. ad libb. Salomonis*) allowed its perusal, but forbade its canonicity; whereas the Council of Carthage (A.D. 397) and the Councils of Florence (1439) and of Trent (1546) declared it canonical. Luther (cf. Fritzsche, p. 19) deemed it 'a truly beautiful, wholesome, and profitable fiction.' The Homilies of the Church of England use 410 129 as 'a lesson which the Holy Ghost doth teach in sundry places of the Scripture' (Second Book, *On Alms-deeds*, part 1). The Offertory contains sentences drawn from To 47-9, and the preface to the Marriage Service, that marriage 'ought not to be taken in hand lightly or wantonly to satisfy carnal lusts,' is clearly an adaptation of Vulg. 61; in fact, the first Prayer Book of Edward VI. contained these words: 'As Thou didst send the angel Raphael to Thobie and Sara, the daughter of Raguel, to their great comfort, so vouchsafe to send Thy blessing upon these Thy servants.' The names of Abraham and Sarah are now substituted.

LITERATURE.—COMMENTARIES: Ilgen, *Die Geschichte Tobis, nach drey verschiedenen Originalen*, Jena, 1800; Reusch, *Das Buch Tobias*, Freiburg, 1857; Fritzsche, *Ézég. Handb.* 1853; Fuller, *Speaker's Apoc.*, vol. I, London, 1883; Sengelmann, *Das Buch Tobit*, Hamburg, 1857; Guberlet, *Das Buch Tobias*, Münster, 1877; Bissell in Lange's *Apoc.*, Edinburgh, 1880; Scholz, *Comm. z. B. Tobias*, Würzburg, 1889; Zockler, *Apok. des AT*, München, 1891; Löhr in Kautsch's *Apok. u. Pseudepigr. des AT*, Tübingen, 1900.—**TEXTS:** Swete, *OT in Greek*, vol. II, gives the text of B and 8 in full, with readings from A as foot-notes; Fritzsche gives the text of the Cursives 44. 106 in his *Com.* pp. 89-104; Neubauer on *Tobit* gives Aram., HM, It. I.; the Syriac is found conveniently in Lagarde's *Libri VT Apoc. Syriace*, London, 1861; for HF we have only Walton's *Polyglot*; the most accurate edition of Vulg. is that of Vercellone, Rome, 1861.—**HELPS TO STUDY:** Schürer, *HJP* II. iii. 37-44; *The Story of Ahikar*, from the Syr., Arab., Arm., Eth., Gr., and Slav. J. T. MARSHALL.

TOCHEN (תֹּחֵן 'task,' 'measure'; B Θόκκα, Α Θόχχα; *Thochen*).—A town of Simeon mentioned with Ain, Rimmon, and Ashan (1 Ch 423), and consequently in the Negeb. There is no name like Tochen in the corresponding list of Jos 19, where, however, the LXX Θόκκα shows that the name has fallen out. The site is unknown.

C. W. WILSON.

TOGARMAH (תֹּגַרְמָה, *Thogorma*).—Son of Gomer and brother of Ashkenaz and Riphath (Gn 109). If Ashkenaz is the Asguza of the Assyrians.

inscriptions which is associated with the Minni by Esarhaddon, we shall have to look for Togarmah to the east of Assyria. In 1881 Fr. Delitzsch suggested that it might be Til-garimmu, a fortress of Kummukh or Comagênê; but it must have been a country, since horses and mules were exported from it (Ezk 27¹⁴), and not a mere fortress. Most modern authorities decide for Western Armenia.

A. H. SAYCE.

TOHU.—See **NAHATH**.

TOL.—See **TOU**.

TOKHATH.—See **TIKVAH**.

TOLA (תֹּלָא 'crimson worm,' 'cochineal'; תּוֹלָא, Jg 10¹⁻²).—A minor judge, following Abimelech. His name is that of one of the chief clans of Issachar; see Gn 46¹³, Nu 26²³ (תֹּלָא, הַתּוֹלָאִים), 1 Ch 7¹¹, and art. **PUAH**. His home and burial-place were at Shamir, the seat of the clan, probably in the N. of the highlands of Ephraim: the site is unknown.

G. A. COOKE.

TOLAD (תּוֹלָד 'birth,' 'generation'; Β θουλαέμ, Α θολάδ; *Tholad*).—A town of Simeon mentioned with Ezem, Bethuel, Hormah, and Ziklag (1 Ch 4²⁰). It is the same place as El-tolad in the Negeb (Jos 15⁴⁰ 19¹). The site has not been recovered.

C. W. WILSON.

TOLBANES (Τολβάνης), 1 Es 9²⁵ = Telem, Ezr 10²⁴.—One of the porters in the time of Ezra.

TOLL, PLACE OF (τελώνιον, Mt 9⁹, Mk 2¹⁴, Lk 5²⁷, in AV 'receipt of custom').—The place where the tax collector sat to receive his dues. In Wyclif's translation it is rendered *tolbothe*. In the case of Matthew or Levi, the toll collected was the custom exacted by and paid into the treasury of Herod Antipas, the Idumean prince who then ruled over Galilee. The τελώνιον at Capernaum was of importance, as a large traffic passed on the highway between Damascus and Ptolemais. See **PUBLICAN**.

J. MACPHERSON.

TOMB.—See **BURIAL** and **SEPULCHRE**.

TONGUES, CONFUSION OF.—The narrative of Gn 11¹⁻⁹ is too familiarly known to need detailed repetition here; and it will be sufficient to recall briefly its leading features. Mankind, at the time to which it refers, all had one speech, and lived together. They journeyed, it seems to be implied, nomadically from spot to spot; and on one of their journeys they found a plain in the land of Shin'ar (Babylonia), where they settled, and where also they determined to build a city, and a lofty tower, which should both gain them lasting renown, and also serve as a centre, or rallying-point, to prevent their being dispersed over the surface of the earth. J^h, however, 'came down' to view the building, and [supplying here, with Stade, *ZA W*, 1895, p. 158, and others, words which v.⁷ seems to show have been omitted] having returned to His lofty abode, signified to His heavenly counsellors or associates there (cf. 3²²) His disapproval of it: if this, He said, is the beginning of their ambition, what will be the end of it? nothing will soon be too hard for them. So He 'came down' a second time, and 'confounded' (Heb. *bālal*) their language; and from this occurrence the narrator (J) explains the diversity of existing languages, the dispersion of mankind, and the name of the city of Babylon (in Heb. *Babel*).

1. From a critical point of view, the narrative presents considerable difficulties; for, though it belongs to J, it is difficult to harmonize with

other representations of the same source. The distribution of mankind into different nations has been already described by J in (parts of) ch. 10, and represented there, not as a punishment for misdirected ambition, but as the result of natural processes and movements; and Babylon, the building of which is here interrupted, is in 10¹⁰ represented as already built. The narrative connects also very imperfectly with the close of J's narrative of the Flood; for, though the incident which it describes is placed shortly after the Flood, the terms of v.¹ ('the whole earth'), and the general tenor of the following account, imply a considerably larger population than the 'eight souls' of Noah's family. In all probability (Dillm.) the story originally grew up without reference to the Flood, or the usual derivation of mankind from the three sons of Noah, and it has been imperfectly accommodated to the narratives in chs. 9 and 10; perhaps, indeed, Wellh. and others (cf. the *Oxf. Hex. ad loc.*) are right in conjecturing that originally it belonged to the same cycle of tradition of which fragments are preserved in 4¹⁷⁻²⁴, and formed part of the sequel to 4²⁴.

It is difficult to avoid the conclusion (Wellh., Dillm., and others; cf. the *Oxf. Hex.* ii. 51.) that 4¹⁷⁻²⁴ (describing the beginnings of existing civilization) belongs to a cycle of tradition, in which the continuity of human history was not interrupted by a Flood; and if the conjecture, just mentioned, respecting 11¹⁻⁹ be correct, the same assumption must of course be made with regard to that.

2. That the narrative can contain no scientific or historically true account of the origin of language, is evident from many indications. In the first place, if it is in its right place, it can be demonstrated to rest upon unhistorical assumptions: for the biblical date of the Flood (Ussher's artificial treatment of Gn 11¹⁷ and Ex 12⁴⁰ being disregarded) is B.C. 2501 (or, acc. to the LXX of Gen. and Ex., 3066); and, so far from the whole earth being at either B.C. 2501 or B.C. 3066 'of one language and one speech,' we possess inscriptions dating from periods much earlier than either of these dates written in three distinct languages—Sumerian, Babylonian, and Egyptian. But, even if Wellh.'s supposition, that the narrative belongs really to an earlier stage in the history of mankind, be accepted, it would still be impossible to regard it as historical. For (1) it could not, even then, be placed in a different category from the other narratives in Gn 1-11, which (for reasons which cannot be stated fully here; cf. **FALL, FLOOD**, etc.) must relate to the prehistoric period. And (2) the narrative, while explaining ostensibly the diversity of languages, offers no explanation of the diversity of races. And yet diversity of language—meaning here by the expression not the relatively subordinate differences which are always characteristic of languages developed from a common parent-tongue, but those more radical differences relating alike to structure, grammar, and roots, which show that the languages exhibiting them cannot be referred to a common origin—is dependent upon diversity of race. Of course, cases occur in which a people living near a people of another race, or sub-race, have adopted their language (as, e.g., the Celts in Cornwall have adopted English); but, speaking generally, radically different languages are characteristic of different races, or (if the word be used in its widest sense) of subdivisions of races, or sub-races, which, in virtue of the *faculty* of creating language distinctive of man, have created them for purposes of intercommunication and to satisfy their social instincts. Differences of race, in other words, are more primary in man than differences of language,* and have first to be accounted for. It is, now, a disputed ethnological

* Cf. Sayce, *Races of the OT*, p. 37 L, 'Diversity of race is older than diversity of language.'

problem whether man appeared originally upon the globe at one centre or at many centres.

The former of these alternatives is preferred by modern scientific authorities. Mr. Darwin in his *Descent of Man*, vol. i. ch. 7, after reviewing the arguments on both sides, sums up (pp. 231-233, ed. 1871) in its favour (upon the ground, stated briefly, that the resemblances, physical and mental, between different races are such that it is extremely improbable that they should have been acquired independently by aboriginally distinct species or races): see also to the same effect Lyell, *Principles of Geology*¹² (1875), ii. ch. 43; Huxley, *Critiques and Addresses* (1883), p. 163 ff. (= *Collected Essays*, vii. p. 249 ff.); and Dr. Tylor, art. 'Anthropology' in the *Encycl. Brit.*⁹ and in his volume *Anthropology* (1881), p. 6. But of course these authorities postulate for man a far higher antiquity than is allowed by the biblical narrative (so also Sayce, *Races of the OT*, 23, 37).

But, whichever of these alternatives be adopted, it is easy to see that differences of race are not accounted for in the biblical narratives: the case of primitive man appearing independently at different centres (with, it may be supposed, racial distinctions, at least to some degree, already implanted in him at these centres) is not contemplated in them at all; if, on the other hand, racial differences were gradually developed by the play of natural selection upon the descendants of a single pair, migrating into new climatic and other physical conditions, then the growth of these differences is neither explained by the biblical narratives, nor, in fact, reconcilable with them. For, taking account only of the simplest and most obvious division of mankind into the white, black, and yellow races,* even Gn 10 (Sayce, *HCM* 120) notices only (except Cush?) tribes and nations belonging to the *white* race; while, from the known fixity of racial types, in cases where we are able to observe them, it is certain that, if the white, black, and yellow races, with the many sub-races included in each, have been developed from a single original pair, the process must have occupied a vastly longer period of time than is allowed by the biblical narrative (which places the creation of man at B.C. 4157, or [LXX] B.C. 5328), however early after Adam the dispersion of Gn 11⁹ may be supposed to have actually occurred.

3. It does not fall within the province of a Dictionary of the Bible to give an account of the languages of the world; but a few particulars may be stated here for the purpose of indicating the general conclusions to which the study of the subject has led modern philologists. Prof. Sayce writes (*Introd. to the Science of Language*, 1880, ii. 31 f.): 'The genealogical classification of languages, that which divides them into families and sub-families, each mounting up, as it were, to a single parent-speech, is based on the evidence of grammar and roots. Unless the grammar agrees, no amount of similarity between the roots of two languages could warrant us in comparing them together, and referring them to the same stock. . . . The test of linguistic kinship is agreement in structure [i.e. the formation of sentences], grammar, and roots. Judged by this test, the languages at present spoken in the world probably fall, as Prof. Friedrich Müller observes, into "about 100 different families," between which science can discover no connexion or relationship. When we consider how many languages have probably 'perished since man first appeared upon the globe, we may gain some idea of the numberless essays and types of speech which have gone to form the language-world of the present day.' Basque is an example of an isolated survival of an otherwise extinct family of speech; and in Tasmania four dialects spoken when our colonists first landed on the island have recently disappeared. On pp. 33-64 of the same volume Prof. Sayce gives a list

* See, further, on the classification of the races of mankind, Dr. Tylor's article and work (ch. 3) referred to above.

of 75 families of languages, all unrelated to each other, and each comprising mostly a variety of individual languages or groups of languages.

Of these families the two best known are the Semitic and the Aryan (or Indo-European). The principal languages included in the *Semitic* family are Assyro-Babylonian, Hebrew, Phœnician and Punic, the different Aramaic dialects, Arabic, the S. Arabian dialects (Himyaritic or Sabæan, and Minæan), Ethiopic and allied dialects: all these, though in subordinate details they often differ widely, yet display such obvious resemblances in 'structure, grammatical form, and roots,' that they are manifestly merely varieties of a common parent-tongue. The principal groups included in the *Aryan* family are the Indian group (Sanskrit, with allied languages and many modern vernaculars), the Iranian group (Zend, Persian, etc.), the Celtic group (Welsh, Cornish, Irish, etc.), the Italian group (Umbrian, Oscan, Latin, with the dependent Romance languages), the Thracio-Illyrian group, the Hellenic group, the Letto-Slavonic group (Slavonic, Russian, Polish, Lithuanian, etc.), and the Teutonic group (Gothic, Low German, Anglo-Saxon, English, Dutch, High German, Old Norse, Icelandic, Swedish, Danish, Norwegian): all these languages, though in details they differ even more widely than the Semitic languages, nevertheless exhibit so many common features as to make it evident that they are but varieties, which have arisen by gradual differentiation, under the influence of separation and different local conditions, out of a single original parent-tongue.

Languages, however, differ not only in grammar and roots, but also in a manner which it is more difficult for those, like ourselves, familiar with only one type of language, to realize, viz. 'morphologically,' or in the manner in which ideas are built up into a sentence. Different races do not *think* in the same way; and consequently the forms taken by the sentence in different languages are not the same. The only type of language with which we are practically acquainted is the 'inflectional' type, which prevails in Western Asia and Europe, and to which both the Semitic and Aryan families belong; but there are besides the 'agglutinative' type (of which Turkish is an example), spoken chiefly in Central Asia, the Islands of the Pacific, and many parts of Africa, the 'incorporating,' of which Basque (in S.W. France) is the chief representative, the 'poly-synthetic,' which prevails throughout America,* and the 'isolating' (of which Chinese is the best-known example), characteristic of Eastern Asia (Tibet, Burmah, etc.): all these types of language differing in the manner in which ideas are grouped by the mind, and combined into sentences (for further particulars reference must be made to Sayce, *op. cit.* i. 118-132, 374 ff., ii. 188 ff.; *Races of the OT*, 35 f.; or Whitney's art. 'Philology' in the *Encycl. Britannica*, ed. 9). It is remarkable, as even this cursory description will have indicated, that the morphological character of a language is correlated, in some hidden way, with the geographical and climatic conditions of the country in which it originated: thus the different families of languages spoken in America, though utterly unrelated to each other, are nevertheless all 'poly-synthetic.'

It is an obvious corollary from the radical differences which the various families of language display, as compared with one another, that, whatever may have been the case with the races of mankind, the families of language spoken by mankind must have arisen independently at different centres of human life. 'The languages of the present world are but the selected residuum of the infinite variety of tongues that have grown up and decayed among the races of mankind. . . . The idioms of mankind have had many independent starting-points, and, like the Golden Age, which science has shifted from the past to the future, the dream of a universal language must be realized, if at all, not in the Paradise of Genesis, but in the unifying tendencies of civilization and trade' (Sayce, *Science of Lang.* ii. 322, 323).

* In polysynthetic languages the sentence is the unit of thought; and in many of them separate *words* hardly exist.

As need hardly be remarked, what the primitive language of mankind was, is unknown. Formerly, indeed, it was the general belief that it was Hebrew, and all other languages were supposed to be derived from this (!): see Max Müller, *Lectures on the Sc. of Lang.* 1st series, ed. 1864, p. 132 ff. Leibnitz appears to have been the first to point out the absurdity of this view, remarking justly (*ib.* p. 135 f.) that 'to call Hebrew the primitive language was like calling branches of a tree primitive branches'; and the science of comparative philology, which has arisen since Leibnitz's day, has but confirmed the soundness of his judgment. Even among the Semitic languages, Arabic, in many respects, exhibits older and more original features than Hebrew; besides, unless all analogy is deceptive, the language of primitive man must have been of a far more simple, undeveloped type than any of the existing Semitic languages.

4. Differences of language and differences of race thus point independently to the great antiquity of man upon the earth. And their evidence is more than confirmed by testimony from other quarters. Even during the last ten years the discoveries of Petrie and de Morgan in Egypt, and of Hilprecht and others in Babylonia, have shown that civilization existed in these two countries at a period considerably earlier than had previously been supposed; while the existence of inscriptions, sculptures, paintings, and various objects of art, belonging certainly to a date not later than B.C. 4000, makes it evident that the beginnings of civilization and art in both these countries must have preceded that date by many centuries, not to say by millennia. And the numerous relics of human workmanship, especially stone implements of different kinds, and bone or other material, engraven with figures, which have been found during recent years in different parts of Europe and America, bear testimony, in the opinion of geologists, to a greater antiquity still, and show that man, in a rude and primitive stage of development, ranged through the forests and river-valleys of these continents, in company with mammals now extinct, during periods of the so-called 'glacial age,' when the glaciers (which then extended over large parts both of the British Isles and of the Continent of Europe) retreated sufficiently to enable him to do so (Dawkins, *Early Man*, 112-122, 137, 152 ff., 161-164, 169, etc.). The date at which these relics of human workmanship were embedded in the deposits in which they are now found, cannot be estimated, precisely, in years B.C.; but the late Prof. Prestwich, a geologist not addicted to extravagant opinions, assigned to palæolithic man, as 'a rough approximate limit, on data very insufficient and subject to correction,' a period of from 20,000 to 30,000 years from the present time.

See Prestwich's *Geology* (1888), II. 534; in his *Controverted Questions of Geology* (1895), p. 46, he gives similar but somewhat higher figures. It was in 1859 that 'the barriers which restricted the age of man to a limited traditional chronology were overthrown by the discoveries in the Valley of the Somme and Brixham Cave' (*ib.* p. 19). 'Palæolithic' implements are those found in association with extinct mammalia; 'neolithic' implements, which show a higher type of workmanship, are those found with existing species. In the palæolithic period, the 'river-drift man' hunted the elephant and the lion, the hippopotamus and the rhinoceros, in the valley of the Lower Thames.—See further on this subject Evans, *The Ancient Stone Implements, Weapons, and Ornaments of Great Britain*², 1897 (on their antiquity, pp. 703-9); Boyd Dawkins, *Early Man in Britain*, 1880 (where, at the end of the several chapters, the characteristics of the civilization of the successive ages—the river-drift hunter, the cave man, the neolithic farmer and herdsman [contemporary with the beginnings of organized empires in the East], the bronze age, and the iron age—are well indicated); Lyell, *Antiquity of Man*⁴, 1873; Lord Avebury (Sir J. Lubbock), *Prehistoric Times*⁶ (1900), esp. ch. 11; G. F. Wright, *Man and the Glacial Age* (in the *Intern. Scient. Series*), 1892, p. 242 ff.; Morris, *Man and his Ancestor* (a small popularly written work), 1900, p. 21 ff.; Tylor, *Anthropology*, p. 28 ff. That man was coeval in Western Europe with the glacial period is accepted by Sayce, *Races of the OT*, p. 23.

The general conclusion, resulting from all that has been said, may be summed up in Dr. Tylor's words: 'Man's first appearance on earth goes back to an age compared with which the ancients, as we call them, are but moderns. The four thousand

years of recorded history only take us back to a prehistoric period of untold length, during which took place the primary distribution of mankind over the earth and the development of the great races, the formation of speech and the settlement of the great families of language, and the growth of culture up to the levels of the old-world nations of the East, the forerunners and founders of modern civilized life' (*Anthropology*, p. 24).

5. It is thus apparent that there are two great facts, the antiquity of man, and the wide distribution of man over the surface of the earth, of which the biblical narrative, whether in 11¹⁻⁹ or elsewhere, takes no account. It is true, of course, that 11⁸⁻⁹ accounts ostensibly for the distribution of man 'over the face of the whole earth'; but it has been shown above why it does not do so really: the dispersion is placed *too late* to account for the known facts respecting both the distribution of man and the diversity of races: how, for example, can the 'river-drift man' of the glacial, or even of the post-glacial, period be brought within the scope of the biblical narrative? To say that the biblical writers spoke only of the nations of whom they knew is perfectly true; but the admission deprives their statements of all historical or scientific value: 'palæolithic' and 'neolithic' man, and the black and yellow historic races, all existed; and any explanation, purporting to account for the populations of the earth, and the diversity of languages spoken by them, must take cognizance of them: an explanation which does not take cognizance of them can be no historically true account either of the diffusion of mankind, or of the diversity of speech. The first 11 chapters of Genesis, it may be safely assumed, report faithfully *what was currently believed among the Hebrews* respecting the early history of mankind: they contain no account of the *real* beginnings of man, or of human civilization, upon the earth.

6. The true explanation of the story in Gn 11¹⁻⁹, it cannot be doubted, is that which is given by Prof. (now Bishop) Kyle in his *Early Narratives of Genesis*, p. 127 ff. As in 2^{4b-4} the origin of various existing customs and institutions is explained in accordance with the beliefs of Hebrew antiquity, so in 11¹⁻⁹ the explanation is given of the diversity of languages spoken by different peoples inhabiting different parts of the earth. As soon as men began to reflect, they must have wondered what was the cause of differences of language, which not only impressed the Hebrews (Is 33¹, Dt 28¹⁴, Jer 5¹³, Ps 114¹), but also were an impediment to free intercourse, and accentuated national interests and antagonisms. 'The story of the Tower of Babel supplied to such primitive questionings an answer suited to the comprehension of a primitive time. Just as Greek fable told of the giants who strove to scale Olympus, so Semitic legend told of the impious act by which the sons of men sought to raise themselves to the dwelling-place of God, and erect an enduring symbol of human unity to be seen from every side'; and how Jehovah interposed to frustrate their purposes, and brought upon them the very dispersal which they had sought to avoid. The narrative thus contains simply the answer which Hebrew folk-lore gave to the question which differences of language and nationality directly suggested. At the same time, it is so worded as to convey (like the other early narratives of Genesis) spiritual lessons. Though the conception of Deity is naïve, and even, it may be (v. 7), imperfectly disengaged from polytheism, the narrative nevertheless emphasizes Jehovah's supremacy over the world; it teaches how the self-exaltation of man is checked by God; and it shows how the distribution of mankind into

nations, and diversity of language, is an element in His providential plan for the development and progress of humanity.

7. No Bab. parallel to Gn 11¹⁻⁹ has as yet been discovered.

The reference in the fragmentary Brit. Mus. Inscription (K. 3657), tr. by G. Smith, *Chald. Gen.* 160, and mentioned in *HCM* 153, is very uncertain; for though the inscr. does seem to speak of the erection of some building in Babylon by the order of the king, which offended the gods, so that they 'made an end by night' of the work done by day, the crucial words, rendered 'strong place' and 'speech,' are (as is admitted for the latter (*tulu*) by Smith himself, p. 163) both extremely doubtful: see Delitzsch's note in the Germ. tr. of Smith's book, p. 310; and for *tazintu*, 'strong place,' Del. *HWB* 37, where it is tr. *Wch-klage*! Cf. the transcr. and tr. by Boscauwen in *TSBA* v. (1877) p. 303 ff. (where, however, p. 308, 'speech' for *melik*, 'counsel' (*HWB* 413), is quite gratuitous).

In the Jewish Hagrada of a later age, the tower was said to have been destroyed by mighty winds: see the *Orac. Sibyll.* iii. 57 ff. (whence Jos. *Ant.* i. iv. 3 (the quotation) = Alex. Polyhistor ap. Syncell. *Chron.*, ed. Dindorf, i. 81 C) and *Jubilees* 10¹⁸⁻²¹ (tr. Charles, *JQR* vi. 208 f.); cf. (from Abydenus) Eus. *Præp. Ev.* ix. 14 = Eus. *Chron.*, Schoene, i. 39 = Syncell. i. 81 D, and (from Eupolemus ap. Alex. Polyhistor) ix. 17. 1. From the fact that in Jos. and Abyd. (*τοῦ ἀντιστοῦ ὀνόματος ἀνατίθηται τὸ ἰσχυρὸν*) the plural 'gods' is used, Stade (*l.c.* p. 161 f.) conjectured that these authorities have preserved reminiscences of an older polytheistic version of the tradition.

In fact, though the narrative plainly presupposes a knowledge of Babylonia, it does not seem itself to be of Babylonian origin: if any Bab. legend lies at the basis of it, it must have been strongly Hebraized. As Gunkel has remarked, the narrator speaks as a foreigner rather than as a native: the unfavourable light in which the foundation of Babylon is represented; the idea that the erection of what (*ex hyp.*) can hardly have been anything but a Bab. *zikkurat* (or pyramidal temple-tower*) was interrupted by (*ex hyp.*) a Bab. deity; the mention, as of something unusual, of brick and bitumen, as building materials, and the false etymology of the name 'Babel,' are all features not likely to have originated in Babylonia. It does, however, seem a probable conjecture (Ewald, *Jahrb.* ix. [1858] 12f., Schrader, *Dillm.*) that some gigantic tower-like building in Babylon, which had either been left unfinished or fallen into disrepair, gave rise to the legend. The tower in question has often been supposed to be Iuriminanki, the *zikkurat* of E-zida, the great temple of Nebo, in Borsippa (a city almost contiguous to Babylon on the S.W.), the ruined remains of which form the huge pyramidal mound now called *Birs Nimroud*. This *zikkurat*, remarkably enough, Nebuchadnezzar states had been built partially by a former king, but not completed: its 'head,' or top, had not been set up; it had also fallen into disrepair; and Neb. restored it.† Others regard it as an objection to this identification that E-zida was not actually in Babylon; and prefer to think of Itiminanki, the *zikkurat* of E-sagil, the famous and ancient temple of Marduk in Babylon itself, the site of which is generally‡ considered to be hidden under the massive oblong mound called *Babil*, about 20 miles N. of Birs Nimroud.§ Schrader does not decide between E-zida and E-sagil: Dillm. thinks E-sagil the more likely, but leaves it open whether, after all, the Heb. legend may not have referred to some half-ruined ancient building in Babylon, not otherwise known to us. The high antiquity of Babylon, and the fact that it was the chief centre of a region in which the Hebrews placed the cradle of the human race, would fit it to be regarded as the

point from which mankind dispersed over the earth.

See, further (besides the Comm.), Cheyne, art. 'Babel (Tower of)' in the *Encycl. Bibl.*; and Dr. Worcester in *Genesis in the Light of Modern Knowledge* (New York, 1901), 491 ff.

S. R. DRIVER.

TONGUES, GIFT OF.—i. THE BIBLICAL EVIDENCE.—(a) *Acts of the Apostles.* On the first day of Pentecost after the Resurrection and Ascension (Ac 2^{1st}), the disciples, about 120 in number (1¹³), were assembled together. 'Suddenly there came from heaven a sound as of the rushing of a mighty wind, and it filled all the house where they were sitting. And there appeared unto them tongues parting asunder, like as of fire; and it [sc. γλώσσα] sat upon each one of them. And they were all filled with the Holy Spirit, and began to speak with other tongues as the Spirit gave them utterance.' Two wonders are here described—the vision of the fiery tongues, apparent to all in the house, but, as it seems, to them only; and the speaking 'with other tongues,' which was, as the sequel shows, apparent to others also. The latter (v. 11) consisted in 'speaking the mighty works of God.' It was not, at first at any rate, addressed to those outside. But 'when this sound was heard, the multitude came together,' and Jews, then present at Jerusalem from every nation under heaven, heard to their astonishment the brethren speaking in their own respective languages (vv. 6-12). Some, however, 'mocking, said, They are filled with new wine.' In reply to these latter, St. Peter interprets the phenomenon by recalling the prophecy of Joel, which speaks of an outpouring of the Spirit in the latter days, which shall cause the servants and handmaidens of the Lord to see visions and to prophesy (vv. 17-18), and deduces it from the Messianic office of Jesus, in whose exaltation this promise of the Holy Spirit is fulfilled (v. 33). The phenomenon of the fiery tongues reappears no more in the sacred narrative; but that of speaking with tongues is repeated (Ac 10⁴⁴⁻⁴⁶) upon the conversion of the Gentile household of Cornelius, who with a sudden inspiration of the Holy Spirit 'speak with tongues and glorify God.' This is clearly the same phenomenon as is described in Ac 2¹¹, and the identity is expressly asserted by St. Peter (11¹⁸) ὡς περ καὶ ἐφ' ἡμᾶς ἐν ἀρχῇ. The 'speaking with other tongues' is therefore a recurrent phenomenon in the Apostolic Church; and accordingly we read of the twelve disciples at Ephesus (19⁶), that 'when Paul had laid his hands upon them, the Holy Ghost came on them; and they spake with tongues and prophesied.' In this passage the phenomenon is for the first time expressly associated with the exercise of the prophetic gift. (On Spitta's analysis of the sources of Ac 2^{1st}, see Knowing, p. 100).

(b) *Gospel of St. Mark.*—In the doubtful appendix to this Gospel (16¹⁷), among the wonders which are to follow those who believe, it is said 'they shall speak with [new] tongues.' The word 'new' is of very questionable genuineness; if it be rejected, the passage is a bare reference to 'speaking with tongues,' and throws little light upon the nature of the utterances.

(c) *First Epistle to the Corinthians.*—In chs. 12-14, especially the last-named chapter, we have the most circumstantial reference to the phenomenon. In 12¹⁻¹¹ St. Paul enumerates different gifts, which in their diversity proceed from the self-same Spirit. First come gifts of ordinary teaching (λόγος σοφίας, λ. γνώσεως), then faith, healings, and other miracles, then at the end prophecy and the discerning of spirits, followed, in the last place of all, by 'kinds of tongues' (γῆνη), a new qualification, and 'interpretation of tongues,' which also appears in these chapters alone. The enumeration of offices and gifts in

* Jastrow, *Rel. of Bab. and Ass.* p. 615 ff.

† The inscr. is tr. in *KAT* 124 f., *KIB* iii. 2, pp. 53, 55.

‡ See, however, Hommel in vol. i. p. 213^a; and Babylon, § 8, in the *Encycl. Bibl.*

§ See the plan of Babylon and its environs in Smith's *DB*, s.v.; or in the *Encycl. Bibl.* s.v. Views of the two mounds referred to may be seen in Smith, s.v. 'Babel,' and 'Babel (Tower of)'; Richm., *HWB*, s.v.; or Ball's *Light from the East*, pp. 220, 221.

vv.²⁸⁻³⁰ corresponds to that of gifts in vv.⁴⁻¹¹. The teaching offices come first (apostles, prophets, teachers), then miracles and healings, then 'helps' and 'guidances,' then, again last of all, 'kinds of tongues.' Prophecy and 'discernings of spirits' are evidently omitted here because of the insertion of 'prophets' after 'apostles.' Then, in the interrogative clauses that follow, the 'tongues,' this time with the added mention of 'interpretation,' but without the mention of *γέρη*, again bring up the rear: 'Do all speak with tongues? do all interpret?' In ch. 13 the tongues, which St. Paul has put last in the order of precedence, come first in the order of deprecation. 'Tongues of men and of angels' may be taken as a climax, for this purpose, upon the less rhetorical *γέρη γλωσσῶν* (see below, § iii. (b)). Apart from charity, not only tongues (however wonderful), but even prophecy, even *work* of charity, are worthless. Compared with it, prophecy, tongues, knowledge itself, all belong to our childhood, to our ignorance, to the sphere of things temporal. Then in ch. 14, after a closing reminder of the subordinate place which *πνευματικά* are to occupy in our desires as compared with charity, the apostle enters in detail upon a comparison between the two most conspicuous *πνευματικά*, viz. prophecy and tongues. Prophecy is the more desirable of the two, because it is addressed to men, and benefits them, whereas 'tongues' are addressed to God, and benefit the speaker only (vv.¹⁻⁵). The only exception to this is when the speaker (or some other person, v.²⁷.) can interpret his utterances. This would enable the rest of those present to join in with their 'Amen' (v.¹⁶), and so derive some benefit from the prayer. Without going into details of exegesis, which in this chapter are full of difficulty, it is sufficient to emphasize certain points upon which the apostle speaks without any obscurity. *Firstly*, as already remarked, the speaker with tongues speaks to God only; his utterance is not a sermon but a prayer or psalm (vv.^{2, 13, 14, 15}), or a thanksgiving (v.⁶). *Secondly*, the utterance is unintelligible to the hearers, and even to the speaker. The spirit is in prayer, but the mind takes no part, it is unfruitful (vv.^{14, 15}); the speaker 'edifies himself' apparently by his attitude of ecstatic devotion, not by conscious expression or reception of ideas. *Thirdly*, while 'interpretation' is thought of as possible, its absence seems to have been the rule, its presence the exception (vv.^{5, 13}). Accordingly (*fourthly*), the impression which 'tongues' produce upon a visitor, especially on a non-believer (v.²³), is that of an assembly of madmen (cf. Ac 2¹³); whereas, in the case of prophecy, the non-believer, or at any rate the visitor, will be profoundly stirred, probably to conversion (vv.^{24, 25}).

The closing section of the chapter (v.²⁵.) shows the *ἀκαταστασία*, which had resulted at Corinth from the childish (12^{15, 20} 13¹¹ 14^{12, 20}) desire of too many of the members of the Church to excel in the exercise of abnormal gifts, and from their dangerous tendency to value spiritual gifts in proportion to their abnormal features. The apostle exactly inverts this principle.

ii. CLASSIFICATION OF THE DATA.—There is no possible doubt that the phenomena of the Church of Corinth are homogeneous with those which meet us at Caesarea (Ac 10⁴⁶) and at Ephesus (Ac 19⁶). These two passages are linked together by the reference to baptism, and the close relation of the tongues to prophecy connects the latter passage with the phenomena of Corinth. We may therefore conclude that one feature of the life of the Apostolic Churches was the correlation between the perceptible presence of the Holy Spirit, which began at baptism, but was continued in the assemblies and corporate acts of the Churches

(see vol. ii. pp. 407^b, 409^a), and certain utterances on the part of members of the Churches, sometimes intelligible and less ecstatic (prophecy), sometimes more ecstatic and not intelligible (tongues). On the border-line between the two classes of utterance would come the interpretation of tongues, a gift apparently known to St. Paul, but assumed by him to be exceptional, and passed over in the more occasional notices of the Acts of the Apostles. With these data we can without difficulty class the reference in St. Mark 16 (above, i. (b)). It has been not infrequently laid down, that while these passages refer to one homogeneous group of phenomena, that group is separated from the phenomena of Ac 2 by a difference in kind. This assumption, however, is in too direct conflict with the words of St. Peter (Ac 11¹⁵) to be admitted. The homogeneity of the later phenomenon with that of Pentecost, here asserted, can be denied only by undermining the credit of the Acts as a source. But, while we are thus obliged to class the phenomena of Ac 2 with those of the other passages of the NT, it must be recognized that with the features common to all passages certain peculiarities are combined in the narrative of Pentecost. First, there is the sound of the rushing wind; second, the vision of the fiery tongues; thirdly, the intelligibility of the utterances *without the 'interpretation,'* which to St. Paul is necessary if the 'tongues' are to be understood. But in Ac 2, as in 1 Co 14, the 'tongues' are utterances of worship, not of a didactic character, not addressed to the Jews (whose attention is attracted by the utterances only after they have begun); the association with prophecy, implied in the quotation from Joel, is, to St. Peter apparently, as to St. Paul, due simply to identity of origin; and in both passages (Ac 2¹², 1 Co 14²²) the impression produced upon less sympathetic hearers is similar. In the attempt, therefore, to interpret correctly the data of the NT relating to the subject of 'tongues,' the only sound method to adopt will be to begin from the most circumstantial account we have,—that of St. Paul,—but, in applying the results to other passages, to bear in mind any peculiar features which distinguish their account of what is certainly in substance the same phenomenon.

iii. INTERPRETATION OF THE EVIDENCE.—(a) St. Paul, in common with all to whom the Christian religion is a revelation from God, assumes that the gift of tongues is an energy of the Holy Spirit. No doubt he places it lower in value than any other spiritual gift enumerated by him. No doubt, also, like other gifts of the Spirit, it was capable of being simulated by phenomena not due to genuine inspiration. There was room here for *διακρίσις* (1 Co 12¹⁰). But the main criterion to be applied by the discerners of spirits was *the substance of what was said* (1 Co 2⁴, cf. 1 Jn 4¹, the apostle has no sympathy with the heathenish idea that an utterance, apart from its intrinsic value, could be accredited by its abnormal circumstances). Now, in the case of an unintelligible utterance, like that of *ἐν γλώσσῃ*, no such criterion was applicable. The apostle therefore assumes, in the case of tongues, that he has to do in each instance with the spiritual reality, not with a merely natural phenomenon (14^{14, 15}). We must be content with the same assumption, however mindful that where there is the need of self-control (14²⁸) there is the possibility of self-will. The Spirit is doubtless really at work, even upon a psychical background of obscure, easily perversible, mental exaltation.

(b) If the phenomena of the NT are essentially homogeneous, we may safely reject some explanations which are applicable at most to a limited

number of the passages under review. First among these may be set aside that based upon the strictly literal and physical sense of *γλῶσσα*, understood of 'the tongue' or organ of speech (Eichhorn, Meyer, etc.). This might at first sight be thought applicable to Ac 2. The disciples, as the fiery tongues appear to settle upon each of them, begin to speak *ἑτέροις γλώσσαις* (compare the probably spurious *καιναῖς* of Mk 16¹⁷), i.e. with (literal) tongues other than their own, identified with, or symbolized by, the tongues of flame. But it cannot be seriously argued that the 'tongues' of this passage are different from the 'dialects' of vv. 6-8; this identification is quite clear in v. 11 *ταῖς ἡμετέροις γλώσσαις*. And this carries with it (by Ac 11¹⁸) the interpretation of Ac 10⁴⁶ 10⁴⁶, where *λαλεῖν γλώσσαις* is equivalent to λ. *ἑτέροις γ.* in Ac 2. The literal sense claimed for γλ. in these latter passages has no support in Ps 38⁴ LXX *ἐλάλησα ἐν γλώσσῃ μου*, where the use of the possessive indicates the literal sense. But it is argued that the literal sense is applicable in 1 Co 12. 14 (but 13¹⁷), where (14^{14c}) *προσεύχεσθαι γλῶσσῃ* is contrasted with *πρ. τῷ νοῦ*, the tongue (so it is urged) being conceived as the passive instrument of the *πνεῦμα*, and the plural *γλῶσσαις* (surely a *reductio ad absurdum*) referring 'to the various motions of the tongue' (so Thayer-Grimm, s.v.; see also Meyer-Heinrici on 12¹⁹). *Γλῶσσα* must mean an utterance, not merely the moving tongue; this latter sense breaks down in the pl. *γλῶσσαις*, and still more conspicuously in the phrase *γένη γλωσσῶν*, which clearly points to various kinds of utterance, whether foreign languages or not.

(c) Another sense of *γλῶσσα* which fails of general applicability is that (exemplified in Aristotle, *Poet.* 21 f.) of 'unusual word,' e.g. expressions borrowed from the Aramaic, like 'Amen,' 'Maran Atha,' or 'Abba' (Ernesti, Bleek, etc.). The use of such expressions would not be improbable in a state of high spiritual tension, and in fact the last-named word was regarded by St. Paul as specially characteristic of the Spirit (Ro 8³, Gal 4⁶); but there is nothing in his language to connect it specifically with 'tongues,' which possibly may be referred to, though even this is uncertain, in the *στεναγμοὶ ἀλάλητοι* of Ro 8²⁶. Moreover, this sense of *γλῶσσα* fits ill with the data of Ac 2, and still worse with those of 1 Co 14; for these occasional borrowed words had a well-recognized meaning, and in their use the *νοῦς* was not *ἀκαρπος*.

(d) The same principle, to say nothing of other considerations, absolutely excludes the idea, which has some traditional support in Christian opinion from Origen (in *Rom.* 1³) downwards, that the apostles, at any rate, if not all those present, received at Pentecost the more or less permanent power of *preaching in foreign languages*. To begin with (above, § ii.), the speaking with tongues is an utterance of worship, not of instruction. It has been argued that we never read of the apostles needing the services of an interpreter. But neither do we read of their 'speaking with tongues' on any occasion subsequent to Pentecost. St. Paul, it is true, claims to possess the gift, but in a context (1 Co 14¹⁸) which excludes any reference to preaching. With one exception, indeed, we do not read of any apostolic preaching in lands where Greek or Aramaic would not be a sufficient medium. The partial exception is in the bilingual district of Lystra (Ac 14), and here the apostles clearly do not follow what is said *Λυκαονιστῶν*. Ocular evidence at last enables them to realize that they are regarded as gods. But though the sacred text says nothing of *preaching*, permanently or even temporarily, in foreign tongues, it certainly suggests at first sight that a great number of foreign languages were supernaturally spoken,

if only in adoration, on the occasion of the first Pentecost.

(e) This interpretation is not so wholly excluded as might appear at first sight by the language of 1 Co 14. For although the *γλῶσσαις* are, without one to interpret them, unintelligible even to the speaker, the possibility of interpretation, clearly contemplated by St. Paul, suggests that he regarded the utterances as having a meaning, though as a rule not ascertainable (*τὴν δύναμιν τῆς φωνῆς*, v. 11). If so, the only difference in Ac 2 would be that the interpreter was on that occasion unnecessary.

What, then, is really described in Ac 2? The view has been held by both ancient (Greg. Naz. Or. 41. xv, Bede, etc.) and modern writers, that while the disciples spoke in some one language, each group of hearers understood the words as spoken in his own; just as St. Vincent Ferrer, preaching in Spanish, was said to have been understood by English, Flemish, French, and Italian hearers, etc. But this is not what the narrative describes: we have a miracle of *speech*, not of *hearing* only, they began (before the hearers had come) to speak *ἑτέροις γλώσσαις*. But the more difficult question is in what precisely does the miracle described consist? The hearers are not Gentiles, but Jews (2⁹). Proselytes are included among the Roman visitors (2¹⁰), it is conceivable that 'Ιουδ. τε κ. προσ. applies to all the countries enumerated, but the mention of 'Ιουδαίαν (v. 5) is rather adverse to this; but clearly we have to do with the assembly of Jewish pilgrims, including perhaps some more permanent visitors (*κατοικοῦντες*, v. 5), whom a great festival would find gathered in the Holy City. Now the list (vv. 8-11) is one of *countries*, not of *languages*. Of the fifteen nationalities or regions enumerated, Judaea (even if here used by Luke as in Lk 4⁴ for Palestine generally) and probably Arabia (see ARETAS) belong to the domain of Palestinian Judaism whose language was West Aramaic. The Jews of the Euphrates region, Parthians, Medes, Elamites (i.e. of Persia, Elam had ceased to exist as a kingdom since the days of Assurbanipal), and Mesopotamians represent the Babylonian group of Jews, who used an East-Aramaic dialect.

This leaves us with nine countries, of which five fall within Asia Minor, where the Jews, as their inscriptions show, spoke Greek (Schürer, *HJP* §§ 2, 31; this was the case as far north as the Crimea). Of the remaining four, Egypt is the mother of Hellenistic Judaism, Cyrene was Greek, Greek was the language of the Jews in Crete, and, as their inscriptions show, of the Jews of Rome. Accordingly, the narrative does not appear to carry us beyond the area of Greek and Aramaic-speaking Judaism. That the Jews of the different countries enumerated spoke these languages with dialectal differences, is of course more than probable. It might therefore suggest itself that the obstacle overcome by the inspiration of Pentecost was diversity not of language but of dialect only. But we cannot appeal, for confirmation of this, to the use of the word *διάλεκτος* (in vv. 6-8), for the word means *language* (e.g. Aramaic as contrasted with Greek, Ac 1⁹ 21⁴⁰ 26¹⁴). A stronger point is that the surprise of the hearers turned on the fact that the speakers were Galileans (Ac 2⁷, cf. Mt 26⁷³), i.e. not merely men of Palestinian language (*Ἑβραῖοι*), but men of a marked provincial dialect. But, quite apart from the result of the above analysis of the list, there is no evidence that Jews outside Palestine used any language but Greek or Aramaic. The conclusion, then, as to the exact implications of the narrative is very obscure. We must probably be content with a *non liquet*; possibly the language of St.

Peter (2¹⁷. 18. 23, note ἐκχῶ, ἐξέχευ) may permit the conjecture that the narrative combines the two elements, afterwards treated as distinct, of tongues and prophecy. Common to all the NT descriptions of the tongues is the feature of utterances not in the common language of the speakers; but whereas in 1 Cor. the hearers are, as a rule (i.e. without an interpreter), in the dark as to the meaning, in Ac 2 the meaning is clear to both Greek-speaking and Aramaic-speaking Jews without any such aid: they hear the praises of God each in the tongue wherein he was born.

(f) It has been necessary, in order to test the possibility of a definite interpretation of the data, to reduce the narrative of the first Christian Pentecost to its framework of definite prose statement, so far as the nature of the γλῶσσαι, our special subject of inquiry, is concerned. If our conclusion on this point is necessarily indefinite, we must remind ourselves that the γλῶσσαι are but one element in an event of momentous significance, the baptism (Ac 1⁵) of the Christian Society for its mission to mankind. The baptism of Pentecost takes its place, in intimate context with the Resurrection and Exaltation of Christ, as the experience which lies behind, and is needed to render conceivable, the abrupt psychological transition which transformed the cowed, perplexed, scattered disciples of a few weeks before into the band that in the succeeding narrative sets out upon its march with joyous swing, conquering and to conquer. That the Spirit was then really given is impossible for believers in the Resurrection of Christ to doubt. That His coming was overwhelming in its suddenness and intensity, and was attended by physical signs not repeated in their fulness on any later occasion, is not less credible than the reality of the 'promise of the Father' and of its fulfilment. That these signs should be not only unaccountable by ordinary causes, but in some details incapable of precise definition, is a small thing, and antecedently probable. Beyond this it is hardly possible to go.

iv. LATER HISTORY.—There is no clear evidence of tongues as a religious phenomenon anterior to NT times, nor of their survival in the early Church after the apostolic age. Ecstatic utterances appear to have occurred in some forms of OT prophecy (2 S 19²⁰ etc.), but no mention is made of 'tongues' as a feature of them. Even in heathen religions, as St. Paul hints (1 Co 12³⁰), there were analogous phenomena which it was necessary to remember in the attempt to 'discern' the true work of the Holy Spirit. This suggests that profound religious excitement, to whatever cause it may be due, tends to find expression in abnormal utterance. In the NT this tendency gradually gives way to more normal forms; in Eph 5¹⁸. 19 we catch, as it were, the last echoes of glossolalic speech; in the later Epistles we hear no more of it. Irenæus (*Hæc.* v. vi.) can still tell us, speaking apparently from hearsay, of brethren who prophesied, and spoke through the Spirit in all kinds (παντοδαπαῖς) of tongues; but Chrysostom (on 1 Co 14) frankly declares that the gifts described by St. Paul were unknown in the Church of his day. That the gift of tongues really survived even down to the time of Irenæus is, in the absence of corroborating evidence, difficult to believe. His rather vague statement may rest on some report as to the Montanists of Asia Minor, but in their case again the definite evidence we possess points to 'prophecy' rather than 'tongues' as the distinctive form of their ecstatic speech.

Of more modern examples of such utterances among the Franciscans of the 13th cent., the early Quakers, Jansenists, Methodists, the French Prophets of the Cevennes, and particularly the Irving-

ites whose 'tongues' (1832-3) have been described by several competent observers, we will only observe that it would be harsh and unjust to ascribe all such phenomena to the studied attempt to reproduce those of the apostolic Church. In whatever way we may explain these utterances, and however good reason there may be to suspect occasional simulation, the spontaneity of the phenomena in general must be freely admitted. But, for reasons suggested above, great caution is necessary in applying them to the interpretation of the NT data.

LITERATURE.—On the last-named class of phenomena, Plumptre's excellent article in Smith's *DB* gives useful references; see also Miller, *Irvingism*. On the NT data the literature is considerable. The Commentaries, e.g. those of Meyer-Wendt and Knowling on Ac 2, of Meyer-Heinrici, Godet, Edwards on 1 Co 12. 14, sum up and discuss the various explanations. Among many separate essays we may mention those of Schneckenburger (*Beitr.* 1832); Wieseler (in *SK*, 1838); Hilgenfeld, *Glossolalie*, Leipzig, 1850; Zeller, *Acts of the Ap.*, Eng. tr. vol. i. p. 171 (the ablest anti-miraculous discussion; denies any historical foundation for Ac 2); Rossetuscher, *Gabe d. Sprachen im Apost. Zlttr.* (Marb. 1855, Irvingite); P. Schaff, *Church History*, vol. i. § 24; Weisszucker, *Apost. Zlttr.* p. 580 ff.; A. Wright, *Some NT Problems*, 277 ff. In these works references will be found to many other discussions, an enumeration of which is beyond the limits of this article.

A. ROBERTSON.

TOOLS.—In Syria, since its conquest by the Arabs in the 7th cent., little or no progress has been made in the mechanical arts: workmen still use much the same kinds of tools and methods of working as their ancestors did ten centuries ago. It is only within the last 40 or 50 years that European implements have come into use. It would occupy too much space to give an account of the tools used in the different handicrafts of Syria; it may be sufficient to mention a few employed in masonry, carpentry, and smith work.

Masonry.—In Syria, in very early times, stones were hewn from the rock by a pointed hammer called the *blk* (see HAMMER), and the larger the stone the less, of course, was the labour of cutting. This seems to have been the reason for the great size of the stones in the oldest part of the temple of Baalbek. When the wedge came into use for splitting rocks, smaller stones were quarried, and consequently buildings were more quickly constructed. The masons of Lebanon, who are still acknowledged to be the most skilful builders in Syria, use no means, such as cranes, for lifting a stone to its position on the wall they are building. If a stone is too large to be carried, an inclined plane is made of trunks of trees, or of stones and earth, and the stone is rolled to its place. Chisels are used only for giving a fine edge to a stone, or for carving. For other tools see HAMMER.

Carpentry.—The tools of the Lebanon carpenters are the very same as those used by the ancient Egyptian workmen; only, instead of being of flint or bronze, they are of steel. Of all his tools, the *kadum* or adze is the most useful to the Syrian carpenter; it is hammer, chisel, and plane in one. In the early part of this century planes were not used by the carpenters in the higher villages of Lebanon; planks of wood were smoothed by the adze. The ancient Egyptian adze appears to have been, at first, a sharp flint fastened by thongs to a handle, and replaced by a blade of bronze when metals came into use. The axe passed through similar changes. The bow and drill are still in use for boring holes in wood; the awl is a shoemaker's tool. These tools with the saw are the ordinary implements of a Syrian carpenter, and are carried about by him when seeking work. European tools are, however, becoming common.

Smith.—The hammers and tongs are very much the same in form as those used in Europe, but very roughly made. Anvils are simply cubical masses of iron having the upper surface faced with

steel. The original bellows was a tube through which the workman blew into the fire; then goat-skin bags were employed; and the form of bellows used by the coppersmiths of Syria at the present time is almost the same as that depicted on the tombs of ancient Egypt. The modern worker in iron requires a more powerful instrument, and two large circular bellows are placed so that he may take advantage of the weight of his body in working them. See, further, the separate articles on various tools.

W. CARSLAW.

TOPARCHY (τοπαρχία).—A word used only in 1 Mac 11²⁸, and there to denote three 'provinces' (RV; AV 'governments') to which the name *νομός*, or 'nome' (AV and RV 'governments'), is given in 1 Mac 10^{30, 38} 11³⁴. The three toparchies—Aphærema, that is, Ephraim-Ophrah, Lydda, and Ramathaim—were detached from Samaria and added to Judæa some time before the war between Alexander Balas and Demetrius Soter, and their possession was confirmed to Jonathan Maccabæus by Demetrius II. Nikator.

The toparchy was a small administrative division, corresponding to the Turkish *Nahieh*, which was administered by a toparch as the *Nahieh* is by a mudir. According to Pliny (v. 14), Judæa was divided into ten, or, according to Josephus (*BJ* III. iii. 5), into eleven toparchies. See Schürer, *HJP* II. i. 151 ff.

C. W. WILSON.

TOPAZ.—In four passages of the OT (Ex 28¹⁷ 39¹⁰, Ezk 28¹³, Job 28¹⁰) the Heb. word *רַפְּזִים* [*raphazim*] is rendered 'topaz' by AV and RV, in accordance with LXX *τοράζιον* and Vulg. *topazius*. The other ancient VSS vary their rendering, Pesh. using *רִפְּזִים*, *רִפְּזִים*, and *רִפְּזִים*, whilst Targ.

has *רַפְּזִים* and *רַפְּזִים*. The LXX and Vulg. also employ *τοράζιον*, *topazion*, as representing *רַפְּזִים* at Ps 119¹²⁷; but the Pesh. there contents itself with the vague term 'precious stones,' and the Targ., still more correctly, *רַפְּזִים* (Gr. *εβρυσος*). In the NT the topaz is mentioned but once (Rev 21²⁰), as the ninth of the foundation stones of the New Jerusalem. The two passages in Ex. name it as the second stone in the first row on the high priest's breastplate, and it is usually believed to have borne the name of Simeon. The comparison used in Job implies its costliness, and indicates the quarter from which it was chiefly derived: 'The topaz of Ethiopia shall not equal it [wisdom].' In Ezek. the wearing of it is a mark of regal splendour: 'Every precious stone was thy [the king's] covering, the sardius, topaz,' etc. There is a fair amount of probability in the derivation of the Heb. name *רַפְּזִים* from the Sansk. *pṛita*, 'yellow,' and in the suggestion that the Gr. form and those derived from it are merely a transposition of the Heb., *p d* for *p t d*. Codex Amiatinus in Rev 21²⁰ spells the word with a *d*, *topadius*.

The question whether the topaz of the Bible is identical with our gem of that name has been rendered somewhat difficult by the well-known description of the stone in Pliny, *Hist. Nat.* xxxvii. 8—

'Egregia etiam nunc sua topazio gloria est, e virenti genere, et cum primum reperta est, prelatæ omnibus. Accidit in Arabia insula, quæ Cytis vocabatur, in quam deveniant Troglodytæ prædones fame et tempestate fessi, ut, cum herbas radicesque foderent, eruerent topazion. Hac Archelæi sententia est. *Juba* Topazum insulam in Rubro mari a continenti stadiis ccc abesse dicit; nebulosam et ideo quasitam sæpius navigantibus nomen ex ea causa accepisse, topazim enim Troglodytarum lingua significationem habere querendi. . . . Eadem sola nobilium linam sentit.'

We need not discuss the etymology: the two important points are the greenness of the gem and its softness. The first of these is not fatal to

the identification, seeing that we know of green topazes; the second is. Pliny may have included the chrysolite and the peridot under this name. Yet it does not follow that all the ancient mineralogists agreed with him. It would not be easy to find a more apt description of our topaz than in the first few words of Strabo's interesting account, *Γεωγραφικά*, xvi.—

Λίθος δὲ ἔστι διαφανής, χρυσεῶδες ἀπολέκμασι φέγγος, ὅταν μὲν ἡμῖν μὴ οὐ γὰρ ἴδιον ἴδω ἔστι, περιαιγνύται γὰρ νύκτωρ δ' ὁρῶν οἱ συλλέγοντες· περικαθύναντες δὲ ἀγγλίου σημειοῦ χάριν μὲν ἡμῖν ἀνερρίπτουσι. καὶ ἡ σέσημα ἀνθρώπων ἀποδιδέχμενον εἰς τὴν φυλακὴν τῆς λιθῆς ταυτῆς, καὶ τῶν συναγωγῶν, σιταρχαμένον ὑπὸ τῶν τῆς Λιγύστου βασιλέων.

The statements which have appeared as to the chemical composition of the topaz differ strangely. Streeter (*Precious Stones*, p. 221), referring to the distinction between Oriental and Occidental topazes, says that the former consist of pure alumina, the latter being more than half alumina and for the rest composed of silica and fluorine. On the other hand, it has been spoken of as a silicate of aluminium associated with the fluorides of aluminium and silicon. In shape it is an orthorhombic prism with a cleavage transverse to the long axis. It has the power of double refraction, and becomes electric when heated or rubbed. It is almost as hard as the diamond, but there are a few engraved specimens—an antique one, for instance, at St. Petersburg, with the constellation Sirius. Australia produces green and yellow stones. Exquisite transparent ones, clear and bright as the most sparkling water, come from Tasmania—*gouttes d'eau*, the French call them. In Saxony pale violet are found; in Bohemia sea-green; in Brazil red, from pale to deep carmine.

Pliny's influence is very apparent in *The Lapidarium* of Marbodius—

'From seas remote the yellow Topaz came,
Found in the island of the self-same name;
Great is the value, for full rare the stone,
And but two kinds to eager merchants known.
One vies with purest gold, of orange bright;
The other glimmers with a fainter light:
Its yielding nature to the file gives way,
Yet bids the bubbling caldron cease to play.
The land of gems, culled from its copious store,
Arabia sends this to the Latian shore:
One only virtue Nature grants the stone,
Those to relieve who under hemorrhoids groan.'

Ruskin, in his lecture on the symbolic use of precious stones in heraldry, states that the topaz is 'symbolic of the Sun, like a strong man running his race rejoicing, standing between light and darkness, and representing all good work.' It is curious to compare this with Marbodius, in his *Prose on the Twelve Foundation Stones*: 'Contemplativæ solidum vitæ præstat officium.'

J. TAYLOR.

TOPHEL (תֹּפֶת, *Tôphol*).—A place named in defining the situation of Dt 1¹. It has been frequently identified (since Robinson, *ERP* ii. 167, 187, following a suggestion of Hengstenberg) with *et-Tafle* in Gebal, about 15 miles S.S.E. of the Dead Sea, but phonetic, apart from other, reasons make this identification very uncertain (see Driver or Dillm. *ad loc.*).

TOPHET, TOPHETH.—A word of doubtful origin, disputed etymology, rare occurrence, and somewhat uncertain meaning. Milton refers to it, and gives his idea of it in the lines—

'The pleasant valley of Hinnom, Tophet thence
And black Gehenna call'd, the type of hell.'

PL i. 404, 405.

It appears only in the OT, and is never reproduced in the NT. It is not found in the apocryphal books, and its earliest occurrences in Christian literature seem to be in Eusebius (*Onom.*) and

Jerome (on Jer 7³¹). Even in the OT its range is very limited. It is peculiarly a term of Jeremiah's. It is found once in the historical books (2 K 23¹⁰), once in the poetical books (Job 17⁸), once in Isaiah in a modified form (Is 30³³), and elsewhere only in Jeremiah (7³¹, 23 19⁶, 12, 13, 14). Ewald is of opinion that the use of the term *Topheth* in the special sense which it has in 2 Kings was not customary so early as Isaiah's time (*Hist. of Israel*, iv. 209, Longmans' tr.). The Hebrew form in all the occurrences but one is תֹּפֶת. In the Isaianic passage, however, it is תֹּפֶת. This latter form is probably constructed by extension from תֹּפֶת, as we have תֹּפֶת from תֹּפֶת, תֹּפֶת from תֹּפֶת (so Dillm. *Jes. ad loc.*); although some (e.g. Stade, *Gesch.* i. 610) have had recourse, in endeavouring to explain it, to such expedients as changing the vocalization so as to get תֹּפֶת (= 'his Topheth'), or detaching the final ת and connecting it (as the interrogation ת) with the word that follows (see the Dictionaries, and Klost., Bredek., Cheyne [*SBOT*], Marti, et al.). The pronunciation of the word is uncertain. In the Masoretic text the vocalization of *bōsheth*, 'shame,' has probably been given it as a thing of evil name, and the LXX makes it *Tapheth*. In the ancient Versions, indeed, it takes different forms, e.g. *Topheth* (Vulg.), Τάφεθ (LXX, Aq., Synm.), Θαφέθ (LXX in some copies, Aq., Theod.), Θόφθ (Aq.). In Is 30³³ the rendering of the LXX is ἀταρτηθήση or ἀταρτηθήση; in Jer 19⁶ διὰ τῶν τοῦ; in Jer 19¹⁴ ὁ διὰ τῶν τοῦ (in some copies); and in Jer 19¹⁴ again διὰ τῶν τοῦ (in some copies). The AV makes it *Tophet* in all cases except 2 K 23¹⁰, where it is *Topheth*. RV has *Topheth* throughout.

The passage in Job may be at once discounted. There the word is an ordinary descriptive noun, formed probably from a root meaning to 'spit,' and so expressing something *abhorred* or *abominated*. Job describes himself as become 'an open abhorring' (RV text), 'one in whose face they spit' (RV margin); wrongly rendered by the AV 'I was as a tabret,' on the supposition that תֹּפֶת 'spitting' is akin to תֹּפֶת 'timbrel.' In the other passages the word is a local name, and means properly 'the Topheth,' the article being attached to it except where it has the prepositions ת, ב connected with it. The extended form תֹּפֶת, however, is anarthrous, and is probably to be rendered 'a Topheth is prepared of old,' as in RV.

In its various occurrences the term is associated, directly or indirectly, with the valley of shameful name, known in the OT variously as 'the valley of Hinnom' (only in Jos 15³⁶ 18¹⁶, Neh 11³⁰); 'the valley of the son of Hinnom' (e.g. Jos 15³⁶ 18¹⁶, 2 Ch 28³ 33⁶, Jer 7³¹ 19⁶), 'the valley of the children of Hinnom' (2 K 23¹⁰ *Kethibh*), or simply 'the valley' (Jer 23³¹ 31⁴⁰), in which the idolatrous Jews, especially in the times of Ahab and Manasseh (cf. 2 Ch 28³ 33⁶), practised the cruel rites of the worship of Molech, and offered human sacrifices. It is with reference to the reforms of Josiah and the steps which he took to defile the impious and horrid place, and prevent any man thereafter from making 'his son or his daughter to pass through the fire to Molech,' that mention is made of Topheth in the *narrative* of the OT. The passage in 2 Kings is the passage of primary interest in the study of the term. But the passages in the Prophets have also their contribution to make.

In the paragraph in Isaiah which gives the oracle concerning the destruction of Assyria, Jehovah is represented as Himself coming from afar to execute vengeance on the oppressors of Israel. His people look on and sing their song of gladness, while judgment is done upon their enemies certainly and completely. The declaration of the certainty and completeness of the over-

throw of the Assyrian takes the form of an announcement that for the king, or for his god, 'a Topheth,' a place of burning and abhorrence like that in the unclean valley of Hinnom, 'is prepared of old' and 'made ready,' a place of fire which Jehovah Himself hath made 'deep and large,' the pile whereof is 'fire and much wood'; 'the breath of the Lord, like a stream of brimstone, doth kindle it' (RV). It is a destruction utter and abhorrent, prepared and ordained in the Divine counsels. In Jeremiah the associations and applications of the word are different. It is used in connexion with Judah's sin and the doom of Jerusalem. There is a retributive judgment of God, the prophet declares, that is to overtake the stubborn, idolatrous, impenitent people, against which the sanctity of Shiloh and Jerusalem and the Temple will be no protection. The place which witnessed their wickedness shall witness their punishment. *Topheth and the valley of Hinnom* shall no more be known as such, but shall be called 'the valley of slaughter.' Where the Jews had built their high places and had made their children pass through the fire to Molech, there they shall see the awful defilement and overwhelming destruction of war (ch. 7³¹⁻³⁴). This is repeated in ch. 19¹⁻¹⁵ in connexion with the figure of the broken vessel. The city is to be polluted by appalling carnage; the hardened people are to be punished with a destruction so terrible that Topheth shall be filled with their dead bodies 'till there be no place.' The new announcement, too, of retribution that is made by Jeremiah in response to Pashhur's vengeance is introduced by the statement (ch. 19¹⁴) that he 'came from Topheth' whither the Lord sent him to prophesy.

These being the occurrences of the word, what can be gathered with respect to the position and the exact sense of *Topheth*? Some have taken *Topheth* to be simply a synonym for *Gehinnom*. But it is clear that the two terms do not designate precisely one and the same thing. Several of the passages in view speak of Topheth as in the valley of Hinnom—a locality, or, it might be, an object in it. This does not settle, however, the question of the situation of Topheth. It is still uncertain where the Hinnom Valley lay, and with what it is to be identified in the topography of the Holy City. Authorities are still divided on the question whether it is the valley to the east of Jerusalem, the Kidron Valley (Sir C. Warren); the central valley, the Tyropæon (Sayce, Robertson Smith, Schwarz, etc.); or the *Wady er-Rababi* or *Rubābeh*, the deep ravine to the west and south, between the slopes of the 'Hill of Evil Counsel' and the steep sides of Zion (see article HINNOM, VALLEY OF). This leaves the precise position of Topheth in suspense. It is true that in the narrative of Josiah's reforms in 2 K 23 much is said of Kidron, but it does not follow that Topheth was on the east of Jerusalem. Far less can that position be argued out from the statement in Jer 19² that the valley of Hinnom is 'by the entry of the east gate,' as it is erroneously rendered by the AV. For the gate *Harsith* or *Harsuth* mentioned there is not the 'Sun-gate' or the 'east gate,' but probably the 'Sherd-gate,' 'the gate of potsherds' (RV), so called perhaps from the fragments of potter's work scattered about there. Neither does the allusion to 'the graves of the children of the people' (2 K 23⁶) carry us far, although Sir Charles Warren thinks we may infer from it that Topheth was near the common burial-place. Nor, again, is much to be made of tradition. Jerome describes the place as a green and fertile spot in the Hinnom Valley 'watered by the springs of Siloam'—*Illud locum significat, qui Siloæ fontibus irrigatur et est amœnus atque nemorosus hodieque hortorum præbet*

delicias (on Jer 7³¹). This might point to its being at the mouth of the Tyropæon or on the south of the Kidron. Tradition, again, places the site of Aceldama among the rock-hewn tombs of the 'Hill of Evil Counsel,' and Eusebius speaks of 'the place called *Thapheth*' as if it had been regarded on to his own day as situate 'in the suburbs of *Ælia*,' near 'the Fuller's Pool and the Potter's Field or the place Aceldama' (*Onom. sub voc. Θάφει*). But there must have been some inconstancy in the traditional account, or either Jerome or Eusebius must have made a mistake. For Jerome speaks of Aceldama as on the south (*ad australem plagam montis Sion*), while Eusebius says it was *ἐν βορείοις*. If, however, the 'Potter's Field' is 'the Field of Blood,' and the gate *Harsith* (Jer 7²) is the 'Sherdgate,' Topheth might be located somewhere on the south and west of Jerusalem and on the eastern side of the Hinnom Valley. Sir Charles Warren (cf. Smith's *DB. sub voc. 'Hinnom'*) points out that where the *Wady er-Rubâbeh* joins the Kidron there is 'an open plot of ground' which might be the spot that Jerome identified with Topheth. These references, however, are meagre, and leave us uncertain as to the strength or the antiquity of the tradition behind them.

On the origin and etymology of the word much has been written that is doubtful, not to say purely fanciful. Some have attempted to connect it with the Greek *θάττειν* in the phrase *ὑπὸ θάττειν* (Ges.), or with the Greek *ῥάπτειν* and the Hebrew *רָפָה* = *cook*, *רָפָה* = *cooked pieces* for offerings (cf. Lv 6¹⁴). Jerome, deriving it probably from *רָפָה*, interpreted it as = *latitudo*. Some of the great Rabbis (e.g. Rashi and D. Kimchi) understood it to come from *רָפָה* = *strike, beat*, with reference to the supposed beating of drums and other instruments to drown the cries of the sacrificial victims in the cruel rites of the Molech worship — a practice the alleged existence of which is not borne out by any sufficient evidence in ancient writers. Others have had recourse to peculiar foreign forms, to Assyro-Persian roots, to the Egyptian *Ṭwôb* or *Ṭwôb*, etc. (Andr. Müller). Some, again, have taken the original idea to have been that of *beauty*, with reference to Jerome's description of the place. With this in view, Rosenmüller, e.g., was bold enough to connect it with *רָפָה* = *to be fair*, as if the primitive form had been *רָפָה*. With a somewhat similar idea, others, pointing to the mention in succession of *tabrets* (*רָפָה*) and *Topheth* in Is 30^{32, 33}, look again to the verb *רָפָה* = *strike* (a timbrel or the like), and attach to the word *Topheth* the sense of 'Music-grove,' as if it had been originally part of the royal garden, defiled at a later period by idol-worship and abominable, idolatrous sacrifice (H. Bonar in Smith's *DB*).

Dismissing these fanciful conjectures, we have to choose between two explanations which alone have much reason in them. One of these seeks the origin of the term in a root *תָּפַח*, Arabic *تَفَفَّ* = *to spit out*, and so to regard with contempt or loathing. In this case the idea will be that of 'place of abhorrence,' 'place of abomination' (Böttcher, Riehm, Pressel, etc.). This is favoured by the fact that there does exist a descriptive noun *תָּפַח*, which appears to have this meaning, in Job 17⁶. The other explanation looks to a root expressing the notion of *burning*, which is supposed by some to show itself in a Persian *toften* (Ges.), in the Greek *ῥέφα*, the Latin *tepidus* (Streane). In this case the idea would be that of 'place of burning.' This, again, is understood by some to refer to the disposal of the dead, by others to the offering of sacrifices, in particular to the burning of human sacrifices, as in the worship of Molech. The difficulty in the way of the first of these

suppositions is that, except in special cases (e.g. that of Saul, 1 S 31¹²; that of the victims of plague, Am 6¹⁶ etc.), the Hebrew dead were not burned, but buried. With regard to the second supposition, the question is whether, as it is ordinarily put, it will suit the various passages. In the case of Is 30³², e.g., Dillmann is of opinion that it is a vast human holocaust that is in view; while Robertson Smith thinks that the imagery of the passage would be rendered discordant if the notion of the sacrifices in the valley of Hinnom were introduced. The latter scholar, therefore, gives the question another application. He seeks an Aramaic origin for the word, and he connects its use with such sacrifices as the Harranian. He points to the fact that at the time when the term 'first appears in Hebrew, the chief foreign influence in Judæan religion was that of Damascus' (2 K 16). This, he thinks, makes the theory of an Aramaic origin not improbable. He notices, further, that the Arabic word *othfiyā* and the Syriac *ṭfiyā* are names for 'the stones on which a pot is set, and then for any stand or tripod set upon a fire.' He supposes that a variant form *ṭfath* might have existed which would be quite according to analogy, and takes *תָּפַח* to be an Aramaic term for 'a fireplace, or for the framework set on the fire to support the victim.' He points out further, that among the Semites human sacrifices were disposed of ordinarily by burning, and that the victims generally were not burned on the altar or within the sanctuary, but outside the city. His view, therefore, is that the passage in Isaiah refers to 'a rite, well known to Semitic religion, which was practised at Tarsus down to the time of Dio Chrysostom, and the memory of which survives in the Greek legend of Heracles-Melkarth, in the story of Sardanapalus, and in the myth of queen Dido' — the annual rite commemorating the death of the local god in fire. Thus '*the Topheth*' is taken to be the 'fireplace,' or pyre, the deep pit dug in the valley of Hinnom for the purpose of the most distinctive act in the performance of these horrid rites — the burning of the victims. It may be added that Ewald, who places the deep valley of Ben-Hinnom on the south of the 'long, broad ridge' to which 'the ancient name of Zion originally belonged,' takes Topheth to be a glowing furnace in the valley, and regards everything as pointing to the conclusion that it was Manasseh who first built it.

LITERATURE.—Commentaries on the OT passages (Dillmann-Kittel, Marti, and Skinner on *Isaiah*, Duhm on *Jeremiah*), the Lexicons, the Bible Dictionaries (Herzog's *PRE*, Riehm's *HWB*, Smith's *DB. sub voc. 'Hinnom', 'Gehinnom', 'Gehenna'*); the books on the geography of the Holy Land (Robinson, etc.); Ewald's *Hist. of Isr.* iii. pp. 123, 124, iv. p. 208, etc., Longmans' tr.; Böttcher's *De Inferis*, p. 85; W. R. Smith's *Rel. of the Sem.* 2 pp. 372-378. S. D. F. SALMOND.

TORAH.—See LAW.

TORCH.—See LAMP and LANTERN.

TORMAH (תֹּרְמָה 'fraud, deceit'; B ἐν κρυφῇ, A μετὰ δόπρον).—In the margin of Jg 9²¹ 'in Tormah' is given as an alternative rendering of the Hebrew word translated 'craftily' (AV 'privily'). Some commentators have suggested that Tormah is a corruption of Arumah (v.⁴¹); but there is no evidence one way or the other. The text certainly appears to be corrupt. See Moore, *ad loc.*

C. W. WILSON.
TORTOISE.—The AV tr. of *צָב* *zāb* (Lv 11²⁹); RV has 'great lizard'; prob. the *land monitor* is meant. See CHAMELEON, LIZARD.

TOU (תּוּ).—King of HAMATH on the Orontes, who sent an embassy to congratulate David on

his defeat of HADADEZER, with whom Tou himself had waged frequent wars, 1 Ch 18²⁴. In the parallel passage, 2 S 8²⁴, the name appears as *Tol*, which, however, is less probable philologically (see Driver, *Text of Sam.* 217). In 2 Sam. the LXX has, B Θουό, A and Luc. Θαε; in 1 Chron., B Θωα, A Θουό, Luc. Θωάδ.

J. A. SELBIE.

TOWER.—(A) In OT for 1. מִגְדָּל *migdāl*. The *migdāl* served sometimes to defend a city wall, and in particular an angle in the wall or a gate (2 Ch 14¹⁷ 26⁹). Engines for casting arrows and stones were sometimes placed in the towers (26¹⁵). A single tower sometimes served as a citadel (Gn 11¹, Jg 9²¹). In the country, towers were erected for the protection of the flocks and herds, and to safeguard the roads (2 K 17⁹, 2 Ch 26¹⁰ 27⁴). The pilgrim route from Damascus to Mecca is dotted with towers which protect the wayside wells (Doughty, *Arabia Deserta*, i. 9, 13). A vineyard was sometimes watched from a *migdāl* (Is 5², cf. Mt 21³³), sometimes from a mere 'booth' (מִגְדָּל שִׁכְמָה *shukmah*). The towers of Jerusalem are mentioned generally in Ps 48¹², Is 33¹⁸; see also Neh 3¹ (towers of HAMMEAH and of HANANEL; cf. also Ryle's note *in loco*); v. 11 (tower of the furnaces; cf. Ryle, and see JERUSALEM, vol. ii. p. 593, for this tower and the next mentioned); vv. 25-27 (the [great] tower that lieth out; Ca 4⁴ (tower of David); 74⁶ (the tower of Lebanon which looketh toward Damascus). 'The tower of Babel' (it should be noted here) is not a biblical phrase; the presumption of men was shown not in the height of the tower, which is hyperbolically expressed, but in the whole scheme embodied in the building of 'the city and the tower.' That 'the name of the LORD is a strong tower' (Pr 18¹⁰) may mean either of two things: (1) that God Himself is a protection, or (2) that the mention of His name in an adjuration often stops an intended act of violence. The second sense may be illustrated from the tradition that the prophet Mohammed once spared a female captive who exclaimed, 'I take refuge in God (*ʿūdhu billāhi*) from thee.' Mic 4⁹, in which Zion is addressed, 'O tower of the flock,' is taken by Nowack (*in loco*) and others as a later addition. Jerusalem is here represented, it is said, as already desolate, as a lonely tower from which grazing flocks are watched. A more natural interpretation of the phrase is suggested by Is 14²². Zion is the tower in which the flock of God takes refuge from the enemy.

2. 'Tower' stands also for *migdāl* (Ezk 29¹⁰ 30⁶) in EV, where RVm more correctly gives a proper name 'from Migdol' (LXX ἀπὸ Μαγδῶλου). 3. מִגְדָּל *bahān*, מִגְדָּל *bāhōn* (pl. מִגְדָּלִים *bahūnim*), a tower used by besiegers for observing and (sometimes) for attacking a city; Is 23¹³. The prophet Jeremiah is compared (Jer 6²⁷) with one of these towers, because he was the herald and (in a sense) the instrument of God's judgments on Jerusalem; cf. Ezk 4³, where the prophet is directed to besiege the city in dumb show. The rendering of Jer 6²⁷ in RVm 'trier' is supported by LXX and Pesh. (Lee), and yields a play on the following verb 'try,' but the AV is probably right. 4. 'High tower' is the rendering of מִגְדָּל *nisgāb*, in Ps 18² (EV, and 59⁹ (10), 17 (18) RV. God is called the Psalmist's *nisgāb*. 5. מִגְדָּל *ophel* (2 K 5²⁴ AV). RV gives 'hill' (correctly). 6. מִגְדָּל *māzōr* (Hab 2¹), a word meaning 'entrenchment,' 'rampart.' 7. מִגְדָּל *pinnah* (Zeph 3⁹), 'towers' AV, 'battlements' RV, 'corner towers' RVm (rightly, towers being often set at an angle of a city wall). 8. The word מִגְדָּל *zēriah* (Jg 9²⁰ 'hold' AV, 1 S 13⁶ 'high places' AV) has been taken by Jewish expositors to mean a 'tower,' but Driver (on 1 S 13⁶) shows good reason for rendering 'vault' or 'underground chamber'; the

Lyons Heptateuch (ed. U. Robert) has *promunturium* (for *promptuarium*), 'store-room, magazine,' in Jg 9²⁰.

(B) In the Apocrypha 'the tower' is the regular rendering in AV in 1 and 2 Maccabees of ἡ ἀκρά, 'the citadel' (RV), i.e. the fortress commanding the temple (see JERUSALEM, vol. ii. p. 594), which is also called ἡ ἀκρόπολις, 'the tower' (2 Mac 4¹², 'the castle' (v. 27 (28)), so AV; 'the citadel' (RV). 'Tower' is also the translation of πύργος, a wooden building carried by an elephant, and holding thirty-two men (1 Mac 6²¹), also a place of execution in which criminals were smothered in ashes (2 Mac 13⁶). In Sir 37¹⁴ (28) σκοπή is 'high tower' AV, 'watch-tower' RV, but the Hebrew varies between שֶׁן *shēn*, 'a steep rock' (cf. 1 S 14⁴), and מִגְדָּל *mizpeh*, 'watch-tower' with עֵץ *ʿēz*, 'tree,' in margin. Sir 26²² ('a married [woman] is a tower against death to [her] husband,' AV) occurs in a passage of nine verses which is omitted from RV as an interpolation. It is absent from the uncials (א, B, C), but it is found in Clem. Alex. p. 229, in cursive 248 (HP), and in the Syriac and Arabic, and so most probably existed at an early date in Hebrew. The correct translation of v. 22 is 'A married woman is a tower of death to those who have company (τοῖς χρωμένοις) with her.' The 'tower of death' is, no doubt, the tower of punishment described in 2 Mac 13⁶ (see above).

(C) In NT 'tower' represents πύργος in Mt 21³² (= Mk 12¹, see Swete's note) a tower in a vineyard; Lk 13⁴ the tower in Siloam; cf. 14²⁸. Silwān, the modern Siloam, is built on a steep escarpment of rock, on which a building with good foundations would stand for ever; ill-laid foundations would drop their superstructure to the very bottom of the valley.

W. EMERY BARNES.

TOWN CLERK (γραμματεὺς).—An official whose powers and functions varied at different periods and in different countries of the Greek world. Here we speak only of the *grammateus* in the Græco-Asiatic cities under the early Roman empire. The titles 'clerk of the city' (γρ. τῆς πόλεως), 'clerk of the senate' (γρ. τῆς βουλῆς), 'clerk of the people' (γρ. τοῦ δήμου), 'clerk of senate and people, or of senate and *ekklesia*' (γρ. βουλῆς καὶ ἐκκλησίας), and even 'clerk of senate and people and *gerousia*,' are all found in inscriptions of those cities. Sometimes there seems to be a difference between some of these titles; but in other cases it seems probable or certain that the 'clerk of the city,' the 'clerk of the senate and the people,' and the 'clerk of the people,' were various designations of one very important official.

The *grammateus* was responsible for the form of the decrees, which were submitted to the popular assembly, i.e. the *Demos* assembled in *ekklesia*. These decrees under the empire were first approved by the senate, and afterwards sent to be approved by the people in the *ekklesia*. The powers of the people were limited to accepting or rejecting the decrees sent down from the senate. They could not amend, and gradually their approval became a mere form, which followed as a matter of course, inasmuch as the Roman imperial system discouraged and limited the powers of the popular assembly. After the decrees were passed, the *grammateus* sealed them with the public seal (δημοσία σφραγίς) in the presence of witnesses (δογματογράφοι). In many places he even proposed the decrees in the popular assembly, and acted as chairman.

In Ephesus (Ac 19³⁵), at an excited and uproarious gathering of the people in the theatre (a common place for regularly summoned meetings of the popular assembly), the clerk speaks as one both possessing authority and under personal responsi-

bility for the popular action. The Roman administration regarded irregular and unruly popular assemblies as a serious and even capital offence, because they tended to strengthen among the people the consciousness of their power and the desire to exercise it; and the clerk was evidently afraid lest he should be personally held to account for the irregular meeting.

This picture, as indicated in Acts, is entirely in keeping with the position of the *grammateus* as indicated in the inscriptions. In Ephesus that official is occasionally styled '*grammateus* of the Ephesians'; and often an event is dated by the clerk of the year. Money bequeathed to the people was under his charge. He often was responsible for the execution of works ordered by the people. The inscriptions of neighbouring cities whose constitution is most likely to have closely resembled the Ephesian, enable us to add many other details. The position of clerk is spoken of as the climax of a career of public service to the State of Tralles (μετὰ πολλὰς ἀρχὰς καὶ λειτουργίας γραμματίσαντα τῆς πόλεως ἱεφανίης, CIG 2931). He along with the *strategoi* (to whom the real conduct of business came to be trusted more and more in the Greek cities of Asia) drafted the decrees; and this implies that he had a seat as assessor on the board of *strategoi*, and perhaps even presided there (γράμμη στρατηγῶν καὶ τοῦ γρ. τοῦ δήμου).

The clerk contrasts the confused assembly in the theatre with the *ἐννομος ἐκκλησία*, i.e. the people legally and properly assembled in the exercise of its powers. Such meetings were either ordinary on fixed days (*νόμιμοι* in an Ephesian inscription), or extraordinary, specially summoned at an unusual time (called *σύγκλητοι* at Athens); but the latter class of meetings required special authorization from the Roman governor of the province, and certainly were rarely permitted by the jealousy of Roman policy. The term *ἐννομος ἐκκλησία* has not hitherto been found at Ephesus, but occurs at Termessos (see Lanckoronski, *Städte Pamphyl.* ii. p. 33).

Kaiserreiche*, p. 283f.; Lévy in *Revue des Études Grecques*, 1895, p. 216 ff.; Ramsay in *Expositor*, Feb. 1896, p. 137 ff., and in *Cities and Bish. of Phrygia*, i. 66; Svoboda, *Griech. Volksbeschlüsse*, p. 206 f.

W. M. RAMSAY.

TRACHONITIS.—In the Bible only in Lk 3¹, in defining Philip's tetrarchy: τῆς Ἰτουρίας καὶ Τραχωνιτιδος χώρας. Trachonitis was properly the country of, or round, the Trachon or Trachons (ὁ Τράχων, οἱ Τράχωνες), the name given by the Greeks (τράχων='rough, rocky ground') to those areas of split and shattered deposits of lava which form so characteristic a feature of the volcanic country S.E. of Damascus, and are known to the Arabs of to-day by the name of *wa'ar* (= 'stony waste'). *Wa'ar* is the equivalent of the Hebrew *ר'.* The latter is wrongly rendered 'forest' in AV and RV; at the most it can mean only 'wood,' and generally seems to be no more than 'jungle.' Wetzstein (*Reisebericht über Hauran u. die Trachonen*, 15, n. 3) gives good grounds for the opinion that *ר'* originally meant the same as the Arab. *wa'ar* (cf. especially Is 21^{12a}), and that its association with wood, for which he supplies a modern Arabic analogy, is only secondary. Strabo (xvi. 2. 20) speaks of 'the two so-called Trachones behind Damascus.' These are, without doubt, the two largest lava areas in the region, the Safa and the Leja. Their edges are well defined, and visible from far on the surrounding plain—split banks of black rock with a sheen on it: about 30 ft. high. Within such borders the surfaces are amongst the most waste and broken upon earth. The lava in cooling has assumed the wildest shapes. Its surface has been likened to 'a petrified ocean' (cf. Merrill, *E. of Jordan*, p. 11) and to an 'ebony glacier with irregular crevasses' (HGHL⁴ 616). Wetzstein gives a vivid description (with sketches) of the tossed and broken formation, with the volcanic vents from which it burst. 'The Safa is still, as on the day of its origin, a gush of lava, black and of a dull sheen,

full of countless streams, bridged over by thin vaults, of petrified black, often also bright red, waves, which roll down the slopes from the craters over the high plateau' (*op. cit.* p. 7). The Safa, 'the empty or naked,' has no water or vegetation: 'no human being can exist upon it': it lies, too, far east in the desert. The Leja, 'the refuge,' on the other hand, lies on the fertile plain of Hauran, and appears always to have been inhabited. It is 370 square miles in extent, almost bridging the plain between Jebel Druz (from now extinct volcanoes at the N. end of which, the Ghararat el-Kibliyeh and Tell Shiha, it issued) and the ranges to the E. of Hermon and S. of Damascus. It contains few springs, but with winter rains these form occasional small lakes. Soil has gathered in many of the hollows, and there are cultivated fields. Flocks can be pastured: there are enclosures of dry stone walls, which prove the ancient herding of cattle; and remains of vineyards, and cisterns. The ruins of villages, and well-preserved ancient towns,—Musmieh, Nejrân, Dama, Kubab, Jurên, and others,—the remains of defences against the easier entrances, and numerous traces of cuttings for roads, point to a considerable population in ancient times. The region is still partly inhabited and cultivated. While, therefore, Strabo, as a geographer, spoke of two Trachons, the Safa and the Leja, the former, uninhabited and lying far from the ways of men, was ignored by history, and the latter was to history the Trachon *κατ' ἐξοχήν*. So an inscription in Musmieh (le Bas-Waddington, No. 2524), and another in Bereke (*id.* 2396), and so Josephus (*Ant.* xv. x. 1).

How far back the human history of the Leja extends is quite unknown to us. On the one hand, it is hard to think that so safe and habitable a 'refuge,' whether from Arab raids or the armies of the ancient powers, was unused by man, so long as the surrounding country was inhabited; and equally hard to suppose that a phenomenon of nature, so singular and conspicuous, was not frequently upon the lips of the surrounding peoples. On the other hand, in the OT there is no certain reference to the Leja. ARGOB in Bashan was identified with it by the Targums, and the identification has been repeated in our days (by Porter, Henderson, and the maps of the Pal. Expl. Fund), on the grounds that the Leja can hardly have been omitted from the Biblical Geography, and that the phrase by which Argob is described, אֲרֹגֹב לֵבָי, literally the 'rope' or 'limit' of Argob, exactly suits the well-defined edge of the Leja, called by the Arabs of to-day the Lohf. But לֵבָי as a geographical term is properly 'district,' and applicable to any well-defined region; and the only natural derivation of אֲרֹגֹב is from אֶרֶב, 'a clod of earth,' which no one could take as characteristic of the Leja; while, also, Israel's conquests very probably did not extend so far to the N.E. Argob is now generally identified with the district of Suwet, E. of Gilead and W. of the Zumle range; to the S. of Bashan, but geologically connected with the latter. Again, in the *חריב* of Jer 17, 'waste tracts,' it is possible to see a reference to the two Trachons, but more probably the word has the much wider reference to all those stony areas of the Arabian desert to which its Arabic equivalent *harra* applies (Doughty, *Arabia Deserta*, *passim* and Index). Porter (*Giant Cities of Bashan*, 1882, p. 12 ff., etc.) and others have taken the ancient buildings in the towns of the Leja and other parts of Hauran and Bashan to be the actual remains of the giant races who, according to the OT, preceded the Amorites in the occupation of these lands, and of the Amorites themselves, i.e. the cities of Og king of Bashan. For the reasons stated above, we may well believe

that the sites of these cities were occupied at a very early historical period; and the visitor to those in Bashan itself (as the present writer recently verified) may still note rude fortifications (under or near the obviously later city walls) which resemble the Amorite remains recognized in other parts of Palestine. But, on the other hand, the peculiar architecture in the Lejā and surrounding country (whether above or under ground), in which Porter claimed to have discovered the 'Giant Cities of Bashan,' bears no proofs of an origin earlier than the eve of the Christian era; that is, after the Greeks settled east of the Jordan.

Practically, therefore, the history of the Lejā opens with the appearance of its Greek name, *Trachon*. The Greeks, who began to settle on the E. of Jordan soon after Alexander the Great's Syrian campaign, seem to have made no impression on the Lejā, which was occupied by Nabatean Arabs down to the arrival of Pompey's legions at Damascus, in B.C. 65 and 64. The Romans, coming to the aid of the Greek cities, crushed all the Semitic powers in Hauran, whether Jewish or Arab, but do not appear to have occupied Hauran itself. In B.C. 25 one Zenodorus is said to have ruled over part of the Iturean territory on the slopes of Hermon, Auranitis (= Hauran, *Jos. Ant.* xv. x. 2), and Trachonitis, i.e. the Trachon along with some territory round it (*Jos. Ant.* xv. x. 1 *Τραχων* || *BJ* xvii. ii. 1, etc. *Τραχωνίτις*). Josephus and Ptolemy enable us to define approximately the then limits of this territory. According to *Ant.* xv. x. 3 it touched in the N.W. the districts of Ulatha and Paneas, about the sources of Jordan at the S. foot of Hermon; according to *Ant.* xvii. ii. 1, 2 it marched with Batanea; and according to Ptolemy, v. 15. 4, it extended towards Mons Aladamus, the present Jebel Druz. Ptolemy speaks of the *Τραχωνίτις* 'ὑπὸς' 'under' that mountain. About B.C. 25 these Arabs raided the Greeks of Hauran, and the Greeks complained to Varro, governor of Syria. Varro appears to have himself inflicted some chastisement upon them (*Jos. BJ* i. xx. 4). But subsequently orders came from Augustus that Varro should replace Zenodorus by Herod, who had already (from his towns Gadara and Hippos eastward: *Ant.* xv. vii. 3; *BJ* i. xx. 3) some experience of fighting with the Trachonite Arabs (*Ant.* xv. v. 1; *BJ* i. xix. 2). Herod subdued them for a time (*Ant.* xv. x. 1; *BJ* i. xx. 4); but they, apparently unable to live upon the meagre crops of the Lejā itself, again, during Herod's absence in Rome, raided the fertile lands to the W. of them (*Ant.* xvi. ix. 1). Herod's soldiers defeated them and drove them into Nabatea (to the S. of Hauran), with the exception of a few, who remained in the Lejā, and the most of whom Herod himself, when he returned, slew. The remainder, in alliance with the Nabateans, kept up a series of attacks on Herod's borders. He put a force of 3000 Idumeans into Trachonitis, and placed the command in the hands of Zamaris, a Jew from Babylonia, for whom he built forts in Batanea and at Bathyra, perhaps the present Busr (el-Hariri), on the S. border of the Lejā (*Ant.* xvii. ii. 1-3). Zamaris—it is not mentioned that he conquered the Lejā itself—quieted the surrounding country, and Herod built a temple near Kanatha, in the ruins of which an inscription still records the erection of a statue to him (le Bas-Waddington, 2364). By Herod's testament, his son Philip in B.C. 4 received 'Trachonitis,' along with the rest of the country between the Yarmuk and Hermon, as his tetrarchy (*Ant.* xvii. viii. 1, xi. 4, xviii. iv. 6; *BJ* ii. vi. 3). Strabo (xvi. 2. 20) describes, about A.D. 25, the general security of the country under Philip.

Philo (*Legat. ad Gaium*, 41) gives the name Trachonitis to the whole of Philip's tetrarchy. When the latter died, in 34, Trachonitis and the rest of his tetrarchy was comprised in the province of Syria until 37, when Caligula gave it to Agrippa, who held the country as far as the eastern slopes of the Jebel Druz (cf. his inscription, still extant at el-Mushennef [Wadd. 2211]). It was from Agrippa's reign onward that the architecture of the district increased, according to the numerous inscriptions; though the Roman road through the Lejā itself may be as early as the time of Varro (see above). From A.D. 44, when Agrippa died, the whole of Palestine was directly governed by Roman officials till 50, when Chalcis, and 53, when the tetrarchies of Philip and Lysanias, were given to Agrippa II., whose inscriptions are numerous throughout Trachonitis. In A.D. 100, on Agrippa's death, the direct Roman administration seems to have been resumed; and in 106, by the creation of the further province of Arabia, Trachonitis became part of the inner province of Syria. The bulk of the remains of its ancient civilization date from the subsequent period. The road just mentioned and others through the province may be wholly or mainly the work of the Antonines. In 295 Trachonitis was joined to the province of Arabia.

The question, whether in the time at which Lk 3¹ was written the Iturean district and Trachonitis were two distinct portions of Philip's tetrarchy, or two equivalent or overlapping names for it, has already been fully discussed under ITUREA.

G. A. SMITH.

TRADE AND COMMERCE.—i. **TERMS.**—'Trade' in AV of Gn 46^{22, 24} means 'occupation,' and has no equivalent in the Hebrew. In Ezk 27¹²⁻¹⁷ it represents the Heb. נָתַן 'gave'; in Gn 34^{10, 21} it is the rendering of נָתַן *shr*. The participle of this last verb is used for 'merchant'; and cognate nouns, נָתַן, נָתַר, נָתַר, נָתַר, for 'place of traffic,' 'merchandise,' 'profit,' 'traffic,' and, by the use of abstract for concrete, 'trafficers' (Gr. *εμπορεύεσθαι*, *εμπορος*, *εμπορία*; Lat. *negotari*, *negotiator*, *institor*, *negotatio*, *mercatus*). The root *shr* = 'travel,' and describes the merchant as a travelling trader. Similarly from נָתַן *klr*, originally 'to travel,' connected with *regel*, 'foot,' we have *rōkhl*, 'merchant' (*εμπορος*, *institor*, *negotiator*, *venditor*, etc.), נָתַן 'traffic' (*εμπορία*, *negotatio*), נָתַן 'place of traffic' (RV 'merchandise,' *εμπορία*, *negotatio*). The Heb. words of this group chiefly occur in Neh 3. 13, Ezk 26-28.

Similarly in 1 K 10¹⁸, 2 Ch 9¹⁴ MT couples 'anshê hat-tārim' (EV 'chapmen') with *sōhērīm*, 'merchants'; and *tārim*, which should mean 'spies,' is explained as 'those who go to and fro,' 'trafficers'; but the text is corrupt. Kittel ('Chronicles' in *SBOT*) proposes to read *āsher mē'ārīm*, 'that which came from the cities.'

The proper names *Kēna'an* (Is 23⁸), *Kēna'anī* (Pr 31²⁴ etc.), are also used to mean 'merchant.' In Neh 10²¹ נָתַן, from נָתַן 'to take,' is used in the sense of 'goods for sale' (EV 'ware'); and in Ezk 27 נָתַן is used for 'thy wares,' so RV (not, as AV, 'thy fairs').

The roots of the following seem to have had originally the meaning 'exchange' or 'barter':

ערב 'traffic,' and its derivative קצרב 'merchandise' or 'traffic,' only in Ezk 27, cf. DEBT, PLEDGE; with the allied group כר 'to exchange or barter,' and קצרה 'exchange,' 'barter,' 'price'; כר 'price paid for a wife,' and its denom. כרה 'to buy a wife'; כר 'to sell,' and קר 'wares or price'; קר 'price.'

The common word for 'buy,' קנה, is a general term meaning 'possess' and 'acquire'; so קנה, קנהה, 'possession,' sometimes mean 'purchase' or 'price.' Another term for 'buy' is כרה; and לקח 'take' is sometimes tr. 'buy.' שבר usually means 'to buy corn.'

Other words for 'price' are קר, lit. 'value,' and ארקה 'an equivalent.' For 'caravan' we have ארקה (Gn 37²⁵, Is 21¹³, Job 6^{18, 19}), קלירה (so only Job 6¹⁹ poet.), and קנה (1 K 10²⁵=2 Ch 1¹⁶), and קרה (Ezk 27²⁵), lit. 'company' or 'band.' A special class of merchant ships were styled 'ships of Tarshish.' See TARSHISH. The tr. 'make merchandise' in Dt 21¹⁴ 24⁷ is a mistake. The meaning of the word (תעשה, only in these two passages) is probably 'play the master' (LXX in 24⁷ καταδυναστεύσας); see Driver's note.

In the NT we have for 'merchandise,' ἐμπορία; 'to trade,' ἐργάζομαι, ἐμπορεύομαι; 'to buy,' ἀγοράζω, ἀνέχομαι; 'to sell,' ἀποδίδωμι, πωλάω; 'merchant,' ἐμπόρος; 'banker' or 'money-changer,' τραπεζίτης; 'seller of purple,' πορφύρεω; 'bank' or 'counter,' τράπεζα (lit. 'table'); 'mart,' ἐμπόριον; 'price,' τιμή; 'valuable,' 'expensive,' πολυτελής, πολέμιος; 'lading of a ship,' γόμος.

ii. DATA.—1. General.—The natural features of a country indicate the character and extent of its commerce. Given harbours or practicable land routes, etc., it will export what it produces easily, and import what it produces with difficulty or cannot produce at all. See articles on the various countries of the Bible. Again, references to the possession of articles of foreign production imply commerce with the place of production. See articles on GOLD, SILVER, DRESS, etc.

2. Trade in OT.—There are numerous scattered references, but the leading cases are the accounts of Solomon's commerce (1 K 5, 9²⁵⁻²⁸ 10¹¹⁻²⁵), and of the unsuccessful attempt of Jehoshaphat to imitate him (1 K 22⁴⁹); and of the Sabbath trading at Jerusalem (Neh 13¹⁵⁻²³). The commerce of Tyre is described in Is 23, Ezk 26, 27. A caravan trade in spices, etc., with Egypt is mentioned in Gn 37²⁵ (J), and implied in 43¹¹ (J).

3. Trade in the Apocrypha, NT, Josephus, Talmud, etc.—In 1 Mac 14⁵ Simon makes Joppa a port, and in To 4¹ 9¹ we read of a deposit of money repaid on the production of a receipt. In the NT commerce furnishes our Lord with many illustrations; St. Paul sails in trading vessels, and meets with Lydia, 'the dealer in purple' (Ac 16¹⁴), and the manufacturers of silver shrines for Diana (Ac 19²⁴). The commerce of Rome, under the name of Babylon, is described in a passage, Rev 18, adapted from Ezk 27. There are scattered references in Josephus. The Talmud often refers to the articles and conditions of commerce in its discussions on tithes, and on the ritual questions, uncleanness, etc., arising out of relations between Jews and Gentiles. These notices can be applied only with caution to periods earlier than the compilation of the Talmuds (A.D. 400-600).

4. Other Authorities.—The immense collection of Egyptian, Assyrian, and Babylonian documents and inscriptions afford much information as to commerce in general, and some, direct and indirect, as to that of Palestine. The classical authorities, especially Strabo and Pliny, furnish us with information as to commerce in general in the Greek and Roman periods.

iii. COMMERCE OF THE ANCIENT EAST.—The Tel el-Amarna tablets show that in B.C. 1400 there

was an extensive commerce between Babylonia and other States of the farther East, and Syria and Egypt. The letters passing between the Eastern kings and the kings of Egypt are full of references to the journeys, to and fro, of caravans, and to the interchange of numerous commodities. Three lists of articles sent by a king of Egypt to the king of Babylon, and of the wedding presents or dowry of an Eastern princess who married a king of Egypt, occupy 14 large octavo pages in small type (Winckler, p. 399 ff.). Evidence is furnished by inscriptions, etc., of such commerce from an even earlier period, onwards throughout the Bible history. The series of commercial documents, contract tablets, etc., in Babylonia from about B.C. 2400, and in Assyria from about B.C. 900, bear direct evidence to the existence of considerable internal trade, and imply foreign commerce. At a later time such documents enable us to trace the history of the great Babylonian banking firm of Egibi from the reign of Nebuchadnezzar to that of Darius. In the *Times* of 10th Oct. 1899 Conder quoted a letter, which he dated about B.C. 2000, from an Assyrian merchant to a correspondent in Cappadocia, asking, 'Can I settle and trade in Cappadocia on payment of a tax, and by living as a son of the land?' Assyria and Babylonia received merchandise from the farther East, and transmitted it westward. The Phoenicians from Tyre and Sidon and other cities were the intermediaries of a great sea traffic between Western Asia and the shores of the Mediterranean and the Eastern Atlantic, and also, for the most part, of the sea traffic between Egypt, Syria, and other Mediterranean countries (Erman, *Life in Ancient Egypt*, Eng. tr. 15). Later on, this traffic was more and more shared by the Greeks. Egypt received the produce—ivory, ebony, skins, slaves, etc.—of Nubia and other countries to the south, and occasionally sent trading vessels to the 'incense countries,' Punt, etc., i.e. Southern Arabia, Somaliland, and perhaps farther east. The celebrated queen Hatshepsut (c. B.C. 1500) sent such an expedition (Petrie, *Hist. of Egypt*, ii. 79). There was also trade by land between Arabia and Syria, and, by way of the Isthmus of Suez, with Egypt.

In later times four main causes tended to promote and systematize the commerce of Western Asia, and its trade relations with Egypt and the other Mediterranean countries: (1) the establishment of the Persian dominion over Western Asia and Egypt, including the Greek cities of Asia Minor and many of the Greek islands; (2) the conquests of Alexander, the establishment of Greek States with political relations with Macedonia and Greece, and the founding of numerous Greek colonies throughout Syria; (3) the dispersion of the Jews; (4) the establishment of the authority of Rome over the Mediterranean countries and Western Asia.

iv. EXTENT AND DEVELOPMENT OF ISRAELITE COMMERCE.—We know hardly anything of Israelite trade during the *nomad period*. Probably the clans sometimes carried merchandise between Syria and Egypt (Gn 37²⁵ 43¹¹), or escorted trading caravans; and at other times levied tolls or blackmail upon caravans passing through districts which they occupied. With the *settlement in Canaan*, the Israelites would gradually become involved in the system of internal trade, and of trade with Arabia, Egypt, Phoenicia, and the East which had been established for centuries. For some time this trade would remain in the hands of the original inhabitants, from whom the Israelites would obtain foreign commodities, partly by purchase, partly by plunder, e.g. Achan's Babylonish mantle (Jos 7²¹).

In time the extension of the Israelite territory, the growth of cities, and the increase of the power and splendour of the royal court brought about an increase of wealth, and involved the Israelites more largely in the commerce of Syria. The unification of the tribes into a single organized State promoted the interchange of the produce of different districts, the cattle of the pastures, the wheat of the corn-lands, the wine and oil of other districts. The towns must have supplied their wants from the country, and in turn furnished the farmers with some manufactured articles. At first, no doubt, an Israelite farm was largely sufficient unto itself, but the growth of civilization would tend to a primitive division of labour and consequent trade. The establishment of the monarchy promoted external commerce by securing for its subjects the right to travel and trade in foreign countries. Ahab, for instance, obtains from Benhadad the right to have 'streets' (חֲמֻצִים) in Damascus, i.e. an Israelite trading quarter or bazaar (1 K 20²⁴). A powerful king obtained large quantities of foreign commodities as presents or tribute, e.g. the gifts of the queen of Sheba and other princes, etc., to Solomon (1 K 4³¹ 10^{10, 25}). The king made similar presents in return (1 K 10¹³). Moreover, a wealthy sovereign would need foreign articles of luxury for his court, materials for his buildings, and equipment for his army and navy. Thus Solomon obtained timber and carpenters for his buildings, and sailors for his ships, from Hiram king of Tyre (1 K 5¹⁻¹² 9²⁷); spices, etc. (10¹⁰), from the queen of Sheba; horses and chariots for his army from Egypt (10^{28, 29}). These imports implied exports; Hiram was paid for his timber in wheat and oil (5^{11, 12}), and there were the 'presents' to friendly princes. David's conquest of Edom (2 S 8¹⁴) had given Israel a port, EZION-GEGER, on the Red Sea, from which Solomon sent a trading fleet, partly manned with Phœnician sailors, to Ophir (see OPHIR) for gold, precious stones, etc. (1 K 9²⁶⁻²⁸). In 10²² this traffic with Ophir is said to have been conducted by Solomon and Hiram conjointly, by means of a navy which sailed every three years, and brought 'gold, silver, ivory, apes, and peacocks.'* Further, Solomon not only imported horses and chariots from Egypt, but also sold them to the Hittite and Syrian kings (1 K 10^{28, 29}). The wide extent of Solomon's dominions gave him an opportunity, of which he doubtless availed himself, to provide for the safety and comfort of the caravans from the East to Palestine.† Naturally, the commerce was not entirely in Solomon's hands, and 1 K 10¹⁵ refers to the traffic of the merchants.

The only other reference to the trade from Ezion-geber to Ophir is the statement that Jehoshaphat made an unsuccessful attempt to renew it (1 K 22⁴⁸). Probably in the troubles at the close of Solomon's reign, Judah lost its free access to the Red Sea, and the traffic ceased once for all. Otherwise what we read of the commerce of Solomon's reign will hold good, in varying degrees, for the period of the monarchy. The references of the prophets of the eighth century to the prosperity and luxury of the two kingdoms

* 1 K 9²⁶⁻²⁸ and 10²² clearly refer to the same traffic. The 'navy of Tarshish' does not mean a navy going to Tarshish, but a navy consisting of a large class of vessels similar to those which went to Tarshish. The statement of 2 Ch 9²¹, that 'the king had ships that went to Tarshish,' is a natural misinterpretation of the statement in Kings. Cf. 1 K 22⁴⁸ 'Jehoshaphat made ships of Tarshish to go to Ophir' (Herzfeld, *Handelsgesch. der Juden*, p. 28; Benzinger on 1 K 10²²; Oettli on 2 Ch 9²¹).

† Herzfeld (l.c. p. 26) lays great stress on the statement in 2 Ch 8⁴ that Solomon conquered Hamath, and built Tadmor; the latter point being confirmed by the *Kere* of 1 K 9¹⁸. Tadmor (Palmyra) would be an important station on the caravan route to the East. But, according to Benzinger on 1 Kings and Barnes on 2 Chron., the reference to Tadmor in the latter is due to a misunderstanding of the former.

under Uzziah, Jotham, and Ahaz of Judah, and Jeroboam II. of Israel, imply a demand for foreign manufactures and an active commerce (Is 2^{2, 7, 16} 31⁸⁻²⁴, * Hos 2⁸ 10¹ 12^{1, 7, 8} 13¹⁵, Am 6²⁻⁶ 8²). On the other hand, the calamities that befell Israel and Judah between B.C. 740 and 586 must have seriously affected its commerce.

It is doubtful whether the Israelites had trading vessels on the Mediterranean before the Exile. Herzfeld (l.c. p. 17) contends for a considerable maritime traffic mainly in the hands of Zebulun. In the Song of Deborah we read in RV of Jg 5¹⁷—

'And Dan, why did he remain in ships?
Asher sat still at the haven (m. shore) of the sea,
And abode by his creeks.'

This passage seems to imply seafaring habits on the part of the tribes on the Mediterranean coast. It has, however, been proposed to read מְדִינֹת 'meadows' for מִנִּים 'ships'; or to render the first line, 'Why does he live neighbour to the ships?' (Moore), or 'Why does he fear the ships?' Dan, too, must be the northern Dan.—In the Blessing of Jacob (B.C. 1000-850) RV renders Gn 49¹²—

'Zebulun shall dwell at the haven (m. beach) of the sea,
And he shall be for an haven (m. beach) of ships;
And his border shall be upon Zidon.'

This passage, again, seems to imply maritime trade. Ball, however (in *SBOT*), reads for the second line, 'And he shall sojourn (יָרַח) in ships,' cf. Jg 5¹⁷; Dillmann renders, 'He settles towards the strand of the ships'; while Holzinger denies that the verse in any way refers to trade or seafaring.—In the Blessing of Moses (B.C. 930-750) RV translates Dt 33^{15, 19}—

'Rejoice, Zebulun, in thy going out;
And, Issachar, in thy tents.
They shall call the peoples unto the mountain;
There shall they offer sacrifices of righteousness:
For they shall suck the abundance of the seas,
And the hidden treasures of the sand.'

'The abundance of the seas' will be fisheries and sea-borne merchandise; 'the hidden treasures of the sand,' the glass made from the sand about Accho, and the purple dye made from the shell-fish. 'Going out' is explained of mercantile expeditions. It is also, however, suggested that 'the peoples' were called 'to the mountain' to a gathering which was at once fair and festival, and that Zebulun and Issachar obtained their 'abundance' and 'treasures' by purchase from the Phœnicians, and not by any seafaring of their own. Ball (on Gn 49¹²) points out that the fact that one of the clans of Issachar is called *Tola*, the name of the worm from which the dye was taken, suggests a connexion between Issachar and that industry.—The only other item of direct evidence in favour of Israelite traffic on the Mediterranean in this period is the mention of 'ships of Tarshish' (cf. TARSHISH) in Is 2¹⁶; but it does not follow that these were Israelite ships. On the other hand, the ports north of Carmel were in the hands of the Phœnicians, and the only port south of Carmel, Joppa, a very bad harbour or roadstead, is never mentioned by pre-exilic writers, and it is doubtful if it was ever occupied by the Israelites. Moreover, the historian who dwells with such marked interest on the commerce of Solomon would surely have mentioned Mediterranean traffic if it had existed. On the whole, therefore, the extant evidence fails to prove that the Israelites had trading vessels on the Mediterranean. Doubtless, however, the tribes bordering on Phœnicia—Zebulun, Asher, and Issachar—profited by the wealth and commercial activity of their neighbours; and members of these tribes settled amongst the Phœnicians and shared their trade.

* 318-23 is perhaps an interpolation.

Another question is as to how far, in the time of the monarchy, the commerce of Israel was in *Israelite hands*. The fact that in Job 41⁶ and Pr 31²⁴ 'Canaanite,' and in Hos 12⁷ 'Canaan,' is used to mean 'merchant'; and apparently in Is 23¹¹, Zeph 1¹¹ 'Canaan' is used for 'the merchant people,' suggests that in early times the trade of Israel was largely carried on by the Phœnicians. The various codes and the prophets make scant reference to trade. In view of the keen interest in the commerce of Tyre shown by Is 23, Ezk 26, 27, we should have expected more detailed notice of Israelite trade if it had been largely in native hands. Hos 12⁷, indeed, 'He [Ephraim] is a trafficker [*lit.* 'Canaan'],' * implies the development of native commercial activity in the Northern Kingdom in the last period of its independence. But this seems to have been a new development, speedily cut short by the fall of Samaria. Again, Ezk 26³ represents Tyre as exulting over the fall of Jerusalem, 'the gate of the peoples,' and expecting to profit—perhaps commercially—by her ruin: 'I shall be replenished, now that she is laid waste.' No doubt, Jerusalem was to some extent a commercial city. On the other hand, it is to a Canaanite merchant that the Israelite housewife sells her cloth (Pr 31²⁴); the merchant is not mentioned amongst the notables in such lists as Is 3³; and, except Solomon and his agents, no Israelite merchants are mentioned before the Exile. Probably much of the internal traffic, and most of the import and export trade, were in the hands of Phœnicians and other foreigners.

The *restored Jewish community* in Palestine during the Persian period was small and poor (Hag 1¹⁻¹¹ 2¹⁵, 17, Zec 7⁷ 8⁴ & 10, Mal 3¹⁴, Neh 1³ 2¹⁷ 4³ 5), and its commerce must have been very limited. Still the Jewish settlement was a city,—Jerusalem and its territory,—and a city implies local and other trade (so Neh 3³¹, 32 13¹⁵⁻²⁰, where we find the trade partly in the hands of the 'men of Tyre'). There is evidence that during this period Dor, Joppa, and Ashkelon were held by the Phœnicians (G. A. Smith, *HGHL* 129). Probably most of the external and some of the internal trade of the Jewish community in Palestine was in the hands of the Phœnicians. When Jonah set sail from Joppa for Tarshish, it was in a Gentile ship (Jon 1³).

By the time the *Greek period* was reached, the restoration of the temple, the reforms of Nehemiah, and the natural growth of the community must have led to some development of trade, which would be further stimulated by the Greek colonization of Western Asia. Some token of a growing interest in commerce may be seen in the Bk. of Sirach, which refers to the subject more frequently and precisely than does Proverbs. Many of the references, indeed, are quite general, to the dangers of suretiship (Sir 8¹³ 29¹⁴⁻²⁰, as in Pr 11¹⁵ 17¹⁸ 20¹⁶); or to the obligation to deal fairly (Sir 5⁸ 29⁴⁻⁷ 41¹⁸, as in Pr 16¹¹ 20¹⁰, 22); or to other general topics (Sir 37¹¹, as in Pr 11³⁰). But Sir 42¹⁻³ implies a more intimate acquaintance with commerce, e.g. v. 7—

'Whatsoever thou handest over, let it be by number and weight;
And in giving and receiving let all be in writing.'

In other passages we discern the protest of traditional sentiment against a growing predilection for business life. Thus—

'Hate not laborious work;
Neither husbandry, which the Most High hath ordained' (Sir 7¹⁸).

'A merchant shall hardly keep himself from wrong-doing' (Sir 26²⁰).

* RVm renders, 'As for Canaan . . .'; but even so the following verse implies that Ephraim had imitated Canaan.

On the other hand, the silence of Ecclesiastes as to trade still illustrates the comparative indifference of the Palestinian Jew to commerce. Ec 3 does not state that 'there is a time to buy and a time to sell.' This silence is the more significant in a book written in the name of Solomon, the merchant-king.

The *restoration of Jewish autonomy*, and the extension of their territory by the *Maccabees*, must have further promoted trade, more especially the acquisition of Joppa by Simon as a Jewish port (1 Mac 14⁶). Throughout the Persian and Greek periods the growing commerce of the Jewish Dispersion (see below) must have done something to foster trade in Palestine; which would be further encouraged by the frequent resort of the Jews of the Dispersion to Jerusalem, especially for the Passover.

During the *Roman or Herodian period* the same causes were at work, aided by the security and facility of communication due to the imperial government. Herzfeld (pp. 66-130) shows that the Mishna and Jerusalem Talmud make frequent references to the trade of Palestine, and enumerates, mainly from these sources, 135 foreign articles imported into Palestine. On the other hand, Josephus (*c. Apion*. i. 12) denies that the Jews occupied any territory on the coast, or cared to engage in commerce: 'Ἡμεῖς τολμῶν οὐτε χώραν οἰκοῦμεν παράλιον, οὐτ' ἐμπορίας χαίρομεν, οὐδὲ ταῖς πρὸς ἄλλους διὰ τούτων ἐπιμίξιας. He makes this statement to explain why the ancient Greeks never heard of the Jews, and doubtless handles his facts with the rhetorical licence of an advocate, *more suo*. Yet his words probably represent the attitude of old-fashioned Palestinian Jews.

The *Dispersion* of the Jews which began with the fall of Samaria had, before the beginning of the Christian era, scattered Jewish communities over all the Mediterranean lands, together with Arabia and the ancient Assyria and Babylonia. These communities are found in all the great commercial cities—Rome, Antioch, Thessalonica, Corinth, Alexandria, etc. Their circumstances militated against their holding land, even when it was not legally forbidden to them; on the other hand, their relations with fellow-countrymen all over the known world gave them then, as now, exceptional facilities for commerce; so that we may conclude that the Jews of the Dispersion were largely occupied with commerce. This conclusion is supported by references to Jewish merchants and trade in various countries. Jos. (*Ant.* xx. ii. 3, 4) mentions a Jewish merchant at the court of Adiabene; Philo (*in Flaccum*, 8) mentions Jewish shipmasters and merchants at Alexandria; and Herzfeld (p. 219) quotes Talmudic references to Jewish traders in Mesopotamia.

v. TRADE ROUTES, MARKETS, HARBOURS, ETC.

—1. *Transport of Commodities*. In times of peace, in the more settled countries, merchants (*cf.* above, 'Terms'), travelling singly or in small companies, carried their wares to their customers, or to markets (Neh 13¹⁶), and visited the scattered farmsteads to purchase farm produce, or clothing made by the housewife or her maids (Pr 31²⁴). The more important international traffic was carried on by caravans of camels (Gn 37²⁵), asses (Gn 42²⁷ 43¹⁶ 45²², Ezr 2⁶⁷), mules (2 K 5¹⁷, 1 Ch 12⁴⁰), oxen (1 Ch 12⁴⁰), and slaves (2 K 5²³). Horses were not used as beasts of burden or for draught, only for riding and chariots. In Gn 45¹⁹, 21, 27 46⁵ waggons (*'agāloth*) are sent to fetch the aged Jacob, and the women and children (*cf.* the *Ēgypt. 'agolt*, a baggage-waggon drawn by oxen, Erman, *Ēgypt*, Eng. tr. p. 491). In Nu 7³, 1 S 6⁷ waggons drawn by oxen are used to carry the tabernacle furniture and the ark. In the pictures of convoys of

prisoners taken by the Assyrians, the baggage and the sick are sometimes carried in waggons (Maspero, *Anc. Egypt and Assyria*, Eng. tr. p. 336). But there is no mention of waggons in the description of the great caravan in Ezr 2^{66, 67}; and they cannot have been largely used. The caravans were usually accompanied by an armed escort (Ezr 8²²).—2. *Trade Routes*. Caravan routes led from S.W. Arabia along the Red Sea from Elath; and also from the Persian Gulf across Arabia to Petra. From Petra there were routes to Egypt, to Gaza, and along the east of the Dead Sea, and the Jordan to Damascus. The great route from the East led from Babylon, across the Euphrates and the desert, by the oasis of Palmyra, to the Plain of Jezreel and the Mediterranean. Another route, partly coinciding with this, started from Gilead, passed over the Plain of Jezreel, and went on by Gaza to Egypt (Gn 37²⁸). Another route went from Damascus by Scythopolis and the Plain of Jezreel to Accho. From Scythopolis routes led to Samaria, Shechem, and Jerusalem. Also from Jerusalem a route by Jericho (Lk 10³⁰) crossed the Jordan, and joined the route east of the river; other routes led to Joppa (Ezr 3⁷), and, in NT times at any rate, to Gaza (Ac 8²⁶) and, by Antipatris, to Cæsarea (Ac 23³¹⁻³²). The combination of these routes connected Babylonia, etc., Damascus, Samaria, Phœnicia, Philistia, Gilead, Jerusalem, Arabia, and Egypt. The Roman roads in Palestine are mostly later than the Bible period. There were numerous minor routes (Herzfeld, pp. 22, 46, 141; G. A. Smith, *HGHL* 149-154, 388 ff., 425-430, 597 ff., 626). An important Egyptian caravan route led from Coptos on the Nile to Sauu (*Wady Gasus*) on the Red Sea (Erman, p. 505). In NT times a great system of Roman roads connected the East with Rome; the most important route was Rome to Brundisium (*Via Appia*), and from Dyrrachium by Thessalonica to Byzantium (*Via Egnatia*).

By sea there was traffic from Babylonia with the East by the Persian Gulf; from Edom and Egypt with the East from ports on the Red Sea; from the Phœnician cities with all the Mediterranean lands and the farther West. A similar trade existed, chiefly in the hands of the Phœnicians and the Greeks, from the coast of the Delta. This developed immensely after the foundation of Alexandria. The rivers Euphrates, Tigris, and the Nile were great trade routes.

The chief seaports of Syria are TYRE and ZIDON, and the other Phœnician cities, and JOPPA (cf. above).

As to markets, the MAKTESH of Zeph 1¹¹ seems to have been a trading quarter of the Phœnicians in Jerusalem; and Dt 33^{18, 19} has been supposed to refer to a fair connected with a religious festival held on the borders of Zebulun and Phœnicia. Markets must have existed in the cities, and elsewhere, probably especially in the neighbourhood of 'high places,' but ancient Israel had no 'commercial cities.' In the NT the market-place (*agora*) is often referred to (Mt 11¹⁶ etc.); and we read of a market held in the temple precincts (Mk 11¹⁵, Jn 2¹⁴). Herzfeld (pp. 130, 324) gives Talmudical references to shops and markets, especially some that seem to imply weekly markets on Monday and Thursday.

In some cases Israel enjoyed the privilege of a trading quarter, 'streets' or bazaars, in foreign cities; and granted similar privileges to foreigners (1 K 20³⁴, Zeph 1¹¹).

vi. *ARTICLES OF COMMERCE*.—The chief exports from Palestine were corn, oil, wine, balsam, spices, cattle, wool, fish, and slaves. Honey, balsam, wheat, and oil were exported to Phœnicia (1 K 5¹¹, Ezr 3⁷, Ezk 27¹⁷, Ac 12²⁰), also oaks from Bashan (Ezk 27⁶). To Egypt were exported spices, balm,

myrrh, honey, pistachio nuts, almonds, oil (Gn 37²⁸ 43¹¹, Hos 12¹). For the slave-trade see SERVANT. Other exports may be inferred from the existence of fertile vineyards and pasture lands, and of the fisheries on the Sea of Galilee. Every article grown or manufactured in Palestine would be exported at some time or another; at any rate, in small quantities. Conversely, most of the products of countries with which the Jews had commercial relations would be imported at some time or another (cf. above, § iii.). But the chief imports were timber and artisans from Phœnicia (1 K 5¹¹, Ezr 3⁷); corn, horses, and chariots from Egypt (Gn 41⁵⁷, 1 K 10^{28, 29}, Dt 17¹⁶); gold and silver, spices, timber, precious stones, ivory, apes and peacocks, gold and silver plate and ornaments, armour, and mules from Arabia, Ophir, and other countries (1 K 10¹⁰⁻²⁸); wool and sheep from Moab (2 K 3⁴, Is 6¹).

The special products of each district would be articles of internal commerce with other districts; farm produce was sold in the cities; the products of the industry of the cities were bought for the country; and foreign imports were distributed from the cities through the country. Salt (see SALT) was supplied from the districts by the Dead Sea; cattle, wool, etc., from the pastures to the east and south; corn, etc., from the fertile arable land in Esdraelon and elsewhere.

A long list of the articles of Tyrian commerce is given in Ezk 27.

vii. *THE GOVERNMENT AND COMMERCE*.—Both in Israel and elsewhere, commerce was often carried on by the kings themselves, e.g. Solomon, Hiram (1 K 10²²), and Jehoshaphat (1 K 22⁴⁸). The presents interchanged between friendly princes were really barter on a large scale; in the Tel el-Amarna tablets the kings of Egypt haggle over the exact value of the 'presents' they give and receive, in true Oriental fashion (Winckler, p. 61 f.). The tribute from dependent States, the 'presents' or prices paid for princesses given in marriage, were a one-sided commerce carried on for the benefit of the kings.

The governments of ancient States intervened, as we have seen, to obtain special trading privileges for their subjects in foreign countries (1 K 20³⁴); also to secure for them protection and redress for injuries (Winckler, *Amarna Tablets*, p. 25).

From the analogy of other States we should suppose that the Israelite kings levied taxes on imports and exports, and tolls on merchandise passing through the country. In one of the Amarna tablets (Winckler, p. 93) a foreign king stipulates that his property shall not be dealt with by the customs of Egypt. In NT the customs officers of the Herods and the Romans are referred to (Mk 2¹⁴ etc.); see PUBLICAN.

viii. *COMMERCE OF THE ROMAN EMPIRE*.—In NT times the empire possessed a highly developed and elaborate commercial system, largely administered by great trading corporations, and involving credit and other features of modern banking. The most important branch of Roman commerce was the corn trade between Egypt and Rome (Ac 27^{4, 28} 28¹¹).

ix. *ETHICS OF COMMERCE*.—The Bible deals directly with only two or three elementary points, such as the duty of fair dealing, and the danger of greed of gain (see SERVANT).

On the general subject cf. the articles MONEY, SOLOMON, WEALTH; also the articles on countries, dress, ornaments, etc.

LITERATURE.—Nowack, *Lehrb. der Heb. Arch.* i. pp. 247-251; Benzing, *Heb. Arch.* pp. 218-223; Erman, *Life in Anc. Egypt*, pp. 479-519; Herzfeld, *Handelsgeschichte der Juden des Alterthums*; Buhl, *Die sozialen Verhältnisse der Israeliten*, pp. 76-83; Schürer, *HJP* ('Trade,' in Index).

W. H. BENNETT.

TRADES.—It was an ancient custom and law among the Jews that every boy must learn a trade, not necessarily as a means of livelihood, but as a precautionary measure against destitution, if fortune failed, and the temptations of an idle life. One of the Rabbinic sayings is, 'He that teaches not his son a trade, is as if he taught him to be a thief'; and another, 'He that hath a trade in his hands is as a vineyard that is fenced,' i.e. he will be secure from the dangers of temptation and want. Many of their great Rabbis are known by their surname of trade, e.g. 'Rabbi Johanan the shoemaker, Rabbi Isaac the blacksmith,' etc. The two illustrious doctors who founded the schools known by their names—Hillel and Shammai—not long before the Christian era, had been taught trades; and the latter, who was a mason, continued to take a practical interest in his handicraft, even when he was vice-president of the Sanhedrin and had a large following of students. So also St. Paul, who was destined for the Rabbinic office, was taught tent-making, probably before he left Tarsus, his native city, to sit at the feet of Gamaliel in Jerus. and learn from him the intricacies of Jewish law. This was of great use to him after his conversion, when he was often compelled to maintain himself by his labour (Ac 18³); so that he was able to say, 'Neither did we eat bread for naught at any man's hand, but in labour and travail, working night and day, that we might not burden any of you' (2 Th 3⁸).—In many handicrafts the ancients attained a very high degree of excellence, and the Hebrews must have learned much from the Egyptians and Phoenicians. The pyramids, temples, and tombs of Egypt, the temples of Greece and Jerus. and Baalbek, and the images of gods and men, show a knowledge of masonry and sculpture which modern skill can hardly equal, while in the work of the goldsmith and jeweller the ornaments belonging to a queen of the 11th dynasty (about B.C. 2000), which were lately found in Dahshur, are said by good judges to be unsurpassed for beauty and finish in the present-day markets of Paris or London. The Tyrian purple dyes, the rich colouring on Egypt. tombs, the elegant vases of pottery and gold, the linen fabrics of the loom, and other products of manual work so copiously depicted on Egypt. walls, all tell the same story of the high civilization in art of those times.—The principal trades mentioned in the Bible are those of smiths and armourers (1 S 13¹⁹), coppersmiths (2 Ti 4¹⁴), goldsmiths (Is 46⁶), jewellers (Hos 2¹³), masons (2 K 12¹²), carpenters (Mt 13⁵⁵), tentmakers (Ac 18³), potters (La 4²), tanners (Ac 9⁴²), fishers (Is 19⁸), bakers (Jer 37²¹), barbers (Ezk 5¹). Spinning, weaving, and sewing were chiefly the work of women (1 S 2¹⁹, Pr 31¹⁹). See separate articles on the above subjects. J. WORTABET.

TRANCE (*ἐκστασις*).—While in class. Greek *ἐκστασις* has the meaning of frenzy, in Bib. Greek it is not found in this strong sense, but means either distraction of mind due to fear or astonishment (Ps 16¹¹ LXX, Ac 3¹⁰), or religious rapture (Ac 10¹⁰ 11⁵). In the strict sense, religious ecstasy denotes a state in which the mind is so dominated by emotional excitement that sensibility to external impressions, the free activity of the intellect, and the initiative and control of the will, are for the moment in abeyance. Its significance as a medium of revelations was found precisely in this suppression of the ordinary mental functions, the mind being regarded as under the control of the Deity, and therefore as His instrument. Ecstasy has been, and is, a more or less familiar phenomenon in almost all religions, more especially in times of religious excitement. While occurring spontane-

ously, recourse has often been had to artificial means, such as the concentration of the mind on an abstract idea or significant word, fasting, fixing of the look, seclusion, whirling and bodily contortion—above all, music and dancing. In the early days of Heb. prophecy such stimulants were not unknown (1 S 10⁸, 2 K 3¹⁵). When, however, we come to the canonical prophets, there can no longer be any question of ecstasy in the sense of a morbid state. What is indicated by such expressions as 'the hand of the LORD was upon me' is rather a religious exaltation of spirit, in which the free activity of the mind is not suppressed but heightened. Such a state lies behind vision as its psychological condition. See VISION. The prophets never appeal to the abnormal character of their experience as authenticating their message. In the Apostolic Church we find a revival of ecstasy in the stricter sense, as an accompaniment of the fresh and often violent religious awakening (1 Co 14²⁷, Ac 2¹⁵). It found expression in rapt utterances. While yielding a certain recognition to this gift of tongues St. Paul indicates that it was apt to breed confusion (1 Co 14²³⁻²⁵), and he places it under strict rule. He himself had also the gift of tongues, but he does not set great store by it (1 Co 14¹⁸): and while he relates a marvellous ecstatic experience of his own (2 Co 12²⁷), he nowhere traces his doctrines to such a source. His allusion to this experience is too vague to admit of its character being precisely defined. See, further, the articles on PROPHECY.

W. MORGAN.

TRANSFIGURATION, THE.—The word comes from *transfiguratus est*, the Vulg. tr. of *μετεμορφώθη* in the narratives of Matt. and Mark. Elsewhere this verb is rendered either *reformari* (Ro 12²) or *transformari* (2 Co 3¹⁸). The event which it designates is recorded thrice (Mt 17¹⁻⁸, Mk 9²⁻⁸, Lk 9²⁸⁻³⁶) and alluded to once (2 P 1¹⁶⁻¹⁸) in NT. The narratives of Matt. and Mark agree closely in wording. But Matt. alone records that when the disciples heard the voice they fell on their faces; and that Jesus came and touched them and said, 'Arise, and be not afraid.' Mark alone has the words, 'so as no fuller on earth can whiten them.' Luke is more independent. Excepting as regards Peter's exclamation and the voice from heaven, his wording is mainly his own; and even in Peter's words he renders 'Rabbi' by his favourite *Ἐπιστάτα*, where Matt. has *Κύριε*. Luke alone tells us that Jesus went up the mount to pray, and that He was praying when He was transfigured. In expressing the Transfiguration he avoids *μετεμορφώθη* (which might have suggested to Gentile readers the metamorphoses of heathen deities), and substitutes the characteristic *ἐγένετο ἕτερον*. And he alone tells us that Moses and Elijah were talking of Christ's *ἐξόδος* at Jerusalem, and that the disciples were heavy with sleep.

The main questions respecting this unique incident in the life of Christ are those as to the place, the nature, and the significance of it.

(1) As to the 'high mountain' (Matt., Mark), which when 2 Pet. was written had become 'the holy mountain,' there are two traditions, which can be traced to the 4th century. (a) That it was the *Mt. of Olives*. This is incredible. Both before and after the Transfiguration Christ is in Galilee. And the *Mt. of Olives* would not have been called *ὁψηλός*. (b) That it was *Mt. Tabor*. This is near enough to Caesarea Philippi to be possible; and, although it is only about 1700 ft. above the sea, it appears to be much higher, and commands a very extensive view. But it is not probable. Just a week ('six days,' Matt., Mark; 'about eight days,' Luke) before this event Christ was at Caesarea Philippi. After it He went through Galilee to Capernaum (Mk

980. 23, Mt 17²³. 24) on His way to Jerusalem. Would He have gone from Caesarea Philippi past Capernaum to Tabor, and then back to Capernaum? A much more serious objection is that at this time there was a village or town on Tabor, which Josephus fortified against Vespasian (*BJ* IV. i. 8, II. xx. 6; cf. *Ant.* XIV. vi. 3); so that the necessary solitude (*κατ' ἰδίαν*, Matt., Mark) could hardly be found there. Yet Cyril of Jerusalem (*Catech.* xii. 16) regards it as certain; and through the great influence of Jerome this tradition became widely accepted. In the Greek Church the Feast of the Transfiguration (Aug. 6) is called τὸ Θαύμασιον. But (γ) the best modern writers prefer *Mt. Hermon* (Keim, Lichtenstein, Porter, Schaff, Stanley, Ritter, Robinson, Trench, Tristram). It is over 9000 ft. high, and could easily be reached in much less than a week from Caesarea Philippi.

(2) Christ calls the event a 'vision,' *ὄραμα* (Mt 17⁹), which does not mean that it was unreal. It was not one person's optical delusion, but a vision granted to three persons at once. It was a Divine revelation, the manner of which is unknown to us. We can neither affirm nor deny that Moses and Elijah, who had both been taken from the earth in a supernatural way, were there in the body, or only in the spirit, or not at all, except by representation. That the event is historical is shown by the three harmonious accounts, by the intelligible connexion with what precedes and follows, and by the improbability that an inventor would have invented the prohibition to speak of it. Matt. gives Christ's prohibition; Luke states that the disciples kept silence; Mark records both the prohibition and their obedience. There is no suspicious similarity between this event and the Transfiguration of Moses, although Strauss and Keim maintain that there is. And the silence of John is no difficulty, for he would readily omit what had been so often told before. The allusion in 2 Pet. is evidence of what was commonly believed when that letter was written. That a fact corresponding to all this evidence took place is the most reasonable explanation of the evidence.

(3) The meaning of the event is more within our comprehension than the manner of it. Whether it is correct to call it 'the culminating point in Christ's public ministry' or 'the great dividing line in the life' is not certain. That in consequence of it a 'sense of urgency and of the immediateness of a great crisis weighs upon the Lord' is more than we know. It was a foretaste of Christ's glory both in earth and in heaven. As such it served to strengthen the disciples, who had been greatly disturbed by the prediction of Christ's sufferings and death; and to this end they were allowed to listen to Moses and Elijah talking with Him about His death, and to hear the heavenly voice, which had proclaimed His Divine Sonship previous to His ministry, proclaim the same previous to His Passion. It showed them the supernatural character of His kingdom. It helped them to see that the OT being fulfilled by Christ is done away in Christ. Moses and Elijah vanish, and 'Jesus alone' (Matt., Mark, Luke) remains. To Christ Himself it may have had significance also. Whether or not it conveyed to Him any larger knowledge of His Father's will, this foretaste of His glory may have helped Him to bear the prospect of His approaching sufferings. He accepted the strengthening of an angel in Gethsemane, and may have accepted some analogous strengthening on the mount.

LITERATURE.—See Comm. and Lives of Christ; also the Dict. and Encyc. articles on 'Transfiguration' and 'Verklärung.' See also 'The Significance of the Transfiguration,' by W. J. Moulton, in *Bibl. and Sem. Studies* (Yale Univ.), 1901, pp. 157-210.

A. PLUMMER.

TRAVAIL.—In modern editions of AV a distinction has gradually arisen between 'travail' and

'travel,' the former being used when the meaning is to labour (or as subst. for 'labour,' 'trouble'), especially in childbirth, the latter when it is simply to journey. But in the editions of 1611 there was no such distinction. Thus in 1611 Mt 25¹⁴ reads, 'For the kingdome of heaven is as a man travailling into a farre countrey'; but Is 21¹³ 'In the forest in Arabia shall yee lodge, O yee travelling companies of Dedanim.' So in Ec 4⁴ we find 'Againe I considered all travaille'; but in 4⁶ 'Better is an handfull with quietnesse, then both the hands full with travail and vexation of spirit.' Nor have the editors or printers carried out their distinction completely. In La 3³ 'He hath . . . compassed me with gall and travel,' the spelling of AV is retained in mod. editions (Cov. 'travayle,' RV 'travail'). In Nu 20¹⁴ the sense has evidently been missed, the wider meaning of toil and trouble in the wilderness being taken as if it were merely the marching through it: AV 1611, 'Thou knowest all the travaille that hath befallen us' (mod. edd. 'travel,' RV 'travail').

The Eng. word is simply the Fr. *travail*, toil, trouble, the origin of which is unknown. In Cotgrave's French Dictionary *travail* is described as 'travell, toyle, teene, labour, business, paines-taking, trouble, molestation, care.' Travelling, which is now undertaken for pleasure, was so conspicuous a form of toil and trouble that it appropriated the name. The change of spelling was assisted by the fact that 'travell' was another variety of spelling in early use. Thus in Ec 2²³ AV 1611, 'For all his dayes are sorrowes, and his travaile, griefe.' The meaning was sometimes 'be weary,' as Is 40³¹ Wyc. 'Who fosome the hopen in the Lord, shul change strengthe, take to federes as of an egge; rennen, and not travellen; gon, and not taylen.' For the spelling 'travel' for labour cf. Gosson, *Schools of Abuse*, 41, 'I burnt one candle to seek another, and lost both my time and my travell when I had doone'; and in the sense of labour in childbirth, Hall, *Works*, ii. 11, 'If the house of David had not lost all mercy and good nature, a Daughter and [or] David could not so neere the time of her travell have bin destitute of lodging in the city of David.' J. HASTINGS.

TREASON.—This word occurs in EV only in 1 K 16³⁰ (of Zimri) and 2 K 11¹⁴ = 2 Ch 23¹³ (the exclamation of Athaliah). In these instances it had better have been rendered 'conspiracy,' the tr. of the same Heb. term (שָׁדָד) in RV of Is 8¹² (AV 'confederacy'; for justification of the reading שָׁדָד against Secker, Lowth, Lagarde, Stade, et al., who emend שָׁדָד, see Cheyne, *Introd. to Is.* 40; LXX has σκληρὸν = שָׁדָד), and in AV and RV of 2 S 15¹², 2 K 17¹, Jer 11⁹, Ezk 22²⁶. Cf. the use of the verb שָׁדָד in 1 S 22¹⁸, 12, 2 S 15¹, 1 K 15¹⁷ 16¹⁸, 2 K 9¹⁴ 10⁹ 12²⁰ (= 2 Ch 24²⁶), 14¹⁹ (= 2 Ch 25²⁷) 15¹⁰, 15, 26, 30 21²³, 34 (= 2 Ch 33²⁴, 25), 2 Ch 24²¹, Neh 4⁸, Am 7¹⁰, in all of which both AV and RV render by 'conspire,' 'make conspiracy,' or 'be a conspirator.'

J. A. SELBIE.

TREASURE, TREASURER, TREASURY.—The word 'treasure' is used in EV in two distinct senses, which are approximately represented in English by 'store' and 'storehouse' respectively. The same ambiguity of meaning (which might be avoided in English by uniformly employing 'treasure' for the one sense and 'treasury' for the other, or by abolishing the latter term altogether and replacing it by 'storehouse' or the like) attaches to some of the words which in the original of the OT are the source of these renderings.

(1) 'Treasure' in the sense of *store* usually stands for Heb. *אִמְכָּר* (generally plur. *אִמְכָּרִים*): of gold, silver, costly utensils, etc., Jos 6²⁰, 24 (the vessels found in Jericho [AV and RV have here 'treasury,' which is not so suitable a tr. as 'treasure' or 'store']), Is 27³⁰ 45³ ('treasures of darkness,' i.e. concealed, hoarded treasures), Hos 13¹⁵, Jer 15¹³ 17³ 20⁸ 48⁷ 49⁴ 51¹³, 1 K 14²⁶ bis, 2 K 24¹³ bis, perhaps also Is 39², 4, although this should perhaps come under (2); wealth in general, Pr 15¹⁶ 21⁴, 1 Ch 29⁸ (the contributions for the building of the temple [here both AV and RV have rightly 'treasure,' but, strangely enough, RV gives 'treasury']

in the similar passage, Ezr 2²⁰ = Neh 7²¹, called in 1 Ch 29¹⁰ הָרֶמֶס, lit. 'crowd,' 'abundance,' AV and RV 'store,' cf. 2 Ch 31¹⁰; of stores of food, drink, etc., 1 Ch 27²⁷, 28 (AV and RV 'increase'), 2 Ch 11¹¹ (AV and RV 'store'); fig. 'treasures of wickedness' (Mic 6¹⁰, Pr 10²), 'the fear of the LORD is his treasure' (Is 33⁹).

'Treasure' stands in OT also for 1. קֹחַ, lit. 'strength': Pr 15⁸, Eek 22²⁵ (AV and RV in both 'treasure'). The Heb. term occurs also in Is 33⁸ (AV 'strength,' RV 'abundance'), Jer 20³ (AV 'strength,' RV 'riches'), Pr 27²⁴ (AV and RV 'riches'). 2. מְצֻנָּה 'hidden (treasure),' √ מָצָן 'conceal': Gn 43²³ (of money hid in the sacks of Joseph's brothers), Is 45³ (treasures at present hidden are to become the spoil of Cyrus), Jer 41⁸ (AV 'treasures,' RV 'stores,' of wheat, barley, oil, and honey hidden in a field), Job 32¹ (some long for death as for hid treasures), Pr 24 (wisdom is to be sought for like hid treasures). 3. The same is the meaning of מְצֻנָּה in Dn 11¹⁸, where, indeed, it is possible that we ought to read מְצֻנָּה. 4. מְצֻנָּה, from √ מָצָן 'to be of use,' 'to benefit' (see below for the examples of its use). 5. קֶרֶן (Kérē) or קֶתֶן (Keth.), in plur. מְצֻנֹתָיִם, Is 10¹³, lit. 'the things prepared or provided for them,' AV and RV 'their treasures.' 6. The combination מְצֻנָּה הַיָּם (RV 'the hidden treasures of the sea'), Dt 33¹⁹, may allude to the wealth derived from the manufacture of glass (see Driver, *ad loc.*). 7. זָהָב, prop. 'precious ore,' Job 22²⁴, 25 (AV in first 'gold,' in second 'defence,' RV in both 'treasure,' m. 'ore'). 8. For Mal 3¹⁷ ('a peculiar treasure') see art. JAWEL. 9. מְצֻנָּה, Ob 6 (AV 'hidden things,' RV 'hidden treasures').

'Treasure' in NT is always θησαυρός except in Ac 8²⁷, where the word γὰρ from the Persian is used of the treasure of queen Candace. θησαυρός occurs in Mt 2¹¹ (of the treasures carried by the magi), 6¹⁹, 20, 21 || Lk 12³³, 34 (of the treasures of earth contrasted with those of heaven; cf. the treasure in heaven spoken of in Mt 19²¹ || Mk 10²¹ and Lk 18²²), Mt 13⁴⁴ (the kingdom of heaven is like treasure hid in a field; cf. the above OT passages Jer 41⁸, Job 32¹, Pr 2⁴), He 11²⁶ ('the treasures of Egypt'); fig. in 2 Co 4⁷ ('we have this treasure in earthen vessels'; see art. POTTER, p. 25), Col 2³ ('in Christ are all the treasures of wisdom hid').

(2) 'Treasure' or 'treasury' in the sense of *storehouse* is almost always the tr. in OT of מֶזְבֶּת: Neh 10³⁸ (cf. 12⁴⁴ and Dn 1²), Mal 3¹⁰ (AV and RV 'storehouse'); or, more frequently, without the מֶזְבֶּת: 1 K 7³¹ 15¹⁹ 16¹⁸, 2 K 12¹⁸ 14¹⁴ 16¹⁸ 18¹⁵, Jer 38¹¹ 50²³ (fig. of Jahlweh's armoury) v. 37 (?), Dt 32³⁴ (the guilt of the heathen is sealed up in God's treasury till the day of retribution come; see Driver, *ad loc.*), 1 Ch 9²⁶ 28²⁰ 28²⁴, 2 K 23¹² 24¹⁴, 2 Ch 5¹ 16^(?) 32²⁷ (cf. Ezk 28⁴), Jl 1¹⁷ (AV and RV 'garner'), Pr 8²¹, Neh 13¹², 13¹⁷. Cf. the use of מְצֻנָּה in 2 Ch 32²⁸. מֶזְבֶּת is used fig. of God's storehouses for rain, snow, hail, wind, sea, in Dt 28¹², Job 38²³ 46, Jer 10¹³ 51¹⁶, Ps 33⁷ 135⁷; cf. the use of מֶזְבֶּת in Job 20²⁶.

In the king's 'treasure house' of Ezr 5¹⁷ מְצֻנָּה, cf. 6¹ and 7²⁰) the archives of the kingdom were kept. In Est 3⁹ 4⁷ the treasury of the Persian king appears under the name מְצֻנָּה; cf. the likewise Persian name in 1 Ch 28¹¹.

We read of 'treasure' (RV 'store') cities' (מְצֻנֹת) in Ex 1¹¹ [J], 1 K 9¹⁹ (= 2 Ch 8⁸), 2 Ch 8⁴ 17¹². For the custom of storing up provisions in particular cities cf. Gn 41⁴⁸, 56, and see an account of the granaries and 'store houses' of ancient Egypt in Maspero, *Dawn of Civilization*, 284.

For the chambers (מְצֻנֹת) or cells used for storage purposes in the temple see next article.

In the NT 'treasure' = 'treasury' is (a) θησαυρός: Mt 12³⁵ || Lk 6⁴⁵ (the good or evil treasury of the heart) 13¹² ('which bringeth out of his treasury things new and old'); (b) once, Mt 27⁶, it is Κορβανὰς (from Heb. קֶרֶן; see CORBAN), 'place of [sacred] gifts'; (c) γαζοφυλάκιον; see next article; (d) in Lk 12³⁴ ('which have neither storehouse nor barn') the word for 'storehouse' is ταμείον [in Dt

28⁸ and Pr 3¹⁰ for the Heb. מֶזְבֶּת; AV in former 'storehouses,' RV 'barns,' which is adopted by both versions in the latter].

Treasurer occurs as follows. 1. Neh 12¹³ 'I made treasurers (Hiph. of מָצָן) over the storehouses' (מְצֻנֹתָיו), AV and RV 'treasuries'. 2. Ezr 1⁸ 'MITHREDATH the treasurer'; 7²¹ 'I, Artaxerxes, make a decree to all the treasurers.' The term (found also in Aram., New Heb., and Syr.) here used is מְצַנֵּן, plur. מְצַנֵּנִים, a loan-word from the Persian *ganjvar*, Pehlevi *ganzavar*. 3. Dn 3² Aram. מְצַנֵּנִים (plur. emphat.). This may be a by-form of the above מְצַנֵּנִים (so Prince), or a textual error for מְצַנֵּנִים (AV and RV 'counsellors') found in vv. 24, 27, 42, 67 (so Graetz, Bevan, *et al.*). But it seems more likely that it is a dittography from the following מְצַנֵּנִים. This conclusion (which is that of Lagarde, Nöldeke, *et al.*; Driver and Marti leave the question open) is supported by the circumstance that the LXX and Theod. have only seven officials in place of the eight of MT. 4. Is 22¹⁵, of Shebna. The Heb. term מְצַנֵּן (fully discussed under art. SHEBNA) would be better rendered 'servitor' or 'steward.' 5. Ro 16², where RV substitutes 'treasurer' for AV 'chamberlain' as tr. of οἰκονόμος (see STEWARD). J. A. SELBIE.

TREASURY (OF TEMPLE).—The word γαζοφυλάκιον, tr. 'treasury' in the NT, is used in the LXX for the Heb. words * meaning cells or apartments of the temple court, in which sacred offerings and utensils were kept, and in which also the priests dwelt.† The word is used in the Books of Maccabees of the sacred treasury in which not only public treasures were stored, but also public records,‡ as well as property belonging to widows and orphans.§ In the inner court of Herod's temple there were rooms which Josephus|| represents by γαζοφυλάκια, showing that the term had a wider sense than 'treasury' would suggest. In the NT the word is used in three places, viz. Mk 12⁴¹, 43 || Lk 21¹, Jn 8²⁰.

Josephus has it in the singular,¶ apparently for the special room in the women's court in which gold and silver bullion were preserved. In Jn 8²⁰ this sense would stand, but not so in the parallel passages of Mark and Luke, where the word is apparently the equivalent of the Rabbinical תְּרִימָה, 'trumpets,' so called because they had the shape of the ram's-horn trumpet. There were thirteen such boxes, and they may be assumed to have been in the women's court, or the widow could not have got at them with her mite. Six out of the thirteen were to receive free gifts, the remaining seven being for distinct purposes, figured probably on the boxes. They were most likely placed on each side of the large gate which led from the women's to the men's court. See TEMPLE (Herod's), and cf. also art. TREASURE. T. W. DAVIES.

TREE (עֵץ, δένδρον, ξύλον).—The Holy Land is not now a land of trees. Even the mountain tops are for the most part bare, and none of the primeval forests have been preserved. This very fact emphasizes the importance and value of trees, wherever they are planted or grow spontaneously. A large part of the trees that exist are cultivated for their fruits, as the palm, fig, apple, pear, apricot, peach, plum, banana, orange, lemon, citron, walnut, pistachio; or their leaves, as the mulberry; or their wood, as the pine. Solitary trees or small groves are planted by tombs (1 S 31¹³) or on high places. From ancient times men loved

* מְצַנֵּן and (Neh 3¹⁰ 12⁴⁴ 13¹⁷) מְצַנֵּנִים. † Neh 13¹⁷ 10³⁷.

‡ 1 Mac 14⁴⁰; cf. Grimm, *ad loc.*

§ 2 Mac 3¹⁰; cf. Grimm, *ad loc.*; 1 Mac 14⁴⁰, 2 Mac 3²⁸ 40 44 51⁸.

|| BJ v. v. 2, vi. v. 2.

¶ Ant. xix. vi. 1.

to rest under such trees (Gn 18⁴⁻⁵, 1 S 22⁶). When the hail broke 'every tree' in Egypt (Ex 9²⁵), it was a national disaster. A fruit tree near a besieged city was not to be cut down (Dt 20¹⁹), but to be kept for the use of the besieged. Other trees might be cut (v. 20). 'A tree planted by watercourses' (Ps 1³) was an emblem of vigour (cf. the vision in Dn 4). The expression 'tree of life' (Gn 3²²⁻²⁴) was afterwards applied figuratively (Pr 3¹⁸ 11³⁰ 13¹² 15⁴). A tree is known by its fruit (Mt 12³⁴). Allusion is made to the great variety of trees which flourish in Palestine (Lv 19²³, Ec 2⁵). Under 'the tree of the knowledge of good and evil' (Gn 2¹⁷ 3⁶) our first parents fell. Under the trees of Gethsemane our Saviour accepted His Father's will (Mt 26³⁶⁻⁴³). The 'tree of life' in heaven has food and healing for the nations (Rev 22³⁻¹⁴).

The trees of Palestine and Syria are *tamarisk*, orange, lemon, citron, *zakkûm*, Pride of India, jujube, maple, *pistachio*, *terebinth*, sumach, moringa, mastich, *carob*, redbud, *acacia*, *almond*, cherry, plum, *apple*, pear, service tree, medlar, hawthorn, *olive*, *ash*, cordia, castor-oil, *elm*, hackberry, *mulberry*, *fig*, *sycomore*, *plane*, *walnut*, alder, hornbeam, ironwood, *hazel*, *oak*, *beech*, *willow*, *poplar*, *cypress*, *juniper*, *yew*, *pine*, *cedar*, *spruce*, *palm*. Those which are in italics are mentioned in EV sometimes wrongly (see artt. on individual trees). The *chestnut* (AV; RV *plane tree*) is not found in Palestine.

G. E. POST.

TRESPASS-OFFERING.—See SACRIFICE.

TRIAL.—See JUDGE and SANHEDRIN.

TRIBE.—

i. *Terms.*—In EV 'tribe' is tr. in OT of Heb. *מִטְבֵּי* *matteh* (*מִטְבֵּי*, *tribus*), *שִׁבְטֵי* *shēbhet*, or *שִׁבְטֵי* *shēbhet* (*שִׁבְטֵי*, *tribus*), Aram. *שִׁבְטֵי* *shēbhat* (*שִׁבְטֵי*, *tribus*); in NT of Gr. *φυλὴ*. *Δωδεκάφυλον* is used Ac 26⁷ for 'the set of twelve-tribes'. In 1 S 13¹³ *shēbhet* is used of the 'tribes' (Cheyne 'castes,' Duhm 'nomes') of Egypt, and in Mt 24³⁰ *φυλὴ* of 'tribes' generally; otherwise all these words are used exclusively of the tribes of Israel, except that *shēbhet* is occasionally used of the subdivisions of these tribes, Jg 20¹², 1 S 9²¹, according to MT 'tribes of Benjamin'; but probably the sing. should be read, 'tribe of B.' (Moore, H. P. Smith); and Nu 4¹⁸ MT, 'cut not off the tribe of the families,' where, however, we should perhaps read 'cut not off from the tribe,' etc. (the text is doubtful, see LXX, Vulg.). The use of *matteh* and *shēbhet* for 'tribe' is figurative, the words meaning originally 'rod,' 'staff,' 'sceptre,' 'branch,' etc., in which senses they are used in OT. *Oxf. Heb. Lex.* explains under *מִטְבֵּי*: 'tribe, orig. company led by chief with staff.'

Matteh as 'tribe' is found in P in the Hexateuch, in Chron.; and in 1 K 7¹⁴ 8¹, where Benzerger regards the clauses in which *matteh* stands as late additions, in 8¹ the *matteh*-clause is absent from LXX^B. *Shēbhet* is common in D, is found in JE, and very occasionally in P (possibly only in redactional passages), and occurs throughout the OT from JE to Chronicles. Giesebrecht (*ZATW*, 1881, p. 242) maintained that the name and thing expressed by *shēbhet* died out before the Exile, and *matteh* was used for it after the Exile. This position is controverted by Driver, *Journ. Philol.* xi. 1882, p. 213f. The decision depends partly on the view taken as to the text, etc., of individual passages; current views on these points seem to admit the opinion that (1) *shēbhet* occurs in post-exilic literature only in passages borrowed from pre-exilic works, or as a literary archaism, its use having been revived through a study of the earlier literature; and that (2) there is no certain instance of the use of *matteh* for 'tribe' before the Exile.—The use of Aram. words corresponding to *shēbhet* in the sense of 'tribe' may be due to the influence of the OT.—On the terms for the subdivisions of the tribe, viz. *mishpāhā* and *bēth 'ābh*, see FAMILY and below.

ii. *Origin, Nature, and History of the Tribe as a Social Organization.*—The articles on individual tribes show that there are two chief theories of their origin. First, the biblical statements as to the patriarchs are understood as personal history, and the tribe is regarded as having arisen chiefly by the natural increase of the descendants of a son or grandson of Jacob. The descendants of each son kept together as a social group, in which, however, foreign slaves, wives, etc., were sometimes included. The second theory, now more

generally held, regards much that is said of the patriarchs and their children as tribal history told in a personal form; cf. BENJAMIN, i. 272^b; JUDAH, ii. 792^b. According to this view the tribes did not all arise as subdivisions of Israel, but Israel was formed, in a measure, by the aggregation of some of the earlier tribes. The process by which the complete set of tribes was formed began before the Conquest, and was continued afterwards. Israel as it invaded Palestine was a loose confederation of kindred tribes. These tribes had themselves been formed by the aggregation of smaller bodies or *mishpāhās*, which were groups of families. We have few data as to the tribal system in the nomadic period; but it would be similar to that of the nomadic Arabs. The unifying forces in the tribe, clan, etc., were the blood-bond, and the tribal or family cult. The blood-bond was partly real, partly theoretical; it could be established by mutual agreement and religious ceremonies. The chief duties of members of a tribe were to act together in war, and to protect one another by blood-revenge. The tribes and their subdivisions were fluid organizations liable to combination, subdivision, loss by secessions, and gain by accessions. Cf. W. R. Smith, *Kinship*, etc. 1-58, 171; *RS* 38 ff.

In the Conquest, Israel fought by tribes and subdivisions of tribes; sometimes the tribes combined (Jg 1³ 4. 5), sometimes they acted separately (Jg 1²²⁻²³). In the settlement the natural tendency would be for each family, clan, and tribe to settle together in the same district (Jos 14¹⁻² 18¹⁰).

It is, however, quite uncertain how far the tribes which we find in Canaan under the monarchy correspond to tribes which existed before the Conquest. Even where there was a real connexion, the name may have been changed. Thus, as the sons of concubines, Gad and Asher (Zilpah), Dan and Naphtali (Bilhah), are regarded as additions to Israel after the Conquest. The stories of the late birth of Benjamin and of the recognition of Ephraim and Manasseh (Gn 48³⁻²² JE) have been understood to mean that these three tribes were formed by the subdivision of Joseph after the Conquest. These views are partly confirmed by the fact that some of these tribal names are apparently names of places in Palestine: Asher (*Aseru*) appears as the name of a district or people in Galilee in inscriptions of Seti I. and Ramses II.; Benjamin is 'son of the right hand' or 'south,' i.e. the southern district of Joseph; and Ephraim, from its form (cf. *Mizraim*, etc.), should be a place-name meaning 'a fruitful land.' The discovery of *Joseph-el* (?) and *Jacob-el* (see JACOB, ii. p. 526^b) in a list of places in Palestine conquered by Thothmes III., B.C. 1481-1440, has led to the suggestion that the tribe of Joseph assumed that name after its settlement in Canaan. On the other hand, the comparative lack of territory, and the insignificance of Reuben, Simeon, and Levi in historic times, point to the antiquity of these tribal names (but cf. LEVI).

Possibly in early times the tribes of Israel were known as Rachel and Leah, and at some time, before or after the Conquest, these broke up into divisions, which eventually became the twelve tribes.

After the Conquest the tribes became essentially territorial, though no doubt the theory of the blood-bond survived. Similarly the *mishpāhā* came to mean the town, or quarter of a town, or village, or district. Hence the tribal name denoted a district, and the tribe included not only the Israelite invaders, but also in time the natives whom they absorbed, or by whom they were absorbed. These tribal districts had no fixed or continuous political organization, and they varied in number or extent. The real political units

were the smaller communities, towns, and districts whose inhabitants were bound together by neighbourhood and common interests. War would unite a whole tribe or a number of tribes, and induce them to recognize a single leader, like Gideon or Jephthah, and to accord him a certain authority after he had brought the war to a successful close. The term *shōphēt* used for such leaders in Judges suggests that their authority was utilized to decide disputes too serious to be settled by local chiefs. The Song of Deborah implies that, apart from such 'judges,' a tribe had no single head; at any rate it does not mention any one in that position, except Deborah and Barak, but speaks of the 'governors' (*mēhōkēlīm*) of Machir, 'they that handle the marshal's staff' (*mōshēkēlīm bēshēbhēt sōpher*) of Zebulun, and the 'princes' (*sārīm*) of Issachar. Similarly in the times of the Judges and the Monarchy we read of 'elders' of Gilead, Jg 11⁵; of Israel, 1 S 4³ etc.; of Jabesh, 1 S 11³; of Judah, 2 S 19¹¹; of the 'princes' (*sārīm*) of Gilead, Jg 10¹⁸. Normally, the highest authorities in the tribe were those 'elders,' probably the heads of the *mishpāhās* (B. Luther). 1 Ch 27¹⁶⁻²⁴, which assigns a 'ruler' (*nāghidh*) or 'captain' (*sar*) to each tribe, is probably from a late post-exilic source (Gray, *HPN* pp. 185-188). Abimelech's kingship (Jg 9) was quite exceptional, and was not tribal; he is spoken of as king of Shechem only.

It is possible that the tribes brought with them into Palestine a tribal cult, and established tribal sanctuaries which would serve as rallying points. The sanctuary of Dan, at the Northern Dan (Jg 17, 18), however, is hardly an example; the priest, etc., were acquired in Palestine, and Dan itself may not have been one of the original tribes; still, in forming a tribal sanctuary, it may have been imitating them. Dt 33^{18, 19} seem to refer to a sanctuary of Zebulun and Issachar. Even if a tribe had no official sanctuary, the various high places promoted union and intercourse in a district.

After the establishment of the Monarchy, as the power of the kings increased, the tribal names gradually became mere geographical expressions, and the districts they denoted ceased to be political divisions. Solomon (1 K 4⁷⁻¹⁹) divided the land of Israel, with the exception of part of Judah, into twelve districts, which do not coincide with the tribal districts. In a measure, however, the tribal system prevailed: by the division into two kingdoms and the disappearance or absorption of the weaker tribes, Judah became the Southern kingdom, Ephraim the Northern kingdom, and Gad stood for S.E. and Eastern Manasseh for N.E. Israel; although the political existence of the other divisions of the Northern kingdom is sometimes recognized (Is 9²¹). The oracles on the tribes, the Blessing of Jacob (Gn 49), and the Blessing of Moses (Dt 33), come to us in their present form from the period of the Monarchy; but they are constructed on the model of more ancient oracles, so that the fact that they contain sayings on nearly all the tribes (cf. below) does not show that the tribe continued a political unit throughout the Monarchy; on the other hand, the space devoted to Judah and Joseph in Gn 49, and to Joseph and Gad in Dt 33, supports the view taken above. The section on Levi (Dt 33⁹⁻¹¹) may have received its present form from one of the Deuteronomic writers. The disappearance of the tribe as a political unit is further indicated by the silence of 2 K, etc., and especially by the fact that, with two exceptions, none of the numerous lists of Jewish families in *Ezra* and *Neh.* refer them to their tribes. The exceptions are Neh 11³⁻²⁴ 11²⁵⁻³⁶ (in their present form very late, Guthe, *SBOT*, etc.), where, too, 'Benjamin' and 'Judah' may be mere names of districts.

On the other hand, the Blessings of Jacob and of Moses, with Ezk 48 and such references as Ps 68⁷ 80², show that a strong archaic religious interest was taken in the ancient tribes. One result of this interest was the set of tribal genealogies, Gn 46⁷⁻⁷³ = Nu 26⁵⁻⁵¹ (late strata of P), 1 Ch 2-8, which partly expressed the recollections of ancient politics and geography, and partly served to connect existing families with the primitive tribes. Meyer (*Entstehung*, 160) deduces from the statement in Ezr 2⁵⁸⁻⁶¹ that certain families could not prove Israelite descent, the conclusion that the rest traced their descent from Judah or Benjamin. The silence as to tribal descent, mentioned above, seems to show that this is an erroneous theory; and the habit of tracing descent to the ancient tribes and their primitive clans became general only long after the Exile; families which derived their ancestry from distinguished men, David, Saul, etc., could of course name their tribe. In other cases, a family would determine its tribe from its home before or even after the Exile, and from similar circumstances. Hence the description of various persons in the Apocrypha and NT as belonging to certain tribes (To 1¹, Jth 8¹, 2 Mac 3⁴, Lk 2²⁸, Ro 11¹) can be accepted only in this limited sense.

iii. *Order and Grouping.*—The accompanying Table will show that the tribes are arranged in twenty different orders, only one of which, that of Nu 2, 7, and 10, recurs. The principles of arrangement are—

(1) The relationship to Jacob, and his wives and concubines. Thus: Sons of—

Leah: Reu., Sim., Levi, Jud., Iss., Zebulun.

Zilpah: Gad, Asher.

Rachel: Joseph, Benjamin.

Bilhah: Dan, Naphtali.

This principle, modified in some cases by others, determines the order in Gn 29-35, in the Blessing of Jacob (Gn 49), and in the lists based on the Blessing (Gn 46, Ex 1, Nu 1 (two), 2, 7, 10, 13, 26, 1 Ch 21² 27).

As the grouping according to wives and concubines does not correspond to any known historical situation after the Conquest, it must be based on a tradition of the circumstances of Israel before, or shortly after, that event.

(2) Geographical position. This position influences most of the lists mentioned above, and governs in large measure those in Nu 34, Dt 33, Jos 13 ff., Jg 5, 1 Ch 2-8 (partly), 12; Rev 7 (partly).

(3) In Dt 27 tradition and geography have some influence,—witness the position of Simeon and Issachar; but the chief principle seems to be that the tribes regarded for various reasons as more important are chosen to bless, and the less important to curse. The cursing tribes belong to the E. and N. districts, which were carried away captive first.

(4) The list in Ezk 48 is based on the geography of the monarchy modified by the transference of the Eastern tribes to the West of Jordan, and by the ideal necessity for placing the temple about the middle of the country.

In the Table on the preceding page the sons of the various wives, etc., are printed thus:—

Sons of Leah, small caps., e.g. REU.; of Zilpah, ordinary type, e.g. Gad; of Rachel, small caps. italic, e.g. JOS.; Bilhah, italic, e.g. Dan.

iv. *Subdivisions of the Tribe.*—The tribe was a confederation of *mishpāhās* (cf. above), RV 'families'; and the *mishpāhā* was a group of households, *bayith* or *bēth 'abb* ('father's house').* A common worship of the *mishpāhā* is implied in 1 S 20⁶. The names of some of the *mishpāhās*

* Also used of a tribe (Nu 17¹⁷), or chief division of a tribe (Nu 3⁵⁰ (?)).

(Hebronites, Nu 3²⁷; Hebronites, Nu 26⁶; Shechemites, Nu 26³¹) show that in many cases the *mishpāhā* came to mean the inhabitants of a town or district. Jg 9¹, however, implies that in the time of Abimelech ben Gideon there were more than one *mishpāhā* in Shechem. According to the oldest form of the Gideon narrative (J, Jg 6²⁴ 8⁴, see analysis in *PB*), Gideon's force consisted of the fighting men of the *mishpāhā* Abiezer, who amounted in number to three hundred. In Ex 12³ the *bayith* or *bēth 'abb* is spoken of as normally capable of consuming a paschal lamb at one meal.

Cf. FAMILY, GOVERNMENT, ISRAEL, JACOB, and articles on the separate tribes, etc.

W. H. BENNETT.

TRIBUTE (IN OT).—1. **עָבָר**. The rendering 'tribute' for this word is very misleading. Its meaning is collective=*forced labourers, labour-gang*. One of the most notable of such companies was the body of task-workers for the public service, consisting of 30,000 men, which Solomon (see above, p. 565^b) raised by levy upon the people (1 K 5¹³ 27) 9¹⁵ 21; contrast the statement in 2 Ch 8¹⁰, according to which this levy was imposed only upon the remnant of the aboriginal inhabitants of Canaan). Something of the same kind appears to have been introduced already by David (2 S 20²⁴ 'Adoram was over the labour-gang,' cf. 1 K 4⁶ 5¹³ 12¹⁸=2 Ch 10¹⁸). Another familiar instance is the slave-gangs of Israelites in Egypt, with their overseers (עֲבָרִים Ex 1¹¹). Conquered populations were frequently subjected to forced labour: Dt 20¹¹, Jos 16¹⁰ 17¹², Jg 1²⁵ 30. 32. 35, Is 31⁸, La 1¹. 'Issachar became a slaving labour-band' (עֲבָרִים Gn 49¹⁵ [J]). In Pr 12²⁴ it is said that 'slothfulness [a slothful man] shall be put under taskwork.' In late Hebrew the word **עָבָר** (by use of the concrete for the abstract) came to mean *forced service, serfdom*. In Est 10¹ it possibly means *tribute* in sense of *forced payment*.

2. In Dt 16¹⁰ EV 'with a tribute of a freewill offering' would be clearer if RVm were adopted: 'after the measure of the,' etc. The Heb. [here only] is **נָסֵף**, common in Aram.= 'sufficiency,' and as adv. acc.=*pro ratione*. The meaning is that the offerer is to give according to the full measure in which Jahweh has blessed him in the year's harvest (see Driver, *ad loc.*, and *Oxf. Heb. Lex. s.v.*).

3. **נָסֵף** (loan-word from Assy. *mandattu*, 'tribute'), Ezr 4¹³, Neh 5⁴. 4. **בִּלְיָ** (prob. the Assy. *biltu*, 'impost'; see Schrader, *COT* ii. 65 f.). 5. **עָבָר**, prop. 'computation,' used only of the duty for Jahweh levied on the spoil, Nu 31²⁶ 27. 32. 36. 40. 41 [all P]. 6. **מָשָׁךְ**, lit. 'burden,' 2 Ch 17¹¹ (cf. 2 Ch 24²⁷, Hos 8¹⁰). 7. **עֲבָרָה**, 'fine,' 'indemnity,' 2 K 23²³ (of the sum exacted by Pharaoh-necho after he had deposed Jehoaahaz), cf. Pr 19¹⁹ AV 'punishment,' RV 'penalty'). J. A. SELBIE.

TRIBUTE (IN NT).—**Κῆνος**, Lat. *census* (Mt 22¹⁷, Mk 12¹⁴), φόρος (Lk 20²² 23, Ro 13⁶ 7), in Mt 17²⁵ **τὸν ἅ κῆνος** ('toll or tribute'), an annual tax levied on persons, houses, or lands. In all the passages quoted the reference is to the imperial taxes, to taxes paid to a prince or civil governor on behalf of the Roman treasury. Both **κῆνος** and **φόρος** are, properly, direct taxes. The **φόρος**, strictly speaking, were taxes paid by agriculturists, the payment being generally made in kind, and were contrasted with the **τέλη** or customs collected by the publicans. The word **κῆνος**, again, was originally used of the property register upon which taxation was calculated, and thence came to mean

the capitation or poll tax (cf. D in Mk 12¹⁴ **ἐπικεφάλαιον**). In Mt 17²⁴ the word tr. 'tribute' in AV and 'half-shekel' in RV is the didrachmon. This sum every adult male Israelite had to pay to cover the cost of the public sacrifices at the temple. The 'stater' of v. 27 was a tetradrachmon, equal to a whole shekel, and therefore payment for two. After the destruction of Jerusalem, Vespasian caused the Jews to pay this didrachmon tax for the support of the temple of Jupiter Capitolinus in Rome. Nerva, though not abolishing the tax, made it less offensive to the Jews by dissociating it from this heathenish use. See MONEY.

LITERATURE.—Schürer, *HJP* (1890), i. ii. 110, 254; Marquart, *Römische Staatsverwaltung*, ii. 185 ff. Also, generally, R. Cagnat, *Étude historique sur les impôts Indirects*, Paris, 1882; and Otto Hirschfeld, *Untersuchungen auf dem Gebiete der Röm. Verwaltungsgeschichte*, I. (down to Diocletian), Berlin, 1877.

J. MACPHERSON.

TRIBUTE MONEY, τὸ νόμισμα τοῦ κῆνου (Mt 22¹⁹), the coin used in payment of the imperial taxes. The phrase literally means 'the lawful money of the tax.' The tribute had to be paid in the current coin of the realm. See MONEY.

TRIPOLIS (ἡ Τρίπολις).—A city of Syria, at which Demetrius Soter landed with an army when he wrested the kingdom from his cousin Antiochus v. (2 Mac 14¹; *Ant.* xii. x. 1). It was to Tripolis that Antiochus Cyzicenus retired after being defeated by Hyrcanus (*Ant.* xiii. x. 2).

Tripolis was a maritime town of Phœnicia, and a member of the Phœnician league. Its Phœnician name, and the date of its foundation, are unknown; but it must have been founded some time after Aradus. Each of the principal Phœnician cities, Tyre, Zidon, and Aradus, had its separate quarter at Tripolis, and hence the name—'the three cities.' Little is known of its early history, but, from its position near the western end of the 'entrance of Hamath,' it must have been a place of commercial importance. It was adorned with stately buildings by the Seleucids and the Romans, and a gymnasium was built there by Herod the Great (Jos. BJ i. xxi. 11). When Tripolis was besieged by the Arabs, most of the inhabitants escaped by sea, and after its capture it was colonized with Persians and Jews. Even in A.D. 1047, Nāsir-i-Khusrau writes that all the Moslems belonged to the Shīah sect. Tripolis was taken by the Crusaders (A.D. 1109), when a valuable library was burned. Under the Franks there was a large silk industry, which was destroyed when the place was captured by the Egyptians (A.D. 1289). At this time Tripolis occupied its original position on the seashore; but the constant attacks of the Franks created such a feeling of insecurity that in 1366 a new town, the present *Tarābulūs*, was founded about 2 miles inland, on higher ground on the banks of the *Nahr Kadisha*. The old town had the sea on three sides, and on the fourth it was protected by a wide, deep ditch. Hardly a trace of its great buildings remains; war and a succession of severe earthquakes have destroyed everything. The site is now occupied by *el-Mīna*, the seaport of *Tarābulūs*, which has a large and increasing trade. The plain between old and new Tripolis is still remarkable for the exuberant fertility which attracted the attention of all mediæval pilgrims and travellers.

C. W. WILSON.

TROAS (Τρωάς, or more correctly Ἀλεξάνδρεια ἡ Τρωάς) was a city on the Ægean coast of Asia Minor, opposite the small island of Tenedos. The district in which it was situated was sometimes called as a whole Troas, and is in modern times generally called the Troad; it was the north-western part of the land of Mysia. A city was

founded on the site by Antigonos, and called Antigonía Troas: the people of Skepsis, Cebren, Hamaxitus, and other towns were settled there. In 300 Lysimachus refounded and renamed the city Alexandria Troas. It was for a time under the dominion of the Seleucid kings of Syria; and there are coins of Antiochus II. Theos (B.C. 261-246) struck at Troas. As Seleucid power waned, it gained its freedom and began to strike its own coinage. Many tetradrachms ΑΛΕΞΑΝΔΡΕΩΝ with the head and name of Apollo Smintheus were coined there from about B.C. 164 to 65; they are all dated from an era whose first year was probably about B.C. 300, when Alexandria was founded.* The Pergamenian rule, under which it must have passed, was not, like the Seleucid, destructive to freedom; and the same was true of the Roman dominion, under which the city passed in B.C. 133.

The Romans cherished a peculiarly warm feeling towards Troas, on account of their Trojan origin, a legend in which they had come to believe thoroughly; their favour for Ilium on the same ground is well known. Alexandria was made a Roman Colonia by Augustus, under the name Colonia Augusta Alexandria Troas (to which under Caracalla the titles Aurelia Antoniniana were added). It possessed the *ius Italicum*, i.e. the Italian privileges in the tenure and ownership of land, along with immunity from poll-tax and land-tax (*immunitas*), and freedom from the command of the governor of the province (*libertas*). It had the ordinary colonial constitution, chief magistrates called *duoviri*, and a senate of *decuriones*; and it was divided into 10 *vici*. Its citizens belonged to the Roman tribe Aniensis (not Sergia, as commonly stated, see Kubitschek, *Imp. Rom. tribut. descript.* p. 247). It became one of the greatest and largest cities of the north-west of Asia. In the coasting voyage system of ancient navigation, it was the harbour to and from which the communication between Asia and Macedonia was directed (cf. Ac 16⁸ 20⁶, 2 Co 2¹²). Owing to the greatness of Troas and its legendary connexion with the foundation of Rome, the idea was actually entertained by Julius Caesar of transferring thither the centre of government from Rome (Suet. *Jul.* 79); and some similar scheme was still not wholly forgotten when Horace protested against it in *Od.* iii. 8. Hadrian probably visited Troas,† and it was perhaps his interest in it that led the wealthy and politic Herodes Atticus‡ to build there an aqueduct (the ruins of which were imposing in very recent times) and baths.

Finally, that dream of the early empire may have had some influence on Constantine, who (as Gibbon says), 'before he gave a just preference to the situation of Byzantium, had conceived the design of erecting the seat of empire on this celebrated spot, from which the Romans derived their fabulous origin.' In view of these fanciful but really cherished schemes, it is interesting to observe that the modern name is Eski-Stamboul, 'Old Stambul,' while Constantinople is Stamboul simply.

The great sanctuary of the Alexandrian State was the temple of Apollo Smintheus, near the coast, about twelve miles south of the city; it was originally in the territory of Hamaxitus, and Alexandria inherited the temple along with the people of that town. The symbol of this god was the mouse (or rat), which often appears on the coins of Troas.

The route followed by St. Paul, with Silas and Timothy, from the Bithynian frontier near Dorylaion or Kotiaion, brought the party to the coast at Troas (Ac 16⁸⁻⁹). There can be little doubt that this road led down the Rhyndacus valley past the hot springs Artemaia, sacred to Artemis, on the river Aisepos.§ In the *Acta Phileteri* (*Acta Sanctorum*, 19 May, p. 312 ff.) the tradition (which is clearly older than the *Acta*) is recorded that the church at a village Poketos, between the Rhyndacus and Cyzicus, was dedicated by Paul and Silas when they visited Troas. This tradition probably relates to this journey (though it might seem not impossible that it relates to the visit of Paul [Silas

is not mentioned] to Troas in 2 Co 2¹²), and embodies a belief that Paul preached in Mysia on this journey, conformably to which belief the Western reading in Ac 16⁸ has *διελθόντες τὴν Μυσίαν*, where NAB, etc., have *παρεθόντες*, 'neglecting,' i.e. passing through without preaching in Mysia (on account of the prohibition to evangelize the province Asia, of which Mysia was part, Ac 16⁷). Here the Western reading and the local tradition seem to form a later and secondary interpretation, which tended to obscure and expel the true Lukan reading. The 'open door' at Troas (2 Co 2¹²) implies either that great facility for mission work was found in the city, or that the city was the entrance of a good avenue to reach the country around and behind (compare the similar door at PHILADELPHIA).

LITERATURE.—On Troas see the travels of Chandler, Fellows, etc., also an article in *Mittheilungen d. d. Instituts zu Athen*, ix. 36; Choiseul Gouffier, *Voyage Pittoresque*, ii. 434; le Bas-Waddington, iii. 1035-1037, 1730-1740; Wroth in *Catalogue British Museum, Coins of Troad, Aetolia, etc.*; CIG 3577-3594; CIL iii. 384-392.

W. M. RAMSAY.

TROGYLLIUM (Τρογύλλιον).—According to the AV of Ac 20¹⁵, which follows cod. D, the ship in which St. Paul sailed, when on his way to Caesarea and Jerusalem at the close of his third missionary journey, 'tarried at Trogyllium' after touching at Samos, and before sailing on the following day to Miletus. The principal MSS (N, A, B, C) omit the words 'tarried at Trogyllium.' The addition in D was possibly founded on a tradition that survived in the churches of Asia, and gives a detail which in itself is highly probable (cf. Ramsay, *St. Paul the Trav.* p. 294).

The promontory of Trogyllium projects from the mainland of Asia Minor, and overlaps the eastern extremity of Samos so as to form a strait less than a mile wide between the two promontories. Through this strait St. Paul sailed, and it is natural to suppose that the ship may have anchored for the night under the lee of Trogyllium, either because the wind had dropped, or because there was no moon. A little to the E. of the end of the promontory, not more than a mile from Samos, there is an anchorage still called 'St. Paul's Port' (Conybeare and Howson, *Life and Epp. of St. Paul*, xx. n.). Ramsay has pointed out (*Ch. in Rom. Empire*, 155 n.) that the voyage of St. Willibald is an apt illustration of that of St. Paul, and that his 'Strobalis on a high mountain' is Trogyllium.

C. W. WILSON.

TROPHIMUS (Τρόφιμος).—One of St. Paul's companions (Ac 20⁴), called with Tychicus *Ἀσιαῖος*. These two disciples, with others, travelled with the apostle from Macedonia to Asia, and preceded St. Paul to Troas in his third missionary journey. From thence Trophimus must have accompanied St. Paul to Jerusalem. He was an Ephesian (Ac 21²⁹), and the riot raised against St. Paul in Jerusalem was made chiefly on the ground that he had introduced Trophimus, a Gentile, into the temple. The only other passage in the NT where his name occurs is 2 Ti 4²⁰, where St. Paul says, 'Trophimus I left at Miletus sick.' It is to be noted that St. Paul had also sent Tychicus to Ephesus (2 Ti 4¹²). This must have happened after St. Paul's first imprisonment. Trophimus has been identified with one of the companions of Titus who with Titus carried the 2nd Epistle to the Corinthians from Ephesus to Corinth (2 Co 8¹⁶⁻²⁴). The Greek *Menology* celebrates Trophimus on April 14 with Aristarchus and Pudens, and asserts that they were of the Seventy, and suffered martyrdom at Rome under Nero.

(For the identification of Trophimus with the disciple in 2 Co 8¹⁸ see Stanley on 2 Cor. 2nd ed. p. 492).

H. A. REDPATH.

* Another suggestion is that the Seleucid State era, beginning B.C. 312, was used at Troas; but all the dated coins were struck after Troas had been included in the Pergamenian realm, and the use of the Seleucid era then, though possible, seems improbable.

† The inscription, CIL iii. 466, quoted in proof by Durr (*Reisen des K. Hadrians*, p. 55), affords no evidence. But Hadrian certainly visited Ilium and probably Lesbos (*per Asiam et insulas*, Spart.); and Troas lay between them.

‡ Probably A.D. 132-135, when he was *legatus* to improve the condition of the free cities of Asia (Philostr. *Vit. Soph.* i. xxv. 13).

§ Ramsay, *St. Paul the Trav.* p. 197. A different theory of route was stated by Mr. Munro in the *Geographical Journal*, Feb. 1897, p. 180 f., but afterwards abandoned by him (*Journal of Hell. Studies*, 1901, p. 235).

TROW.—The Eng. verb to 'trow' is the same in origin as 'true' and 'trust.' Its earliest meaning is to believe or trust, as Archbp. Hamilton's *Catechism*, xxv, 'He that trowis and fernely beleiffis in the sone of God, hais evirlastand lyfe, in this world in hoip, and in the world to cum in deid'; also p. xxx, 'Thai suld trow the artikillis of thair Crede'; and Mandeville, *Travels*, 13, '*Jesu Christus nascetur de Virgine Maria, et ego credo in eum*, that is to say, Jesu Christ shall be born of the Virgin Mary, and I trow in him.' But through degeneration the word came to signify no more than *think* or *suppose*, as Lk 8²⁰ Rhem. 'Who is this (trow ye) that he commaundeth both the windes and the sea, and they obey him?'; Ac 8²⁰ Rhem. 'Trowest thou that thou understandest the things which thou readest?' This is the meaning in Lk 17⁹, the only occurrence of the word in AV, 'Doth he thank that servant because he did the things that were commanded him? I trow not' (οὐ δοκῶ; edd. and RV omit). J. HASTINGS.

TRUMPET (including Feast of Trumpets and New Year).—Among the wind instruments of the Hebrews (see MUSIC, § 2, e and f) were two, *shōphār* and *hazōzērah*, which are variously rendered in AV by 'trumpet,' 'trump,' and 'cornet.' The more ancient of these, especially used for secular purposes, except in P, was the horn or *shōphār* (LXX *κεκρυμμένη* or *σάλπιγξ*). The latter word is used by Philo, who describes the feast of the 1st of Tishri as the feast of the *σάλπιγγες* (Wendland, *Neuentdeckte Fragmente Philo's*, p. 11; Schürer, *GJV* ii. p. 450).

The Heb. name שׁוֹפָר is probably derived from a root meaning *to be bright*, in reference to the clear, sharp, piercing tone of the instrument. That it was made of horn is attested not only by the tradition of the synagogue, but also by the interchange between שׁוֹפָר and קֶרֶן ('horn'); see Jos 6^{4, 5}. As, moreover, the word יָבֵל ('ram,' whence 'Jubilee,' see SABBATICAL YEAR) is often associated with *shōphār*, the original instrument was probably made of a ram's horn (cf. Nowack, *Heb. Arch.* i. 277). Some authorities suggest that possibly in later times an instrument of similar shape was made of metal (Benzinger, *Heb. Arch.* 277; Kirkpatrick on Ps 98⁶ etc.). The modern synagogue, which still uses the *shōphār* in the months of Elul and Tishri, preferentially employs the ram's horn, but the Mishna (*Rosh Hashana* iii. 2) permits the use of the horn of any (clean) animal *except the cow*. Driver (*Joel and Amos*, p. 144) defines the biblical *shōphār*, however, as 'the curved horn of a cow or ram.' The Mishna (*ib.* § 3) specially mentions the straight horn of the ibex as used in the temple. The common crook form is pictured in vol. ii. p. 462, but Asiatic Jews prefer spiral forms similar to the trumpets of the Hindu priests. Among the exhibits at the Anglo-Jewish Exhibition (1887, *Catalogue*, p. 97, beautifully illustrated by Frank Haes, Edition de Luxe) was one from Aden, made from the splendid horn of the koodoo (cf. F. L. Cohen, *Jewish Chronicle*, Sept. 1, 1899, p. 25). Thus the *shōphār*, though preferentially made in Western lands of the ram's horn, may be constructed of the horn of any sheep, goat, or antelope, growing separately from its core, and it 'varies in shape from absolute straightness through a gradual curve to the spiral.' The crook is preferred, not, as modern Jewish homilists hold, for symbolical reasons, but 'because of the same acoustic effects consequent on such a curve, as decided the form of the ancient Roman cavalry trumpet, or the modern saxophone. The trumpet of the Roman cavalry was, indeed, only a large *shōphār*, elegantly fashioned in bronze' (Cohen, *ib.*).

The ancient preferential use of the ram's horn was strengthened by the association of the Day of the Trumpet (1st of Tishri) in later Jewish ritual with the narrative of the offering of Isaac (Gn 22¹³). The whole chapter is read in the synagogues on the 2nd of Tishri, and references to the incident abound in the ritual of the festival). The horns now used are sometimes carved, and adorned with golden crowns and Hebrew inscriptions, but no metallic attachment is permitted at the mouth-piece (*Shulchan Aruch, Orach Chayim*, § 585 ff. For an excellent account of the construction of the *shōphār*, with illustrations, see C. Adler, *Proceedings of the U.S. Museum*, xvi. 287-301; Reports, 1892, 437-450; 1899, p. 548).

As in the modern synagogue, so in the Bible, the *shōphār* is associated (together with certain special offerings, Nu 29²⁻⁶) with the feast held on the new moon (see NEW MOON) of the seventh month. This feast is an addition to the Calendar of the Feasts in P (Lv 23²⁻²⁵, Nu 29¹⁻⁶). In the seventh month, on the first day of the month, shall be a solemn rest unto you (וַיִּקְרָא יְהוָה, a memorial of blowing of trumpets' (Lv 23²⁴). 'It is יוֹם קִרְבָּה, a day of blowing of trumpets unto you.' Thus the precise instrument is not named in the Hebrew (LXX has σαλπιγγων in Lev., whence the plural 'trumpets' in AV. The synagogue uses only one instrument. In Num. the LXX has simply *ἡμέρα σημασίας*—'a day of signalling'), but the *shōphār* is obviously intended, for the term *tērah*, though also used of the *hazōzērah* (Nu 10⁶) and the cymbal (Ps 150⁵), is connected with the *shōphār* in several passages (see esp. Lv 25⁹, a passage on which the Mishna rightly relies). The exact musical notes intended are unknown; indeed the rude horn has no precise note, and various examples not only differ in this respect from one another, but from one and the same *shōphār* very different effects are produceable. Greater attention was probably paid to rhythm and length than to the actual musical sounds, and this is still the case. 'Any sound is satisfactory,' runs the Rabbinical prescript, but tradition confesses itself unable to be more precise. In the Bible various terms are used: קָצָץ (whence the term קָצָץ Ezk 7¹⁴ for 'trumpet,' and the New Heb. *tēkiah* for a note on the same instrument) *to smite*, hence to produce a sharp, clear note; שָׁחַח *to draw out* or *prolong* (whence perhaps the *tēkiah gēdōlah*, or great *tēkiah* of the modern synagogue; cf., however, Is 27¹³); and הִרְעָה (whence the biblical *tērah*) *to produce a trembling, vibratory note, or a series of quick blasts*.

The Rabbinical ritual, unable to identify the biblical notes, prescribed three sounds: the simple *tērah*, the *tērah* produced by vibrating the lips and not the *shōphār*, and the *shēbār* or three short broken notes. The *ba'al tērah*, who blows the *shōphār*, utters the benediction, 'Blessed art thou O Lord our God, King of the Universe, who hast sanctified us by thy commandments and commanded us to hear the sound of the *shōphār*.' The number of distinct notes varies in different rites (from 30 to 100). A whole section of the *māsaph* or additional service of the Day of the Trumpet is known as the *shōphārōth* (Mishna, *Rosh Hashana*, iv. 5); it consists of a collection of scriptural passages in which the *shōphār* is mentioned (see Singer, *Authorized Daily Prayer-Book*, p. 252; and on the New Year Liturgy, Friedmann in *JQR* i. 62). These passages refer chiefly to the giving of the Law at Sinai and to the future redemption, and the association of the *shōphār* with the latter event often occurs in the NT ('Last trump,' 1 Co 15⁵²; cf. 1 Th 4¹⁶, Mt 24³¹, 2 Es 6², and Is 27¹³, Zec 9¹⁴). Thus the *shōphār* plays its part not only in the biblical feast, but also in the general scheme of the later New Year celebrations.

The festival has, from early Rabbinical times, been known as הַיּוֹם הַרְבֵּעִי (New Year; see TIME, יוֹם הַזִּכְרוֹן ('Day of Memorial'; cf. Lv 23²⁴), and יוֹם הַדִּין ('Day of Judgment'). The festival has been spiritualized into a solemn day of self-introspection, and the *shōphār* is regarded as a signal, calling to inner and outward repentance.

In anticipation of the feast itself, the *shōphār* is with this object sounded in many synagogues throughout the previous month Elul, morning and evening, with the exception of the Sabbaths. (If the 1st of Tishri happen to fall on a Saturday, the *shōphār* is not sounded, except in certain Reformed Jewish congregations. In the temple the *shōphār* was of course sounded on the Sabbath). So, too, after the festival, the *shōphār* is sounded (among the Sephardic Jews) on the 7th day of Tabernacles (*Hoshā'ana Rabba*) during the seven circuits of the palms. This last act completes the penitentiary cycle, which includes the Day of Atonement. The whole period is

the most solemn in the modern Jewish Calendar, and it is noteworthy that Rabbinical Judaism has in this case, as in several others, developed the biblical prescriptions in a purely spiritual direction. One of the finest sections in Maimonides' Code (*Mishneh Torah*) is the section on Penitence (תשובה 'return'), in which the ideas of a sense of sin, regret, and practical amendment are, on the basis of Rabbinical conceptions, combined into a remarkable and beautiful whole. It should be added that the תרומה or binding of Isaac on the altar plays in the liturgy of the synagogue for the New Year a rôle in some, though not in the most characteristic, aspects not unlike that of the Crucifixion in the theology and liturgy of the Christian Church.

The other uses of the *shôphâr* are not easily discriminated from those of the *hâzôzêrah*, and the two instruments must be considered in conjunction. The *hâzôzêrah* differed from the *shôphâr* in shape (see vol. iii. p. 462 f.), being nearly a yard long, a straight slender tube with a slight expansion at the mouth and a bell-shaped end (Jos. *Ant.* iii. xii. 6; so Arch of Titus and Coins). It also differed in material, as it was made of metal ('beaten silver,' Nu 10²). The *hâzôzêrah* was the sacred clarion, and was closely connected (mostly in P and Chron.) with the later temple service as described in Chronicles. It was a more musical instrument than the *shôphâr*, and was used almost exclusively by the priests. As a secular instrument, the *hâzôzêrah* is mentioned in Hos 6⁸, together with the *shôphâr*, as used to signal the approach of an invading army. 'Previously to the Exile,' says Cheyne (*ad loc.*), 'the cornet (*shôphâr*) and the trumpet (*hâzôzêrah*) were probably different names for the same instrument, as the Law (Nu 10¹⁻¹⁰ 31⁴) prescribes the use of the silver trumpet in cases when, according to the prophetic and historical books, the cornet or *shôphâr* was used. In writings of post-captivity origin (Ps 98⁶, 1 Ch 15³⁸, 2 Ch 15¹⁴) they appear to represent different instruments, or rather slightly different varieties of the same instrument.' Perhaps in 2 K 11¹⁴ the *hâzôzêrah* is a secular instrument (so *Oxford Hebrew Lex.* p. 348). Mostly it was the *shôphâr* that was used in war as a signal either for assembly (Jg 3⁷, 2 S 20¹), attack, or retreat (2 S 2³⁸). We cannot tell whether it was the *shôphâr* or *hâzôzêrah* that is referred to often in the Books of the Maccabees (e.g. 1 Mac 3³⁴ σάλπιγξ, 4⁴⁰ 'trumpeted with trumpets of signals,' 5³¹ etc.). The watchman blew the *shôphâr* to raise an alarm or to indicate impending danger (Am 3⁶, Jer 6¹, Ezk 33⁶), and Moore (on Jg 6³⁴) renders *shôphâr* by 'war-horn.' In the narrative of Gideon (Jg 7¹⁹) there seems a large supply of horns in the camp, but in v. 8 it is expressly said that the troops that were sent home left their horns with Gideon, thus enabling him to furnish each of his 300 men with a *shôphâr* (see Moore, *Judges*, p. 203 ff.). In the Jubilee year the *shôphâr* was sounded on the 10th of Tishri as a signal (Lv 25⁹ P), and this may be the origin of the synagogue usage to sound the *shôphâr* on the conclusion of the Day of Atonement. Possibly, however, this is connected with the custom of sounding a trumpet (*hâzôzêrah*) in the temple at the beginning and end of the Sabbath (T. Jerus. *Shabbath* xvii. 16a; Bab. *Shabbath* 35b; Jos. *Ant.* iv. ix. 12: 'the top of the Pastophoria, where one of the priests usually stood and gave a signal beforehand in the evening with a trumpet at the beginning of every seventh day [Friday evening], as also in the evening when the sabbath day was finished, giving notice to the people when they were to leave off work, and when they were to go to work again').

Reverting to Bible times, a blast of trumpets announced an important event such as a royal accession (1 K 1^{34, 39} the *shôphâr* is named, but the *hâzôzêrah* in 2 K 11¹⁴), and the popular joy was aided in the same manner on other occasions (2 S

6¹⁸, cf. Ps 47⁹). Liturgically, the *hâzôzêrah* was the priestly instrument *par excellence* (the Levites had several other instruments). The silver trumpets were blown at the beginning of each month (Nu 10¹⁰), but the *shôphâr* on the New Moon of Tishri (see Kirkpatrick's notes on Ps 81).

The Talmud (*Mishna, loc. cit.*; Talm. Bab. *Roš Hashana* 26b) explains that the silver trumpets were not omitted on the 1st of Tishri, but that besides these a *shôphâr* (of straight ibex horn with a golden mouthpiece—an addition unlawful except in the temple) was sounded, its notes being made to predominate over the trumpets.

The silver trumpets were sounded at the daily burnt-offering (2 Ch 29²⁶⁻²⁸, Nu 10¹⁻² 10¹⁰), and at the three pauses in the singing of the daily psalms (a later introduction) three blasts (nine in all) were sounded from the silver trumpets, and the people fell down and worshipped (2 Ch 29²⁸ etc.). There seem to have been 7 trumpets in the Levitical orchestra (so Büchler, *ZATW*, 1899, p. 329, on basis of 1 Ch 15²⁴, Neh 12⁴¹). On the prostration as signalled by the trumpets see also Sir 50^{16, 17}; *Mishna, Tamid* vii. 3. Trumpets were also used on semi-religious occasions of joy, and particularly at the Ceremony of the Water-Drawing at the Feast of Tabernacles (*Mishna, Succah* v. 4), a ceremony which is very ancient, and may even underlie Is 12².

I. ABRAHAMS.

TRUTH.—See FAITH.

TRUTH.—The usage of Holy Scripture in respect to words expressive of the idea of 'truth,' in its broadest signification, is a point of considerable interest and importance. The study of it illustrates the influence of Hebrew training upon the writers of NT, and brings into relief characteristics of the ethical and religious thought both of OT and NT which are full of profound instruction.

i. THE OLD TESTAMENT.—The verb נָתַן—from which נָתַן and נָתַן, the words with which we are principally concerned, are derived—signifies to support, sustain.

In the Qal it is used of a nurse carrying a child (Nu 11¹³, 2 S 44, Ru 4¹⁶), and more generally of those who have the charge of rearing children (2 K 10¹⁻⁵, Is 49²³, Est 27); in the Niphal, of those who are carried (Is 60⁴). Again of that which is firmly founded, as 'a sure house' (1 S 2³⁵ 25³⁵, 1 K 11³⁸, and cf. 2 S 7¹⁶), of a firmly fixed nail (Is 22^{23, 25}), of national stability and prosperity (2 Ch 20²⁰, Is 7⁹); of that which continues long (Dt 28⁵⁰); of waters that are unfailing (Is 33¹⁶, Jer 15¹⁸); of Samuel established as a prophet (1 S 3²⁰); of words being established—i.e. verified—God's words through His prophets (1 Ch 17^{22, 24}, 2 Ch 19^{6, 17}, Hos 6⁸), and of the word of men (Gn 42²⁰), and, in a remarkable passage, of those who have a character for uttering sentiments that are true, showing knowledge of human life and its laws, etc. (Job 12²⁰); lastly, in a distinctly ethical sense, of one trustworthy in ordinary human relations (Pr 11¹³ 25¹³ 27⁸, Neh 13¹³, Is 57²), or unwavering in his loyalty to Jehovah (Ps 78³⁷), faithful in the fulfilment of a trust divinely committed (Nu 12⁷, 1 S 2³⁵ 22¹⁴); also of God's faithfulness (Is 49⁷ 55⁸, Jer 42⁵, Dt 7⁹, Ps 137⁸ 89³ 111⁷).

The Hiphil has the sense to put confidence in, to believe, either specific declarations of God or of man (Gn 15⁶ 45²⁶, Is 53¹, Jon 3⁵ etc.), or persons, again either God (Dt 1³², 2 Ch 20²⁰ etc.) or man (Jg 11³⁰, 2 Ch 32¹⁶ etc.). Comp. also Job 39¹² of putting confidence in the wild ox, and Job 41¹⁸ 15¹⁸ of God, 'He putteth no trust in his holy ones,' and Job 13¹ 'to trust in vanity.' It is also used absol. Is 7⁹ 23¹⁸ etc. There are more special applications at Dt 28²⁶, Job 24²¹ 39²⁴.

The noun אֱמֻנָה a pillar (2 K 18¹⁶) illustrates clearly the signification of the root. For the ethical idea connected with it we have analogies in אֱמֻנָה made firm, fixed, hence morally directed aright, steadfast; and אֱמֻנָה (Aram.) stable, true; cf. אֱמֻנָה (Aram.) to make firm, and Heb. אֱמֻנָה to station oneself.

The senses in which אֱמֻנָה is used correspond on the whole very closely with those of the verb, and so, to a considerable extent, do those of נָתַן. The former word, however, sometimes has a purely physical meaning: this the latter never has, while (unlike the former) it is also used to describe a quality of speech or thought in a manner not distinguishable from that in which the term 'truth'

commonly is among ourselves. In the following analysis the two words will be taken together; this is most convenient, because their meanings overlap. But references to the former are printed in thick type.

1. *Steadiness*, Ex 17¹² (on the construction see Gen.-K. § 141^d).
2. A *set, or fixed, office*, or perhaps a *trust* (as RVm in some places), 1 Ch 4²² 26 31, 2 Ch 31¹⁵ 18.

3. *Loyalty to obligations and engagements, uprightness, honest dealing*, as between man and man, Jg 9¹⁵ 16 19, Ps 37², Jer 81³; perhaps also Gn 42¹⁶. *ἰσχύς* in this sense is frequently joined with *ἡγάπη*, kindness or mercy—so in Gn 24²⁹ 47²⁹, Jos 21¹⁴, Pr 3³ 10⁶ (cf. also Pr 20²³, included under headings 5 and 9, for their conjunction as Divine attributes. For the general purport of the combination see the latter place).

4. *Honesty and fidelity* in respect to a charge committed to one, 2 K 12¹⁵ 23⁷, 2 Ch 31¹² 24¹², Neh 7².

5. *Justice* in a specific sense, that which is in accordance with rights, Hos 4¹, Dn 8¹². So also Pr 12¹⁷ ('he that uttereth truth—declareth what is just'). Similarly Jer 7²⁸, Is 50⁴. As a quality of judges and kings, 2 Ch 19⁶, Ex 18²¹, Est 1⁸, Pr 20²⁸ 29¹⁴. This characteristic is emphatically applied to the government of the Messianic king, Is 11⁵, Ps 45⁴, Is 10⁵ 42⁹.

6. Of a state of true national well-being, which would be specially realized in the promised times, frequently coupled with 'peace'. As the Heb. for 'peace' implies *health, soundness*, so that for 'truth' implies *stability*. But the word 'truth' may also, from its associations, suggest a condition in which justice prevails in all social relations (Is 33⁶, Ps 85¹⁰ 11, Jer 33⁶), also 'peace of truth,' i.e. 'assured peace,' Jer 14¹², and more generally 2 K 20¹⁹, Is 30⁸, Est 9³⁰, Ec 9¹⁶ 19.

7. *Faithfulness* to God, as shown by zeal for His worship, the avoidance of the worship of false gods, and diligence in keeping all His commandments. Justice between man and man is included, because He ordains it. Sometimes it is difficult to say whether most stress is laid on one or another part of this complex idea. The reference, however, seems, considering all the associations of the word, to be most often to the faithfulness shown in outward conduct, even in the phrase 'in truth'; other expressions in the same contexts refer to inward sincerity, Jos 24¹⁴, Jer 2²¹ (cf. 'children that will not deal falsely,' Is 63⁹ 42, Ps 119³⁰ (cf. v. 30), 2 Ch 31²⁰ 32¹, Is 12²⁴, 1 K 24³⁶, 2 K 20³, Is 10²⁰). Yet at Ps 145¹⁸, Is 48¹ 'in truth' = *sincerely*, in contrast with hypocrisy. Cf. also Ps 51⁶. The expression 'I have walked' or 'I will walk in thy truth' (Ps 26³ 86¹¹) may on the whole most probably belong to this heading; that is to say, 'Thy truth' may mean the faithfulness (towards Thee) which Thou hast appointed. But 'walking in God's truth' might also possibly mean 'walking in reliance on God's faithfulness.'

8. *Confidence, trust*, Hab 2⁴; probably, however, the meaning here also is 'faithfulness' (RVm), in which case this passage should be placed under 3.

9. As a Divine attribute; (a) God's *constancy* to His people, the *faithfulness* with which He had fulfilled or would fulfil His covenant with Abraham and his descendants or with David (Gn 24², Hos 21² 30, Mic 7²⁰, Ps 93¹ 2 4 5 16 24 32 49 68² 100⁵ 115¹ 117⁴ 119⁹⁴ 131 130); also in regard to all who serve Him (Gn 32¹⁰, Ps 25¹⁰ 30⁶ 40¹⁰ 11 54⁵ 57¹⁰ 71²⁸ 86¹⁵ 88¹¹ 92¹ 103⁴ 138² 143¹ 3, Pr 14²², Is 38¹⁸ 19). It is also recognized that alike in the case of the nation (Le 22²⁵, Neh 9³³), and of the individual (Ps 119⁷⁰), calamities do not prove that God has failed in faithfulness. We meet, also, with the prayer or wish that God may show His truth (2 S 2⁶ 15³⁰, Ps 61⁷). In the great majority of the passages, *ḥēdā* given under this head, *ḥēdā* 'mercy' is coupled with 'truth.' These two words are doubtless to a certain extent complementary, the one as expressive of a free compassion and favour which is ever fresh, the other of a fidelity to promises. But there is a danger of pressing this contrast too far, as Wendt seems to do, *SK*, 1883, p. 520. When society was less organized and rights could be less easily enforced and were even less determinate, the spirit of mercy was often required to dictate the doing of truth (or justice). Moreover, love is at all times the true motive for the doing of justice, and no other is likely to suffice if it be a question of justice in those many relations of life with which law cannot interfere; while at the same time the action of true love must ever be controlled by the law of justice. This applies where the two words are conjoined in speaking of human action (see above, No. 3). But so, also, the thought that God's truth proceeded from His mere goodness is frequently suggested in OT, and, on the other hand, that His mercy is an exhibition of His truth. God's own love is closely associated with His righteousness (comp. the usage of the word *ḥēdā* in OT; see also Ps 62¹²). Some other combinations should be compared, esp. 'the light of God's countenance,' i.e. His favour and 'his truth' (Ps 25⁴ 43³), 'his righteousness' and 'his truth' (Ps 40¹⁰, Zec 8³; cf. also Dt 33⁴).

(b) Truth seems also to be contemplated more generally as one of the great elements in God's character, Ex 34⁶, Ps 36⁶ 119³⁰. He is the true God, as contrasted with the false gods who are but lying vanities (Ps 31⁶ 6, 2 Ch 15³, and Jer 10¹⁰, where 'the living God' is a parallel expression). Hence His works are wrought in faithfulness, Ps 33⁴ 5 117¹ 109 69¹³, Is 25¹. His commandments also are true in that they are firmly established, that they are not subject to change, that those who observe them will certainly be rewarded, and those who transgress them punished, Ps 119³⁶, 119¹⁴² 151 160, Neh 9¹³, Pr 11¹⁸, Is 61⁸.

VOL. IV.—52

10. Of the utterances of prophets (1 K 17²⁴ 22¹⁶, 2 Ch 18¹⁸, Is 43⁹, Jer 23¹⁸ 23⁹); of a vision that does not mislead, Dn 8²⁶ 10¹. 'The writing of truth' is the book of destiny, Dn 10²¹; cf. 11².

11. Truth, in the sense in which we commonly employ the term, for the agreement between language and facts whatever these may be; 1 K 10⁶, 2 Ch 9⁶, Dt 13⁴ 17⁴ 22²⁰, Jer 9⁶, Ps 15⁴ ('in his heart' here should be 'with his heart,' i.e. cordially, gladly), Pr 12¹⁹ 14²⁵ 22²¹.

12. Divine revelation (Mal 2⁶, Dn 9¹⁵); or that true philosophy, that knowledge of the order of the world and of life, to which the wise have in fuller or less measure attained (Pr 8⁷ 23²², Ec 12¹⁰); with this last sense cf. the use of the verb at Job 12²⁰.

(The noun *ḥēdā* occurs in sing. at Dt 32²⁰, and in pl. at Pr 13¹⁷ 14⁶ 20⁴, Is 26² in sense 'faithfulness,' to which Ps 12¹ 31²⁸ should perhaps be added (so RVm); but in these two passages it may be pass. partic. of *ḥēdā*, and mean 'the faithful' (so RV). *ḥēdā* in Is 25¹ is taken in same sense, but the phrase of which it forms part is thus rendered difficult, and the pointing may be wrong. On *ḥēdā* see AMEN).

In the case of both words it is easy in the vast majority of instances to trace the connexion with the signification of the root, which, ethically regarded, conveys the notion of constancy, steadfastness, faithfulness. But there are secondary meanings, and the precise train of ideas by which these were reached cannot be considered certain. Thus truth in the sense of civil justice—to which, in some passages at least, it approximates—may be derived from the general notion of faithfulness, and with this—when it is a question of a social state in which justice prevails—the notion of stability, which brings us still nearer to the original meaning of the root, may be united. Since not merely *ḥēdā* but *ḥēdā* is used in this way, some such explanation seems on the whole the most likely. Yet it may also be supposed that justice in giving or procuring judgment is called truth, simply as being in agreement with the facts. The same view of truth may also, with even more probability, be suggested, when it is predicated of speech or of thought. Nevertheless, the origin even of this application may have lain in the circumstance that truth-speaking is part of the character of a faithful man; or again, the intention may have been to describe words that are well founded, based upon facts, and therefore firm. This idea of an underlying reality may probably be traced in the use of the term to describe God's revealed will, or the knowledge of the wise. It may not be unnecessary to add a caution that we must not so insist on giving effect to the force of the root as to exclude other ideas which may have entered in the course of the history of the word, and thus to limit the range of its meaning.

Moreover, the various senses of a word, even after they have once been differentiated by custom, may act and react upon one another in their further use. And thus there can be little doubt that the conception formed of religious and intellectual truth must have been more or less affected by the various associations of the term which had come to be employed to designate it. In particular, the contemplation of truth as an attribute of the Divine nature and operations must in devout and reflective minds have promoted a comprehensive and profound view of the quality. It will be important to bear this in mind when we pass on to consider the meaning of 'truth' in the NT. First, however, we must briefly notice the usage of the LXX, whereby the Greek language itself, which the NT writers were to use, was in a measure re-minted.

The verb *ἵσταναι*—to pass over the ptep. of *ἵσταναι*, meaning 'a nurse,' or having kindred significations to this—is represented by *πιστεύω* (Niph.), *πιστεύω* (Niph. and Hiph.), *πιστύνω* (Niph.), *πιστός εἶναι*, or ptep. *πιστός* (Niph.). *ἵσταναι* 20 times by *πιστός* and once adjectivally by *πιστός*, 22 times by *ἀληθεία* (20 of these being in the Psalms, 8 in Ps 88 (89) alone; the other two are 2 Ch 19⁶, Is 11⁵), twice by *ἀληθινός* (Is 25¹ 29⁹). *ἵσταναι* in nearly four-

fifths of the passages in which it occurs is rendered by ἀλήθεια, 12 times by ἀληθινός, a few times by ἀληθής and ἀληθῶς, 12 times by δικαιοσύνη or δίκαιος, and once by ἐκρημοσύνη.

The difference in the treatment of πῶς and πῶς shows a sense, which is up to a certain point correct, of the difference between them in meaning. One of the most instructive points, however, in connexion with our present subject is the practice of the LXX in regard to the rendering of the former word. Broadly speaking, πίστις or πιστός is used where it is a question of human character or conduct, ἀλήθεια and its derivatives with reference to Divine.

Πίστις is, however, attributed to God once, acc. to Qm̃, at La 32¹; the adverbial phrase ἐν πίστει is also used a few times of God, Ps 32 (33)⁴, Hos 22¹, Jer 35 (28)⁹ 39 (32)⁴¹, and the epithet πιστός is applied to God, Dt 7⁹ 32¹, and to the Divine testimony, covenant, etc., Ps 18 (19)⁷ 88 (89)²⁸ 110 (111)⁷, Is 55¹. ἐν ἀληθείᾳ is used in a charge to judges, 2 Ch 19⁴, ἀλῆθες of human character, Neh 7²; a few other similar instances might be given; ἀλῆθες is used for πῶς at Is 11⁵ to describe an attribute of the Messianic king. It may be further noted here that πίστις is only once used to render πῶς with reference to God, and there only in the phrase ἐν πίστει (Jer 31 (32)⁴¹). πίστις at Pr 14²² refers, according to LXX, to men.

The idea of 'faithfulness' is, as a matter of fact, very prominent in OT in connexion with the Divine character, and is undoubtedly conveyed by the word πῶς, used of God, and from this point of view would have been best represented by πίστις or πιστός. But the LXX translators seem to have felt that the ordinary associations with these words were too purely human. ἀλήθεια was a word of larger meaning, and, though the same ideas were not connected with it by reason of its derivation and history, it conveyed, even according to classical usage,—though especially, of course, that of the philosophical writers,—the notion, not simply of agreement between speech and fact, but of *reality*. This helped to make the word serviceable as a rendering alike of πῶς and of πῶς. At the same time, the new contexts into which it was brought could not fail to have an effect upon its signification. Its former use could scarcely make intelligible such expressions, for instance, as ἐξαποστῆλλειν ἀλήθειαν (Ps 42 (43)³ 55 (57)³), or ποιεῖν ἀλήθειαν (said of God Gn 47²⁰ etc., and of men Jos 2¹⁴ etc.). It is not, however, to be supposed that the translators either intended, or would have been able, to transfer to ἀλήθεια all the associations of the original words. But it acquired a connotation which was partly the result of its classical usage—for on this side, also, the biblical use received enrichment—partly of the Hebrew words for which it now stood. Lastly, the occurrence of ἡ ἀλήθεια repeatedly in books of the Apocrypha, in remarkable sayings, in the sense in which we have met with πῶς two or three times in the Supiential books of the Canon, for the sum of true knowledge, or Divine revelation, deserves to be noticed. *E.g.* see 1 Es 3¹² 43⁴¹, Sir 4²⁵ 28.

The use of ἀληθής and ἀληθῶς in LXX need not detain us; there is nothing in the case of either that calls for special remark, with the exception that once the former is applied as an epithet of a man. But the use of ἀληθινός must be examined. The effect of the termination -ινος is to draw attention, as it were, to the presence of the quality denoted by the root, in that to which the epithet is applied. Sometimes ἀληθινός does not practically imply more than ἀληθής with a certain amount of emphasis on it, *e.g.* 3 (1) K 10⁶. But in other places ἀληθινός signifies in a more specific manner that the thing is what it professes to be, or that it really corresponds to the idea of the name given to it. This seems to be the force of the word at 2 Ch 15³—'for a long while there was in Israel no God who was truly such.' But this sense is not common in

LXX. Again, it expresses the notion of trustworthiness as an attribute of persons, or of their habitual words and deeds. Evidently, this imports something deeper than simply the truth of a particular saying or report can. This appears to be the commonest meaning in the LXX, and we can trace in this the influence of the Hebrew (*e.g.* Ps 18 (19)⁹ 85 (86)¹⁸, Is 59⁴, Jer 22¹). In Zec 8³—ἐληθῆσεται ἡ Ἱερουσαλὴμ πᾶσις ἡ ἀληθινή—there is not specially the idea of trustworthiness, but it is asserted that the character of Jerusalem should be that of a city full of truth.

ii. THE NEW TESTAMENT.—In NT the conception of 'truth,' while it retains traces of its previous biblical history, is greatly enlarged and deepened, especially in the writings of St. Paul and St. John. It will be most convenient and instructive to examine the idea separately, in the first instance, in different writers or groups of writings. The Synoptics and Acts will form one such group, which will not detain us long. Next, we will take the Epp. of St. Paul. Epistles other than those of St. Paul and St. John may most suitably be considered immediately after those of St. Paul, as their usage resembles his, on the whole, most nearly. Lastly, we will take the Johannine writings; the idea of truth in these, or, to speak more accurately, in the Gospel and the Epp., has important elements in common with that in St. Paul, but there are also significant traits characteristic of each writer.

1. *Synoptics and Acts.*—The few instances of the occurrence of ἀλήθεια and its congeners have little that is distinctive about them. It will suffice to notice (a) the use of ἀλῆθες to describe character, not simply speech or doctrine, Mt 22¹⁶ = Mk 12¹⁴; (b) ἐν ἀληθείᾳ and ἀλῆθες in the mouth of Christ (Lk 4²⁵ 9² 12⁴⁰), where it may be compared with His use of Ἀμῶν, and is probably a Greek equivalent for that word, and doubtless is intended to convey the same earnestness of asseveration; (c) τὰ ἀληθινά, of the true riches (Lk 16¹¹), where we cannot but be reminded of the use of ἀληθινός in regard to the true bread, light, etc., in the Fourth Gospel, which must be considered presently.

We do not find in this group of writings any examples of πιστός used of God or Christ, or of πιστός as a Divine attribute.

2. *Epp. of St. Paul.*—I. There are two passages (Ro 3⁷ 15⁹) in which ἀλῆθες signifies the Divine characteristic of *fidelity*, just as πῶς and πῶς so frequently do in OT. In the context of the former place, vv. 3, 7, πιστός as an attribute of God, and the contrast between it and human ἀπιστία should be observed, also that between ἀλῆθες and ψευτής, ἀλῆθες and ψεύσμα, and that which is implied between ἀλῆθες and ἀδικία. At the same time there is ground for Cremer's remark, that the substitution of ἀλῆθες for πιστός as the argument proceeds, shows that ἀλῆθες is the word of larger meaning.

πιστός is strikingly used by St. Paul as an epithet of God in connexion with the thought of the new pledges which God has given in Christ and through the mouth of His servants and the work of the Spirit. See esp. 1 Co 1⁹, 1 Th 5²⁴, also (where the reference may be more general), 1 Co 10¹³, 2 Th 3³, 2 Ti 2¹³. The same quality of fidelity and trustworthiness is attributed, it would seem, to Christ at 2 Co 11¹⁰, where the apostle claims that this ἀλῆθ. Χριστοῦ is reflected in himself, Christ's servant. Cf. also Ro 9¹, and consider as illustrating the thought 2 Co 11²⁰. At Eph 4²¹ πᾶσις ἵσταν ἀλῆθες ἐν τῷ Ἰησοῦ has a somewhat different force (see below).

ii. But far more commonly ἀλῆθες, generally with the def. art. prefixed, denotes not a quality of a person, Divine or human, but a body of doctrine, though it is always the ascertained will of God which is so designated. In Ro 18²⁶ 28²⁰ it refers to Divine truth, imparted to man through reason and conscience and the laws of nature, as well as in a more specific manner to the Jews. But far more often St. Paul describes thereby the Divine revelation in Christ, the substance of the apostolic message, the gospel. See esp. Eph 1¹³, where 'the word of the truth' is placed in apposition with 'the gospel of your salvation.' See also 1 Ti 3¹⁵ 6², 2 Ti 2¹⁸ 18³⁸ 4⁴, Tit 1¹⁴, in all which places 'the truth' is plainly contemplated as in some sense formulated. It is to be believed (2 Th 2¹² 13), known (1 Ti 2⁴ 2¹⁴, 2 Ti 2²⁵, Tit 1¹), loved (2 Th 2¹⁰). On comparing these passages it must be evident that ἡ ἀλῆθ. τ. εὐαγγ. (Gal 2¹⁴, Col 1⁵) likewise means not the truthfulness of the gospel, but 'that truth which is set forth in the gospel.' At 2 Co 4⁶ 13⁹ also 'the truth' seems to have the same meaning.

In several passages where the def. art. is omitted, this same object appears to be intended, and the purpose of the omission is only to lay special stress upon its character as truth (2 Co 6⁶, Gal 5⁷, 2 Th 2¹³, 1 Ti 2¹⁴, 2 Ti 2²⁷ 3⁷). At 1 Ti 2⁷ also—ἀποστολικὴ ἰδὼν ἐν τῷ πνεύματι καὶ ἀληθείᾳ—the πιστός and the ἀλῆθες seem each to be the subject-matter of St. Paul's teaching presented under two different aspects. So, again, at Eph 4²¹ there is plainly a reference to knowledge that has been imparted in the words,

'Ye did not so learn Christ if so be that ye heard him, and were taught in him, even as truth is in Jesus.' But the moral characteristics and contents and effects of the doctrine appear clearly from the context. St. Paul declares that the true reception of it must render it impossible for them to practise sins that were common among the Gentiles. And he goes on to speak of the old man as, on the other hand, 'waxing corrupt after the lusts of deceit,' while truth is one of the determining principles of the whole nature of the new man: 'After God' he 'hath been created in righteousness and holiness of truth.'

The ethical qualities of 'the truth' may be not less forcibly illustrated from some of the passages enumerated above in which the def. art. is used. 'The truth' commends itself not merely to the intellect but to the conscience of man, by what it is (2 Co 4²). The principle that is most directly adverse to it is *ἀδυσία* (Ro 2⁸, 2 Th 2^{10, 12}), the very same that is contrasted with *δικαιοσύνη* as an attribute of God (Ro 3²⁵). The strength of the apostle and his fellow-workers lies solely in the power which is inherent in that which they teach by virtue of its nature (2 Co 13⁹), and the sense of this lays them under the obligation to practise the utmost sincerity in word and deed (2 Co 4² 6¹³).

iii. As might be expected from what we have already seen, St. Paul shows a high sense of the value of truth as an ordinary human virtue (1 Co 6⁸, 2 Co 7¹⁴ 12⁹, Eph 4²⁵ 6¹⁴, 1 Ti 2⁷).

iv. *ἀληθινός* occurs but once in the Epp. of St. Paul, at 1 Th 1⁹, as an epithet of God. It marks out the God who is really God in contrast with false gods. (Cf. in LXX 2 Ch 15³ and Is 65¹⁶).

3. *Epistles other than those of St. Paul and St. John.*—*Ἀληθινός* occurs 7 times in this group (He 10²⁸, Ja 1⁸ 3¹⁴ 5¹⁹, 1 P 1²², 2 P 1¹² 2²), and appears in every instance to mean, as in 2 ii. above, the doctrine delivered by the apostles of Christ. Several of the same characteristics of this 'truth' might be illustrated from them. The Divine attribute of 'faithfulness' is asserted in 1 P 4¹⁹, not only, as in OT or as by St. Paul, in regard to those who have been brought into a new relation to God 'in Christ,' but still more largely in the unique and remarkable phrase *πιστὸς ἀλήθεια*.

Before we pass on we must note the use in Ep. to Heb. of *ἀληθινός* in regard to the heavenly archetypes of the tabernacle and sanctuary of the old covenant (8² 9²⁴). At 10²², where it is applied to *καρπία*, its force may be expressed by 'thoroughly true' (cf. Is 8³², and see below 4 iii.).

4. *The Johannine writings.*—i. *Ἀλήθεια* is used a few times for a simple quality inherent in a person (Jn 4²³ 8⁴⁴; there does not seem to be any other clear instance).

ii. Most commonly that is signified by it, the knowledge of which is of all knowledge the most necessary for man, and which was made known in and through Christ in a way that it never had been before. The connexion between 'the word' that is taught and 'the truth' appears 8³¹, 22 and 17¹⁷, and the evangelist declares that 'the truth came through Jesus Christ' (1¹⁷).

A portion of it only could be communicated by Christ to His disciples during His time on earth, because they were unprepared to receive it. And it can never be fully comprised in any formulas. Nothing could show this more clearly than its identification with a person—with Christ Himself (Jn 14⁶). Moreover, it evidently has intimate relations with the ideas of 'the light' and 'the life' by which He is also described. The manifestation of the truth gives light; the inward appropriation of it brings life. After the withdrawal of the visible presence of Christ it was to be the office of the other Paraclete, who was promised, to teach the truth (Jn 16¹³). He is called 'the Spirit of the Truth' (Jn 14¹⁷ 15²⁶ 16¹³, 1 Jn 4⁶), chiefly, perhaps, because of this function which He is to discharge, but partly also, it may be, on account of its very nature; for the spiritual is pre-eminently the true, the real (cf. Jn 4²³ 24). It is even said of the Spirit, as well as of the Christ, that He is 'the Truth' (1 Jn 5⁶). Yet His relation to the Truth as revealed in Christ is carefully defined (Jn 16¹³ 16).

The truth has been and is commended through testimony,—that of the Baptist (Jn 5³³), that of Christ Himself (8⁴⁰ 18³⁷); and the testimony is believed by those in whom there is a right moral disposition (ib. cf. also 3²⁴). The function of the Spirit, too, is described as 'bearing witness' (1 Jn 5⁷). His witness must be primarily inward, to the human spirit; yet it is to be remembered that He acts upon each individual not only directly, but through others, and through the whole Body of Christ.

If a certain moral aptitude is a condition for receiving the truth, so also, when received, it has profound moral effects. It makes free (Jn 8³²). The recognition of the truth and conformity to it brings man's being into the state meant for it; the discords and contradictions involved in a state of sin are removed. This freedom is described from another point of view as holiness (17¹⁹).

In 1 John the truth in action and thought and character is contrasted with viciousness in conduct and hollow self-complacency (1 Jn 1⁸ 2³⁴ 3¹⁹). But even in such passages the truth is not to be thought of merely as a quality, the presence or absence of which in human characters may be noted. Rather it is the same truth which is elsewhere regarded as an object of knowledge, considered here in its practical consequences. The unity of thought, the prevalence of the same dominant ideas, throughout the Johannine Gospel and Epp., are decisive for this view. And indeed we can sometimes mark the more absolute and the more concrete meanings of truth passing, as it were, the one into the other, as in 1 Jn 24, where it is implied that the commandments of Christ furnish the norm for truth of life. Again, where we observe similarity with OT language,—as in Jn 14¹⁷ (cf. *תָּרַךְ* joined with *אֱמָרָה* and *אֲמַרְנָה* Ps 40¹¹ 85¹⁰

etc., in LXX *ἀνέειπεν* and *ἀλλήλ.*), and *καὶ οὕτως ἀλλήλ.*, 1 Jn 16 (cf. Neh 9³³ etc.),—though the form of expression has doubtless been derived thence, other considerations must also be borne in mind in determining the meaning. Indeed in the former of these examples the substitution of *λέγει* for *ἀνέειπεν* employed by LXX should warn us to do this, as Cremer points out.

iii. *Ἀληθινός*, which occurs but 5 times in the remainder of NT, is common in the Johannine writings, and adds materially to the prominence of the idea of truth in them. It is unquestionably used sometimes in the Gospel and First Ep. to signify that a thing truly corresponds to the idea of the name given to it (Jn 19⁴² 6³⁴ 15¹, 1 Jn 2⁹). Some writers try to bring all the applications of it under this head. Thus Jn 7²⁴—*ἵνα ἀληθινός ὁ μαρτυρῶν ἐστὶν*—is explained by Bp. Westcott as meaning 'one who completely satisfies the conception of a sender. . . . God is described as true, not merely in so far as He gave a true message, but as one who really sent a messenger; a real Father, as it were, sending a real Son.' (He 10²² *ἀληθινός* *καρπία*—he renders 'a heart which fulfils the ideal office of the heart'). But such a thought seems in many cases too far-fetched. In particular, when applied to persons, it is more natural to take *ἀληθινός* to mean 'full of the quality of *ἀλήθεια*.' Where it is an epithet of *καρπία* (Jn 8¹⁶) or of *μαρτυρία* (19⁴²), it is a little more difficult to decide between the two views of its force, chiefly because they so nearly approximate. Judgment or testimony, which fulfils the idea expressed by the term, must be judgment or testimony which has the quality of, and corresponds with, truth. Yet the latter explanation is to be preferred as the simpler. This seems to be the force of the word in all the 10 places in which it occurs in the Apocalypse (3⁷, 14 6¹⁰ 15³ 10⁷ 16⁶ 11 21⁶ 22⁹), in which it is generally combined with other adjectives—*ἄγιος*, *δικαίος*, *πιστός*—and used to describe God or Christ, or the Divine ways, words, judgments. *Ἀληθινός* in this use of the word differs from *πιστός* only in having a somewhat larger meaning. On the other hand, at 1 Jn 5²⁰, in the concluding words of the verse, *οὗτος ἵνα ὁ ἀληθινός* *θεός*, 'the true God,' has the same meaning as at 1 Th 1⁹ (see above, 2 iv.), viz. as distinguished from false gods; and this may therefore be the meaning of *ἀληθινός* in the two preceding cases in the same verse, though the other shade of meaning would seem natural, especially in the second of them.

Whereas, then, in OT 'truth' is mainly thought of as a quality inherent in God or in men, especially the quality of steadfastness or fidelity, it is used commonly in NT in a more detached and larger sense for the real, that which indeed is, and which it is the proper function of the mind of man to occupy itself with and to apprehend. At the same time, this 'truth' does not appeal solely to the intellect. That it may be received, the moral dispositions of men must correspond with it; and its reception will further take effect upon character. In conforming himself to it in his life lies man's only security for well-being. The associations which the word had acquired through OT usage helped to secure for the conception those elements to which this deep moral and religious significance is due.

It appears, further, that the knowledge of the truth in its fulness has been rendered possible only through Divine revelation. The idea of revelation was no new one; but it is a point of great importance, not only that the contents of revelation should have been greatly extended, but that what before was known simply as the Will of God, or as Torah (Instruction), should now be called by the name which denoted agreement between statement and fact in common matters, or between a mental image and an external object, the opposite of illusion, fancy, or mere opinion. We have seen the beginnings of such a use of the term in a few instances in the later books of OT and in the Apocrypha, and Greek modes of thought may in a measure have facilitated it. The significance of the usage in NT lies in the actual application of it to the Christian revelation and in its frequency. Finally, after the idea has been abstracted and made comprehensive, it is once again connected with persons. The source of it, in this fuller meaning of the term, is found in the Divine nature, in the Father, in Christ, in the Holy Spirit.

Unless we impugn the historical trustworthiness of the Fourth Gospel, that presentation of the idea of truth which is characteristic of NT begins with the teaching of Christ Himself. St. Paul, however, would seem to have acquired his

view of it rather from the effect on his mind of faith in Christ than directly from any of His sayings. And in the case of St. John, too, it was doubtless the impression left upon him by the Person of the Lord which led him to perceive the meaning and power of the words on this subject which he has recorded. They and their fellow-believers felt that in the doctrine of Christ, and in the character and counsel of God, manifested in the Person and the life, death, and resurrection of Christ, they had been permitted to grasp that which is substantial and abiding, and to which the name 'the true' belongs of right, in a way that it does to nothing else. But a standard of reality had thus also been furnished them, of which the effect may be seen in that transparent sincerity of temper and high estimate of the value of ordinary truthfulness which they show, and which is the more noteworthy by reason of the contrast which it offers with the usual tendencies both of Oriental and of Greek character.

The term 'the truth,' as applied to Divine revelation, has in later generations been sometimes vulgarized, and often employed with too little sense of its ethical associations. On the other hand, the study of Nature and the study of History have in our own day, in consequence of the thoroughness and the improved methods with which they have been pursued, supplied a high ideal of intellectual truth. In the NT attention is undoubtedly fixed primarily on moral and spiritual truth, which in large degree rests upon evidence that is specially appropriate to it. Yet the spirit of the NT is favourable to the vigorous and fearless application to religious knowledge of the same tests, so far as it is amenable to them, as to other branches of knowledge; while a large conception of truth is suggested to the mind, which must embrace facts of every order, alike those which are known through sensible experience and that deeper reality in which even these must have their ground.

It cannot but be interesting to those whose mother-tongue is English that the word 'truth' has much the same range of meaning as the biblical terms which we have been considering; whereas in German *die Treue* has been kept to the meaning of constancy, and *die Wahrheit* denotes agreement between statement, or thought, and fact, and in the Romance languages the distinction between *fides* and *veritas* is maintained in the words derived from them.

LITERATURE.—H. G. Hoelemann, *Bibelstudien*, i. 1861; H. H. Wendt, 'Der Gebrauch d. Wörter *ἀλήθεια*, *ἀληθής*, und *ἀληθεία* im Neuen Testamente,' *SK*, 1883, also *Inhalt d. Lehre Jesu*, 1890, p. 199 ff.; Cremer, *Wörterbuch d. Neutest. Gräcität*, s.v. 1893 [Wendt appears to the present writer to force OT associations too much on passages of NT, forgetting the powerful new influences that were at work. On the other hand, Cremer makes a little too much, perhaps, of the analogies of classical usage]; Westcott, *Gospel of St. John*, Introduction, p. xiv ff.; Hort, *The Way, the Truth, and the Life*.

V. H. STANTON.

TRYPHÆNA (Τρύφαινα).—In Ro 16¹² St. Paul salutes two women, Tryphæna and Tryphosa, 'who labour in the Lord.' The names occur in Inscriptions of the Household, *CIL* vi. 4866, D. M. | VARIA · TRYPHOSA | PATRONA · ET | M. EPIVVS · CLEMENS | : 5035 D. M. | TRY-PHÆNA | VALERIA · TRYPHAENA | MATRI · B · M · F · ET | VALERIVS · FVTIANVS : 5343 TELESFORVS · ET · TRYPHAENA and others.

The name Tryphæna has a further interest in Christian tradition which may be shortly referred to. In the *Acts of Paul and Thecla* a considerable part at Pisidian Antioch is played by a wealthy lady who is called 'the queen Tryphæna.' For the existence of this person there is historical authority. A coin of

Pontus is known having on the obverse ΒΑΣΙΛΕΥΣ ΠΟΛΕΜΩΝΟΣ, on the reverse ΒΑΣΙΛΙΣΣΗΣ ΤΡΥΦΑΙΝΗΣ. This Tryphæna was daughter of Polemon, king of part of Lycania and Cilicia, wife of Cotys king of Thrace, and mother again of Polemon king of Pontus. She was great-granddaughter of Marcus Antonius, and consequently first cousin once removed of the emperor Claudius. She belonged to a family of great wealth and high repute in the eastern part of the empire which provided tributary kings for many of the small principalities there existing. We know that her son Polemon became a Jew, and it is very probable that Tryphæna may have belonged to that class of devout and honourable women mentioned in Ac 13⁵⁰ (see also Hogarth, *Authority and Archaeology*, p. 391).

A. C. HEADLAM.

TRYPHON (Τρύφων).—An officer of Alexander Balas, who, after the death of the latter, took advantage of the unpopularity of Demetrius to put forward Antiochus, the son of Balas, as a claimant to the throne (1 Mac 11²⁰). His real aim, however, was to gain the crown for himself, and this he accomplished after he had murdered in succession Jonathan the Maccabee (12²⁰⁻²¹) and Antiochus (13¹¹). His rapacity led Simon to appeal to Demetrius (13²⁴). The latter was organizing an expedition against Tryphon when he was himself made prisoner by ARSACES (14¹⁻²). In the end Antiochus Sidetes, the brother of Demetrius, attacked Tryphon, besieged him in Dor, and pursued him when he escaped thence to Orthesia (15¹⁰⁻¹⁴, 27-30). Tryphon was finally shut up in Apamea, where he committed suicide (Strabo, p. 668; Jos. *Ant.* XIII. vii. 2; App. *Syr.* 68). See, further, art. MACCABEES; and cf. Schürer, *HJP* i. i. 176, 246 ff.

TRYPHOSA.—See TRYPHÆNA.

TUBAL (טובל and תבול; LXX Θάβελ, A in Ezk 39¹ Θάβερ).—A people in Asia Minor, always (except in Is 66¹⁹ [MT], Ps 120⁵) named along with MESHECH. Lagarde (*Ges. Abhandl.* 254) identified the latter with the *Moschi*, and Tubal with the *Tibareni*, and this has been generally accepted. The Tibareni are mentioned by Herodotus (iii. 94, vii. 78), and are known to have dwelt east of the Thermodon in the mountainous district to the S.E. of the Black Sea. They are the *Tabal* of the Assyrian inscriptions (cf. Schrader, *Keilschr. u. Geschichtsforsch.* 155 ff., KAT² 82 ff. [COT i. 64 ff.]; Del. *Paradies*, 250 f.; Halévy, 193 ff.; Ed. Meyer, i. 245). In Gn 10² [P]=1 Ch 1⁵ Tubal is a son of Japheth; in Is 66¹⁹ [LXX] Meshech and Tubal are associated with Javan as distant peoples; in Ezk 32²⁶ they appear as peoples who have suffered severe reverses; in Ezk 27¹³ as trading with Tyre in slaves and vessels of copper; in Ezk 38²², 39¹ as among the chief allies of Gog. In Ps 120⁵ ('Woe is me that I sojourn with Meshech [LXX οἱμοι δεῖ ἡ παρακλία μου ἐμακρόνθ], 'woe is me that my sojourn is prolonged,' translating תבול), that I dwell beside the tents of Kedar'), Meshech and Kedar stand as types of savage peoples; as we say, 'it could not be worse among Turks and heathen' (Duhm, *ad loc.*).

See, further, next article.

J. A. SELBIE.

TUBAL-CAIN (טובל בן קין).—One of the sons of LAMECH, and brother of JABAL and JUBAL, Gn 4²² [J]. The MT (לִמְשֵׁךְ וְקַיִן וְיָבָל וְיֹבֵל), which is certainly corrupt, might possibly (although חַיִּים in the sense of 'cutting instrument' is a difficulty)

mean 'the forger of every cutting instrument of copper and iron.' It is likely, however, that *שֶׁל* was originally a marginal gloss to *שֶׁל* (Olshausen, Ball) or to *שֶׁל* (Holzinger, Gunkel), and that the words *שֶׁל* *הָיָה* (cf. vv. 20, 21) have dropped out before *לֵךְ*. The rendering would then be 'he was the father of all such as forge copper and iron.' The LXX (Θόβελ' και ἡ σφυροκόπος, χαλκεὺς χαλκοῦ και σιδήρου) supports the view of Wellh. (*Comp.*² 305), which has found general acceptance, that the name *תּוֹבִיָּא* alone stood in the original text, this Tubal being the *heros eponymus* of the Tibarenian metal-workers (cf. Ezk 28¹³ and the preceding art.), and that *שֶׁל*, the generic name for 'smith,' was afterwards added. The double name Tubalcain would thus have its analogues in such combinations as Jahweh-Elohim. Against Budde's reconstruction (*Urgeschichte*, 137 f.) of the text, which makes Lamech instead of Tubal-cain the subject of *וְהָיָה*, see Dillm. and Holzinger, *ad loc.* Cheyne (*Encyclopedia Biblica*, i. col. 626 f.) suggests that Tubal is 'a pale form of the god of the solar fire, Gibil or Nuku,' and that in the earliest form of the Heb. legend he was the instructor of men in the art of getting fire.

J. A. SELBIE.

TUBIAS, TUBIENI.—See TOB.

TURPENTINE TREE.—Only Sir 24¹⁴ AV (B *τερέμινθος*, RA *τερέβινθος*) 'As the turpentine tree [RV 'terebinth'] I [sc. Wisdom] stretched out my branches.' The Syr. has *ܪܗܕܘܕܐܦܢܐ*, i.e. the oleander, which appears to be an unfortunate guess of the translator, who did not understand the Heb. *אֵלֶּךְ* (?); so Ryssel in Kautzsch's *Apokr. ad loc.* See, further, art. TEREBINTH.

TURTLE, TURTLE DOVE (*תֹּר* *tôr*, *תְּרִיּוֹן*, *turtur*).—The Latin name of this bird is a reduplication of the Heb., and both refer to its well-known note. There are three species in Palestine and Syria, *Turtur auritus*, L., the true turtle dove, *T. risorius*, L., the collared turtle dove, and *T. Senegalensis*, L., the Egyptian turtle dove. The collared species is the largest, reaching 13 in. in length, and is found principally about the Dead Sea and in the Jordan Valley. It is an Indian species. It derives its name from a narrow black collar at the back of the neck. The palm or Egyptian turtle dove is smaller, being about 10 in. long. It is more widely distributed than the last species, but not as much so as the following. It also has a black collar. It nests by preference in palm trees, whence one of its names. The common turtle dove is not only general in distribution, but very abundant. It is about 12 in. long, and has 3 oblique coloured bands at the side of the neck. The Scripture references in the older books are to the bird as a substitute for the pigeon in sacrifice (Gn 15⁹, Lv 5⁷ etc., Nu 6¹⁰; cf. Lk 22⁴). The plaintive note and unresisting habits of the turtle dove are probably the characteristics alluded to by a psalmist, when he pleads that the gentle turtle dove shall not be delivered to the cruelties of the wicked (Ps 74¹⁹). Its voice is the harbinger of spring (Ca 2¹³). Its migrations are also alluded to (Jer 8⁷). The above references would apply equally to any or all of the species. The palm turtle could have been used for sacrifice in the wilderness; the collared turtle would have served in the plains of Moab; while the common turtle would be found in all parts of the land. The common Arab. name for the turtle dove is *terghull*. It is also called *şulşul*, *dubsi*, and *fâkhit*. There is the usual uncertainty as to the specific value of these names.

G. E. POST.

TUTOR.—Gal 4² only, 'The heir . . . is under

tutors and guardians,' i.e. as RV, 'under guardians and stewards,' Gr. *ὑπὸ ἐκτρέφουσιν καὶ οἰκονόμοις* (cf. Lightfoot, *ad loc.*). In its oldest use 'tutor' (Old Fr. *tuteur*; Lat. *tutor* a protector, from *tueor* to protect) means protector or guardian. Thus Fletcher, *Double Marriage*, v. 1—

'I'll have mine own power here,
Mine own authority; I need no tutor.'

The word still has this sense in Scots law: Freeman, *Norman Conquest*, v. 252, 'The guardian—the tutor in Scottish phrase—of the orphans and their land.' Cf. Knox, *Hist.* 423, 'Now when we are at our full maturitie, shall we be brought back to the state of Pupils, and bee put under Tutory?' J. HASTINGS.

TWELVE.—See NUMBER, vol. iii. p. 563^a.

TWIN BROTHERS.—See DIOSCURI.

TYCHICUS (*Τυχικός*), classed with Trophimus as *Ἀσιαῖοι*, i.e. natives of Asia (Ac 20⁴). They were, with other disciples, St. Paul's companions in travel from Macedonia as far as to Asia, and preceded him to Troas. Tychicus is mentioned four times in the Epistles of St. Paul. In Eph 6²¹⁻²² St. Paul says, 'That ye also may know my affairs and how I do, Tychicus, the beloved brother and faithful minister in the Lord, shall make known to you all things: whom I have sent unto you for this very purpose, that ye may know our state, and that he may comfort your hearts.' He was therefore the bearer of the letter to its destination, whatever that may have been. Tychicus had the same charge entrusted to him by St. Paul, a prisoner at Rome, in carrying the Epistle to the Colossians (4⁷⁻⁸), where he is called, in addition to the titles given above, St. Paul's 'fellow-servant in the Lord.' From 2 Ti 4¹² it appears that Tychicus was sent on a second occasion to Ephesus, most probably after St. Paul's first imprisonment at Rome. At this time his old companion Trophimus was close by 'at Miletus sick' (2 Ti 4²⁰). St. Paul also speaks of sending Tychicus or Artemas to Titus (Tit 3¹²) to Crete, and says that when he does, Titus is to 'give diligence to come unto him to Nicopolis.'* He may have been the other disciple (2 Co 8²³) with Trophimus (see TROPHIMUS) who carried the 2nd Epistle to the Corinthians from Ephesus to Corinth. One tradition makes Tychicus bishop of Chalcedon in Bithynia. In the Greek *Menology* (Dec. 9) he is said to have been bishop of Colophon after Sosthenes, and to have suffered martyrdom for the Christian faith.

H. A. REDPATH.

TYRANNUS (*Τύραννος*) is mentioned only in Ac 19⁹. When St. Paul, after spending three months in addressing himself to the Jews of Ephesus, using the synagogue for his place of preaching, found them determinedly hostile, he withdrew his adherents from the synagogue and began 'reasoning daily in the school of Tyrannus' (*καθ' ἡμέραν διαλεγόμενος ἐν τῇ σχολῇ Τυράννου*). The passage is enigmatical in its extreme brevity; but it may have been addressed to readers who were more familiar with the situation than we are.

The word *σχολή*, rendered 'school' in AV and RV, means leisure, and is frequently applied to the learned leisure of the contemplative or philosophic life as contrasted with the life of politics or business; hence it is frequently used to denote the written treatises produced in the philosopher's cultured leisure, or the lessons or lectures which he gives to pupils; and, finally, it is often applied, as here, to the place or building or room in which such lessons were given. Some such locality, already used for lecturing or teaching, was pro-

* This was previous to the writing of the 2nd Epistle to Timothy.

cured for the use of St. Paul when the synagogue ceased to be suitable. When we attempt to go beyond this, we find that the difficulties are many. The very reading is uncertain; and the difference is of the utmost importance for the sense.

(1) The reading which we have quoted follows the text of the great MSS $\kappa\alpha\beta$ (supported by many secondary authorities). It might be possible that the writer should designate in this bare way a school which belonged to a private individual, Tyrannus, otherwise unmentioned in the work, and necessarily obscure to all except his own contemporaries in Ephesus. A case which presents a remarkable analogy occurs in Juvenal, vii. 40, where a rich patron puts at the disposal of his humble poet-friend 'the house of Maculo' (*Maculonis aedes*),* a disused house in a remote part of Rome, which for some reason was familiar to the Roman public whom Juvenal addressed. But the illustration proves that this meaning cannot be accepted in Ac 19⁹. There is not the remotest probability that the writer of Acts was addressing an Ephesian audience, to whom 'the school of Tyrannus,' an obscure place belonging to a private person, was familiar. The only other possible interpretation of this text is that 'the school of Tyrannus' was a public building in Ephesus, which could thus be described by its stereotyped name.† It would then be necessary to understand that St. Paul, as a teacher of a new philosophy, lectured publicly in this building. It is well known that philosophical teachers commonly gave lectures or held discussions in this public fashion in buildings or localities freely open to the whole population, as Socrates and St. Paul held disputations in the Athenian agora, as the Stoics lectured in the Stoa Poikile and the Academics in the Academy. The custom is in keeping with the extreme openness and publicity of life in Greece or Italy, which was such that a schoolmaster is represented in a Pompeian wall-painting as holding classes in the open forum. Habitual use of a public building could hardly be made except with permission granted by the city or the magistrate charged with surveillance of the building (probably the *agoranomos*, corresponding to the Latin *aedilis*). Now, although St. Paul was evidently regarded not unkindly by magistrates and leading men in Ephesus (cf. Ac 19³¹⁻³⁵), yet it would be surprising that he should be accorded such formal public recognition; and it seems quite out of harmony with the general character of Pauline teaching that he should have accepted such a position, for recognition by a public official or body implies some submission to conditions and sacrifice of freedom. St. Paul's address to the Ephesian elders is far from suggesting any such legalized method of address during the period of his Ephesian ministry (Ac 20¹⁸⁻³⁵). Hence the almost unanimous opinion of scholars has rightly rejected the view that Tyrannus' school was a public building. Yet it seems necessary in that case also to reject the reading of $\kappa\alpha\beta$, etc. (adopted in RV), and return to the text of 'Western' type which appears in AV.

(2) This text in its various forms differs only by adding a word or words after the reading of $\kappa\alpha\beta$, etc.‡ The common reading adds *τις* after

* This is the MSS reading. Many editors follow the scholiast, who evidently had *maculosus*.

† The origin of the name would of course be obscure to us, on this view: it would be in keeping with Greek city life if Tyrannus was the donor, who built the *schola* and presented it to the city.

‡ Blass in his edition of the Western (Roman) Text, Leipzig 1890, prefers the reading *τὸ κατ' οὐρανόν*, following D: his reason is perhaps that this is characteristically Attic. He also strangely denies that the Western reading contained *τις* (though he accepted this in his earlier edition), in spite of the strong consensus of Western authorities for it.

Τυράννου: an exclusively and characteristically Western reading adds also *ἀπὸ ὧρας πέμπτης ἕως δεκάτης*. 'The school of a certain Tyrannus' must be a private, not a public, building or place; Tyrannus was either a teacher who ordinarily used it, or the private owner who granted the use of it whether for hire or free. In the latter case the situation would be similar to that in the passage just quoted from Juvenal, according to the reading of the scholiast and many editors: the patron grants to his literary friend the use of a poor old house belonging to himself. A certain individual named Tyrannus might on this interpretation have permitted St. Paul to use or to hire a *schola* which belonged to him: *τις* explains and apologizes for the mention of an unknown person. There can be no doubt that goodwill to St. Paul must have been entertained by the person who allowed him the use of this school. Even if he hired it, we may be sure that no actively hostile owner would have let it to him.

But the Bezan addition 'from the fifth to the tenth hour' strongly favours the interpretation that Tyrannus was a teacher or philosopher, who also used the *schola*. It was then obviously necessary to make some arrangement as to hours: Tyrannus continued to use the *schola* during the early hours of the day, while St. Paul used it from one hour before noon till two hours before sunset. This partition of the day is an interesting point, and true to ancient life. The customary time for teaching in Græco-Roman life began very early, probably soon after sunrise. Juvenal in his usual exaggerating way describes the teacher as already in school at work before sunrise by artificial light (vii. 222):* and it is established by many passages that the fifth hour was the usual time for stopping all work and business (Martial, iv. 8. 3, *prandium* being eaten between the fifth hour and noon). Thus the school would be vacated by Tyrannus at the fifth hour, and was then at the disposal of St. Paul till the tenth.

The full Western text establishes the meaning of an otherwise very obscure passage, and gives a natural and satisfactory sense. The shortest text implies a sense that is either un-Lukan or improbable. There seems no reason why the Western addition should be made, while there was considerable temptation to allow the words of the Western text to drop out, as they seemed quite unimportant to 3rd cent. students. These considerations make it probable that the full Western reading is the true Lukan text, and that part of the true text was lost from many authorities. We cannot think that both the long and the short readings are original Lukan (as Blass and others hold).

The possibility that Tyrannus may have been a Jew has been favourably regarded by some scholars. But this seems distinctly improbable. If Tyrannus was an unconverted Jew, he would have almost certainly been unfavourable, if not actively hostile, to Paul; and he would have been most unlikely to facilitate the apostle's work, especially as by doing so he would have incurred the strong dislike of his own people. The sequence of thought in the verse, 'he separated the disciples (i.e. from the Jews), speaking daily in the school of Tyrannus,' seems hardly reconcilable with the view that Tyrannus was a Jew. Moreover, the way in which 'a certain Tyrannus' is mentioned would hardly suggest that he was a convert. But it is an error on the part of some writers to urge the Greek name as any argument against the theory that Tyrannus was a Jew. The Jews of the great cities of Asia Minor had become very strongly Grecized, and Greek names were in ordinary use among them.

Further, Knowing points out that the daily meetings in the *schola* imply that St. Paul made his adherents separate even from the synagogue services of the Sabbath. It seems impossible that a Jew could have aided in such a purpose.

The name is given in D as *Τυράννιον τις*: this is certainly a mere corruption. The name Tyrannus is common in inscriptions, and several persons of

* So also Martial, ix. 63.

the name are mentioned in literary authorities; but Tyrannius is unknown. The form *Tyrannius* is a woman's name (neuter diminutive), like *Tuparris* (falsely accented, *CIG* 3730). W. M. RAMSAY.

TYRE (זֵר [11 times זֵר] *Zôr*, i.e. 'rock'; *Tûpos*; Tel el-Amarna tablets *Zuru*, *Zurri*; referred to by Jerome as *Σώρ*, *Πέτρα*, ἡ *Τυρίων πόλις*; Arab. *Sûr*). —i. SITUATION.—The modern small town of Tyre, built on the ruins of the once celebrated city, lies on a narrow strip of the Phœnician plain, about equidistant from Zidon and Acre. On the north the sandy coast-line runs up to the headland of Sarafend (Sarepta), and on the south the view is blocked by the high three-headed promontory, of which the middle point is the precipitous Ladder of Tyre (*Scala Tyriorum*). The ancient island, with its half mile of channel between it and the coast, is now a blunt headland, and there is nothing to remind the present inhabitants of the existence of the famous mole, and of the difficulties encountered in its construction. The pathway of 60 yards in width, along which the soldiers of Alexander rushed to the attack, is now half a mile broad, owing to the drifting up of the sea sand on the S.W. side.

It was from the island that the town received its name. The Rock, lying off, about a mile in length and three-quarters of a mile in width, was the special feature that caught the eye, both on land and at sea. And it was owing to the accommodation which the island provided for shipping, and the protection thus afforded to its inhabitants, that Tyre became the most celebrated maritime city of the ancient world. At these entrances of the sea Tyre sat like a pedlar spreading out his wares at a city gate, and became 'the merchant of the peoples unto many isles' (Ezk 27³). The island had two harbours, one on the north side and the other on the south, formed by the indentation of the outline, and extended by breakwaters. These harbours were called the Zidonian and Egyptian, much in the same way as the west gate of Jerusalem is called the Jaffa gate, and its northern the Damascus gate. The part of the town that was built on the mainland was strongly fortified, and in times of peace the inhabitants cultivated the neighbouring gardens, and received their supply of water by aqueduct from the great fountain now called *Ras-el-ain*, lying several miles to the south. As the wealth of Tyre increased, and the danger of military invasion became chronic, its inhabitants would come to regard the island as being not merely the storehouse of their merchandise, and a place of retreat in time of invasion, but as the actual city of Tyre. Thus the city on the shore, with its often-battered walls and scattering of peasant houses among the gardens by the aqueduct, was called ἡ *παλαιὰ Τύρος*, *Παλαιτύρος*, *Palætyrus*, *vetus Tyrus*.

According to a letter, quoted by Josephus (*Ant.* viii. ii. 7) as having been written by king Hiram to Solomon, the request for payment in grain is based on the fact that Hiram's people inhabited an island. The five years' siege by Shalmaneser iv., and that of thirteen years by Nebuchadnezzar, also seem to indicate that Tyre could not be attacked in the ordinary way.

Nothing now remains of the strength and splendour of the island fortress, except that on a calm day one may look from a boat, and see in the water along the rocky shore great blocks of the ancient breakwater and tumbled pillars of rose-coloured granite.

ii. ANTIQUITY.—In the time of Joshua, Tyre is mentioned as being a fortified city, and its character as a stronghold is also noted in 2 S 24⁷, Is 23¹⁴, Zec 9². It is included in the list of Phœnician towns visited by the Egyptian *mohar* in the time of Ramses II. Herodotus (ii. 44) states, on the

authority of the Tyrian priests of Melkarth, that the town was built about B.C. 2750. Josephus, on the other hand, informs us (*Ant.* viii. iii. 1) that Tyre was founded 240 years before the building of the temple, i.e. about B.C. 1217. Isaiah seems to be referring to a well-known claim when he speaks of the city 'whose antiquity is of ancient days' (23⁷). Strabo (xvi. ii. 22) calls it *ἀρχαιοτάτη πόλις Τύρος*.

iii. RELATIONSHIP OF TYRE AND ZIDON.—Isaiah speaks of Tyre as the 'daughter of Zidon' (23¹²). With this agree the references in Greek and Latin poetry, where Zidon represents in a general way everything Phœnician. Zidon seems to have been the first to pass from being a fishing village, as its name implies, to the undertaking of commercial transactions on the coast of Syria. From this small beginning, her ships began to traffic with Cyprus and northwards among the Greek islands. The transference of maritime power from Zidon to Tyre was owing, according to one account (Justin, 18. 3), to an attack by the Philistines of Ascalon upon Zidon by way of punishing that city for having seized Dor. Possibly, a number of the Zidonian merchants transferred their connexion to Tyre as being more convenient for the trade with the south-east of the Mediterranean. Isaiah refers to Tyre as having been replenished by the merchants of Zidon (23³). While Zidon had made its name familiar over the eastern half of the Mediterranean, Tyre put a bolder spirit into its mercantile enterprises, and steadily advanced in wealth and power until it became 'the mart of nations' (Is 23³). See, further, under ZIDON.

iv. EXTENT AND INFLUENCE OF TYRIAN TRADE.—While Tyre produced certain manufactured articles, such as glass work and the crimson and bluish-purple dyes obtained from the shell-fish* of the coast, the chief cause of its wealth and fame was its trade-carrying pre-eminence. Tyre was the great sea-pedlar of the ancient world. By their charts of the ocean and study of the stars, along with carefully guarded records as to depths and distances, winds and currents, the Tyrian sailors were able to outstrip all competitors by sailing during the night, and keeping their course when out of sight of land. Also by land they had their trading stations along the eastern caravan routes that passed to the N.E. by Aleppo and Palmyra, and to the S.E. into Arabia. From Armenia to the Persian Gulf all the paths of merchandise converged towards Tyre. Their ships, for a time in partnership with those of Solomon, traded in the Red Sea. A recent conjecture is that Sofala (with the prefix *s* dropped and the *l* restored to *r*) was the celebrated OPHIR, with its traces of Semitic workmanship in the neighbouring gold mines. The Tyrians rounded the continent of Africa in their vessels, not larger than a modern herring-boat. They traded on the Nile, selling their wares and laying in wheat and linen at their station at Memphis. They had their ports along the north coast of Africa, notably at Utica and Carthage, the latter of which was said to have been founded by the Dido of romance. In the great Roman epic Virgil must give his hero a Tyrian steersman, Palinurus (possibly *Baal-nuhro*, 'Baal is light'). All the islands of the Mediterranean were familiar with their richly freighted

* In 'the book of the Rolls,' pp. 47, 48 (*Studia Sinaitica*, No. viii.), there is an account, which the writer of the book dismisses with contempt, of the way in which the purple dye of the Tyrian murex was discovered. It was a Jewish tradition to the effect that a shepherd lad one day noticed his dog eating something on the shore near Tyre, and observed that the dog's mouth was stained with bright crimson fluid. With the Oriental instinct for decoration he dipped some wool in the bright dye, and put it on his head as a crown. The incident having been reported to Hiram, king of Tyre, the dye instantly became an important article of commerce.

vessels. Beyond the Straits of Gibraltar they established Gades and other stations on the west coast of Spain. They crossed also to Cornwall, and passed down the west coast of Africa as far as Cape Nun and the Canary Islands. Traces of their presence survive, especially in the islands of Cyprus, Sicily, and Sardinia, in the names of harbours, in excavated relics, and in graves with Phœnician inscriptions, telling where some Tyrian sailor had rested from his wanderings.

Ezekiel (ch. 27), in describing the height of glory from which Tyre was cast down because of the unrighteousness of her traffic, gives a glowing account of the various lands that gave her of their best, ministering to her vast merchandise, and so to her wealth and power and pride and destruction. In Ezk 27²⁰⁻²³ there is a picture of the ships of Tarsish, homeward bound and heavily laden, being buffeted by the common Levanter or east wind of the Mediterranean.

Tyre was a great civilizer, bringing East and West together, and teaching the world the peaceful lesson of mutual dependence. From the 12th cent. B.C. it strove with wonderful talent and persistency to carry out its great aim, which was to gain from the whole world rather than to gain the world itself. Its world was gain. Its destiny, unlike that of Rome, was not to beat down the proud and mighty, but to supply the wants of the rich and great, bringing idols for their shrines, beautiful vases for their palaces, shields and swords of cunning work for warriors, cloth of gold, embroidery, and royal purple for kings, and silk work in stripes and tartan for princesses. By exporting various products to lands where they were unknown or of inferior quality, productive activity was stimulated on all sides, and the standard of industrial art was raised. Like a goodly merchantman, Tyre was willing to pay for her treasures. Thus tribute was willingly given to kings in return for freedom of trade; and with regard to unseen dangers and difficulties, of which they were deeply conscious, their commercial prudence was ready with costly gifts or cruel sacrifices in order to touch the vanity or avert the wrath of the gods. It was an expenditure in order to secure a larger gain.

v. TYRE AND ASSYRIA.—Under Assur-nazir-pal, Shalmaneser II., and Tiglath-pileser, Assyria gradually established its authority over Phœnicia, until Shalmaneser IV. in 726 overran the country. Tyre refused to surrender, and Shalmaneser succeeded in detaching her jealous rival Zidon, so that he was able to attack Tyre by sea with an armada of 80 ships. The Tyrians moved out to meet them, and with 12 war-vessels defeated their enemy, taking 500 prisoners. The siege was maintained on land for five years, until it was raised on account of the death of the Assyrian king (*Ant.* IX. xiv. 2). Later on, Tyre was attacked with uncertain success by Sennacherib with a vast army. In 673 Esar-haddon found his vassal Tyre in league with Egypt, and in 664 Assur-bani-pal took it by storm.

vi. TYRE AND ISRAEL.—In the partition of the kingdom of Israel under Joshua, the stronghold of Tyre is mentioned in connexion with the portion of Asher (Jos 19²⁹). The most intimate connexion between Tyre and Israel was in the time of Hiram and Solomon, when a covenant of friendship was entered into in connexion with the building of the temple (2 S 5¹¹, 1 K 5¹ 7¹³⁻¹⁴ 9¹¹⁻¹², 1 Ch 14¹ 22⁴, 2 Ch 23¹¹⁻¹³⁻¹⁴). Amos (1⁹. 10) complains that this covenant* was shamefully violated by the Tyrians when they sold Israelite captives as common slaves. In the prophecies of Isaiah, Jeremiah, and Ezekiel, the pride, luxury, and greed of Tyre are denounced

* For a different interpretation of the 'covenant of brothers' see Driver, *Joel and Amos*, p. 137.

(Is 23¹⁻¹⁷, Jer 25²² 27³ 47⁴, Ezk 26. 27. 28. 29). In the Psalms, the daughter of Tyre with her costly gift stands in the retinue around the throne (45¹⁷), its inhabitants are mentioned among the sworn enemies of Israel (83⁷), and again Tyre is numbered among those who are brought to know the Lord (87⁴). The beautiful scenery of Ephraim is likened to that of Tyre (Hos 9¹⁹), and in Zec 9² the astuteness of the Tyrians is alluded to.

In the NT its people are among those who flock to Galilee to see and hear Christ (Mk 3⁸, Lk 6¹⁷). Christ visited its coasts (Mt 15²¹, Mk 7²⁴ [where see Swete's note]), and declared that its people, if favoured like the cities of Galilee, would have been moved to repentance (Mt 11²¹⁻²², Lk 10¹³⁻¹⁴). The incident of reconciliation with Herod, recorded in Ac 12²⁰, reveals in its motive and management the artfulness of the Phœnician trader. Finally, in Ac 21³⁻⁷ the ship in which St. Paul sailed to Syria comes to Tyre to discharge its cargo.

vii. TYRE AND BABYLON.—In the early years of the Bab. empire, Tyre was left at peace, and its connexion with Egypt was more closely established. When it became evident that Babylon was to tread in the path of Assyria, the Phœnician cities Gebal, Zidon, and others with them, laid aside their local jealousies and sought to strengthen Tyre to defy the invader (Ezk 27⁸). After the famous battle of Carchemish, in which Nebuchadnezzar defeated Pharaoh-neco in 605, Tyre was besieged for 13 years (cf. Jos. *Ant.* x. xi. 1). The issue of this siege is somewhat uncertain (see *Expos. Times*, x. 378, 430, 475, 520). The prophet Ezekiel seems to imply at least that the island was not given up to plunder, but the Divine purpose was fulfilled in punishing the unrighteous princes and the proud king of Tyre (Ezk 28¹² 29¹⁷⁻²⁰). A time of anarchy and unrest followed, in which the city discarded for a time its monarchical form of government. Gradually order was restored, prosperity returned, and the allegiance to Babylon remained unbroken to the end of that dynasty in 538.

viii. TYRE AND PERSIA.—The condition of Tyre under the Persians was better than it had been under the Assyrians and Babylonians. Persia required the help of the Phœnician fleet in attacking Egypt and repressing the rising Macedonian empire. When after B.C. 400 the power of Persia showed signs of decay, the Phœnician cities rebelled; but when Zidon was reduced to ashes by Ochus in 351, Tyre surrendered without a siege. During the Persian dynasty it is related, to the credit of Tyre, that its fleet refused to convey the army of Cambyses against Carthage on account of blood-kinship, and thus an expedition was averted that might have influenced the destinies of Rome.

ix. TYRE AND THE MACEDONIANS.—The greatest event in the history of Tyre was its capture by Alexander in B.C. 332 after a siege of seven months. Much ingenuity and courage were displayed on both sides. Help was expected from Carthage, Persia, Cyprus, Zidon, but in vain. It was Tyre's darkest day when Alexander was seen bearing down from the north with a large fleet chiefly collected from Phœnician ports and old rivals. It was the fire from the midst of her that had come to devour a city that claimed admiration and obedience, but did not ask to be loved. The mole was completed with ease, when the harbour was thus blockaded; and in the taking of the city 6000 are said to have perished by the sword, 2000 were crucified, and 30,000 women, children, and slaves were sold. Yet within the brief space of 18 years Tyre was re-peopled and re-fortified, and was able to offer a strong but ineffectual resistance to Antigonos. About 287 it again became an Egyptian possession, till in 198 it fell to the Seleucidae, and, with the exception of a brief interval (83-69)

of Armenian rule, it remained under its Syrian governors till in 65 it passed quietly into the Roman empire, receiving the status of a free city. In the 4th cent. A.D. Jerome refers to Tyre as a beautiful city and 'an emporium for the commerce of the whole world.' It was made the seat of a bishopric, and had two such talented but widely-different citizens as Origen and Porphyry. Later on, it was taken by the Saracens in the 7th cent., recovered by the Crusaders in 1124, to fall again into the hands of the Saracens in 1291. After relapsing for a time into the possession of Egypt, with minor intervals of Druze and Venetian control, it ceased to exist as maritime Tyre and became an Arab village.

Few sites in the historical East present such an affecting and instructive record of persistent struggle, splendid achievement, and irretrievable doom. By her destined pathway of commerce Tyre exerted upon the world an influence that ranks

with that of Jerusalem in religion, Athens in philosophy, and Rome in government. But to-day the steamers on the Syrian coast that call at the Bay of Acre and Zidon consider Tyre too insignificant to deserve a visit. After having been the mother of colonies and mistress of the seas, bearing her merchandise into otherwise unvisited lands and adjusting the supply and demand of the world, Tyre is now content at the close of her career to be a stagnant village in stagnant Turkey.

LITERATURE.—Thomson, *Land and the Book*; Robinson, *BRP* (Index); Rawlinson, *Hist. of Phœnicia, and Phœnicia in 'Story of the Nations'*; Kenrick, *Phœnicia*; Movers, *Die Phönizier*; art. PHœNICIA in present work. G. M. MACKIE.

TZADE (צ).—The eighteenth letter of the Heb. alphabet, and as such employed in the 119th Psalm to designate the 18th part, each verse of which begins with this letter. It is transliterated in this Dictionary by *z*.

U

UCAL (על).—Mentioned only in Pr 30¹. In AV and RV the word is treated as a proper name. It is, however, of an unusual form, and there are other objections to the rendering. A slightly different reading (see RVm) would give the meaning, 'I have wearied myself and am consumed' (LXX καὶ ταύομαι). See **ITHIEL**, and cf. Lag. *ad loc.*

UEL (על; BA *Uól*, Luc. *Uól*).—One of the sons of Bani who had married a foreign wife, Ezr 10²¹; called in 1 Es 9²⁴ **JUEL**.

UKNAZ.—For ענא in 1 Ch 4¹⁵ AVm gives 'Uknaz' instead of 'even Kenaz' (AV) or 'and Kenaz' (RV). In all probability something has dropped out of the text, which had read originally 'the sons of Elah: . . . and Kenaz.' This is favoured by the plural sons. An alternative is to drop the *v*, with LXX (καὶ υἱοὶ Ἀδά· Κερέζ) and Vulg. (*Fili quoque Ela: Cenez*), and read simply **KENAZ** (ענז).

ULAI (על, Theod. *Uól*, LXX *Uól*).—The classical Euleus, now the *Karún*. It flowed past Susa or Shushan, and Assurbanipal states that in the battle fought outside that city between the Assyrians and the Elamites, the Ulá (or Ulai) was choked with the bodies of the slain. In Dn 8^{2, 16} it is similarly described as flowing past Shushan. The Euleus is also called Pasitigris by the classical geographers, and Pliny (*HN* vi. 27) says that it surrounded the citadel of Susa. But the rivers of Susiana have so changed their channels since the classical epoch as to make their identification with the present rivers of the country somewhat difficult. It would seem, however, that what are now the Upper Kerkhah and the Lower Karún were formerly a single stream (see **SHUSHAN**). A cuneiform tablet (*WAI* ii. 51. 32) describes the Ulá as 'the water which carries its treasures into the deep' (but see Driver on Dn 8², and Dieulafoi, as cited p. 128 n.). A. H. SAYCE.

ULAM (על).—1. The eponym of a Manassite family, 1 Ch 7^{16, 17} (BA *Uólám* [B om. in v. 17], Luc. *Uólám*). 2. A Benjamite family, specially noted as archers, 1 Ch 8^{30, 40} (B *Uólám*, *Uólám*; A both times *Uólám*). Benjamite archers appear also in 2 Ch 14⁷⁽⁸⁾.

ULFILAS' VERSION.—See **VERSIONS** (Gothic).

ULLA (על; BA *Uól*, Luc. om.).—The eponym of an Asherite family, 1 Ch 7³⁰.

UMMAH.—An Asherite city, Jos 19³⁰. There can be little doubt, however, that the MT עמא here is a slip for עמא ACCO (cf. Jg 1³¹); so, following certain MSS of the LXX ('*Ακκώ*, '*Ακκώρ*'), Dillmann, Bennett, Kautzsch, *Oxf. Heb. Lex.* etc.

UNCLEAN, UNCLEANNESS.*—

- i. Origin of the distinction between Clean and Unclean.
- ii. Four main types of Uncleaness; connected with (a) the functions of reproduction; (b) food; (c) leprosy; (d) death.
- iii. Uncleaness and Ritual.
- iv. Uncleaness in NT.

Literature.

i. **ORIGIN OF THE DISTINCTION BETWEEN CLEAN AND UNCLEAN**.—The distinction between clean and unclean is to be found as far back as we are able to trace the history of the religion of Israel. The validity of Rachel's excuse to her father when seeking the teraphim (Gn 31³⁵ E) rested on the uncleaness of her condition; and Saul, in spite of his insane suspicion of David, yet recognizes that he may be detained from the feast of the new moon by ceremonial defilement (1 S 20²⁶). The division of Israelites into 'those shut up and left at large,' indicates how frequent uncleaness was if those

* This article deals only with the ceremonial idea of uncleaness, not with the ethical or religious. The Heb. verb עָשָׂה, with the noun טָמֵא or טָמְאָה and adj. טָמֵא, is commonly used to express this idea. The notion of profanation or pollution is conveyed by the verb לָלַךְ, which also means 'to make common'; the corresponding noun is לֵלֶךְ. The late verb לָלַךְ is rare in this sense. Cleaness is expressed by the verb טָהַר, its noun טָהוּר, and adj. טָהוֹר. These words may further express the idea of purification, for which the Piel and Hithpaal of טָהַר are also used. The Greek word for uncleaness, ἀκαθάρτης, is used in the NT, except in Mt 23²⁷, in an ethical sense only, and the adj. ἀκαθάρτος is used in the Gospels exclusively of unclean spirits, and in the Epp. in an ethical sense. It is used of ceremonially unclean birds in Rev 18², and, coupled with κοινός, 'common,' is used of ceremonially unclean food in Ac 10^{14, 28} 11⁸. Ceremonial defilement is expressed by the verb κοινῶσαι, 'to make common,' and its adj. κοινός (Mt 15, Mk 7, Ac 10. 11. 21²⁸, Ro 14¹⁴, Rev 21²⁷), and once (Jn 18²⁸) by κοινῶσις. For the idea of purification the verb καθαρίζω, with the noun καθαρισμός and adj. καθάρος, and the verb ἀγνίζω, with its noun ἀγνισμός, are used.

shut up are those ritually unclean. Several allusions to uncleanness are found in the Prophets (Am 7¹⁷, Hos 9³, Ezk 4¹⁴, Hag 2¹³, Is 52¹, 35⁸), while in Deuteronomy, and much more elaborately in the Priestly Code, it is made the subject of detailed legislation. The laws of defilement and purification were developed by the misdirected ingenuity of the scribes into a system of casuistry, even more than ordinarily fine-spun and minute, which constituted, in fact, the most important part of the regulations by which the pious Jew had to order his life. But the laws of uncleanness are far older than the Hebrew people. It is only necessary to read them, to be convinced that they are not the creation of the higher religion of Israel. Anthropology, however, has proved, what might naturally have been suspected, that they belong essentially to the prehistoric past. Their congenial atmosphere is not that which breathes in the Hebrew prophets, but that which animates the crudest forms of savage religion.

Some of the laws might, indeed, be explained on rational grounds, as due to sanitary precaution, to love of cleanliness, to natural aversion from disgusting objects. But it is certain that these do not explain many of the prohibitions, and cannot account for the precise selection or omission which characterizes the list of things unclean. We may grant that these considerations may have played some part in late development, but this should probably be reduced to a minimum. It is more likely, in fact, that the laws of uncleanness created sanitary laws and aversion for certain things than that they were created by them. Where a tribe happened to regard things as unclean which also are insanitary, it would, so far as it did so, increase its chances in the struggle for existence, while natural selection would tend to eliminate tribes whose ritual in no way coincided with sanitary requirements. Thus with the survival of the fittest of tribes sanitary regulations might come by degrees to be established, with no intention of doing more than securing ritual cleanliness. Again, what we call natural aversion is probably natural only in the sense that habit is second nature. The natural disgust which we feel at certain kinds of food is due altogether to custom, and sentiment formed by custom. The dog or horse is naturally no more repulsive than the ox, yet many have an invincible repugnance to dog-flesh or horse-flesh. A Jew's instinctive loathing for the swine, which is eaten freely by Gentiles, often survives the surrender of all religious scruples. And it is decisive that these laws originated at a time when the rudiments of sanitation were still undreamed of, and are found among peoples who own no restraint of cleanliness or natural disgust. It is also well known that even in higher religions ritual cleanliness may be obtained by bathing in very dirty water. Still less happy are the attempts to find a rational basis for these laws in the spiritual principles of the higher religion of Israel. For not only does it need strained arguments to remove their essentially irrational character and make them at home in a spiritual religion, but the numerous parallels in much lower religions are so close that it is unreasonable to shut the eyes to their essential affinity. It is futile to fumble at the lock with such rusty keys, when anthropology has given us one which fits every ward.

The ideas and usages among other peoples, which are similar to the Hebrew laws of uncleanness, are conveniently classed under that widespread system known as 'taboo.' The general notion of taboo is that certain things are regarded as unsafe for contact or use in common life, by reason of the supernatural penalties which would thereby be incurred. A common thing may become taboo through the action of a god, chief, or priest, and the sanction for the restriction he imposes is his own power of avenging its violation. But some things or conditions are intrinsically taboo, and infringement of their character brings its own penalty by a mechanical necessity without external aid. There is an inherent energy in them, which is discharged on all who rashly break the taboo. One of the most striking features of taboo is its infectious character. It is transmitted by contact, and the person or thing thus tabooed may become a new source of infection, though the supernatural virus loses intensity at each new stage of transmission. The infection might in some cases be removed by ritual means, chief among which must be placed washing. In other cases it was too deeply engrained to be removed. From this single root of taboo sprang not uncleanness only, but holiness. Origin-

ally, paradoxical as it may seem, there was little difference between them. Both holiness and uncleanness are infectious, and require identical or similar ritual purification (see HOLINESS). It is especially instructive to compare the law of the sin-offering (Lv 6²⁵⁻³⁰) with such passages as Lv 11²⁴⁻²⁸, 21-35, 15⁴⁻¹², 20-24, 26, 27. It is to be observed that both are treated as of purely materialistic quality, so much so, in fact, that holiness or uncleanness may be scoured off a vessel, unless it is of unglazed earthenware and the holiness or uncleanness has soaked into it, in which case it must be broken. It is further confirmation of the original identity of the two, that while a holy thing is usually said to communicate holiness and an unclean thing uncleanness, in one case a holy thing produces uncleanness. The canonicity of a book was expressed in the phrase, it 'defiles the hands.' If it was a common, that is, a non-canonical book, it was not holy; if canonical, it was holy, and produced ceremonial defilement. The practical consequence of both holiness and uncleanness was to withdraw the object they infected from participation in common life. The holy thing was dedicated to God, and to treat it as common was to violate its sanctity and incur His anger. Hence the avoidance of holiness as a plague, and the precautions taken to avoid catching it. Moses must keep his distance and remove his shoes from his feet on ground made holy by God's presence in the bush (Ex 3⁵); bounds (corresponding to a taboo line) must be set about the mountain at Sinai, lest the people draw too near and 'break forth upon them.' Whatever touched the mountain became so sacred that it was too dangerous to be touched, the death penalty must be executed on it from a safe distance (Ex 19¹²⁻²⁴). The men of Beth-shemesh, and Uzzah, were smitten for contact with the ark (1 S 6¹⁹, 2 S 6⁷). The priests are bidden put off the garments wherein they minister, when they go out to the people, lest they sanctify the people with their garments (Ezk 44¹⁹); and those who take part in the heathen mysteries described in Is 65³⁻⁵ warn the bystanders not to come near lest they catch the contagion of their holiness (Is 65³ reading, with a change in the pointing, 'lest I make thee holy').

The process by which the notions of holiness and uncleanness, which were undifferentiated in taboo, came to be distinguished was probably something of this kind. It has already been pointed out that two classes of taboo may be distinguished. A common thing may become taboo if a god or sacred person lays a taboo upon it. Or a thing or state may be intrinsically taboo. Roughly speaking, this corresponds to the distinction between holy and unclean. The holy is that which is naturally common, but has become holy through contact with the Divine. But there is an uncleanness of a primary order, of an intrinsic and not accidental kind, uncommunicated as no earthly holiness can be said to be. It is true that there is a communicated uncleanness, but uncommunicated uncleanness has no uncommunicated holiness to match it in the human realm. All holiness is derivative save the holiness of God. It is by this principle that the unclean thing may be taboo in its own right, while the holy thing cannot be, that we must explain the priestly torah given in Hag 2¹²⁻¹³. Holy flesh infects with holiness a garment in which it is carried, but this garment does not transmit the holiness to what it touches. A man who is unclean by contact with a dead body infects with

* In general, we may say that the prohibition to use the vessels, garments, and so on, of certain persons, and the effects supposed to follow an infraction of the rule, are exactly the same whether the persons to whom the things belong are sacred or what we might call unclean and polluted' (Frazer, *The Golden Bough* 2, i. 325; cf. also ii. 304-309).

uncleanness what he touches. In other words, a dead body is endowed with higher virulence of contagion than holy flesh. And the reason is that a corpse is a fountainhead of uncleanness, while holy flesh is holy, not intrinsically, but only because it has been devoted to God, the sole fountainhead of holiness. Probably, then, the distinction between holiness and uncleanness was simply the explicit affirmation of a distinction already implicit in the idea of taboo. And it was a great step in advance when the essential difference of things indiscriminately classed together as taboo emerged into clear consciousness. A large irrational element, it is true, survived in the idea of holiness as well as in that of uncleanness. But by linking the idea of holiness with that of God, the former was started on a career of intellectual, moral, and spiritual development, which made it at last the fit expression of the highest religious ideal. On the other hand, uncleanness remained to the last a virtually savage idea, one of the heathen survivals in Judaism which Christianity had simply to eliminate. And where life is lived under the shadow of innumerable taboos, these form an insuperable barrier to progress, for man is tied to the fixed routine, not venturing on unknown paths for terror of the perils that lurk everywhere in his way. But when taboos are recognized as expressing the will of the gods, instead of the paralyzing dread of unknown and incalculable forces, we have the restraint imposed by a kind and trusted deity, which leaves room for progress, because it introduces a rational element, and claims for religion what had been inextricably bound up with superstition.*

The opposite of 'holy' is 'common,' the opposite of 'unclean' is 'clean.' While 'holy' and 'unclean' are strong positive terms, 'common' and 'clean' are simply their pale negatives. Clean is not the same as holy; it implies no dedication to the Divine service, and has no infectious quality. The clean person is one who may freely approach his God in worship. For this he need not be holy, though there are certain cases where cleanness, i.e. the mere absence of uncleanness, is insufficient. At Sinai the Hebrews had to sanctify themselves by washing and abstinence from women (Ex 19). But so exceptional an occasion cannot be taken as typical. Nor are the common and the unclean identical; the common is rather, ordinarily at any rate, also the clean. Yet, just as the clean and the holy tended to be identified, since whatever is holy must also be clean, so their opposites, the unclean and the common. But, in spite of such obliteration of distinctions, it only creates confusion if they are not emphasized.

It should further be noticed that the laws of uncleanness, while largely a survival from prehistoric savagery, or the semi-civilization of primitive Semites, partly originated in a protest of the higher religion of Israel against heathenism. Certain things which were connected with heathen cults, and constituted a danger to spiritual religion, were placed under taboo. Whether by survival or protest a thing was regarded as unclean, it was alike an abomination to J', cutting off the offender from intercourse with Him and fellowship with the community. It is probable that the extent to which the laws are due to protest against heathenism has been overrated in recent discussions. Similarly, in the face of savage parallels, it is probable that some laws in the Priestly Code, which are often regarded as very late developments and impracticable refinements, are in substance of the highest antiquity. That, as at present codified, they are late is clear, and such a passage as Lv 11²⁴⁻²⁸ is not unfairly regarded as exhibiting the rudiments of the casuistry of the scribes. But the central prohibition of the

passage is probably quite early. It is remarkable that some taboos which survived into the Levitical legislation, disappeared among the more conservative Arabs.

ii. **FOUR MAIN TYPES OF UNCLEANNESS** may be distinguished: uncleanness connected with (a) the functions of reproduction, (b) food, (c) leprosy, (d) death. These must now be considered in detail.

(a) *Uncleanness connected with the functions of reproduction.*—These functions early excited the superstitious awe of mankind, which invested the organs and their activities with mysterious powers. Sexual intercourse was widely regarded as producing uncleanness, which might be removed by bathing, but in some cases fumigation was also required. Among the Arabs it was specially necessary to take precautions against the demons on the consummation of marriage (Wellh. *Reste Arab. Heid.*² 153). The Book of Tobit yields an interesting parallel to this. Before Tobias married Sarah she had been given to seven husbands, who had been slain on the bridal night by Asmodeus her demon lover (To 3⁷⁻⁹ 6^{13, 14} 7¹¹). Tobias drove away the demon by fumigation, burning on the ashes of incense some of the heart and liver of a fish (8¹⁻³). It is probable that among the Hebrews intercourse was always considered to produce defilement. This is expressly laid down in P (Lv 15¹⁸). Naturally the defilement was slight, involving bathing and uncleanness till the evening. Certain conditions of holiness, however, required complete abstinence. This was so when J' was to appear on Sinai (Ex 19¹⁵). So David's men may eat holy bread only on condition that they 'have kept themselves from women' (1S 21⁴). David's reply is obscure (see Driver and H. P. Smith on the passage, also W. R. Smith, *l.c.* pp. 455, 456). But it seems clear that on a warlike expedition David asserts that women were taboo. The prohibition of women to those engaged in war is widespread. War was regarded as sacred; the warriors were holy as long as the campaign lasted. Among many savage peoples continence must be observed not only by the warriors, but, on grounds of sympathetic magic, by those left at home, and after their return this taboo with many others is enforced with even greater strictness (Frazer, *l.c.* i. 328; W. R. Smith, *l.c.* 455). No such strictness obtained among the Hebrews in historical times, but Uriah's refusal to visit his wife while the campaign was in progress was probably due to a religious scruple of this kind (2S 11⁸⁻¹²). Perhaps it is on this ground that we may explain why a man is excused from military service during the first year after marriage, Dt 24⁵.

Puberty is regarded by many people as a period when evil can be averted only by the observance of very rigorous taboos. The boys then pass through elaborate ceremonies of initiation, circumcision often playing an important part. So far as boys are concerned, the original meaning of circumcision was lost among the Hebrews by the custom of performing it on the eighth day. But uncircumcision came to be regarded as uncleanness, depriving the offender of approach to God or membership in the community. In the case of girls an analogous rite was often performed, though not, so far as we know, by the Hebrews.

But the greatest terror was aroused by **menstruation**. At its first appearance the girl was often strictly isolated, and in some cases this was continued for years. All through life, precautions, though not so stringent, had to be taken. The blood was regarded as highly dangerous for men to touch or even see (Frazer, *l.c.* i. 325, 326, iii. 204-233; W. R. Smith, *l.c.* 447, 448; Spencer and

* See W. R. Smith, *RS*² pp. 152-155.

Gillen, *The Native Tribes of Central Australia*, pp. 460, 461; Kalisch and Dillmann-Ryssel on Lv 15¹⁹⁻²⁴).^{*} Among the Arabs 'menstruous women might not take part in feasts and sacrifices, only for them are the old expressions for clean and unclean customary in pre-Islamic Arabic' (Wellh. l.c. 170). This was true also in Israel. As in so many other cases, the strictness of the taboos on this state is much modified. But it naturally fell among the graver types of uncleanness. For it was a condition doubly unclean, combining the uncleanness of the reproductive functions with that of blood. It was regarded as unclean in old Israel (Gn 31³², 2 S 11⁴). In the Priestly Code (Lv 15¹⁹⁻²⁴) the period of 'separation' is defined as seven days. The uncleanness was communicated to the bed or seat; contact with either of these produced uncleanness till evening, and required the washing of body and clothes. So infectious was the impurity that any one touching an article on the bed or seat incurred the milder penalty of uncleanness till the evening. This is the penalty prescribed according to the present text of Lv 15¹⁹ for contact with the patient herself. But it is incredible that a secondary stage of uncleanness should require a more complete purification than the primary. Probably the words 'shall wash his clothes, and bathe himself in water, and have fallen out.' The meaning of the injunction in Lv 15²⁴ is uncertain. Probably it does not refer to conjugal relations, which in these conditions were not only said in Lv 20¹⁸ (H) to incur the punishment of death, but were viewed with utter repugnance in antiquity. It is possible that the reference may be, as some think, to defilement caused by the commencement of the discharge during intercourse.

Closely connected with this form of uncleanness was that caused by abnormal issues in both sexes. The pathological conditions indicated need not be discussed in detail (see the commentaries). An 'issue of blood' (Lv 15²⁵⁻³⁰, Mt 9²⁰ and paralls.) made a woman unclean as in the normal discharge. The impurity lasted seven days after the discharge had stopped. Then she offered two turtle doves or young pigeons—one for a sin- and the other for a burnt-offering. It is curious that neither in the case of the normal nor abnormal issue is any reference made to washing of body or clothes in the case of the woman, though both are required for the man (Lv 15¹²⁻¹⁶). Jewish custom at a later period certainly insisted on a bath of purification after the normal discharge. In the case of men, seminal emission involved washing of the body and uncleanness till the evening, while every garment or skin on which there had been any discharge must be washed and be unclean till evening. According to Dt 23¹⁰⁻¹¹, a nocturnal accident while on a military expedition excluded a man from the camp for the next day. As evening came on he had to bathe, and he returned to camp when the sun was down. Corresponding to the abnormal discharge of women is that of men described in Lv 15²⁻³. The various forms of uncleanness produced by it are elaborately referred to (vv. 4-12).

^{*} 'The object of secluding women at menstruation is to neutralize the dangerous influences which are supposed to emanate from them at such times. That the danger is believed to be especially great at the first menstruation appears from the unusual precautions taken to isolate girls at this crisis. . . . In short, the girl is viewed as charged with a powerful force which, if not kept within bounds, may prove destructive both to the girl herself and to all with whom she comes in contact. . . . The uncleanness, as it is called, of girls at puberty and the sanctity of holy men do not, to the primitive mind, differ from each other. They are only different manifestations of the same mysterious energy which, like energy in general, is in itself neither good nor bad, but becomes beneficent or maleficent according to its application' (Frazer, l.c. iii. 232, 233). For the Arabic custom see W. R. Smith, l.c. 448. The Basutos purified girls at womanhood by sprinkling (Tylor, *Primitive Culture*³, ii. 432).

The rites of purification are the same as for a woman's abnormal issue.

That *childbirth* made the mother unclean is only what was to be expected. It is surprising that Nowack should regard this as obviously a development in later time of the old view that pollution was incurred by intercourse as by menstruation (*Heb. Archäol.* ii. 284). The uncleanness of childbirth is an almost universal belief among primitive peoples.^{*} It was also an Arab custom in certain places to build a hut outside the camp, where the woman had to stay for a time (Wellh. l.c. p. 170). The fact clearly is, that, so far from being a late development among the Israelites, it was a survival from prehistoric times. And a modified survival, for it is striking that whereas the newborn infant is almost universally regarded as in a high degree taboo, this has not survived among the Hebrews (though Ezk 16⁴ may allude to it).[†] The rule in Lv 12 (P) enjoins that after the birth of a boy the mother shall be unclean, as in menstruation, for a week, and shall continue 'in the blood of her purifying' thirty-three days. During the first week her uncleanness would of course be infectious, but possibly this was not so during the rest of her forty days. All that is required is that 'she shall touch no hallowed thing, nor come into the sanctuary.' When a girl was born, the two periods were doubled. It was commonly believed that the symptoms persisted much longer after the birth of a girl than after that of a boy. The numbers thirty-three and sixty-six are chosen to make up with seven and fourteen the favourite number of forty and its multiple eighty. When the requisite period was over, she offered a lamb of the first year for a burnt-offering, and a young pigeon or a turtle dove for a sin-offering. If too poor to offer a lamb (as was the mother of Jesus, Lk 2²⁴), a second young pigeon or a second turtle dove might be substituted.[‡]

The 'prohibited degrees' belong to the same order of ideas: on this subject the article MARRIAGE may be consulted. On forbidden degrees in Arabia see W. R. Smith, *Kinship*, ch. vi.; and, on the whole subject, especially Westermarck, *The History of Human Marriage*², chs. xiv. xv., and the summary pp. 544-546. § The 'bastard,' who is excluded from the assembly of J¹, is probably the offspring of such a marriage (Dt 23³). ¶ Probably Moabites and Ammonites are excluded on the ground of the incestuous origin of the two peoples (Gn 19³¹⁻³²). The exclusion of eunuchs (Dt 23¹) is apparently meant to refer, in the first place at any rate, to those who had mutilated themselves for religious reasons. This is an example of a taboo originating in a protest against heathenism.

Some see analogous ideas in the prohibition of 'unlawful mixtures.' Sowing a field with two kinds of seed made the whole crop holy, that is, taboo. Linen and wool might not be used in the same garment; the clothing proper to one sex might not be worn by the other; ¶ an ox and an ass might not be yoked together to the plough; nor must cattle gender with a diverse kind (Dt 22⁹⁻¹¹, Lv 19¹⁹). Parallels cannot here be quoted

^{*} 'Women after childbirth and their offspring are more or less tabooed all the world over' (Frazer, l.c. iii. 463). See also Jevons, *Introduct. to the Hist. of Rel.* 74, 75.

† See Jevons, l.c. 75, 76; Tylor, l.c. ii. 431.

‡ For savage purifications see Tylor, l.c. 432, 438.

§ The Australian black-fellows of the interior, quite uncivilized as they are, have developed a most elaborate system of forbidden degrees (see Spencer and Gillen, l.c. ch. ii.).

¶ Bertholet thinks they were the offspring of the mixed marriages in the time of Ezra and Nehemiah. It is questionable if the chapter is so late as that, and the reference in the same context to Moab and Ammon confirms the other view.

¶ This is not a mere rule of conventional propriety, but is directed against those simulated changes of sex which occur in Canaanite and Syrian heathenism' (W. R. Smith, *OTJC*² 366).

so easily. The Kamschatkans at the beginning of the 18th cent. had a taboo on cooking fish and flesh in the same pot.* Frazer gives several examples of taboo on mixing different kinds of food in the stomach (*I.c.* ii. 336, 337). Baentsch says that mingling of stuffs from the animal and vegetable kingdoms played a rôle in magic.

Possibly we should regard as an extension of the law of issues, the uncleanness of the *human excreta*. Ezekiel protests against using human excrement for fuel with which to bake bread, on the ground of the uncleanness that would then be communicated to the food, and is permitted to substitute animal excrement, which apparently was not defiling, or defiling in a much slighter degree, and is often used now in Syria for fuel (*Ezk* 4¹⁴⁻¹⁵). The law in *Dt* 23¹²⁻¹⁴, directed to secure cleanness in the camp, is regarded by some as a mere impracticable refinement of a theorist. But numerous savage parallels may be quoted for this as for all the Hebrew war taboos. Frazer says that the rules of ceremonial purity prescribed for Hebrew warriors are 'identical with rules observed by Maoris and Australian black-fellows on the warpath.' The precise rule in question is found among Australians, Melanesians, South Africans, and Fijians. Frazer suggests that the original motive in the case of the Hebrews was identical with the avowed motive of savages, 'a fear lest the enemy should obtain the refuse of their persons, and thus be enabled to work their destruction by magic' (*I.c.* i. 328).† It is not necessary to appeal to savages; the same custom is found among the Arabs (*Wellh.* *I.c.* p. 173). We should perhaps bring under the same law the prohibition of woollen garments to the priests, because they caused sweat (*Ezk* 44¹⁷⁻¹⁸). The clause 'they shall not gird themselves with anything that causeth sweat' is regarded by Cornill and Toy as a gloss, and the translation is a little uncertain; but it correctly represents what must have been the object of the prohibition, as is shown by the Syrian and Egyptian parallels. A law of decency underlies the requirement in Ezekiel and P that the priests should wear linen drawers. This was a survival of the feeling that the deity dwelt in the altar, and that the person must not be exposed to it (*Ezk* 44¹⁸, *Ex* 28⁴²⁻⁴³, *Lv* 6¹⁰⁻¹⁶). In the Book of the Covenant the same result was secured by the prohibition of steps up to the altar (*Ex* 20²⁶, see W. R. Smith, *OTJC*² p. 358).

(b) *Uncleanness connected with food*. — The article *FOOD* deals very fully with much of this subject, and it is unnecessary to repeat in detail what is said there. Naturally, however, questions arise in this article that do not arise in an article on *Food*. The taboos on food among savage peoples are very numerous. These cannot be explained as due to sanitary considerations or as the expression of natural disgust. The reason is religious. It is very probable that many cases are to be explained as originating in totemism.‡ But it is not only among savages that such restrictions on food are found. They survive among many civilized peoples of antiquity — Indians, Egyptians, Syrians, Greeks, and others. According to Wellhausen, the distinction between clean and unclean food was not known to the ancient Arabs; they recognized only usual and unusual (*I.c.* 168, 169). At the same time, taboos in some sense seem from Wellhausen's own statements to

have been recognized. Still in this, as in some other respects, the Hebrews preserve the more primitive type.* In the Flood story (*J²*) the distinction between clean animals and animals not clean is presupposed as known, though the technical word for unclean (טמא) is not used (*Gn* 7² 8³⁰). P, on the contrary, represents man as hitherto vegetarian; and when animal food is first permitted, no restriction is made, except that the blood should not be eaten, since it was the vehicle of the life (*Gn* 1²⁰ 9⁴). We have lists of clean and unclean animals in *Dt* 14⁴⁻²⁰ and *Lv* 11.†

The criterion for clean beasts, that they must part the hoof and chew the cud, should probably be regarded as a late attempt to define a class by a single formula, the members of which had already been selected on other grounds. The camel, hare, and coney (*Hyrax Syriacus*) are pronounced unclean, because while they chew the cud they do not part the hoof, and the swine for the opposite reason. The camel was eaten by the Arabs and used in sacrifices: it may conceivably have been excluded on this latter account. There are traces of a belief in Arabia 'that camels, or, at all events, certain breeds of camels, were of demoniac origin' (W. R. Smith, *RS²* 283, n. 2).‡ The hare was probably a sacred animal, for 'hares' heads were worn as amulets by Arab women' (W. R. Smith, *I.c.* 382), and the foot was used as a charm against demons (*Kinship*, 211). While the Arabs eat it, the other inhabitants of Syria, the Turks and the Armenians, abstain from it, and the Parsees regard it as the uncleanest of animals; the ancient Britons regarded it as taboo, 'gustare fas non putant' (*Cæs. de B. G.* v. 12. See Dillm. and Kalisch, *Leviticus*, ii. 55).§ It was supposed to menstruate, and was thus assimilated to mankind. It was regarded as very lascivious (cf. *Barn.* 10). The coney (*Hyrax Syriacus*) is still avoided for food by Christians and Mohammedans in Abyssinia. In the Sinai peninsula it, with the panther, is believed to have been originally human, and he who eats its flesh, it is said, will never see his parents again (W. R. Smith, *RS²* 88, 444). There is much evidence to show that the swine was a holy animal. While forbidden food to the Semites, the taboo was variously explained as due to its holiness or uncleanness. It was eaten only in such mystic sacrifices as are described in *Is* 65²⁻⁵ 66¹⁷. The Egyptians regarded it as highly taboo, not only as food,

* In spite of this, there is one important respect in which the primitive type seems not to be preserved. Frequently certain foods are taboo to people in various stages of life or certain physical conditions, or again to particular orders of people. Elaborate rules may be found in Spencer and Gillen, *I.c.* 256, 467-473; Frazer, *I.c.* i. 391. Only slight survivals are to be found among the Hebrews, e.g. taboo on wine and whatever comes from the grape, imposed on the Nazirite, and his mother before his birth, and the prohibition of wine to the priests before offering. With such slight exceptions, the food taboos are binding on all Israelites. In this connexion Saul's taboo on eating food till evening, unwittingly violated by Jonathan (1 *S* 14²⁴⁻³¹), may be referred to. We naturally sympathize with Jonathan's common-sense criticism; but this was somewhat rationalistic for that age, and the writer represents 'as too much offended by its transgression to answer when consulted. Saul wished by this strong taboo to assure supernatural aid, such as would be cheaply purchased by the impaired efficiency of his men.

† The relation between these laws is disputed. Some regard the law in *Deut.* as a secondary addition. It seems at least probable that the two sections are mutually independent; and it is not unlikely that they draw on oral or written torah of the priests. Driver and White assign *Lv* 11²⁻²³ 41-47 to H. Baentsch ('Handkom.' *Ex.-Lev.*) objects that the passages exhibit too little of H's phraseology. For a very elaborate analysis see *Oxf. Hex. ad loc.*, and art. *LEVITICUS*.

‡ I take it, however, that the eating of camel's flesh continued to be regarded by the Arabs as in some sense a religious act, even when it was no longer associated with a formal act of sacrifice; for abstinence from the flesh of camels and wild asses was prescribed by Symeon Stylites to his Saracen converts; and traces of an idolatrous significance in feasts of camel's flesh appear in Mohammedan tradition' (W. R. Smith, *I.c.* 283).

§ On the Yorkshire superstition of the close connexion between hares and witches see Frazer, *I.c.* iii. 408.

* Brinton, *Religions of Primitive Peoples*, p. 109.

† Hair and nail parings are often buried with great precaution, for a similar reason. The 'hill of foreskins' (*Jos* 5²), according to one interpretation of its meaning, would be a Hebrew parallel (cf. 24³⁰ LXX).

‡ See W. R. Smith, *Kinship*, ch. viii. and pp. 304-311, *OTJC*² 366, 367, *RS² passion*; Spencer and Gillen, *Native Tribes of Central Australia*, 187-189, 202-211, 467, 468; Jevons, *Intro. to the History of Rel.* 102, 116-127.

but to touch; yet once a year sacrificed it to the moon and Osiris, and ate the flesh. Its identification with the demon Set or Typhon, the enemy of Osiris, is probably a degradation from its original identification with Osiris himself. Among the Syrians it seems to have been regarded as an incarnation of Tammuz. Its flesh was also taboo to worshippers of Attis. It was further supposed to possess magical powers.*

The criterion that clean animals must be ruminants with cloven hoof excluded the ass, horse, and dog, and all beasts of prey. The ass seems from Jg 6⁴ to have been commonly used for food: the Midianites 'left no sustenance in Israel, neither sheep, nor ox, nor ass' (cf. 2 K 6²⁵). The Arabs seem to have regarded it as a sacred animal, and it was forbidden to his converts by Symeon Stylites, just as our abstinence from horse-flesh is due to the prohibition to Christian converts from the worship of Odin, to whom it was sacrificed. The story that the Jews worshipped the ass may point to the worship of it in Syria. The flesh and hoofs were used for magical purposes by the Arabs (see W. R. Smith, *Kinship*, 308; *RS*² 468).† The horse was little used by the Hebrews, even in war; probably the uncleanness of the ass would be felt to extend to it. Josiah 'took away the horses that the kings of Judah had given to the sun' (2 K 23¹¹); this connexion with idolatry may account for its uncleanness. Four horses were cast into the sea at Rhodes at the annual feast of the sun (W. R. Smith, *RS*² 293). The dog seems to be sacred from the reference to its use in the mysteries (Is 66³). Among the Harranians dogs were said in the mysteries to be the brothers of men. They seem also to have been sacred among the Carthaginians and Phœnicians. 'In Moslem countries dogs are still regarded with a curious mixture of respect and contempt' (W. R. Smith, *l.c.* 291, 292).‡ *Beasts of prey* were naturally regarded as unclean, because they fed on the blood as well as the flesh of their victims. Most of the unclean birds were birds of prey or fed on carrion. Others lived in ruins, and were regarded as companions of the demons who haunted them. (For the ostrich as a demon cf. W. R. Smith, *l.c.* 129, n. 2). It is curious to observe how unclean birds mentioned in these lists are catalogued with the uncanny monsters which are to dwell in the ruins of Babylon (Is 13^{21, 22}, Jer 50³⁰) or Edom (Is 34¹¹⁻¹⁶). No list of clean birds is given. See article FOOD for those that were eaten. It need only be mentioned that the dove was permitted, though to the Syrians taboo in a high degree.§

Fish also were taboo to the Syrians, who regarded ulcers as the penalty for eating them (W. R. Smith, *l.c.* 292, 449). The Hebrews did not sacrifice, but were permitted to eat them. The only restriction was that fish without fins and scales might not be eaten. The reason was, no doubt, their snake-like appearance, the serpent being unclean (see FOOD).

Further, in the Law of Holiness (H) '*swarming things*' (see art. CREEPING THINGS, where the two

terms so translated are distinguished) are forbidden (Lv 11⁴¹⁻⁴⁴). What was included under this term may be seen in the article mentioned (vol. i. 518^b). The prohibition of reptiles is explained by the superstitions universally attached to serpents. The Arabs frequently regarded them as demoniacal, and identified them with the *jinn* (W. R. Smith, *l.c.* 120, 121, 129, 130, 442, *Kinship*, 197; and especially Wellh. *l.c.* 152-155).* The serpent of Gn 3 illustrates the demoniacal nature of these reptiles. It is curious that the list in Deuteronomy speaks only of 'winged swarming things,' by which apparently winged insects are meant. These are regarded as unclean also in P (Lv 11²⁰, unless this belongs to H), for the phrase 'winged swarming creatures that go on all fours' seems to mean the same as 'winged swarming creatures.' Four kinds of locusts are permitted for food (see FOOD, LOCUST). Whether this is a variation from Dt 14 is uncertain. On the one hand, the rule in the latter passage seems to admit of no exception. On the other, the term translated 'fowls' in Dt 14¹⁵ may be used in this restricted sense of 'winged swarming things,' in which case the meaning will be that certain winged insects are clean and lawful food. Inserted in Lv 11 we have a list of things the carcasses of which produce uncleanness through contact (vv. 24-28). This list includes the unclean quadrupeds, and of swarming things—the weasel, the mouse, certain lizards, and the chameleon.

It is curious that the list is not more extensive, especially as the author enters on a caustical discussion of details. The swarming things mentioned were regarded as demoniacal, the mouse is coupled with the swine in Is 66¹⁷ as eaten in the mysteries there denounced (see W. R. Smith, *Kinship*, 302, 303, *RS*² 293; A. Lang, *Custom and Myth* (1893), 103-120). This section is probably a later addition, not at all on the ground that pollution by contact is a late refinement of pollution by eating, for taboo on contact is very ancient, but because of its casuistry and its interruption of the context. Touching involves uncleanness till the evening, bearing the carcasses of the quadrupeds induces uncleanness in a deeper degree; for not only is the person unclean till the evening, but he must wash his clothes. The carcasses of swarming things infect with uncleanness all clothing or vessels, and the food in them. The vessels are unclean till the evening, and must be steeped in water. If made of earthenware they must be broken, as the uncleanness would sink into the pores. A fountain or cistern, however, remained clean, though whatever touched the unclean thing (i.e. to remove it) became unclean. Seed was not polluted by contact, unless water, by which it would soak in, had been put upon it.

Contact with a clean beast that died a natural death produced uncleanness till the evening. Eating of it or carrying it involved the washing of clothes in addition. In Lv 17¹⁵ bathing of the body is also required.

This law is made to apply to the stranger as well as the home-born. In Dt 14²¹ the prohibition is made absolute for the Hebrews, and based on their holiness to J^h. But the flesh of such animals may be given to the stranger who is sojourning in Israel, or sold to the foreigner.† It must be remembered that the law is not sanitary, but ritual; there was therefore no reason why a taboo, binding on the holy people, should be imposed on those who are not members of it. For the priestly legislators the land is holy, because J^h dwells in it, and therefore those who are in it, Israelites or not, must observe precautions against uncleanness. The priests are forbidden to eat such food absolutely (Lv 22⁹). The reason was that the flesh had still the blood within it. Blood was always prohibited (1 S 14²³, Dt 12²³⁻²⁵, Gn 9⁴, Lv 17¹⁰⁻¹⁴ 3¹⁷ etc.), but the prohibition seems not always to have been observed (1 S 14²³, Ezk 33²³). It, with the fat, was regarded by primitive peoples as in a special sense the seat of life, and in ordi-

* See Movers, *Die Phönizier*, i. 218-220 (where several further exx. are collected); W. R. Smith, *l.c.* 153, 218, 290, 291, 411, 475; Frazer, *l.c.* ii. 209-311; Jevons, *l.c.* 118, n. 3; the very elaborate discussion in Kalisch, *Leviticus*, pt. ii. 79-93; also art. FOOD.

† According to Ex 34²⁰ (JE) the firstling of an ass had to be redeemed with a lamb, but if not redeemed its neck must be broken. The later law (Lv 27²⁷) prescribed that an unclean firstling should be redeemed at the priest's valuation, plus one-fifth, but if not redeemed it must be sold.

‡ Frazer mentions that the dog is regarded by the Ojibways 'as unclean, and yet in some respects as holy' (*Enc. Brit.*⁹ art. 'Taboo').

§ W. R. Smith, *Kinship*, 106; *RS*² 219. The author points out that though a 'clean' bird in legal times, we never read of it in OT as an article of diet. It was not used for sacrifices accompanied by a meal, but in burnt-offerings and sin-offerings, which had a connexion with mystical sacrifices (p. 294).

* For India see Frazer, *The Golden Bough*², i. 456, 457.

† In Ex 22³¹ (JE) 'flesh that is torn of beasts in the field' is not to be eaten, because the Hebrews are holy to J^h; it must be cast to the dogs.

naly sacrifice was made over to the deity. It is probable, however, that in the earliest type of sacrifice it was devoured by the worshippers, and in the mystic sacrifices that are referred to in Is 65. 66 this feature reappeared. The breaking of the dog's neck was a killing of it without shedding the blood (see, further, under FOOD, SACRIFICE).*

The 'sineu of the thigh' is said in Gn 32³² not to be eaten by the Israelites, though no reference is made to this in the Law. It became taboo through the touch of Jacob's Divine antagonist. Probably, as W. R. Smith suggests, 'the thigh is a seat of life and procreative power' (RS² 380).†

The thrice repeated (Ex 23¹⁹ 34²⁵, Dt 14²¹) taboo on *seething a kid in its mother's milk* is discussed in the articles FOOD, GOAT. Here it is necessary to add only what is required by the nature of this article.

We may safely set aside the view that the rule rests on sentimental considerations. It is directed against some religious or magical practice in connexion with the dish. The common explanation that goat's milk was used to produce fruitful crops, while true in itself, does not account for this special prohibition. W. R. Smith suggests that milk was a substitute for blood, so that this dish would violate the taboo on blood (l.c. 221). But neither does this explain why it is a *kid* so prepared that is forbidden. If goat's milk possessed magical qualities, these might be supposed to be present also in a sucking kid. The combination of the two doubles the magical intensity, and we may suppose that the rite condemned was originally pastoral rather than agricultural. The subsequent use of goat's milk in agriculture is a natural application of a pastoral charm for fruitfulness. The question may further be raised whether it has not been too hastily assumed that 'mother's milk' means simply goat's milk, i.e. the milk of any goat. The physical blood relation between the kid and its dam would make the magic more efficacious, doubling it in upon itself.

As examples of the care with which the Jews practised these laws, Dn 1⁸, To 1¹⁰⁻¹² Jth 12¹⁻², Ad. Est 14¹⁷, 1 Mac 1⁶²⁻⁶³, 2 Mac 6¹⁸ 7¹ may be quoted.

The ultimate origin of the uncleanness of certain animals probably lies in the fact that they were *totems of primitive Semites*. It is true that some of the greatest Semitic scholars doubt if the Semites passed through the totem stage. Egyptologists also seem to be unanimous in denying that totemism ever prevailed in Egypt. But it is a question on which the anthropologist also, with the comparative method, must be consulted; and Robertson Smith, the chief defender of the theory in question, spoke with the authority not only of a most eminent Semitist, but that of an expert anthropologist. The theory gains much of its plausibility from the light and order it brings to a number of otherwise obscure and incoherent facts. That the unclean foods are so numerous is perhaps due to the very heterogeneous origin of the Hebrew people, the totems of many stocks being regarded as forbidden food by the united nation. At the same time it must be remembered that among savage races totem stocks exist side by side in the same community, without necessarily tabooing each other's totems, though they may avoid the ostentation with which they feast on the totem of an enemy. Further, even in totem clans there are taboos on food at certain stages of life or in certain conditions, which are otherwise lawful food. We need not, of course, look for actual totemism in the historical period of the Hebrew people. But if the Semites passed through totemism, numerous survivals must be expected, and part at least of the prohibitions probably are to be accounted for in this way. Two principles, however, even in this case, may have been at

work. The lists in Deuteronomy and Leviticus may include food traditionally taboo. In this case the Law simply endorses, as in so many instances, ancient practices. But they may also forbid food, not on the ground of immemorial custom, but because its use in heathen rites constituted a religious danger to Israel. It ought to be added that the proof of the demoniacal or magical qualities attaching to certain unlawful foods in no way conflicts with their totem character. On the contrary, as is well illustrated by the connexion between the *jinn* and the wild beasts among the Arabs, these qualities are probably attributed to them in virtue of their original totem significance.

(c) *Uncleanness connected with leprosy*.—This disease and the purifications after cure are so thoroughly dealt with in the article LEPROSY that it is unnecessary to add more here than a few supplementary remarks. For the view there mentioned, that the leper was regarded as the victim, in a peculiar degree, of a stroke of God, like the man hanged on a tree, 'accursed of God,' we may compare the euphemistic name for it among the Arabs, 'the blessed disease,' *mubāraka* (Wellh. l.c. 199). The man 'smitten by God' necessarily becomes unclean. We find examples of a belief among savages that leprosy may be caused by eating the totem animal, though it must be added that other diseases might be so incurred, skin diseases, however, predominating. With this we should compare the fact that the Egyptians, to whom the swine was taboo in a high degree, thought that drinking pig's milk caused leprosy (Frazer, l.c. ii. 306, 307). The rules laid down for lepers corresponded to those prescribed for mourners; perhaps the feeling entered in that leprosy was a living death. The ritual of releasing the live bird into the open field, rests on a similar idea to that expressed in the 'goat for Azazel.' A similar custom was practised by widows in Arabia on release from the uncleanness of widowhood, at the end of a year.* The bird is said to have died. An Assyrian parallel is, 'May the bird to heaven cause it (my groaning) to ascend' (RP ix. 51). It seems strange that a guilt-offering should be required. Nowack (*Heb. Arch.* ii. 289) thinks the author regarded a sin-offering as inadmissible in this very peculiar rite, and further took the rite over from an earlier time, and did not freely create it (see, further, LEPROSY).

(d) *Uncleanness connected with death*.—This also is familiar among primitive peoples. That the numerous rites which have grown up around the dead express partly a horror of the spirit and dread of its return, is true.† But there are many examples of rites designed to continue with the dead the communion held with them while living.‡ Frequently the taboos on the dead are attributed to ancestor-worship; but this view seems improbable, for we find the taboo more widely prevalent than it is likely ancestor-worship ever was,—and the proofs for this among the Hebrews are certainly not stringent. The taboos rest on the belief that the soul survives the body, and lingers near its

* Wellh. l.c. 171; W. R. Smith, l.c. 422. The reference to Frazer, l.c., in the article LEPROSY, corresponds to iii. 15 in the second edition.

† Frazer, l.c. i. 325, etc.; Tylor, l.c. ii. 25-27; W. R. Smith l.c. 336, n. 2, 369, 370.

‡ W. R. Smith, l.c. 322, 323, 370. 'While the rudest nations seek to keep up their connection with the beloved dead, they also believe that very dangerous influences hover round deathbeds, corpses, and graves, and many funeral ceremonies are observed as safeguards against these' (336, n. 2). 'There is a tendency at present, in one school of anthropologists, to explain all death customs as due to fear of ghosts. But among the Semites, at any rate, almost all death customs, from the kissing of the corpse (Gn 50¹) onwards, are dictated by an affection that endures beyond the grave' (323). See, also, Tylor, l.c. 32-34 (especially the pathetic dirge there quoted); Jevons, l.c. 46-58.

* See W. R. Smith, *Kinship*, 809, 310. RS² 234, 235, 338-362; Frazer, l.c. i. 353-362; Jevons, l.c. 73, 74.

† For the same taboo among the N. American Indians, accounted for by a mythical story, see Frazer, l.c. ii. 419-421. Kafir men also will not eat it, it is 'sent to the principal boy at the kraal, who with his companions consider it as their right.'

earthly house or its grave. How serious the danger was taken to be, is clear from the highly infectious character attributed to it.* This prevails, probably, among all savage peoples. The Hebrews are in this respect more primitive than the Arabs. Among the latter, mourning does not usually make unclean; and in Islam contact with the corpse does not defile, though it is doubtful if this rule prevailed among the ancient Arabs (Wellh. *l.c.* 171, 172). Such cases, among the Hebrews, as those of contact with the carcasses of animals have already been dealt with. The human corpse was regarded by them as most defiling. Although we have no very early evidence, it is unquestionable, in view of the savage parallels, that they always had this belief, and, in more primitive times, probably in a much intenser form. The late codification of the laws in no way disproves, in itself, the antiquity of the observances.

The fullest legislation on the subject is to be found in Nu 19 (P). It is there enjoined that every one who touches 'the dead body of a man shall be unclean seven days.' If a man die in his tent, every one who is in the tent, or who enters it, is unclean for seven days; and any vessel standing open in the tent is unclean. In the open field actual contact is necessary to produce defilement. But such contact was not merely with a body dead by the sword or natural death, but even with a bone or the grave. Hence it became customary to whiten graves, that they might be readily avoided and involuntary uncleanness not be contracted (Mt 23²⁷, Lk 11⁴⁴). The striking illustration of the infectious uncleanness of the corpse given in Hag 2¹¹⁻¹³ has been already referred to. The law in Nu 19²² is that whatever the person thus unclean touches shall be unclean, and the person who touches this object shall be unclean till even. In Nu 5² those unclean by the touch of a corpse are put out of the camp along with lepers and those who have issues. Josiah defiled the altars at the high places with dead men's bones (2 K 23^{16, 20}). Similarly, the dead bodies of Gog's host defiled the land, which was cleansed only by their burial (Ezk 39¹²⁻¹⁶). In old Israel the kings were buried close to the temple, a practice warmly denounced by Ezekiel as defiling it (43⁷⁻⁹). Bloodshed defiles the land, and the uncleanness can be removed only by the blood of him that shed it (Nu 35³³).† Hence warriors, while holy persons, as already shown, were rendered unclean by the slaughter of men in war. Thus, after the slaughter of the Midianites, those who had killed any one or touched the slain had to remain outside the camp seven days, purifying themselves on the third and seventh day. Every thing that could endure fire was passed through it, but was also purified with the water of separation. All that could not endure the fire was passed through water. Clothes had to be washed on the seventh day (Nu 31¹⁹⁻²⁴). Some of the taboos on warriors have been already discussed. The present rule is relegated by some to the class of legal refinements which had never any existence in the national life. Here, again, the comparative method warns us against too hasty a conclusion. Even more stringent rules are found among

* Among the Maoris any one who had handled a corpse, helped to convey it to the grave, or touched a dead man's bones, was cut off from all intercourse, and almost all communication, with mankind. He could not enter any house, or come into contact with any person or thing, without utterly bedevilling them. . . . And when, the dismal term of his seclusion being over, the mourner was about to mix with his fellows once more, all the dishes he had used in his seclusion were diligently smashed, and all the garments he had worn were carefully thrown away, lest they should spread the contagion of his defilement among others' (Frazer, *l.c.* i. 323, 324; Jevons, *l.c.* 57, 58, 76-78).

† When the offender was unknown, guilt was purged from the land by the ritual of the heifer, whose neck was broken in an uncultivated valley with running water (Dt 21¹⁻⁹). See HEIFER; Driver, *ad loc.*; and W. R. Smith, *l.c.* 370, 371.

savages.* Their origin seems to be due to dread of vengeance from the ghosts of the slain. Among the taboos to which the Nazirite was subject was that on contact with the dead. This and the purification prescribed for its violation are fully discussed in the art. NAZIRITE.

The priest, according to Ezekiel, must come at no dead person to defile himself, except parent, child, brother, or unmarried sister.† In the case of the death of such a relative, even after he is cleansed he must wait seven days, and then, on entering the sanctuary, he must offer a sin-offering (Ezk 44⁵⁻⁷). A curious relaxation of the law of uncleanness is that those who are unclean by contact with a dead body may yet eat the passover (Nu 9⁶⁻¹²). Certain mourning customs also produced uncleanness. Hence the Israelite, when offering his charity tithe, was required to affirm that he had not eaten of it while mourning, nor removed it from his house while unclean, nor given of it for the dead (Dt 26¹⁴). If he had eaten of it in his mourning, it would have contracted his uncleanness.‡ The reference to giving it for the dead is of uncertain meaning. The sense may be that he has not sent it to the friends of the deceased for a funeral feast (which would make the whole tithe unclean), or that he has not (in accordance with a very widespread custom) placed some of it in the tomb to serve the spirit for food on its road to Shêol, or that he has not used it in sacrifices to the dead (cf. Jer 16⁷, itself an obscure passage). The bread of mourners is referred to in Hos 9⁴ as causing uncleanness. Other mourning customs, such as cuttings in the flesh, or making baldness between the eyes for the dead, are forbidden in Dt 14¹, Lv 19²⁸, as incompatible with the holiness of the people of J'. Both are well-known savage customs,§ and were regarded as legitimate signs of mourning (Jer 16⁵, Ezk 7¹⁸, Is 22¹²) apparently down to the time of Ezekiel (see CUTTINGS IN THE FLESH, MOURNING). The mourning custom for the captive whom the Israelite (Dt 21¹⁰⁻¹³) takes to wife is interesting. The shaving of head and paring of nails remove the uncleanness of mourning (cf. the shaving of hair in the cleansing of the leper, Lv 14⁹). A similar rite was performed by widows in Arabia after the twelve months they spent in a hut outside the camp, neither dressing the hair nor cutting the nails.||

Purification from the uncleanness caused by a dead body was effected by the 'water of separation,' made by pouring water on the ashes of a red heifer (Nu 19). The heifer was completely burnt, along with cedar wood, hyssop, and scarlet. The burning of the blood in this rite is unique; it was clearly intended to communicate an intenser sanctity to the ashes. The ashes were kept in a clean place outside the camp, and 'living water' was poured on them. Then the unclean was

* Frazer, *l.c.* 331-339. The account of the Pima Indians is especially noteworthy as showing that taboos far more 'impracticable' than those enjoined in Nu 31 are actually observed. The uncleanness and purification prescribed in this passage for warriors after the return from battle are similar to those recognized over a very wide area.

† Unmarried sister, because marriage was regarded as transferring her to the husband's family. The same feeling underlies the law that the priest's daughter on marriage to a stranger loses the right to eat of the heave-offerings of the holy things (Lv 22¹²). Women could not eat of the sin-offering (Lv 6²⁵), guilt-offering (7⁶), or meal-offering (6¹⁸), on account of their high sanctity.

‡ For taboos on mourners and mourning customs see Frazer, *l.c.* i. 388, 389; W. R. Smith, *l.c.* 322-326, 336; Wellh. *l.c.* 170, 171, 177 ff.; Spencer and Gillen, *l.c.* 499, 500-507, 509.

§ See, for example, Spencer and Gillen, *l.c.* 509, 510.

|| W. R. Smith, *l.c.* 428, 447; Wellh. *l.c.* 171. The meaning of the custom is clearly brought out by Frazer, *l.c.* i. 388, 389. He quotes parallels from mourning customs in ancient India, Borneo, and the West Coast of Africa. It is very instructive, as throwing light on the underlying idea, that moral uncleanness is purged away in some cases by the shaving off of all the hair and bathing in the sacred stream.

sprinkled by a clean person on the third and the seventh days, and on the latter he washed his clothes and bathed his body, and was clean at even. The priest who superintended the slaughter and burning of the heifer, and the man who burned her, had to wash their clothes, bathe, and be unclean till even. He who gathered the ashes had to wash his clothes, and be unclean till even; he who sprinkled the water had to wash his clothes, and he who touched it was unclean till even (see, further, art. RED HEIFER). The purifications prescribed after the slaughter of the Midianites (Nu 31¹⁻³⁴), including fire for metal, have been already referred to.

iii. UNCLEANNESS AND RITUAL. — Throughout the history of Israel uncleanness disqualified a man for the worship of God. David's absence from the sacred festival was fully accounted for by the supposition of his uncleanness (1 S 20²⁶); Jeremiah was 'restrained,' probably by uncleanness, and could not go into the temple (Jer 36⁵). The idea has undergone an ethical transformation when the song of the seraphim and the smoke of the Divine resentment (?) make the heart of Isaiah quail at the consciousness that in his moral impurity he has dared to cross the temple threshold (Is 6⁵⁻⁷). In spite of Ezekiel's complaints that the priests had not caused the people to discern between the clean and the unclean (22²⁶), it is clear that some rules were all along observed. Yet these permitted practices which, from the standpoint of Judaism, were highly irregular. Uncircumcised foreigners were allowed to enter the sanctuary (Ezk 44⁷). Ezekiel insists that this shall be absolutely forbidden in the future (44⁹). Uncircumcision in the male worshipper was regarded as uncleanness, as a state which precluded him from communion with God. So we read that into the restored Jerusalem, the holy city, there shall come no more the uncircumcised and the unclean (Is 52¹). The rule is strongly enforced in the Law. Similarly, the unclean may not pass along the holy way by which pilgrims come up to the temple (Is 35⁸). The sacred feasts may be observed by any clean Israelite. The meat of the peace-offerings may be eaten by any clean person, but any one eating with his uncleanness upon him will be cut off by the stroke of Divine judgment (Lv 7¹⁹⁻²¹).^{*} On the other hand, both clean and unclean were permitted to eat the flesh of sacrificial animals if they were not brought in sacrifice (Dt 12¹⁵ 15²²), but the blood had to be poured out on the earth as water. Naturally, uncleanness disqualified the priests for eating holy things (Lv 22³⁻⁷, cf. Is 52¹¹). If, further, the sacred food touched anything unclean, it might not be eaten (Lv 7¹⁹).

A very interesting law is that forbidding an iron tool to be used on the stones of which the altar is constructed (Ex 20²⁵, Dt 27⁵⁻⁶, Jos 8³¹). Exodus, it is true, does not mention iron; it simply forbids the altar to be polluted by the use of a tool to hew the stones. But the point of the prohibition lies in the reference to iron. It can scarcely be that the requirement that the stones shall be unhewn is a protest against the intrusion of culture into religion. Nor can there be any question of offending the deity that dwelt in the stone, for it is not a monolith, but a structure built out of several stones, that the author has in view. Nor is the use of iron in war and its consequent connexion with death regarded as unfitting it for the service of God (in this case 1 Ch 22⁵ might be compared). The taboo on iron in ritual is very widely observed. It is wholly due to 'the conservatism of the re-

ligious instinct.' Long after iron came into common use in daily life, the dread of innovation in religion forbade it to be employed in ritual. Hence bronze knives continued to be used in religious ceremonies after iron knives were in common use. But it is even more striking that survivals from the Stone Age should persist into the Iron Age than that we should have survivals from the Bronze Age. Yet of this there are several examples. The true parallel to the prohibition of the iron tool on the altar is Zipporah's circumcision of her son with a flint (Ex 4²⁵), and Joshua's circumcision of the Israelites with flint knives (Jos 5²⁻³).^{*}

Lastly, the references to foreign lands as unclean have a ritual significance. Palestine was the only land in which J^h could be worshipped with sacrifice and offering, unless soil were actually taken from the clean into the unclean land, as was done by Naaman (2 K 5¹⁷), whose point of view, we need not doubt, was shared by ordinary Israelites. Exile was therefore regarded with dread, for it severed the connexion of the worshipper with his God. And since neither tithe nor first-fruit could be offered, the crops remained unclean, and those in an unclean land were compelled to eat unclean food (Hos 9³⁻⁴).

iv. UNCLEANNESS IN NT. — Since nothing in the Law touched the daily life of the Jew at so many points as the laws of uncleanness and purification, and that not only in the Dispersion (where the sacrificial system could not legally be practised) but in Palestine itself, it was natural that the scribes should develop the rules concerning it with the most painful minuteness. Casuistry, in fact, ran riot in this inviting field. The NT has many references to the laws of purification, and the largest of the six books of the Mishna (סדר טהרה) is devoted to this subject. Thirty chapters in it are devoted to the single subject of vessels. The rules went far beyond anything laid down in even the most casuistical Pentateuch laws. This is shown most of all in the regulations about the Washing of Hands. It was granted that these were not found in the Law, but were only traditions of the elders; yet they were very strictly enforced. The chief point to observe is that the hands were washed before food although they might be ceremonially clean. At first adopted by the Pharisees, it became a practice almost universal among Jews. Probably its origin was to prevent any contact with food when the person might have unconsciously contracted defilement. If the hands were known to be unclean, two washings before food were required. It also became customary to wash the hands after food; and some Pharisees, ingenious in discovering new ways of self-righteousness, washed between the courses. The washing of the hands was performed by pouring, the hands being held with the fingers up, so that the uncleanness might be washed down away from the fingers. The water had to run down to the wrist, else the ceremony was ineffectual (Edersheim thinks that in Mk 7³ we should translate πλυνεῖν, 'to the wrist'; but see Swete's note). We have a further reference to the Jewish custom in the story of the marriage at Cana, where there were six stone waterpots for the water of purification (Jn 2⁶; cf. also the discussion between John the Baptist's disciples and a Jew about purification, Jn 3², and the Jews purifying themselves or avoiding defilement before the passover, 11³⁰ 18²⁸).

^{*} See Fraser, *l.c.* i. 344-348. Among the natives of Central Australia circumcision and subincision are still performed with stone knives, though iron knives are known. But, according to tradition, circumcision was originally performed with the fire-stick, and the stone knives were adopted because so many died in consequence of the operation (Spencer and Gillen, *l.c.* 223, 224, 394-402).

^{*} The apparent exception to this principle already mentioned, that the unclean by touch of a dead body might eat the passover, is partially accounted for by the fact that in P the passover is not considered a sacrifice (cf. 2 Ch 30¹⁷⁻²⁰, Ezer 6²⁰).

More importance attaches to the attitude of Jesus and the apostles to these customs. He excited the surprise of a Pharisee because He did not wash His hands before breakfast (Lk 11³⁸⁻⁴¹); and His disciples, by the same neglect, led the scribes and Pharisees to challenge Jesus to account for their behaviour (Mk 7¹⁻⁵, Mt 15¹⁻²). This gave Him occasion to denounce the making void of the word of God through tradition, and to enunciate the great liberating principle that not that which goeth into a man defiles him, but that which cometh out of him, from the heart. At one stroke He repealed all the Levitical rules as to unclean meats (Mk 7⁶⁻²², Mt 15²⁻²⁰). There can be no such thing as ceremonial, there is only moral defilement. It was long, however, before this decisive pronouncement was really appreciated by the disciples. Just before he was sent to Cornelius, St. Peter could say that he had never eaten anything common or unclean (Ac 10¹⁴). The principle was adopted, with concessions to Jewish prejudices against meats offered to idols, things strangled, and blood, in the letter of the Church of Jerusalem (Ac 15²⁰). St. Paul expressed the principle in the clearest form—that all things are clean, and nothing of itself is unclean (Ro 14^{14, 20}, cf. Tit 1¹⁰). 'All things are lawful; meats for the belly, and the belly for meats: but God will destroy both it and them' (1 Co 6¹³). Nay, food perishes in the very act of use. What we can destroy must not be suffered to rule us (Col 2²⁰⁻²²). So Christians must not permit themselves to be judged in meat or drink (Col 2¹⁶). But, in actual practice, both Jesus and St. Paul made gracious concessions to Jewish feeling. Jesus bade the leper offer for his cleansing the things which Moses commanded (Mk 1⁴). And St. Paul himself, becoming a Jew to the Jews, submitted to a rite of purification (Ac 21²⁶). This apostle laid down the great principle that Christians must be governed by the law of love; and, while we cannot make the conscience of another the measure of our own, we must exhibit always the tenderest consideration for the scruples of others, lest we place a stumbling-block in their way; and, further, that where these scruples exist, he who entertains them must not defile his conscience by violating them. But it is clear that in the Christian atmosphere the essentially heathen idea of ceremonial uncleanness could not survive.

LITERATURE.—The most important has been freely quoted in the article. Most is to be learned from W. R. Smith and Frazer (cf. also his art. 'Taboo' in the *Enc. Brit.*⁹). For Arab usage Wellhausen's *Reste Arab. Heil.*² is valuable. For non-Semitic parallels Jevons' *Introd. to the Hist. of Rel.*, and Spencer and Gillen's very important work, *The Native Tribes of Central Australia*, are most useful. The Hebrew customs are treated by Benzinger, and much more fully by Nowack, in their works on *Hebrew Archaeology*. Their conclusions on several points might have been modified by a more thorough study of savage parallels, through which alone we can hope to understand the Israelitish ideas and usages. The discussion in the *OT Theologies* of Schultz, Dillmann, Sinend, and Marti may also be consulted, together with Stade's in his *GVI*² i. 481-487. The commentators on *Leviticus* deal with the subject; the soundest treatment is probably that of Baentsch in Nowack's *Handkommentar*. Bertholet's commentary in Marti's *Kurzer Hand-Commentar* appeared too late to be used in this article. An article by J. C. Matthes, 'De begrippen rein en onrein in het OT,' in the *ThT* xxxiii. (1899) 293 ff., has not been read by the present writer.

A. S. PEAKE.

UNDERGIRD.—See art. SHIPS AND BOATS, p. 506^b.

UNDERLING.—Sir 4²⁷ 'Make not thyself an underling to a foolish man' (μη υποστρώσης σεαυτὸν ἀνθρώπῳ μωρῷ, RV 'Lay not thyself down for a fool to tread upon': for υποστρώσιν used literally see Lk 19³⁰ 'they spread their clothes in the way'). Underling is found in the Bishops' Bible La 5³ 'Wee are underlings without fathers'; and in Buñyan, *Holy War*, p. 15, 'Can you be kept by any Prince in more slavery and in greater bondage

than you are under this day? You are made underlings, and are wrapt up in inconveniences.'

J. HASTINGS.

UNDERSSETTER (שֵׁטֶר 'shoulder,' esp. as support for burdens).—The Heb. word (in the plu.) is translated 'undersetters' only in 1 K 7³⁰ *dia. 34 bis*, and the meaning there is pedestals for the bases of the lavers in the temple. The Eng. word means props or supports, but that it is not altogether an inappropriate translation the foll. quotation shows: 'In 49¹⁵ Wyclif (1388), 'Isachar . . . undirsette his schuldre to bere.' Elyot (*Governour*, i. 28) says that 'a wyse and counnyng gardener, purposynge to have in his gardeine a fine and precious herbe,' will, 'as it spryngeth in stalke, under sette it with some thyng that it breake nat, and alway kepe it cleane from weedes.' Tindale uses the verb metaph., *Expos.* p. 208, 'If our souls be truly underset with sure hope and trust.' Wyclif (1388) has the form 'undersettings' in Ezk 41²⁰ (same Heb.), the 1382 ed. having 'shoulders.'

J. HASTINGS.

UNDERTAKE.—Is 38¹⁴ 'O Lord, I am oppressed; undertake for me' (קָבַץ, RV 'be thou my surety': in Job 17⁷ the very same form of the verb is rendered in AV 'put me in a surety,' RV 'be surety for me'). The Eng. word has the usual sense of the intrans. verb, 'to assume responsibility for,' 'become surety for.' Cf. Fuller, *Holy War*, p. 137, 'The barren warres in Syria starved the undertakers.'

J. HASTINGS.

UNDERWRITE.—2 Mac 9¹⁸ 'He wrote unto the Jews the letter underwritten' (τὴν ὑπογραμμένην ἐπιστολήν). The word is used literally, as RV 'the letter written below,' the words of the letter being then quoted. Cf. Shaks. *Macbeth*, v. viii. 26—

'We'll have thee, as our rarer monsters are,
Painted upon a pole, and underwrit
"Here may you see the tyrant."'

J. HASTINGS.

UNEASY is now restless, but in its only occurrence in AV it means literally 'not easy,' 'difficult': 2 Mac 12²¹ 'The town was hard to besiege, and uneasy to come unto' (δυσπρόσιτος, RV 'difficult of access'). So Shaks. *Tempest*, i. ii. 451—

'This swift business
I must uneasy make, lest too light winning
Make the prize light.'

The modern sense is quite as old, thus *II Henry IV.* iii. i. 10—

'Why rather, sleep, liest thou in smoky cribs,
Upon uneasy pallets stretching thee?'

J. HASTINGS.

UNGRACIOUS.—This Eng. word occurs in 2 Mac 4¹⁹ 'this ungracious Jason' (Ἰάσων ὁ μαρῆς, RV 'vile'), 8²⁴ 'that most ungracious Nicanor' (ὁ τρισαλιτήριος Νικάνωρ, RV 'thrice-accursed'), 15² 'the most ungracious wretch' (ὁ τρισαλιτήριος, RV 'the thrice-accursed wretch'), always in the sense now conveyed by *graceless*. So Mt 18³² in Cranmer's Bible, 'O thou ungracious servaunt' (Gr. δοῦλε πονηρῷ). Cf. Erasmus, *Crede* 45, 'Rejoysynge in synne and ungratiousnes'; Hos 7¹ Cov. 'When I undertake to make Israel whole, then the ungraciousnesse of Ephraim and the wickednes of Samaria commeth to light.'

J. HASTINGS.

UNICORN (אֶרְעֵמָה and אֶרְעָמָה *rē'ēm*, רֶעֶם *rēm*; cf. Assyr. *rīmu* [see Schrader, *KAT*² 456]).—The various forms of the Heb. word refer to an animal, characterized by its great strength (Nu 23²² 24²), untameableness (Job 39¹⁰), fleetness and activity (Ps 29⁶), noted for its horn (Ps 92¹⁰), of which it had more than one (Dt 33¹⁷ קַרְנֵי אֶרְעֵמָה, not pl. as in AV 'unicorns'; cf. Ps 22²¹ קַרְנֵי אֶרְעֵמָה 'horns of *rēms*'), associated with bullocks

and bulls (Is 34⁷). All of these references seem to point to a well-known animal, probably of the ox tribe. Certainly they do not refer to the fabulous unicorn, a rendering which has been adopted from the LXX *μονόκερος*, which is the word in all the above passages except the last, where the rendering is *ἀδρῶι* = 'strong ones.' The Arab. *ri'm* is undoubtedly a white antelope, probably the *leucoryx*. Some of the above references would suit this animal. But most of them seem to imply a creature of the ox sort, and one of the strongest and fiercest of its group. RV tr. it 'wild ox,' m. 'ox-antelope.' Two species of wild oxen once abounded in Palestine. One, *Bos primigenius*, the *Aurochs* of the Old Germans, is now quite extinct everywhere. The other, *Bison bonasus* or *Bos urus*, which the Germans erroneously call the *Aurochs*, still exists in the forests of Lithuania and in the Caucasus. The latter cannot be the *rēēm*, on account of the shortness of its horns. The former was noted for its size, and the prodigious length and strength of its horns. It existed in Germany down to the time of Cæsar (*Bell. Gall.* vi. 28), and is depicted on the monuments of Assyria as one of the animals hunted by the kings of that country. (See art. ASSYRIA, vol. i. p. 182^b). Relics of it are found in the bone breccia caves of Lebanon, and in the lake-dwellings of Switzerland. It is probable that it was not extinct until the Middle Ages. It is every way likely that this is the animal intended by the *rēēm*. Cf. Tristram, *Nat. Hist. of Bible*, 146 ff., and Driver, *Deut.* 407.

G. E. POST.

UNKNOWN GOD (*ἀγνώστος θεός*).—In his speech at Athens, St. Paul begins by referring to the universal interest in religious matters shown by the Athenians. In passing through the city he had seen an altar dedicated TO THE UNKNOWN GOD (*ἀγνώστω θεῷ*). He makes this the text of his speech, saying that that Divine power which they ignorantly worshipped he would declare to them (Ac 17²³). An exact parallel to this inscription is not known. An inscription is quoted from Euthalius (ed. Zacagn. p. 514): *Θεοῖς Ἀσίας καὶ Εὐρώπης καὶ Λιβύης, θεῷ ἀγνώστω καὶ ξένῳ*. According to Jerome (on Tit 1²), the Athenian inscription was *Deis ignotis et peregrinis*. Other quotations are Paus. I. i. 4: *Θεῶν ἀγνώστων καὶ ἠρώων*; Philaster, *Vit. Apoll.* vi. 3: *Ἀθηναίων, οὗ καὶ ἀγνώστων δαιμόνων βωμοὶ ἱδρυνταί*. None of these give the parallel required, but all suggest that such an inscription would be possible. The whole point of the inscription lay in its being in the singular; and it is quite uncalled for to suggest, as Blass does, that St. Paul wrote originally in the plural because the neuter (*δὸ . . . τοῦτο*) in the next verse is changed by later MSS into the masculine (see Blass, *ad loc.*).

A. C. HEADLAM.

UNLEAVENED BREAD.—See LEAVEN and PASSOVER.

UNNI (ינני).—1. The name of a Levitical family of musicians, 1 Ch 15¹⁸ (B' *Ελωήλ*, N' *Ιωήλ*, A' *Ανι*, Luc. *Ἀνανίας*)²⁰ (B' *Ἰνελ*, A' *Ἀνανι*, Luc. *Ἀνανίας*). 2. See UNNO.

UNNO (ינני *Kéthibh*, followed by RV; but *Kēre* ינני Unni (so AV, cf. 1 Ch 15^{18. 20})).—The name of a family of Levites that returned with Zerubbabel, Neh 12²⁰ (BA om., N^c. a m^s *ינני*, Luc. *ינני*). Guthe would read ינני, which he finds represented by the *ἀνεκρούοντο* of Lucian, taking the *ינני* of the latter to be a doublet of this word, and dropping BAKBUKIAH as an explanatory gloss derived from 11¹⁷.

UNRIGHT.—Wis 12¹³ 'To whom thou mightest

shew that thy judgment is not unright' (*ὅτι οὐκ ἀδίκως ἐκρίνας*, RV 'that thou didst not judge unrighteously'). We find 'unright' for *unrighteous* also in Tindale, as *Pent.* (Mombert's ed.), p. exxviii, 'Avins, a kynde of Giauntes, and the worde signifieth crooked, unright, or weakened.' More common, however, is the subst. 'unright' for *unrighteousness*, *wrong*; thus Tindale's *Pent.* Gn 16³ (ed. 1530), 'Thou dost me unrighte' (changed in 1535 ed. into, 'The wrong I suffre be on thy head'); Dt 25¹⁶ 'All that doo unright are abominacion unto the Lord.' J. HASTINGS.

UNTOWARD.—The meaning of this word is seen in the foll. quotation from the *Judgement of the Synode at Dort*, p. 32, 'All men therefore are conceived in sin, and borne the children of wrath, untoward to all good tending to salvation, forward to evil.' It occurs in Ac 2⁴⁰ 'Save yourselves from this untoward generation' (*ἀπὸ τῆς γενεᾶς τῆς σκολιάς ταύτης*, RV 'from this crooked generation'). The subst. 'untowardness' is also found in AV in the headings to Is 28, Hos 6.

J. HASTINGS.

UPHARSIN.—See MENE, MENE, TEKEL, UPHARSIN.

UPHAZ (יפז; in Jer 10⁹ *Μωφάζ*, Q^{ms} *Σουφελρ*, Vulg. *Ophaz*; in Dn 10³ Theod. *Οφάζ*; Vulg. [*aurum*] *obrizum*).—There is considerable uncertainty as to this word, which is much increased by the diverse opinions of the ancient authorities. Thus LXX has in Dn 10³ *καὶ τὴν ὁσφὺν περιέσωμένον βυσσίνῳ, καὶ ἐκ μέσου αὐτοῦ φῶς* instead of Theodotion's *καὶ ἡ ὁσφὺς αὐτοῦ περιέσωμένη ἐν χρυσῷ Οφάζ*, implying considerable divergence as to the reading. The Vulg. *aurum obrizum* is evidently based upon a comparison of the Heb. form of Uphaz with יפז *pāz*, 'pure gold,' whilst the Gr. *Μωφάζ* implies some such variant reading as יפז *niḥpāz*, 'pure,' said of gold, though the Gr. translator of Jer 10 regarded this, like its variant *Ophaz*, as the name of a place. On the other hand, the mention of gold in both passages where the word occurs, naturally caused other translators to think of יפז *Ophir*, from which the Heb. form of Uphaz (without the vowel-points) differs only in having י for ז.* It is apparently this which has given rise to the Gr. var. *Σουφελρ* (see art. OPHIR) in Q^{ms} (so also the Targ. and Pesh.). Among the conjectures as to the position of Uphaz may be mentioned that of Hitzig, that it may be the Sanskr. *vipāṣa* ('the free'), designating an Indian colony from the neighbourhood of the Hyphas (= Hyphas = Uphaz) or Indus (Sansk. *vipāṣa*), which had settled in Yemen—an identification which has been described as 'more acute than probable.'

LITERATURE.—Calver *Bibellezikon*, and Riehm, *Handwörterbuch*, s.v. T. G. PINCHES.

UR (ימ 'flame').—Father of one of David's heroes, 1 Ch 11³⁶ (B *Σθῦρ*, A *Ορδ*, Luc. *Οδρ*). See AHASBAL.

UR OF THE CHALDEES (יִרְמְיָהּ יִמ; ἡ χώρα [τῶν] Χαλδαίων; *Ur Chaldeorum*).—The name of this city or district occurs four times in the OT, namely, Gn 11^{28. 31} 15⁷, and Neh 9⁷; and as there is no indication as to its position, except that it was 'of the Chaldeans,' much uncertainty exists as to its identification, which is increased by the fact that the LXX do not transcribe the name Ur, but substitute for it *χώρα*, 'country.' Apparently on account of its comparative nearness to Canaan, whither Terah and his family were bound (Gn 11³¹).

* The reading יִמ instead of יִמ is adopted by Ewald, Klostermann, Prince, Driver, Marti ['probably'], et al.

and because of the passage in Ac 7²⁻⁴, where the proto-martyr, St. Stephen, places it in Mesopotamia, many have supposed it to be identical with Urfa or Orfa, which the Greeks named Edessa. The origin of this city is attributed by Isidore to Nembroth or Nimrod, which opinion is confirmed by Ephraem, who states that Nimrod ruled at Arach and Edessa (*Comm. in Genesim*). From Isidore's reference to Μάρβου "Oppa, which Vaux explains as 'evidently the Orrha of Mannus, who was one of the kings of Edessa,' the ancient name of the place has been described as Orrha, the likeness of which to Ur is evident. As, however, this name would seem not to be provable before B.C. 150, it is doubtful whether it can be quoted in support of the identification of Edessa with so old a site as Ur of the Chaldees. Indeed, according to Appian, the town itself was comparatively modern, having been built by Seleucus. Testimony to the firm belief of the Mohammedans that Urfa is the ancient Ur of the Chaldees is to be found in the fact that the chief mosque there bears the name of the 'Mosque of Abraham,' whilst the pond in which the sacred fish are kept is called 'the lake of Abraham the Beloved.'

Another tradition, which is at the same time also the received opinion of scholars at the present time, is, that Ur of the Chaldees is the modern Mugheir, or, more correctly, *Muqayyar*, 'the pitchy,' so called from the bitumen used in the construction of the principal building on the site. The original name of this place was Uru, and as it lies in S. Babylonia, anciently called (though not by the native inhabitants) Chaldæa, such an identification would leave but little to be desired. It is contained in a tradition quoted by Eusebius from Eupolemus, who lived about B.C. 150, to the effect that, tenth in generation and thirteenth in descent, there lived in the city of Babylonia called Camarine (Καμαρίνη), which is called by some the city Urie (Οὐρίη), a man named Abraham, of noble race, and superior to all others in wisdom. As Eupolemus occupied himself especially with Jewish history, there is hardly any doubt that what he says was the common opinion of the Jews at the time. That the place he refers to is that now represented by Mugheir is proved by the fact that its later name, Camarine (perhaps Aramaic), is evidently connected with the Arabic name for the moon, *kamar*, and that the city anciently occupying the site is now known to have been the great centre of Babylonian moon-worship. The statement that it was in his time called by some Urie is significant, as it suggests that the ancient name was going out of use.

The position of this city is close to the point where the Shatt al-Hai enters the Euphrates, about 125 miles N.W. of the Persian Gulf. Babylonian lists of wooden objects refer to a class of ship called *Urite*, suggesting that it was anciently not so far from the sea, its present inland position being to all appearance caused by the alluvial deposits at the head of the Gulf. The ruins cover an oval space, 1000 yards long by 800 wide, and consist of a number of low mounds within an enclosure. The principal ruin is near the northern end, and is evidently the remains of a tower in stages, such as many of the cities of Babylonia and Assyria anciently possessed, and similar to the Birs-Nimroud (generally regarded as the tower of Babel) and the temple of Belus at Babylon (which Nebuchadnezzar calls 'the tower of Babylon'). From the bricks of this building we obtain indications of its history, among the kings who restored it being Ur-Engur, Dungi his son (about B.C. 2700), Kudur-mabug and his son Arad-Sin (or Eri-Aku = ARIÖCH), and Nâr-Addi; whilst other names found in connexion with this or other ruins on the site are, En-anna-duma, Bâr-Sin, Ismê-Dagan and his son Gungunu, Rim-

Sin (probably the same as Arad-Sin or Eri-Aku), Sin-idinnam of Larsa, and Kuri-galzu son of Bur-naburias. The principal ruin, which was, as has been already said, the great temple-tower of the place, was apparently 'the supreme great temple' (*ê gala maha*), called, to all appearance, Ê-šu-gana-dudu. Nabonidus, in the inscription on the four beautiful cylinders found at the four corners of this edifice, tells us that he restored it, and, in doing so, seemingly came across the records of Ur-Engur, and Dungi his son, whom he apparently regards as its founders. From this inscription we gather that the tower bore also the names of Ê-lugal-gaga-sisa and Ê-giâ-šir-gala. South of the temple-tower of Nannara was the temple of the goddess Ningala, and south-east Ê-gipara, 'the temple of the lady of the gods.' Like other renowned cities in Babylonia, it was one of the sacred places to which the dead were taken for burial, and is completely surrounded by graves. In the time of Ur-Engur and his successors, it was the capital of the district, and an exceedingly important place, many of the smaller States around being subject to it. The possession of important shrines naturally added to its influence, and Peters states that from the amount of slag found there it must have been also one of the principal manufacturing centres of the district in which it lies. Many scholars are of opinion that proof of the identity of Ur of the Chaldees with this site lies in the fact that Haran, to which city Terah and his family migrated, was also a centre of moon-god worship, whilst the sacred mountain of the Jews, Sinai, being so named after Sin, the moon-god, is a further confirmation. This, however, is a point which may well be left undecided, as it is by no means certain that Terah and his family were worshippers of the moon; and, even supposing that such was the case, Haran may have been selected for other reasons than that the moon-god was worshipped there, shrines to that deity being not uncommon in the ancient East.

Notwithstanding the inherent probability of the identity of the ancient Babylonian Uru (Mugheir) with the biblical Ur of the Chaldees, the name is not so near as might be wished. The Heb. form has a long vowel, represented by *u*, at the beginning, and no vowel at all after the consonant (*ṭ*). In the Bab. *Uru*, however, though there is no indication that the end-vowel was long, there is but little doubt that it was originally so, as the non-Semitic (Akkadian) form *Urima*, or, better, *Uruica*, shows. Frd. Delitzsch (*Paradies*, p. 226) expresses the opinion that the old form of the name in Akkadian was *Urum* (*Uruma*); but that this is not quite correct, is proved by the 4-column syllabary 82-8-16, 1,* where the non-Semitic pronunciation is given as *Uri*, the terminal *-ma* or *-ica*, found in the archaic brick-inscriptions from the site, being (as is usual in the Assy.-Bab. syllabaries) omitted. There would, then, seem to be but little doubt that these last two syllables, *-inu* or *-ica*, are in part preserved in the form *Urie* (Οὐρίη), used by Eupolemus as quoted by Eusebius. It is true that it implies that the *i* of *ica* only was heard, but the Heb. form, which is undoubtedly older, does not contain it.

This circumstance leads to the probability that the Ur-Kasdim of the OT may, in reality, stand for more than the name of a mere city; and if this be the case, it is not impossible that by these words the whole land of Akkad was intended—the Uri or Ura of the non-Semitic (Akkadian) inscriptions. The patriarch and his family in such a case would have had the whole extent of the province of Akkad

* Published by T. G. Pinches in S. A. Smith's *Miscellaneous Assyrian Texts*, 1887 (pl. 26).

(northern Babylonia) in which to roam and find pasturage for their flocks and herds, instead of being confined to the neighbourhood of the city of Uru (Mugheir). Ur-Kasdim, 'Ur of the Chaldeans' (the 'land of the Chaldeans' of the LXX), is probably so called in order to distinguish it from some other Ur where the Chaldeans were not; and, in this case, either the province of Ura (Akkad) or the city of Uriwa would suit best, to the exclusion of Uria and the castle of Ur between Hatra and Nisibis.

From exceedingly early times the kings of Babylonia called themselves kings of Kengi-Ura, i.e. Sumer and Akkad, and from this equivalence it is clear that Uri or Ura is the same as the district (not the city) called Akkad, and so named apparently from one of the chief cities, known as Agadé, Semiticized into Akad or Akkad. On this account the Semitic population called the whole tract Akkadu, 'the Akkadian (land),' to the exclusion of Uru, which name was already used, to all appearance, as the Semitic form of Uriwa. That they did not call this Akkadian district Uru may be regarded as an argument against its possible identification with Ur of the Chaldees, though it would seem, on the other hand, to be to a certain extent justified by the translation of the LXX, whose rendering, 'country of the Chaldeans,' notwithstanding that it does not seem to represent any Semitic or non-Semitic Babylonian expression,* may nevertheless be due to some tradition which they possessed. In connexion with this it is worthy of note that Ur, in the Heb. text, is not called the 'city,' but the 'land' of the nativity of Haran, who died there 'in the presence of his father Terah.'

The tradition that Ur of the Chaldees is represented by the ruins known as Warka may be dismissed, as this is now known to be the Erech of Gn 10¹⁰, called by the Babylonians *Uruk*.† Its identification with the castle of Ur (Ammianus Marcellinus, xxv. viii. 7) in the Mesopotamian desert between Hatra and Nisibis, is also worthless, this place having been founded by the Persians.

Concerning the name itself, it is needful to state that *Kaldu* is to all appearance a late word, not provable in the cuneiform inscriptions before the 9th cent. B.C., when Adad-nirari III. uses it, and seems to mean, by the expression *mât Kaldi*, the whole of Babylonia. The Heb. *Kasdim* preserves the original *s*, changed, in the native form, into *t* before the dental.‡

LITERATURE.—Loftus, *Travels*, 1857; Delitzsch, *Paradies*, p. 228; Dillmann, *Genesis*, 190 ff.; G. Rawlinson, *Monarchies*, vol. i.; Schrader, *COT* i. p. 114 ff.; Peters, *Nippur*, vol. ii.; Vaux in Smith's *Dict. of Gr. and Rom. Geography*; also the articles ACCAD, BABEL, CHALDEA, and SHINAR, in this Dictionary.

T. G. PINCHES.

* *Uru*, the non-Semitic (dialectic) word for 'city,' the original form of which was *guru*, also *kur*, 'country,' and *bur*, 'mountain,' furnish material for comparison, but the combination of these with *Kasdim*, 'Chaldeans,' a Semitic word, is in the highest degree unlikely.

† Sir Henry Rawlinson (*JRAS* xii. 141, note) refers to a tradition that Abraham was born not at Ur, but at Erech. This would bring the district of Ur somewhat far south, but Erech may have been included within its boundaries. The statement probably has, however, little or no value.

‡ According to Prof. Sayce, the *Kasdim* and the *Chaldei* each had a different origin, the former being those West Semitic tribes who invaded Babylonia towards the end of the 3rd millennium B.C., and established there that dynasty of kings of which Hammurabi (Amraphel) is the most renowned. It was at this time that *Kasdim* and *Babylonian* became synonymous, like *Chaldean* and *Babylonian* in later days. Ur (Mugayyar), being situated on the western bank of the Euphrates, would naturally be in the district which, as pointed out by Hommel, was outside the limits of Babylonia proper, and therefore within the domain of those early conquerors. (On these matters, and the question of Arphaxad, see Sayce, *Expos. Times*, Nov. 1901, pp. 64-66, and Hommel, *ib.*, March 1902, p. 235).

URBANUS (Οὐρβανός, AV Urbane).—The name (masculine) of a Christian greeted by St. Paul in Ro 16⁹, described as 'our helper in Christ.' The name is common among slaves, and is found in inscriptions of the Imperial household. (*CIL* vi. 4237). He is commemorated Oct. 31 with Stachys and Amplias (which see). For later legends see *Acta Sanctorum*, Oct., vol. xiii. p. 687.

A. C. HEADLAM.

URI (אֲרִי 'fiery'; or perhaps contracted from אֲרִיָּה).—1. The father of BEZALEL, Ex 31² 35³⁰ 38²¹, 1 Ch 2²⁰, 2 Ch 1⁸ (B *Oúpelas* in all except 1 Ch 2²⁰ *Oúpei*; A *Oúpi* in all except 2 Ch 1⁸ *Oúpiás*). 2. Father of one of Solomon's commissariat officers, 1 K 4¹⁹ (BA *'Adai*, Luc. *'Addai*). 3. A porter, Ezr 10²¹ (BN *'Oduúth*, A *'Odué*, Luc. *Oúpiás*).

URIAH, in 2 K 16¹⁰⁻¹⁶ **URIJAH** (אֲרִיָּה, אֲרִיָּה Jer 23²⁰, 21, 22, 'flame of J' or 'my light is J'; B *Oúpeias*, A *Oúpiás*; *Urias*).—1. One of David's 'thirty' mighty men (2 S 23²⁰, 1 Ch 11⁴). Like Ahimelech, another of David's followers, Uriah belonged by race to the ancient Hittite population; but, as his name seems to indicate, he had adopted his master's God as his own. The few personal traits of Uriah's character, which are incidentally revealed in the narrative of 2 S 11, not only illustrate the quiet heroism so often existent in the lives of commonplace people, but also enable us to gauge the depths to which David had fallen.

When summoned by royal command from the scene of war, Uriah's behaviour was guided by a resolve to live as far as was possible under the same conditions as his comrades in the field; accordingly after his interview with David, instead of seeking repose and relaxation in his own house, he immediately went on duty as one of the royal bodyguard; and this chivalrous determination was so firmly fixed in his mind that he retained it even when intoxicated. Josephus (*Ant.* vii. 1) in his usual way embellishes the story of Uriah's death. In particular he states that David wrote to Joab 'commanding him to punish Uriah, and signified that he had offended,' and supplies graphic details of the engagement in which Uriah fell. Besides 2 S 11, Uriah's name occurs in 2 S 12⁹, 10, 15, 1 K 15⁵, Mt 1⁶.

2. High priest in the reign of Ahaz. The two notices of him that are found in the Bible leave us in some doubt as to his real character. On the one hand, he is selected (Is 8²) as one of two 'faithful witnesses' who were to attest the utterance of the prophecy concerning Maher-shalal-hash-baz; while, on the other hand, the narrative of 2 K 16¹⁰⁻¹⁶ presents us with the picture of a weak compliant man who not only tolerated but even actively abetted the religious innovations of king Ahaz. It is possible that this unworthy complaisance is the cause of the omission of his name in what seems intended to be a list of high priests in 1 Ch 6¹⁻¹⁵. He is, however, included in a list given by Josephus (*Ant.* x. viii. 6), which is evidently based on that in Chronicles. There are so many suspicious features about the Chronicler's list that one is tempted to suppose an extensive corruption of the text. It is of course conceivable that Urijah was the *second* priest, whose special duty it was to regulate the temple services (cf. Jer 29²⁵).

The changes introduced by Ahaz with the connivance of Urijah were of a startling character. The priest had apparently so placed the Assyrian altar that the ancient brazen altar stood between it and the front of the Holy Place. Ahaz, however, was determined that his new altar should be the 'great' or principal one, and so he removed the ancient altar to the north side of the new one. The new altar now occupied the correct legal position before the Holy Place, and was used for all ordinary sacrificial purposes. The old altar was not, however, entirely discarded. From time immemorial kings and leaders of Israel had inquired of J' at this same brazen altar. A favourable answer might not so easily be obtained at a new

one, however elegant and modern. The old altar therefore was retained for purposes of divination. It must, however, be noted that this explanation of v. 15 is not free from doubt. Michaelis, followed by Gesenius, Kittel, *et al.*, renders מִן הַכֶּהֱנִים לְבַקֵּר 'as for the brazen altar it will be for me to inquire,' i.e. 'to consider what I shall do with it'; so Vulg. *erit paratum ad voluntatem meam*. The LXX αὐτὸς ἐρεῖ [= בִּקְרָה] does not convey a meaning consistent with the context. It seems to be implied in the subsequent narrative that Urijah assented to the other structural alterations in the temple carried out by Ahaz.

3. A prophet, son of Shemaiah of Kiriath-jearim, the story of whose death is incidentally narrated in Jer 26⁹⁻²². From this we learn that he was a contemporary and perhaps a disciple of Jeremiah, whose denunciations against Jerusalem and Judah he is stated to have echoed. Unlike the greater prophet, however, he did not succeed in evading the vengeance of Jehoiakim. Uriah having taken refuge in Egypt, the king demanded his extradition through Elnathan, his father-in-law (2 K 24⁸), who was leader of an embassy, the real object of which was, in all probability, to solicit the aid of Egypt against Nebuchadnezzar. It is unlikely that Jehoiakim would have gone to the trouble and expense of sending a special mission merely to capture a single prophet. Having executed Uriah, the king added the further outrage of casting his dead body into the common graveyard. It is commonly thought that this story is introduced here by Jeremiah in order to prove that his own personal risk, as recorded in this chapter, was a very real one. On the other hand, Rashi maintains that these verses constitute the rejoinder of Jeremiah's enemies to the precedent of Hezekiah and Micah alleged by his friends. 4. A priest, son or representative of HAKKOZ (Neh 3⁴⁻²¹), by whom is probably meant the seventh of the twenty-four courses of priests (1 Ch 24¹⁹). He is mentioned only as father or ancestor of Meremoth or Meraioth, an eminent priest who was chief of the four officials to whom Ezra entrusted the sacred vessels and treasure brought from Babylon (Ezr 8³², 1 Es 8⁶² [URIAS]), who repaired two sections of the wall of Jerusalem (Neh 3⁴⁻²¹), and whose name is substituted in the lists of priestly families, Neh 10⁵ 12^{2, 15}, for that of Hakkoz. 5. One of those who stood on Ezra's right hand when he publicly read the Law (Neh 8⁴, 1 Es 9⁴³ [URIAS]). He was probably a priest. N. J. D. WHITE.

URIAS.—1. (B *Oúpelas*, B^b *Oúpelas*, A *Oúpí*, AV Iri) 1 Es 8⁶² (LXX⁶¹). In Ezr 8³² Uriah. Perhaps identical with—2. (B *Oúpelas*, B^b A *Oúpías*) 1 Es 9⁴³. In Neh 8⁴ Uriah.

URIEL (אֱרִיאֵל, 'flame of El,' or 'my light is El'; cf. Phoen. אֱרִיאֵל, Assy. *Urumilki*).—1. A Kohathite chief, 1 Ch 6²⁴ (B' *Ορηλ*, sup ras A² and Luc. *Ούριήλ*), 15^{3, 11} (B *Ούριήλ*, *Αρηλ*, A both times *Ούριήλ*). 2. The maternal grandfather of Abijah, 2 Ch 13² (BA *Ούριήλ*). See MAACAH, No. 3, and cf., further, Benzinger, *Chron. ad loc.* 3. See next article.

URIEL (*Ούριήλ*).—One of the four chief arch-angels. In Enoch 20³ he is called 'the angel who is over the world (? angel-host) and Tartarus.' In keeping with this title, Uriel is the one who accompanies Enoch in his visits to Tartarus, and who explains to him the tortures of the lost (19¹ 21⁵⁻¹⁰ 27² 33³). In 2 Esdras, Uriel is sent to ask Esdras if he can 'weigh the flame of fire, or measure the wind, or recall the past.' If not, why does he presume to challenge the dealings of God (4⁵)? Similar errands are narrated in 2 Es 5^{30a} 10²⁸. In the *Prayer of Joseph*, Uriel is the angel with whom Jacob wrestles. In wrestling with him, Jacob claims to be 'the firstborn of every creature animated by

God,' and affirms that Uriel is eighth in rank after him (see JOSEPH, PRAYER OF, vol. ii. p. 778^b). In the *Sibylline Oracles*, ii. 228, Uriel is named as the one who will bring the sorrow-stricken forms of the Titans and giants to judgment; and in the *Life of Adam and Eve*, § 48, Michael and Uriel are commanded to bury Adam and Abel in Paradise.

J. T. MARSHALL.

URIM AND THUMMIM.—From an interesting passage of an early historical work we learn that the ancient Hebrews recognized three principal media through which the Divine will might be revealed to men. When Saul in his later years 'inquired' of J', 'J' answered him not, neither by dreams, nor by Urim—which we may provisionally render, by the sacred lot—nor by prophets' (1 S 28⁶). The same three channels of Divine communication were also recognized in ancient Greece, although there divination by lot 'was entirely overshadowed by the prophetic frenzy and inspiration through dreams' (art. 'Sortes' in Smith's *Dict. of Antig.*³). In this article we have to investigate the mode of ascertaining the Divine will by means of the sacred lots, known as 'the Urim and the Thummim [more correctly *Tummmim*].'

Considering the evident importance of this, apparently the only legitimate, mode of divination in early times, the number of express references to the Urim and Thummim is surprisingly limited. In Ex 28³⁰, Lv 8⁸ (both P) we have אֲרָמִים (*hā-urim*) and תֻּמְמִים (*hat-tummmim*); in Ezr 2⁶³, Neh 7⁶⁵, without the article (here only in OT) *urim* and *tummmim*. Dt 33⁹ gives them in the reverse order (see below). In Nu 27²¹, 1 S 28³ *urim* stands alone. 1 S 14⁴¹, from which, in our MT, Urim and Thummim has disappeared, will be fully discussed below,* where also will be found the few references in the apocryphal writings.

The present vocalization leaves no doubt as to the etymology and signification of אֲרָמִים and תֻּמְמִים intended by the Massoretic scholars. The former is evidently connected with אֵר 'light,' the latter is the plural of תָּם, 'completeness,' in a moral sense 'perfection,' 'innocence'; the idea being, perhaps, that Urim was the lot which brought to light the guilt of the subject of the oracle, while Thummim established his innocence. The words are to be understood as intensive plurals, and rendered, on this hypothesis, 'Light and Perfection (or Innocence),' rather than as RVm (Ex 28³⁰), 'the Lights and the Perfections.' It will, however, appear in the sequel that the sacred lot was frequently used where there is no question of guilt or innocence, and it is an open question whether the Massoretic pronunciation reaches back to the time when the lot was in use. Various alternative etymologies have been proposed of late. Thus Wellhausen in his *Prolegomena* (Eng. ed. p. 394) proposed to connect Urim with the verb אָרַךְ, 'to curse,' and expressed approval of Freytag's connexion of Thummim with the Arabic *tamima*, a species of amulet (see Freytag, *Lex Arab.-Lat.* i. 190^b; JBL xix. (1900) 58); cf. Haupt-Schwally, ZATW xi. 172, who suggests 'cursing and blessing' as probable renderings; and Ball, in the list of proper names at end of his *Light from the East*, 'biddings and forbiddings (?)'. In his later works, however, Wellh. has given up this etymology. In view of the ancient and long-continued influence of Babylonian ideas on the religious thought of the West, there is greater probability in the etymology recently proposed by some Assyriologists of repute, who suggest as the root of אֲרָמִים the Piel infin. form *u'uru* (stem אָרַךְ or אָרַח), 'to send forth (an edict),' whence *urru* and *terru*, the technical Babylonian terms for an oracle. (See Zimmern, *Beiträge zur Kenntnis d. bab. Religion*, 88 f. 91, note 2; Muss-Arnolt, *AJSL* xvi. (1900) 218). One is further tempted to connect Thummim with the verb *tamū*, Piel *tummi*, frequent in the divination vocabulary of the Babylonians, in the sense of 'to put under a spell' (see Zimmern's vocabulary, *op. cit.* 78). 'If these derivations are correct, אֲרָמִים and תֻּמְמִים would correspond to the Babyl. *urru* ("command," "decision," mostly of the gods), and *tamtu*, a synonym of *pirishtu* = "oracle," "oracular decision of the gods" (Muss-Arnolt, *op. cit.* 219).

The renderings of the ancient VSS give no help either towards the etymology and significance of the original terms, or towards the real nature of the objects themselves.

* In Ps 43³ Lagarde (*Prophetæ chald.* p. xlvi) would read 'send forth thy Urim and thy Thummim' (cf. Dt 33⁹). See also Duhm in *Kurzer Handcom.* in *loc.*

The Targums and Syr. VSS merely transliterate the Heb. terms. The Gr. VSS vary in a remarkable way, showing that their authors had no tradition to guide them. For $\alpha\lambda\omega\iota\varsigma$ we find the following renderings: (a) $\delta\epsilon\lambda\omega\iota\varsigma$, 'manifestation' (perhaps rather 'direction', 'instruction', since the corresponding $\delta\epsilon\lambda\omega$ is used by LXX to render the Hiphil of $\alpha\lambda$ in Dt 33¹⁰ and other synonymous Heb. verbs), Ex 28³⁰ [LXX 26], Lv 8⁸, 1 Es 5⁴⁰; (b) $\delta\epsilon\lambda\omega$, 'acil. λιθι', 'clear', 'transparent' [jewels, see below], Nu 27²¹, Dt 33⁸, 1 S 14⁴¹ [not in MT] 23⁸, Sir 45¹⁰, also 36³ [EV 33⁸], according to the better reading of $\alpha\lambda$; cf. AVm 'as the asking of Urim'; (c) the verb $\epsilon\sigma\tau\epsilon\lambda\omega$, 'to give light', Ezr 2⁶³, Neh 7⁸; (d) the later translators prefer the more literal rendering $\epsilon\sigma\tau\epsilon\lambda\omega\iota\varsigma$, 'lights', so Aq., Symm., and Theod. Ex 28³⁰; but in Dt 33⁸ Symm. has (e) $\delta\delta\alpha\chi\eta$, the source of Jerome's *doctrina*, unless the Latin Father so understood $\delta\epsilon\lambda\omega\iota\varsigma$ as above suggested.

For $\alpha\lambda\iota\theta\epsilon\iota\alpha$ we have (a) $\alpha\lambda\iota\theta\epsilon\iota\alpha$, 'truth'—perhaps suggested by the fact that the presiding Judge in Egypt wore, suspended from his neck, an image of Tme, the Egyptian goddess of truth (see end of this article)—Ex., Lv., Deut., 1 Es., as above, Sir 45¹⁰; (b) $\iota\sigma\iota\alpha\iota\varsigma$, 1 S 14⁴¹,† here 'innocence'; (c) $\tau\iota\lambda\omega\alpha$, 'perfect things', Ezr 2⁶³; (d) in the later translators (Aq. etc.) also literally $\tau\alpha\lambda\iota\sigma\iota\tau\epsilon\iota\varsigma$, 'perfections'. The renderings of the Old Latin and Jerome hesitate in the same way between *doctrina*, *demonstratio*, *ostensio*, also *doctus*, for Urim, and *veritas*, *perfectio*, *sanctitas*, *perfectus*, *eruditus*, for Thummim.

In proceeding to investigate the nature and use of the Urim and Thummim, it seems advisable to begin with the data of the youngest products of Heb. literature, and to proceed backwards to those of the earliest. Setting aside for the present the speculations of Philo and Josephus, to whom we shall return, we find no help in our investigation from the references in the deuterio-canonical writings recorded above, viz. 1 Es 5⁴⁰, in which the high priest is described as 'wearing Urim and Thummim' (so RV; AV, following Vulg., 'clothed in doctrine and truth'), Sir 36³ 45¹⁰. The first item of interest is furnished by the fact recorded in Ezr 2⁶³ = Neh 7⁷⁸, that certain families were excluded from the enjoyment of priestly rights until the purity of their descent should be established by 'a priest with Urim and with Thummim.' From this it is manifest that the use of these mysterious objects, and possibly also their precise nature, were unknown to the Jewish authorities of the post-exilic age.

This brings us to the Priests' Code. Without pausing to inquire, at this stage, into the full significance attributed by the compilers of this document to the Urim and Thummim, we may learn at least two facts which will clear the way for further investigation, and prove the impossibility of a widely current view as to the identity of these objects. After giving minute directions for the making of the 'breastplate of judgment' (for which see vol. i. p. 319 f.), attached to the high priest's ephod, P proceeds thus: 'And thou [Moses] shalt put into the (breastplate or) pouch of judgment the Urim and the Thummim' (Ex 28³⁰). No explanation is given of these, nor any instructions for making them. The latter omission so impressed the Samaritans that the requisite order is supplied here, and executed 39²¹, in their recension of the Pentateuch. The rendering above given of the ambiguous phrase of the original $\epsilon\sigma\tau\epsilon\lambda\omega\iota\varsigma$ $\tau\alpha\lambda\iota\sigma\iota\tau\epsilon\iota\varsigma$ is that imperatively demanded by the context (see the commentaries) in preference to the possible alternative adopted by the LXX, $\kappa\alpha\iota$ $\epsilon\pi\iota\theta\eta\sigma\epsilon\iota\varsigma$ $\epsilon\pi\iota$ $\tau\delta$ $\lambda\omicron\gamma\omicron\upsilon\omicron\iota$ $\tau\eta\varsigma$ $\kappa\tau\iota\sigma\epsilon\omega\varsigma$ $\tau\eta\eta$ $\delta\eta\lambda\omega\iota\varsigma$ $\kappa\alpha\iota$ $\tau\eta\eta$ $\alpha\lambda\lambda\theta\epsilon\iota\alpha\varsigma$, 'thou shalt put upon; the oracle of judgment the Urim and the Thummim.' This mistaken rendering is mainly responsible for the view entertained by many writers, from Josephus to Kalisch (*Hist. and Crit. Comm. in loc.*), that the Urim and Thummim are to be identified with the jewels of the breastplate, enumerated in the verses preceding. P's contribution to the discussion, therefore,

* Hos 3⁴ LXX for 'teraphim.'

† The MT has here the corrupt reading $\delta\alpha\chi\eta$, see below.

‡ The Samaritan-Hebrew actually read $\epsilon\lambda$ $\tau\eta\eta$ $\tau\eta\eta$ here and in Lv 8⁸.

consists in showing (1) that the Urim and Thummim were understood in priestly circles, about the close of the Exile, as something distinct both from the ephod and from the gems with which the pouch of the ephod was ornamented; and (2) that they were conceived as *material objects of comparatively small dimensions*, capable of being inserted in the pouch, which indeed was constructed solely with a view to contain them. The other references of the Priestly Code (Lv 8⁸, Nu 27²¹) give no further clue to the nature of Urim and Thummim. The second passage, however, shows the importance attached to them in the ideal theocratic community of P as the authorized medium of Divine revelation.

When we pass from these ideal representations to the actual history of the pre-exilic period, while we meet with an equal readiness to presuppose familiarity with the objects under discussion, we are able for the first time to learn something as to the *modus operandi* in the use of the sacred lot. The most explicit of the earlier passages in which this *modus operandi* is exhibited is the graphic narrative in 1 S 14. Here we find the Hebrew host, led by Saul and Jonathan, proceeding to ascertain the cause of the Divine displeasure (v. 37) in the face of their hereditary enemies, the Philistines. Unfortunately, the Heb. text has here suffered serious mutilation, and, as even the most conservative scholars admit, must be restored by the help of the Greek version. The latter, in Lucian's recension (Lagarde's ed.), runs thus, v. 41¹: 'And Saul said, O Lord, the God of Israel, why hast thou not answered thy servant this day? If the iniquity be in me or in Jonathan my son, give Urim ($\delta\delta\varsigma$ $\delta\theta\lambda\omega\iota\varsigma$ [see above]); and if thou sayest thus: The iniquity is in the people, give Thummim ($\delta\delta\varsigma$ $\delta\sigma\iota\sigma\tau\eta\gamma\alpha$; MT $\delta\sigma\tau\epsilon\lambda$ $\delta\sigma\tau\epsilon\lambda$, which cannot possibly mean, as RV, 'show the right').* And the lot fell upon Saul and Jonathan, and the people escaped. And Saul said: Cast the lot between me and Jonathan my son, and on whomsoever the Lord shall cause the lot to fall, let him die.' The true text was apparently still accessible to Jerome, who renders: 'si in me aut in Jonatha filio meo, est iniquitas hæc, da ostensionem [Urim]; aut si hæc iniquitas est in populo meo da sanctitatem [Thummim].'

From the text of this important passage in its original form, then, we learn (1) that the Urim and Thummim were the recognized medium for discovering the guilt or innocence of suspected parties, a species of Divine ordeal; (2) that as the lots were only two in number, only one question could be put at a time, and that in a way admitting only of two alternative answers; (3) that where these answers, from the nature of the case, could not be given by a mere 'yes' or 'no' (see below), it was necessary to agree beforehand on the way in which the issuing lot was to be interpreted; (4) a fourth inference, that the manipulation of the lots was the prerogative of the priests, may be drawn from the context (see below), but is more explicitly stated in the only other reference to Urim and Thummim in pre-exilic literature. In the so-called 'Blessing of Moses' (Dt 33)—perhaps as early as the time of Jeroboam I. (so Dillmann and Driver), certainly not later than Jeroboam II. (so most critics)—the benediction of Levi opens thus: 'Give to Levi thy Thummim, and thy Urim to the man of thy favour' (v. 8, following LXX with Ball, *PSBA*, 1896, 118 ff., and Bertholet, *Kurzer Handcom. in loc.*).

Another step forward is suggested by the comparison of the function here assigned to the

* See Driver's *Notes on the Heb. Text of the Books of Samuel* for the restoration of the original Hebrew of the essential portions of the above.

Levitical priesthood with another recital of the priestly prerogatives, where the tribe of Levi alone is represented as chosen by Jⁿ 'to offer upon mine altar, to burn incense, and to bear' (נָשָׂא) *an ephod before me*' (1 S 2²⁸, cf. 22¹⁸ LXX). For although our present Heb. text nowhere *expressly* associates the Urim and the Thummim with the mysterious ephod-image of the early writers (see EPHOD, No. 2, vol. i.), an examination of the whole narrative of 1 S 14 in the Greek text, and of other passages in the Books of Samuel, where this ephod figures as indispensable to the manipulation of the lot, leads to the conclusion that the ephod-image and Urim and Thummim had some intimate but as yet undiscovered connexion the one with the other. Thus, in 1 S 14, the priest of v. 36 who presides over the ordeal of Urim and Thummim can be no other than Ahijah the descendant of Eli, who accompanied Saul, 'bearing an ephod' (עֹפֹד נֹשֵׂא v. 3). In v. 18, according to the true text, he is summoned to 'bring forward the ephod' (προσάγαγε τὸ ἐφόδον—not as in MT 'the ark'; see ARK, vol. i. p. 150^a, note §; EPHOD, vol. i. p. 776, note †), evidently for the purpose of consulting the lot, but immediately ordered to 'withdraw' his hand when on the point of proceeding to its manipulation (v. 19). Again, in the story of David's adventures at Keilah, we read of his being joined by the priest Abiathar, bringing 'an ephod in his hand' (1 S 23⁶). He is requested by David, in terms identical with those used by Saul, to 'bring forward the ephod' (v. 9); whereupon the former proceeds to ask a series of questions, each capable of being answered by a simple 'yes' or 'no' (vv. 10-12). It is impossible to escape the inference that these two narratives of a solemn inquiring of Jⁿ on the part of Saul and David offer complete parallels, that in both the answer is obtained by means of Urim and Thummim, and that in either case these objects are carried in and cast from, or in some other way intimately connected with, the ephod-image. What has now been said of the incidents of 1 S 23^{6ff}. applies equally to the similar procedure in 30^{7ff}., where David again 'inquired of Jⁿ' by means of the ephod.

Indeed most scholars would go further, and maintain that in a number of other places, where the same phrase 'to inquire of Jⁿ' (נִשְׁאָל לַיהוָה) is employed, and where the use of the sacred lot 'before Jⁿ' is stated, recourse to Urim and Thummim is implied in every case. The most important of such passages are Jos 7¹⁴⁻¹⁸ Achan's trespass, Jg 1¹⁴ 20^{27ff}., 1 S 10¹⁹⁻²² the election of Saul, 2 S 21⁵ 19²³.

To say that the Urim and Thummim of the earlier historians must have been intimately connected with the portable images to which they gave the name of ephod in the casting of the sacred lot, does not help us to discover the real nature of the objects in question. The etymology, as we have seen, is equally of no avail. The Greek translators in rendering Urim by δῦλοι [λίδοι] apparently identified it with the jewels of the breastplate. We are therefore left to conjecture that, on the analogy of the *sortes* of classical antiquity, they may have been two stones, either in the shape of dice or in tablet form, perhaps also of different colours. Some support is given to this view, which is that of most modern writers (see Literature at end of article), by the fact that the Heb. word for 'lot,' *gōrāl*, as is inferred from its Arabic congeners, originally signified a stone (cf. Gr. ψῆφος, 'a pebble used in voting,' and the Bab. *puru*, 'a stone,' whence, according to Jensen, quoted by Wildeboer in *Kurzer Handcom.*, עֶרֶם Est 3⁷, synonymous with גֹּרָל, is derived).

With the growth of more spiritual conceptions

* Not as EV 'to wear,' a sense which נָשָׂא nowhere has in Hebrew.

of the Divine character and of His relation to mundane affairs, recourse to the lot as a means of ascertaining the mind of Jⁿ gradually fell into abeyance. It cannot be a mere coincidence that the use of Urim and Thummim is never mentioned in the historical narratives after the time of David. The rise of the prophetic order in Israel provided the nation with a worthier channel for the revelation of the Divine will, and with more trustworthy counsellors in the crises of the individual and national life. The further we descend the stream of history the more conspicuous is this displacement of the priestly lot by the prophetic voice (contrast Ezr 2⁶³=Neh 7⁶³ with 1 Mac 4⁶³ 14⁴¹). That the Urim and Thummim should reappear in the scheme of the Priestly Code is not surprising. It is part of its ideal reconstruction of the theocracy that the high priest should be at all points fully equipped for his office as the Divine vicegerent in the theocracy. For this end he is provided with the already mysterious Urim and Thummim, the manipulation of which was one of the most prized of the ancient prerogatives of the priestly caste. Their early association with the now long tabooed ephod-image, and the fact that the bosom-folds of the upper garment was a common receptacle for the 'lot' as used in everyday affairs (see Pr 16³³ 'the lot is shaken in the bosom-fold, but the whole disposing thereof is of Jⁿ'),* may have suggested to the authors of the Priestly Code the placing of the Urim and Thummim in the jewelled pouch of the high priest's ephod. In any case it is clear from the principal passage, Ex 28³⁰, that it is rather a symbolical than a practical significance that is attached to the mysterious contents of the 'pouch of judgment (or decision)'. Israel, in the person of Aaron its representative, is here presented as the continual recipient of Jⁿ's 'decisions' and guidance, and the position of the symbols 'upon his heart' betokens the readiness of Israel at all times to yield obedience to these Divine commands.

After the exhaustive presentation of the earlier biblical data as to the use and associations of the Urim and Thummim, little need be said of the views of older scholars, whose method of research was vitiated by their taking the representations of the Priests' Code as decisive for the nature and use of these objects in the historical period. Thus, probably, few will be found to maintain the once widely accepted theory that found the prototype of the Urim and Thummim in the jewelled image of Tme, the goddess of truth and patron of justice, which the Chief Justice (ὁ ἀρχιδικαστής, Ælian, *Var. Hist.* xiv. 34; cf. Diod. Sic. i. 48) of Egypt wore on his breast; still less to defend an Egyptian etymology for Urim and Thummim (Wilkinson, *Anc. Egyptians* [1878], vol. iii. p. 183, with figure of judge's breastplate).† The same comparative ignoring of the evidence of our oldest sources as to the nature of the ancient lot is fatal to the acceptance of the thesis recently brought forward by an American scholar (Muss-Arnolt, see below), that the Urim and Thummim are a reflexion of the 'Tablets of Destiny' of the Babylonian mythology.‡

Nor need we dwell on the many absurd speculations as to the nature of Urim and Thummim, and as to the mode in which their guidance was supplied, which are to be found in the works of Jewish and Christian writers from Philo and Josephus

* Cf. Book of Jubilees 8¹¹, where the lots for the apportioning of the earth among the sons of Noah are drawn from the patriarch's bosom.

† See, however, Hommel, *AHT* 282 f., who finds the original of the Jewish high priest's ephod in the pectoral of the High Priest of Memphis, as figured by Erman, *Egypt.* 298.

‡ The most that can be said for this view is that the presence of these tablets on the breasts of Marduk and Nebo was known to P., and may possibly have influenced his placing of them on the breast of the high priest (but see above).

downwards, and for which the curious reader is referred to the bibliography at the end of this article.* Philo, it may be said, did not, as is often erroneously stated, regard the Urim and Thummim as two images carried in the breastplate (see Mangey's note, *Opp.* ii. 152), but as symbols of 'the two virtues, Illumination and Truth (*δῆλωσις τε καὶ ἀλήθεια*).[†] Josephus (*Ant.* iii. viii. 9) does not expressly name the Urim and Thummim, but appears to identify them with the jewels of the breastplate and on the shoulders of the high priest, which, by a miraculous effulgence, gave supernatural guidance, particularly on the eve of battle.†

A favourite explanation of Jewish writers, reaching back to the Jerusalem Targum (pseudo-Jonathan on Ex 28³⁰), was to the effect that Urim and Thummim contained the sacred tetragrammaton (יהוה), which spelled out answers to inquirers by illuminating the letters of the tribal names on the transparent gems! Scarcely less curious is the view, probably still widely entertained, that the high priest threw himself into a hypnotic trance by gazing intently on the dazzling jewels,—again wrongly identified with Urim and Thummim,—and while in this state was the recipient of the Divine message (see Kalisch, *Exodus*, pp. 540–545, and cf. Plumptre in art. cited above).

LITERATURE.—For the views of older scholars see Buxtorf, 'Historia Urim et Thummim' in Ugolini, *Thesaurus*, vol. xii., and Spencer, *De legg. Hebræorum ritualibus* (1685), dissert. 7. Of modern works and articles reference may be made, besides the ordinary commentaries, to the art. in Winer's *RWB* (with ref. to many older works); Riehm, *HWB*, art. 'Licht und Recht' (Luther's rendering of Urim and Thummim); Smith's *DB*, and esp. to the excellent study of Kautzsch in *PRE³* vol. xvi.; the standard treatises on Biblical Archaeology; Kalisch's excursus in the body of his commentary on *Exodus*, pp. 540–545; Haupt, 'Babylonian Elements in the Levitical Ritual' in *JBL* xix. (1900) pp. 58 f., 72 f.; and for a complete conspectus of the views of modern scholars, W. Muss-Arnolt, *The Urim and Thummim, a Suggestion as to their original Nature and Significance*, a reprint from *AJSL*, July 1900.

A. R. S. KENNEDY.

USURY.—See **DEBT**, vol. i. p. 579 f. We may add here that the Babylonian contract tablets show that the payment of interest was an established custom from the time of Khammurabi (c. 2200 B.C.) onwards. Doubtless it had already existed for centuries in the time of that king. He interferes to enforce the payment of a loan with interest. The usual rate of interest seems to have been 20 per cent., though the payment is also mentioned of 11½ and 13½. In another case a loan is to be repaid within two months, after which 10 per cent. interest will be charged. In addition to silver or money there are lent corn, dates, sesame seed, and onions. Some of the loans are secured on houses, slaves, etc.; and in one case the services of the slave specified as security are given in place of interest. These contract tablets, etc., extend from c. 2200 B.C. to c. 100 B.C. (*Guide to Bab. and Assy. Ant.*, Brit. Mus., 1900, pp. 122–191).

At Athens, in the classical period, interest varied from 12 to 20 per cent., at Rome from 8½ to 12 per cent.; but towards the beginning of the Christian era the rate of interest at Rome was lowered through the accumulation of capital, but high rates still prevailed in the provinces. In Greece and Rome money was often lent and interest paid by the month. See art. 'Interest' in *Dict. Class. Ant.*, O. Seyffert, etc. W. H. BENNETT.

UTA (*Ὀὐρά*), 1 Es 5³⁰.—His sons returned among the temple servants under Zerubbabel. There is no corresponding name in Ezra and Nehemiah.

* A convenient and accessible summary of the more important of these older views will be found in Plumptre's article in Smith's *DB*.

† Josephus' statement, 'the breastplate and sardonyx (prob. intended by him to represent Urim and Thummim) left off shining two hundred years' before his time, is too absurd to require refutation.

UTHAI (*יֹחָי*).—1. The name of an individual or a family of Judah, settled at Jerusalem after the Captivity, 1 Ch 9⁴ (B Γωθελ, A Γωθι, Luc. Οὐθελ); called in Neh 11⁴ ΑΘΑΙΑΗ. 2. One of the sons of Bigvai who returned with Ezra, Ezr 8¹⁴ (B Οὐθελ, A Οὐθαί, Luc. Ὀθαί).

UTHI (B Οὐτού, A Οὐθί), 1 Es 8⁴⁰ = Uthai, Ezr 8¹⁴.

UZ (*יֻז*; LXX Ὀζ [Gn 22²¹ Ὀζ, Lag. Ὀζ; Job 1³² 42^{17b} ὁ γῆ [χώρα] ἡ Ἀδσ(ε)ϊτις]; Vulg. *Hus* [Gn 10²³ *Us*, Jer 25²⁰ *Ausitis*]).—1. The eldest son of Aram, and grandson of Shem (Gn 10²³). As the name of Aram is omitted in the parallel passage in 1 Ch 1¹⁷, Shem would there seem to have been his father. This, however, must be due to some oversight, the wanting passage being duly inserted in the LXX.—2. A son of Nahor by Milcah, the eldest brother of Buz and Kemuel 'the father of Aram' (Gn 22²¹). In the AV the name is transcribed Huz (Josephus has Οὐξος).—3. One of the two sons of Dishan, son of Seir the Horite (Gn 36²³).—4. The name of the native place of Job. Considerable difference of opinion exists as to how far the above names are connected. There would seem to be but little doubt that the genealogical statements in Gn 10 are ethnological and geographical rather than personal, and all that can be deduced from them therefore is, that the people of Uz were Semites of the Aramæan stock. That Uz the son of Nahor should be uncle of Aram and Chesed, is probably due to the existence of two distinct traditions concerning these Semitic races, the earlier one making him a son of Aram, and the later one attributing to him an earlier period than that of Aram. Nevertheless, it is not by any means impossible that a recurrence of names at a later date may have taken place, such a thing being by no means unusual, as the genealogical lists show.* Kautzsch, on the other hand, goes further, and maintains not only the connexion of Uz the grandson of Shem with Uz the son of Nahor, but also with Uz the son of Dishan as well.† This he regards as indicating that the district belonging to the tribe represented by Aram's firstborn originally included a considerable part of that of the Aramæan tribes. From this Uz in the wider sense is to be separated Uz in the narrower sense, which originated in the mingling of the Aramæan Uzites with another Semitic race—the 'Nahorites' of Gn 22¹⁵. Uz the grandson of Seir is to be explained in a similar manner as a mingling of (pre-Edomite) Horites and Aramæan Uzites in a part of Idumæa. The 'land of Uz' would therefore be a rather extensive geographical idea. All this seems to be confirmed by other coincidences of names accompanying that of Uz—the name of Aram, already referred to; Maacah, another son of Nahor (Gn 22²⁴, which forms part of a geographical name in 1 Ch 9⁶); Buz (Gn 22²¹) and Buzite (Job 32²); Chesed (Gn 22²⁴) and Kasdim (Job 1¹⁷ AV and RV 'Chaldeans'); Shuah, a nephew of Nahor (Gn 25²), and Shuhite (Job 2¹¹); also Kedem, the country whither Abraham sent Shuah, together with his other children by Keturah (Gn 25⁵), and the race to which Job belonged—the 'sons of the East' or Bēnē-Kedem (Job 1³).

The question of the position of the land of Uz would appear to be determinable within very narrow limits. In Job 1^{15, 17} it would seem that

* The Assyro-Babylonian royal lists likewise indicate that the repetition of renowned or venerated names was far from being an uncommon thing among the Semites in ancient times.

† It is to be noted that Frd. Delitzsch regards Uz, the grandson of Seir (Gn 36²³), as another person of the same name,—or a chance-likeness,—a theory supported by 1a 42², where Edom appears in temporary possession of Uz, either wholly or in part.

Job's estate lay open to the depredations of the Sabaeans and the Chaldeans, and was therefore on the edge of the great desert, agreeing with v.¹⁹, where the destruction wrought by the wind from that direction is referred to. The native countries of Job's friends likewise favour this view—that is, so far as those districts can be identified. Thus Eliphaz came from Teman (Job 2¹¹), which was to all appearance an Edomite locality, Teman being referred to in Gn 36¹¹ as a descendant of Esau and son of Eliphaz, which last was evidently, therefore, a genuine Edomite name. His second friend, Bildad 'the Shuhite,' came from Shuah, the district and name of one of the sons of Abraham and Keturah. The name of Job's third friend, Zophar the Naamathite, does not help, that district being unknown (see NAAMAH); but Elihu the Buzite must have come from a neighbouring country, as is implied by Gn 22²¹. The inscriptions of the kings of Assyria also throw some light upon the question. Thus Esarhaddon, in one of his expeditions to the west, passed through Bāzu, reaching, at a distance of 180 *kas-gid*, the country of Hazl, and these two districts are, with one consent, regarded as the Buz and Hazo of Gn 22²¹⁻²². Shuah is in like manner identified with the *Suhu* of Tiglath-pileser I., according to whom it lay one day's journey from Carchemish in the land of Hatti. In the same neighbourhood lay the land of *Yasbūkāa* ('the Yasbukians'), identified by Frd. Delitzsch with the Ishbak of Gn 25². This place, which is referred to by Shalmaneser II., was in the neighbourhood of Shuah, with which it is mentioned in the passage of Genesis here referred to. Shalmaneser received tribute from the land of Shuah; but whether it was at this time (B.C. 859) or 28 years later, when he sent an army to the same district, is not certain. On the second occasion he received tribute from a certain Sāsi, *mār māt Uzā*, 'a son of the land of Uzā,' who submitted to him, and whom he placed on the throne of Patinu. It may even be that the rulers of this latter place were counted among 'the kings of the land of Uz.' Uzā (or Ūzā, as analogy teaches may have been the more correct form) certainly lay, according to Frd. Delitzsch, W. and N.W. of Aleppo, at no great distance from Patinu, and must have been an important place; hence the raising of its king to the dominion of Patinu.*

Though the Assyrian inscriptions do not indicate clearly the land of Uz, and its identification with the land of Uzā is not so satisfactory as could be wished,† they at least confirm the indications given in the Book of Job. Tradition places the home of the patriarch in the Haurān, where a monastery bearing his name exists (it is situated in the *Wādy el-Lebweh*). He is said to have been a native of *Jōlān*, and early Arabian authors state that he was born in the neighbourhood of *Nawā*. Not far from the monastery is shown the *Maḳām Eyyūb*, or 'Station of Job,' his well, and the trough in which he is said to have washed after his trials were over. His tomb is shared by a Mohammedan saint, and on a hill close by is a stone upon which he is said to have leaned when first afflicted. The currency of the tradition among both Christians and Mohammedans living in the district implies that it is of considerable antiquity. In view of the testimony of the Assyrian inscriptions as to the position of the land of Uz, how-

ever, Frd. Delitzsch would prefer to regard it as being situated rather in the neighbourhood of Tadmor (Palmyra). According to Josephus (*Ant.* I. vi. 4, 5) it embraced Trachonitis and Damascus, and the LXX represents the patriarch as having lived in Ausitis, on the borders of Edom and Arabia (there is no doubt that it was closely connected with the former country), so that the neighbourhood of Palmyra would seem to be much too far N.E. It is difficult, however, to fix, at this distance of time, the boundaries of a district which is known to have been fairly extensive, and which probably varied in extent, in consequence of political changes, from time to time.

LITERATURE.—Kautzsch in Riehm's *Handwörterbuch*, s.v.; Frd. Delitzsch in ZK^F II. 87 ff. (cf. his *Paradies*, 259); Baedeker's *Palestine and Syria*, 407. T. G. PINCHES.

UZAI (יִזְאִי). — Father of Palal who helped to rebuild the wall, Neh 3²² (B Ebel, A Eūfal, Luc. Oūfal).

UZAL (יִזְאֵל, Sam. יִזְאֵל). — Name of a son of Joktan, Gn 10²⁷ (A Aīzān, I Ch 1²¹ (A Aīzān, B om., Luc. Oūzān), but figuring as a local name in Ezk 27¹⁹, according to one interpretation [reading יִזְאֵל ('from Uzal,' so RVm), with Hitzig, Smend, Cornill, cf. *al.*; B ēē 'Aōān, A ēē 'Aōān]. With this word Gesenius compared *Euzelis of Hindu*, mentioned as a market town in a passage of John of Ephesus (6th cent. A.D.) preserved by Dionysius of Tell-Mahre (*op. Assemani, Bibl. Or.* i. 361), who supposed it to be situated in the interior of the Indian (i.e. Arab) country, beyond the territory of the Himyar. This may well be identical with Uzal (Al-Bekri, p. 206), Izal or Azal (Yakut after Hamdani), which the Arab geographers declare was the former name of San'a, now capital of Yemen. The name was, they think, changed to San'a either in honour of a queen of that name, or of San'a son of Azal; or it may have been given the place by the Abyssinians, in whose language it means 'fortress.' The name San'au is found in an inscription which Glaser (*die Abessinier*, etc. p. 117) assigns to the 2nd cent. A.D. An earlier name (according to him) was Tafidh (*Skizze*, ii. 427); none of these names appear to be known to the classical geographers of Arabia (Pliny, Ptolemy, etc.), who go rather fully into the names of places and tribes in Arabia Felix. The Arab tradition, however, regarded it as the most ancient city in the world, and the seat of the 'kings of Yemen': the former theory being apparently due to the derivation of the name Azal from the Arabic *azal*, 'eternity,' or to the alternate form Uwal (Harris, *loc. citand.*, p. 319), which might be rendered 'first.' If, however, there be any truth in its great antiquity, and its having been a metropolis in ancient times, it must be identical with one of the capitals mentioned by Pliny and Ptolemy; but with which cannot at present be decided. The name of the city must therefore have changed repeatedly; and in the use of the name Azal or Izal in the century before Mohammed we are justified in seeing with Glaser (*Skizze*, ii. 427) the influence of the Jews. Their influence in these regions appears from the statements of the Syriac chronicler to have been considerable; and early Arabic writers occasionally preserve traditions dating from the time of their ascendancy. A place was shown at San'a where sixteen prophets had been slaughtered at once (Ibn Rustah); and Wahb Ibn Munabbih (died c. 735 A.D.) professed to have found in a sacred book the text, 'Azal, Azal, though all be against thee, yet will I be gracious unto thee,' which seems to come from Is 29¹⁻³ with Azal substituted for Ariel (*Taj al-'arus*). Whether, then, the place was called Azal by conjectural identifica-

* Whether Patinu be connected etymologically with Batanea or not is uncertain, but is worthy of consideration.

† There is doubt as to the sibilant, whether it be really z (z) or z (i). In addition to this, a long terminal vowel would not be expected. Delitzsch evidently regards the word as a gentile adjective; but if this be the case, there is a mistake in the text, *Uz-za-a* having been written for *Uz-za-a-a* (= *Uzāa*).

tion of it with the son of Joktan, or Azal was an old name revived by the Jews, is not clear; the latter supposition is rather the more probable, because an Arabian locality, Azalla, is mentioned in the campaign of Assurbanipal (*KIB* ii. 221), and Azal rather than Uzal is the form that is best attested. The objection to the identification raised by Glaser (*l.c.* 436) on the ground that of the objects mentioned by Ezekiel as exported from Uzal only iron is really found in the neighbourhood, whereas spices are not to be found in the whole of Yemen, seems wanting in weight, since Šan'a may have been a depôt for them; rather more force attaches to his objection that the port of Šan'a would probably have been Aden (mentioned by Ezekiel in this context) rather than Waddan (VEDAN) and Javan. But, indeed, the difficulties of both text and interpretation in the passage of Ezekiel are so great as to render it unsuitable for the deduction of inferences.

Of the beauty and wealth of Šan'a glowing descriptions are given by Arabic writers, and modern travellers (e.g. W. B. Harris, *A Journey through the Yemen*, 1893, pp. 299-322) confirm them. It is at an elevation of 7250 feet above the sea-level, with a mountain (Jebel Nujum) rising abruptly on the east. In the rainy season a torrent of water runs through the river-bed, which occupies the middle of the town; Ibn Rustah (*Bibl. Geogr. Arab.* vii. 110) says it is not much narrower than the Tigris, and was in his time used for irrigation. The climate varies little during the whole year; and of most produce there are two crops. The fortress and temple of Ghumdan, destroyed by the Caliph Othman, was the most magnificent building in Arabia. In the 7th cent. of Islam the Zaidite Imams made it their capital. Of the forms of the name, *Izal* appears to be the best attested; the LXX translators clearly connected the second syllable with *Il* (god), and the first perhaps with the god *As* (who appears in some Punic proper names) or some other deity. Other etymologists seem scarcely more successful.

D. S. MARGOLIOUTH.

UZZA (אָזָא).—1. The eponym of a Benjamite family, 1 Ch 8⁷ (B Naavá, A 'Ašá, Luc. 'Ašá). 2. The head of a family of Nethinim that returned, Ezr 2⁴⁰ (B Oúrá, A 'Ašá, Luc. om.)=Neh 7⁵¹ (B 'Ošé, A 'Ošé, Luc. 'Ašá). 3. The driver of the cart on which the ark was removed from Kirith-jearim, 2 S 6^{3. 6. 7. 8}=1 Ch 13^{7. 9. 10. 11}. Uzza's sudden death at a place called, in commemoration of this untoward incident, Perez-uzzah ('breach of Uzzah'; cf. artt. CHIDON and NACON), led to the temporary abandonment of David's project of transporting the ark to Jerusalem. Uzza's death was attributed by the popular mind to anger on the part of Jahweh at his having presumed to handle the sacred emblem too familiarly. There are, however, points of obscurity in the narrative, and the text is in several instances quite uncertain. See Driver, Wellh., Budde, Löhr, H. P. Smith, *ad loc.*

The name appears as אָזָא, Uzza, in 2 S 6³, 1 Ch 13^{7. 9. 10. 11}, as אָזָא, Uzzah, in 2 S 6^{7. 8}. B has everywhere 'Ošá, which is read also by A in the Chron. passages; A has in 2 Sam. 'Ašá, once (6³) 'Ašá.

4. Manasseh and his son Amon were buried in the 'garden of Uzza' (אָזָא), 2 K 21^{18. 20} (LXX κήπος 'Ošá), which was attached to the palace of Manasseh. The conjecture of Stade (*GV I* i. 500, ii. 679), that אָזָא here=אָזָא (Uzziah), has found wide acceptance (but see footnote to next col.).

J. A. SELBIE.

UZZAH (אָזָא).—1. The name of a Merarite family, 1 Ch 6³⁰⁽¹⁴⁾ (B 'Ošá, A 'Ašá, Luc. 'Ošá). 2. See UZZA, N. 3.

UZZEN-SHEERAH.—See SHEERAH.

UZZI (אָזִי; 'Ošé).—1. A descendant of Aaron, 1 Ch 6^{3. 6. 31} [Heb. 5^{31. 32} 6³⁰], Ezr 7⁴. 2. The eponym of a family of Issachar, 1 Ch 7^{2. 3}. 3. The name of a Benjamite family, 1 Ch 7^{7. 9}. 4. A Levite, son of Bani, overseer of the Levites dwelling in Jerusalem, Neh 11². 5. The head of a priestly family, Neh 12^{19. 41}.

UZZIA (אָזִיא, prob. same as אָזִיא, Uzziah; B 'Ošé, A 'Ošá, Luc. 'Ošias).—One of David's heroes, 1 Ch 11⁴.

UZZIAH (אָזִיָּה and אָזִיָּה [on the name see next art.]).—1. A king of Judah. See next article. 2. A Kohathite Levite, 1 Ch 6³⁴ (Heb. 9) (B 'Ošé, A⁷ sup ras 'Ošias). 3. The father of an officer of David, 1 Ch 27²⁰ (B 'Ošé, A 'Ošé). 4. A priest who had married a foreign wife, Ezr 10²¹ (B 'Ošé, A 'Ošé, Luc. 'Ošias). 5. Name of a Judahite family after the Exile, Neh 11⁴ (B 'Ašé, A 'Ašé, A 'Ošé, Luc. 'Ošias). The LXX reads 'Ošé also in Neh 11⁵ for אָזִיָּה HAZAIAH of MT.

UZZIAH (AZARIAH).—The Heb. names vary in form. We have אָזִיָּה (2 K 15^{22. 34}, Is 1¹ 6¹ 7¹, 2 Ch 26^{10. 27}) and אָזִיָּה (2 K 15^{13. 30}, Hos 1¹, Am 1¹, Zec 14⁵). The meaning is 'J' is my strength.' We have a Heb. parallel in אָזִיָּה and in the Phoen. עֲזִיָּה. The alternative Heb. name אָזִיָּה occurs in 2 K 15^{8. 9}, while אָזִיָּה is found in 2 K 14²¹ 15^{1. 7} etc., and also 1 Ch 3¹². The meaning of the alternative name is similar to that of אָזִיָּה, viz. 'J' hath helped (me).'

In Assy. the names *Ašur-nirāri* ('Ashur is my help') and *Rammān-nirāri* ('Rammān is my help') are parallel in thought and expression to both the alternative proper names of the Heb. monarch, while the Phoen. furnishes a close analogy to the latter in עֲזִיָּה 'Baal is (my) help', represented in Latin by *Hasdrubal*; or, with the elements of the name reversed, in אָזִיָּה (cf. also אָזִיָּה, prob. 'my help is Baal'; and see Bloch, *Phön. Glossar*, p. 49). The Gr. forms are 'Ošias ('Ošias) and 'Ašias. In a number of instances, as in 2 K 15^{13. 32} (and in v. 24 in A), LXX substitutes 'Ašias for Uzziah, whereas in 2 K 15³⁰ 'Ašias is substituted for 'Ašias, which is the reading of A. In Is 6¹ 7¹ 'Ošias is the form preserved in B¹AQ. It is quite possible that the king had really only one name, אָזִיָּה, and that the name אָזִיָּה (Uzziah) may have arisen through a corruption of the text, the early form of ' (*yōd*), viz. אָ, being confounded with an imperfectly written ר (*resh*), viz. אָ.

Uzziah was the son of Amaziah king of Judah, and, according to the redactor of the Book of Kings (see Kittel's *Com.*), ascended the throne of Judah at the age of sixteen, and in the 27th year of Jeroboam king of Israel (2 K 15¹). It is well known, however, that such synchronisms are of no chronological value, and lead to endless confusion. We can only assert that both these kings were contemporaries. Whether Uzziah's reign extended to 52 years is uncertain.

The record of his reign in 2 K 14 and 15 is singularly brief. Though the worship of the high places—the normal cult of Israel and Judah—still continued, the verdict of the Deuteronomic redactor is favourable to him, as it was to the memory of his father, Amaziah; he 'did what was right in the eyes of the Lord' (2 K 15²).

The record in the Book of Kings gives us no information respecting the events of this long reign, except that Uzziah fell a victim to leprosy towards its close (2 K 15⁵). But in 14²² we probably have a fragment from the Annals which refers to his reign, though its somewhat strange position after the section by the redactor (vv. 15-21) renders

* This seems to us more probable than the view of Stade (*GV I* i. p. 569 footn. 1) that the name 'Azariah was abbreviated to אָזִיָּה (2 K 21¹⁸ 'garden of Uzza', cf. 2 S 6³), and that the name Uzziah grew out of the latter. For 'Uzza' is not improbably the name of a deity, as 2 K 21¹⁸ and 2 S 6³ seem to indicate. On the Arabian Al-'Uzza see Baethgen, *Beiträge zur Sem. Religionsgesch.* p. 114; Korān, 53. 19; Wellhausen, *Recht*, p. 34 ff.

its interpretation uncertain. We there read that Elath, the chief port of Edom, which was of great commercial value to Judah as an outlet as well as inlet for commerce, was again recovered to Judah by the successful military enterprise of Azariah after his father's disastrous overthrow by Jehoash king of Israel had entailed its temporary loss. Owing to the leprosy which attacked Uziah towards the end of his long reign, he was compelled to go into retirement,* while his son Jotham discharged the royal functions (257) in his place.

Such is all that can be learned about this monarch in 2 Kings. The Book of Chronicles (2 Ch 26¹⁻²⁰) adds to the above narrative a number of details. (1) We have an account of the military preparations and exploits of the king, and also of his agricultural pursuits. (2) We have a *Haggadic* narrative attached to the fact of the king's leprosy which ascribes the latter to Divine judgment on him for attempting to fulfil the priestly function of offering incense on the altar of incense. Kittel in his *History of the Hebrews* attempts to defend the historicity of this conflict between the royal and priestly authority;† but it is quite clear that the form of the narrative is based on the tradition of the P passages in Ex 30^{1-6, 7}, Nu 17⁹ 18⁷. Furthermore, the name of the chief priest *Azariah* probably originated from the older alternative name of Uziah himself, who, like Solomon and all royal personages (cf. the Assyrian kings who assumed the office of *patesi*), exercised priestly functions.

But the *military* exploits and preparations of Uziah recorded in 2 Ch 26¹⁻¹⁶ cannot be dismissed as unhistorical, since they serve to explain facts in subsequent history which would otherwise remain obscure. We read that Uziah equipped an armed host of 307,500 men, and fortified Jerusalem, and provided it with engines of war. He also conducted a successful campaign against the Philistines, and stormed the cities of Gaza, Jabneh, and Ashdod, and also conquered the Arabians and Ammonites. Subsequently recorded events render many if not all of these details exceedingly probable, though here, as so often in Chronicles, the numerical statements are exaggerated. (a) That Jerusalem was fortified and provided with means of defence during the reign of Uziah, is rendered exceedingly probable by the account of its defence in the days of Hezekiah, which has come to us not only in the record of 2 K 18^{13, 17}, but in the Taylor cylinder of Sennacherib (col. ii. 69-col. iii. 41), which, in describing the invasion of Palestine by Sennacherib, expressly mentions (1) the forty-six fortified towns (col. iii. 13) captured by the Assyrians; (2) that the Philistine town Ekron (*sr Amkarruna*) was under the control of Hezekiah, and that the king Padi, a puppet of Assyria, was delivered up to the king of Judah (col. ii. 70 ff.). Now, it is reasonable to conclude that the control of Philistia by Hezekiah was probably due to the strong military policy of Uziah described by the Chronicler, who must have derived his information from annals of his reign from which the redactor of the Books of Kings did not draw. Certainly, the reign of Ahaz, distracted by the troubles of the Syro-Ephraimite invasion and weakened by subservience to Assyria, was not the time when strong defensive measures would be adopted. In-

deed we know that Philistia was instigated to revolt by the confederacy of the two Northern kings. (b) The mention of Arabians (col. iii. 31) among the troops which defended Jerusalem against Sennacherib sustains the statement of the Chronicler that Uziah subjugated the Arabs, and this is probably to be connected with the recovery of Edom and the port of Elath to which 2 K 14²² refers. (c) Kittel lays stress on the prosperity of Judah in the days of Ahaz, of which Is 2 and 3 furnish abundant evidence. This is best explained as due to the consolidation of the resources and power of the Southern Kingdom during the long and prosperous reign of Uziah described in 2 Ch 26. This view is ably sustained by McCurdy in the *Expositor*, Nov. 1891, p. 388 ff.

It was formerly held by Assyriologists, including especially Schrader, that the records of Tiglath-pileser prove that Uziah (Azariah) was the head of a powerful confederacy of Northern Hamathite States against Assyria. Unfortunately, the passages in which reference is made to Azariah (*Az(Iz)ri-ya-u*), whom Schrader identified with Uziah (*KGF* 399-421), are much mutilated. The following is a translation of the passages so far as they can be deciphered and interpreted on the basis of Rost's edition of Tiglath-pileser's Annals, lines 101-111—

- 101-2 . . . my officer as ruler of the province I placed over them
[gifts and tribute like the Assyrian imposed on them]
103 in the further course of my campaign the tribute of the
kings
104 I received Azariah king of Ja-u-di like . . .
105 . . . zariah of Ja-u-di . . .
[106 and 107 seem to refer to the towns in which Azariah
sought refuge]
108 by the attack of the light-armed (?) of the bodyguard . .
[of the approach of
109 the Assyrian troops] the numerous, they heard [their
heart] feared
110 [the town] I destroyed, laid waste, burnt down
111 . . . placed themselves on the side of [Azar]ah streng-
thened (?) him . . .

Lines 125-132 refer to the 19 districts of Hamath which 'placed themselves on the side of Azariah,' the series being enumerated from South to North, the most southerly being Arkā, Zimarra, Usnu, Sianna, and Šimarra, and the most northerly Ellitarbi and Bumani.

Now, even twenty years ago, the identification of the *Azri-ia-u* of Tiglath-pileser's Annals with Azariah of Judah was disputed, for example, by Gutschmid (*Neue Beiträge zur Kunde des alten Orients*, p. 55 ff.) and by Wellhausen (*Jahrbücher für deutsche Theologie*, xx. 632). But at that time there were certainly many reasons why the identification made by Schrader should have been considered sound. No other land *Ja-u-di* was then known except Judah. Judah was called by that name in the Nabī-Junus inscription preserved in Constantinople, in which Sennacherib refers to his subjugation of Hezekiah (of which the following is a transcription, line 15: *rap-šu na-gu-u (mātu) Ja-u-di Ha-za-ki-a-u šarri-šu i-mid ap-ša-a-ni*), while the references to the same king in connexion with (*mātu*) *Ja-u-da-ai* in the Prism inscription of Sennacherib (col. ii. 72, iii. 12, 13) need not be cited here. Indeed Tiglath-pileser himself (2 Rawl. 67, line 61) refers to *Ja-u-ha-zi (mātu) Ja-u-da-ai* in close juxtaposition to the rulers of Ashkelon and Edom, so that it is absolutely certain that *Ja-u-ha-zi* (= Joahaz) is the Assyrian name of king Ahaz. Moreover, the fact here mentioned, that Ahaz paid tribute to the Assyrian monarch, is certified by 2 K 16³. Certainly, the evidence for Schrader's identification seemed cogent.

Nevertheless, there are serious difficulties in the way of its acceptance. In the first place, the geographical conditions militate strongly against it. The nineteen districts of Hamath can hardly have depended for support on the ruler of so distant a realm as Judah. Secondly, the chronological argument tells decisively against it. For

* The text here is uncertain. The Heb. text has בֵּית הַבַּיִת, LXX *οἱ οἰκοδομοὶ* (cf. 2 Ch 25²¹). Judging from the well-known meaning of בַּיִת, this can mean only 'in a free house,' i.e. free from the intrusion of others. The expression, however, is very strange, and Kittel is warranted in accepting the ingenious emendation of Klostermann, בֵּית הַבַּיִת 'in his house unmolested,' בַּיִת being an adverb with the ending בֵּית, as in בֵּיתָא (Gn 92²).

† *Gesch. der Heb.* ii. p. 281.

if Uzziah was the mainstay of a conspiracy of nineteen Hamathite States in 738 B.C., which is the year which Assyrian data would lead us to assign to its overthrow, we can allow only three years for the leprosy of Uzziah, the interregnum of Jotham, Jotham's sole reign, and the Syro-Ephraimite war against Judah. *Thirdly*, the discovery of the Zinjerli inscription (on the stele erected by 𐤅𐤁𐤁 the son of Panammu, king of Sam'al, to his father) has thrown a fresh light on the problem. There we find mention of a land 𐤅𐤁 (and also on the stele of Hadad, erected by Panammu its king). We might with Winckler regard the 𐤅 here as *hamza* and pronounced as *u*, and thus read the word (as the Assyrians did) *Ja'udi*. This country lay north of the Orontes and bordered on the land Unki, and it is possible that Sargon refers to it in his Nimr. insc. line 8: (*mātu*) *Ja-u-du ša asaršu rāku*, 'J. whose situation is remote.' The mention of Hamath in the same line lends colour to this view. The objection that the name *Azrijahū*, with its Heb. name of deity, clearly indicates a Hebrew personality, loses force when we remember that Hamath, as we learn from the same inscription of Sargon, had a prince called *Jau-bi'di*, elsewhere called *ilu-bi'di*. This shows that a deity *Jāhu* was also worshipped in those regions. *Lastly*, the close similarity which subsisted between the language of the Zinjerli inscr. and Hebrew renders it in no way improbable that the land Ja'di should have a ruler named Azariah. The capital of the land was Kullani, the Calno of Is 10⁹.

This is the evidence based on the arguments used by Winckler (*Alltest. Forsch.* i. (1893) pp. 1-23; cf. *KAT* i. 54 ff., 262) for disconnecting the inscr. of Tiglath-pileser from any reference to Uzziah (Azariah) of Judah.* McCurdy, however, upholds Schrader's position (*HPM* i. 413 ff.), but the arguments of Winckler have been adopted by Hommel (art. ASSYRIA in this Dict. vol. i. p. 185, footn.†), Guthe (*GVI* p. 188), Maspero (*Passing*, etc., 150). The chronological difficulties which beset the biblical student of the latter half of the 8th cent. become in this way somewhat lessened. The death-year of Uzziah may be placed, as Winckler suggests, in 739 B.C., but it may easily be earlier (*KAT* i. 320)—in fact as early as 750 (Winckler, *Gesch. Israel's*, Theil i. p. 179). Cf. Cheyne, *Introduction to Isaiah*, pp. 4, 16 ff. OWEN C. WHITEHOUSE.

UZZIEL (𐤅𐤅𐤗 'my strength is El,' cf. the name 𐤅𐤅𐤗 *Uzziah*; LXX 'Ου(ε)ζιά).—1. A son of Kohath, Ex 6^{18, 22}, Lv 10⁴, Nu 3^{19, 30}, 1 Ch 6^{2, 18} 15¹⁰ 23^{12, 20} 24²⁴; with gentilic name the *Uzzelites* (𐤅𐤅𐤗𐤁𐤏), Nu 3²⁷, 1 Ch 26²³. 2. A Simeonite; one of those who took part in the expedition to Mt. Seir, 1 Ch 4⁴². 3. Eponym of a Benjamite family, 1 Ch 7⁷. 4. A musician, of the sons of Heman, 1 Ch 25⁴ (called in v. 18 AZAREL). 5. A Levite, of the sons of Jeduthun, 2 Ch 29¹⁴. 6. One of the guild of the goldsmiths, who took part in the repairing of the wall, Neh 3⁸. 7. See JAAZIEL.

* If the view advocated in this art. be correct, the statement in art. CHRONOLOGY or OT (vol. i. p. 401^b *ad fin.*) will have to be modified accordingly.

V

VAGABOND.—This English word is used in AV in the sense of *wanderer* (Lat. *vagabundus*, from *vagari* to wander). It is applied to Cain, Gn 4¹² 'A fugitive and a vagabond shalt thou be in the earth' (𐤅𐤁𐤁, LXX στέρνων καὶ τρέμων, Symm. ἀνδραγατος καὶ ἀκαρδιστος, Vulg. *vagus et profugus*, Tind. 'A vagabunde and a rennagate,' RV 'A fugitive and a wanderer'), 4¹⁴; Ps 109¹⁰ 'Let his children be continually vagabonds, and beg' (𐤅𐤁𐤁 𐤅𐤁𐤁 𐤅𐤁𐤁; Cov. 'Let his children be vagabundes and begg their bred'). So in Jg 11³ Cov. 'There resorted unto him [Jephthah] vagabundes, and wente out with him'; Fuller, *Holy War*, 206, 'Being to shape their course into Palestine, they went into France; showing they had a *vertigo* in their heads, mistaking the West for the East; or else, that like vagabonds they were never out of their way'; Goldsmith, *Citizen*, vii. 'He who goes from country to country, guided by the blind impulse of curiosity, is only a vagabond.'

The adj. occurs in Ac 19¹³ 'Certain of the vagabond Jews, exorcists' (τῶν περιερχομένων ἰουδαίων, RV 'strolling'). So Melvill, *Diary*, 361, 'To take order with the pure [= poor] that there be not vagabund beggars'; Shaks. *Ant. and Cleop.* i. iv. 45—

'Like to a vagabond flag upon the stream.'

J. HASTINGS.

YAHAB (𐤅𐤁).—An unidentified locality, mentioned only in the obscure quotation from the book of the WARS OF THE LORD in Nu 21¹⁴ (BA Zwiß, F and Luc. Zwiß). See SUPHAIL.

YAIL.—See VEIL.

YAIZATHA (𐤅𐤁𐤗𐤕; B Ζαβουθαίος, A Ζαβουθαδ, K Ζαβουθεθάρ, Luc. Ἰζουθάθ).—One of the ten sons of Haman, Est 9⁷. The name may be = Pers. *Vahyaz-dāta*, 'given of the Best one' (cf. Benfey, *Pers. Keilinschr.* [1847] 18, 93; F. Spiegel, *Altpers. Keilinschr.* 240).

VALE, VALLEY.—*Vale* stands in AV for two Hebrew words 𐤅𐤁𐤁 and 𐤅𐤁𐤁𐤏; and *valley* for five Hebrew words, 𐤅𐤁𐤁𐤏, 𐤅𐤁𐤁, 𐤅𐤁𐤁𐤏, 𐤅𐤁𐤁𐤏, and one Greek word, 𐤅𐤁𐤁𐤏 (Lk 3³¹). Of these words, the meaning and use of 𐤅𐤁𐤁, a *broad plain between hills*, 𐤅𐤁𐤁𐤏 *lowland* (so always in RV), and 𐤅𐤁𐤁 *wādy*, have been dealt with under PLAIN, 3, 7, and RIVER, 3, respectively; so that 𐤅𐤁𐤁, 𐤅𐤁𐤁𐤏, and 𐤅𐤁𐤁𐤏 alone remain to be considered here.

1. 𐤅𐤁𐤁 (*gai*), always 'valley' in both AV and RV, is a narrow valley, and would be more exactly represented by *glen* or *ravine*. The *gai*'s mentioned in the OT are—the v. of Hinnom (Jos 15⁸ and frequently; 'the valley,' Jer 2²), which gave its name to the 'valley-gate' of Jerus. (2 Ch 26⁹, Neh 2^{13, 15} 3¹³); of Iphitah-él, Jos 19^{14, 27}, on the border between Zebulun and Asher; of Zebō'im (the hyenas), 1 S 13¹⁸, S.E. of Gibeah; of Salt, apparently somewhere near Edom (2 S 8¹³ = 1 Ch 18¹², cf. Ps 60¹⁰); 2 K 14⁷, 2 Ch 25¹¹); the v. of craftsmen, or smiths (1 S 13¹⁹; cf. *HGHL* 160 f., 211), 1 Ch 4¹⁴ (RV here *Ge-harashim*), Neh 11³⁰, near Lod (Lydda); and of Zephathiah, 2 Ch 14¹⁰, near Marēsha (though prob. 'in the v. north of M.' shor'd be read with LXX; cf. Buhl, 89), no doubt the *Wādy el-Afranj*, *HGHL* 231, 233. Valleys not expressly named are—the v. in front of Beth-pe'or, a station of the Isr., in which Moses

was buried (Nu 21³⁰, Dt 3²⁹ 4⁴⁶ 34⁶); one on the N. of Ai (Jos 8¹¹); one near Gedor (1 Ch 4³⁹; but see GEDOR, 2); one in the 'vale' of Elah (1 S 17³), perhaps the 'deep trench which the combined streams' of the W. es-Sur and the W. el-Jindy 'have cut through the level land' below the point where they meet (HGHL 228); the 'valley of vision,' in or close to Jerus. (Is 22^{1,2}); one close under Samaria (Is 28^{1,4}, Mic 1⁶); one mentioned as the ideal burial-place of the hosts of Gog (Ezk 39^{11, 11, 12}); and the ravine which Zech. (14^{4, 5, 6}) pictures as being split through the Mt. of Olives, when J^r descends upon it to deliver His people.

The word occurs also, without reference to specific localities, in Ps 23⁴ ('a ravine of deathly gloom,' fig. of a situation of loneliness and peril); Is 40⁴ (LXX φάραγξ, whence Lk 3³); and in the plur. generally (usu. opp. to mountains), 2 K 2¹⁸, Ezk 6⁷ 7¹⁶ 31¹² 32⁵ 33⁵ 36^{4, 6}. In 1 S 17^{32a} (RV 'to Gai') 'to Gath' is evidently to be read with LXX and most moderns; see v. 32b. In the Apocrypha 'valley' stands for φάραγξ, Jth 2⁸ 7⁴ 11¹⁷ 12⁷ 13¹⁰; and for ἀβύσσος, Jth 4^{1, 7, 17} 10^{10, 11}.

2. ἔμεκ *'emek* (EV mostly *valley*; AV *vale* in Gn 14^{8, 10} 37¹⁴, to which RV adds Gn 14¹⁷, Jos 8¹³ 15⁸ 18¹⁶, 1 S 17¹⁹ 21⁹). *'Emek* (lit. *depth, deepening*) is 'a highlander's word for a valley as he looks down into it, and is applied to wide avenues running up into a mountainous country, like the Vale of Elah, the Vale of Hebron, and the Vale of Ajialon' (HGHL 384). It thus denotes something broader than a *gai*, but less extensive or plain-like than a *bi'ah* (PLAIN, 3); * and it is a pity that, for distinction, especially from *gai* ('valley'), it has not in AV been uniformly represented by 'vale.'

The importance of distinguishing specific geogr. terms in the OT was long ago pointed out, and well illustrated, by Stanley, *S. and P.*, Appendix, pp. 475-534; cf. HGHL 653 ff. The student will find it a good plan, in the case both of these and of other synonyms (cf. CREEPING THINGS; OFFER, OFFERING) which are confused in EV, to mark on the margin of his RV either the Heb. word used or its proper English equivalent.

The following are the *'emek*s mentioned in the OT:—the 'vale' of Siddim, Gn 14^{8, 10}; of Shaveh, Gn 14¹⁷, said there to be the same as the 'King's Vale,' which is mentioned also in 2 S 18¹⁸† (according to Jos. Ant. VII. x. 3, 2 stadia from Jerus.); of Hebron, Gn 37¹⁴; of Achor, Jos 7^{24, 28} 15⁷, Hos 2¹⁵, Is 65¹⁰; of Ajialon, Jos 10¹³, a 'broad fertile plain gently sloping up' between the hills 'to the foot of the Central Range' (HGHL 210); of Rephaim, S.W. of Jerus., on the border between Judah and Benj., Jos 15⁸ 18¹⁶, 2 S 5^{18, 22} 23¹² (= 1 Ch 14^{9, 13} 11¹⁵), Is 17³; of Jezreel, Jos 17¹⁰, Jg 6³³, Hos 1⁵, not the 'great plain' of Esdraelon (Jth 1⁸), W. of Jezreel, stretching towards Carmel, but 'the broad, deep vale E. of Jezreel which descends to the Jordan' (HGHL 384 f.); of Kēziz, Jos 18²¹ (RV *'Emek-kezi*, as the name occurs in an enumeration of cities), somewhere in E. Benjamin; of Elah, 1 S 17^{2, 19} 21⁹, now prob. the W. es-Sunt, 18 m. W.S.W. of Jerus. (HGHL 226 f.); of Beracah ('Blessing'), 2 Ch 20^{26, 28}, in or near the wilderness of Tekoa (v. 20); of Succoth, Ps 60⁶=108⁷, the broad part of the Jordan valley about Succoth, near the ford Dāmiyeh, S. of the Jabbok (cf. Jos 13²⁷ 'in the vale,' of the same locality); of Baca ('weeping'), Ps 84⁶; of Gibeon, Is 28²¹ (prob. some part of one of the gorges which lead down from Gibeon to Ajialon, Jos 10¹⁰⁻¹³; cf. HGHL 210); of Jehoshaphat, Jl 3^{2, 12} (perhaps the fairly broad and open

part of the *nahal* of the Kidron, between Jerus. and the Mt. of Olives), called in v. 14 by the emblematic name 'vale of decision' (i.e. of judgment).

'Vales' without specified names are alluded to in Jos 8¹³ ('the vale' near Ai, rightly distinguished in RV from the 'valley' (*gai*) of v. 11); 13¹⁹ (in Reuben); 19²⁷ (a place Beth-hā'emek, in Asher); Jg 5¹⁵ (the Plain of Esdraelon); 7^{1, 8, 12} (apparently the vale of Jezreel, 6³³); 18²³ ('the vale that belongeth to Beth-Rēhob'); 1 S 6¹³ (near Beth-shemesh; the broad valley, the upper part of the *Wady es-Sarār* (the ancient *nahal* of Sorek), opening out westwards and leading down in the direction of Ekron; (cf. HGHL 218 f.); 1 S 31⁷=1 Ch 10⁷ (prob. the vale of Jezreel); Jer 21¹² (very uncertain; the Tyropoeon valley? or as Jl 3², above? or not of Jerusalem at all?); 32³⁰ (the *gai* of Hinnom); 47³ (of the Phil. plain, though hardly suitable, in spite of HGHL 653; read prob. 'the remnant of the *Anākim*' [αἱρεῖς for ἀπῖρες; see Jos 11²², with LXX, Ges., Hitz., Graf, Giesebr. etc.]; 49⁴ (in Ammon). The word is also used generally of 'vales' in different parts of the country, mentioned either with reference to their fertility (cf. 1 S 6¹³, Is 17³), or as suitable for war-chariots to deploy in; Nu 14²², Jos 17¹⁶, Jg 12^{3, 34}, 1 K 20²⁸, 1 Ch 12¹⁵ 27²⁹, Job 39^{10, 21} ('he paweth in the vale' of the war-horse), Ps 63¹², Ca 2¹ ('the lily of the valleys'), Is 22⁷ (about Jerus.), Jer 48³ (in Moab), Mic 1⁴.

S. R. DRIVER.

VANIAH (וַנְיָה [but text dub.]; B Οὐνεχιά, A Οὐονιά, N Οὐνεχιά, Luc. Οὐανιά).—One of the sons of Bani, who had married a foreign wife, Ezr 10²⁶.

VANITY.—1. לֶהָרִי (1) lit. a breath of air, as a gentle breeze, Is 57¹²; a breath of the mouth, Ps 144⁴; hence (2) fig. evanescence, emptiness, La 4¹⁷, Job 9²⁹; (3) idols and idolatry, Dt 32²¹, Jer 10⁸, 2 K 17¹⁷, Ps 31⁶; (4) exhalation, mist, Ec 6⁴ 11⁸ (cf. ADEL [wh. see], Gn 4²). 2. אֶרֶץ (1) labour, sorrow, Hos 9⁴, Hab 3⁷ (cf. Ben-oni for Benjamin, Gn 35¹⁵); (2) nothingness, Is 41²⁹; worthlessness, sinfulness, Job 31², Pr 17⁴; (3) idols and idolatry, Is 60³, 1 S 15²³ (cf. Beth-aven for Beth-el, Hos 4¹⁵ [see Cheyne, p. 69]; Aven for On in Egypt, Ezk 30¹⁷; Aven for Heliopolis in Syria, Am 1⁵). 3. אָוֶן (1) wickedness, Job 11¹¹; (2) calamity, Is 30²⁶; (3) falsehood, Ps 12²; (4) emptiness, uselessness, Ps 60¹¹, Mal 3⁴, Jer 2²⁰, Ps 127¹. 4. קֵוֶן (1) emptiness, Jer 51⁴; hence (2) fig. a useless, worthless thing, Ps 21⁴ 73¹³, Lv 26¹⁶, Is 49⁴, Hab 2¹². 5. מָוֶה (1) waste, Gn 1², Dt 32¹⁰, Is 24¹⁰; hence (2) fig. emptiness, uselessness, Is 49⁴ 41²⁹ 45¹⁰. Greek ματαιότης, what is devoid of truth and fitness, 2 P 2¹⁸; perverseness, Eph 4¹⁷; frailty, Ro 8⁰; also ματαιολογία, empty talk, 1 Ti 1⁶; ματαιολόγος, idle talker, Tit 1¹⁰; μάταιος, devoid of force, truth, success, result, Ja 1²⁵, 1 Co 15¹⁷ 3²⁰, Tit 3⁹, 1 P 1¹⁸; τὰ ματαία, idols and idolatry, Ac 14¹⁵; ματαιώω, to become profitless, empty, Ro 1²¹. Also κενός, literally empty, fig. void of truth, Eph 5⁶ Col 2⁸; void of worth, Ja 2²⁰; void of result, 1 Co 15¹⁰; κενοδοξία, groundless self-esteem, empty pride, Ph 2³; κενόδοξος, conceited, Gal 5²⁶; κενόφωνία, empty discussion, 1 Ti 6²⁰, 2 Ti 2¹⁶; κενῶω, to empty, to make void, Ro 4⁴, 2 Co 9²; also some other words of less importance.

The varied senses, literal and figurative, of the words tr. 'vanity' indicate the wide range of its use in the Scriptures. The literal tr. 'breath' would probably be better than 'vanity' in several passages (Ps 78³³ 94¹¹ 144⁴, Is 57¹²) in which the word is used to indicate the evanescence of man's life (also Ec 6⁴ 11⁸, cf. Ro 8²⁰), which itself is unsubstantial and unsatisfying (Job 7^{2, 16}, Ps 39^{6, 11}, Hab 2¹³). Man himself cannot be trusted (Ps 60¹¹ 62¹), and this his worthlessness is shown alike in falsehood (Job 31⁵, Ps 12³ 41⁶, Pr 30⁶, Is 58⁹ 59⁴)

* Only once or twice does it seem to be used of what is elsewhere described by one of these words (Jer 21¹³? 32⁴⁴; Jg 5¹²).

† AV 'dale' in these two passages; RV inconsistently 'King's Vale' in Gn 14¹⁷, 'king's dale' in 2 S 18¹⁸.

‡ RV, again inconsistently, 'vale' in Joshua, elsewhere 'valley.'

and in wickedness (Job 11¹¹ 31³, Ps 10⁷, Is 5¹⁸, Eph 4¹⁷, 2 P 2¹⁸), of which the disaster and disappointment of his lot are but the punishment (Job 15²¹ 35, Is 30²⁸, Pr 22³), although man dares to question God's meaning in making him (Ps 89⁴⁷, cf. Is 45¹⁸).

As there is but one God, idols are unreal (Is 66³, Jer 10¹⁵ 51¹⁸, cf. 1 Co 8⁴); their worship is unprofitable (Dt 32²¹, 1 S 15²³, 2 K 17¹⁵, Ps 4² 24³ 31⁶, Jer 2⁵ 10² 16¹⁹ 18¹⁵, cf. Ac 14¹⁵), and their worshippers worthless (1 S 12²¹, 2 K 17¹⁵, Is 41²⁹ 44⁹). Under the same judgment come false prophecy (Jer 23¹⁶, 1a 2¹⁴, Ezk 13¹⁻²², Zec 10³), reliance on any other help than God's (Is 30⁷, Jer 3³, La 4¹⁷), and ritual without righteousness (Is 1¹³, cf. Ja 1² 2²⁰). While to doubt or unbelief, God's service (Ps 73¹³, Mal 3¹⁴), His dealing (Jer 2²⁰, Is 49⁴), and even His law (Jer 8³), may seem to come to naught, yet He does reward those who do His will (Dt 32⁴⁷, Is 65²³), and fulfils His promises (Is 45¹⁹) as His threats (Ezk 6¹⁰). Without His blessing (Ps 127¹⁻²), or by His curse (Lv 26¹⁶), man's labour is profitless (cf. Pr 13¹¹ 21⁹), for man before God is nothing (Is 40¹⁷⁻²³), and his charms worthless (Pr 31²⁰).

Jesus pronounced worthless alike Gentile ritual (Mt 6⁷) and Pharisaic piety (Mt 15⁹, Mk 7⁷, cf. 1 P 1¹⁸), and Paul so judged pagan philosophy and the speculative theology which, under its influence, was finding entrance into the Church (Ro 1²¹, Eph 5⁶, 1 Co 3⁴, Col 2⁸, and 1 Ti 1⁶ 6²⁰, 2 Ti 2¹⁶, Tit 1¹⁰ 3⁹). Christian faith, life, and service have worth and use (1 Co 15¹⁰ 58, 1 Th 2¹), but may lose these through man's failure or faithlessness (1 Co 9¹⁵, 2 Co 6¹ 9⁸, Ph 2¹⁶, 1 Th 3⁹). Denial of the resurrection of Christ makes Christian preaching false (1 Co 15¹⁴) and Christian faith profitless (1 Co 15¹⁷); and even belief in works empties faith of worth (Ro 4¹⁴) and Christ's death of meaning (Gal 2²¹).

Thus, in the Bible, 'vanity' is used in the objective sense of emptiness, worthlessness, unprofitableness, uselessness, deceit, and illusion; in the subjective sense of conceit or pride it is not used, but the idea is expressed by the compound words vainglory (Ph 2³) and vainglorious (Gal 5²⁶). The fullest treatment of the vanity of man's life, work, joy, and hope is found in the Bk. of ECCLESIASTES (which see).

A. E. GARVIE.

VASHNI.—Samuel's firstborn son, according to MT of 1 Ch 6¹³ (Eng. 28), which is followed by AV. RV, following the Syr. (see mg.), and on the strength of v. 18³⁰ and the || 1 S 8², supplies Joel as the name of Samuel's oldest son, and substitutes 'and the second Abiah' (בְּנֵי אֲבִיָּה) for 'Vashni and Abiah' (בְּנֵי וָשְׁנִי וְאֲבִיָּה). This is supported also by Luc. [although BA have Σαν(ε)ί] Ἰωὴλ καὶ ὁ δευτερος Ἀβιά, and is adopted by Driver, Kittel, Benzinger, et al.

VASHTI (וַשְׁתִּי), perh. = Pers. *vahista*, 'best' [Jensen, *Ztschr. f. Kunde d. Morgent.* 1892, pp. 63, 70, connects the name with that of the Elamite goddess *Masti* or *Wasti*; see also Wildeboer, *Kurzer Hdcom.* 'Esther,' p. 173; BA *Aoriv*, Luc. *Ouastiv*).—The name of the queen of Ahasuerus (Xerxes), Est 1⁸ 11. 12. 15. 16. 17. 19 2¹ 4. 17. See art. ESTHER in vol. i. p. 775.

YAU OR WAW (י).—The sixth letter of the Hebrew alphabet, and as such employed in the 119th Psalm to designate the 6th part, each verse of which begins with this letter. In this Dictionary it is transliterated, when consonantal, by *v* or *w*.

VEDAN (וֶדָן) [AV; taking י as conjunction, tr. 'Dan also'], Ezk 27¹⁹].—Name of a city (Rashi). It is identical in form with the Arabic Waddan, a name clearly connected with the god Wadd, who was worshipped by Kalb and other tribes. The

geographers mention three places of this name, of which the only one that can be plausibly identified with Vedan is midway between Mecca and Medinah, six miles from Abwa on the pilgrims' road (Istakhri, etc.). It was celebrated in Islam as the scene of Mohammed's first campaign, and also as the home of the poet Nasaib. Modern travellers in this perilous region do not appear to mention the name. Ezekiel says that Vedan exported goods from Uzal to Tyre, implying that the first was a port. Waddan may at one time have been one, and have ceased to be so owing to the recession of the sea. If Uzal is San'a, the goods had to come a long distance. According to Burckhardt (*Travels in Arabia*, French ed. ii. 216), the pilgrims take forty-three days from San'a to Medinah. See UZAL.

Brugsch (*Religion der alten Ägypter*, p. 152) suggests that Vedan is to be identified with 'Uethen, also written Ueten, Ueden, and Uedenu, a spice-bearing country, situated to the east of Egypt, whose inhabitants, the Uethentians, were first subdued by king Thotmosis III.' According to Mariette (*Karnak*, p. 47), the monument to which he refers is a work of imagination, not of history, and it would be a mistake to demand of it decisive arguments on questions of geography.

D. S. MARGOLIOUTH.

VEIL and (AV) **YAIL**.—In the AV 'vail' and 'veil' are both used, and that alike for the article of dress so called, and for a part of the tabernacle and the temple. The spelling 'veil' in AV does not occur outside the NT, except in Ca 5⁷. On the other hand, 'vail' is not used in the NT, except in 2 Co 3¹³. In RV 'veil' is the uniform spelling.

i. *The Veil of the Tabernacle and the Temple.*—Two Heb. words used in connexion with the tabernacle are tr. in AV 'veil.' 1. מָסָךְ (*māsāk*), RV 'screen,' stands for the coloured linen covering which hung before the door of the *hēkāl* or Holy Place.* It is also used for a similar covering which hung in front of the gate entering the court.† 2. פָּרֹכֶת (*pārōketh*), perh. from Assy. 'what shuts off,' is the technical term for the veil of the same material which hung between the *hēkāl* and *dēbīr* or Most Holy Place;‡ for this we find also a combination of the two words, thus מָסָךְ וּפָרֹכֶת.§ All the above occurrences are in P, and they relate to the tabernacle—a significant fact.

We read of no veil in Solomon's temple nor in Ezekiel's, except that 2 Ch 3¹⁴, written under P's influence, says Solomon's temple had a *pārōketh* or inner veil. Besides the one passage adduced, there is no Biblical evidence for this fact. Thenius reconstructs 1 K 6² so as to bring the word *pārōketh* into the text; but he has absolutely no support from MSS, versions, or ancient citations. Lund|| and the older authorities generally take for granted that the outer and inner veils of the tabernacle were found also in Solomon's temple. The only proof Lund gives is the above passage from Chronicles.

It is probable that Zerubbabel's temple had veils corresponding to the *māsāk* and *pārōketh* of the tabernacle, but there is no certainty of this. Since the tabernacle follows the second temple in so many matters in which the latter differs from Solomon's temple (outer and inner courts, etc.), it is *a priori* likely that they coincided in having an outer veil before the entrance of the *hēkāl* and an inner one before the entrance of the *dēbīr*.¶

* Ex 26³⁶. 39³⁸ 40⁶.

† Ex 35¹⁷ 39⁴⁰.

‡ Ex 26³¹. 33. 36. 35, etc.

§ Ex 35¹² 39³⁴ 40²¹, Nu 4⁵. In Lv 24³ פָּרֹכֶת קִדְרֹת 'veil of the testimony' (because hiding the ark), 4⁶ פָּרֹכֶת הַקֹּדֶשׁ.

¶ *Heiligthümer*, 307b.

¶ *τὸ καρυάτωμα*, with the article, stands in LXX (Ex 26³⁵ etc.) and in Philo (*Vid. Moys.* iii. iii. 5) for the inner veil, the veil pre-eminently.

The evidence that Herod's temple had the two veils referred to above is stronger, though not conclusive. It is but one veil—the inner—that is spoken of in the NT, and that only in two connexions, viz. the account of the Crucifixion in the Synoptics,* ('the veil of the temple was rent in twain') and also in Hebrews.† In the latter it is the tabernacle, not the temple, that is meant; but as this Epistle was written almost certainly before the destruction of the temple in A.D. 71, there would have been some hint of it if the sanctuary known to the writer lacked this feature.

Josephus clearly points out the existence of the two veils in the temple which he describes, and there can be little doubt that his account is based on what he saw. Of the outer one he says, 'it was a Babylonian curtain of fine linen interwoven with blue scarlet and purple, and of a contexture that roused admiration.'‡ The inner veil, it seems implied, was of the same kind.

Maimonides says there were thirteen veils about the temple, viz. seven for the seven gates of the court; one at the gate of the porch, one at the gate of the temple; two between the *hekāl* and *dēbār*, and two in the space above the house. Lightfoot adopts this opinion.§ Another Jewish opinion which Lightfoot,|| Lund,¶ and others approve of is, that in the post-exilic temples the cubit-thick wall separating *hekāl* and *dēbār* of Solomon's and Ezekiel's temples was lacking. Instead of it there were two veils one cubit apart, occupying therefore exactly the same space as the wall. In favour of this, Lightfoot, followed by Lund, adduces Maimonides** and the Talmud, both Mishna †† and Gemara,‡‡ though in the latter Rabbi Jose raises a discordant voice, which is silenced by the harmonizing Rabbis.

ii. *The Veil as an article of dress.*—Many of the words rendered 'veil' in EV designate articles which would not be so called in modern English books, as they do not cover the face alone, nor do they in all cases cover the face at all. Indeed, even the face-veils which may be seen in Egypt and Palestine very rarely cover more than the lower half of the face, leaving the eyes and forehead entirely exposed. The white muslin veils which cover the whole face are used in the harem, and are not intended to cover, but to decorate the face.§§

The veil plays a much more important part in women's life in the East than in the West. No respectable woman in an Eastern village or city goes out without it, and, if she does, she is in danger of being misjudged; indeed, English and American missionaries in Egypt told the present writer that their own wives and daughters when going about find it often best to wear the veil.

But it should be borne in mind that the ancient Egyptians were as much strangers to the face-veils as Europeans are, for on their paintings and sculptures such veils never appear.¶¶ Nor were such veils worn by the ancient Ethiopians,¶¶¶ Greeks,¶¶¶ or the primitive inhabitants of Asia Minor.††† They are not worn at the present day in Egypt or Syria by slaves, by the very poor, by the Bedawin, nor in out-of-the-way places by any, as a rule. The present writer stayed two days with the chief of Tobas, between Nablus and the Jordan: the wife, daughters, etc., wore no veils, and were quite free. The people who have been most influenced by Islāmic culture are most observant of the veil, which is in favour of the belief that its use in the modern East, and also the institution of the harem, are due to Islām.

In early times the Israelites laid but little stress on the use of the veil by women. Neither Sarah nor Rebekah wore it on the occasions mentioned in Gn 12¹⁴ and 24⁶⁵, though Rebekah put it on

when she appeared before Isaac. When worn at all in Biblical times, it was mostly* as an ornament, as is the case now with Moslem women in the harem. Jewish women in Palestine—Jerusalem, etc.—are not in the habit of wearing veils.

Gn 24⁶⁵ and 29²² show that it was customary among the early Israelites for betrothed maidens to veil themselves before their future husbands, and especially at the time of the wedding. This custom obtains in Egypt at the present day.† The use of the veil by betrothed maidens and brides may betoken subjection. St. Paul in 1 Co 2⁵⁶ so regards it.‡

Rashi says, 'The Israelitish women in Arabia go out veiled (קטלית), while those in India go out with a cloak fastened about the mouth' (פרימה). It has been inferred from Gn 38¹⁴ that immoral women were to be known by the veil they wore: § but probably Tamar wore the usual veil on the occasion referred to in order to escape recognition by her father-in-law, Judah. Nor does Ex 34²³⁻²⁵ show that men as well as women wore veils. Moses, when he descended from the mountain wore a קטנה, i.e. a covering: a word not elsewhere used, though its cognate סמ is found,|| and has for parallel לבש 'clothing,' 'garment.' ¶ occurs in Is 25⁷ (AV 'veil') and 28²⁰, and by RV it is rendered rightly 'covering.' סמ, סמק, and סמק are general terms, and should never be tr. 'veil.' קטמ in Gn 20¹⁶ does not mean a veil, but a covering or blinding of the eyes by a gift; cf. Dillm. *ad loc.*, and vol. iii. p. 129^a.

The following Heb. words appear to denote veils in a stricter sense:—

1. קטנה.** See art. MUFFLERS. 2. The קטנה is what Rebekah wore before Isaac,†† and Tamar before her father-in-law.‡‡ The word means what is 'doubled' over. §§ We know that it covered the face. || 3. קטנה is tr. by AV in Is 47³, Ca 41³ 67 'locks' (of hair), but there can be little doubt that the word means some kind of veil. That like קטנה it covered the face, is all we know about it. 4. קטנה appears to have been a light garment which covered the whole dress, ¶¶ as Jerome*** and Schröder held.††† See Del. (on Is 32²), and art. MANTLE, vol. iii. p. 240^a. 5. קטנה ‡‡‡ is held by Delitzsch to have been a kind of veil or light summer outer garment. The Arabic word (*sidn, sadene*) is explained by Freytag and Lane as 'veil'; but a veil in the English sense is hardly meant by the Hebrew or the Arabic word. It was probably a summer outer dress of fine material (cambric or muslin), and so, according to Is 32², capable of much adornment. See Del. on Pr 31²⁴.

tion to some of the features common to them all, with only sufficient illustrations* to make the general statements intelligible.

It will be well to state at the outset the main objects which the student of the Versions may have in view. The most important is their use for critical purposes in conjunction with MSS of the original text of the OT or NT, and with Patristic Quotations. The second is their use for exegetical purposes. Thirdly, they have a value in connexion with the history of the Bible and the light they throw on a number of questions, such as the Canon, the order of books inside the Canon, etc. Lastly, many of the Versions are of the greatest interest from a literary and philological standpoint, because they are often the earliest monuments of the language in which they are written.

Their exact and scientific use, however, depends on a knowledge of their history, and on a consideration of certain precautions and limitations, which their history shows to be necessary if sound conclusions are to be reached. It will be desirable, therefore, firstly to consider some general points in their history, secondly to notice some of the necessary cautions, and lastly to discuss the uses just enumerated.

i. GENERAL HISTORY.—The first reference to translations of the Bible is found by some in the words of Neh 8⁸ 'They read in the book in the law of God distinctly [RVm 'with an interpretation'], and they gave the sense so that they understood the reading.' The Heb. word *קָרָא* used for 'distinctly' occurs again in Ezr 4¹⁸, where RVm renders 'translated.' The text gives more correctly than the margin the meaning of the Hebrew, which does not imply more than clearness in the reading. Moreover, the supposed need of a translation requires us to believe that the Jews returned from the Exile ignorant of the Hebrew in which the Law was written—a view hardly tenable in face of the post-exilic writings contained in the Bible. In any case we should have to think of an explanation rather than a translation, and an oral and not a written Version. We cannot therefore fix precisely the date at which Versions of the Bible began to be made.

There is little doubt that the earliest Version committed to writing was the SEPTUAGINT, begun for the use of the Alexandrian Jews under Ptolemy II. (B.C. 285-247), and 'it is probable that before the Christian era Alexandria possessed the whole or nearly the whole of the Hebrew Scriptures in a Greek translation' (Swete, *Introd. to OT in Greek*, p. 25). The only other Version for which there is likely to have been any demand in pre-Christian times is the SYRIAC. There are various traditions as to the origin of this Version, e.g. those recorded by Gregory Barhebraeus, which refer it to the date of Solomon (who is said to have had it made for Hiram), or to the incidents recorded in 2 K 17²⁷, or that recorded by Jacob of Edessa, which assigns it to the date of Abgar, king of Edessa. Like the Septuagint, it was not the work of one time or one hand; for 'from the differences of style and manner in its several parts we may suppose that it was made by many hands, and covered a long period of time' (W. Wright, *Encyc. Brit.* 'Syr. Lit.' p. 824). The earliest definite reference to the Version is in a commentary of Melito of Sardis, where *ὁ Σύνδος* is cited at Gn 22¹³. To this date, i.e. to the 2nd cent. A.D., the beginning of the Version may be assigned. To the same century the beginning of the LATIN Version, and to that or the

following century the origin of the EGYPTIAN Versions, is generally ascribed. These represent the earliest Versions of the Bible, and they are succeeded by numberless others up to the present time.

If the beginnings of the history of the Versions take us back so far, and are veiled in obscurity, the last chapter cannot yet be written, for each year sees some fresh translation made for purposes of missionary work.* The chief critical interest of the latest is to be found only in the illustrations they afford of the difficulties which beset the translator of every age in his attempt to transfer the ideas and expressions of one language into those of another without suggesting new associations or dropping old ones.

The study of this long history is a fascinating subject. It presents problems of all kinds, and for their solution draws on the stores which have been accumulated by the students of language and literature, of art, of palaeography, of liturgical usage, of history,† and many other branches of knowledge, while in return the MSS of the Versions contribute to all these studies material which is often of the greatest value, and can be found nowhere else. Hence the student of the Versions will find materials in books and periodicals dealing with almost every subject, and the literature is almost boundless.

1. *Origin and early History.*—The first point to try to make clear is at *what date and place*, and in *what circumstances*, the Versions in each language were made. We find general and somewhat rhetorical statements, like that of Chrysostom, in which he says, in his first Homily on St. John, that the Syrians, Indians, Persians, Ethiopians, and numberless other nations, have translations into their own languages. But it is only in regard to some of the later ones, that is, those made in and after the 4th cent., that we have definite historical statements on these points: as, for example, in the case of the Gothic, Armenian, and Slavonic; and even these apparently definite statements will not always stand cross-examination, and need explanation or qualification. In some cases they are so much later than the event to which they refer as to be untrustworthy in detail, while in other cases they lack perspective, and ascribe to one person or date work which probably passed through several hands, and extended over a long period. Besides such historical statements, which have to be carefully examined before we use them, we have arguments of an inferential kind, based on the evidence afforded by the MSS of the Version itself.

The first question which we naturally ask is whether the Versions were *authoritative*, the work of translators chosen for their knowledge of the two languages involved, and from MSS carefully selected of a collection of books regarded as canonical, or whether they were made by private and irresponsible persons independently, in different districts, and from chance MSS of separate books as they became known or were required for use. Obviously, the answer to such questions is of great importance, but definite answers can rarely be given.

* For a list of these see (1) *In our Tongues*: a popular handbook to the translation work of the British and Foreign Bible Society, by G. A. King; 2nd issue, comprising the work of the last quarter of a century, 1875-1899; also (2) *Bible House Papers*, i.-v.

† The use of language may be illustrated from the discussion of the African origin of the Old Latin; of art, from the use made of different kinds of decoration found in MSS, such as the Celtic, to identify the place of origin; of palaeography, from the evidence based on different national hands, Irish, Lombardic, etc.; of liturgical usage, from the use made of the notes in Codex Bezae (*JThSt*, i. 454), or in connexion with the Lindisfarne Gospels (Berger, *Histoire de la Vulgate*, p. 39); of history, from the article on Codex Amiatinus in *Studia Biblica*, ii.

* Many of these illustrations are taken from those collected by the writer for his Ellerton Essay, printed in part in *Studia Biblica*, ii. 195 ff., on 'The Evidence of the Early Versions and Patristic Quotations on the Text of the Books of the New Testament.'

There can be little doubt that the earlier the Version the more likely the second alternative is to be true. Thus Ridley says: *plures a pluribus interpretibus in vulgus effuse sunt explicatius quæ tandem collectæ et nonnunquam reficte in unum Codicem vel editionem relatæ sunt*;* and elsewhere,† in the same treatise, that the Versions were at first a sort of Targum, derived from copies *circumforaneis et vulgationibus*, from which the glosses were gradually removed. Similarly Augustine, in a well-known passage,‡ writes in regard to the Latin: *ut cuicque primis fidei temporibus in manus venit Codex Græcus et aliquantulum facultatis sibi utriusque lingue habere videbatur, ausus est interpretari*. This hypothesis, while it does not destroy the value of the Versions as evidence often older than our MSS of the Greek text of the NT, certainly lessens the authority we should, on the first hypothesis, have to give them as made from the best MSS of the time, and exhibiting *non unius alteriusve hominis sed totius ecclesiæ interpretationem et iudicium*.§—In regard to some of the later Versions we are told, and may well believe, that they were made by carefully chosen persons from specially selected MSS. But even then the area of selection must have been limited by circumstances of place and time and opportunity. So that, in the last resort, our estimate of the critical value of a Version and its text must be formed entirely from that text as contained in the MSS of the Version, or rather as it can be restored to its original form by the removal of errors which have come in during the centuries. For it has to be remembered that in some cases a considerable interval has elapsed between the date at which the Version was first made and that of the earliest MS of it. It is true that in no case is the interval as great as the thousand years or more which separate the last Heb. book of the OT from the earliest MS in which it is preserved to us. Of the more important Versions the Bohairic may be taken as the most striking instance in which the MSS of the Version, with very few exceptions, belong to a date very much later than that of the Version itself.¶ We nearly always have to measure the interval by centuries, and in that time much often happened ¶ to alter the original characteristics of the Versions, both in regard to the text which underlay them and the language in which that text was expressed, and so to obscure or distort the light thrown by the MSS of a Version on its origin. But, even when we have made all necessary allowances, much evidence remains which may be used to date and localize the origin of a Version. First and foremost comes a comparison with the quotations found in Patristic writers using the same language. Thus the value of the writings of Tatian, Ephraem, and Aphraates has been generally recognized in regard to the Syriac Versions and their relation to each other, though there is divergence of opinion as to the actual conclusions to be drawn. Again, a comparison of the Old Latin with the Latin Fathers, especially Cyprian and Tertullian, gave Wiseman the first clue, which has, however, to be used with caution,** to the grouping of the MSS of that Version into families. The Patristic quotations often help us to date, as well as to localize, the text found in a Version. Thus Robert †† dates the Version contained in the Lyons Heptateuch by its

* *De vers. Syr. indole* (ed. Semler, 1760), p. 334.

†† Scrivener, *Introd.* ii. 44; and art. OLD LATIN VERSIONS in vol. iii.

†† *Hept. Partis poster. versio e cod. Lugd.* p. xxvii ff.

agreement with the Quotations of Lucifer of Cagliari, and its differences from those of Ambrose and Augustine.—Another argument in regard to the date and origin of Versions is furnished by the order in which the books of the Bible are given, or the Canon of Scripture which is implied.* This argument has been used to refer the Peshitta to a date prior to that at which all the Catholic Epistles and the Apocalypse were included in the Canon.

Other arguments in regard to origin are derived from linguistic considerations, and from notes by scribes and others in the margin of the text or elsewhere in the MSS. At the same time, in regard to all these it has to be remembered that *data* which seem at first sight to be coeval with the Version, and to throw light on its origin, may have been either carried over from the text on which the Version was based, or introduced later by some scribe.† Instances of these possibilities are afforded by liturgical notes, text divisions, dialectical peculiarities of spelling, etc. etc.

2. *Revisions*.—The constant use of the Versions from the date at which they were made onwards required the multiplication of copies. This necessarily involved the introduction of numerous unintentional errors, and gave occasion for linguistic or grammatical changes, and led also to a comparison of the text contained in the Version with that of other authorities. The best-known instances are afforded by the work of Origen on the LXX, and Jerome on the Old Latin. As to such revisions we have the evidence of direct statements, and that of the MSS themselves. We have the well-known passage in Jerome's letter to Damasus, in which he refers to errors introduced not only by *vitiosi interpretes*, but also by *presumptores imperiti et librarii dormitantes*. This led him to his work of revision, of which the Vulgate was the result. Later on in the history of the same Version, the recurrence of the same kind of corruptions, and growing uncertainty as to the right text, led to such revisions as those of Alcuin at the end of the 8th cent. and those of the *Biblia Correctoria* in the 13th. Such formal revisions as those mentioned in connexion with the Latin Version find parallels in many other languages.

They involved the removal of copyists' errors of various kinds, and also changes in the Version itself, such as the translation of words which had been in the first instance merely transliterated, the substitution of current and approved words for those which were obsolete or provincial, a greater consideration for grammar and usage, which had been perhaps sacrificed to secure greater fidelity, as it was thought, to the words and sense of the original.‡

Again, in the revisions, reference was sometimes made to the text contained in MSS on the authority of which the Version was based, and to other Versions. That this was so we know from definite statements such as that made by Thomas of Harkel, who tells us that in his revision of the Philoxenian Syriac, in A.D. 616, he used 'two or three accurate Greek MSS in the Enaton of Alexandria,' and the readings derived from that source make the marginal readings of the Version of great value. Similar statements as to the use of Greek MSS for revision are made in regard to several other Versions, and it would be an obvious thing for a critical reviser to do.

But the influence of other authorities besides the original text in these revisions has to be remembered. The influence of the Vulgate will

* See below, p. 854 f.

† Berger, *Histoire de la Vulgate*, p. 53.

‡ In some cases the later Versions were more literal than the earlier, e.g. that of Aquila and the Philoxenian Syriac.

be a case in point. And in dealing with *phenomena* which suggest such influence it must not be forgotten, as is sometimes done, that the true explanation of the resemblances of two Versions may often be, not that they are derived one from the other, but that both are independently traceable to MSS of the Greek, which have a similar type of text.

These revisions differed greatly both in extent and in character, and occasionally it is matter for argument which is the revised and which the unrevised text. Sometimes, as in the case of Origen's revision of the LXX, they have created a chasm in the history of the text which it is well-nigh impossible to bridge over. Sometimes—and in considering the temper in which these revisions would be conducted this is important—we meet with great reluctance to change what was old and familiar even though it was wrong.* The old was therefore retained in part. Thus, in the case of the Latin Version, the Old Latin renderings survived side by side with those of the Vulgate for some centuries. Berger† notices that the use of OL survived in Bohemia as late as the 15th cent. Gregory the Great in his Preface to Job says, *ut comprobationis causa exigit nunc novam nunc veterem per testimonia assumo*. Walafrid Strabo (*Pref. ad Gloss. Ord.*) speaks of it as something recent, that the Version of Jerome was in general use when he wrote in the 9th cent.—*Hieronymi translatione nunc ubique utitur tota Romana ecclesia licet non in omnibus libris*. It is clear from what has been said in regard to revisions which may have been made by private persons without any historical notice of the fact, that they constitute the main difficulty of the student in his attempt to recover the text of the Version in its original form. But it is obvious that the amount of success attained in surmounting this difficulty will be the measure of the certainty with which arguments may be built on the data afforded by the texts contained in the MSS of Versions. And it is to this end that these MSS have to be grouped as far as possible into families, which often indicate the nature and extent of the revision, and show that some MSS contain an unrevised, others a revised, form of the Version.‡

3. *Printed Editions*.—It is necessary to warn the student against the indiscriminate use of printed editions as evidence of the true text, and also against statements which rest only on such editions. In days gone by it was often accident rather than choice which determined what MS or MSS should be used; nor had the editor the ideas which prevail at present either as to the minute accuracy required for a critical edition, or as to the collection of material necessary for it. Thus Uscan, the first editor of the Armenian Version (1668), admits that he introduced several passages from the Latin without any MS authority. Again, in the Roman edition of the Ethiopic of 1548, the *lacunæ* in the Ethiopic MS used were translated from Greek MSS and the Vulgate. Similar unfavourable criticisms must be made of most of the older editions of the Versions as deficient in regard to the MSS used, or to the way in which they were used, or both. This makes it necessary to accept with caution the evidence of the Versions even as quoted by Tischendorf in the *apparatus criticus* of

his *Novum Testamentum*, for he relied in many cases on such imperfect editions.* The more critical use, and the danger of quoting vaguely, may be seen from a reference to the second and third *appendices* to Lloyd's *Greek Testament*, edited by Dr. Sanday, and referred to in the note below. Much has been done, and is being done, in preparing adequate and accurate critical editions of the most important Versions such as the LXX, the Latin, the Syriac, the Egyptian, and others. When these are complete, the student will be able to handle the material with confidence. The editors will probably in no case formulate any text as that of the original Version, but will print the text of some one MS, and leave the student to draw his own conclusion from the *apparatus criticus*. They will, as a rule, not attempt to give the readings of all the known MSS, as Holmes and Parsons did in their monumental work on the Septuagint, but only the evidence of those MSS the texts of which are in any sense important for the reconstruction of the history of the Version.

ii. *METHOD OF USE, AND PRECAUTIONS TO BE OBSERVED*.—From what has been said as to the general characteristics of the history of Versions, and the state in which their evidence is available for the student, it is clear that their accurate use depends on the observance of certain critical rules, some of which (1) are common to all the authorities used for recovering an ancient text, while (2) others are peculiar to the use of Versions as evidence.

1. (a) Each MS of the Version has to be carefully examined with reference to its date, the care with which it has been copied, the text on which it seems to be based, and its relation to other MSS of the Version. Tertullian's canon, *id verius quod prius*, may be accepted as a starting-point. But it is often difficult, as we have seen, to determine the date from the evidence of the MS itself, which is often all that is available. Nor is age an invariable guide as to the value of the text contained in a MS, for some late MSS may be copied from good early ones. Thus *each* MS has to be weighed in reference to the degree of accuracy with which it seems to present the text as it left the hand of the translator, and in reference to other MSS containing texts which have been definitely identified with particular dates or localities. (b) It has further to be remembered that the different parts of the Bible, and in many cases even the separate books, though they have come to be united in one MS, may have had a different origin and textual history in the case of the Versions, just as in the case of Greek MSS of the NT. The earliest Versions were made when the books of the Bible circulated either separately or in small collections, and at no time till the 7th or 8th cent. do we meet with a complete MS of any Version of the whole Bible, and the text, even of such complete MSS, we should expect to have been derived from MSS which contained only parts of the Bible, and therefore had not an identical history. It is possible, to take one instance, that the difficulties in reducing Tertullian's quotations to a system may be in part due to his having used separate MSS, say, of St. Paul's Epistles. Again, within a group of books, such as the Pentateuch,

* Augustine (*Ep.* 71, ed. Benedict, vol. ii. p. 161) writes to Jerome as to the uproar caused by Jerome's Version reading *hedera* instead of the familiar *cucurbita* in Jon 4^o. Another case is that of the congregation which persisted in chanting *floriet* for *forebit*. This false conservatism in perpetuating mistakes is not obsolete, as may be seen by the refusal to correct the obvious mistakes (e.g. Is 9^o) of the English Bible of 1611.

† *Histoire de la Vulgate*, p. 74.

‡ This division of the MSS of a Version against each other may be seen in any critical edition of a Version, e.g. that of the Vulgate; and in regard to some of the less accessible, in Dr. Sanday's *Appendices ad Novum Test.* iii.

* Thus Lightfoot (*Colossians*, p. 246 n.) writes as follows:—'The readings of the Memphitic [or Bohairic] version are very incorrectly given even by the principal editors such as Tregelles and Tischendorf, the translation of Wilkins being commonly adopted though full of errors, and no attention being paid to the various readings of Boetticher's text'; and again (*ib.* p. 247), 'the true readings of the Syriac version are just the reverse of those assigned to them even by the chief critical editors, Tregelles and Tischendorf.' In *JTAS*, i. 611, it is noticed that Tischendorf often omits altogether the renderings of Philoxenian Syriac. The time has almost come for a new edition of Tischendorf, but this will not be possible till critical editions of the separate Versions and Fathers are available.

where we might have expected uniformity, we find that the Old Latin fragments at Lyons, Würzburg, and Munich stand in quite different relations to each other in the Books of Exodus, Leviticus, and Numbers—a fact which shows that the Old Latin text in those MSS had a separate history in these separate books.

2. (a) The two considerations just mentioned depend on the fortunes of the Version after it left the hand of the translator, and are not especially characteristic of Versions; but there are others which are peculiar to translations as such. Thus we have to ascertain whether a Version is *primary* or *secondary*, i.e. derived directly from the text which it is to be used to restore, or indirectly through the medium of another translation.

Perhaps the best-known illustration will be afforded by the Latin Psalter.* Of this book we have (i.) the text of the Old Latin Psalter as contained, for instance, in MS 11947 of the *Bibliothèque Nationale*; (ii.) the *Roman Psalter*, the first revision of Jerome made in A.D. 383 with the help of the *sacra* text of the LXX; (iii.) the *Gallikan Psalter*, made in A.D. 385 according to the hexaplar text of the LXX, the present Vulgate Psalter; (iv.) the *Psalterium Hebraicum*, begun some years later, and based on a Heb. text. In the well-known *Codex Cavensis* of the Latin Bible we have the third and fourth, and on the margin extracts from the first. We also find quadruple Psalters.

One more illustration may be taken, and in this case not from a MS, but from an edition, of a Version, viz. Erpenius' edition of the Arabic of A.D. 1616. Here the Gospels preserve a translation from the Greek, and are therefore a primary Version; the Acts, Pauline Epistles, and three Catholic Epistles preserve a translation from the Peshitta; the other Catholic Epistles and the Apocalypse a Version from some other source. Sometimes one language preserves both primary and secondary Versions, as, for instance, the Armenian does. Sometimes it is a matter of argument whether a Version is primary or secondary.

It will be obvious that the chief value of secondary Versions is in regard to the primary from which they are taken; those derived from the LXX, for instance, are useful to determine the history of the Septuagint and only indirectly to restore a right Hebrew text, and the Armenian will help in restoring the original text of the Old Syriac from which it was in part translated.

(b) Another point which is of the first importance in drawing conclusions as to particular readings implied by a Version, is the capacity and intention of the translators in regard to literalness, accuracy of rendering, and doctrinal or other bias.

The Versions vary very much in their efforts to preserve the *letter* of the text they are translating.

As extreme instances of those which sacrifice language, and even clearness, to literalness, may be mentioned Aquila's version of the OT and the Harklean revision of the Philoxenian. These represent one extreme, and at the other we get paraphrastic renderings which are content with giving the general sense. As a rule, however, the mean is observed between undue literalness and undue laxity.

In regard to *accuracy of translation*, it may be said generally that the Versions were made by persons of competent knowledge in regard to both of the languages with which they were dealing.

Exception must be made in some parts or passages of a Version. Thus it is difficult to conceive that the Greek in some parts of the LXX can have conveyed any meaning to the translator, and the Ethiopic is a Version the value of which must be depreciated by such confusions as those between *καταχρησμός* and *καταχρησμός* (Ro 7^b) or *ἐκείνους* and *ἐκείνους* (Ro 7¹¹).† It should here be mentioned that accuracy of translation does not require that the same word should always have the same equivalent in the Version, and this possibility often causes uncertainty in the conclusions which may be drawn (see below). And it may be remembered that even mistaken renderings may be helpful: thus the rendering *neglexit* of *ε* of the Old Latin at Mk 5³⁴, though wrong, supports *παρούσης* as against *ἀκούσας*, and all attempts to translate *διεπορεύθη* at Lk 6¹, even if unsuccessful, witness to the existence of some epithet attached to *εββίλας*.

* See Berger, *Histoire de la Vulgate*, pp. 130, 131, and Index, s.v. 'Psalter.'

† See Tregelles in Smith's *DB* iii. 1614.

Of any doctrinal bias the early Versions show little trace, though we often find in the Fathers complaints of falsification, which cannot, however, be maintained.

As possible instances of intentional alteration may be mentioned the Nestorian substitution of *leavened* for *unleavened* bread at 1 Co 5⁸, a tendency towards Encratite views in the Syriac version of 1 Co 7^{2-6,7}, and more clearly in reference to the virginity of Mary. Berger* traces the adaptation of various Latin MSS at 2 Mac 12⁴⁶ in regard to a passage bearing on prayers for the dead. Ellicott finds 'a slightly Arian tinge' in the Gothic version of Ph 2⁸⁻⁹. But these are isolated instances, which must not, however, be ignored.

When we come to compare Versions made by Roman Catholics with other Versions, there is more evidence of a preference for words which will support special ecclesiastical positions or views. Thus, in the French version of de Sacy, *elders* become *prêtres*, in Gn 3¹⁵ it is *la femme* who will bruise the serpent's head, St. Paul hopes to be delivered by *le mérite des prières*; and other instances might be given.†

(c) Again, it must be remembered that the power and intention of the best translator are limited by the material which he has to use, and that in two ways. In the first place, one language may be incapable of literally reproducing the *grammatical* idioms of another. Thus there are no distinctions of gender in Armenian, no neuter in Arabic, no passive voice in Bohairic, no article in Latin, and therefore these Versions afford no help where readings involving such points are being discussed. Again, words have to be supplied in a translation which were not required in the original.‡ Such cases may be indicated in later times by the use of italics, but they are a more or less modern device and not always accurately employed. Somewhat akin to the point now being discussed is the ambiguity, which arises as to their evidence, in languages like the Syriac and Arabic, owing to the system of vowel points. Secondly, the translator was hampered not only by grammatical but also by *lexical* difficulties, as is the case with the missionary of to-day.§ It is true that words could be coined, such as *semini-verbius*, to represent *σπέρματος* (Ac 17¹⁸), *camum mittes* to translate *κηρύσσει* (1 Co 9⁹), or in more modern times (as in Sir John Cheke's version) *hundreder* for *centurion*. Transliteration offers another device, adopted frequently in the case of the oldest Versions, but the result is not an effective or an intelligible translation. Another and more important consideration, which affects, however, the exegetical rather than the critical use of Versions, is that the words used by the translator must often suggest either more or less than the expression translated. This is a difficulty which is felt, for example, in rendering the NT into Chinese.||

(d) It must be remembered in connexion with the literary side of translations that a translator will not always use one word or expression, and one only, to render any particular word or expression of the original. As instances where the English Bible shows this freedom in translation we may refer to the equivalents given for *παράκλησις* in Lk 24¹², Jn 20³⁻¹¹, or the various renderings of *πατήριον*: similarly, the word *ἀδελφός* is translated in five different ways in the NT.¶ Other Versions will provide a number of instances of a like kind.** The point is important in connexion

|| See correspondence in the *Guardian* for 1899 on the Chinese rendering for 'priest.'

¶ Plummer's *St. Luke*, p. 508.

** Thus Westcott, *Epistles of St. John*, p. xxvii, notices that *ἐκείνους* in three successive verses of the Epistle is translated by *observare, custodire, servare*.

with the use of Versions for critical purposes, because it reminds us that we cannot argue from a variation in the translation to a similar variation in the original. Versions, therefore, often fail to give assistance where there is a doubt between two words of almost the same meaning, or between two words which the translators may possibly not have differentiated.*

(c) It is perhaps hardly necessary, after what has been said as to necessary precautions, to give a reminder that the evidence of Versions can be used only at first hand, and not through the medium of a translation. Many of the scholars who first used the Oriental Versions for purposes of textual criticism had to rely on Latin translations of them, and many misstatements of the evidence have resulted, and may easily be perpetuated, even from the *apparatus criticus* of such an authority as Tischendorf's 8th ed. of his *Novum Testamentum*.†

iii. USES OF THE VERSIONS.—(a) It is only if we bear all these points in mind, as of possible importance in connexion with the evidence of a Version in a particular passage, that we are in a proper position to consider the most important of the uses which may be made, especially of the early translations, viz. their *use in textual criticism*. (1) We have three different classes of authorities for determining the text of the Bible, viz. MSS of the original Hebrew or Greek text, Versions, and Patristic Quotations. The importance of the last two is that they enable us to a great extent to date and localize particular readings found in the MSS, and thus provide us with the means by which to reconstruct the history of textual changes in a way which would be quite impossible from the MSS alone. An obvious instance of this may be found in the way in which Versions and Patristic Quotations enable us to trace back the readings of the so-called 'Western' text of the NT to the 2nd cent., a date nearly 200 years before that to which our oldest MSS of the Greek are assigned. Without their help we might well have said that readings of this kind belonged to a much later date, and might be dismissed as unimportant. From the Versions we also see not only the antiquity but the wide prevalence of this so-called 'Western' text, for its readings are found not only in properly called Western authorities, such as the MSS of the Old Latin Version, but also in the early Syriac Version. We see, therefore, how misleading this term 'Western' is. On the other hand, caution has to be observed in using Versions to localize a particular text, for the Sahidic and Bohairic, though both connected with Egypt, represent different Greek texts.

(2) In estimating the value of the evidence of Versions it may be assumed that they are based directly or indirectly on MSS of the original text, and therefore allowance has not to be made, as in the case of Patristic Quotations, for the possibility of quotations from memory. Further, if they preserve for us the readings of MSS of the original text, then those MSS in the case of the earliest and most important Versions are considerably older than any which have come down to us. Thus the MSS of the Hebrew on which the LXX was based must be about 1000 years older than any Hebrew MS which survives to the present day, and the MSS which were used by the earliest translators of the NT into Syriac, Latin, or Egyptian, if they are assigned to the 2nd cent.,

will be nearly 200 years older than \aleph or B. The primary Versions may therefore, with the limitations already noticed, be regarded as MSS of the original text, and used to correct the readings of those MSS of the original text which have come down to us.

(3) But, from what has been already said above, great caution has always to be used in estimating the value of their evidence and drawing conclusions, and in a large number of cases their evidence, without the corroboration of other authorities, has to be ignored or discounted, because the introduction of the readings they support can be sufficiently explained. Thus we may find in them additions to the original text, but these may be inserted for grammatical reasons,* or may be explanations necessary for the readers. On the other hand, we may find omissions; but these may be due to a desire for compression, or may have been left out because of their difficulty.† Again, in the case of synonyms, the evidence of Versions must be regarded and treated as ambiguous, unless an inductive examination has shown that the usage allows a positive conclusion.‡

The history of the use of the Versions for critical purposes goes back to the first great textual critic, Origen, who in his *Hexapla* compared the Hcb. text with that of the LXX derived from it. Similarly, Jerome makes many references to the evidence to be drawn from Versions. One instance may suffice. He refuses to use a certain recension of text, *cum multarum gentium linguis Scriptura ante translata doceat falsa esse quæ addita sunt*.

After the invention of printing, the first Version to be used critically was the Latin Vulgate, from which the Complutensian edition derived the text 1 Jn 5:7-8. Erasmus also used the same Version to make good the deficiencies of his Greek MS of the Apocalypse. A little later Beza (1519-1605) for his Geneva edition quoted Tremellius' edition of the Syriac of 1569, and for part of the NT (Acts, 12 Cor.) used also the readings of an Arabic Version. In the Polyglots of Antwerp (1569-72) and Paris (1630-33) we do not find more than the Versions already mentioned, the Antwerp edition having only the Latin and Syriac. Walton in the London Polyglot (1654-7) printed in the fifth volume, which contains the NT, the Ethiopic as well as the Syriac, Vulgate, and Arabic, and, for the Gospels, the Persian Version. A few years later Bishop Fell, in his edition of the NT of 1675, professes to give variants *ex plus centum MSS codicibus et antiquis versionibus*. Among the latter he quotes, and is the first to quote, the Bohairic and Gothic, but he uses them only here and there, and not systematically. The Versions were used more fully by Mill in his famous edition of 1707. He first 'accorded to the Vulgate and the Old Latin the importance they deserve,'§ and had a slight knowledge of Syriac, but for the other Versions had to be content to rely on Latin translations often inexact, and so his use of the Versions may well have been 'the weakest part' in his monumental contribution to biblical criticism. The name of Bentley (1662-1742) is important for our present purpose because of the attention he

* Thus Jerome, quoted by Alford at Eph 5:22, says, *hoc quod in lat. exemplis additum est subditæ sint in græcis editionibus non habetur sed hoc magis in græco intelligitur quam in latino*.

† So Jerome (quoted by Burgon) at 1 Co 7:36 says, *in Latinis codicibus ob difficultatem translationis hoc penitus non invenitur*.

‡ Of this the index at the end of the fifth fasciculus to the Oxford Vulgate would give illustrations. Thus from two successive words we find that ἀγαλλίασθαι is rendered by several Latin words, and, on the other hand, αἰών semper redditur æcælum.

§ Scrivener, ii. 201.

* See Westcott and Hort, *Notes on Select Readings*, Ac 11:20. As between Ἑλληνιστῶν and Ἑλληνιστῶν, 'versions are ambiguous: they express only "Greeks," but would naturally be at a loss to provide a distinctive rendering for so rare and so peculiar a word as Ἑλληνιστῶν.' See also Ac 6:9.

† See Gregory, *Prolegomena*, p. 805; *Studia Biblica*, ii. 212 f.; and what has been said above on 'Editions.'

gave to a critical edition of the Latin Version.* The next critic who needs to be noticed in connexion with the use of the Versions is Wetstein (1693-1754), who in his *Prolegomena* (1730), besides giving us the ordinarily used notation for our MSS, 'bestowed great pains on the Versions.' Alter, in his edition of the Greek Testament of 1786-7, besides some readings from Wilkins' edition of the Bohairic, quotes also from four MSS of the Slavonic Version and *z* of the Old Latin. Before we leave the 18th cent., reference must be made to the laborious work of Holmes and Parsons on the LXX, for their edition of which they quoted the Old Latin, Syriac, Egyptian, Arabic, Georgian, Armenian, and Slavonic. In every case the help of experts in the several languages was procured, but the permanent value of the work bears no relation to the time and labour expended on it, because the time had not yet come when the material was adequately or scientifically collected, and the collators were not all equally trustworthy.

Griesbach, at the beginning of the 19th cent., is important in connexion with the use of Versions, not only because of his quotations of the Gothic, Armenian, and Philoxenian, but also, and more especially, because he was the first to assign them a place in the families of text which Bengel had introduced. Thus to the *Alexandrian* recension he assigned the Egyptian and some other Versions, to the *Western* the Old Latin and Vulgate, and to the *Byzantine* the vast majority of the Versions. Lachmann (1793-1851) 'restored the Latin Versions to their proper rank in the criticism of the NT,'† but did not use the Syrian and Egyptian Versions. In Westcott and Hort's summary of the history of the Greek text of the NT the Versions, of course, find a place. Thus the Bohairic and, with some exceptional readings, the Sahidic are included among authorities for the neutral text, the Old Latin and Old Syriac among those for the Western text, some readings of the Bohairic and Sahidic are Alexandrian, while the vast majority belong to the group of authorities which contain a 'Syrian' or revised text. But one of the important points which recent examination of the Egyptian Versions has tended to establish, is, that the Bohairic does not represent the primitive form of the Egyptian Version so well as the Sahidic. This would involve a weakening of their theory that the neutral text is invariably right.

At the present time it would be agreed by textual critics that *all* the Versions, just as even the latest cursive MSS, have to be examined at any rate to see whether they have any contribution to make to textual criticism; but the main energy of scholars is being devoted to the collection, and proper arrangement, of the materials available and necessary for a proper estimate of the history and text of each Version. When this has been satisfactorily done, and good critical editions are available, but not till then, it will be possible to give each Version its due weight in the scale of evidence, after making allowance for the changes it has undergone in the course of its history, and taking account of the disagreement between different MSS of the same Version.

The notation adopted for the Versions, as for the other authorities for the text of the NT, is that used by Tischendorf in the 8th ed. of his *Novum Testamentum*, and described fully by him, and by other authorities since. Some modifications have been made owing to further study, as, for example, in regard to the names now generally given to the Egyptian Versions, and some additions have to be made for reference to material which has become available since the publication of his edition, such

* See Wordsworth and White's *Vulgate*, i. xv ff.

† Scrivener, ii. 235.

as the Sinaitic MS of the Syriac. But the general outlines of the notation will probably remain the same. In the case of separate MSS of the Versions, that notation used by the editors of the standard editions which have already appeared or are in preparation—e.g. Wordsworth and White's *Vulgate*, Brooke and Maclean's *Septuagint*, Horner's *Bohairic*, Gwilliam's *Peshitta*, etc.—will, it is hoped, be adopted to prevent confusion and double nomenclature, such as is necessary in the cases of many cursive MSS of the Greek Testament owing to the different notation of Scrivener and Gregory.

(b) The most striking instance of the *exegetical* value of a Version is to be found in the LXX, and the light it throws on the NT. Bishop Pearson wrote as follows on this point:—

LXX virilis versio ad Novum Testamentum recte intelligendum et accurate explicandum perquam necessaria est. This judgment is quoted by Dr. Swete* as 'justified' by the facts.† In regard also to the meaning of the Hebrew, 'it is never safe to neglect their interpretations even if in the harder contexts it is seldom to be trusted. Indirectly, at least, much may be learned from them, and their wildest exegesis belongs to the history of hermeneutics and has influenced thought and language to a remarkable degree.' On the other hand, 'transliterations, doublets, confused and scarcely intelligible renderings reveal the fact that in difficult passages they were often reduced to mere conjecture.'

The Latin Version, again, has a very important place in the history of biblical exegesis in the West. The opinion of Dr. Routh, endorsed by Dean Burgon,‡ that the Vulgate offers the best commentary on the NT, can hardly be justified. There are, indeed, many passages where the Vulgate has erred, and has influenced the English Bible of 1611 through the medium of earlier renderings, e.g. Lk 21¹⁹, Mt 16^{22, 23}, Ro 2¹⁸ etc. It is not, however, possible to exaggerate its *general* influence on the formation of the theological language, and indirectly on the exegesis of the many Versions which were made from it during the Middle Ages. These two Versions stand, however, in an exceptional position. Of most of the others the exegetical value is not great.§ In the OT they were, for the most part, secondary, and derived from the LXX; while for the NT we are as well able as the translators to ascertain the meaning of the Greek. Nor do the Versions give much help in regard to difficult words or constructions, such as *ἐπιστάτης*, *ἄρδος πιστικῆς*, *πυγμαί*, *ἐπιβαλὼν ἐκλαίε*, and the like; indeed they sometimes omit the difficulty altogether.|| They are, however, even in these cases interesting, because they preserve for us an early traditional rendering.

(c) The use which may be made of the Versions in regard to the *history of the Bible, the Canon*, etc., may be illustrated both from the Old and the New Testament. The importance of their evidence, as in the case of their use for textual criticism, consists in our being able by this means to localize the phenomena with which we meet.

The most obvious instance is the evidence which is afforded by the Versions in regard to the inclusion or exclusion of the Apocalypse. Both the Syriac and the Bohairic Versions indicate that that book was not included in the Canon of the NT when they were made. Another instance—and this affects the arrangement of the books of the Bible—may be found in the so-called Western order of the Gospels found in the MSS of the Latin

* *Introd. to the OT in Greek* (p. 457). Dr. Swete sums up the question as follows: 'On the one hand, the interpreter [i.e. of the NT] ought not to be led astray by visions of the solidarity of "Biblical Greek." . . . On the other hand, the student of the NT will make the LXX his starting-point in examining the sense of all words and phrases which . . . passed into Palestinian use through the Greek OT, and in their passage received the impress of Semitic thought and life.'

† Swete, *l.c.* p. 446.

‡ *Lives of Twelve Good Men*, pp. 76, 77.

§ Walton, however, in his *Prolegomena*, § 5.3, says, *sensus clarior explicanti ita ut pro pluribus commentariis versio unica inservire possit.*

|| See Pesh. (Ac 1923) and Jerome's words, quoted above, p. 853b, note †.

Version and elsewhere.* Again, the varying position of the Epistle to the Hebrews which is found in the Bohairic between 2 Thess. and 1 Tim., in the Sahidic between 2 Cor. and Gal., affords evidence as to early uncertainty about the Pauline authorship. From the OT, illustrations may be found in the variations between the Canon of the Hebrew, LXX, and Vulgate, and the light thrown on the history of the OT Canon.† While the order of books in 'the Law' was fixed at the time the LXX translation was made, that of the books contained in the groups of 'the Prophets' and 'the Writings' was not; and evidence of this is found in the variations in order between the LXX and Hebrew. Again, within certain books, such as Exodus and Jeremiah, we find a difference in the arrangement of material between the LXX and Hebrew, and in 1 Sam. a somewhat similar phenomenon meets us.

These facts take us back behind the formation of the Canon, on which the facts already mentioned afford evidence, and can be used for the light they throw on the composition of the separate books. Of course it is only in the very earliest Versions that such a use of the Versions as is here referred to can be made. And, conversely, these phenomena, as we have already noticed, are important in helping us to date those Versions in which they occur.

(d) It would be out of place in a Bible dictionary to go at any length into the literary and philological interest of the Versions, but this part of the subject cannot be wholly omitted. It will be obvious how great this interest must be when we call to mind that in nearly every language the earliest monuments preserved to us consist of translations of the Bible. In many cases (e.g. Gothic, Armenian, Slavonic, etc.) we are told that alphabets were devised for the express purpose of these translations. Translations of the Bible, then, take us to the cradle of nearly every written modern language, and they not only give us our earliest information as to written languages, but they have exercised an important influence on their subsequent history by fixing the dialect which was to prevail as the literary dialect. As instances of this, the influence of the translations of Wyclif and Luther on the literary development of English and German may be mentioned; and of a somewhat similar kind was the influence of Hus's Bible in fixing the orthography of Bohemian or Chekh.

Again, when we pass to the early history of printing in any language, the importance of the Versions as evidence is clearly seen from the fact that the earliest printed books were often translations of the Bible. Thus the earliest Russian printed book was the Psalter of 1564, and the first printed book in Hungarian was Komjathy's translation of St. Paul's Epistles of 1533.

In emphasizing the philological importance of Versions of the Bible, we may point to Gothic and Basque, in which almost the only monuments of the language consist of translations of the Bible. The first of these, scanty as its fragments are, is by some centuries the oldest monument of the Teutonic family. Again, the MSS of the Latin Bible illustrate many steps in the process by which Latin developed into the later Romance languages in their separate forms.

LITERATURE.—Besides the special literature mentioned in connexion with the separate Versions (which see), the following books dealing generally with the subject will be found indispensable:—*Griech und Übersetzungen der Bibel* (Leipzig, 1897), a reprint of the art. 'Bibeltext' in *PRE3*, is indispensable both for its outline of the whole subject and its references to literature. For editions of the Bible in different translations the parts of the British Museum Catalogue on Bibles will give the titles and some idea of the size of the subject.

(1) NT: Scrivener's *Introduction to the Criticism of the NT*, vol. II. (London, 1894), gives the fullest account in English of the Versions of the NT; C. R. Gregory's *Prolegomena*, part III. to

Tischendorf's *Nov. Test.* (Leipzig, 1894), gives the fullest list of MSS of the Versions of NT; Eb. Nestle, *Einführung in das Gr. NT* (Göttingen, 1899, Eng. tr. 1901), is quite the best recent book.

(2) OT: The general subject of the Versions of the OT has not been so fully treated in English as that of the NT. Mention may be made of Wellhausen's edition of Bleek's *Einleit. in das AT*, and Buhl, *Text und Kanon des alten Testament* (Leipzig, 1891, Eng. tr. 1891), and Driver, *Notes on the Heb. Text of Sam.* 1890.

LL. J. M. BEBB.

VERSIONS, ENGLISH.—i. The history of the Versions of the English Bible may be said to begin with John Wyclif. Previous to his time there had been various attempts to render parts of the Scriptures into Anglo-Saxon and Anglo-Norman, or Middle-English. But these had not only been very fragmentary, but were for the most part paraphrases rather than literal translations. With Wyclif, however, a new era in Bible-translation began, and nothing that concerns him can fail to be of interest.* He was born about the year 1320 in the vicinity of Richmond in Yorkshire, and when he first comes publicly forward is found filling various important posts in the University of Oxford. The bold attitude with regard to the Papal Tribute which he took up in a Tract, led to his being selected as one of the Royal Commissioners sent to Bruges in 1374 to treat with the Papal Nuncio regarding the reservation of benefices, and from this time may be dated his appearance as an ardent ecclesiastical reformer—'the Morning Star of the Reformation.' For this end he instituted an order of 'poor priests' whose duty it was 'faithfully to scatter the seed of God's word,' and it was to aid them in this work that he set about providing them with the Bible in their native tongue. The first book translated was the Apocalypse, which was followed by a translation of the Gospels with a commentary, and soon after by versions of the remaining books of the NT, the whole being completed by 1380. To this was added a translation of the OT principally by one of his friends, Nicolas de Hereford, though Wyclif himself seems to have supplied the last books and about one-third of the Apocrypha, so that about the middle of the year 1382 the whole Bible was in the hands of the people 'in their mother tongue.' All this had not been accomplished without difficulty and even danger. Hereford had to flee the country, and Wyclif's own teaching was publicly condemned at a Synod in London in 1382. The hostility, however, would seem to have been confined to a few persons, notably Archbishop Arundel, for the new translation was generally tolerated, and the reformer himself, contrary to his own expectations, was eventually allowed to retire to his rectory of Lutterworth, where he passed quietly away on the last day of the year 1384.

But the good work was not allowed to stop, and in 1388 one of Wyclif's pupils, now generally identified with John Purvey, issued a careful revision of his translation, introduced by a most interesting Prologue, and accompanied by a number of short comments or notes. This version quickly took the place of the older one, and was largely circulated amongst all classes of the people notwithstanding its great cost.† Both versions were indeed admirably adapted for popular use, being characterized by great homeliness and directness of diction. And though many of the words and expressions used are now of course obsolete or

* See especially Lechler's *John Wycliffe and his English Predecessors*, translated and edited by Lorimer; and cf. 'The Birth and Parentage of Wyclif' by L. Sergeant in the *Athenæum* for March 12th and 26th, 1892.

† Forshall and Madden, in the preparation of their great work on *The Wycliffite Versions*, 1850, were able to examine nearly 150 MSS containing the whole or parts of Purvey's Bible, the majority of which were written within the space of forty years from its being finished' (Preface, p. xxxii f.).

* See Sanday in Smith's *DB2*, p. 1240, art. 'Gospels.'

† This is worked out fully in the chapter in Swete's *Introduction to the OT in Greek* which deals with this part of the subject, and for the Vulgate in Berger's *Histoire de la Vulgate*, pp. 301 ff., 331 ff.

inappropriate, it is wonderful, when the spelling is modernized, how little they differ as a whole from our AV. One great blemish they of necessity possess. They are only translations of a translation, being made from the Latin Vulgate; and it was left to another with improved facilities to carry on the work so auspiciously begun, and more than 'any other man to give its characteristic shape to our English Bible' (Westcott, *General View of the History of the English Bible*, 1872, p. 24).

ii. That other was **William Tindale**, and, though there is still considerable uncertainty regarding many of the facts of his life, it is now generally agreed that he was born at Slymbridge in Gloucestershire about the year 1484,* and that after studying at Oxford he proceeded to Cambridge in 1515, where the fame of Erasmus' lectures still lingered. In 1521 he returned to his native county as chaplain and tutor in the family of Sir John Walsh of Little Sodbury, and while there is credited with the resolution to which his whole after-life was devoted, saying in controversy with a clerical opponent, 'If God spare my life, ere many years I will cause a boy that driveth the plough shall know more of the Scripture than thou doest.' In pursuance of this purpose he went up to London two years later, in the hope of executing his task under the patronage of Bishop Tunstall; but after a year of anxious waiting the conviction forced itself upon him, 'not only that there was no room in my lord of London's palace to translate the NT, but also that there was no place to do it in all England' (*Pref. to Pentateuch*).

Voluntarily, therefore, in May 1524, Tindale exiled himself, and after a short stay at Hamburg seems to have visited Luther at Wittenberg. In any case, there can be no doubt that in 1525 he was at Cologne, engaged in bringing out a complete edition of the NT. His plan was, however, discovered by a certain priest John Cochlaeus, and he and his assistant Roye had barely time to secure the precious sheets already printed, and carry them off to Worms, where either in the same or the following year 3000 copies of the first printed English NT were issued from the press of P. Schoeffer the younger. The size of the book had been altered from *quarto* to *octavo*, probably to escape detection; but shortly afterwards the original *quarto* edition, whose printing had been interrupted in Cologne, was also completed. Copies of both editions were immediately despatched to England, where they were eagerly welcomed. But so vigorous were the steps taken against them that of the *octavo* edition only one complete copy (with the exception of the title-page) remains;† while the *quarto* is known to exist only in a single fragment (Mt 1¹-22¹²).‡

After the issue of his Testaments, Tindale quietly continued his work abroad, publishing a translation of *The Five Books of Moses* at Marburg in 1530, and *The Book of Jonah* with an interesting Prologue in 1531.§ An edition of the *Book of Genesis* 'newly corrected and amended' appeared in 1534, and in the same year there was published at Antwerp, 'The Newe Testament dylygently corrected and compared with the Greek by Willyam Tindale,' in which were included certain 'Epistles,' or extracts, out of the OT, a Table of Epistles and

Gospels for Sundays, and 'some things added' to fill up the blank pages at the end. The book was thus in some respects more like a modern Church Service Book than an ordinary Testament, while the improvements introduced into the text fully justified the translator's claim that he had 'weeded out of it many faults which lack of help at the beginning, and oversight, did sow therein.' This edition has well been described as Tindale's 'noblest monument'; but not even yet was his work of revision completed. In 1535 there appeared what is often known as 'the G. H. Testament' from the initials attached to the second title-page, and which were first interpreted by Mr. Bradshaw (1881) as denoting G. van der Haghen, the Antwerp publisher. In this edition the 1534 text was 'yet once agayne corrected by Willyam Tindale,' the corrections (there are said to be about four hundred of them) proving by their very minuteness the translator's fidelity and zeal. Another NT bearing the same date (1535) is remarkable for its peculiar orthography, sometimes thought to have been purposely adapted to the pronunciation of the peasantry (e.g. 'faether' for 'father,' 'hoeme' or 'hooe' for 'home'), but in all probability caused by the mistakes of some Flemish printer in setting up a foreign language. As further showing the rapid spread of Tindale's translations, it may be mentioned that in the following year (1536) seven, if not eight, editions of his NT appeared, one of which (in folio) is believed to have been the first portion of the Holy Scriptures printed in England.*

There was to be no return, however, for Tindale himself to what he pathetically calls 'mine natural country,' for, having been betrayed into the hands of his enemies and imprisoned for about a year at Vilvorde, near Brussels, he suffered martyrdom on Friday, 6th Oct. 1536. With his last words he prayed, 'Lord! open the king of England's eyes.'

It is impossible here to examine in detail Tindale's service to the cause of Bible translation, but one or two points may be indicated. (1) Foremost amongst these is the *independence* of his work. Attempts have been made to underestimate this, and more particularly to prove him on the one hand 'merely a full-grown Wycliffe,' and on the other to show how largely he borrowed from the German Testament of Luther. But while Purvey's revision undoubtedly influenced him indirectly by supplying many proverbial expressions and technical terms which through it had become current, and Luther's Testament, more especially in its Prefaces and marginal Notes, was freely consulted and used, Tindale was too good a scholar to be slavishly dependent on any one,† and can justly claim the honour of being the first in England at any rate (with the possible exception of Bede) to go straight to the Hebrew and Greek originals.‡ (2) If, however, in his own work he was largely independent of others, his influence on those who followed him was direct and unmistakable. Thus it is to him that we owe in great part our religious vocabulary,§ and, what is even more important, that freedom from dog-

* These and many other interesting details will be found in *A Bibliographical Description of the Editions of the NT, Tindale's Version, in English*, by Francis Fry, 1878.

† According to an eminent German scholar, H. Buschius, who met him at Worms in 1526, Tindale was 'so skilled in seven languages, Hebrew, Greek, Latin, Italian, Spanish, English, French, that whichever he spoke you would suppose it his native tongue' (Schelhorn, *Amenitates Literarias*, iv. p. 431).

‡ The Greek Testament which he used was that published by Erasmus, edd. of 1519, 1522.

§ It has been calculated that in the whole of Tindale's NT the number of stranger words, or words that do not occur in the AV, is probably below 350, many of which are used once or twice only (Moulton, *The History of the English Bible*, pp. 70, 71). Of his work as a whole, our Bibles are said to retain at the present day about 80 % in the OT and 90 % in the NT.

* See *William Tyndale, a Biography*, by R. Demaus, new ed. by Lovett, 1886, p. 24.

† Now in the Library of the Baptist College at Bristol, and reproduced in facsimile in 1862 by Mr. F. Fry. It was previously reprinted with an introduction by G. Offor in 1836.

‡ Preserved in the Grenville Room of the British Museum, and photo-lithographed and published with a valuable introduction by E. Arber in 1871.

§ The former has been reprinted under the editorship of Dr. Mombert, and the latter in facsimile with an introduction by Mr. Fry.

matic bias and scrupulous fidelity to the exact letter of Scripture which have been in general such happy features of our English Versions.* (3) It would be idle indeed to pretend that Tindale fell into no mistakes. Many of his renderings are incorrect, others are uncouth, others are paraphrases rather than translations. Serious blemishes, too, are his constant disregard of connecting particles, and his habit of translating the same word in different ways even in the same sentence. But, take it all in all, his translation is a noble one, and its very faults, as Fuller says, are 'to be scored on the account rather of that age, than of the author himself.'

iii. Nor had Tindale left himself without worthy successors. Amongst those who are stated by Foxe to have assisted him in translating the Pentateuch was one **Miles Coverdale** (b. 1488, d. 1569), who, urged on by Cromwell, now devoted himself so steadily to the work of Bible-translation that on Oct. 4th, 1535, the first complete printed English Bible was issued, the sheets of which are believed to have been printed by J. van Meteren of Antwerp, and then sold to Nicolson the Southwark printer. The original title ran as follows:—'**Biblia**, The Bible: that is, the Holy Scripture of the Olde and New Testament, faithfully and truly translated out of Douche [German] and Latyn into Englishe, MDCXXXV.' The English printer in substituting a new title-page of his own omitted for some reason the reference to 'Douche [German] and Latyn,' and added several preliminary pages containing a Dedication to king Henry VIII. and a Prologue to the Christian Reader, both signed by Coverdale. In this Dedication, Coverdale disclaims the position of an independent translator, and speaks of having 'with a clear conscience purely and faithfully translated this out of five sundry interpreters' (now generally identified with Luther, the Zürich Bible, the Vulgate, the Latin version of Pagninus, and in all probability Tindale), and to the same effect in the Prologue he specially acknowledges his indebtedness to 'the Dutch interpreters, whom (because of their singular gifts and special diligence in the Bible) I have been the more glad to follow for the most part, according as I was required.'

Notwithstanding these admissions, it would be wrong, however, to regard Coverdale as a mere 'proof-reader or corrector,' for, while making diligent and discriminating use of the different authorities within his reach, he supplied many of those happy turns of expression which lend so much of its charm to our English Bible. This is perhaps specially noticeable in the Psalter, of which Coverdale's version in the revised form in which it appeared in the Great Bible still retains its place in the English Book of Common Prayer. Two new editions of Coverdale's Bible were issued by Nicolson in 1537, on the title-page of which there now appeared for the first time the significant words, 'Set forth with the Kynges most gracious licence.' The following year found Coverdale engaged in biblical work in Paris, and the fruit was seen in a Latin-English Testament, of which in one year three editions were called for. New editions of the Bible appeared in 1550 and 1553.†

iv. Other translations now followed in rapid succession, one of which is generally known as **Matthew's Bible**. Its real editor, however, was a certain John Rogers, who adopted the *alias* of Thomas Matthew—perhaps, as Foxe suggests, to

hide his connexion with Tindale. As to the closeness of this connexion there can at least be no doubt. The whole of the NT and about half the OT in the new edition are Tindale's, while the remainder is Coverdale's. Signs are not wanting, however, of critical editorship. Thus in the Psalter various readings are introduced in the margin, and many technical terms are carefully explained. Numerous notes have also been added, many of which breathe a spirit of ardent Protestantism, and there is a large amount of prefatory matter principally from Olivetan's French Bible (1535). Like the second edition of Coverdale's Bible, the new version bears to be 'set forth with the kinges most gracyous lycēce,' and Cromwell, instigated by Cranmer, further obtained Henry's permission that 'the same may be sold and read of every person, without danger of any act, proclamation, or ordinance heretofore granted to the contrary.' Hence it came about that 'by Cranmer's petition, by Cromwell's influence, and by Henry's authority, without any formal ecclesiastical decision, the book was given to the English people, which is the foundation of the text of our present Bible. From Matthew's Bible—itself a combination of the labours of Tyndale and Coverdale—all later revisions have been successively formed' (Westcott, *History*², p. 73). Its author did not, however, escape in the troublous times that followed on Mary's accession. Through the agency of Bonner he was imprisoned at Newgate, and on Feb. 4th, 1555, was burned at the stake, setting a second seal to the fourfold seal of martyrdom by which the history of our English Bible has been hallowed.

v. Closely allied to Matthew's Bible is a version bearing the name of **Richard Taverner**, which was published in 1539, and bore to be 'newly recognized with great diligence after most faythful exemplars.' But the changes introduced are not as a rule of any great importance, though in the NT there are occasional forcible renderings. In Mt 21. 22, for example, Dr. Moulton finds in all about 40 variations from Tindale, of which one-third are retained in the AV (*History*, p. 135). So far as we know, Taverner's Bible was only once reprinted, in 1549 (Cotton's *Editions of the Bible*², p. 21).

vi. We have seen already what a steady friend of Bible-translation Cromwell had proved himself. He was to render it yet another notable service. Not wholly satisfied with any version that had appeared, he applied to Coverdale early in 1538 to undertake a wholly new revision, using Matthew's Bible as his basis; * and as it was determined that the printing should be done in Paris, Coverdale, accompanied by one Grafton, at once repaired thither. Before, however, the work was completed, the Inquisition stepped in, and it was with great difficulty that the sheets were saved, and the presses sent over to England. There the work was soon finished, and in April 1539 the **Great Bible**, as being the Bible 'in the largest volume,' was issued from the press. It possessed a title-page of elaborate design, in which Henry was represented as handing 'the Word of God' to Cranmer and other clergy on his right hand, and to Cromwell and various lay-peers on his left; while the contents are described as 'truly translated after the veryte of the Hebrue and Greke textes, by ye dyligent studye of dyuerse excellent learned men expert in the forsayde tonges.' There can be no doubt, however, that the work was principally Coverdale's, and that in his revision of Matthew's text he made large use of Münster's Hebrew-Latin version in the OT, and of the Vul-

* 'I call God to record against the day we shall appear before our Lord Jesus, to give a reckoning of our doings, that I never altered one syllable of God's word against my conscience, nor would this day, if all that is in the earth, whether it be pleasure, honour, or riches, might be given me.'—Tindale in *Letter to Fryth*, 1533 (Demaus's *Tyndale*, p. 336).

† A convenient reprint of Coverdale's Bible of 1535 has within recent years been issued by Bagster.

* 'I am always willing and ready,' Coverdale had written in the Dedication to his Bible, 'to do my best as well in one translation as in another.'

gate and Erasmus in the NT. From the Vulgate more especially he introduced a number of various readings, but 'certain godly annotations' which he promised in the Prologue to explain 'the dark places of the text' never appeared. In 1540 a new edition was called for, containing a long Preface by Archbishop Cranmer, which has led to its being known as **Cranmer's Bible**. Five other editions followed rapidly within the next eighteen months.* From their size and cost these were principally used as Church Bibles, and it must have been a pleasing sight to see in Old St. Paul's or in the aisle of some country church the little group round the Great Bible, from which some one more educated than the rest read aloud.

vii. The people, however, were soon to have a Bible of their own, and for this we must turn again to the Continent. The accession of Mary had given a new turn to the ever-varying fortunes of our Bible's history. Cranmer had followed Rogers to the stake, and the public, though apparently not the private, use of the Scriptures was strictly forbidden. Foreseeing what was coming, a number of the leading Reformers had taken refuge at Geneva, the city of Calvin and Beza, and there, as they themselves tell us, 'we thought we could bestow our labours and study in nothing which could be more acceptable to God, and comfortable to His Church, than in the translating of the Scriptures into our native tongue.' The immediate result was the publication in 1557 of a translation of the NT alone by one of their number, **William Whittingham**, who, in his Address to the Reader, describes his work as specially intended for 'simple lambs.' And it was doubtless the thought of the same class of readers that led to the numerous 'annotations of all hard places,' and to the adoption for the first time in an English translation of the convenient but often misleading division into verses.†

This Testament was, however, soon cast into the shade by the publication in 1560 of a translation of the whole Bible, due in the main to the combined labours of William Whittingham, Thomas Sampson, and Anthony Gilby. In size this **Genevan Bible** is a moderate quarto, and it is often familiarly known as the *Breeches Bible* from its rendering of Gn 3⁷ ('They sewed fig-tree leaves together, and made themselves breeches'). The cost of its production was met by 'such as were of most ability' in the congregation at Geneva.

Regarded simply as a translation, the version deserves high praise, being based on a careful revision of the Great Bible in the OT, and, under the influence of Beza's Latin translation and Commentary, of Tindale's latest edition in the NT. The changes thus introduced were as a rule marked improvements, and many of them were subsequently adopted in the AV. The new version was also abundantly supplied with marginal notes principally of an explanatory character, and these, combined with the convenient size in which it appeared, did much to account for the popularity which for long it enjoyed,‡ passing as it did through 160 editions, 60 of them during the reign of Elizabeth alone,§ and continuing to be printed for some time even after the publication of the AV in 1611.||

* From the fact that several of these editions were printed by Whitchurch, the Great Bible is sometimes known as *Whitchurch's*.

† The scheme which Whittingham adopted was that prepared by R. Stephanus for the 4th ed. of his Greek NT, published in 1551. In the OT the division into verses was already in existence in the Hebrew Bible.

‡ In 1640 an edition of the AV itself was actually brought out with the Genevan notes, evidently for the purpose of commending it to public favour.

§ After 1587 a revised version of the NT made by Laurence Tomson in 1576 generally took the place of the earlier version.

|| The Genevan was the first Bible printed in Scotland in an issue generally known as the *Bassandyne Bible*, from the printer's

viii. It was not to be expected, however, that the successors of Cromwell and Cranmer could look with favour on a translation emanating from the school of Calvin, and containing so many 'prejudicial notes.' Accordingly, in 1563-64 Archbishop Parker set on foot a scheme for the revision of Coverdale's version by a number of learned men working separately; and in 1568 the **Bishops' Bible**, so called from the number of bishops engaged on it, was completed, and a copy presented to the queen. An effort was made at the same time to secure that it alone should be licensed 'to draw to one uniformity.' But, from whatever cause, this licence was never granted, and, although the version gained a considerable circulation, this was due rather to the support accorded to it by Convocation than to its own merits.*

The truth is that as a translation it was marked by the inequality inevitable to a work which had been sorted out into 'parcels' amongst a number of independent workers. In the OT the historical books as a rule followed the Great Bible very closely; but in the prophetic books greater variation was indulged in, many of the changes being distinctly traceable to the influence of the Genevan Bible. The Psalter was practically a new translation; and on this account failed to maintain its ground against the version in the Great Bible, already endeared by constant use. In the 2nd edition of 1587 the two versions were printed side by side, but in all later editions except one (1585) the old Psalter alone appeared. In the NT, on the other hand, more particularly in the 1572 edition, the bishops introduced many marked improvements, pointing to a careful study of the original text, though their renderings were occasionally marked by cumbrousness and a love of mouth-hilling phrases. On the whole, however, the influence of the Bishops' Bible on succeeding versions cannot be said to have been very great, and, as has already been indicated, it failed to oust the Genevan Bible from its place as the favourite Bible for household use. The authority of the latter was now, however, to be subjected to a fresh challenge.

ix. This came from the Church of Rome, and it is again interesting to notice that the new version, like the Genevan and Tindale's, was produced in exile. At the beginning of queen Elizabeth's reign a number of English Romanists had taken refuge on the Continent, and in 1582 there was published a NT 'translated faithfully into English out of the authentical Latin, according to the best corrected copies of the same, diligently conferred with the Greeke and other editions in divers languages. . . . In the English College of Rhemes.' The translation of the OT had been previously completed, but 'for lack of good meanes' its publication was delayed until 1609-10, when it came out at Douai. The whole Bible thus issued is generally known as the **Rheims and Douai Bible**, and to three men, William Allen, Gregory Martin, and Richard Bristow, the credit of its production principally belongs. Prefixed to the Rhemish NT was an elaborate Preface, in which the translators warned readers against the then existing 'profane' translations, laid the odium on Protestants of casting 'the holy to dogges and pearles to hogges,' and claimed for themselves to have at least been 'very precise and religious' in following their copy, 'the old vulgar approved Latin.' The new version was thus, like the

name Thomas Bassandyne (see *History of the Bassandyne Bible*, by W. T. Dobson, 1887); and so firm was the hold it obtained in the country, that so recently as towards the close of the 18th cent. a Bible of the Genevan translation was still in use in the church of Crail in Fifeshire.

* It passed through nineteen editions; the last bears the date 1606.

Wyclifite versions, only a secondary translation, and it was not to be wondered at that the extreme literalness at which the translators aimed 'word for word and point for point' led often to stilted and even unintelligible renderings, and also to the introduction of many Latinized terms, many of which were afterwards adopted in the AV. The charge of theological bias sometimes brought against the translators with regard to some of these terms is probably without foundation; but the same cannot be said of their notes, which are unmistakably and avowedly of a polemical character. It need only be further noted that in later editions the Douai version has been largely altered to bring it more into conformity with—

x. **The Authorized Version.**—To the history of this version we have now come, and, when we think of the influence it exerted and is still exerting, it is the more remarkable that its origin should have been of such an incidental, almost accidental, character. One of the first acts of king James on ascending the throne of England was to convene a Conference at Hampton Court Palace in January 1604, to hear and determine 'things pretended to be amiss in the Church,' and in the course of the second day's proceedings Dr. Reynolds, the Puritan leader, threw out the suggestion 'that there might be a new translation of the Bible, because those which were allowed in the reign of king Henry VIII. and Edward VI. were corrupt and not answerable to the truth of the original.' The suggestion commended itself to the king, who had at one time begun a translation of the Psalms himself, and he at once proposed that the new translation should be undertaken by 'the best learned in both the universities, after them to be reviewed by the bishops and chief learned of the Church; from them to be presented to the Privy Council; and lastly to be ratified by his royal authority; and so this whole Church to be bound unto it and none other.' He further ordered 'that no marginal notes should be added,' some of those in the Genevan Bible having recently attracted his attention as 'very partial, untrue, seditious, and savouring too much of dangerous and traitorous conceits.'

Notwithstanding, however, the royal favour bestowed upon it, the actual work of translation, or rather revision, was not commenced until 1607, when the forty-seven revisers (it had been originally intended that there should be fifty-four) were divided into six companies, of which two sat at Westminster, two at Oxford, and two at Cambridge. Each company was to busy itself in the first instance with the separate portion assigned to it, but provision was also made for the revision of each portion by the other five companies, and the whole version thus amended was then to be submitted to a select committee representative of all the companies for the harmonizing of details and final preparation for the press. How far these arrangements were rigidly adhered to we cannot now determine, for 'never,' says Dr. Scrivener, who is our principal authority on all that concerns this version, 'was a great enterprise like the production of our Authorized Version carried out with less knowledge handed down to posterity of the labourers, their method and order of working' (*The Authorized Edition of the English Bible*, p. 9). We know, however, that in two years and nine months the whole work of revision was carried through, and in 1611 the new version was published. Its full title ran as follows:—'The Holy Bible, containing the Old Testament and the New: Newly Translated out of the Originall tongues: with the former Translations diligently compared and reuised by his Maiesties Special Comandement. Appointed to be read in Churches.

Imprinted at London by Robert Barker, Printer to the King's Most Excellent Majesty. Anno Dom. 1611.'* After the title-page came the fulsome Dedication to king James, and a most interesting Preface, generally understood to be the work of Dr. Miles Smith, afterwards Bishop of Gloucester, in which the main principles that had guided the translators were set forth.†

We cannot now attempt to detail these, or to examine the leading internal characteristics of the new version; but it is important to keep in mind that, in accordance with the rules that had been laid down for their guidance, what the translators aimed at was a revision rather than a new translation. The basis of their work was the Bishops' Bible; but the versions of Tindale, Matthew, Coverdale, Whitchurch (that is, the Great Bible), and Geneva were used whenever they were found to be more in accordance with the original, so as to make, in the translators' own words, 'out of many good ones one principal good one, not justly to be excepted against.' No marginal notes were permitted, 'but only for the explanation of the Hebrew or Greek words which cannot, without some circumlocution, so briefly and fitly be expressed in the text,'—an exception which was somewhat liberally interpreted;‡ and 'such quotations of places' were 'set down as shall serve for the fit reference of one Scripture to another.'§ A new set of headings of chapters and columns was also substituted for those that had existed in the Genevan, and in the Great and Bishops' Bibles; but the dates (mostly from Ussher) with which we are familiar in most modern editions were first inserted in 1701.

The immediate reception of the new version can hardly be said to have been altogether encouraging to its promoters, for though there was little active opposition extended to it, and it speedily superseded the Bishops' Bible as the official version, it was not until the middle of the century that it ousted the Genevan Bible from the place of popular favour.|| That it deserved the place which it then attained does not admit of a moment's dispute; and none have shown themselves more ready to admit its merits than those who in 1870 were appointed to revise it. 'We,' so they tell us, 'have had to study this great Version carefully and minutely, line by line; and the longer we have been engaged upon it the more we have learned to admire its simplicity, its dignity, its power, its happy turns of expression, its general accuracy, and, we must not fail to add, the music of its cadences, and the felicities of its rhythm' (*Pref. to RV of NT*, 1881).

At the same time, great as the excellences of the AV undoubtedly are, it would be absurd to contend that it is not capable of improvement, or that the work of constant revision out of which it has been evolved cannot be applied to it in its turn. And indeed, as a matter of fact, what we still know as king James's version has been subjected throughout the course of its long history to a larger amount of revision than many of its

* A useful reprint of this original edition was issued from the Oxford Press in 1833.

† It has been reprinted in separate form by the S.P.C.K.

‡ In the original edition of the AV, excluding the Apocrypha, over 7000 brief marginal notes were inserted, a number that has since been largely increased.

§ The original 9000 references have, in some modern editions, reached the enormous total of 60,000.

|| From the words 'Appointed to be read in Churches' on the title-page, it has sometimes been thought that the use of the new version was at once formally enjoined by the king, and that from this it derived its name of *Authorized*. But 'no evidence has yet been produced to show that the version was ever publicly sanctioned by Convocation or by Parliament, or by the Privy Council, or by the king' (Westcott, *History*², p. 123). It became the 'authorized' version simply because it was the best.

readers are aware of. For not merely have the typographical and other imperfections inevitable in so large an undertaking been corrected, but a large number of deliberate changes have from time to time been made in the text, 'introduced silently and without authority by men whose very names are often unknown.'* And, in addition to this unofficial and irresponsible work of revision, we have abundant evidence of more ambitious proposals for amending the new version. Thus, in 1645, Dr. John Lightfoot, preaching before the House of Commons, urged them 'to think of a review and survey of the translation of the Bible,' and pleaded for 'an exact, vigorous, and lively translation.' And a few years later (1653) the Long Parliament actually made an order that a Bill should be brought in for a new translation. Nothing, however, came of this and similar schemes which were proposed from time to time:† and it was left to the Southern Convocation of the Church of England to take the initial steps for providing us with what is now known as *par excellence*—

xi. **The Revised Version.**—The fact that it took its rise in Convocation marks off the RV from all other English versions. Tindale's Testament and Coverdale's Bible were the work of individuals; the Great Bible and the Bishops' were Episcopal in their origin; the Geneva and the Rheims and Douai Bibles were due to two bands of exiles, Protestant and Roman Catholic respectively; but the idea of the RV was matured by representatives of the Church of England, and carried through with the assistance of members of other Churches.‡

Over the steps leading up to the final decision we cannot linger. Enough that in May 1870 the report of a committee appointed in the preceding February was adopted, to the effect 'that Convocation should nominate a body of its own members to undertake the work of revision, who shall be at liberty to invite the co-operation of any eminent for scholarship to whatever nation or religious body they belong'; and that shortly afterwards, in terms of this resolution, two Companies for the revision of the Old and New Testaments respectively were appointed. Eight rules were laid down for the Revisers' guidance, the most important of which were to the following effect:—the alterations to be as few as possible consistently with faithfulness to the original, and to be made in the language of the Authorized and earlier English versions; each Company to go twice over the portion to be revised, once provisionally, the second time finally; the Text adopted to be that for which the evidence is decidedly preponderating; and no changes in the text to be retained on the second final revision, unless approved by *two-thirds* of those present.

It will be seen that every precaution was thus taken to ensure that no unnecessary changes should be introduced into a version already hallowed by so many and so varied associations; and probably the charge that is most frequently brought against the Revisers is that they were too apt to lose sight of this. At the same time, it is only fair to them to keep in view the varied causes

* Scrivener, *The Authorized Edition*, p. 3. These changes may also be conveniently studied in *The Cambridge Paragraph Bible*, edited by Scrivener, 1873.

† See Plumptre, art. 'Version (Authorized)' in *Smith's DB* iii. 1678 ff.

‡ The history of the RV still remains to be written, but amongst recent works which helped to prepare the way for it may be mentioned Trench, *On the AV of the NT in connexion with some recent proposals for its revision*, 1859; Ellicott, *Considerations on the Revision of the English Version of the NT*, 1870; Lightfoot, *On a Fresh Revision of the English NT*, 1891; the Revisions of the Gospel of St. John and of several of the Pauline Epistles by Five Clergymen, the first part of which appeared in 1857; and Dean Alford's *Revised NT*, 1869.

that made many changes inevitable. Thus, in the matter of text alone, it has been estimated that the text underlying the revised NT of 1881 differed from that of 1611 in no less than 5788 readings;* while other variations were necessitated by obvious misunderstandings of the original, by the removal of archaisms, and by previous inconsistencies in the rendering of the same words and phrases. Numerous, however, as the differences between the Revised and Authorized versions thus came to be, it is reassuring to know that in no particular have they seriously affected any of the doctrines of our faith, though in not a few instances these doctrines are now presented in a fuller and more convincing light.†

The revision of the NT occupied about ten years and a half, and the result was published on May 17th, 1881. Four years later the Revised OT was ready, and thus on May 19th, 1885, the English reader had the whole Bible in his hands, 'being the version set forth A.D. 1611 compared with the most ancient authorities and revised.' Each Testament was furnished with a Preface detailing the principles on which the work had been carried through, and with an Appendix in which the American Companies, who had been associated in the work, placed on record certain points of translation in which they differed from the English Companies. A revised translation of the Apocrypha by various committees of the Revisers was published in 1895. And in 1898 the work of revision was completed by the issue of a new edition of the Revised Bible with a carefully emended set of marginal references.

LITERATURE.—The principal works dealing with the separate versions have already been referred to in the preceding pages. For the versions as a whole, Eadie, *The English Bible: an External and Critical History of the various English Translations of Scripture*, 2 vols. 1876, is the most complete account; but much that is very valuable, especially with relation to the internal history of the text, will be found in the well-known *Histories* of Westcott and Moulton. Of a more popular character are Stoughton, *Our English Bible: its Translations and Translators* (no date); Pattison, *The History of the English Bible*, 1894; and *The English Bible: a Sketch of its History*, 1895, by the present writer, from which the foregoing account with various corrections and additions has been principally drawn. In Kenyon, *Our Bible and the Ancient Manuscripts*, 1895, the history of the text underlying our various versions is clearly set forth for the benefit of the ordinary readers of the Bible in English; and in *The Evolution of the English Bible*, 1901, by H. W. Hoare, the successive versions are interestingly described in connexion with their general historical setting.

Other works connected with the subject which may be consulted with advantage are, Lewis, *History of the English Translations of the Bible*, 1818, and Anderson, *The Annals of the English Bible*, 2 vols. 1845, 1 vol. revised ed. 1862, both of which, however, require to be carefully verified in the light of later knowledge; Dore, *Old Bibles*, 1888; Edgar, *The Bibles of England*, 1889; Mombert, *English Versions of the Bible* (no date); and the historical account prefixed to Bagster's issue of *The English Hexapla* (no date).

The principal authority for the AV, as has been noted above, is Scrivener, *The Authorized Edition of the English Bible* (1611), 1884; while to the books already mentioned as dealing with the RV there may be added Newth, *Lectures on Bible Revision*, 1881 (with an Appendix containing the Prologues and Prefaces to the various versions); Kennedy, *Ely Lectures on the RV of the NT*, 1882; Humphry, *Commentary on the RV of the NT*; Westcott, *Some Lessons of the RV of the NT*, 1897; and Ellicott, *Addresses on the RV*, 1901. Reference may also be made to *Biblical Revision, its Necessity and Purpose*, 1879, the English republication of a series of Essays by members of the American Revision Committee; and to the *Documentary History of the American Committee on Revision*, 1885, prepared originally by order of that committee for the use of its members. For a vigorous but sometimes misleading criticism of the RV see Burgon, *The Revision Revised*, 1883.

G. MILLIGAN.

* See Kenyon, *Our Bible and the Ancient Manuscripts*, p. 239; and compare Bishop Westcott's weighty words, 'Whatever may be the merits of the revised version, it can be said confidently that in no parallel case have the readings of the original text to be translated been discussed and determined with equal care, thoroughness and candour' (*History*, p. viii, note).

† See 'The Doctrinal Significance of the RV,' three articles in *The Expository Times*, vii. 377, 452, viii. 171.

VERSIONS (GEORGIAN, GOTHIC, SLAVONIC).—

A. The Georgian Version.—This version is ascribed to the 5th or 6th cent., and, according to Armenian tradition, was the work of Mesrop, who also invented the Georgian alphabet. There are two characters in use—one for sacred writings called *Kuzuri*, and another, called *Mkedruli*, for civil purposes. By far the fullest account of this Version is found in Tsagareli's *Information about the Monuments of Georgian Literature* (in Russian), from which many of the facts which follow have been taken. The earliest period of literary activity lasted from the 5th to the 9th cent., and to it belong a papyrus Psalter assigned to the 7th or 8th cent., of which a facsimile is given in the work just mentioned, and a copy of the Gospels and a Psalter dated a century later. Both these are in the monastery on Mount Sinai. The next period, from the 10th to the 12th cent., Tsagareli calls the classical period. To this belong the oldest dated copy of the Gospels, assigned to A.D. 936, a MS—dated 974—of the Acts and Epistles of St. James and St. Peter, and the earliest MS of the whole Bible (now in part mutilated in the Pentateuch), dated 978, in two volumes. This last MS is preserved in the Iberian Monastery on Mount Athos. To the same period belongs an important MS of the Prophets at Jerusalem, assigned to the 11th cent. In this the Minor Prophets precede the Major, in the Athos MS the order is reversed. The chief centres of literary activity were the monastery on Mount Sinai, the monasteries of the Holy Cross and St. Sabbas near Jerusalem, and Mount Athos, each centre having a characteristic style of writing. The names of many of the scribes are preserved in the MSS. A chronological list of the MSS near Jerusalem and on Mount Sinai is given by Tsagareli in an appendix. This includes five Psalters, three MSS of other parts of the OT, fourteen of the whole or parts of the Gospels, eleven of the *Apostol*, and two of other parts of the NT.

Our information in regard to the text of the Version is derived mainly from the edition published at Moscow in 1743. This was used by F. C. Alter for the material he supplied to Holmes and Parsons for their edition of the LXX, and in his little monograph *Ueber Georgiänische Litteratur* he gives a number of select readings throughout the Bible. Some doubt has been thrown on the value of the Moscow edition of the Georgian Bible because of a suggested corruption from the Slavonic. In regard to this point the Preface tells us that the edition was made for Archel, who, finding no complete Bible in Georgia, translated the gaps according to his powers, using the Slavonic for this purpose. We find passages (e.g. Ca 2¹) where misreading of the Slavonic has led to a mistaken rendering. When we go behind the edition to the MSS we find variations of text, as in the Athos and Jerusalem MSS of the Prophets; so again the Moscow edition differs from the Athos MS of the Song of Songs. In this as in the other Versions there seem to have been revisions and additions. Thus Tsagareli (l.c. 59) mentions two different translators, and adds, 'looking at the various readings of the Georgian NT and OT, we see there were several redactions of the Georgian Bible.' Mr. Conybeare also refers to the statement of Georgian writers, that 'before the tenth century a revision was made of their version.' Of the Gospels, Mr. Conybeare* from his own collations testifies that 'the printed text fairly represents the MSS,' though he adds that 'the most ancient MSS of the Version must be collated and a critical text of it prepared before it can be quite reliably used as an early witness to the Greek text in regard to any

* Scrivener's *Introduction*, ii. p. 157.

particular points.' Both in the OT and in the NT the Version was made from the Greek.

LITERATURE.—Besides the brief notices in Gregory's *Prolegomena*, p. 922, and Nestle's *Urtext*, reference may be made to F. C. Alter, *Ueber Georgiänische Litteratur*, Wien, 1788, to Tsagareli's book already described, and to Mr. Conybeare's account in *Scrivener's Introduction*, ii. 156.

B. The Gothic Version.—i. **ORIGIN OF THE VERSION.**—The beginnings of this Version are associated with the name of *Ulfilas*, and our knowledge of him comes mainly from Philostorgius, who was a contemporary and a native of the district of Cappadocia, from which Ulfilas' parents had been carried away near the end of the 3rd cent. during an invasion of Goths who came from Dacia. In Dacia, Ulfilas was born of Christian parents, probably some time between A.D. 310 and A.D. 313; thirty years later, in 340 or 341, he was consecrated bishop either at Constantinople or, as Kauffmann asserts, at Antioch. After remaining in Dacia as bishop for some seven years, he was driven out by persecution to Moesia, and to the period of his stay there the translation of the Bible into Gothic is ascribed. The commencement of the Version therefore dates from about the middle of the 4th cent., and, if it was all the work of Ulfilas, was completed before the year 381, in which year or (according to Jostes) in 383 he died.

This is one of several Versions for which an alphabet is said to have been invented by the translator. Before this time the Goths, like the other Teutonic families, seem to have used runes, and some of these older characters are kept in the alphabet ascribed to Ulfilas. Luft in his *Studien zur den ältesten Germanischen Alphabeten* (quoted by Nestle), traces 18 of the letters used by Ulfilas to a Greek source, 9 to the Latin. As was to be expected, many words were also carried over into Gothic from Greek, Latin, and other languages.* The number of foreign words found in the fragments which have come down to us is put by Nestle at 116.

It will be natural to ask what was the extent of the Version made by Ulfilas. The authority already quoted, Philostorgius, says that Ulfilas translated 'all the books of the Scripture with the exception of the Books of Kings, which he omitted because they are a mere narrative of military exploits, and the Gothic tribes were especially fond of war.' This statement is entitled to serious consideration as that of a contemporary, and we must infer from it that at any rate by A.D. 400, or soon afterwards, there was a translation of the Bible into Gothic, complete save for the books named. On the other hand, Nestle argues from Jerome's language in his well-known letter to Sunnias and Fretella, that at the date of the letter, some 50 years after Ulfilas' translation was made, these two Gothic students were occupied with a translation of the Psalter into Gothic, as if one did not exist. Jerome's words may, however, be interpreted on the supposition that they were working at a translation already made and its relation to the *Hebraica veritas*. Another statement, made by Walafrid Strabo, a writer of the 9th cent., is not sufficient to prove that Ulfilas was aided by others, for it is vague, and the authority on which it rests is unnamed. 'The Goths,' he says (*de Rebus Eccl.* 7), 'had one language; and, as histories testify, they translated the sacred books into their language . . . and of these some monuments are still preserved.' An argument of a different kind is mentioned by Sievers (*Encyc. Brit.* s.v. 'Goths'),

* The word 'heathen,' as discussed in Murray's *English Dictionary*, gives an interesting illustration. It is traced there on the basis of investigations by Bugge through the Gothic to the Armenian.

who says that 'certain differences in language and manner of translation make it doubtful even whether the fragments of the OT can be traced to the same origin as those of the New.'*

ii. THE MANUSCRIPTS.—The history of the Version breaks off abruptly, for we know nothing more of it than can be gathered from the scanty remains which have come down to us in the MSS—remains which, scanty as they are, are of the greatest possible interest and value to the philologist, because they are 'by several centuries the oldest specimen of Teutonic speech.' How far they underwent any changes during the century and a half, or rather more, which intervened between the date of Ulfilas and that to which they are assigned, we cannot say. They all belong to the period of the East Gothic kingdom in Italy which began with Theodoric (493–526), and are all assigned to N. Italy.

The following† is a list of the MSS of the Bible in this Version:—

1. *Codex Argenteus*.—This MS is the most important. It is assigned to the 5th or early 6th cent., and is now at Upsala in Sweden. It is written in uncial, the letters being of gold or silver, on purple vellum. The MS now contains, on 197 leaves, large fragments of Matthew, John, Luke, Mark in that (the Western) order, beginning with Mt 5:15.
2. *Codex Carolinus*.—This and the following fragments are all palimpsests. It is bilingual (Goth. Lat.), and is now at Wolfenbüttel. The upper writing consists of works of Isidore of Seville. The MS is that usually referred to as P. Q. of the Gospels, and *que* of the Old Latin (Epistles). It was discovered by Knittel, and edited by him in 1762. It contains on four leaves about 42 verses from Ro 11–15. It has been regarded (so Bernhardi) as corrected from the Latin in some places, e.g. 122:3, and in places agrees very closely with the first fragment at Milan, even in orthographical peculiarities.
3. *Codices Ambrosiani*.—The following are now in the Ambrosian Library at Milan. These fragments, all in MSS which came from Bobbio, and originally belonged to two Gothic MSS, were discovered by Mai in 1817. Other fragments of the same MSS have been discovered at Turin and in the Vatican. Mai ascribes the writing in part to the early 5th, in part to the 6th, century:—
 - (1) (S. 36) is a MS containing Gregory the Great's Commentary on Ezekiel. Of this 102 leaves (1 of which is illegible and 6 blank) belong to a Gothic MS (in which a note at 2 Co 4:14 says, *liber sancti Columbani de bobio*) containing fragments of Rom., 1 and 2 Cor., Eph., Gal., Phil., Col., 1 and 2 Thess., 1 and 2 Tim., Titus, and Philem., in that order, and a fragment of a Gothic calendar.
 - (2) (S. 45) is said to be written in an older character than (1), and contains on 78 leaves 2 Cor., and fragments of 1 Cor., Gal., Eph., Phil., Col., 1 and 2 Thess., 2 Tim., and Titus.
 - (3) (L. 61 sup.) contains † on 2 leaves Mt 25:33–26:2, and 26:68–27:1.
 - (4) (G. 82) contains on 3 leaves fragments of Ezra and Nehemiah.‡
 - (5) (G. 14) contains on 5 leaves fragments of a commentary on St. John.
4. *Codex Vaticanus* (MS 5750) contains on 3 leaves fragments of the same Commentary on St. John as the 5th Milan fragment.
5. *Codex Taurinensis* consists of 4 leaves belonging to the same MS as the first Milan fragment, found in the binding of a MS at Turin.‡ These leaves contain Gal 6:14–18, Col 2:13–20 4:13–18.
6. *Codex Vindobonensis*.—This MS, ascribed to the 9th cent., came from Salzburg (MS 140, olim 71), and contains, under runes, fragments of Gn 5, and, on the margin, two half-verses of Ps 52:3.

In these MSS we have preserved to us the following passages of the OT:—Gn 5:24–26–28. 30. 32, Ps 52:2–5, ¶ Neh 5:12–18 6:14–7:3. 13–47, and fragments more

* See also Wright, *Primer*, etc. p. 144: 'The fragments of the New Testament all point to one and the same translator, but the two small fragments of the Books of Ezra and Nehemiah differ so much in style from those of the New Testament that scholars now regard them as being the work of a later translator.'

† This information is largely taken from Stamm-Heyne's *Ulfilas* (ed. 9), Paderborn, 1896. The figures enclosed in brackets give the press-mark of the MS in the library to which it belongs.

‡ See Berger, *Histoire de la Vulgate*, p. 58.

§ Kauffmann (*Z. f. d. Philol.*, 1896) says the supposed fragment of Ezr 2:18–42 is really Neh 7:13–47.

¶ See *Germania*, xiii. 271 ff.

¶ See note §, above.

or less extensive of all the books* of the NT except the Acts, Catholic Epistles, and Apocalypse of which we have nothing in this Version.

iii. CHARACTER OF THE TEXT.—The next point to determine in regard to the Version is the character of the text preserved in it.

For the OT the amount preserved is very scanty indeed, but the fragments consist largely of names (as in the lists from Nehemiah), or numbers (as in the Genesis passages), and therefore the nature of the materials is some slight compensation for the deficiency in quantity.

The most careful examination of the Version in its relation to the text from which it was translated is in an article by Kauffmann,† who points out the very close agreement with Lucian's recension of the LXX text.‡ Thus in Neh 7:24.33 (to take two instances only) the Gothic Version agrees with two MSS (HP 93, 108) of this recension in the names Ἀσσοῦ, Ἡραῦ, and this form is found in no other MSS of the LXX. The same close relationship of the Gothic and Lucian meets us in the Genesis fragments, where we find agreement between the numerals of the Gothic Version and those found in HP 44, another MS of the Lucian recension. But there are differences as well as resemblances, and Kauffmann collects instances in which the Gothic departs from Lucian and agrees with the B-text of the LXX. The Gothic does not preserve 'the original Lucianic text, but one derived from it,' or perhaps we may rather say it preserves one of the strains incorporated in the Luc. text.

In regard to the NT, Kauffmann, in a later series of articles in the periodical quoted below, entitled 'Beiträge zur Quellenkritik der Gottischen Bibelübersetzung,' examines the Version in regard to the sources from which it is drawn. He comes to the conclusion (*ib.* xxxi. 180) that 'the Goth, to whom we owe Matthew, used the Greek text current in the diocese of Constantinople,' and that for St. John there is evidence of 'no other recension than that demonstrated for St. Matthew.' Whether the Version was made from MSS obtained in Moesia, or from MSS brought by Ulfilas' parents from Cappadocia, we should expect, *a priori*, that this would be the type of text used. Westcott and Hort (*New Testament*, i. p. 158) thus sum up the position: 'The Gothic has very much the same combination as the Italian revision of the Old Latin, being largely Syrian and largely Western, with a small admixture of non-Western readings.' A few instances of the readings of this Version in noteworthy passages from the first ten chapters of St. Luke may be given:—Lk 1:28 εὐλογημένη σὺ ἐν γυναῖκιν; 2:14 εὐδοκίας; 4:18 ἰδασθαί τ. σ. τὴν καρδίαν; 4:44 Γαλιλαίας; 6:1 δευτεροπρώτῳ; 6:18 τεθεμελιώτο, κ.τ.λ.; 8:26 Γαδαρηνῶν; 9:55 ἀγαπητός; 9:54 ὡς καὶ Ἡλίας ἐποίησε; 9:55 καὶ εἶπεν οὐκ οἰδότε, κ.τ.λ.; 10:1 ἐβδόμηκοντα. In all these passages save 2:14 and 4:44 it supports a reading rejected by Westcott and Hort. On the other hand, in Mk 1:2, Mt 7:13 11:23 27:1 it has readings accepted by the same editors.

In these and many other passages the Version will be seen to have a close relation to the Latin. Various explanations of this resemblance are possible. It has been suggested that the Gothic has been influenced by the Latin between the date at which the Version was made and the date of the MSS of it which survive. Besides the resemblances of text, it is urged that the Gospels in the *Codex Argenteus* occur in the Western order, and that most, if not all, of the MSS are connected with N. Italy, and date from the time of the Lom-

* Nestle, *Einführung in d. Griech. NT*, p. 111 (see also Gregory, *Prolegomena* to Tischendorf's NT, p. 1111), mentions quotations of the Ep. to the Hebrews as found in the Commentary on St. John, mentioned above. A complete list of fragments of the NT is given by Gregory.

† *Z. f. deutsche Philologie*, 1896.

bardo-Gothic kingdom there; that (as has been mentioned above) many Latin words have been incorporated into the Version, and that there are traces of Latin influence in the spelling of proper names, e.g. *Scariorus*. This view has been upheld by Marold in articles in *Germania* for 1880, 1881, but is disputed by Kisch,* Kauffmann,† and others.

A second explanation of the relationship is that some of the Latin MSS, at any rate, have been revised from the Gothic. This theory is stated by Burkitt (*JThSt*, i. 1) in regard to the Latin MS known as *Codex Brizianus* (*f*). He refers to the curious preface found in that manuscript,—which had before been noticed, in this regard, by Stamm—*ideo ne . . . legenti videatur aliud in Græca lingua, aliud in latina vel gotica designata esse conscripta*, etc., and supposes that it may be the preface of a bilingual Gotho-Lat. MS, of the Latin of which *f* is a transcript. Burkitt then collects a number of peculiar readings of *f*, in which it differs from the Vulg. and Old Latin, and agrees with the Gothic, e.g. Lk 14³² 67 etc. In a note he makes the same assertion of Gothic influence in the OL fragment of the Ep. to the Romans (*guc*), mentioned above. Kauffmann has fully examined the relation of the Gothic to the Latin, in the light of Burkitt's suggestion, in the last of the series of articles referred to, and the conclusions to which he comes‡ are the following:—(1) About the year 410 a 'critical' edition of Ulfilas' Bible was prepared by the two Gothic clergy, Sunnias and Fretella; (2) the preface to this edition is handed down to us (not quite complete) in the *Codex Brizianus*, and formed the introduction to a bilingual (or perhaps trilingual) MS, in which certain variants of the translations were traced to their origin; (3) a fragment of this edition probably lies before us in the *Codex Carolinus*; (4) from this bilingual edition the *Codex Brizianus* arose, the original text of which is demonstrably that of a Gotho-Latin MS, and to which the text of the Gothic Gospels of the *Codex Argenteus* corresponds fairly exactly; (5) the *Cod. Arg.* and the *Cod. Briz.* sprang from that critical edition; even their calligraphical presentation shows they are related; in the 6th cent., about the same time and in the same part of Upper Italy, the Gothic Gospels on the one hand and the Latin Gospels on the other were separately derived from that archetype; (6) on the basis of the recension of Jerome's translation, which had then attained supremacy in Upper Italy,—and this may have been the reason for the whole transaction,—a redactor worked afresh over the Latin Gospels.

A third possibility is that the resemblance is due to the fact of both the Latin and the Gothic being based on Greek MSS belonging to the same family, and preserving the same type of text. Such a hypothesis will leave room for the differences as well as the resemblances of the two Versions.

It has to be added in regard to the general character of the translation that it is a close and accurate rendering of the Greek, though Ellicott notices in regard to its rendering of Ph 2^d-8 a trace of those Arian views which characterized the Goths, especially in Spain. The 'Arianism of Ulfilas' has been discussed by Kauffmann in the articles already mentioned.

LITERATURE.—On Ulfilas: art. in *Allgemeine deutsche Bibliothek*; *Dict. Christ. Biogr.* s.v.; Monograph by C. A. Scott (Cambridge, 1885); art. by Eckstein in Westermann's *Illustr. Monatsheft*, 1892, and Jostes in *Beiträge zur Gesch. der d. Sprache*, xii. On the Gothic Version: Scrivener's *Introduction*, ii. 145 ff.; Gregory's *Prolegomena* to Tischendorf's *NT*, p. 108 ff.; Nestle, *Einführung in das Griech. NT*, p. 110 ff.; *Urkund und Übersetzungen*, p. 119 ff.; art. in *Z. f. deutsche Philologie*, 1896-1900, and in *Germania*. The most serviceable

edition is perhaps that of Stamm, the latest editions of which have been revised by Heyne, 9th ed., Paderborn, 1896. The edition of Bernhardt, *Vulfilas oder die Gotische Bibel*, Halle, 1875, is very full in regard to the relation of the Gothic to the Greek text. There are also serviceable editions of separate books by Prof. Skeat; and a useful *Primer of the Gothic Language*, Clar. Press, 1899, by Prof. Wright.

C. The Slavonic Version.*—i. ORIGIN.—Our information as to the origin of the Slavonic Version is fairly definite, and generally trustworthy, at any rate in its main points. The two men whose names are connected with the beginnings of a Slavonic Version are Cyril and Methodius. They were sons of a Greek nobleman of Thessalonica, round which place there were a number of Slavonic settlers. The elder, Methodius, died in 885; the year of his birth is unknown. The younger, Constantine, was born in 827, took the name of Cyril when he became a monk, and died at Rome in 869. It is probable that from childhood they were acquainted with the Slavonic of their native district of Thessalonica, and tradition ascribes to Cyril the invention of the characters which from him are called Cyrillic, assigning as the date of this the year 855. The object of Cyril was to give the Bulgarian Slavs such parts of the Bible as were used in Church services in their own language. A little later the two brothers were summoned to Moravia, and to the period following on this, i.e. after the year 864, the beginnings of the Version are by many assigned. But Leskien and Polevoi† urge, and with reason, that the work probably began earlier, and was spread over a longer time.

In one of the legendary lives of Cyril‡ we are told that he began his translation with St. John's Gospel, and soon completed a translation of the 'whole ecclesiastical cycle,' i.e. he translated first those parts of the Bible which were used for the Church services, both of the OT and NT. It is stated also in the life of Methodius that a translation of these selected parts preceded the translation of the whole; and John, exarch of Bulgaria, who is almost a contemporary, makes a similar assertion that Cyril first translated a 'selection,' and that Methodius and his brother translated 'the whole 60 books.' This translation may well have been completed before the death of Methodius, who survived his brother some time, though not, we may hope, in the short time of six months, as one authority states.

A much disputed question connected with the origin of the Version concerns the dialect into which the translation was made, and names eminent in Slavonic studies may be quoted as disagreeing. Thus Schäferik, Leskien, and others say that the original Version was most closely allied to Old Bulgarian, while Kopitar, Miklosich, and Jagić connect it with Old Slovenish. It is possible that the various families of Slavonic had not, at the date of which we are speaking, begun to show the marks of difference found in later documentary evidence.

Another interesting literary discussion gathers round the alphabets which are met with in the early MSS. These are of two kinds. The one is known as the Cyrillic, and consisted of 38 letters, derived mainly from Greek, but also, in part, from Hebrew and other languages, and in part invented to express the peculiar nasal sounds found in Slavonic. The other alphabet is known as Glagolitic, and this is probably the older.

* For a fuller account of the origin and later history of the Slavonic Version, and its relation to modern Russian, the writer must refer to an article of his on 'the Russian Bible' in the *Church Quarterly Review* for Oct. 1895. Little new work has been done in Russia or elsewhere on this subject since that date.

† *History of Russian Literature*, p. 7.

‡ See Ginzler, *Geschichte der Slavenapostel, Cyrill und Method.*, for details as to the documents in regard to Cyril and Methodius.

* *Monatssch. f. Gesch. u. Wissensch. des Judenthums*, 1873.

† *Z. f. deutsche Philol.* xxxi. 182.

‡ *Ib.* 1900, xxxii. p. 335.

ii. **THE MSS.**—A few of the MSS are ascribed to as early a date as the 10th or 11th cent. by Jagić and other scholars, but these contain only the Gospels, either as complete texts or as lectionaries. The oldest MS of the complete Bible is that called after Gennadius, archbishop of Novgorod, and dated 1499.* As will be seen later, this contains a composite text, of very varying value and importance. The comparative absence of early MSS is explained by the widespread devastation caused by the Mongol invasions of the 13th and 14th cents. The records of the period before these invasions tell us of schools in which the Bible was studied, of copies of MSS of the Bible made by monks and professional scribes, of *catenæ* on the Psalms, the Prophets, the Gospels, and some of the Epistles,† and every page of the chronicles and other writings shows us how inwoven the Bible was into the texture of the language, and what a part it played in Russia, as elsewhere, in fixing the literary style. We find actual quotations of many of the OT books, e.g. of the Book of Proverbs, in the Chronicle of Nestor, which dates from the 11th cent.

The oldest MSS of any part of the OT are those of the Psalter, some of which go back to the 11th or 12th cent. Many of the books of the OT have been made the subject of monographs, in which details are given. Besides the editions of the Psalter by Sreznefski and Amphilochius may be mentioned studies in the text of Joshua, the Books of Kings, several of the Minor Prophets, and Isaiah.

Passing to the NT we find the Gospels preserved to us in a large number of MSS, many of which are lectionaries. Among them may be mentioned the *Codex Zographensis* and *Codex Marianus*, both written in Glagolitic characters, and the *Ostromir Codex*, written in Cyrillic, and dated 1056–1057. A critical edition of St. Mark, based on 108 MSS, has been published by Professor Voskresenski. He groups the authorities for the text in four main classes. The history of the next division of the NT, the *Apostol*, has been also carefully studied by the same author. MSS either of the continuous text, or of the parts used in services, go back as far as the 12th cent., and on these he published an elaborate monograph in 1879, and in 1892 produced a critical edition of the Epistle to the Romans based on 51 manuscripts, many of which only give the Church lections. The only other part of the NT which has been examined is the Apocalypse. The MSS of this book are fewer and later, but the earliest is ascribed by Oblak to the 13th century.

iii. **THE TEXT OF THE VERSION AND ITS VALUE.**—For the OT the MSS do not show any great or important variations, but the characteristics of the translation they contain are different in different parts. 'The Pentateuch shows signs of very great antiquity, and probably embodies fragments of the original translation. The Books of Joshua, Judges, and Ruth also represent an old translation. The Books of Samuel and Kings are less old and less exact. The Psalter is of course very old. Ecclesiastes and Sirach show a later but accurate translation. The Book of Job, Song of Songs, and the Prophets . . . show signs of glosses. While all the above were translated from the Greek, and the Book of Esther from the Hebrew, the Books of Chronicles, Ezra, Nehemiah, and the other books of the Latin Bible were translated from the Vulgate towards the end of the 15th cent., and embodied in Gennadius' MS [i.e. of A.D.

* This MS is now in the Synodal Library at Moscow, and is fully described by Gorski and Nevostruev in their description of the MSS in that library.

† For details of these writings see Philaret's *Review of Spiritual Literature from 863 to 1720* (in Russian).

1499]. This text was adopted for the edition of the Bible published at Ostrog in 1581.*

It will be seen from the preceding words that the value and interest of the Version varies in different parts of the OT. The only part which is of real interest is that based on the Greek, and, in regard to this, its relation to Lucian's recension is the most important point. This has been variously described, Lagarde asserting that Lucian was the basis of the Slavonic; Buhl, that the Slavonic resembles the B text. The writer has examined this point, but only over a limited area, in reference to Lucian's recension.† The results seem to vary in different books. The Slavonic text of the OT, in the books derived from the Greek, deserves a fuller and wider examination than it has yet received.

In regard to the NT the MSS of the Version are more numerous, and contain a number of variations. These are, for the most part, of interest only in regard to the history of the Version itself, and consist of modifications in orthography, the removal of archaisms, and the translation of Greek words which in the earlier recensions had been simply transliterated. To the student of Slavonic these variants present innumerable points of interest. They also point to differences between the underlying Greek text, which are of wider interest, and it is well here to point out that the ordinary printed text of the Russian or of the Slavonic Bible often fails to indicate the important readings found in the older MSS. Among the passages where the oldest MSS differ as to the Greek on which they are based, the following may be noticed: Lk 22 61 14²⁴, Jn 9 19¹¹ 21¹⁵.

It cannot be said that the Version has any great value for textual criticism, nor should we expect, remembering its close connexion with south-eastern Europe, to find it preserving a text of any uniform or great importance. Its chief value and interest are in connexion with the history of the development of the Slavonic language, and in this department it is not easy to exaggerate its importance.

LITERATURE.—This is for the most part in Russian. See Scrivener's *Introduction*, ii. 157 ff.; *Church Quarterly Review*, Oct. 1895, and the literature there referred to. Nestle, *Urtext*, etc., p. 211 ff., should also be consulted. There are numerous articles dealing with details of this subject in the *Archiv für Slavische Philologie*. LL. J. M. BEBB.

VERSIONS, GREEK (other than the LXX).—It would seem from what has come down to us that many persons took in hand to make translations, if not of the whole of the Hebrew Scriptures, yet certainly of some books, and, as was natural, particularly of the Psalms. But, unfortunately, little remains except detached fragments. The longest passages of a continuous text still extant and already published are two passages from 1, 2 (3, 4) Kings (21 [23]⁷⁻¹⁷ 23¹¹⁻²⁷) and one from 1 (3) Kings (14¹⁻²⁰), all attributed to Aquila. The former have been edited by F. C. Burkitt, the latter is quoted in its due order in Field's *Hexapla*. Unfortunately, very few fragments of Origen's *Hexapla* in its original form have been found; a considerable portion of the Psalter is, however, shortly to be edited by Dr. Mercati of the Vatican from a palimpsest in the Ambrosian Library at Milan. It is much to be wished that, amongst the treasures still perhaps remaining to be unearthed in Egypt and elsewhere, a copy of at least some portions of Origen's work might be discovered. For the present we are indebted for the most part to the marginal notes of Septuagintal MSS for the fragments which we do possess, the chief editors of which have been Montfaucou and Field. Fresh fragments are, however, being con-

* *Church Quarterly Review*, l.c. pp. 219, 220.

† *Id.* cii. p. 383f.

stantly brought to light. A number are to be found in the third volume of Pitra's *Analecta Sacra*, and also in the 3rd volume of Swete's *OT in Greek*. The last fragments which have been published are the greater part of two verses of Gn 1, which is to be found in part i. of Grenfell and Hunt's *Amherst Greek Papyri*, and a fragment of Ps 21 (22) in Dr. Taylor's *Cairo Genizah Palimpsests* (Cambridge Press).

Considerable difficulties beset the student in his consideration of those fragments that still remain. (1) In various MSS the same words are ascribed in one case to one translator, in another to another; whilst in other cases, and sometimes very questionably, the same translation is attributed to all in common. (2) Owing to Origen's well-meant but unfortunate editing of the text of the LXX, and the loss of or confusion in the diacritical marks which he inserted in his text; and owing also to the various other recensions and re-editions which the text of the Septuagint has suffered from, we are quite in the dark as to how much of these other Greek versions may be embedded in our present Greek texts of the LXX. To take an instance. If with our present limited sources of information we examine the two chapters of the Book of Judges which relate the history of Deborah, and compare the Vatican text of the Cambridge edition with the fragments printed by Field, we shall find at least thirteen expressions (411 [two] 14. 21. 51. 14. 16. 21. 28 [three] 29 [two]) attributed to versions other than the Septuagint. This may perhaps be an extreme case, taken as it is from a book in which the forms of the text vary so much, and as to which questions may be raised concerning the date of the special text, but it will at any rate serve as an illustration of how complicated the phenomena of the present Greek texts of the OT are. In other cases, where a double or even triple rendering of the Hebrew occurs, we shall probably not go wrong in assigning, at least in some cases, one or more of these alternative translations to other versions than the LXX.

Origen's great work itself seems to have taken various forms besides the most prevalent Hexaplaric one. We find mention of (a) a *Tetrapla*, containing the four Greek versions; (b) a *Pentapla* of doubtful content; (c, d) a *Heptapla* and an *Ocmapla*, which apparently contained the fifth and sixth anonymous Greek versions. Specimens of the way in which these were respectively arranged are to be found in Field's *Prolegomena* (pp. xiv, xv); while Mercati gives an actual extract from a Hexapla MS in his 'Un palimpsesto Ambrosiano' in *Atti di R. Accademia di Scienza di Torino*, April 10, 1896 (see also Taylor's fragment of Ps 21 [22] from the Cairo Palimpsest, printed on p. 444 of the present volume).

We pass to the separate translations and their authors.

(1) *Aquila's Version*.—There seems to be no good reason for doubting that this was certainly the oldest of these Greek versions. It most probably had its origin in a desire for a faithful and literal translation of the OT by an orthodox person holding the Jewish faith. The name Aquila is one familiar to us in the pages of the NT. The Aquila of our present notice, like his Scripture namesake, was a native of Pontus, and is said to have belonged to Sinope. He is called a proselyte, and the story goes that he made his translation in the reign of Hadrian (c. 130 A.D.) after the return of the Christians from Pella to that city. He is said to have been a pupil of the famous Rabbi Akiba. Attempts have been made to identify him with the Onkelos of the Targum of Onkelos, but they have not at present met with general acceptance.

In translating the OT, Aquila seems to have approached his task from the point of view of an orthodox Jew holding the plenary inspiration of every 'jot and tittle.' Accordingly, his aim was so to translate that for every Hebrew word or particle there should always be an equivalent. The results of his method sometimes become grotesque. Thus having translated $\alpha\iota$ by the Greek $\kappa\alpha\iota\gamma\epsilon$, when the conjunction is prefixed to $\alpha\iota$ and the word becomes $\alpha\iota\gamma\epsilon$, Aquila translates $\kappa\alpha\iota\alpha\iota\gamma\epsilon$. The particle $\kappa\alpha\iota$ being identical with the preposition $\kappa\alpha\iota$ is also translated $\sigma\upsilon\nu$, so that we have such an extraordinary solecism as $\sigma\upsilon\nu$ followed by the accusative case.

How far Aquila is controversial against the Christians in any of his renderings is a matter of dispute. Tregelles considers this to be proved against him, whilst Field absolves him. The only passage which really seems to support Tregelles'

view is Aquila's translation of Is 7¹⁴, where for the $\pi\alpha\rho\theta\epsilon\rho\sigma$ of the LXX he substitutes $\pi\epsilon\alpha\upsilon\varsigma$, a much less definite word than $\pi\alpha\rho\theta\epsilon\rho\sigma$ —a translation which would have the support of many modern Christian critics.

His translation shows few traces of any readings differing from the unpointed Hebrew text now in existence. In a few cases his division of Hebrew words is not the same. His vocalization, however, differs in a considerable number of instances from the Massorettes. As between $\kappa\epsilon\rho\acute{\epsilon}$ and $\kappa\epsilon\theta\iota\beta\eta$, he more often follows $\kappa\epsilon\rho\acute{\epsilon}$. It is to be noted also that he, together with Symmachus, follows the euphemism of the Hebrew margin in Is 36¹². In his choice of words to represent the Hebrew, Aquila goes far afield. He attempts to indicate the literal meaning of words by corresponding Greek words, e.g. $\epsilon\pi\iota\sigma\tau\eta\mu\omega\nu\iota\varsigma\epsilon\iota\nu$. He draws, as other Greek writers of the period do, a certain portion of his vocabulary from the old Greek epic poetry. He also uses Greek words of similar sound to the Hebrew, instead of actually transliterating. He transliterates the tetragrammaton by the archaic form of the four Hebrew letters, a form which appears in Hexaplaric Greek MSS as IHHH (*PIPI*).

There would seem to have been two editions of Aquila's translation. In a few cases he may have altered his mind about the true reading of the Hebrew. Thus in Ps 89¹⁰ he appears to have read at first $\sigma\kappa$, afterwards $\sigma\eta$.

Specimens of passages in which the Latin Bible has been influenced by Aquila's version are to be found in Field's *Introduction* (p. xxiv).

For the longer story told by Epiphanius concerning Aquila, his relationship to Hadrian, and his conversion to Christianity, which he afterwards exchanged for Judaism, Epiphanius is our authority (*de Mens. et Pond.* 14), but it seems a very improbable tale, due perhaps in part to the view taken by Epiphanius of his translation. It is also to be found in the new 'Dialogue between Timothy and Aquila,' edited by F. C. Conybeare in *Anecdota Oxoniensia* (Class. ser. pt. viii.).

(2) *Symmachus' Version*.—The tr. of Symmachus occupied in the *Hexapla* the next column to that of Aquila. According to Epiphanius (*de Mens. et Pond.* 16), he was a Samaritan who turned Jew and then translated the OT Scriptures into Greek as a means of refuting the Samaritan errors. According to Eusebius (*HE* vi. 17) he was an Ebionite, and wrote a commentary on St. Matthew's Gospel. It is worthy of note, however, that, in the early chapters of Genesis, Symmachus seems to have followed the Samaritan chronology. The chief object of his version is to give a readable tr. of the Hebrew. To effect this he paraphrases Hebrew with Greek idioms, e.g. he replaces the $\alpha\upsilon\delta\epsilon\varsigma$ $\alpha\iota\mu\acute{\epsilon}\tau\omega\nu$ of the LXX by $\alpha\upsilon\delta\epsilon\varsigma$ $\mu\alpha\iota\phi\acute{\omicron}\nu\alpha\iota$ (Ps 25 [26]⁹ 54 [55]²⁴ 138 [139]¹⁰). He does not consider it necessary always to render the same Hebrew word by the same Greek word. In places his translation becomes more of a paraphrase. He constantly gives translations of proper names: thus Ararat becomes Armenia. The influence of Symmachus, as of Aquila, is to be found in the Vulgate. In a few places mention is made of a second edition of this translation, but they are so few that little certainty exists that there actually was one. Like Aquila, Symmachus oscillates between $\kappa\epsilon\rho\acute{\epsilon}$ and $\kappa\epsilon\theta\iota\beta\eta$, and very seldom deviates from the consonantal part of the MT. Like the LXX, he explains away the bare anthropomorphic statement of the Hebrew, see, e.g., Ex 24¹⁰ Heb. 'they saw the God of Israel' (Aq. $\epsilon\acute{\iota}\delta\omicron\nu\tau\omicron\nu\theta\epsilon\acute{\omicron}\nu\text{'}\text{I}\sigma\alpha\eta\lambda$), for which LXX substitutes $\epsilon\acute{\iota}\delta\omicron\nu\tau\omicron\nu\theta\epsilon\acute{\omicron}\nu\tau\omicron\nu\tau\omicron\nu\theta\epsilon\acute{\omicron}\nu\text{'}\text{I}$, and Symmachus $\epsilon\acute{\iota}\delta\omicron\nu\tau\omicron\nu\theta\epsilon\acute{\omicron}\nu\text{'}\text{I}$. There is no reason why this Symmachus should be identified with the one mentioned in the Talmud (Bab. *Erubin*, 13b). The date of the translation is quite uncertain, but it is

probably to be assigned to the latter half of the 2nd cent. A.D. It shows an acquaintance with Aquila, but is thoroughly independent of it.

(3) *Theodotion's Version*.—Theodotion was of Pontus, according to Epiphanius (*de Mens. et Pond.* 17), and a follower of Marcion of Sinope, and afterwards became a Jewish proselyte. Irenæus also calls him a proselyte (*adv. Hær.* iii. 24), but describes him as an Ephesian. Jerome says that some called him an Ebionite, others a Jew.

His version has more of the character of a revision of the LXX than of an independent translation. So valuable was it held that in some cases, notably in the Book of Daniel, of which we possess the LXX version in only one copy (cod. 87), Theodotion's version supplanted the LXX. He included in his work the apocryphal parts of Daniel, the addition at the end of Job, the Bk. of Baruch, and the sections of Jeremiah which the LXX omits. He indulges more freely in the transliteration of Hebrew words than the other translators, though occasionally he finds himself able to give translations where the others fail.

His translation was probably made about A.D. 185. Traces of a Greek version of Daniel very like that of Theodotion go back as far as the NT.* This would lead us to imagine that just as we still have traces in other books of the OT of two Greek versions existing side by side, e.g. in Judges and still more in the Books of Esdras, so it is quite possible that there may have been two versions of Daniel and of some other books—a literal translation, and one which had more of the nature of a paraphrastic commentary.

(4) In addition to these translations there were at least three anonymous versions of at any rate parts of the Scriptures, known respectively as the Fifth, Sixth, and Seventh. According to Eusebius (*HE* vi. 16), Origen obtained the Fifth from Nicopolis near Actium. Epiphanius (*de Mens. et Pond.* 18), however, says that it was found hidden away in jars at Jericho, and assigns the Sixth version to Nicopolis. If we can depend upon the quotation of the Sixth version of Hab 3¹², the tr. must have been paraphrastic and made by a Christian. As to the Seventh translation, and even the certainty of its existence at all, there is much doubt. These three versions are most frequently quoted in the Psalms.

(5) The *Græco-Venetan* tr., a very late Jewish production, of which only one MS exists, need only just be mentioned. It does not include the whole of the OT. The best edition is that of Gebhardt (Leipzig, 1875).

For further information concerning the *Hexapla* and these versions see art. SEPTUAGINT.

LITERATURE.—Montfaucon, *Origenis Hexaplorum quas supersunt* (1723); Field, *Origenis Hexaplorum quas supersunt* (1875); Salmon, *Introd. to NT* (last edition); Swete, *Introd. to OT in Greek* (1900). For Aquila (fragments), Anger, *de Onkelo Chaldaico*; Burkitt, *Fragments of Aquila*; Taylor, 'Fragments in *Sayings of the Jewish Fathers*' (1897), and *Fragments of Ps.* xxii. (1900), art. 'Hexapla' in *Dict. of Christian Biography*. For Symmachus and Theodotion see art. s.v. in *Dict. of Christ. Biog.* by Dr. Gwynn.

H. A. REDPATH.

VERSIONS.—In addition to the Versions treated in the preceding three articles, the following are dealt with in the present work under their respective titles: ARABIC VERSIONS, ARMENIAN VERSION, EGYPTIAN VERSIONS, ETHIOPIAN VERSION, LATIN VERSIONS (THE OLD), SEPTUAGINT, SYRIAC VERSIONS, VULGATE.

VERY is still used as an adj. freely enough, but either intensively or to mark identity. The sense of 'true' (Lat. *verax*, through late Lat.

* For traces of a version of other books than Daniel similar to that of Theodotion see Swete's *Introd.* p. 48, n. 3.

veracius and Old Fr. *verai*), or 'real' is no longer in use. We find this sense in AV Gn 27^{21, 24} 'Art thou my very son Esau?'; Ps 5⁹ 'Their inward part is very wickedness'; Pr 17⁹ 'He that repeateth a matter separateth very (RV 'chief') friends'; Jn 7²⁶ 'Do the rulers know indeed that this is the very Christ?'; Ac 9²² 'proving that this is very Christ' (RV 'the Christ'). This use of 'very' is common in Wyclif, as Jn 6^{22, 23, 25} 'my fleisch is verri mete, and my blood is verri drynke'; 15¹ 'I am a verri vyne'; 17³ 'This is everlastynge liif, that thei knowe thee verri God aloone'; so Tind. 'that they myght knowe the that only very God.' So Erasmus, *Crede*, 76, 'It was no very deathe'; Elyot, *Governour*, ii. 161, 'Seneca saieith that very friendship is induced neither with hope ne with reward.' Sometimes the adj. with this sense has to be carefully distinguished from the adverb. Thus Udall's *Erasmus' NT*, ii. 280, 'Jesus Christ . . . is now already come, having receyved a very humayne body'; and Tindale, *Expos.* 230, 'Where faith is, there must the very good works follow.' Hall (*Works*, ii. 151) uses the compar. in the same sense, 'Surely they were not verier lepers than we?'

J. HASTINGS.

VEX, VEXATION.—These Eng. words, as used in AV, express much more than petty annoyance. The following quotations will illustrate their force: *Vex*—Lk 8² Tind. 'Master, the people thrust the and vexe (ἀποθλίβουσι, Gen. 'tread on,' AV 'press') the, and sayest thou, who touched me?'; 1 S 28²¹ Cov. 'And the woman went in to Saul, and save that he was sore vexed' (AV 'sore troubled'); Mt 9³⁸ Rhem. 'And seeing the multitudes, he pitied them because they were vexed' (ἦσαν ἐκκληυμένοι, AV 'fainted'; edd. ἦσαν ἐκκυλμένοι, RV 'were distressed'); Elyot, *Governour*, ii. 95, 'The first or chiefe porcion of justice (as Tulli saieith) is to indomage no man, onelas thou be wrongfully vexed' (Lat. *nisi laceasit injuria*); Shaks. *Lear*, iii. iv. 62, 'Do poor Tom some charity, whom the foul fiend vexes.' *Vexation*—Shaks. *Mids. Night's Dream*, iv. i. 74—

'Think no more of this night's accidents
But as the fierce vexation of a dream';

Webster, *White Devil*, v. 2—

'There's nothing of so infinite vexation
As man's own thoughts.'

But the force of the words in AV can be best seen by examining the original words so translated. In OT sixteen verbs (and one subet.) are translated 'vex.' These are—1. [Dāḥaḥ] (Ps 2³ 62 3 10), which in Piel (Ps 29) is usually translated in AV 'trouble,' but means 'dismay' or 'terrify'; in Niph. (Ps 62 3 10) 'be disturbed,' 'dismayed.' In his *Par. Psal.* Driver has uniformly 'dismay' or 'be dismayed.' 2. [Dāḥaḥ] (Jg 2¹⁸), elsewhere only J1 2³ of the crowding, thrusting of locusts, but common in Aramaic. 3. *Hāmam* (2 Ch 15⁹), to make a noise, and so 'discomfit,' 'distress,' as in Ex 14²⁴, where 'the Lord troubled (RV 'discomfited') the host of the Egyptians.' 4. *Zāa* (Hab 2⁷), to tremble (as an old man shakes, Ec 12⁴): here it is Pilp., and Davidson translates 'shall violently shake thee'; it is used figuratively of the foes of Babylon as the instruments of Jehovah's judgments. 5. [Yāḡaḡa] (Job 16⁹) in Hiph. means to cause grief, Davidson 'afflict,' who adds, 'the words suggest the crushing effect which the friends' insinuations of wickedness had on Job's spirit.' 6. [Yāḡaḡa] (Ex 22⁴ RV 'wrong'; Lv 19³³ RV 'do wrong'; Ezk 22⁷ RV 'wrong' 39) = 'oppress,' 'maltreat,' esp. the stranger (see GRR) or the poor by the wealthy and powerful. 7. *Kā'aq* (Ezk 32⁹) in Hiph. = 'provoke,' as Peninnah provoked Hannah (1 S 17), but esp. used of provoking Jehovah to anger. 8. *Mārār* (Job 27²) in Qal 'to be bitter,' as 2 K 4⁷ 'her soul, it is bitter to her': here Hiph. = 'embitter,' 'Shaddai who hath embittered my soul' (*Oxf. Heb. Lex.*). Cf. Ru 1²⁰ 'The Almighty hath dealt very bitterly with me.' 9. [ʿAzabā] (Is 63¹⁰ RV 'grieve') in Piel = 'cause pain.' 10. *Zarar* (Lv 18¹⁵, Nu 25^{17, 18} 33⁵, 2 S 13², Is 11¹³, Neh 9²⁷). This verb is to press (perhaps lit. in Lv 18¹⁵ though RV 'to be a rival') press together, then fig. to oppress, persecute. In Neh 9²⁷ (Hiph.) to afflict (RV 'distress') on the part of enemies. 11. [Kāz] (Is 7⁹) = fear, here in Hiph. = put in fear, of a city by besieging it. Cf. 1 Mac 15¹⁴. 12. [Kāzār] (Jg 16¹⁸), lit. 'be short,' here of one's spirit, i.e. to have one's patience exhausted, AV and RV 'His soul was vexed unto death,' Gen. 'His soul was pained unto the death.' 13. *Rā'a* (Nu 20¹⁵) in Hiph. to 'do evil,' 'to evil entreat' (so RV

here, as AV in Ex 5²², Dt 26⁶, Amer. RV 'deal ill with'. 14. 71. *אָזאַח רָא'* (2 S 12¹⁹) = 'do evil', AVm 'do hurt', here to oneself by grief. 15. *רָא'אָז* (Jg 10⁹) = 'They vexed and oppressed the children of Israel, Moore 'they broke and crushed.' It is the same verb that in Jg 9³³ is translated 'and all to broke his skull'. 16. *אָדאַח'* (1 S 14⁴), lit. 'be wicked'; here Hiph. = 'declare wicked,' condemn, 'punish,' if the text is correct, which is doubtful, see Driver's note. Amer. RV 'put them to the worse.'

The subst. *ménúmah*, 'vexation,' is translated by the verb in Ezk 22⁵ AV 'much vexed,' RV 'full of tumult.' Besides *ménúmah* (Dt 28³⁰, 2 Ch 15⁶), 'vexation' is the tr. of (2) *zēvā'ah* (Is 28⁹); (3) *sheber* (Is 65¹⁴); (4) *rē'uth* (Ec 114 211. 17. 36 44 6 69), and (5) *rā'yōn* (Ec 117 221 416). RV gives for (1) 'discomfiture' in Dt 28³⁰, retaining 'vexation' in 2 Ch 15⁶; for (2) 'terror'; for (3) it retains 'vexation'; for (4) and (5) gives 'striving.'

In Apoc. and NT we find thirteen different Gr. words rendered in AV by the verb to vex ('vexation' does not occur). 1. *βαρύνω* (2 P 2⁹), which is tr. 'torment' elsewhere except Mt 14²⁴ ('tossed,' RV 'distressed'), Mk 6⁴⁸ ('tolling,' RV 'distressed'), Rev 12² ('pained,' RV 'in pain'). The verb means originally to test metals by the touchstone (*βάρυς*). 2. *δαίμονίζωμαι*: Mt 15²² ὁ θυγάτηρ μου βασανίζεται δαίμονι, 'my daughter is grievously vexed with a devil.' The verb means to be possessed by a demon. 3. *ἁλίσσω*: Wis 17¹⁶ τὴν αἰσθησάντων ἐνταυθαμένον, 'were vexed with monstrous apparitions,' RV 'haunted': in 16¹⁸ the same word is tr. 'persecuted,' RV 'chased.' 4. *θλίβω*: 1 Mac 15¹⁴ 'he vexed the city by land and by sea.' Cf. Mt 7¹⁴ τὴν ἐλπίδα αὐτοῦ ὁ ἀνέγνωσε ἐν τῇ ζωῇ, lit. 'a compressed (hemmed in, straitened) way is that which leads to life.' 5. *πᾶνω*: 2 Mac 5²², Ac 12¹ RV, in both 'afflict.' The word means to do harm (*πᾶνω*) to, as Ac 18¹⁰ 'No man shall set on thee to hurt (RV 'harm') thee.' 6. *καταπονέω*: 2 P 27, lit. 'to exhaust with labour' (*τόνω*). Found also in Ac 7²⁴ EV 'oppress.' 7. *λυπώω*: Bar 2¹⁸ 'the soul that is greatly vexed,' *λυπώωμαι*, lit. 'grieved,' 'made sorrowful.' 8. *ἐξέλω*: Lk 6¹⁸, Ac 5¹⁶, both 'vexed with evil spirits.' In Luke edd. read *ἐνέχουσαν*, RV 'troubled.' The word means lit. to rouse a mob (*ἐξέλω*) against one. The same verb is used in 2 Co 6¹ of 'a devil or evil spirit' troubling one. 9. *καρτερῶ*: Sir 4³ καρδίας παροργισμένη, 'a heart that is vexed' (RV 'provoked,' as AV in Ro 10¹⁹, Eph 6⁴). 10. *πᾶσχω*: Mt 17¹⁵ πᾶσχος πάσχω, 'he is sore vexed'; RV 'suffereth grievously.' 11. *πενθεῖν*: Sir 41² ὅτι βασανίσαι, καὶ οὐκ οὐκ... τοῖς πνεύμασιν ἐπὶ πάντων, 'to him that is vexed with (RV 'distracted about') all things.' In NT the verb occurs only Lk 10⁴⁰ Martha was cumbered (RVm 'distracted') about much serving.' 12. *ταράσσω*: 1 Mac 3⁶, RV 'trouble,' as the word is often tr. in AV in the Gospels and 1 P 3¹⁴. In the identical phrase (ὡς ταράσσονται τὸν λαόν) in 1 Mac 7²² the word is tr. 'troubled.' 13. *τρυχώωμαι*: Wis 11¹¹, RV 'distress'; elsewhere in Bibl. Greek only 14¹⁰, AV 'afflicted,' RV 'worn.'

J. HASTINGS.

VILE.—'There are many places in the Bible in which *vile* is not meant to convey the idea which it now possesses of what is physically and morally detestable, but has simply the force of the Latin *vilis*, properly *cheap*, and then *common*, *lightly esteemed*, or at most *looked down upon*. This, no doubt, is the sense which the Translators of 1611 intended to express in Ph 3²¹; for the Greek is *ταπεινότης*, *lowliness*, *low estate*—as it is rendered in the *Magnificat*, "the lowliness, or low estate, of his handmaiden"; and the contrast is simply between the lowly earthly body which we at present bear, and the future glorified body which has been made like unto the risen body of Christ.'—Driver in *Expos. Times*, Jan. 1902, xiii. 167.

This earlier meaning of 'vile' is seen in Erasmus, *Crede*, 106, 'He whom thou despyest as vyle borne, is thy brother'; p. 137, 'Thou being proude of the palace, doste mocke and skorne the vyle and homelye cottage of the pore man'; Udall, *Erasmus' NT*, ii. 29, 'The heavenly father dooeth garnishe and clothe so freshly the vile grasse, which shortly shall perishe'; Ridley, *Breve Declaration*, 122, 'The crafte either of fyshyng, whiche was Peter's; or of makynge of tentes, which was Paulus, were more vile then the science of phisicke [which was Luke's]. But the word had already a stronger meaning than this. Thus *Preface to AV*, 'Ebionites, that is, most vile heretikes'; Golding, *Calvin's Job*, 582, 'Thou vile toade.'

The examples of 'vile' in AV may be classified thus—

1. *Common, paltry, of small account*, Ps 129 (Zulluth); Jer 15¹⁹, Lk 11 (Zalut); Jer 29¹⁷ (shō ar); Wis 11¹⁵ (mēvā, RV 'wretched'), 13¹⁴ (mēvā, RV 'paltry'); Ph 3²¹ (mēvā, RV 'wretched'); Ja 2² (mēvā, RV 'paltry').
2. *Despicable, contemptible* (with moral reprobation), Dt 25³ (kalah); 1 S 3¹⁵, 2 S 6²², Job 40⁹ (RV correctly 'of small account'), Nah 1⁴ (all kalah); 1 S 15⁹ (nēmibzah) nībzah; Dn 11²¹ (bēzah).
3. *Shameful, abominable* (with religious as well as moral

reprobation, almost equivalent to *impious*, see Footl., 2 S 12¹ (gō'at); Job 18² (tāmah); Wis 4¹⁸ (zēvā, RV 'wretched'); Ro 12¹ (zēvā, RV 'wretched').

AV mistranslates Job 30⁶: render as RV 'They are scourged out of the land' (the verb is *nāka'*, to smite).

J. HASTINGS.

VILLAGE.—The earliest Oriental village probably arose in the transition from nomadic to settled life. Interests centring in a particular locality called for more constant residence; and in course of time the tent, best suited to the moving life, would give place to the hut or house, the encampment to the village. The name *nah* (נָח) in *אֶרֶץ נָח* (*Havvoth-jair*, Nu 32¹ etc.), applied to smaller towns or villages, agrees with this idea. Abulw. connects it with Arab. *hayy*, 'tents of a clan' (cf. Arab. *hivā*, 'group of tents'). The term, which formerly denoted the temporary dwellings, would naturally be applied to the more permanent settlements (Moore, *Judges*, p. 274; W. R. Smith, *RS* p. 281). The common word for village, *nah* (נָח), primarily 'an enclosure,' is sometimes used for the open dwellings of the nomads (Gn 25¹⁶, Is 42¹¹). נָח (נָח), Ca 7¹¹, 1 Ch 27²⁸, נָח Neh 6², נָח 1 S 6¹⁸, 'a hamlet' or 'village,' appeared in Palestine with the advent of Aramaic, and still persists in such place-names as *Kefr Kennah*, *Kefr Sabt*, etc. Other words are נָח (דְּנָאִסְתִּי, Hab 3⁴ RV 'warrior,' RVm 'hordes' or 'villages'); נָח (דְּנָאִסְתִּי, Jg 5¹¹ RV 'ruler,' RVm 'village'); נָח (Est 9¹⁹ LXX ἐν πόλει χώρα τῇ ἐξω, EV 'unwalled towns'; Ezk 38¹¹ ἐπὶ γῆν ἀπεριμεμένην, EV 'unwalled towns,' RVm 'an open country'; Zec 2⁴ (6) κατακάρως, AV 'as villages without walls,' RV 'as towns without walls'), which seems to denote the places in open, level country, as distinguished from fortified cities (cf. Arab. *farz*, 'plain'); cf. נָח = *peasantry*, 1 S 6¹⁸, Dt 3⁵, Est 9¹⁹.

The distinction between *city* (עִיר) or poet. עִירָה and *village* is carefully observed throughout the OT. The city was an inhabited, walled place; the village, not so protected, was probably always subordinate to the city. This relation of dependence appears to be indicated by the term 'daughters,' e.g. נָח נָח נָח (Nu 32², cf. Jos 17¹¹ etc.), by the phrase 'the cities and their villages,' נָח נָח נָח (Jos 13² etc.), and is implied in the designation 'a mother in Israel,' applied to the chief town of a district (2 S 20¹⁹). This subordination was maintained in later times (1 Mac 5⁶ תָּה עִירָה וְכָל הַבָּתְּרִים וְהַכְּפָרִים אֵת הָעִיר, cf. 5⁶). While the city was the chief seat of authority in a district, the smaller towns and villages seem to have been dependent on the larger. On the E. of Jordan, and especially in Trachonitis, *μητροκωμιαί* are frequently met with, that is, villages holding a position corresponding to that of a capital town. Thus Phæna, the modern *Musmiyeh*, is called *μητροκωμία τοῦ Τράχωνος* (CIG 4551). In NT and Josephus the ideas of πόλις and κώμη are uniformly distinguished; but in the Greek period the point of distinction came to be, not so much size or fortification as constitution and law, which differed in city and village. St. Mark, who notes the numerous towns and villages in fertile Galilee, mentions (1²⁸) κωμοπόλεις, a word used by Strabo and Byzantine writers, denoting towns which for size might be called πόλεις, but in constitution ranked only as κώμαι. Jos. (BJ III. iii. 2) speaks of many villages in Galilee, the smallest of which contained 15,000 inhabitants. If we are to credit these figures, κώμη must be taken to include the surrounding district and suburbs. The Mishna distinguishes (1) עִיר 'a large city'; (2) עִיר 'a city'; and (3) כְּפָר 'a village' (*Megilla* i. 1, ii. 3; *Kethuboth* xiii. 10; *Kiddushin* ii. 3; *Baba mezia* iv. 6, viii. 6; *Arachin* vi. 5). The first and second differed only in size. While עִיר = 'a fortified city,' small towns were often similarly protected (עִירָה, *Arachin*

ix. 3 ff.; *Kelim* i. 7), נָקִי being the open village (Schürer, *HJP* II. i. 154 ff.).

Villages in Palestine to-day are related in the same way to the towns. Thus *el-Mejdel*, *Ḥaṭṭin*, *el-Lubiyeh*, etc., are under the jurisdiction of Tiberias. All actions, civil and criminal, and all matters affecting taxation and military service, come before the authorities in that town. The sheikh, or chief man, exercises considerable influence among the inhabitants, and with him, in the first instance, the authorities treat in all that concerns his community.

The villages are the centres of agricultural industry. The surrounding land is frequently common property. All share in its cultivation. When deductions have been made for taxes, etc., the produce is divided according to local arrangement. In other cases the villagers till the soil for a landlord or company, and then a certain percentage of the crops is allowed them in payment.

Nearly all the villages in Palestine are of ancient date. They often stand on the sites, and are built from the ruins, of cities not seldom great and splendid in the past. There is something both grotesque and pathetic in the appearance of Corinthian capital and sculptured stone in the walls of mud-plastered huts. Positions difficult of access are much prized for defence against marauding bands. There are, of course, no scattered dwellings or solitary farmsteadings, which would be too easy a prey to plunderers.

The village life is mean and squalid. The houses as a rule are of but one apartment, in which, along with the family, their animals find nightly shelter. Sanitation is unknown, and the villages are hotbeds of fever. In some it is ascribed to an intervention of *Allah* when a child survives infancy. Oppressed by rapacious tax-gatherers backed by a brutal soldiery, often loaded with debt they can never hope to pay,—interest on which is a first charge upon their yearly pittance,—the spirit is crushed, and there is little inducement to work for improvements the fruits of which would infallibly be seized by others. They put little into the soil; their houses are frail; their furniture scanty; they live practically 'from hand to mouth,' and bear themselves like men who may at any moment receive notice to quit.

The villagers in Palestine mostly rank as Moslems, orthodox or heretical; but there is much obscurity as to their real religious sentiments and practices. Usually a *makām*, the tomb or sanctuary of some saint or famous sheikh, stands near by or on a neighbouring hill. It serves as a kind of village strong-room. Although it is quite open, no one dreams of removing what has been placed there for safety. A common responsibility for hospitality is also recognized. In every village there is the *menzil* or *medāfy*, 'village guest-house,' where all strangers are welcome. The sheikh acts as 'host,' but the villagers contribute each his share towards the entertainment of the guests. W. EWING.

VINE, VINEYARD.—Three Heb. words are tr. in EV 'vine.' 1. גֶּפֶן *gephen*, Arab. *jafn*. This always refers to grape-bearing vines, except 2 K 4²⁰, where נֶקֶד גֶּפֶן the 'vine of the fields,' AV and RV 'wild-vine,' refers to a wild gourd-vine, prob. colocynth, and perhaps Dt 32²², where קֶדֶם גֶּפֶן 'the vine of Sodom' may denote a grape-vine, or some other plant (see 'vine of Sodom,' below). 2. שֵׁרֶק *šerek* (Is 5² 'choicest vine'), שֵׁרֶק (Jer 2²¹ 'noble vine'), שֵׁרֶקָה *šerekah* (Gn 49¹¹ 'choice vine'), used of a superior kind, producing dark-coloured grapes, with soft seeds or none. It is called in Arab. *šurik*. 3. נָזִיר *nāzir* (Lv 25^{5, 11} AV 'vine undressed,' m. 'separation,' RV 'undressed vine'), fig. for un-

pruned vine, named *nāzir* from its resemblance to the Nazirite, whose hair was uncut and unshaven.

The vine is one of the most important plants mentioned in the Bible and cultivated in the East. Noah planted a vineyard (Gn 9²⁰). The chief butler saw a vine in his dream (Gn 40⁹). Judah is represented as binding his ass to a vine (Gn 49¹¹), an allusion to the luxury in which he would live. Living under one's own vine and fig tree (1 K 4²⁵, Mic 4⁴) was an emblem of peace. The languishing of the vine (Is 16⁸ etc.) was an emblem of destruction and desolation. Palestine was a land of vines (Dt 8⁸). They were planted on mountains (Jer 31⁵). They flourish best there at the present day. The NAZIRITE, as being under a religious vow, was to 'eat nothing that is made of the grape-vine, from the kernels even to the husk' (Nu 6⁴). Manoah's wife, as the future mother of a Nazirite, was also forbidden for a time to eat or drink of the fruit of the vine (Jg 13¹⁴). The vine is frequently associated with the fig (Ps 105², Jer 8¹³, Hab 3¹⁷, Ja 3¹² etc.). Christ calls Himself the true vine (Jn 15¹⁻⁵). There are several other figurative allusions to the vine and vineyard. Israel was a vine brought out of Egypt (Ps 80⁸⁻¹⁴, Is 51²⁻³). The fruitful wife was compared to the vine (Ps 128³). The remnant of Israel was to be gleaned as a vine (Jer 6⁹). Samaria was to be as plantings of a vine (Mic 1⁵). Beth-hacherem, 'the house of the vine' (Neh 3¹⁴, Jer 6¹), Abel-cheramim, 'the meadow of vineyards' (Jg 11²³), were named from *kerem* = 'vine.'

The vine is cultivated in a variety of ways. Sometimes it is trained over a trellis, or made to climb a tree (Ezk 19¹¹). In this way a man sat under his vine (1 K 4²⁵ etc.). Sometimes it is trained over props about the height of a man, or a little higher, and the branches spread laterally, often forming festoons from stake to stake. But the more usual method is to allow the stem to trail on the surface of the soil, and simply to prop up the cluster-bearing branches by forked sticks, sufficiently to keep them off the ground. The vines in both the latter methods of cultivation are planted far enough apart to allow the plough to pass between them. They are pruned at the end of the fruiting season (Jn 15²), so that, during the winter, the vine is reduced to a trunk and a few principal branches. The shoots of the next spring are thus made more vigorous, and bear better fruit. Those branches which bear no fruit are diligently cut away (vv. 2-6). A whitened branch is a sign of withering (Jl 1⁷). The trunks of old vines often attain the thickness of a man's body or more. Vines are sometimes planted in irrigated ground (Ezk 19¹⁰), but most of the vineyards are on dry hillsides, where, for 7 or 8 months they have no water except such as they can extract from the apparently arid soil. Notwithstanding this, they live (Ezk 19¹²). In such situations as have a moist subsoil of clay or marl they flourish without irrigation, and produce large vintages. Whole mountain-sides are often green with vineyards, where one may search in vain for a spring or well. They are often not fenced off, so one can come with ease into a 'neighbour's vineyard' (Dt 23²⁴). To protect the vines from foxes, jackals (Ca 2¹² etc.), and esp. from men, watchmen are stationed in commanding positions. In Judæa and some other parts of the country round towers are built for the watchmen (Is 5², Mt 21³ etc.). Generally a shelter of boughs and leaves (Is 1⁵ AV 'cottage,' RV 'booth'), similar to the 'lodge in a garden of cucumbers' (see illustration in vol. i. 532²), is constructed in a prominent place, from which the watchman can overlook the vineyard. To frighten away animals, a single cylindrical stone is set up, or several stones are placed one above another,

forming a pillar 3 to 4 ft. high. The top of this pillar is often whitewashed, so that it is conspicuous even at night. The large numbers of these pillars make a marked feature in the Oriental landscape. Vineyards are let out (Ca 8¹¹, Mt 21³²), or cultivated on the metairie principle on shares. The close association of vine and fig trees in the minds of the people of Palestine is shown by the fact that both a fig orchard and a vineyard are designated in Arab. by the term *karm* (the same as the Heb. *קרם*), which primarily signifies a vine.

Grapes.—A great variety of grapes are cultivated in Palestine and Syria. There is one greenish-white, from $\frac{1}{2}$ to $\frac{3}{4}$ in. in diameter, with sweet juicy pulp; another, olive-shaped and white, resembling Malaga grapes; another, dark purple, of the size of a small prune; others similar to Black Hamburgs; others with a green rind, striped with red, and a pulp almost as firm as that of an apple; others nearly the same as the famous Zante currants; others closely resembling the Isabella grape; and many others of divers shapes, sizes, and flavours. Several Heb. words are used to designate them. 1. *עֲשְׂקוֹל* 'eshkól, which signifies a cluster, usually of grapes (Is 65⁸, Mic 7¹), in which case greater precision is sometimes given by constructing it with *קִנְיָן* (Nu 13²²), or associating it with the same (Gn 40¹⁰), or constructing it with *gephen* (Ca 7⁸ [Heb. ']). It is

as his hand can move. The luscious fruit is crushed by the tongue and teeth, and swallowed with extraordinary rapidity. The peasants declare that, however many grapes they may have eaten in this way, in the vineyards, their appetite for their regular meals is in no way diminished. The grapes are carried home to serve as food, or spread out on mats to be dried into raisins, *זִמְמוּךְ* *zimúk* (1 S 25¹⁸ etc.), *נֶשֶׁךְ* 'dashshóth (RV Ca 2⁶, AV wrongly 'flagons'), or the juice expressed to be converted into wine or dibs. The latter is the juice of the grape, boiled to the consistence of thick treacle, and set aside to cool into a mass resembling in appearance candied honey. It is not true that this substance is anywhere used or known as wine. In its commercial form it is no more a beverage than crystallized honey, and no one here ever saw or heard of any one diluting it and using it as a drink. Much less is any such dilution known as wine. Baskets (Jer 6⁹) were, and are still, used to gather the grapes and transport them to the houses or presses. The juice is trodden out (Is 16¹⁰ 63³, Jer 25³⁰ etc.). The presses were often dug out in the marly soil (Mt 21³²), or excavated in the solid rock. Such rock vats are common throughout Palestine. The boiling of the *mishtar* (fresh grape juice) is done in large caldrons. *Mishtar* is sometimes drunk. The name,

MODERN SYRIAN WINEPRESS.

sometimes used of other things, as gall (*mēróróth*, Dt 32³³), and *henna* (Ca 1⁴). 2. *עֵנָב* 'enáb, Arab. *inab*. This is the true word for the berry, as distinguished from the cluster (Gn 40¹⁰, Nu 13²²). Wine is *יַיִן* = blood of grapes. 3. *בֹּשֶׂר* *bóser* = unripe grapes. The Arabs of Syria use the term *húgrum* for green grapes. *Bóser* is tr. in AV 'sour grapes' (Is 18⁵ RV 'ripening grapes'), AV and RV 'unripe grapes' (Job 15²⁸), AV and RV 'sour grapes' (Jer 31²², Ezk 18²). The seed, 'kernel,' of the grape is mentioned, and its skin, 'husk' (Nu 6⁴).

Vintage.—The vintage is a season of great rejoicing in the East (Is 16¹⁰). It begins in low-lying districts in July. The people eat the green grapes (*bóser*) even in June. They also express the acid juice of the same, and sweeten it, and add water, to make a cooling drink. The nearly ripe but still acid grapes are slightly laxative, and the grape cure is as well recognized here as a course of mineral waters in Europe or America. But when the grapes are quite ripe, in August or September, the rejoicing is complete. The people go in large numbers to gather the grapes, and eat them in the vineyards (Jg 9²⁷). The quantity which one person consumes is enormous. It is curious to see a man with a huge bunch of grapes in his hand, held a little above his head, with his neck bent backward, and his free hand plucking the grapes, singly or in pairs, and tossing them into his mouth as fast

as applied to this fresh juice, is, however, a popular error, as that word signifies a true fermented wine. The grape juice is never called in Arab. by any of the other names for wine, these names being applied solely to the fermented juice of the grape, date, or other fruit.

Vine of Sodom (*גֶּפְהֵן* *gephen Sédóm*) occurs once (Dt 32³²), 'their vine is as the vine of Sodom, and of the fields of Gomorrah; their grapes are grapes of gall (*rósh*), their clusters are bitter' (*mēróróth*). If real plants are intended here, these must have been familiar to the Hebrews, and, if not peculiar to the Dead Sea Valley, at least so abundant there as to be designated by the names of the accursed cities. We have, as a philological guide to the plant intended, the term *gephen*, which certainly refers to a vine. The second member of the parallelism speaks of the fruit as 'grapes of gall' (*innebérósh*), and its clusters as bitter (lit. bitternesses). We are therefore to look for a vine growing so abundantly in the Dead Sea basin as to be attributed to Sodom and Gomorrah, and producing a bitter but grape-like fruit. The first embarrassment in the determination of this plant is the assumption that it is the same as the fruit of which Josephus speaks, the so-called 'apples of Sodom' (B¹ IV. viii. 4), 'the ashes growing in their fruits, which fruits have a colour as if they were fit to be eaten, but if you pluck them with your

hands they dissolve into smoke and ashes.' This description would apply either to the fruit of the 'ushr, *Calotropis procera*, Willd., or to that of the colocynth, Arab. *hondol*. Both of these have fruits, about the size of a pipkin, which, when ripe and dry, contain a dust, which would suggest the 'dust and ashes' of Josephus. The 'ushr, however, is not a vine, but a small shrub or tree, and its fruit has no resemblance to the grape. The colocynth is a vine, but it grows over a wide range in Palestine besides the Dead Sea Valley, and its fruit also has no resemblance to a grape. It is like a small water-melon when green. We therefore, while accepting one or both these plants as producing the fruit alluded to by Josephus, unconditionally reject them both as candidates for the 'vine of Sodom.' *Cucumis prophetarum*, L., a tendril-bearing vine, growing in the Dead Sea Valley and southward to Sinai, and having an ovoid, bitter fruit, $\frac{1}{2}$ to $\frac{3}{4}$ in. long, might be a candidate, were it not for the fact that its fruits do not grow in clusters. On the other hand, *Solanum nigrum*, L., and *S. miniatum*, Berb., and *S. villosum*, Lam., produce clusters of berries like very small grapes. These are called by the Arabs 'inab-edh-dhib' = wolf's grapes. But they are none of them vines, and none of them peculiar to the Dead Sea Valley. *S. coagulans*, Forsk., although peculiar to the Dead Sea and Jordan Valley, is not a vine, and has fruits like a small tomato, not like a grape. Oak galls cannot be intended. They are not produced in this valley, are not clustered, and bear no resemblance to a grape. We must conclude, therefore, that we have as yet no evidence on which to found a theory as to the plant intended by the vine of Sodom. We (with commentators generally) think that the allusion is figurative, and that the quality of bitterness is attributed to the grape-vine of the enemies of Israel, as their wine is said in the following verse to be 'the poison of dragons, and the cruel venom of asps.' The selection of the vine of Sodom and Gomorrah, of which their vine is said to be a shoot, was due to the proverbial bitterness of the Dead Sea, a quality which may have been supposed to be communicated to what grew on its shores. We have a similar instance (Ezk 17³⁻¹⁰) in the rhapsodical riddle of the great eagle, which plucked off a topmost shoot and twigs of the cedars of Lebanon, and set them in a city of merchants, and took of the seed of the land, and set it as a willow-tree, and it grew and became a vine of low stature, and shot forth branches towards the furrows, that it might bear fruit. And the roots were pulled up, and the fruit withered. Here we have a combination far more intricate and unreal than that of the 'vine of Sodom,' to which the bitterness of the Dead Sea water is attributed, and the wine from the same, which is said to be serpent's venom.

G. E. POST.

VINEGAR (נֶחֱמֶזֶ; חֶסֶס, *acetum*).—A sour liquid, mentioned 5 times in OT and 5 times in NT. The vinegar of Scripture is wine which has undergone the acetous fermentation caused by the presence of a ferment plant (*Mycoderma aceti*), whereby its alcohol is converted into acetic acid. Besides this 'vinegar of wine' there is also mentioned 'vinegar of strong drink' (*shēkār*, Nu 6³), which is produced by the fermentation of palm juice or any other saccharine fluid. Both these forms of drink were forbidden to the Nazirite (Nu 6³).

This fluid was used as a relish, 'without which we should miss many of the comforts of civilized life' (Pliny, xiv. 25). Into it food was dipped before eating (Ru 2¹⁴). A diluted vinegar or sour wine was used as a drink by the poorer classes (Aristoph. *Acharnæ*, 35), and especially by sol-

diers. Pescennius Niger forbade his Ethiopian troops to drink anything else (Spartianus in *Hist. Aug. Script. minores*, ii. 180). The vessel of vinegar which the Roman soldiers had by them at the Crucifixion (Jn 19²⁹) was probably filled with this drink, which was called *posca*. It was not regarded as intoxicating (Plautus, *Miles gloriosus*, iii. 836). The Greek medical writers, Oribasius and Aretæus, call it *ὀξύκρατον*. *Posca* and oil are recommended in veterinary medicine for wounds by Vegetius, iii. 48, vinegar being, as Plutarch says, the most cooling of fluids (*Quæst. conviv.* iii. 5). Cf. the use of wine (*ὀύρος*) and oil by the good Samaritan (Lk 10³⁴) to cleanse the wounds of the robbers' victim.

In the accounts of the Crucifixion given by the four Evangelists vinegar is mentioned, but in each case in a slightly different connotation. According to Mt 27³⁴ (AV), the soldiers offered our Lord vinegar mingled with gall (RV has 'wine,' following NBD). This was a different drink from the vinegar subsequently given Him on a sponge (v. 48), which was probably *posca*. Mark mentions both, but describes the first wine as mingled with myrrh (15²³ *ἐσμυρρίσμενον ούρον*); Lk 23³⁶ relates that the soldiers after He was crucified offered Him vinegar in mockery. Jn 19²⁹ only mentions the vinegar given in response to His exclamation, 'I thirst.' The first 'wine' of Matt. and Mark was probably intended as a narcotic, the *χοῆ* being the equivalent of the Heb. word *rôsh*, also *tr*^d 'gall,' which was opium (see vol. ii. p. 104). This was given to those about to be executed, in accordance with the Talmudic interpretation of Pr 31⁶, on which see *Sanhedrin*, 43. 1; Lightfoot, *Horæ Hebraicæ*, ii. 36; and Buxtorf's *Lex Talmudica*, 2131. Rosenmüller conjectures that it may have been given rather as a stimulant to keep Jesus alive during the torture (*Bib. Bot.* 163).

Vinegar by itself was too pungent to drink, hence to give vinegar to drink was part of the punishment of a victim, as in Ps 69²¹; cf. the *ἐρί δ' ἐς τὰς βίβας ἔτος* in Aristoph. *Batrach.* 619. Its effects on the mouth are mentioned in Pr 10²⁴, reminding of the description of vinegar as *πικρὸν στυφόν* given by Nikander (*Alexipharm.* 375), or the *Acetum acerbum* of Plautus (*Truc.* i. 2. 83). For other figurative expressions of the irritation and acidity of vinegar see the same author in *Rudens*, iv. 2. 32; *Pseudolus*, ii. 4. 49; and *Bacchyl.* iii. 3. 1; cf. the *mordax acetum* of Persius, v. 86. In the passage in Proverbs the LXX renders the word by *ὄψα*, unripe grapes, as though *hōmez* was here used in the sense of the Talmudic *חֶסֶס*.

The effect of vinegar on nitre (נָטְרָן = natron or crude sodic carbonate) causing effervescence is mentioned in Pr 25³⁰ (see vol. iii. p. 555).

A. MACALISTER.

VIOL.—Thus the Heb. *nēbbel* or *nebbel* is rendered in AV and RV Is 14¹, Am 5²⁶, and in AV Is 5¹² (RV here 'lute'). See MUSIC, vol. iii. p. 459^b, and PSALTERY (the more usual tr. of the Heb.), above, p. 163^b. See also Driver, *Amos*, p. 234 ff., and Wellhausen, *Psalms (PB)*, p. 222 ff. The 'viol' (from late Lat. *vidula*, *vitula*, through Fr. *virole*, *violle*; cf. Anglo-Sax. *fithle*, a fiddle) is described by Chappell as a six-stringed musical instrument, the position of the fingers being marked on the finger-board by frets, as in guitars of the present day. But it was played with a bow, not with the fingers as the guitar. Violin is a dim. of viol, as violoncello is of violin. The violin displaced the viol in England in the reign of Charles II.

J. HASTINGS.

VIPER.—See SERPENT.

VIRGIN (בְּתוּלָה, זֶלְקָה, *παρθένος*).—The word בְּתוּלָה is commonly used of a *virgo intacta*, as in Dt 22²⁸,

2 S 13². It is frequently applied metaphorically, often with the addition of נָכְרָה 'a daughter,' to a people, especially to Israel, originally, it would seem, in the sense of not yet subdued by an enemy, as Is 37²², Jer 14¹⁷, La 1¹⁶; but sometimes to other nations, as to Zidon (Is 23¹³), Babylon (47¹), and sometimes even where the original intention of the metaphor is lost, as in Jer 31⁴, where the restoration of captive Israel is promised. In Is 62⁵ there is a curious mixture of metaphor. 'For as a young man marrieth a virgin, so shall thy sons marry thee.' The word is, however, once used of a young married woman in J1 1⁸.

The meaning of נָכְרָה is from its comparatively rare use less easily determined. In Gn 24⁴³ it is used with reference to Rebekah, apparently in the sense of a *virgo intacta*. In Ca 1³ the same meaning is perhaps probable, but hardly necessary. In Ca 6⁸ the meaning is quite uncertain. The women in the harem of Solomon, distinguished as they are from the wives and concubines, might or might not be virgins. We cannot, therefore, argue from the usage of the word the meaning intended in Is 7¹⁴; but the whole context of the passage, as well as the analogy of 8¹⁻⁴, suggests that the sign intended did not consist in anything miraculous in the birth itself, but in the speedy coming of the event, and in the symbolical name to be given to the child. The LXX probably understood by παρθένος a virgin in its strict sense, understanding, it would seem, that the mother of Immanuel was at the time a virgin—a possible interpretation of the words, though RVm is probably right in rendering 'is with child and beareth.' St. Matthew, quoting from LXX, takes the passage as a direct prophecy of the birth of Christ from a virgin (see IMMANUEL). Such has till recent times been the practically universal interpretation of the passage by Christians. It has been very naturally disputed by the Jews from the time of Justin Martyr downwards, and is said to have been one of the chief reasons for the first Gr. tr. of OT by Aquila [? Onkelos], (Eusebius, *HE* v. 8).

There is nothing remarkable about the usage of παρθένος in NT, except in Rev 14⁴, where it is used of men who have kept themselves free from impurity. St. Paul's discussion of the topic of 'virgins' in 1 Co 7^{30a} comes under MARRIAGE (see vol. iii. p. 266^b).

For the נָכְרָה of Dt 22^{15, 17} (EV 'tokens of virginity'), and the Oriental custom referred to in that passage, see art. SONG OF SONGS, pp. 595^a, 596^b, and cf. Driver, *Deut. ad loc.*

F. H. WOODS.

VIRTUE as the translation of δύναμις is used in AV in Mk 5³⁰, Lk 6¹⁹ 8⁴⁶ in the sense of power (so RV) or influence. In earlier Eng. it was freely used (after Lat. *virtus*, from: *vir*, a man, therefore 'what is manly,' 'courageous') in the sense of 'strength' or 'power.' Thus Chapman, *Odysseys*, xvii. 360—

'His double gates, and turrets, built too strong
For force or virtue ever to expugn.'

It is Wyclif's usual word for δύναμις after the Vulg. *virtus*, as Ac 19¹¹ 'And God dide vertues not smale bi the hoond of Poul'; He 1³ 'And berith alle thingis bi word of his vertu.' The same in the Rhem. version, as Lk 9¹ 'He gave them vertue and power (δύναμις καὶ ἐξουσία, Vulg. *virtutem et potestatem*) over al devils.' The modern meaning of 'virtue' was already in use in 1611, as in the *Preface to AV*, 'Solomon was greater than David, though not in vertue, yet in power'; and it is probable that in the above passages the word was retained from the earlier versions because it conveyed the sense of *influence* (supernatural influence) to the translators' minds. Cf. Adams, *2 Peter*, 17, 'It was the brazen serpent that healed,

not the eye that looked on it; yet without a looking eye, there was no help to the wounded party by the promised virtue.' Though more generally, 'influence' is also the meaning in Melvill, *Diary*, 15, 'He was a man of rare wesdome, judgment, and discretion; and, therfor, mikle employed in the trysts and effeares of the noble and gentle men of the countrie, whilk distracted him fra his calling, hinderit his vertew, and schortened his lyff.' Even Coverdale has the word in the sense of righteousness or goodness, Ezk 3³⁰. J. HASTINGS.

VISION (usually *ἰσῆ, ὄραμα*). In early Heb. religion the vision had its closest affinity with the dream,—by which probably the conception of its character was determined,—and the two are usually coupled as the ordinary sources of prophetic oracles (Nu 12^{6f}, Jer 23^{25a}). Its recognized psychological condition was an emotional excitement in which the person was no longer master of his own thoughts or will (Nu 24^{2f}, 1 S 19^{20a}). See TRANCE. In both dream and vision what carried religious significance was the fact that the presentation did not come through the ordinary sense channels, or as a product of the mind's conscious activity. On this account it was accepted as a revelation from God. When we come to the Prophets the conception of revelation has undergone a change in correspondence with religion in general. The dream disappears, together with the rapt utterance; and prophecy becomes an ethical intercourse of the mind of man with God (Is 8¹⁹, Jer 23²⁰). But, while there is no trace of ecstasy in the strict sense or its accompaniments, there are frequent allusions to times of extraordinary elevation of thought and feeling, times therefore of illumination. At such moments an issue becomes clear, a truth breaks on the mind, a resolution is formed (Is 6, Jer 1⁵). The result is sometimes presented as if it had come to the prophet in a manner analogous to sense experience,—the prophet sees, hears, questions, replies,—but the broad sense in which vision is used makes it clear that the pictorial image was not the source of his knowledge or resolution, but rather that the truth, having taken possession of his mind and heart, created the vision as its imaginative clothing. Even a verbal message, with no reference to a voice or appearance, is spoken of as a vision (Is 1¹ 21² 22¹, Mic 1¹, Hab 2²). In Amos's vision of the basket of summer fruits the motive for using the visional form is evidently the play upon the word *רָא*. Again, as in the intricate description of Ezk 1, the vision is sometimes of a kind that could hardly be pictorially realized. Although, in fact, the primitive phraseology is retained,—the prophet sees, hears, the hand of the Lord is upon him,—it is no longer used in the primitive sense. The vision has become a literary and poetical form consciously employed to embody and communicate truths that have become clear to the inner consciousness. The pre-exilic prophets make only sparing use of the direct visional form. In Ezekiel it is more common, but has lost its earlier imaginative spontaneity, and assumed more the character of an artificial construction (Ezk 1^{4a}). It is not found in Deutero-Isaiah or in Haggai; but it reappears in Zechariah, and continues, in its most artificial form, to be employed by apocalyptic writers. In the NT it finds a place only [but cf. the use of *ὁ ὄραμα* in Mt 17⁹] in the apocalyptic book of Revelation, and in those narratives in Acts and the earlier part of Luke that bear the character of popular tradition. (See PROPHECY and the Literature there cited).

W. MORGAN.

YOPHSI (יֹפְסִי [but text dub.]; B 'Iaṣel, A 'Iaṣīl). —The father of Nahbi, the Naphtalite spy, Nu 13¹⁴.

VOW (וַךְ, וָךְ, *evah*).—It was a universal custom in ancient religions, too natural to need explanation, for men to seek the help of the deity in times of peril or distress (Ps 66¹²⁻¹⁴), or to secure the fulfilment of some much cherished hope, by promising him some special gift that would enlist his own interest on their side. Or their vow might be less of the nature of a bargain, and more the expression of unselfish zeal and pious devotion. It might also be a promise to abstain from some comfort or even necessary of life. Among the Hebrews all these types of vow are to be found: for the last the term *קֶרֶן* 'bond,' which occurs only in Nu 30, was used.

Although we have no legislation on the subject in JE, the practice was very ancient. Thus Jacob vows at Bethel that if Elohim will be with him and give him bread and raiment, so that he comes to his father's house in peace, he will make the pillar a sanctuary of God, and pay tithe of all that He gives him (Gn 28²⁰⁻²² E). In the period of the Judges we have Jephthah's vow, that if J^r delivered the Ammonites into his hand, he would offer as a burnt-offering the person who first came from his house to meet him (Jg 11³⁰⁻³¹). Though it was his own daughter, the inviolable character of the vow in that primitive age, which had learnt none of the slippery shifts of casuistry, forced him to sacrifice her. Hannah vowed that if J^r would give her a son she would dedicate him to His service all the days of his life, and no razor should come upon his head (1 S 1¹¹). It is interesting to notice that after the birth of Samuel, when Elkanah went for the yearly sacrifice to Shiloh, the writer speaks of him as going to offer the yearly sacrifice and his vow, as if the vow were as much a matter of course as the sacrifice (v. 21). (It seems unnecessary to suppose, with H. P. Smith, *ad loc.*, that the words 'and his vow' were added by a scribe). In the period of the early monarchy, Absalom secured permission to go to Hebron on pretext of a vow he had made, while in exile at Geshur, that he would worship J^r if He restored him to Jerusalem (2 S 15⁷⁻⁸). The meaning of the vow is that he would appear before J^r and, since none could appear before Him empty, would offer sacrifice to Him. Naturally, this would be offered not at Jerusalem, but at the Judean sanctuary of Hebron. Each of these instances is a case of a vow intended to secure a favour, and in its essence is a commercial transaction.—A vow of unselfish devotion, which was also a vow of abstinence, is exemplified in the Psalmist's poetical description of David's vow that he would not enter his house, lie in his bed or suffer himself to sleep, till he had found a place for J^r to dwell in (Ps 132¹⁻⁵). Saul's taboo on eating before sundown (1 S 14²⁴) was a vow of abstinence, imposed on others as well as himself, in order to secure victory by the help of J^r. An extreme form of vow is exemplified in the ban or vow of extermination on Arad (Nu 21¹⁻³): 'Israel vowed a vow unto the LORD, and said, If thou wilt indeed deliver this people into my hand, then I will devote their cities.' Both cities and people were in this case destroyed (see CURSE).

In Deuteronomy we have little legislation on vows. It is insisted that what has been thus dedicated must be eaten at the central sanctuary (Dt 12^{17, 18, 20}). The hire of sacred prostitutes must not be brought into the sanctuary for any vow (Dt 23¹⁸). There may have been a relaxation of sentiment as to the stringency of a vow, such as may be observed in the post-exilic period; for the legislator, while insisting that there is no religious obligation to make a vow, enjoins that, once made, the pledge must be honoured under pain of Divine displeasure.

In P we naturally have much fuller regulations. In Nu 30, which in its present form belongs to a

late stratum, both vow and bond are declared to be binding when uttered by a man. But a woman who lives in her father's house or is married is in a different position. Her father or husband has a right of veto, provided that it is exercised at once. But otherwise silence gives consent, and the vow must be regarded as irrevocable. If at a later period her husband cancels it, he does so on peril of Divine punishment. A widow or a woman divorced from her husband, since she is not dependent on another, is bound by her vow. Vows and freewill-offerings must be without blemish (Lv 22^{18, 19} ? H); but while a freewill-offering may be made from that which has something lacking or superfluous, this is forbidden in the case of a vow (v. 23). In this connexion it is interesting to notice that Malachi utters a curse on the deceiver who has a male in his flock and vows it and substitutes a blemished thing (1¹⁴). The laws as to the discharge of vows are to be found in Lv 27, apparently a late section of P. Persons vowed to J^r could not be sacrificed as Jephthah's daughter had been; they must be redeemed. A fixed scale is laid down. Males between the ages of twenty and sixty were redeemed at 'fifty shekels of silver, after the shekel of the sanctuary' (see MONEY, vol. iii. p. 422), females at thirty shekels. From five to twenty years, males were redeemed at twenty and females at ten shekels; from a month to five years, males were redeemed at five and females at three shekels; while from sixty upwards the tariff was fixed at fifteen and ten shekels respectively. If, however, the person who made the vow was too poor to pay the redemption price, it was to be fixed according to his ability. In the case of animals no change could be made—the vow must stand as originally uttered. Not only was it forbidden to substitute a bad for a good, but also a good for a bad. If such change was made, both became holy to J^r. If the animal was unclean, and therefore incapable of being used in sacrifice, it was sold at the priest's valuation, and the money given to the sanctuary. If the owner wished to redeem it, he might do so on payment of the valuation plus one-fifth. Firstlings, however, could not be vowed to J^r, since, as such, they already belonged to Him. If devoted to J^r by the ban, they were too holy to be redeemed; and it is startling to read (Lv 27²⁶) that men so devoted must be put to death. The law for the dedication of a house is similar to that for the dedication of animals. It was sold at the priest's valuation, or redeemed by the addition of a fifth to that price. The law as to fields is more complex and obscure. If a man vows part of his hereditary possession, the valuation is to be fixed according to the quantity of seed required to sow it, at the rate of fifty shekels the homer. If the field is consecrated immediately after the year of jubilee, this estimate is to stand; but if some time after, then a reduction in price must be made proportionate to the time that has elapsed. The owner may redeem it by paying the priest's estimate plus one-fifth. If he does not redeem it, but sells it, the right of redemption is lost, and the field instead of returning to him at the jubilee becomes the property of the sanctuary. The law is far from clear. Apparently, when a field was dedicated, the owner commuted his obligation by a money payment according to a fixed scale of valuation. But this by itself does not constitute him absolute owner again: this he can become only by adding one-fifth to the valuation, as penalty for the privilege of redemption. If he pays the valuation without adding the fifth, and sells the field, he loses all claim on it, and it does not revert to him in the year of jubilee, as it would otherwise have done, but falls to the sanctuary. If

the field dedicated is not a portion of the owner's hereditary possessions, then the money payment given in commutation is fixed by the time that has to elapse before the year of jubilee, and in that year it returns naturally to the hereditary owner. In this case the redemption penalty of an additional fifth is not required (see, further, *SABBATICAL YEAR*).

According to Nu 15³⁻⁸ (a late section of P), when an animal sacrifice was offered in fulfilment of a vow, a meal-offering had to be presented with it. Another late law (Lv 7^{16, 17}) prescribed that a peace-offering in discharge of a vow must be eaten on the day on which it was offered, and what was left on the second day. If any portion still remained to the third day, it had to be burnt. This law probably embodies the immemorial practice: a vow would, as a rule, involve a sacrificial meal, and the regulation that the flesh must not be eaten after the second day may even have been a relaxing of earlier usage. In Pr 7¹⁴ the woman who entices the simpleton to his ruin, has that day punctiliously performed her religious duties—she has paid her vows and come out to find a companion for the sacrificial feast.

The warning in Dt 23²¹⁻²², that, while there is no sin in not vowing, when a vow has once been made it must be scrupulously fulfilled, finds an echo in the Wisdom literature. In Pr 20²⁵ we apparently have a protest against hasty vows followed by repentance and attempts at evasion (the text and precise sense are alike uncertain; see Frankenberg and Toy, *ad loc.*). So also Koheleth advises his readers to make haste with the payment of their vows, and not trifle with God by delay, for He takes no pleasure in fools. Far better is it to refrain from vows than to make and fail to fulfil them. They must not be betrayed into a vow, which they will afterwards explain away to the priest's messenger as a mistake, lest God be angered with them and destroy the work of their hand (Ec 5⁴⁻⁶, cf. Mal 1¹⁴). But while on the one side the ancient sanctity of the vow was relaxed, the more spiritual, as we see from some of the Psalms, came to throw all the stress on the element of thanksgiving, and the material element sank into insignificance, as with other sacrifices (Ps 22²⁵ 50¹⁴).

Yet vows played a great part in later Judaism, and Jesus came into conflict with the religionists of His time on this question, singling out the law of *Corban* especially as an example of the nullifying of the Law by tradition (see *CORBAN*). St. Paul became a Jew to the Jews in this matter (Ac 18¹⁸), if this refers to him and not to Aquila, and 21²³⁻²⁶). On these cases, and also on the whole question of the Nazirite vow, nothing need be added to what has been said in the article *NAZIRITE*.

LITERATURE.

i. **LIFE OF JEROME, AND CIRCUMSTANCES UNDER WHICH HIS TRANSLATION WAS MADE.**—Jerome, or to give him his full name, Eusebius Hieronymus, was born at Stridon, on the borders of Dalmatia and Pannonia, probably about A.D. 340-342.* His parents were Christian, and sufficiently wealthy

to give him a good education and to send him early to Rome, to study under the celebrated grammarian Donatus. From the first, Latin literature attracted him, and he especially studied Vergil, Terence, and Cicero; he also worked at rhetoric under Caius Marius Victorinus,* laid the foundation of a good knowledge of Greek, and collected a considerable library. Thence he moved to Gaul, where, staying at Trier, he began serious theological study, which he prosecuted further, on settling in Aquileia in 370. Four years later he travelled with several friends in the East, and at Antioch was attacked by a fever, during which a dream made a deep impression on him, and resulted in his abandoning all secular studies. He dreamt that he was summoned to the judgment-seat of Christ; on being asked who he was he replied 'a Christian,' but received the stern answer, 'Mentiris, Ciceronianus es non Christianus; ubi enim thesaurus tuus, ibi et cor tuum' (Ep. xxii. *ad Eustochium*, 30). Yet this classical training and fondness for the best Latin literary models proved one of the greatest possible advantages to Jerome for the work of his life, and through him to the whole Christian Church; he had been preparing himself unconsciously for making that translation of the Bible which was to be the *Editio Vulgata*, the authorized version for the whole of Western Christendom during more than a thousand years.

In search of a life of solitude and asceticism he moved the same summer (374) to the desert of Chalcis, east of Antioch, where he passed five years in strict self-discipline and diligent study, a Rabbi who had been converted to Christianity teaching him Hebrew. But this period also saw the beginning of the correspondence and warm friendship with pope Damasus, which afterwards led to the request that Jerome would undertake to put forward an authoritative Latin version of the Scriptures. The correspondence began (Ep. xv., xvi., written about 376-378) on doctrinal, but was a few years after renewed on biblical questions (Ep. xviii., xix., xx., xxi., xxxv., xxxvi., written during the years 381-384), Jerome giving Damasus the information he had desired on such questions as the meaning of the word *Hosanna*, the interpretation of Gn 4¹⁵, the reason why Abraham received circumcision as a sign of faith, etc.

In 379 Jerome moved to Antioch, where he was ordained presbyter, and then to Constantinople, where he listened to the expositions of Gregory Nazianzen (Ep. l. 1, lii. 8), and probably continued the systematic study of Greek; and in 382 he returned to Rome. Here he spent nearly three years in close connexion with Damasus (Ep. cxxvii. 7), whose confidence and affection he thoroughly enjoyed. He refers with naïve self-satisfaction to his popularity in Rome at this time: 'Totius in me urbis studia consonabant. Omnium pæne judicio dignus summo sacerdotio decernebar. Beatæ memoriæ Damasus meus sermo erat. Dicebar sanctus; dicebar humilis et disertus' (Ep. xlv. 3, written on leaving Rome, Aug. 385).

The inconveniences from which the Western Church suffered owing to the absence of one authorized Latin version of the Bible, had long been felt. 'Tot exemplaria pæne quot codices' was Jerome's description of the state of things; and the confusion caused by a number of independent and anonymous translations of the NT was worse confounded by the carelessness of scribes and copyists.† Whether in private study or in

* Victorinus was converted to Christianity in old age, and is known amongst Patristic writers as Victorinus Afer; Zöckler (p. 30) doubts whether Jerome studied under him.

† This is a point of which Jerome constantly complains; see Ep. lxxi. 5, *Comm. in Matt.* ii. 5, iii. 3, vi. 16, etc.; also in the books of the OT, *Præf. in lib. Chron. iuxta LXX.*

* See the discussion on the question in Zöckler, *Hieronymus, sein Leben u. Wirken*, pp. 21-24.

public preaching, in controversy with heretics or in liturgical use, this 'Latinorum interpretum infinita varietas',* must have been almost intolerably confusing to the more cultivated members of the Church, though the common folk felt it not, and were angered at any change. Damasus therefore initiated a valuable and much-needed reform when he commissioned Jerome to undertake the preparation of a revised and authoritative Latin version of the NT. He could not have placed the work in better hands. Jerome's qualifications were unique: he was fully sensible of the urgency and importance of such a revision; he was a good Latin scholar, writing a style that was both pure and vigorous; he had been studying Greek carefully, and had already a fair knowledge of Hebrew;† in later years, when he was translating the OT from the original, he had attained a thorough knowledge of that language, while long residence and travel in the East had given him that first-hand acquaintance with the country and its customs which must be invaluable to any one undertaking a task of this nature. His abilities also as a scholar and writer were well known; and Damasus must have argued that a version proceeding from an authority so eminent, and backed by the influence and power of the Roman see, could not fail to obtain a wide acceptance.

Jerome undertook the task proposed to him by Damasus, we may well believe somewhat gladly, though in the letter to the pope which forms his preface to the Gospels, he professed reluctance to face so great a task, with the odium and the opposition to which he would be exposed from those who were used to the older translations. His fears were well grounded. Even his very sparing emendations in the Gospels were attacked, and he was accused of tampering with our Lord's own words, and denying the inspiration of Scripture (*Ep.* xxvii. 1); though, in Africa, Augustine welcomed this part of Jerome's work.‡ It was his translation of the OT, however, which brought on him the fiercer storm of indignation and opposition (see below, p. 876b).

The exact date of the pope's commission to Jerome is not known; but the first instalment of the revised text, consisting of the four Gospels, appeared in 383; and this was apparently followed, either the same year, or shortly after, by the Acts and the rest of the NT. It has indeed been doubted whether Jerome ever did revise more than the Gospels; the Latin of the other books shows very few marks of having been emended by him, and there is a rather suspicious absence of the prefaces which usually accompany his emended translations of the books of the Bible; § while the preface he affixed to the Gospels promises 'quattuor tantum Evangelia,' and Augustine, in his well-known letter written in 403,|| speaks with favour of Jerome's translation of the *Gospel*, not of the *New Testament*. Against this, however, we must set the fact that Jerome more than once definitely asserts that he revised the whole New Testament,¶

* *Aug. De doctr. christ.* ii. 11. The Jews, too, laughed at the variations in the Latin versions; see Jerome's *Comm.* in *Ezech.* c. xxxvii. (v. 432 in Vallarsi's edition, Venice, 1766-71).

† *Apol. adr. Ruf.* iii. 6 (Vall. ii. 537). 'Ego philosophus, rhetor, grammaticus, dialecticus, hebraeus, graecus, latinus, trilinguis'; see van Ees, pp. 101, 108.

‡ *Ep.* civ. 8 (*Augustini ad Hieron.*).

§ e.g. *Pref.* in *libr. Job ex Graeco*, 'Igitur et vos et unumquemque lectorem solita praefatione commoneo'; *Pref.* in *libr. Psalmorum iuxta LXX*, 'unde consueta praefatione commoneo,' etc.

|| *Ep.* civ. 6 (*Augustini ad Hieron.*), 'Proinde non parvas Deo gratias agimus de opere tuo, quo Evangelium ex Graeco interpretatus es.'

¶ *Ep.* lxxi. 5, 'Novum Testamentum Graecae reddidi auctoritati,' cf. *De vir. illustr.* cxxxv.; *Ep.* cxli. 20 (*ad Augustinum*), 'Et si me ut dicis, in *Novi Testamenti* emendatione suscipis,' etc., which looks like a correction of Augustine's '*Evangelium ex Graeco interpretatus es*.'

and even mentions passages in the Epistles where his own version differs from the Old Latin.* It seems hardly possible to doubt, therefore, that he did revise the whole of the New Testament, though no doubt the revision was much more hurried and perfunctory after the Gospels were off his hands;† such readings, however, in the Acts as 8² *curaverunt for comportaverunt* of the OL, 11⁴ *ordinem for per ordinem*, 16²⁸ *laudabant deum for hymnum dicebant (canebant) deo*, 16²⁸ *dimittite for dimitte*, are obvious instances of Hieronymian correction, sometimes against all known Gr. MSS (see below, p. 882).

At the same time, apparently, Jerome made his first revision of the Old Latin Psalter; it was simply emended from the Greek of the LXX, and the translation was altered only where the sense absolutely demanded it.‡ This revision was called the *Roman Psalter*, in opposition to the *Psalterium Vetus*, and was in use in the Churches in Rome and Italy till the pontificate of Pius v. (1566-1572), who introduced the *Gallican Psalter* (see below) generally, though the Roman was still retained in three Churches in Italy. § Towards the end of 384 pope Damasus died; and in the August of the following year (385) Jerome left Rome for Palestine. There he and his companions studied the topography, scenery, and cities of the Holy Land;|| and after a journey to Egypt returned thither again to settle at Bethlehem, where (389) the two conventual buildings were founded, over one of which—that for monks—Jerome was for so long to preside, while over the other—that for nuns—Paula, the devout widow who had been his companion in travel, ruled; and was succeeded, on her death, in 404, by her daughter Eustochium.

Meanwhile, Jerome's Biblical studies had not slackened. The *Roman Psalter* had been so rapidly multiplied and so carelessly copied, that its text was soon in as bad a state as the Old Latin;¶ and in answer to the requests of Paula and Eustochium he undertook a second revision, correcting in addition the Greek text from the other Greek versions, and making use of Origen's critical signs: a passage between an *obelus* and two points was to be understood as present in the LXX but absent from the Hebrew; that between an *asterisk* and two points was lacking in the LXX, and had been supplied not directly from the Hebrew, but from the Greek version of Theodotion.** This version is known as the *Gallican Psalter*, as it early obtained wide popularity in Gaul, probably through the influence of Gregory of Tours,†† and ultimately became the current version in the Latin Church; the exact date of its publication is not known, but it was probably about A.D. 387.

* e.g. *Ep.* xxvii., where he quotes from Ro 12¹¹⁻¹², 1 Ti 1¹⁵⁻¹⁸.

† See especially on this point Vallarsi's preface to vol. x. of Jerome's works, pp. xix-xxi; and also Bp. J. Wordsworth in *Studia Biblica*, vol. i. p. 128.

‡ *Pref.* in *libr. Psalmorum* (Vall. x. 106), '*Psalterium Romae dudum positum emendaram, et iuxta LXX interpretes, licet cursim, magna illud ex parte correxeram*.'

§ Hody, p. 383, 'in una Roma Vaticana ecclesia, et extra urbem in *Mediolanensi* et in ecc. *S. Marci*, Venetis'; it is still used in S. Peter's at Rome, and at Milan; and also partly retained in the Roman Missal, and in one place in the Breviary in the Invitatory psalm 95 (94); see Kaalen, p. 160.

|| The advantages of such study for the purposes of translation he insists on in the *Pref.* in *libr. Paralip.* iuxta LXX.

¶ *Pref.* in *libr. Psalm.* (x. 106), 'Quod quia rursus videtis . . . scriptorum vitio depravatam, plusque antiquum errorem, quam novam emendationem valere.'

** *Id.*, 'Ubi cumque viderit virgulam praecedentem (±) ab ea usque ad duo puncta (:) quae impressimus, sciat in LXX translatoribus plus haberi. Ubi autem stellas (*) similitudinem perpererit, de Hebraeis voluminibus additum noverit, aequae usque ad duo puncta, iuxta Theodotionis dumtaxat editionem, qui simplicitate sermonis a LXX interpretibus non discordat.' The virgula of course = the *obelus*, and the stella = the *asterisk*.

†† i.e. at the end of the 6th cent.; see Walafrid Strabus in Hody, p. 382.

Jerome was also perfecting himself in the knowledge of Hebrew, and was studying under a Jew, who, in fear of being persecuted by his countrymen, used to visit him at night, like a second Nicodemus (*Ep. lxxxiv. 4*). He also published new translations of other books of the OT from the LXX, but as to both the extent and date of this revision there is a considerable amount of uncertainty. Job was certainly revised soon after the Psalter, and in the same way, and published with a preface to Paula and Eustochium;* and these two books alone of all Jerome's revisions *iuxta LXX* have come down to us. We also know that he similarly revised Proverbs, Ecclesiastes, Song of Songs, and Chronicles, for the prefaces to these books remain though the books themselves are lost.† Elsewhere he speaks generally of having revised 'the Septuagint' (i.e. the Latin translation of it), and 'the Canonical Books,' which certainly suggests that all the OT underwent this revision (*c. Ruf. ii. 24*, 'Egone contra LXX interpretes aliquid sum locutus, quos ante annos plurimos diligentissime emendatos meae linguae studiosius dedi?'; cf. *iii. 25*; *Ep. lxxi. 5*; *Ep. cxii. 19*, 'Quod autem in aliis quæris epistolis, cur prior mea in libris Canonicis interpretatio asteriscos habeat et virgulas prænotatas'). Two objections have been felt against this supposition. (1) The absence of prefaces to the other books, and of any reference to a previous translation in the prefaces which he affixed to those books when he translated them from the Hebrew; whereas rather pointed references occur in the case of Chronicles, Job, etc.‡ (2) The enormous amount of labour that such a work must have involved, when compressed into a very few years (for by 391 he was already engaged on the translation from the Hebrew),—years, too, that were deeply occupied with other business. The second objection need not detain us long. Jerome was an extraordinarily rapid worker: Proverbs, Ecclesiastes, and Song of Songs were translated from the Hebrew in three days, as he was recovering from a severe illness (*Præf. in libr. Salomonis*); Tobit was translated in a single day (*Præf. in Tobiam*); one 'lucubratiuncula' sufficed for Judith (*Præf. in libr. Judith*); when writing his commentary on the Ephesians he would sometimes finish a thousand lines in a day.§ The first objection is similar to that felt against the revision of the later books of the New Testament (see above, p. 874); and though there is again something suspicious in the absence of his wonted prefaces, we can hardly press such negative arguments against positive assertions, which, if they mean anything at all, mean that he revised the whole of the OT from the LXX; thus in the *Præf. in libr. Salomonis iuxta LXX* he states that he did not correct the books of Wisdom and Ecclesiasticus, 'tantummodo Canonicas scripturas vobis emendare desiderans'; which language certainly implies that he did correct all the other books. Their total disappearance is easily accounted for if the postscript to his *Ep. cxxxiv.* to Augustine|| (written A.D. 416) be

genuine; for there he complains that the greater part of this work had been stolen from him.

While engaged on this work, however, the bad state of the LXX text became more and more apparent to him, and he was convinced that for a satisfactory Latin version of the OT recourse must be had to the original Hebrew (*Præf. in libr. Paralip. ex Hebr. vol. ix. 1405*); the need of such a translation became additionally urgent in controversy with Jews, who, when confronted with texts from the LXX, would naturally refuse to acknowledge the accuracy of the quotation, and would assert that it did not represent the sense of the original,* while many of his friends, who felt the need of a new translation and knew that Jerome was the man best fitted for the task, urged him repeatedly to undertake it. It was indeed, as we learn from his prefaces, in answer to their requests, that he translated this or that book and sent them copies; and so the great work of his life was not prosecuted as a whole and according to a fixed plan, but bit by bit, and for the satisfaction of single and independent inquirers.

About 15 years—from 390 to 405†—were spent on the new translation. Jerome began his work with the books of Samuel and Kings, which he published with the famous *Prologus Galeatus* or 'preface with the helmet'—armed against opponents; this preface, however, is really an introduction to the whole OT, and shows that even thus early he must have conceived some idea of translating all the books. Next came Psalms, the Prophets, and Job; and in 394–396 the books of Esdras and Chronicles; then his work was interrupted by a long illness. In 398 he resumed his labours, and translated Proverbs, Ecclesiastes, and Song of Songs; and the Octateuch (in which Esther was included) now alone remained of the Canonical books. First the Pentateuch was published, though the precise date is uncertain; then soon after the death of Paula, in 404, Joshua, Judges, Ruth, and Esther; later, the apocryphal parts of Daniel and Esther, and the books of Tobit and Judith, which were translated from the Chaldee; and so at length the work was completed. Wisdom, Ecclesiasticus, and probably Maccabees were left unrevised, and Baruch he passed over.

Jerome's translation of the *Psalms* from the Hebrew never became popular, excellent though it is; the hold on the public mind of the more familiar version was too strong to be loosened, and it is the Gallican Psalter which appears in an ordinary Vulgate Bible. A convenient edition of the version from the Hebrew has been published by P. de Lagarde, *Psalterium iuxta Hebræos Hieronymi*, Lipsiæ, 1874.

For the date at which *Job* and the *Prophets* were completed, see *Ep. xlix. 4 ad Pammachium*; this was written towards the end of 393; he writes, 'Libros sedecim Prophetarum, quos in Latinum de Hebræo sermone verti, si legeris et delectari te hoc opere comperero, provocabis nos etiam cætera clausa armario non tenere. Transtuli nuper Job in linguam nostram.'

The preface to the books of *Esdras* was probably written about 394, as in it he refers to the discussion of several points 'quæ latiori operi reservamus'; this larger work which he was about to publish is certainly the *Ep. lvii. ad Pammachium* (de optimo genere interpretandi), which appeared in the latter part of 395. The third and fourth books of *Esdras* he refused to edit: 'nec quemquam moveat quod unus a nobis editus liber

* See vol. x. 49–100 (the references are always to Vallarsi's ed. of Jerome's works); the passages added either from the LXX or from the Hebrew through Theodotion's version were marked in the same way as in the Psalms.

† *Præf. in libr. Salom. iuxta LXX* (x. 435 f.), 'Tres libros Salomonis, id est, Proverbia, Ecclesiastes, Canticum Cantorum, veteri LXX interpretum auctoritati reddidi'; see also *Præf. in libr. Paralip. iuxta LXX* (p. 431); the passages added from LXX or Heb. were also marked as in the Psalms.

‡ *Præf. in libr. Paralip. iuxta LXX* (x. 1408), 'Ceterum memini editionem LXX translatorum olim de Græco emendatam tribuisse me nostris'; in *Job*, 'Utæque editio, et LXX apud Græcos, et mea iuxta Hebræos, in Latinum meo labore translata est' (ix. 1101); in *libros Salomonis*, 'Si cui sane LXX interpretum magis editio placet, habet eam a nobis olim emendatam' (ix. 1296).

§ *Præf. ad libr. II. Comment. in Eph.* (vii. 586).
|| 'Grandem Latini sermonis in ista provincia notariarum patimur penuriam; et ideo præceptis tuis parere non possu-

mus, maxime in editione LXX, quæ asteriscis verbisque distincta est. Pleraque enim prioris laboris fraude cuiusdam amissimus'; but this postscript is omitted by one MS and by several editors; see Vall. i. 1043–44.

* *Præf. in Psalterium ex Hebr.* (ix. 1155 f.), 'Quia igitur nuper cum Hebræo disputans, quendam pro Domino Salvatore de Psalmis testimonia protulisti volensque ille te illudere, per sermones pene singulos assererat, non ita haberi in Hebræo'; see also *Præf. in libr. Paralip.*, in *Isaiam*, etc.; yet when in Africa they were appealed to as to whether Jerome's *hedera* or the traditional *cucurbita* was the right translation in Jon 4th, they defended the translation of the LXX and Old Latin, see *Ep. civ. 5 (Augustini ad Hieron.)*; later, the Jews bore witness to the accuracy of Jerome's work, see *Aug. De Civ. Dei*, lib. xviii. c. 43; van Ess, p. 117.

† See Kaulen, p. 168 f.; Westcott, art. 'Vulgate' in Smith's *DB*, p. 1700 f.; the latter's dating of the appearance of the several books seems preferable to Kaulen's.

est; nec apocryphorum tertii et quarti somnia delectetur; quia et apud Hebræos Ezrae Neemiaque sermones in unum volumen coarctantur; et quæ non habentur apud illos nec de viginti quattuor senibus sunt, procul abijcienda'; the 4th book is found only in the Latin version. In this same preface to Esdras, Jerome complains of his opponents for attacking his work while they secretly make use of his translation, and he begs his friends Domnio and Rogatianus not to let his translation be publicly known; they are to read it privately, or, at the most, only let a few friends see it. See vol. ix. 1524.

Chronicles was probably finished in 396, for in the preface he remarks, 'Scripta nuper librum de optimo genere interpretandi.'

The *Præfatio in libros Salomonis* contains a reference to his illness: 'longa ægrotatione fractus, ne penitus hoc anno reciderem et apud vos mutus essem, tridui opus nomini vestro consecravi.' *Cl. Epp. lxxi. 5, lxxiii. 10*, both written in 398, in which he refers to the same illness apparently, and in almost the same terms—'longo tentus incommodo,' 'post longam ægrotationem.'

The *Octateuch* must have been in hand about the same time, for he refers to it in *Ep. lxxi. 5*, 'Canonem Hebræicæ veritatis, excepto Octateucho quem nunc in manibus habeo, pueris tuis et notariis dedi describendum.' *Genesis* at any rate was published before 402, as Jerome quotes the preface to it in his apology against Rufinus (ii. 25), which cannot be later than that date. The other four books of the Pentateuch probably appeared later, as when Jerome wrote his preface to *Genesis* he had not finished them: 'nunc te precor, Desideri carissime, ut quia tantum opus (i.e. Pentateuchum) me subire fecisti, et a *Genesis* exordium capere, orationibus juves, quo possim eodem spiritu quo scripti sunt libri, in latinum eos transferre sermonem.'

Joshua, Judges, and Ruth are numbered with *Ether* as books he was just publishing, 'post sancta Paulæ dormitionem' in the *Præfatio in Joas*.

For *Tobit* and *Judith* see the prefaces to those books; Jerome was not himself acquainted with Chaldee, but he obtained the help of a scholar who translated the Chaldee into Hebrew, which Jerome in turn translated into Latin.

For his refusal to translate afresh *Wisdom* and *Ecclesiasticus* see the *Præf. in libr. Sal. tuata LXX*: 'Porro in eo libro qui a plerisque Sapientia Salomonis inscribitur, et in Ecclesiastico, quem esse Jenu filii Sirach nullus ignorat, calamo temperavi, tantummodo Canonice Scripturas vobis emendare desiderans'; though this was written before he began the translation of the OT from the Hebrew, he does not seem to have changed his mind afterwards. With regard to the *Maccabees*, however, the evidence is conflicting. He nowhere mentions translating the books himself, and his language quoted above certainly suggests that he had no intention of doing so in 397; in the *Prologus Galeatus* (390-91) he passes them by with a short notice: 'Machabeorum primum librum Hebræicum reperi; secundum Græcum est quod ex ipsa quoque phrasi probari potest.' Yet, as M. Berger pointed out to the present writer, there are fairly numerous remains of an Old Latin version of the *Macc.* other than that which appears in the Vulgate Bible; and these differ so much that the latter must be regarded as a new recension if not an independent translation; see the parallel versions in Sabatier (*Bib. Sac. Lat. versiones*, vol. ii.). Sabatier himself (pp. 1013, 1014) allows that Jerome may have corrected the older version, though he hardly thinks he actually retranslated it.

For his treatment of *Baruch* see the *Præf. in Jerem.*: 'Librum Baruch . . . qui apud Hebræos nec legitur nec habetur prætermisimus.'

It may be worth while to arrange the books of the Bible in the chronological order of their revision and retranslation, as given us in the above investigation.

New Testament.

- 383 A.D. The four Gospels.
384-386. Rest of the New Testament.

First revision of Psalter.

- 383-384. Psalterium Romanum.

Revision of Old Testament from the Septuagint.

- 387 (probably). Psalterium Gallicanum.
387 or somewhat later. Job, followed by Proverbs, Ecclesiastes, Song of Songs, Chronicles.
388-391. Rest of the Canonical books (probably).

Retranslation of Old Testament from the Hebrew.

- 390 or 391. Books of Samuel and Kings.
392-393. Psalms, Prophets, Job.
394. Esdras.
396. Chronicles.
398. Proverbs, Ecclesiastes, Song of Songs.
401? Genesis, followed by Exodus, Leviticus, Numbers, Deuteronomy.
405. Joshua, Judges, Ruth, Esther.
Tobit, Judith, and apocryphal parts of Daniel and Esther.

We have said that it was at the wish of friends that most of the translations were undertaken; *

* e.g. the Pentateuch was translated at the wish of Desiderius; *Chronicles* for Chromatius, the books of Esdras for Domnio and Rogatianus, *Ether* for Paula and Eustochium.

yet Jerome's friends, who could realize present needs and foresee future advantages, were a small circle; the vast body of clergy and laity were satisfied with the existing versions; and the mutterings of suspicion which were aroused by the emended version of the NT were as nothing compared with the storm of indignation and opposition which the translation of the OT from the Hebrew brought on Jerome's head.* No doubt several causes had to do with this result; Jerome's own hot temper, and the terribly ready and powerful tongue he could use whenever duty seemed to urge him to speak, had gained him many enemies; the fame of his learning may have made other scholars jealous and critical; but the great stumbling-block was that he should have gone behind the Septuagint version, and made a translation which took no account of it, and even set itself up as an independent rival. The popular legends as to the miraculous agreement of the seventy translators had no doubt surrounded the Greek version with a halo of sanctity, and its frequent use by the NT writers in quotation would help to place it, as regards inspiration, on a level with the original Hebrew; and no charge seems to have been more constantly hurled at Jerome than that of presumption, unlawful innovation, sacrilege, in daring to put aside the LXX version. Even Augustine held the LXX to be equally inspired with the original Hebrew,† and deprecated any new translation, though mainly from fear of the offence it would cause to the weaker brethren.‡ A story became current that a certain African bishop had adopted the new version for public use in his Church; in the book of Jonah, Jerome had employed the word *hedera* for the gourd under which the prophet rested, instead of the *cucurbita* of the earlier Latin versions; the introduction of this new translation in a familiar passage of Scripture caused such excitement and tumult in the Church that the bishop was nearly left without a flock.§ This incident, whether real or fictitious, would serve as a very fair specimen of the hostility which a new translation of Scripture was sure to encounter; and it would take several generations for such opposition to die out; and certainly Jerome's method of meeting it, as exemplified in his letters to Augustine, was the reverse of conciliatory. In the prefaces to the various books of the OT Jerome defended himself with great warmth from the charges brought against him. Over and over again he maintained that he did not intend to cast a slur upon the LXX translation,|| and that he was only endeavouring to render the Hebrew as faithfully as possible, and to make passages clear which in the LXX and the Old Latin were obscure. The objection that the LXX must be inspired and perfect because the apostles and NT writers quoted the OT in that version, he met by bringing forward five quotations (Mt 21², Jn 19³⁷, 1 Co 2⁹, Jn 7³⁸), which could not have been taken from the LXX,

* Jerome's former friend Rufinus was one of his fiercest opponents.

† Aug. *De Civ. Dei*, xviii. 43: 'Spiritus enim qui in prophetis erat, quando illa dixerunt, idem ipse erat in LXX viris, quando illa interpretati sunt'; see also the passages in van Ess, p. 91 f.

‡ Ep. lvi. (*Augustini ad Hieronymum*) written in 394; this letter, however, never reached Jerome; Ep. civ. from Augustine, written 408; and Ep. cxvi. 35, written 405: in the last letter Aug. explains that he had refused to allow Jerome's version to be publicly read in Church—'ne . . . magno scandalo perturbemus plebes Christi.'

§ See Ep. civ. (*Augustini ad Hieron.*) and cxii. 22 (*Hieronymi ad Aug.*); Thierry, *Saint Jérôme*, livre xi. (4th ed. pp. 447, 448) suggests that the incident never really occurred, but was invented probably to throw ridicule on Jerome's work; yet both Jerome and Augustine speak of it as if it were a fact.

|| His apology in the *Prologus Galeatus*—'obsecro te lector ne laborem meum reprehensionem existimes antiquorum . . . Quamquam mihi omnino conscius non sim mutasse me quidpiam de hebraica veritate'—is repeated in different words in almost every preface.

as the reading varied in every case; they must then have been taken direct from the Hebrew, and he was justified in giving this source of our Lord's, or the apostle's, words to the Church in an intelligible translation (*Præf. in l. Paral.* ix. 1408). Indeed he maintained against Rufinus that the apostles used the LXX in quotation only where it agreed with the Hebrew, and that where the two varied they quoted from the original.* But in spite of this he always professed the highest respect for the Septuagint version.

Gradually the conflict calmed down; the general acceptance of the new version could only be a matter of time; it was a clear case of the fittest surviving. Augustine was ultimately seen to praise it; in the Gospels he apparently used it;† the Spanish Church adopted it for public use; Sophronius, the friend and fellow-monk of Jerome, retranslated the Psalms and Prophets from Jerome's version into Greek; and when Jerome was ending his stormy life at Bethlehem in 420, the attacks or criticisms of his opponents were no longer heard, or, if heard, no longer attended to.‡

ii. HISTORY OF THE TRANSLATION AFTER JEROME'S DEATH.—The reception of the new translation was, however, uneven; some Churches clung more than others to the old version, and sometimes Jerome's version would be adopted in one part of the Bible, while the Old Latin would be retained in another. Thus the proceedings recorded in the *Acta contra Felicem* of Augustine show that at Hippo in the year A.D. 404 the Gospels were quoted in Jerome's version, the Acts of the Apostles in the Old Latin.§

Africa and Britain, both separated by the sea from the main body of the Western Church, clung more steadfastly to the older version, though even here the adhesion was a modified one, and the later African texts, such as *m*, and *h* of the Acts and Epistles (see LATIN VERSIONS), show the influence of the Vulgate upon them. In Italy and in other parts of the Western Church generations would soon arise to whom the Old Latin could not be bound by especial ties of use or affection, while by converts the best translation would naturally be that which was most welcomed and most used. The clergy and educated Christians in Rome would be likely to prefer a revision which was begun at the instigation of a pope, and the Latin of which would be more congenial than the ruder dialect of the earlier versions. Augustine's recommendation of the *versio Italica* (by which, Burditt maintains, he meant Jerome's revision; see *The Old Latin and the Italia*, pp. 54, 60 f., and art. LATIN VERSIONS) —'est verborum tenacior cum perspicuitate sententiæ'—was quoted, apparently as a well-known formula, of the Vulgate; Isidore of Seville (6th cent.) uses almost the exact words; and Walafrid Strabus (1st half of 9th) follows Isidore, and says, 'hac translatione nunc ubique utitur tota Romana ecclesia, licet non in omnibus libris, et ipsius translatio merito ceteris antefertur, quia est verborum tenacior, et perspicuitate sententiæ clarior' (see Hody, p. 413).

In the 5th cent. the Vulgate was adopted by Vincent of Lerins, Faustus of Riez, and Prosper of Aquitaine; Eucherius of Lyons and Avitus of Vienne used it largely though not exclusively.¶ In the 6th cent. its use seems becoming almost universal amongst scholars, except in Africa, where Facundus and Junilius still preserve many Old Latin read-

ings; and towards the end of the century pope Gregory the Great (*Præf. in Job ad Leandrum* = Migne, *Pat. Lat.* lxxv. p. 516) could say, 'Novam vero translationem dissero, sed cum probationis causa exigit nunc novam nunc veterem per testimonia assumo; ut quia sedes apostolica, cui auctore Deo præsideo, utraque utitur, mei quoque labor studii ex utraque fulciatur'; compare in *Job*, l. xx. c. 32, where he declares his personal preference for the new translation. It does not, however, follow from this that this version now became the official version in Rome, but only that, in the judgment of the head of the Roman Church, it was raised to an equal rank with the old (see van Ess, p. 137).

Yet we should be mistaken if we measured the disappearance of the older versions simply by the quotations in ecclesiastical writers; the evidence of MSS of the Sacred Books, of Lectionaries, quotations and lessons in service books, etc., must also be taken into account; and these show us that these versions died very hard; sometimes in entire books of the Bible, sometimes in marginal notes, conflate readings, and 'mixed' texts, sometimes in short lections, in antiphons and responses, they lasted far on into the Middle Ages. Thus the St. Germain MS (see p. 888) of the 9th cent. has an Old Latin text in Tobit, Judith, and St. Matthew; in the other books of the Bible which survive it is Vulgate, though strongly mixed with Old Latin readings; the Codex Colbertinus (c) of the New Testament (12th or 13th cent., see p. 888) has the Gospels in an Old Latin text, the rest Vulgate; the interesting Perpignan MS (13th cent., see p. 888) has Ac 1¹-13⁷ and 28¹⁵ *ad fin.* in an Old Latin text, the rest Vulgate with a very slight amount of mixture from the Old Latin; the North British and Irish MSS (such as those described p. 887) preserve a good Vulgate text interspersed with Old Latin interpolations and conflations, which with a little practice can be easily eliminated from the main body of the text. The NT suffered from this mixture far more than the OT; for, being a revision instead of a new translation, it resembled the earlier versions more closely; and it was more familiar to the members of the Church. 'L'Ancien Testament au contraire,' says M. Berger (p. 3), 'n'a réellement été révélé aux peuples latins que par Saint Jérôme': yet even the text of the OT would suffer from the very natural confusion that would come between his translation from the Hebrew and his earlier version from the LXX. In addition to this conscious preservation of the Old Latin in many Vulgate MSS, the text of Jerome's translation was exposed in after-years to the same dangers as existed in his own day, and which are inseparable from the transmission and multiplication of books by hand. The carelessness of copyists, their tendency to introduce matter from parallel passages, unconscious reminiscence of older renderings, occasional alteration for dogmatic purposes,—all these in the course of centuries tended to produce a style of text very far removed from the original purity in which it left its editor's hands.

On this point the writer ventures to quote from the preface (p. vii) of the late M. Berger's *Histoire de la Vulgate*, etc., a book to which he cannot sufficiently express his obligations—'Les doctrines les plus chères aux théologiens du moyen âge exercent toutes leur influence sur le texte de la Bible. Ici c'est le dogme de la Trinité, que l'on veut trouver formulé en toutes lettres dans la Bible, et que l'on affirme par la fameuse interpolation du passage "des trois témoins." C'est la foi en la divinité de Jésus-Christ qui s'exprime en un grand nombre de falsifications de détail, toujours au détriment de son humanité. C'est, dans le troisième chapitre de la Genèse, un changement d'une seule lettre qui met "la Femme" à la place de "la Postérité de la femme." Dans le second livre des Machabées, une série de modifications successives transforment insensiblement le passage classique de la doctrine de la prière pour les morts; louée simplement dans le texte original, la prière pour les morts arrive, dans les textes de basse époque, à être prichée

¶ See Westcott, p. 1702; Kaulen, p. 197 f.; Berger, pp. 2-4; in the 6th cent. in Gaul most of the books of the OT are quoted from Jerome, while for the NT the Old Latin holds its own.

en termes exprès. Dans le quatrième livre d'Ezdras, un passage qui paraît contraire à la prière pour les trépassés est, sans plus, arraché de la Bible avec la page qui le porte, et cet exemplaire mutilé est, par une singulière rencontre, presque le seul qui ait jamais été copié.' For the passage in the Maccabees see the note p. 23 of M. Berger's book; for the fourth book of Ezdras see R. L. Bensly, *The Missing Fragment of the 4th Book of Ezra*, Camb. 1875, or Speaker's Commentary, *Apocrypha*, in loc.; or M. R. James, *The 4th Book of Ezra*, Camb. 1895.

Cassiodorus, indeed, is a witness that even by the middle of the 6th cent. the text of Jerome's version had become corrupted, and that he did his best to revise it; but as to the extent both of the corruption and of the revision we are in the dark. He speaks at some length on the subject in the *De institutione Divinarum litterarum* (Migne, *Pat. Lat.* lxx. p. 1105 f.), which he composed for the instruction of his younger brethren in the monastery at Vivarium, apparently about the year A.D. 544; he expresses himself anxious that they should study their Bibles in *codicibus emendatis*, tells them that his nine codices, containing all the books of the Old and New Testaments, were revised by him 'sub collatione priscorum codicum,' that Jerome's arrangement of the Prophets into cola and commata had been adopted by him for the rest of the Bible, and that he left them a Greek pandect, or whole Bible, by which, according to Jerome's example, they might correct the errors in their Latin translation. But he gives us no list of current errors or of his own corrections; and all trace of his carefully corrected codices has disappeared. With, however, perhaps one exception: the magnificent Codex Amiatinus of the Bible, though it is of the 8th cent., resembles Cassiodorus' Bible not only in being divided into cola and commata throughout, but also in possessing a quaternon of introductory matter (possibly of earlier date than the rest of the MS) which strongly resembles chs. xii.-xiv. of the *De institutione*; three lists of the books of Holy Scripture occur in each, and the resemblance is of that puzzling nature which stops well short of direct copying and yet suggests very close affinity; all the closer because Cassiodorus tells us that his third division of the books was written 'inter alias (divisiones) in codice grandiore.' It may be, therefore, that in the first eight leaves of the Codex Amiatinus we actually possess part of Cassiodorus' *codex grandior*; though it is more likely that we possess a not very faithful copy of it.*

Large numbers of Italian texts must have been brought to Britain in and after the mission of Augustine, if not earlier; and in the late 7th and 8th cents. the monasteries of Wearmouth and Jarrow were, we know, enriched with copies of the Bible (*Pandectes* or *Bibliothecæ* as they were called) and other MSS obtained from Italy by the exertions of Benedict Biscop and Ceolfrid; from them such MSS as the Codex Amiatinus and the Lindisfarne Gospels were copied. The type of text thus obtained would soon penetrate to Ireland, though as it was perpetuated in the local scriptoria it would gradually become tinged with some of the peculiarities of the traditional Old Latin versions.

But the Bible the Irish thus received from Rome their missionaries carried back in the following centuries to continental Europe, to Gaul, Switzerland, and Germany. The Codex Amiatinus was itself sent to Rome by Ceolfrid as an offering to the shrine of St. Peter. Irish and British monks again settled in foreign monasteries and copied the Scriptures there (cf. Bede, *Hist. Eccl.* iii. 8); and thus the text which had been first modified by British characteristics, was further modified by

the texts of the countries into which it was now brought. We owe to this cause the large number of MSS, mainly of the 9th cent., which were copied in Gaul and Switzerland by Irish scribes, and present a strange mixture of Irish and Continental types, both in text and handwriting.

Meanwhile in Spain a different family of MSS was growing up. Separated off from the rest of Europe, Spain, like Ireland, clung to old traditions and habits; and the Old Latin text preserved in the quotations in Priscillian* lives on in the Spanish Vulgate Bibles. But the Spanish scribes were fonder of interpolations, and of enriching their MSS with marginal notes, and even legendary additions, than the Irish; with the consequence, that while the Irish scribes preserved on the whole a pure type of text—yet mainly in the Gospels, for they rarely copied whole Bibles—the Spanish perpetuated one which was corrupt, and of slight critical value. And as from the north and west the Irish texts moved into France with the missionaries, so from the south the Spanish texts gradually crept in over the Pyrenees, and thus France became the meeting ground of the two opposed types.

The close of the 8th cent. witnessed two recensions of the Vulgate, which, so far as we can see, were founded on these British and Spanish MSS respectively; and, as may be expected, France was the country in which these recensions were made.

Charles the Great took a keen interest in the sacred text and its purity; he was anxious to obtain a uniform standard Bible for Church use, in simple and intelligible Latin, without solecisms.† He accordingly, in the year 797, commissioned our own countryman Alcuin, who was then abbot of St. Martin at Tours, to prepare an emended edition of the Scriptures. Alcuin was familiar with Northumbrian MSS from his youth; he himself was of Northumbrian parentage, and had been educated at York, and it was to that city that he sent for MSS to help him in the performance of his task.‡ As this task was simply to correct the Biblical text by the aid of the best Latin MSS available, without regard to the Greek, we may regard it as fortunate indeed that Alcuin's birth and education should have made him naturally consult just the libraries where the purest texts were preserved. By Christmas A.D. 801 the task was completed, and Alcuin was enabled to present Charles with a copy of the emended Bible. Of existing Vulgate MSS, the famous Codex Vallicellianus is supposed to most nearly represent Alcuin's text (see p. 889).

Simultaneously with this, Theodulf, bishop of Orleans (787–821), was undertaking a revision, though on different lines. Theodulf was a Visigoth, and was born near Narbonne, and the Spanish traditions would therefore be familiar and dear to him; yet he did not simply collect and register Spanish readings. He apparently knew and studied the MSS current in Languedoc and the south of France; § and, collecting together all the texts he knew of, he worked with a considerable amount of prudence, marking the passages he considered suspicious, and honestly endeavouring to arrive at a pure text. Yet his work was uneven; and his habit of inscribing in the margin of his Bible the variant readings he had collected, had the unfortunate result of introducing into

France a whole congeries of corrupt readings from Spain. The best specimen of his revision is the exquisite Bible at Paris numbered Lat. 9380 in the Bibliothèque Nationale. Theodulf's work had a different fate from Alcuin's; it was the private enterprise of a scholar, not a public work undertaken for public utility at the instance of a monarch; and so its influence on the history of the text was (fortunately) slight, whereas Alcuin's was great.

The very favour and reputation which the Alcuinian recension enjoyed, proved indeed the cause of its speedy degeneracy. The demand for Bibles containing it became so large that the resources of the great writing school at Tours must have been severely strained; and the rapidity with which the MSS were copied and multiplied proved fatal to purity of text. They were transcribed hastily and from various exemplars, good and bad; and the large imposing volumes of 'Caroline' Bibles, specimens of which are to be found in almost all our principal libraries, vary indefinitely, from a nearly pure Alcuinian text to one almost worthless.

Very soon therefore after Alcuin's time complaints of the corruption of the text meet us again, the old cry is re-echoed, 'tot exemplaria piene quot codices.' Yet effort after effort was made to arrest the decay. Lanfranc, archbishop of Canterbury, 1069-89, is related by his biographer* to have worked at correcting all the books of the OT and NT, and also the writings of the Fathers, 'ad orthodoxam fidem'; and to have encouraged this study among his pupils: none of his corrected MSS, however, are known to survive. We are more fortunate in possessing the results of the labour of other critics. Stephen Harding, third abbot of Cîteaux (about the middle of the 12th cent.), made a similar revision; and his corrected Bible, in four volumes, is still preserved in the public library at Dijon (MS No. 9^{bis}). He purged the text of a large number of interpolations, partly by collating good Latin and Greek MSS, partly with the aid of some Jewish scholars, whom he consulted as to the suspected passages in the OT; it was in the books of Samuel and Kings that the 'major pars erroris inveniebatur.'† His example was very soon followed by the Cardinal Nicolaus Maniacoria, whose criticisms are preserved in a MS at Venice.‡

With the latter part of the 12th and the 13th cents., however, we are introduced to a new and more organized system of correction. The number of Bibles belonging to these centuries, especially the 13th, testifies to the very large scale on which they must have been copied.§

Almost every library possesses some of these small manuscript Bibles, written in double columns on thin vellum, generally with wonderful regularity and beauty. Paris, according to Roger Bacon (Hody, p. 420 f.), was the city where the greatest business in the copying and selling of these Bibles was carried on, the theologians and booksellers combining to produce a regular and fixed type of text, which he calls the *Exemplar Parisiense*; the demand was large in consequence of the fame of the Paris University in the 13th cent., and the numbers of students who flocked to it. The *Exemplar Parisiense*, however, being hastily and unscientifically prepared, furnished a degenerate type of

text, and Bacon complains bitterly of it.* Efforts were now made to emend it by societies of scholars, who united their labours and researches in the *Correctoria Bibliorum*, as they were called. Here the authority of Latin and Greek MSS was registered in cases of doubtful reading, the testimony of Fathers was quoted, even variants of punctuation were taken account of, and short critical notes were added stating which reading was to be preferred.

The principal *correctoria* are (1) The *Correctorium Parisiense*, prepared probably about A.D. 1236 by the Paris Theologians;† this was in the course of the next twenty years adopted and enlarged by the Dominicans residing at Sens, and possibly authorized by the bishop of that diocese; and it is sometimes called the *Correctorium Senonense* in consequence (possibly to be found in the Paris MS, B.N. 17). Roger Bacon had a poor opinion of the Paris correctors and their work; whether Franciscans or Dominicans, he speaks of them with contempt; the carelessness of the scribes at Paris was bad enough, but the ignorant correctors made things worse; 'quilibet lector in ordine minorum corrigit ut vult, et similiter apud predicatores, et eodem modo scolares (or seculars?), et quilibet mutat quod non intelligit.'

(2) The *Correctorium Sorbonicum*, so called because it is preserved in a Sorbonne MS;‡ varies little from the text of the *Senonense*, and is a sort of collection of more important readings from the earlier *correctoria*.

(3) The *Correctorium of the Dominicans*, prepared under the auspices of Hugo of St. Caro, about 1240, the final corrected form of which is now preserved in the Bibl. Nat. at Paris (Lat. 16,719-16,722): this, like the emendation of Stephen Harding, was an endeavour not so much to recover Jerome's actual text, as to obtain a good working text of the Bible, by the use of Greek or Hebrew MSS.§ The Dominicans thought as little of the *Correctorium Parisiense* as did Roger Bacon, and they discouraged the members of their order from using it.¶

(4) The *Correctorium Vaticanum*, a good MS of which is preserved in the Vatican Library (Lat. 3466): this *correctorium* was the work of the Franciscans, and its author has been very reasonably identified by Vercellone with a 'Sapientissimus homo,' praised by Bacon, who he says had spent nearly forty years in the correction and exposition of the text; Denifle concludes that he was Willermus de Mara.¶ This is the best of the *correctoria*, and has been cited by Bp. J. Wordsworth in his edition of the Vulgate New Testament as *cor. vat.*; the author is not only a good Greek and Hebrew scholar, but has seriously set himself to restore the Hieronymian text.

These remedies were all that could be applied to the Vulgate text before the invention of printing; and, by an unfortunate chance, it was the worst of these *correctoria*, the *Parisiense*, that was made use of by Robertus Stephanus.

With the literary revival of the 15th cent., a natural desire was felt for a more satisfactory text of the Bible, as well as for a multiplication of copies of the sacred book; the great humanist pope, Nicholas v., gave a commission to the scholar Manetti, to translate the NT into Latin; the same pope offered a reward of 5000 crowns for a copy of St. Matthew's Gospel in its original Hebrew.** Naturally, some of the first and principal productions of the printing-press were Latin Bibles. But the Bibles that were taken into the printer's workshops, and from which the early editions were printed, would be the small and handy mediæval MSS described above, like the MSS from which Henricus Stephanus printed the Greek NT, and which are still preserved in the library at Basel; there would be a larger supply of such texts, they would be easier to print from, and if they were spoilt the loss was slight, while few people would have cared to entrust one of the great Alcuinian Bibles, or still earlier pandects like the *Codex Amiatinus*, to the rough usage of the printing-

office. Thus the early printed editions of the Vulgate did little more than perpetuate the current and corrupt form of text; though the copies printed by Froben at Basel seem to have been made with care, and to have enjoyed a European reputation for accuracy;* the present writer has found his Bible of 1502, with the *glossa ordinaria*, preserve a number of good readings, against almost all other early editions.

Space forbids our enumerating the early editions of the Vulgate or examining their history; the student who wishes to do this, may be referred to the sections on the subject in van Ess, Kaulen, Westcott, to Mr. Coppinger's work, to E. Nestle's 'Lateinische Bibelübersetzungen' in *P.R.E.*, to Le Long, *Bibliotheca Sacra* (ed. Maach, 1778-80), vol. ii., to Vercellone, *Var. Lect.* i. pp. xcvi-civ, ii. pp. xxi-xxvi; and, last, not least, to the British Museum 'Catalogue of printed books; Bible, part i.' The following editions at any rate should be borne in mind:—

1. The 'Mazarin' Bible, so called because the copy which first attracted the notice of Bibliographers was found in the library of Cardinal Mazarin; otherwise known as the '42 line' Bible; issued at Mentz between 1452 and 1456, in two vols.; the printing is ascribed to Gutenberg, or to Peter Schoeffer, or to Johann Fust. Its rarity and beauty combine to make it one of the most valuable books in the world.
2. The first Bible published at Rome is dated 1471, and was printed by Sweynheym and Pannartz, 2 vols. fol.; reproduced by Andr. Frisner and Sensenschmit at Nuremberg, 1475.
3. The important Venice edition by Fr. de Halbrun and Nic. de Frankfortia, 1475, fol.; the text is based largely on the Mazarin Bible, while in turn many of the later editions are copied from this.
4. The famous Complutensian Polyglot in six vols. fol., 1514 and following years; undertaken by Cardinal Ximenes, and printed at his expense.† A definite revision of the Vulgate text was undertaken in this edition, partly with the aid of ancient MSS, still more from the Greek; but with only moderate success.
5. The Vulgate Bible of Robertus Stephanus, Paris, 1528, the first genuine attempt at a critical edition: three good MSS were collated for it. This was followed by a larger edition on the same lines, for which seventeen MSS were collated, four of which can be still identified; printed 1538-40, reprinted 1546. This edition is practically the foundation of the official Roman Vulgate; it is cited as 5 in Wordsworth's edition.
6. Parallel attempts at producing a critical text by the aid of MSS and earlier printed Bibles were being made by the Catholic Theologians at Louvain; and John Hentenius in his fine folio edition (Louvain, 1547, and often reprinted) used about thirty-one MSS and two printed copies; it is impossible to identify them now. This edition is cited as 6 by Wordsworth.
7. The small and rare octavo edition of Robertus Stephanus, dated 1555, should be noticed, as it is the first Latin Bible with the modern verse divisions.

The Sixtine and Clementine editions are noticed below.

The output of printed Bibles was very large; during the first half century of printing some 124 editions were published; Vercellone enumerates 179 editions again between the years 1471 and 1599; and, in addition to these, numerous scholars, both Rom. Cath. and Protestant, undertook independent translations of the Bible into Latin, as well as revisions of the Vulgate text. Remembering this, we may be able to realize what a bewildering amount of differing versions were now current, all or any of which might appear to the ordinary reader as the *Editio Vulgata*. Such new translations were made on the Rom. Cath. side by Erasmus, Johannes Rudelius, Aug. Steuchus of Gubbio, Isidore Clarius, Sanctes Pagninus, Cardinal Caietan, and Joh. Benedictus; on the Protestant side by Andr. Osiander, Conr. Pellicanus, Sebastian Münster, Leo Judas (the Zürich version), and Seb. Castellio.‡

All these editions, however, even on the Catholic side, were the undertakings of private individuals; and neither Church nor pope had given to any one the full sanction of their authority. Yet the Council of Trent, in its fourth sitting (8th April 1546), had already taken care to pronounce on the Canon of Scripture, and to enumerate a list of the books it held as canonical (see below, p. 885). Then, in the 'Decretum de editione et usu sacrorum librorum,' pleading the advantage that would accrue to the Church if, out of the many current Latin editions, one should be held as 'authentica,'

* See W. A. Coppinger, *Inenarrabilia Biblica*, London, 1892.

† See Kaulen, p. 314; Scrivener-Miller, *Introduction*, ii. pp. 176-181.

‡ See Kaulen, pp. 318-378; the Zürich version of the Psalms was used in the daily College Service at Christ Church, Oxford, as long as that service was said in Latin.

it proceeded to declare and resolve, 'ut hæc ipsa vetus et vulgata editio quæ longo tot sæculorum usu in ipsa ecclesia probata est, in publicis lectionibus, etc., pro authentica habeatur, et ut nemo illam rejicere quovis prætextu audeat vel præsumat.' It also ordered that 'hæc ipsa vetus et vulgata editio quam emendatissime imprimatur.' Two questions naturally suggest themselves as to this decree: what is the real meaning of 'authentica'? and what was the exact type of text, the 'vetus et vulgata editio,' which was thus designated?

The word 'authentica' seems to have been used and understood not only in the sense of official,* but also in the sense of accurate—at any rate to the extent that there were no mistakes in it which might lead to false doctrine in faith or morals; it was in this sense that scholars like Andreas Vega and Bellarmine understood the word.† No verbal inspiration or infallible accuracy was claimed for it. Scholars might read their Bibles in the original tongues if they wished; but for ordinary use it was advisable to have one standard edition ('authenticam hac mente ut cujus fas sit eam legere sine periculo') instead of a number of independent and unauthorized translations.

In regard to the second question, it is difficult to believe that the Fathers of the Council had in their minds any one particular printed or manuscript copy as the edition 'longo tot sæculorum usu in ecclesia probata';‡ probably they were speaking quite generally, and meant by this expression the Hieronymian text, which they believed to have been fairly transmitted through the Middle Ages, and to have been recognized by the Church and used in her services—as against the bewildering amount of new translations and arbitrarily corrected texts.

Though the Council thus ordered the preparation of an official Vulgate, no immediate action was taken by the Church. John Hentenius, however, a professor at Louvain, undertook the preparation of an edition: this is the edition mentioned above (preced. col., No. 6), and often reprinted. The various Hentenian editions remained for some years as the standard text of the Roman Church, but were still private publications.

Yet the task of preparing an official text occupied the minds of several popes, and under Pius IV. and Pius V. efforts were made at Rome to collect some of the oldest and most valuable MSS obtainable, and a commission was appointed to carry on the work. It was not, however, continuously pursued till the pontificate of Sixtus V. (1585-1590), who pushed forward the revision of the text with great zeal. He summoned afresh the committee of cardinals and scholars under the presidency of Cardinal Caraffa, entrusted them with the task, but worked himself with unwearied diligence at examining the readings and correcting the proofs.§ Old MSS and printed editions were consulted, and, where the authorities were divided, those readings were favoured which agreed with the original Greek or Hebrew. The result was the handsome *Sixtine Edition* of the Vulgate, which appeared in 1590, printed at the Vatican press, and bearing the following title—on the first page: *Biblia Sacra | Vulgatæ | Editionis | tribus tomis | distincta | Romæ | ex Typographia Apostolica Vaticana, | M.D.XC*; on the second page: *Biblia Sacra | Vulgatæ editionis | ad | concilii Tridentini* |

præscriptum emendata | et | a Sixto ·v·P·M· | *recognita et approbata*."

This edition, though nominally *tribus tomis distincta*, is really in one volume, and the paging is continuous throughout; it is cited by Wordsworth as **B**. In text it resembles the Stephens edition of 1540 more than the Hentenian Bibles; but a new system of verse-enumeration was introduced. The inconvenience, however, of a system which differed from one which was almost universal in current Latin Bibles no doubt led to this being dropped in the Clementine edition.

The Sixtine edition was prefaced by the famous Bull beginning with the words: 'Aeternus ille.' This Bull recounted the care with which the pope, and the scholars and divines assisting him, had worked at the preparation of the book—'ita tamen ut Veterem multis in Ecclesia abhinc seculis receptam lectionem omnino retinuerimus'; it was decreed, therefore, that this edition was to be considered as the actual Vulgate, prescribed and pronounced authentic by the Council of Trent, and was to be used in all the Churches of the Christian world, 'pro vera, legitima, authentica, et indubitata, in omnibus publicis privatisque disputationibus, lectionibus, prædicationibus, et explanationibus' (here the Bull goes beyond the decree of Trent, which only asserted that the Vulgate was to be considered authentic 'in publicis lectionibus, disputationibus, prædicationibus et expositionibus'). No future edition was to be published without the express permission of the Apostolic See; nor was any one to print a private or independent edition himself; nor was the Sixtine edition, for the next ten years, to be reprinted in any other place than the Vatican; after that time editions might be printed elsewhere, but must always be carefully collated with the Sixtine edition, 'ne minima quidem particula mutata, addita, vel detracta,' and must be accompanied with the official attestation of the inquisitor of the province, or bishop of the diocese, that this was the case; no variant readings, scholia, or glosses were to be printed in the margin. Persons disobeying these orders, whether editors, printers, or booksellers, were, besides the loss of all the books and other temporal punishments, to suffer the penalty of the 'greater excommunication,' from which they could not be relieved, 'nisi in articulo mortis,' save by the pope himself.†

The Sixtine edition, however, met the fate of most revised versions,—unpopularity amongst the clergy and laity who were used to unrevised texts, —and an order in the Bull that the missals, breviaries, etc., were to be corrected from the Sixtine text, was especially distasteful. Sixtus, too, had offended the Jesuits by placing one of Bellarmine's books‡ on the *Index Librorum prohibitorum*; and Bellarmine, in a letter to Clement VIII., spoke very strongly in condemnation of the Sixtine edition.§ The brief popularity,

* So the British Museum and Bodleian copies. See van Ess, pp. 285, 286 n., also Nestle, p. 20; but the Göttingen copy of the Bible, according to van Ess (whose statement Prof. Nestle confirms), has: *Biblia | Sacra | Vulgata | editionis | Tribus tomis | distincta | Roma | Ex Typographia Apostolica Vaticana | anno* |, on the second page; while the first page has: *Biblia | Sacra | Vulgata | editionis | Sixti quinti | Pont. Max. | Jussu recognita atque edita*. There may then have been more than one edition of the Sixtine Bible; it looks, however, as if the first title had been lost, and then filled up by the binder from the Clementine edition.

A reduced facsimile of the Sixtine title-page is given by P. Fabre, *La Bibl. Vaticane*, p. 59.

† This Bull is printed at length in Thos. James, *Bellum Papale*, London, 1600, and in van Ess, p. 299 f.; the most important parts of it are given in Kaulen, pp. 449-457.

‡ De *omnino Papæ directo*, in which Bellarmine maintained not the direct, but only the indirect, dominion of the pope over the whole world; see *The Pope and the Council*, by Janus, 1899, p. 63.

§ 'Novit beatitudo vestra, cui se totamque ecclesiam dis-

therefore, that attended it is easily intelligible. Sixtus died in August 1590. A number of short-lived popes succeeded him; and in January 1592 Clement VIII. ascended the throne. In the same year all copies of the Sixtine edition were called in, and another official edition of the Vulgate was published from the Vatican press, which has ever since been known as the *Clementine* edition (Wordsworth's **C**). This edition was accompanied by a preface, written by Bellarmine,* which asserted that while the former edition was being printed Sixtus v. had himself noticed many inaccuracies in the printing, and had consequently resolved to recall it and bring out a new edition: he had been prevented by death, but his design was now at length carried out by his successor, Clement VIII.

Yet this attempt to shift the blame from the editors to the printers cannot be justified. The number of misprints in the Sixtine edition is extraordinarily small for a book of such size, and many of them were corrected, either with the pen or by pasting a small slip of paper with the right reading over the misprint, before the book was published.† The real reasons for the recall of the edition must have been partly personal hostility to Sixtus, and partly a conviction that the book was not quite a worthy representative of the Vulgate text. The Clementine text, indeed, differs from it in some 3000 places, and is a return to the type of text found in the Hentenian Bibles. In the critical notes to the Oxford Vulgate the reader will constantly see 5 **B** witnessing for one reading, while 5 **C** witness for another; and on the whole we willingly admit that the Clementine text is critically an improvement upon the Sixtine.

The difficulty of escaping the penalties, so freely denounced by Sixtus on any who should change the least particle in his text, was surmounted by the bold device of printing his name instead of Clement's on the title-page, and so presenting the edition to the world as a *Sixtine* edition.‡ The title is—on the first page: *Biblia | Sacra | Vulgata | Editionis | Romæ | Ex Typographia Apostolica Vaticana* | M.D.XCII |; on the second: *Biblia Sacra | Vulgata | Editionis | Sixti Quinti | Pont. Max. | Jussu | recognita atque edita* |; the engraved border in the second page is the same as in the Sixtine edition.§

A Bull attached to the Clementine edition forbade any copy of the Vulgate to be printed in future without being first collated with the Vatican copy, 'cujus exemplaris forma, ne minima quidem particula de textu mutata, addita, vel ab eo detracta, nisi aliquod occurrat, quod Typographice incuriæ manifeste adscribendum sit, inviolabiliter observetur'; nor were even variant readings to be printed in the margin.

A longer life has been granted to the Clementine Vulgate than was the fate of the Sixtine, and to

crimini commiserit Sixtus v., dum juxta propriæ doctrinæ sensus, sacrorum biblorum emendationem aggressus est; nec satis scio, an gravius unquam periculum occurrerit'; see van Ess, p. 290.

‡ Reprinted in James, *Bellum Papale*, and in van Ess, p. 355 f.

† The number of words thus pasted over is not above forty in the whole Bible; see James, *Bellum Papale*, and van Ess, pp. 331-333. The present writer has discovered only two uncorrected misprints in the Four Gospels; and, indeed, the Sixtine edition was much more carefully printed than the Clementine.

§ The regular form of title in a modern Vulgate Bible—'Biblia Sacra Vulgate Editionis Sixti v. Pont. Max. Jussu recognita et Clementis VIII. auctoritate edita'—cannot be traced at present earlier than 1604; up to that time Sixtus seems to have appeared alone upon the title-page; later, Clement occasionally figures by himself.

§ James (*Bellum Papale*) not unnaturally makes capital out of the differences between the two papal editions; cf. Sixtus Amama, *Anti-Barbarus Bibliicus*, lib. I. c. lxx., Amstelod., 1623. Lists of the variations can be found in James, Amama, Bukentop, *Lux de Luce*, p. 319 f., and Vercellone.

the present day the edition of 1592 remains the standard edition of the Roman Church.* The stern prohibitions of the Papal Bull have succeeded in prohibiting members of the Roman Church throughout the whole world with a fixed and unalterable text of the Sacred Scriptures, but at the cost of suppressing any attempts at a systematic revision in the light of fuller critical knowledge; and by a strange paradox the attempts that have been made in later years to emend the Vulgate text have come mainly from students outside the communion of the Roman Church. Vallarsi, indeed, in 1734, printed an emended text with such MS help as he was able to obtain, not, however, as the Bible, but as the *Divina Bibliotheca* in his edition of the works of St. Jerome. To Bentley's proposed critical edition of the New Testament† the Latin Vulgate was to be a most important help; it being his firm conviction that the earliest MSS of the Vulgate would be found to agree so closely with the earliest Greek MSS that it would be possible 'to give an edition of the Greek Testament exactly as it was in the best exemplars at the time of the Council of Nice, so that there shall not be twenty words, nor even particles difference.' Bentley himself collated a number of English Vulgate MSS for this purpose; his friend John Walker collated still more at Paris in 1719 and the following years, and obtained collations of several Oxford MSS from David Casley. The projected edition, however, came to nought, partly perhaps in consequence of Bentley's advancing years, partly because a more extended and thorough collation of Vulgate MSS did not show that exact agreement with the earliest Greek which he had expected. Bentley died in 1742, and John Walker in November 1741; their collations, however, were preserved, and have proved of considerable value to the Bishop of Salisbury (Dr. J. Wordsworth) in his critical edition. The German scholar, Dr. P. Corssen, of Berlin, has been for some time engaged in research with a view to a critical edition of the Vulgate NT, though hitherto only the Epistle to the Galatians has been published.‡ The Bishop of Salisbury in conjunction with the present writer is also engaged on the same task, and has published the four Gospels with prolegomena; the work is still in progress.

iii. THE NATURE AND METHOD OF JEROME'S REVISION.—The work before Jerome in his edition of the two Testaments varied so widely that we must treat them apart; and, as the NT was published first, it may be advisable to consider it before the OT.

In his letter to Damasus, Jerome describes plainly enough the nature of his revision of the four Gospels. He revised the existing Latin versions by the aid of the oldest Greek MSS he could have access to, making alterations only where the sense of the passage required it.§

Such a revision was no new thing in the history of the Latin versions. We may put aside the question whether what is called the *European* family of the Old Latin texts be an independent version from the *African* family, or an early revision of it

* Naturally enough, the various modern editions do not all represent the Clementine text with absolute or with equal accuracy; the student who wishes to possess an accurate text is advised to obtain the very careful edition published by Vercellone at Rome in 1861, and to note what the editor says in his preface as to the few occasions on which he has deviated from the Clementine edition of 1592: for the NT the edition of Hetzenauer (Oeniponte 1899) is convenient and, so far as we have tested it, accurate.

† His letter to Abp. Wake is dated April 1716, the proposals for printing were issued in 1720; see A. A. Ellis, *Bentley's critical sacra* (Cambr. 1862), p. xii f.

‡ Corssen, *Epistula ad Galatas*, Berlin, Weidmann, 1885.

§ *Ep. ad Damasum*, 'Hoc præsens præfatiuncula pollicetur quattuor tantum Evangelia . . . codicum Græcorum emendata collatione, sed veterum. Quia ne multum a lectionis Latinæ consuetudine discreparent, ita calamo temperavimus, ut his tantum quæ sensum videbantur mutare correctis, reliqua manere paterebatur ut fuerant.'

[see LATIN VERSIONS]. But there can be no doubt that the *Italian* family, represented in the Gospels by the Codices Brixianus (*f*) and Monacensis (*q*), though principally by the former, is a revision of the *European* family, partly in accordance with a different and somewhat later type of Greek MSS, partly in order to give the Latinity a smoother and more even appearance (Westcott and Hort, *Introduction*, p. 79). There can be equally little doubt that Jerome knew of, and valued, this revision, and made it the base of his own: a short examination of a few pages of the Vulgate with the main Old Latin MSS will convince any reader that Jerome's text is in Latinity much closer to the Codex Brixianus than to any other Old Latin MS; Mr. Burkitt, indeed, maintains that *f* is really a Vulgate MS with Old Latin elements that have come in through the Gothic (see *JThSt*, i. 129; and Kaufmann in *Ztschr. f. deutsche Philologie*, xxxii. 305-335).

If, however, we compare the Greek text underlying the Vulgate with that represented by *f q*, we shall see that for the Gospels at any rate it is a return to the older type of MS, especially *κ* and *B*; the tables of readings which, as the present writer believes, demonstrate this, may be studied in the *Epilogus* to the Oxford edition of the Vulgate;* but if the student will examine the *apparatus criticus* of Tischendorf's Greek Testament the same fact will be disclosed to him; time after time † the Vulgate follows the older Latin and older Greek MSS, while *f* and *q* agree with the later. Jerome, indeed, twice in his commentaries quotes with respect the readings of the Greek MSS belonging to Origen; ‡ but the readings in one case agree with and in the other case differ from *κ B*, so that we cannot conclude much as to the nature of their text. Other points have been noticed by scholars, connecting Jerome with the Sinaitic and Vatican texts; in the OT, Mr. Burkitt§ says that Jerome 'in his translations from the LXX in the prophets is generally very faithful to the Vatican text'; and in the Acts the Codex Amiatinus has 70 capitula with corresponding section-numerals in the text, an enumeration which is marked in the margins of both *κ* and *B*, but is otherwise, according to Hort, unknown in Greek MSS and literature; || so that there is a cumulative argument of considerable weight on behalf of Jerome's having made use of manuscripts of this type.

At the same time it is clear that he must have consulted MSS of a type different from anything we now possess. There are instances in the Gospels, few but clear, where he has apparently corrected the reading against all known Greek authorities, as well as against the Old Latin; ¶ and in some of his commentaries he expressly mentions and discusses readings which are otherwise unknown to us. The most striking instances of these latter are, (1) the clause at the end of St. Mark's Gospel (16¹⁴) quoted in the *contra Pelag.* ii.

* *Novum testamentum . . . secundum editionem S. Hieronymi recensuit J. Wordsworth, in operis societatem adiuvante H. J. White*, Oxonii, 1889, p. 660 f.

† e.g. in one chapter of St. Matthew, 6l. 4. 6. 12. 15. 25.

|| Westcott and Hort, *Introduction*, p. 286; Robinson, *Euthaliana*, p. 42 f., Cambr. 1895; Berger, *Hist. de la Vulgate*, etc. p. 357.

¶ e.g. Mt 27⁵⁵ omission of *videntes* or *aspicientes* = *θεωροῦντες* (300); *ff, q, l*, who join in the omission, are mixed texts with a large Vulgate element in them; cf. Mk 6⁵⁷ omission of *abiens* (*ἀνδρῶν*) with *l*; 10⁴³ om. in *vobis* with *l*; Lk 9⁴⁴ in *cordibus vestris* against the Gr. *ἐν τῇ καρδίᾳ* and the Old Lat.; 22⁵⁵ erat *petrus* against the Gr. *ἐστὶν πέτρος* and the Old Lat. *sedeat*; Jn 7⁵² ex *hierosolymis* with *c ff*, against the Gr. *ἐκ τῆς ἱερουσαλὴμ* and the Old Lat.; 8²⁷ *filii* against the Gr. *ἐκ τῆς ἱερουσαλὴμ* and the Old Lat. *seren*; 21¹⁶ *agnos meos* against the Gr. *τὰ ἀγνῶστα μου* and the Old Lat. *ovēs meas*.

15, as occurring 'in quibusdam exemplaribus et maxime in grecis codicibus';* (2) the discussion on Jn 10¹⁰ in the Commentary on Ezk 46, where Jerome says, 'et fiet unum atrium et unus pastor: hoc enim græce αὐτῆς significat, quod latina simplicitas in ovile transtulit'; all existing Greek MSS read not αὐτῆς but ποιμῆν here, and the Old Latin have unus (or una) grex. The careful student will detect other cases; but enough has been given, we believe, to make it clear that Jerome's Greek MSS were partly of the type so highly esteemed by Hort, partly of a type which has since disappeared.

The other books of the NT may be more summarily considered. In the Acts of the Apostles, the oldest MSS, such as Amiatinus and (less frequently) Fuldensis, agree in text with NB and AC;† in the Epistles, the revision was much more hasty, and very possibly was made with but slight, though with some, regard to the Greek;‡ such is also the opinion of Dr. C. R. Gregory,§ who says of the work outside the Gospels, 'Ceteri vero Novi Testamenti libri annis ut videtur proximis vel etiam proximo anno recensiti non tam diligenter emendati sunt; recensio horum textus nova vix præbet novas lectiones e Græco ductas sed solas elocutiones politiores atque cultiores Latinas.'

The textual criticism of the Vulgate NT is one of the most complicated problems facing modern scholars. The reader will, however, have gained from the section above on the history of Jerome's translation after his own death, a fair amount of information as to the relative value of different groups of MSS. The vast majority of 13th and 14th cent. MSS may be put aside as comparatively worthless, and it would be easy enough for any student to compile—say from the Oxford edition of the Gospels—a list of readings the presence of which in a late MS would be quite sufficient evidence that it was only reproducing the current and valueless mediæval type of text. He will also have learnt the interest of the MSS containing the Theodulian recension, the very varied types of text presented by the Alcuinian Bibles, and the mixture of French and Irish elements in the 8th and 9th cent. MSS, written in France by Irish or Northumbrian scribes. It is not very hard, therefore, to arrange our MSS in groups, as has been done in the lists at the end of this article; but to go further and apply to them a genealogical as well as a geographical classification is what the present writer at any rate has not yet found himself able to do. The grounds on which in the Gospels the early Northumbrian MSS such as AASV, the 6th cent. Fuldensis (F), and Ambrosianus (M), and the first hand of the Hubertianus (H*), have been preferred to other MSS, have been set forth at some length in the *Epilogus* to the Oxford edition of the Gospels (pp. 708-732). F and M are two of the earliest existing Vulgate MSS; and the whole group seems to offer strong internal evidence of preserving a pure type of text. The MSS forming it show less trace than others of mixture from Old Latin sources; they agree more closely with the Greek text of NBL, and we have seen it to be probable that

Jerome partly modelled his revision on MSS of this type; they are free from the numerous small additions, amplifications, conflations, etc. which are commonly found in later MSS, and may fairly be regarded as the marks of a degenerate text even when they are found in an early MS, such as the Harley Gospels (Z). Yet all the MSS of the Vulgate NT are so spoiled by mixture, that it is impossible to select one MS or group and follow its readings throughout. There are cases both in the Gospels and in the Acts where one group must be clearly followed in one verse and as clearly rejected in the next, there are others where an obvious clerical error, or a conflate reading, has been perpetuated in every known Vulgate MS; no MS or group seems to preserve a consistent type of text. Still there is here an excellent opportunity for the student; and it may be possible in time to do for the MSS of the Vulgate something analogous to what Westcott and Hort have done for the MSS of the Greek text.

Jerome's work on the OT stands on different ground from his work on the NT; here it was not an emended translation in the light of better MS authority, but a completely new version made direct from the Hebrew, where the text was, as he thought, in a fairly even and satisfactory condition, compared with the confusion shown by the LXX. Jerome does not seem to have imagined the possibility of variation to any serious extent in the Hebrew MSS, though he tried to procure the best that were attainable (*Ep.* xxxvi. 1, *ad Damasum*; *Præf. in Paralip. iuxta LXX*). He talks in general terms of the 'Hebrew,' the 'Hebraica veritas,' etc.; nor does the text used by him seem to differ largely from the Massoretic text which has been handed down to the present day.* Yet it is not quite identical;† and as it is practically certain that the copies he used did not possess the vowel points, it is but natural that his interpretation of the consonants should occasionally differ from that adopted by the Massoretes.

Jerome's version, again, was not the first that had been made direct from the Hebrew; he could consult not only the LXX, but also the independent translations of Aquila, Symmachus, and Theodotion; and indeed in the Bk. of Daniel the version of Theodotion was that generally used in the Church.‡

His method of translating the OT he describes to us in the preface to his *Comment. in Ecclesiasten*: though he is only referring to that book in his preface, there is no doubt that he is describing his general practice. He worked with the Hebrew text, translating it directly, according to the best of his power and knowledge, with such help as he could obtain from the Jewish Rabbis and their traditional methods of interpretation; he tried to be conservative, and to keep to the lines marked out by the LXX ('de Hebræo transferens magis

* Kaulen, p. 166; Westcott, p. 1714; the latter says of Jerome's work that it is 'a remarkable monument of the substantial identity of the Hebrew text of the 4th cent. with the present Masoretic text'; and with regard to the Bks. of Samuel, Wellhausen speaks even more strongly in the same direction, *Der Text d. Bücher Samuels*, Göttingen, 1872, p. 3, Ann. 2.

† Nowack, *Die Bedeutung des Hier. für die alttest. Kritik*, Göttingen, 1875, asserts that the identity is not complete, and that in many cases Jerome follows the Greek translators, or Chaldee, or Syriac, whilst in some variant readings he stands quite alone; similarly H. P. Smith, 'The Value of the Vulgate Old Test. for Textual Criticism,' in the *Presbyterian and Reformed Review*, April 1891, notes that in a number of cases Jerome's text varies from that of the Massoretes, and even where it simply shows agreement with the Greek it is not always dependent upon it; again, 'it has in a number of cases readings agreeing with the Syriac where the derivation of one from the other is unlikely; it shows besides a number of variants in which it stands alone.'

‡ *Præf. in Dan.*: 'Danielum prophetam iuxta LXX interpretes Domini Salvatoris ecclesie non legunt, utentes Theodotionis editione; et cur hoc acciderit nescio.'

* It runs: 'Postea quum accubissent undecim apparuit eis iesus et exprobravit incredulitatem et duritiam cordis eorum quia his qui viderant eum resurgentem non crediderunt. Et illi satisfaciebant dicentes seculum istud iniquitatis et incredulitatis substantia (Cod. Vat. sub satana) est quæ non sinit per inmundos spiritus veram dei apprehendi virtutem. Idcirco jam nunc revela iustitiam tuam'; cf. Resch, *Agrapha*, p. 456 (*TU* v. 4).

§ In the third volume (Prolegomena) to Tischendorf's *Novum Test. Græce*, ed. 3, Leipzig 1894, p. 971.

me LXX interpretum consuetudini coaptavi, in his dumtaxat que non multum ab Hebraicis discrepabant'; he did not disdain to incorporate parts of the Old Lat. versions,* and he also made use of the translations of Aquila, Symmachus, and Theodotion, so as to observe the mean between excessive novelty and slavish adherence to ancient errors;† and his aim in translating was to represent the sense of the original rather than strain after literal exactness (*Ep. lvii. ad Pammachium*; *cvi. ad Suniam et Fretellam*). Such, at least, was his general practice: 'non verbum e verbo, sed sensum exprimere de sensu.' He professes to be more careful in the Holy Scriptures 'ubi et verborum ordo mysterium est,' and where 'in verbis singulis multiplices latent intelligentiæ' (*Ep. liii. ad Paulinum*); yet he shows with such obvious satisfaction that the apostles and evangelists in their interpretation of the OT sought after 'sensus . . . non verba, nec magnopere de ordine sermonibusque curasse dum intellectui res pateret,' that we may well imagine that in his own translation, even of the Bible, he would be much less literal than he thought he was.‡ An examination of his translation, such as has been made by Kaulen (p. 169 f.) and Nowack, verifies this expectation. It is the work of a good, though by no means immaculate or scientific Hebrew scholar, aiming at the sense rather than at the words of the original. Occasionally in translating he shows traces of the influence of Rabbinical tradition;§ occasionally, on the other hand, he inserts a Messianic meaning in the translation where the original does not bear it;|| and he is fond of interpreting Hebrew proper names, thereby reversing the practice of the LXX translators, who frequently solve the difficulty of a hard Hebrew word by simply transliterating it in Greek characters; a few amplifications are found where the verse seems to need them;¶ in other cases the pleonastic Hebrew is compressed in the Latin.**

The translation, too, varies in the different books; some were translated with the utmost care, some were finished in extraordinarily short time. In the *Prologus Galeatus* Jerome speaks of the diligence he had bestowed on the Bks. of Samuel and Kings,†† and Kaulen ranks his translation of the historical books as his best work,‡‡ and after them Job and the prophetic books. Proverbs, Ecclesiastes, and Song of Songs are carefully rendered, notwithstanding the short time that was directly spent on them; but Judith and Tobit, which were translated in great haste, show more dependence on the Old Latin version. In spite of this occasional unevenness, then, we may confidently assert that the general standard of the translation is a very high one; and we may gladly echo the words of the 'translators to the reader' in our own AV, that Jerome performed his task 'with that evidence of great learning, judgment, industry, and faithful-

* G. Hoberg, *De S. Hieronymi ratione interpretandi*, Bonn, 1836, p. 36.

† See Nowack's essay, quoted above, and Driver, *Notes on the Heb. Text of the Bks. of Sam.* (Oxford, 1890), p. liv f., who notices that Jerome was especially prone to be guided by Symmachus, and that, where the Vulgate exhibits a rendering which deviates alike from the Hebrew text and from the LXX, the clue to its origin will generally be found in one or other of the Greek translations, especially in that of Symmachus. In the Preface to the *Comment. in Ecclesiasten*, Jerome frankly says, 'interdum Aquilæ quoque et Symmachi et Theodotionis recordatus sum.'

‡‡ Kaulen, p. 179; Hagen (*Sprachliche Erörterungen zur Vulg.* p. 8) praises also the Pentateuch highly.

ness, that he hath for ever bound the Church unto him in a debt of special remembrance and thankfulness.'

It must be remembered that the Latinity of the Vulgate is thus partly that of the Old Latin; and, even where Jerome was translating anew, he probably modelled his style, perhaps unconsciously, on that of the older versions. The Latin of those versions was the Latin of ordinary popular conversation, the old 'lingua rustica' with all its archaic characteristics, spoken not simply by the lower classes, but generally, even in Rome and amongst the higher classes; different, of course, from the classical Latin of literature, but at the same time not simply confined to Africa in its popular use, as some writers seem to imagine. Nor, again, do we get this Latin in its natural form; anxiety to reproduce the original as accurately as possible has led to the introduction and preservation of numerous Græcisms and Hebraisms in the translation; and we hardly ought to deplore this when we reflect how this literalism has revealed to the Western world the matchless beauty and power of Hebrew. The Latin of the Vulgate is therefore at once artificial and archaic, and yet forcible, clear, and majestic.*

The textual criticism of the Vulgate OT is, alas! still in its infancy. Heyse and Tischendorf published in 1873 a collation of the Codex Amiatinus throughout the OT;† and Vercellone has furnished valuable material for the Pentateuch and historical books in the mass of variant readings collected and arranged in his two volumes of 'Variæ lectiones.'‡ H. P. Smith§ has devoted some attention to examining and classifying the MSS whose readings are there quoted, with the result of awarding a higher place to the Codex Amiatinus in the OT than even in the NT: he maintains that for a recovery of Jerome's original it is of the first importance, and that any critical edition would have to be constructed on the basis of the Amiatine MS and other MSS belonging to the same group; P. Thielmann has collected a useful amount of material for Wisdom, Sirach, etc. (see Literature, p. 890), and is preparing a critical edition of those books.

iv. HISTORY OF THE NAME. —For us, as to the Fathers at the Council of Trent, the term *vulgata* — properly *vulgata bibliorum editio*, *vulgata bibliorum interpretatio*, *biblia vulgata* — has one meaning, and one meaning only; it means the common authorized Latin version of the Holy Scriptures, translated or edited by Jerome. Yet the expression is older than Jerome's time, and he himself frequently employs it of an edition already in use. It is used primarily in early Latin writers not of a Latin version at all, but of the Greek version of the Septuagint,¶ and so is equivalent to the term *κοινή εκδοσις*, by which that translation was known; ** as, however, the LXX was already familiar to Western Europe in the various Old Latin translations which had been made from it, the term *editio vulgata* would naturally be applied to these; though, as Westcott says, there does not seem to

§ 'The Value of the Vulg. Old Test. for Textual Criticism,' in *Pres. and Ref. Rev.*, April 1891, p. 224 f.

¶ All that can be said on this question seems to be collected in van Ess, p. 24 f.; Kaulen, p. 17 f.; and Westcott, p. 1689.

¶ See the passages in van Ess, Kaulen, and Westcott; especially Jerome, *Comm. in Isa.* lxxv. 20, 'Hoc juxta LXX interpretes diximus, quorum editio toto orbe vulgata est'; and, in any Vulgate Bible, the notes after Est 103 111 126 1419; also Augustine, *De Civ. Dei*, l. xvi. c. 10, 'Fuit anni a diluvio usque ad Abraham MLXXII. secundum vulgatam editionem hoc est interpretum Septuaginta.'

** See the quotations from Origen and Basil in van Ess, p. 25.

be any instance in the age of Jerome of the application of the term to the Latin version without regard to its derivation from the Greek.*

From being applied to the current version of the LXX, *vulgata editio* would be opposed to the emended text of Origen's *Hexapla*,† and so the term acquires the meaning of a corrupt as opposed to an emended text; and in this sense Jerome uses the term interchangeably with *vetus, antiqua editio*,‡ the very term with which it is now so sharply contrasted.

When Jerome is referring to Latin versions of the Scriptures, he rather uses the terms in *latino, latinus interpres, apud latinos*; and, when speaking of his own, *nos, nostra interpretatio*. As his translation gradually superseded the earlier versions made from the LXX, it was inevitable that the expression which had been applied to them would ultimately pass over to him; but the process was a slow one. The instances given in van Ess, and more fully in Hody,§ show that even down to the Middle Ages *vulgata editio* was at any rate occasionally used to designate the LXX; while the usual terms by which Jerome's translation was known were *translatio emendatio* [recens, nova, posterior, Hebraica], *translatio quam tenet* [quam recipit], *Romana Ecclesia*, etc., and most of all, from Bede's time onward, *editio nostra, codices nostri*. Roger Bacon|| seems to be the first scholar who uses the term *Vulgata* in its modern sense, though he also applies it frequently to the Septuagint.

V. MAIN DIFFERENCES BETWEEN THE LATIN AND THE ENGLISH BIBLE.—It may be asked, in what way does the Vulgate Bible differ from our own Authorized Version? Putting aside variations of rendering and reading, the differences are in the number of books or portions of books received into the Canon, the order of books, and the numbering and division of the chapters. These differences are entirely in the OT; in the NT the order of books is the same (though the Council of Trent¶ in its list of books places the Ep. of James after those of John), and the 'Ep. to the Laodiceans,'** though found in many Vulgate MSS, is absent from the best, and from the official printed text. Many MSS indeed vary in the order of the books, and the Cath. Epp. often immediately succeed the Acts; but this order has not been adopted in the Clementine text.

The books in the OT are: Genesis, Exodus, Leviticus, Numeri, Deuteronomium, Josuae, Judicum, Ruth, Quatuor Regum, Duo Paralipomenon (i.e.

* Jerome, for instance, in quoting the text of the LXX, occasionally translates its reading into Latin instead of writing it down in the Greek, and here too speaks of it as *editio vulgata*; but it is the Greek reading, not the Latin translation of it, which he is referring to: see especially *Comm. in Matt.* xiii. 35, 'Legi in nonnullis codicibus . . . in eo loco ubi nos posuimus et vulgata habet editio ut impleteretur quod dictum est per prophetam dicentem, ibi scriptum, per Isaiam prophetam dicentem; and *Comm. in Gal.* v. 24, 'Et hoc ita admonitum sit, si vulgatum editionem sequimur legentes: Qui autem sunt Christi carnes crucifixerunt cum vitis et concupiscentiis,' but see the whole passage. Van Ess (p. 41) seems to be quite right in maintaining that even here Jerome means the Greek by the *editio vulgata*.

† Jerome, *Ep.* cvi. 2.

‡ *Comm. in Osee* xiii. 4, 'Quæ . . . in antiqua quoque editione LXX non leguntur'; *Ep.* xlix. (*ad Pammach.*) 'Veterem editionem (libri Job) nostra translationi compara'; *Comm. in Isa. prof.* ad cap. liv.; *prof.* in *Josue*, etc.

§ P. 402 f.

|| See Hody, pp. 420, 429, 'Textus est pro majori parte corruptus horribiliter in exemplari vulgato, hoc est Parisiensi; by this he seems to mean the type of text which was produced and sold in Paris; elsewhere (p. 425) he uses *vulgata* of the LXX, or its Latin representative, as opposed to Jerome's translation, 'Quare cum translatio Ieronymi evacuat translationem vulgatam LXX et similiter Theodotionis, ut certum est omnibus, oportet quod Biblia qua utimur sit translatio Ieronimi,' etc.

¶ Sess. iv. *Decretum de Canonicis Scripturis*.

** For this apocryphal letter see Lightfoot, *Colossians*, pp. 274-300; also Westcott, *Canon of the NT*, App. E, p. 580.

Chronicles), Esdræ primus et secundus, qui dicitur Nehemias, Tobias, Judith, Esther, Job, Psalterium Davidicum centum quinquaginta Psalmorum, Parabola, Ecclesiastes, Canticum Canticorum, Sapientia, Ecclesiasticus, Isaias, Jeremias cum Baruch (Lamentations is included under Jeremiah in the Tridentine list, though printed separately as 'Threni' in the Bible), Ezechiel, Daniel; duodecim Prophetæ minores, id est: Osea, Joel, Amos, Abdias (i.e. Obadiah), Jonas, Michæas, Nahum, Habacuc, Sophonias (i.e. Zephaniah), Aggæus (i.e. Haggai), Zacharias, Malachias; Duo Machabeorum, primus et secundus. The order of books, it will be seen, is the same as in an English Bible, except that the books which we count apocryphal (and which are printed in the above list in italics) are with us placed at the end; the sequence of books, however, is the same in our 'Apocrypha,' save that we insert the two additional books of Esdras and the Prayer of Manasses, which are not mentioned in the Trent list, but form in the Clementine Vulgate an appendix to the Bible, headed by the note 'Oratio Manassæ, necnon libri duo, qui sub libri tertii et quarti Esdræ nomine circumferuntur hoc in loco, extra scilicet seriem canonicorum librorum, quos sancta Tridentina synodus suscepit, et pro canonicis suscipiendos decrevit, sediti sunt, ne prorsus interirent, quippe qui a nonnullis sanctis Patribus, et in aliquibus Bibliis latinis tam manuscriptis quam impressis reperiuntur.' See also art. APOCRYPHA in vol. i. esp. p. 115 f.

With regard to differences of amount contained under the title of this or that book, or the arrangement of matter in it, the following should be noticed. In most of the books of the OT the only difference found is an occasional variation in the versing, the last verse in a chapter being split up into two, and so on; these are too unimportant to notice. It should be remembered that in its numeration of the Commandments the Vulgate Bible includes our second commandment in the first, and divides up the tenth into two, thereby preserving the full number of ten; this division is also employed by the Lutherans: see DECALOGUE.

The Bk. of Esther in the Vulgate contains the additional chapters, which with us are printed separately in the Apocrypha after Judith. The later chapters of Job are arranged differently from the Authorized Version, though the amount contained is the same: ch. 39 contains 35 verses against 30 of AV, and consequently finishes at 40^o of AV, and 40¹=our 40^o; and as this contains 28 verses against our 24, the chapter finishes at 41^o of AV, and 41¹=our 41¹⁰; but as 41 in the Vulgate has only 25 verses against our 34, the difference ends there, and 42 begins in the Vulgate in the same place as in the AV.

The variation in the Psalms is perhaps the most puzzling. The Vulgate follows the Hebrew in counting the title, where there is one, as the first verse of the Psalms, so that the versing is in these Psalms one verse ahead of AV. Pss. 9 and 10 form one Psalm in Vulgate, so that AV is one Psalm in front of the Vulgate for nearly all the rest of the Psalter, e.g. 11 AV=10 Vulg. etc.; Pss. 114 and 115 forming also one Psalm in Vulgate (i.e. 113), the AV is now two in front of the Vulgate; but as 116 AV consists of two Psalms in Vulgate, 114 and 115 (which begins at v.¹⁰ 'I believed, therefore have I spoken'), it does not keep so for long; finally, 147 AV also consists of two Vulgate Psalms, 146 and 147 (which begins at v.¹² 'Praise the Lord, O Jerusalem'), so that 148, 149, 150 are the same in each.

In Lamentations ch. 5 of AV appears in the Vulgate as a separate book, under the title of 'Oratio Jeremie prophetæ.'

In Daniel at 3rd follow the additions which are

printed in our Apocrypha after Baruch as 'the Song of the three Holy Children'; the versing is different, being ²⁴⁻³⁰ instead of ¹⁻⁶⁸, so that 3rd AV = 3rd Vulgate, which numbers in all 100 verses to the chapter, and runs into 4th chapter 4th Vulgate beginning at 4th AV but finishing at the same verse (³⁴ Vulg. = ³⁷ AV); the other apocryphal additions are found at the end of the book, the story of Susanna forming ch. 13, and Bel and the Dragon ch. 14.

vi. MANUSCRIPTS OF THE VULGATE.—Anything like a complete enumeration of the Vulgate MSS in Europe would be out of the question; there are thousands, not only in the public libraries, but in private libraries and collections. Berger has examined more than 800 in the libraries of Paris alone; and it is estimated that the total number cannot be less than 8000. Nor would a complete enumeration, even if possible, be of much use to the student; the majority are late 13th and 14th cent. MSS, of very slight critical value, and probably all presenting the corrupt type of text about which Roger Bacon used such strong language.

The lists may be consulted which have been drawn up by Le Long, *Bibliotheca Sacra*, ed. 1723, vol. i. p. 234 f.; Vercellone, *Variae lectiones*, Romæ, 1860, vol. i. p. lxxxiii f., ii. p. xvii f.; in the fourth edition of Scrivener's *Introduction*, vol. ii. p. 67 f., the present writer has drawn out a selected list of 181 manuscripts, mainly of the NT; Berger (*Histoire de la Vulg.* etc. pp. 374-422) gives a good list of 253 MSS; and the largest list yet published is that of Dr. Gregory in the third volume of Tischendorf's *Novum Testamentum Græce*, ed. viii. pp. 983-1108, where some 2270 MSS are enumerated; they are not, however, described with the detail that characterizes M. Berger's list. We have endeavoured here to draw up a list of the more important Vulgate MSS, arranged, according to the type of their text, as sketched out in the history given above. The student can thus, if he wishes, test our theory of the transmission and modification of the text by his own collations; and if he examines other MSS not mentioned in the list, he can determine more easily in which class to place them.

Our list is based mainly on the materials supplied by Berger. The reader will bear in mind that the classification can be only approximate, and that there are MSS which it will be difficult to assign exclusively to this or that group; and indeed the earliest MSS on the list are among those which it is difficult to class, though we may venture to describe them as *early Italian texts*; after them we may place the *early Spanish texts*, and then the other families in due course. The Roman numerals in square brackets signify the centuries to which the MSS are usually assigned.

I. EARLY ITALIAN TEXTS.—*Codex Fuldensis* of the NT, at the Abbey of Fulda in Prussia [vi]; written for Bp. Victor of Capua, and corrected by him A.D. 541-546. The Gospels are arranged in one narrative, based on the order of Tatian's Diatessaron, but the text has been altered to the Vulgate throughout; in the Epp. Laodiceans follows Colossians. Published by E. Ranke (Marburg, 1808). Cited by Tischendorf as *fuld*, by Wordsworth as *F*.

The *Milan Gospels*; Ambrosian Library, C. 39 Inf. [vi]; uncial; the sections and canons in the margin are written in Greek characters, while certain peculiarities of spelling and of reading also suggest that the scribe had a Greco-Latin MS before him. Defective in parts. Wordsworth's *M* in Gospels.

Codex Forojuliensis, at Cividale, Friuli: Gospels [vi or vii], Matt., Luke, and John are at Cividale in Friuli; these were published by Bianchini, *Evangelium Quadruplex*, etc., tom. ii. app. p. 473 f. (Romæ, 1749). The latter part of Mark (12th-16th) is at Prague, and was edited by J. Dobrowsky, *Fragmentum Præsenne* (Pragæ, 1778); the earlier part is at Venice, but in a wretched condition, and illegible. Tischendorf's *for* and *prag*, Wordsworth's *J*.

Codex Perusinus; part of Lk (11-127, much mutilated), in a purple MS, Chapter Library, Perugia [vi or more probably vii]. Published by Bianchini, *Evan. Quadr.* tom. ii. app. p. 562; Tischendorf's *pe*, Wordsworth's *P*.

The *Harley Gospels*, Brit. Mus. Harl. 1775 [vi or vii], in a small but beautiful uncial hand, written probably in Italy: the first hand omits the text Jn 54. Tischendorf's *harl*, Wordsworth's and Bentley's *Z*.

II. EARLY SPANISH TEXTS.—Leon, Cathedral Archives 15 [vii]; a palimpsest MS, containing 40 leaves of a Bible in 7th cent. hand, i.e. portions of Ch, Jer, Eek, 1 Mac, Ac, 2 Co, Col, 1 Jn. The text is Vulgate at base, especially in Jer, Ac, and Pauline Epp.; in other portions mingled with Old Lat. elements and characteristic Spanish interpolations; the 'three heavenly witnesses' occurs 1 Jn 57. See Berger, pp. 81, 384.

The *Ashburnham Pentateuch*, or, more strictly speaking, the Pentateuch of St. Gatien of Tours: now at Paris, Bibl. Nat., *Nouv. acq. Lat.* 2334. A splendid MS, with interesting pictorial illustrations [vii or beginning of viii]; uncial writing; a good Vulgate text. The Palæographical Soc. (l. pl. 234) ascribe the MS to North Italy, but Berger (pp. 11, 12, 410) makes out a strong case, mainly from the nature of the illustrations, for Spain.

Codex Cavensis; Bible [ix probably] written in Spain, probably in Castile or Leon, in small, round, and beautiful Visigothic minuscules, by a scribe Danila; now in the Benedictine Abbey of Corpo di Cava, near Salerno: a copy of it was made early in this century by the Abbate de Rossi, and is in the Vatican (Lat. 8484). The text is Spanish, and in the Gospels shows signs of being a revision; occasionally it is mingled with Old Latin elements; it contains 1 Jn 57 after 58. Before the Pauline Epp. there is the 'Proœmium sancti Peregrini episcopi,' and the canons of Priscillian; after the Apocalypse there is an incomplete *Psalterium ex Hebræo*; the *Psalter* in the body of the MS is Gallican, but with numerous Old Latin marginal variants; see Berger, pp. 14, 15, 379. Tischendorf's *cav*, Wordsworth's *C*.

Codex Toletanus; Bible, Visigothic writing (probably viii), in the Nat. Libr. at Madrid. Characteristic Spanish text, with numerous interpolations; has the text 1 Jn 57 in same place as *Cavensis*, but in the Gospels does not present such a good text as that MS. Collated for the Sixtine revision by Chr. Palomares, whose work is preserved in the Vatican (Lat. 958); the collation, however, was not used in that revision, as it reached Card. Caraffa too late. It has been published by Bianchini, *Vindiciæ Can. Ser.* pp. xlvii-ccxvi (Romæ, 1740), and reprinted by Migne, *Pat. Lat.* tom. xxix. p. 875 f. Tischendorf's *tol*, Wordsworth's *T*; see Berger, p. 12.

Madrid, University Library, No. 32; second volume of a magnificent Bible, in Visigothic hand [ix or x], containing Proverbs-Apocalypse. The ornamentation occasionally resembles the *Codex Cavensis*; the Pauline Epp. are headed by the Canons of Priscillian and the proœmium *Peregrini*; see Berger, p. 15.

Codex Amilianus, at Madrid, Royal Academy of History, F. 186. Bible [x], incomplete, and commencing in the middle of the *Psalter*; in the NT Laod. is written by the second hand, in the margin. The first hand resembles *Cavensis*, though it is somewhat larger; the writer's name is given as Quisius. The MS formerly belonged to the Abbey of St. Amilianus (St. Millan de la Cogolla), between Burgos and Logroño; see Berger, p. 16.

Leon, Cathedral Archives, 6; second volume of a Bible [x], beginning at Isaiah; the NT has the Canons of Priscillian and the proœmium *Peregrini* after the Acts, and contains Laod. The writing resembles *Cavensis*, but is somewhat larger; the names of two scribes—Yimara, a presbyter, and John, a deacon—are given; see Berger, p. 17.

Codex Gothicus Legionensis, preserved in the Church of San Isidro at Leon; Bible [x], folio, dated A.D. 960, and written by the notarius Sanctio. The MS has belonged to the Church of San Isidro since the 12th cent., and was collated for Cardinal Caraffa by Fr. Trugillo, bp. of Leon, for the Sixtine revision, and by him called the *Codex Gothicus*. The collation is preserved in the Vatican (Lat. 4539). There are a large number of Old Latin variants in the margin, especially in the OT; and Tobit and Judith are in the Old Latin throughout; see Berger, p. 18; he has printed the Old Latin variants in the Bk. of Job in *Notices et extraits des MS de la B. N.* etc., tome xxxiv. 2^e partie, p. 201. (Paris, 1893).

Codex Complutensis (i.e. belonging to Complutum = Alcalá), Madrid, University Library, 31. Bible [ix or x], interesting text; Ruth is Old Latin, agreeing closely with quotations in Ambrose; the 4th book of Esdras is also preserved in an interesting text, with variant readings in the margin; Esther, Tobit, Judith, 1 and 2 Mac, are also in an Old Latin version. In the NT the text is Vulgate, but with Spanish characteristics; Laodiceans follows *Hebræus*. Ruth and parts of Maccabees have been published by Berger in the *Notices et extraits*, mentioned above, pp. 8-12, 33-38; see also his *Histoire*, p. 22.

Paris, Bibl. Nat., Lat. 6. Bible in four vols. folio [x.], from the Abbey of Rosas in Catalonia. Tobit and Judith are preserved not only in the Vulgate, but also in the Old Latin; and there are interesting Old Latin and other variants in the margins of the Acts, while Ac 11-129 is entirely Old Latin; see Berger, p. 24. Wordsworth's *R* in Acts.

III. ITALIAN TEXTS TRANSCRIBED IN BRITAIN.—(a) *Northumbrian MSS.*—*Codex Amiatinus* of the whole Bible, in the Laurentian Library at Florence (beginning of viii). One of the three *Pandects* written, either at Wearmouth or Jarrow, by order of the Abbot Ceolfrid. He took it as a present to the pope on his last journey to Rome in A.D. 715, but died before he reached the Holy City, and his followers carried on the volume and offered it to the chair of St. Peter. The date and origin of the MS have been thus fixed by the successful deciphering of an erased inscription on the first leaf; see the Palæographical Society's *Facsimiles*, ii. pls. 65, 66, and *Studia Biblica*, ii. p. 273

(Oxford, 1890). Later, the MS was placed in the Monastic Library at Monte Amiata, whence it was sent to Rome for use in the Sixtine revision. Finally, it was placed in the Mediceo-Laurentian Library at Florence. The NT was published in full by Tischendorf (Leipzig, 1850; second ed. with a few emendations, 1854); and in 1873 Heyse and Tischendorf edited the *Biblia Sacra Lat. Vetus Test. Hieronymo interprete*, printing the Clementine text of the OT, but dividing it according to the 'cola and commata' of *am*, giving a collation of its variant readings, and printing in full the *capitula* to the various books, which are found in Amiatinus, but not in the Clementine Vulgate; Lagarde has published Wisdom and Sirach, see vol. iii. p. 51.

The text of the MS in the NT, and especially in the Gospels, is a very pure Vulgate type on the whole, though with the characteristics of British MSS in it; see the Oxford *Vulgate*, i. pp. 709, 726-732. In the OT it is also good, but in Ecclesiastes and Ecclesiasticus Old Latin elements have crept in; see Berger, p. 33. Tischendorf's *am*, Wordsworth's A.

Durham Cathedral Library, A. ii. 16; Gospels [vii or viii], said to have been written by Bede, and may very possibly have come from Jarow. The text is very close to that of Amiatinus, but where it varies Amiatinus is usually the better. Bentley's K, Wordsworth's Δ (in St. John only; in the other Gospels it is not cited).

Do., A. ii. 17; St. John, St. Mark, and St. Luke, incomplete [viii], with another fragment of St. Luke, 2138-2334; large uncial hand, and both text and handwriting closely resemble Amiatinus, though the orthography is occasionally different; see Berger, p. 33.

Stonhyhurst St. John. The minute but exquisitely written MS of St. John, now in the possession of the Jesuit College at Stonhyhurst (vii or viii); originally, according to a legend as old as the 13th cent., the property of St. Cuthbert, in whose coffin it was found. The text closely resembles Amiatinus, but is on the whole not quite so good. Wordsworth's S in St. John.

British Museum, Cotton Nero D. iv. The superb *Lindisfarne Gospels* (vii or viii), written by Eadfrith, bp. of Lindisfarne, A.D. 693-721, and other scribes. The Latin is accompanied by an interlinear version in the Northumbrian dialect. The text very closely resembles that of Amiatinus, agreeing with it sometimes even in errors; but, as with the MSS mentioned immediately above, where the two differ, Amiatinus usually has the better text. The MS from which these Gospels were copied must have come from Naples; Dom G. Morin (*Revue Benedictine*, 1891, t. viii. p. 481) has pointed out that at the beginning of the Gospels there are lists of festivals and saints' days, among which appear names peculiar to Naples; and the book may well have been brought to Lindisfarne by the Adrian who was abbot of a monastery near Naples, and who accompanied Abp. Theodore on his journey to England in 668; see Berger, p. 391. Bentley's *U* and Wordsworth's Y.

Fragments of Matthew (11-34) and John (11-21) bound up at the end of the famous 'Utrecht Psalter'. The handwriting and text both strongly resemble the Codex Amiatinus, and are about the same dates (vii-viii). Wordsworth's U in Gospels.

For the Psalter itself the reader should consult W. de Gray Birch, *The History, Art, and Palaeography of the MS, styled the Utrecht Psalter*, London, 1876; and the later treatise by Count P. Durrieu, *L'origine du MS célèbre dit le Psautier d'Utrecht*, Paris, 1895 (extrait des 'Melanges Julien Havet'); Count Durrieu supposes it to have been written at or near Rheims in the earlier part of the 9th cent. The text is the *Galleian* Psalter.

(b) *Canterbury MSS* (traditionally connected with Augustine and with Gregory the Great).—Oxford, Bodley 857, and Auct. D. 2. 14: Gospels formerly belonging to St. Augustine's Library at Canterbury and generally known as 'St. Augustine's Gospels' [vii]. From the point of view of age, the MS might well have been brought to Canterbury by some of the later followers of Augustine, but the text shows it to be of native origin; it is fairly near to Amiatinus, but has a large number of characteristics partly Irish, partly early Anglo-Saxon; as Berger says (p. 36), it may be placed at the base of the Anglo-Saxon type of text, and must owe its name not to being the personal property of Augustine, but to belonging to the abbey at Canterbury, which was consecrated to his memory. Tischendorf's *bodl*, Wordsworth's O in Gospels.

Cambridge, Corpus Christi Coll. collxxxvi. Evan.; Gospels [vii], formerly belonging to St. Augustine's at Canterbury, and, according to tradition, sent by Pope Gregory to Augustine; but the text does not bear out this supposition; it closely resembles that of the preceding MS, and is really Anglo-Saxon, though it has been corrected throughout in accordance with a MS of the Amiatinus type. Bentley's B, Wordsworth's X.

British Museum, Cotton Vesp. A. 1. 'Roman' Psalter [ix], known as the 'Psalter of St. Augustine': Anglo-Saxon type of text.

Brit. Mus., Reg. 1. E. vi.; Gospels, imperfect [end of viii]; written in England, and formerly belonging to St. Augustine's, Canterbury; in all probability the second volume of the famous 'Biblia Gregoriana,' mentioned by Elnham ('Hist. Monasterii S. Aug. Cantuar.', ed. C. Hardwick, Rolls Series 8, London, 1858). Text somewhat similar to those above; Vulgate, mixed with Irish readings; Bentley's P.

(c) *Irish and Anglo-Saxon MSS*.—*Book of Armagh*; Library, Trinity Coll., Dublin. New Testament written in a small and beautiful Irish hand, by the scribe Ferdomnach [ix]; it has the *prologus Filagii in omnes apostolos*, Laot. occurs after Col., and Acts after Apoc. The late Dr. Reeves, bp. of Down, intended to edit it, and his work has been finished and published by Drs.

Gwynn and Bernard of Dublin. The text of the MS is at bottom good and closely allied to Amiatinus; it displays many of the national characteristics, however, small interpolations, explicative additions, and relics of Old Latin readings (thus its omission of Jn 54 is all the more remarkable), etc., while the present writer cannot help thinking that it has been to a certain extent corrected from the Greek; see the Oxford *Vulgate*, pp. 714, 715; Berger, pp. 31-33. Wordsworth's D.

The Book of Kells: Trin. Coll., Dublin, A. 1. 6; Gospels [vii or viii], given to Trinity College by Abp. Ussher; named from Kells or Kenanna, a monastery in County Meath. It is famous for being perhaps the most perfect existing specimen of Irish handwriting, as the *Lindisfarne Gospels* are of English; see Thompson, *Greek and Lat. Palaeography*, pp. 239, 245, 246. But the text is also valuable, much resembling the *Book of Armagh*, with the usual Irish characteristics, and a great fondness for conflated readings. A collation has been given by Dr. Abbott in his edition of the Codex Usserianus (Dublin, 1884); see also Berger, p. 41. Wordsworth's Q.

Book of Durrow: Trin. Coll., Dublin, A. 4. 5. Gospels [vi-vii]; according to an inscription on what was the last page, the book was written by St. Columba in twelve days, but, as with the Echternach Gospels (see below in this column), this, with the rest of the book, must have been copied from an earlier exemplar; Durrow or Dearnag was a monastery in King's County, founded by Columba. Irish text, i.e. good Vulgate at bottom, but with some of the characteristic national interpolations; collation given by Dr. Abbott in his edition of the Codex Usserianus; see also Berger, p. 41. Wordsworth's *durnach*.

The Book of Moling or Mulling: Trin. Coll., Dublin. Gospels [viii or ix], apparently never bound, but preserved in a case. An inscription gives the name of the scribe as Mulling, i.e. probably St. Mulling, bp. of Ferns, at the end of the 7th cent.; but, as with the Book of Durrow, the inscription must have been copied from an earlier MS. Characteristic Irish text, sometimes with interesting variant readings; see Berger, p. 33, and H. J. Lawlor, *Chapters on the Book of Mulling*, Edinburgh, 1897. The MS is disfigured by damp, and is illegible in parts.

The Stowe St. John: bound up with the famous *Stowe Missal*, Royal Irish Academy, Dublin. Written in pointed Irish minuscules [viii or ix]; portions of the Gospel only. Good Vulgate text with the usual traces of Old Latin mixture; see J. H. Bernard in *Transactions of the Royal Irish Academy*, vol. xxx. pt. viii. (Dublin, 1893), who gives a description and collation of the MS; also Berger, p. 42.

Gospels of Macdurnan: Lambeth Palace Library. Written by the scribe Maelbrith MacDurnain [ix-x], delicate and rather cramped Irish writing; Irish text.

Lichfield, Chapter Library. Gospels [vii-viii], traditionally ascribed to St. Chad, bp. of Lichfield. The MS was perhaps written in Wales, but is in an Irish hand; it belonged to the Church of St. Teliau at Llandaff, but was brought to Lichfield towards the end of the 10th cent. The writing and ornamentation are very beautiful, and resemble the Book of Kells; Irish text, possibly corrected occasionally from the Greek. Contains Mt 11-Lk 39; collation of the MS, with introduction, etc., by Scrivener, *Codex S. Ceaddæ Latinus*, Cambridge, 1887; see also Bradshaw, *Collected Papers*, pp. 463-461 (Cambr. 1889). Wordsworth's L in Gospels.

Cambridge, University Library, Kk 1. 24; Luke and John, nearly complete [vii-viii], half uncial Irish hand, somewhat resembling the Book of Kells or the Gospels of St. Chad. In the first 3 chs. of St. Luke the text is a strange medley of Vulgate and Old Latin; for the rest, the text is Vulgate with occasional Old Lat. readings.

Selden Acts: Oxford, Bodl. 3419 (Seld. 30). Saxon MS [viii], valuable text. Wordsworth's O in Acts.

Rushworth Gospels or Gospels of MacRegol: Oxford, Bodl. Auct. D. 2. 19 [ix], written by an Irish scribe, who died A.D. 820; has an interlinear Anglo-Saxon version. Irish text, with constant inversions of order in words, especially in St. Matthew; possibly, too, corrected from the Greek. Collation given by W. W. Skeat in *The Gospel of St. Matthew; A.-S. and Northumbrian versions*, Cambr. 1887. Wordsworth's R in Gospels.

Brit. Mus., Egerton 600. Gospels [ix], formerly belonging to the monastery of Marmoutier (Majus Monasterium), near Tours. It is an interesting specimen, however, of a MS, written abroad in ordinary Caroline minuscule, but with Irish ornamentation, and with a regular Irish type of text; see Berger, p. 47. It contains a number of variant readings which seem peculiar to the MS. Tischendorf's *mm*; Wordsworth's E.

This MS serves as an introduction to our next class of MSS.

IV. CONTINENTAL MSS, WRITTEN BY IRISH OR SAXON SCRIBES, AND SHOWING A MIXTURE OF THE TWO TYPES OF TEXT.—*Gospels of St. Gatien*, Paris, Bibl. Nat., *Nouv. acq. Lat.* 1587 [viii], Anglo-Saxon hand, but probably written on the Continent; belonged to St. Gatien's at Tours. The text contains a number of Old Lat. readings; in other respects resembles the Egerton MS. Usually cited as *gat*; Berger, p. 46.

The Echternach Gospels: Paris, Bibl. Nat. 9389 [probably viii], written in an Irish hand, and belonging formerly to the Benedictine Abbey of St. Willibrord at Echternach; yet an interesting inscription, obviously taken from the exemplar from which the MS was copied, asserts that the scribe corrected the text from a MS, 'de bibliotheca Eugippii præsiteri quem ferunt fuisse sancti Hieronimi.' The Eugippius here referred to was almost certainly the Abbot of Lucullanum, near Naples, in the early part of the 6th cent. The text, however, which has a series of variant readings noted in the margin, is disappointing; neither the first hand nor the corrector seems to display a consistent text; and we have a strange mixture of good Vulgate,

Continental, and Irish types; see Berger, p. 52. Wordsworth quotes it regularly.

Codex Bezae Cantabrigiae: Paris, Bibl. Nat., Lat. 281 and 298. Gospels [viii], formerly at Fécamp, just above Havre, and therefore directly facing the English coast. The text and the handwriting are what might be expected from its position; it is written in a fine uncial hand, but the ornamentation shows traces of British influence; and the text is a good example of the mixture of Continental and British types that would be produced by an Irish scribe writing in a French monastery; see Berger, p. 50. Wordsworth's B in Gospels.

Brit. Mus., Add. 5463. Gospels from the monastery of St. Peter at Beneventum [viii or ix], written in a fine revived uncial hand; usually supposed, on the strength of an inscription, to have been written for Ato, abbot of St. Vincent de Volturno, near Beneventum, about the middle of the 8th cent. Berger would, however, place it in the 9th cent. The text is a combination of British and Continental types; see Berger, p. 92. Wordsworth quotes its readings.

Angers: Public Library No. 20. Gospels [ix or x], written in a French hand, but with traces of Irish influence in the ornamentation; and the text is Irish; see Berger, p. 48.

Brit. Mus., Reg. I. A. xviii. Gospels [ix or x], known as the Gospels of Æthelstan, and according to tradition presented by him to St. Augustine's, Canterbury. Written on the Continent, but with a good many Irish characteristics in the text; see Berger, p. 49.

Brit. Mus., Harley 1772. Epp. and Apoc. [viii or ix], in a French hand, but with a good deal of Irish work in the initials and ornamentation; written, therefore, apparently in France, but partly by an Irish scribe. The text has been carefully corrected, and the readings of the first hand are often quite illegible; it contains a good many Old Latin and some Spanish readings; Col. is placed after Thess., and Jude and Laod. are both wanting; see Berger, p. 50. Wordsworth's Z.

Paris, Bibl. Nat., Lat. 9382. Prophets (Jerem.—Daniel), Saxon handwriting [ix], and a good text. Berger (p. 51) remarks that it is perhaps the only MS of the Prophets we possess that comes from the British Isles.

Do., Lat. 11,553. The second half of a Bible [ix], apparently written in the district round Lyons: the *S. Germani exemplar latum* of R. Stephanus (not *Germanum latum*, as he is sometimes made to call it); it was a St. German MS. The text is strangely mixed; in the OT, Spanish elements predominate, but the text is good, especially in Pr, Ec, Song of Songs; in the NT, Mt is Old Lat., and cited among the OL MSS as *g*₁ (see vol. iii. p. 61); in the other Gospels there are many OL readings, but the text at bottom is of the class copied in France by Irish scribes; Acts, good text, though showing Spanish influence; Cath. Epp., poor Spanish text; Apoc., good; Pauline Epp., fairly good, but with some OL readings. See Berger, pp. 65–72. Wordsworth's *g*₁ in Mt, Q in rest of NT.

Würzburg University Library, Mp. th. f. 61. St. Matthew [viii], written in an Anglo-Saxon hand, with interlinear glosses; mixed text.

Do., Mp. th. f. 12. Epp. of St. Paul [ix], with Irish glosses; a well-known MS. The glosses have been often published, see Zimmer, *Glossae Hibernae*, Berlin, 1831; Whitley Stokes, *Old Irish Glosses of Würzburg and Carlsruhe*, Austin, Hertford, 1887; O'Brien, *Holy Scr. in Ireland a thousand years ago*, Dublin, 1888.

Do., Mp. th. f. 69. Epp. of St. Paul [viii], with Irish initials; Col. after Thess.

Oxford, Bod. Laud. Lat. 102. Gospels, Saxon hand [early x]; it formerly belonged to Würzburg, and is among the MSS which were bought there at the instance of Abp. Laud, after the sack of the city in 1631; mixed text.

Other Würzburg MSS worthy of notice, though not possessing Irish characteristics, are:—Mp. th. q. 1 a. Gospels [viii], fine uncial hand; belonged, according to tradition, to St. Kilian, in whose tomb it is said to have been found. Mp. th. q. 1. Gospels [xi]; q. 4 Gospels [xi]; f. 65 Gospels [viii or ix]; f. 66 Gospels [viii or ix]; f. 67 Gospels [vii or viii]; semi-uncial, and with a good many Old Lat. readings in the first hand; f. 68 Gospels [vi or vii]; good text in the first hand, resembling Amiatinus. And lastly, Mp. th. f. max. 1 Bible [xi]; the Pauline Epp., Laod., and the book of Baruch have been abstracted.

For the Würzburg MSS see Schepps, *Die ältesten Evang. Handschriften der Univ. bibliothek, Würzburg, 1887*, and Koberlin, *Eine Würzb. Evang. Handschr.* (Program d. Studienanstalt bei S. Anna in Augsburg, 1891).

V. TYPE OF TEXT CURRENT IN LANGUEDOC (Berger, pp. 73–82).—Paris, Bibl. Nat., Lat. 4 and 42. *Codex Aniciensis*, Bible [ix or x]. The text of the first hand somewhat resembles that of the Vallicellian Bible (see below, p. 839), but a contemporary hand has added a number of corrections (amongst others the 'three heavenly witnesses,' 1 Jn 5), and these often show traces of Spanish influence in the Acts.

Do., Lat. 7. Bible [xi], with fine illuminations; text coloured by Spanish influence, and in the Acts resembling the corrector of the Cod. *Aniciensis*.

Do., Lat. 254. *Codex Colbertinus* of the New Testament [xii or xiii], written in S. of France. The text is Old Latin in the Gospels, and is cited among Old Latin MSS as *c* (see vol. iii. p. 51); in the rest of the NT the text is Vulgate, and in a later hand, with all the characteristics of the S. of France about it.

Brit. Mus., Harley 4772, 4773. Bible in two fine volumes [early xiii], the second probably of later date than the first; written in S. of France, and with text belonging to that region.

Paris, Bibl. Nat., Lat. 321. New Testament [early xiii], be-

longing to Perpignan. Ordinary text in Gospels, but parts of the Acts (11–13⁷ 28¹⁶ *ad fin.*) are Old Latin and allied to the text of the Codex Laudianus (E) and the Gigas (*gig*); Catholic Epp. have a Spanish text, resembling the *Codex Toletanus*. The Old Latin portions of the Acts have been published by Berger, *Un ancien texte Lat. des Actes des Apôtres retrouvé dans un MS provenant de Perpignan* (*Notices et extraits des MSS de la Bibl. Nat. et autres Bibliothèques, tome xxiv. 1^{re} partie*), Paris, 1896. Wordsworth's *p* in Acts.

Codex Demidorianus. Bible [xiii], but copied from an earlier exemplar; it belonged in the last century to a Paul Demidov Gregorovitch, but its present position is unknown. The text was published in Acts, Epp., and Apoc. by Matthæi in his *New Testament* (1782–8); and Tischendorf has quoted it from his edition (under the sign *demid*). Wordsworth's *dem* in Acts.

VI. OTHER FRENCH TEXTS.—For other types of French texts anterior to the Theodulfian and Alcuinian recensions the reader must study M. Berger's book, p. 83 ff. All that we can do here is to enumerate some of the MSS he quotes, and the centres around which he has grouped them; e.g.—

MSS from Limoges: Paris, Bibl. Nat. 5 and 52 [ix]; 8 and 82 [xi]; 315 [xii or xiii]; 2328 [viii or ix]; 315 [xii–xiii].

from Tours: Paris, Bibl. Nat. 112 [x], 113.

from Fleury: Orleans, Public Library 16, portions of 5 MSS of different dates.

from Chartres: St. John, Paris, Bibl. Nat. 10,439 [viii].

Other MSS from the N. of France: Autun, Grand Séminaire 3 [viii], Paris, Bibl. Nat. 17,226 [vii]; 256 [vii]; 14,407 [ix].

Bibles from St. Riquier: Paris, Bibl. Nat. 11,504–5 [ix], the *S. Germani longum exemplar* of R. Stephanus; interesting text; Bibl. Nat. 45 and 93 [ix or x], the *Codex Regius*; mixed text. Allied in text to these are the MSS Bibl. Nat. 309 [xi] and 305 [xi], both New Test. without Gospels.

The Metz MS (Public Library 7) preserves an interesting specimen of the mixed texts current at the time [ix]; see p. 549.

MSS from Corbie on the Somme, near Amiens:—Amiens, Public Library 6, 7, 11, 12, portions of a Bible in several volumes [viii or ix].

18, the famous *Corbie Psalter* [viii–ix].

10, the four books of Eadras [ix]: one of the few MSS containing the whole book; see R. L. Bensly, *The Missing Fragment of the 4th Book of Ezra*, Cambridge, 1875. Paris, Bibl. Nat., Lat. 13,174; Acts, Cath. Epp., and Apoc. [ix]. Do., Lat. 11,532–3: Bible [ix]; contains the *Psalterium ex Hebraeo*; text interesting but mixed; slight Spanish elements in it.

Bible from the Abbey of St. Vedast at Arras: Vienna, Imperial Library 1190 [ix].

VII. SWISS MSS (especially St. Gall).—Irish monks and scribes penetrated through France, and right down into Switzerland and Italy; it is thus that we get Vulgate MSS written often in Irish hands, and containing the same mixture of Irish and Continental types of text, not only in France, but in such centres of monastic life as St. Gall, Reichenau, Einsiedeln.

Of these the *Codex Sangallensis* and *Boernerianus* (A3 and Gg), which are really different parts of the same interlinear Græco-Latin MS, belong rather to Old Latin than to Vulgate MSS, and are described above (see LATIN VARIANTS); though the base of 3 in the Gospels is perhaps more Vulgate than Old Latin: possibly the Græco-Latin *Psalter* now preserved in the Basle Library (A. vii. 3) may also be part of this same MS.

The same may be said of the *Codex Augiensis*, now at Trin. Coll., Camb. (B. 17. 1.).

Early types of such mixed Irish and Continental texts are found in the St. Gall MSS No. 10. Job, Prov., Eccl., Canticles, Wisdom, Ecclesiasticus [x], Irish hand; No. 51, Gospels [viii], Irish hand, mixed text; No. 60, St. John [viii or ix], Irish hand, mixed text. Grandducal Library, Karlsruhe; the Reichenau *Codex Augiensis* 211; Gospels [late ix], with a number of Irish readings. Berne, University Library 671; Gospels [ix or x], fine Irish hand, mixed text. Milan, Ambrosian Library I. 61 sup.; Gospels [viii?], in semi-uncial Irish hand; formerly at Bobbio. The text has a good many Irish readings in it, and the readings of the corrector or correctors are extremely interesting and valuable; see Berger, pp. 55–59.

We are able to fix some of the St. Gall MSS to the middle of the 8th cent., and to one scribe, Winithar, who was a monk in the monastery—

No. 2, Pentateuch, Acts, and Apoc.; mixed text, in the Acts close to Br. Mus. Add. 11,852; Wordsworth's S in Acts. No. 70, Epp. of St. Paul; Pastoral Epp. placed after Heb.; the text is very corrupt.

No. 907, Catholic Epp. and Apoc. with interesting prefatory matter; the text is very corrupt, resembling the *Codex Lemovicensis* (Paris, Bibl. Nat. Lat. 2323, noted above).

More important, perhaps, than the work of Winithar was that of a slightly later scribe, Hartmut, who was abbot of St. Gall, 872–883; the following MSS were written either by him or under his direction: Nos. 7, Chron. and Sapiential books; 81, Sapiential books, Job, Tobit; 46, Ezek., Minor Prophets, and 1 Dan.; 45, the same; 77, 78, 82, 79, 82, portions of a Bible; 75, Bible. To them must be added—

Brit. Mus., Add. 11,852, Pauline Epp. (including Laod.), Acts, Cath. Epp., Apoc. [ix], interesting text. See E. Nestle, *Bengel als Gelehrter*, pp. 58–60, Tübingen, 1892; Wordsworth's U in Acts; text agrees closely with the St. Gall MS 2. St. Gall, however, was connected with other main lines of MS transmission, such as those which ran through Chur, Milan, Bobbio, and Vercelli; and these in turn were in communication

through the S. of France with the N.E. frontier of Spain, so that we find the Southern type of text again creeping up and showing traces in the Swiss and N. Italian MSS. Examples of this are—

The Bobbio MS now at Milan (Ambrosian Libr. E. 28 inf.), containing Chron.—Pauline Epp. [ix-x]; mixed text, with Spanish, Old Latin, and Irish elements in it; Berger, p. 138.

Monza, Collegiate Archives 13: fragments of Bible [x], text somewhat similar to the previous MS; these two MSS agree with the Codd. *Boernerianus* and *Augensianus* in omitting the last 3 verses of the Ep. to the Romans; Berger, p. 139.

VIII. ALCUINIAN REVISION.—Rome, Vallicellian Library B. 6. Bible [ix], considered to be the best MS of the Alcuinian Recension; Wordsworth's V; see Berger, pp. 197-203.

The Tours Octateuch; Tours, Public Library 10 (commencement of ix), text related to the Vallicellian Bible, though not exactly the same.

Bamberg, Royal Library A. I. 5. Bible [ix], a handsome example of this recension; written at Tours. Wordsworth's B in Acts, etc.; see Berger, p. 206, and Leitschuh, *Führer durch d. kgl. Bibl. zu Bamberg*, 1889, p. 82.

Zürich, Cantonal Library C. 1: text resembling the Bamberg MS on the whole, but differing in Pauline Epp.; Berger, p. 207.

Brit. Mus., Add. 10,546. Bible [ix] known as the Codex Carolinus, or the Bible of Grandval (near Basle). Wordsworth's K; see Berger, pp. 209-212.

Paris, Bibl. Nat., Lat. 250. New Testament [ix], probably written at Tours; text closely resembling the last MS; Berger, p. 243.

Cologne, Chapter Library No. 1. Bible [ix] written at Tours with interesting marginal corrections, made by a contemporary hand also probably at Tours.

Paris, Bibl. Nat., Lat. 1. Bible [ix], a splendid MS, presented to Charles the Bald by Vivian, abbot of St. Martin of Tours.

Do., Lat. 2. Bible [ix] known as the Bible of St. Denis or of Charles the Bald; in the NT the Apoc. is wanting. Used by R. Stephens in his Bible of 1528.

Do., Lat. 3. Bible [ix], belonging originally to the monastery of Glanfeuil; parts of the Apoc. supplied by a later hand; see Berger, p. 213.

Monza, Collegiate Archives, G. 1. Bible [ix], written at Tours by the scribe Amalricus, who was afterwards archbishop of Tours: valuable text; Berger, p. 221.

Paris, Bibl. Nat., Lat. 17,227. Gospels written by Adalbaldis [early ix] at Tours; good Alcuinian text, closely resembling the Bamberg and Zürich Bibles; Berger, p. 243-247.

Nancy, Cathedral Library. Gospels [early ix], written at Tours; a splendid copy. Text resembling the Monza Bible and the Brit. Mus. Gospels below (Add. 11,548); Berger, p. 247.

Brit. Mus., Add. 11,548. Gospels [ix], probably written at Tours.

Paris, Bibl. Nat., Lat. 286. Gospels [middle of ix], written at Tours, and presented by the emperor Lothaire to the Church of St. Martin.

Rome, Church of St. Paul without the walls. Fine Bible [ix], belonged to Charles the Bald, was written probably in the N. of France, and shows Saxon influence in its ornamentation. Mixed Alcuinian text, with a good deal of resemblance to the Codex Vallicellianus, still more perhaps to the first Bible of Charles the Bald (Paris, Bibl. Nat., Lat. 1); Berger, p. 292.

MSS (of Caroline school) written in gold (see Berger, pp. 250-277). In text these MSS belong rather to the type of the continental Saxon MSS (above, p. 887) than to the somewhat later Tours school.

The famous *Hamilton Gospels* [viii-ix], now in the library of Th. Irwin, Esq., of Oswego, New York; very early Caroline text, with occasional Spanish and Anglo-Saxon elements; Berger, p. 259.

The Codex Adæ, of Trier (Stadtbibliothek, No. xxii.), a splendid MS. Gospels [end of viii], written by two hands, the scribe who has written the latter part of the MS having also added a large number of marginal corrections to the former. The first hand shows connexion with the oldest Tours MSS, and especially the *Codices aurei*; the second hand, with the more ordinary Tours type; Berger, pp. 262-267; see also the monograph *Die Trierer Ada-Handschrift*, Leipzig, 1889; the article on the text of the Alcuinian Bibles by Dr. P. Corsen, is most valuable.

Brit. Mus., Harl. 2788. Gospels [viii-ix], written in golden uncials; an extremely fine MS; illuminations of the same school as those of the Codex Adæ.

Abbeville, Public Lib. No. 1. Gospels [viii-ix] written in gold, and strongly resembling Harl. 2788; Berger, p. 267.

Paris, Bibl. Nat., Lat. 8850. The Gospels of St. Medard [early ix]; a fine MS; Berger, p. 268.

Do., Lat. 11,955. Portions of Matt. and Mark [viii?].

Do., Lat. 9383. Gospels [end of viii].

Tours, Public Library 22; formerly at St. Martin's. Gospels [viii-ix], interesting text, on the whole belonging to Alcuinian revision, but with Irish and Old Latin elements in it; Berger, pp. 47, 202, 272, and the Oxford *Vulgate*, *Epilogus*, p. 720, Tischendorf's *mt*; Wordsworth quotes its readings.

Vienna, Schatzkammer. The famous Gospels [end of viii?], supposed to have been found in the tomb of Charles the Great; written in gold on purple vellum; Berger, p. 275.

Do., Imperial Library, 652. Psalter [end of viii].

Munich, Royal Library, Lat. 14,000 (=Cim. 55). The splendid Gospels of St. Emmeran [ix, dated 870]. Mixed text, with Anglo-Saxon elements in it; probably written in the N. of France; Berger, p. 295.

IX. THEODULFAN REVISION.—Paris, Bibl. Nat., Lat. 9380.

The famous Theodulfan Bible [ix], written in beautiful and minute hand. Wordsworth's 9; see Berger, p. 149 f., and Delisle, *Les Bibles de Théodulfe*, Paris, 1879; sometimes known as the Codex Memmianus.

Puy, Cathedral Library. Bible [ix], written under the direction of Theodulf, and so closely resembling the Paris Bible that Delisle asserts that many pages look almost like proofs struck from the same type. The text, however, is not so good: see Delisle, as above; also Berger, p. 171 ff.

Brit. Mus., Add. 24,142. Bible [ix], formerly belonging to the monastery of St. Hubert in the Ardennes; written in a small minuscule hand, strongly resembling that of the Theodulfan Bible. The text is extremely interesting, the first hand allied to the Northumbrian family, while the marginal corrections present a Theodulfan type. Wordsworth's H.

Orleans, Public Libr. 14. Book of the Prophets [ix], from Fleury. Text shows traces of Theodulfan influence, though the order of the books differs from that of Theodulf. Berger, p. 177.

Do., 11 and 13. Two volumes of a Bible [x], containing Kings, Proverbs, Song of Songs, Job, Macc., and Tobit; from Fleury. Theodulfan Text, but following sometimes the first hand, sometimes the marginal readings. Berger, p. 177.

Paris, Bibl. Nat., Lat. 11,937. Bible [ix-x], the St. Germain *exemplar parvum* of Robertus Stephanus, for the MS was formerly at St. Germain-des-Près; the hand resembles that of the Theodulfan Bible, and the text also; the latter follows sometimes the first hand, sometimes the margin. Berger, p. 178.

Copenhagen, Royal Libr., nouv. fonds Royal 1. Paris of a Bible, i.e. Psalms-Daniel [ix]; handwriting resembles that of the St. Germain MS above, and the text is Theodulfan. Delisle, *Bibl. de l'École des Chartes*, xlv, p. 321; Berger, p. 181.

X. MEDIEVAL TEXTS.—Out of the thousands of such MSS we can but select three, which for various reasons are interesting.

Brit. Mus., Reg. I. B. xli. Bible [xiii], written in 1254 by William of Hales for Thomas de la Wile, 'Magister Scholarum Sarum'; fair specimen of ordinary medieval text. Wordsworth's W.

Dijon, Publ. Libr. 9 bis. Bible, 4 vols. [xii], containing the corrections of Stephen Harding, abbot of Cîteaux.

Paris, Bibl. Nat., Lat. 16,719-16,722. Bible, 4 vols. [xiii], containing the corrections of the Dominicans, under the auspices of Hugo de S. Caro.

LITERATURE.—Full lists of works will be found in S. Berger, *Histoire de la Vulg. pendant les premiers siècles du moyen âge*, Paris, 1893, pp. xxii-xxiv; and in E. Nestle (to whom the present writer owes many valuable suggestions), *Urtext u. Uebersetzungen der Bibel*, Leipzig, 1897, pp. 98, 102 (=PRE³, Bd. iii. pp. 30, 42). We give here a somewhat compressed list of the works likely to be useful to the ordinary student.

A. For the life of Jerome.—The *Vita S. Hieronymi* in Vallarsi's edition of his works, tom. xi. pp. 1-280. For the works of Jerome the student should use by preference the editions of Vallarsi, 11 vols. folio, Verona, 1734-1742, do. quarto, Venice, 1766-1772; the quarto edition is handier, and has been reprinted by Migne (but with different paging), *Pat. Lat. xlii.-xxx.*: von Colln, 'Hieronymus' in Ersch and Gruber's *Encyclopädie* (ii. Section, 8. Theil, p. 721.), 1831; F. X. Collombet, *Histoire de Saint Jérôme*, 2 vols., Paris, 1844; O. Zöckler, *Hieronymus; sein Leben und Wirken aus seinen Schriften dargestellt*, Gotha, 1865; A. Thierry, *Saint Jérôme*, 2 vols., Paris, 1867; E. L. Cutts, 'Saint Jerome' in the *Fathers for English Readers* (S.P.C.K.), 1877; Zöckler, 'Hieronymus' in PRE³ (Bd. viii. p. 42 f.), 1900; Fremantle, 'Hieronymus' in Smith and Wace's *Dict. of Christian Biography*, vol. iii. p. 291, 1882; the same, 'Life of Jerome' in Wace and Schaff's *Select Library of Nicene and Post-Nicene Fathers*, vol. vi. pp. xvi-xxv, 1893; G. Grützmacher, *Hieronymus; eine biographische Studie*, etc., i. Leipzig, 1901.

B. For the history of the text, both manuscript and printed:—R. Simon, *Histoire critique des Versions du NT*, Rotterdam, 1690; J. Mill, *Novum Testamentum cum lectionibus variantibus, etc.*, *Proemititur dissertatio*, Oxonii, 1707; see especially p. lxxxi f.; H. Hody, *De Bibliorum Textibus*, etc., Oxon., 1705, pp. 342-569; L. van Ess, *Pragmatica doct. Cath. Trid. circa Vulg. decreti sensum*, Sulzbach, 1816, *Pragmatisch-Kritische Gesch. der Vulg.*, Tübingen, 1824; G. Riegler, *Kritische Gesch. der Vulg.*, Sulzbach, 1820; Bp. Westcott, 'Vulgate' in Smith's *DB*, vol. iii., 1863; C. Vercellone, *Variae lectiones vulg. Latine Bibliorum editionis*, 2 tom., Rome, 1861-1864; F. Kaulen, *Geschichte der Vulg.*, Mainz, 1868; S. Berger, 'Des Essais qui ont été faits à Paris au xiii^e siècle pour corriger le texte de la Vulg.' (*Rev. de Théologie et de Philosophie*, t. xvi.), Lausanne, 1883, *De l'Histoire de la Vulg. en France*, Paris, 1887, *Quam notitiam lingue hebraice habuerint christiani mediæ ævi temporibus in Gallia*, Paris, 1893, *Histoire de la Vulg. pendant les premiers siècles du moyen âge*, Paris, 1893; G. B. de Rossi, 'La Bibbia offerta da Ceolfrido' (from the *Omaggio giubilare della Bibl. Vat. al S. P. Leone XIII.*), Rome, 1888; H. Denifle, 'Die Handschriften der Bibel-Correctorien des 13. Jahrhunderts' (*Archiv f. Literatur- u. Kirchengesch.*, t. iv. pp. 263, 471), 1888; P. Martin, 'La Vulg. latine au xiii^e siècle d'après R. Bacon' (in *Le Muston* vii., Louvain, 1888), 'la texte Parisien de la Vulg. Lat.' (*Le Muston* viii., 1889); *Die Trierer Ada-Handschrift* . . . von K. Menzel, P. Corsen, etc., Leipzig, 1889; H. J. White, 'The Codex Amiatinus

and its Birthplace,' in *Studia Biblica et Ecclesiastica*, vol. II., Oxford, 1890; W. A. Copinger, *Incunabula Biblica, or the first half-century of the Latin Bible*, London, 1892; E. Nestle, *Ein Jubiläum der Lateinischen Bibel*, Tübingen, 1892; H. J. White, 'The Latin Versions,' in Scrivener-Miller, *Introduction to the Criticism of the NT*⁴, 1894, vol. II., pp. 56-90; E. von Dobschütz, *Studien zur Textkritik der Vulg.*, Leipzig, 1894; C. R. Gregory: Prolegomena to Tischendorf's *Novum Testamentum Græce*, etc., editio octava critica maior, vol. III., Lips. 1894, pp. 971-1108; F. G. Kenyon, *Handb. to Text. Crit. of NT*, 1901, pp. 184-203; E. Nestle, *Lateinische Bibelübersetzungen* (revision of Fritzsche) in *PRE*³, Bd. III., also published separately in *Urtext u. Übersetzungen der Bibel*, Leipzig, 1897; P. Corssen, 'Bericht über die latein. Bibelübersetzungen' ('Sonderabdruck,' from the *Jahresbericht über die Fortschritte der klassischen Altertumswissenschaft*, 1890); P. Thielmann, 'Bericht ü. d. gesammelte handschr. Material zu einer kr. Ausgabe,' etc. (from the *Munich Sitzungsberichte*, 1890).

C. For the grammar, Latinity, etc., of the Vulgate:—J. A. Hagen, *Sprachliche Erörterungen zur Vulg.*, Freiburg in Br. 1863; F. Kaulen, *Handbuch zur Vulg.*, Mainz, 1870; P. Hake, *Sprachliche Erläuterungen zu dem lgt. Psalmentexte*, Arnberg, 1872; W. Nowack, *Die Bedeutung des Hieron. für die alttest. Kritik*, Göttingen, 1875; H. Roensch, *Itala u. Vulg.*, Marburg, 1875; H. Goelzer, *Latinité de Saint Jérôme*, Paris, 1884; H. P. Smith, 'The Value of the Vulg. OT for Textual Criticism' (*Presbyterian and Reformed Rev.*, April 1891); A. Hartl, *Sprachliche Eigenthümlichkeiten der Vulg.*, Ried, 1894.

D. Critical Editions:—C. Vercellone, *Biblia Sacra Vulgate Editionis Sixti V. et Clementis VIII. Pont. Max. jussu*

recognita atque edita. Romæ, Typis S. Congregationis de propaganda fide, 1861. This is the best reprint of the Clementine Vulgate Bible, and Vercellone's preface should be carefully read; C. Tischendorf, *Nov. Test. Latine; textum Hieronymi . . . restituit C. T.*, Lipsiæ, 1864; P. M. Hetzenauer, *Nov. Test. Vulgate Editionis: ex Vaticanis editionibus earumque correctorio critice editit P. M. H.*, Oeniponte, 1890; Corssen, *Epistula ad Galatas*, Berlin, 1886; Bp. J. Wordsworth, *Novum Testamentum . . . Latine sec. edit. S. Hieronymi . . . recensuit J. Wordsworth, S.T.P.*, in *opere societatem adiuncto H. J. White*, Oxon., 1880-1898. (The four Gospels are published; the rest of the NT is in preparation).

H. J. WHITE.

VULTURE.—*נָקָר* *dā'ah* and *נָקָר* *danyāh* are tr. AV 'vulture' (Lv 11¹⁴, Dt 14¹³, Is 34¹⁵), RV 'kite'; *נֶשֶׁר* 'ayyāh is tr. AV 'vulture' (Job 28⁷), RV 'falcon'. *עָשָׂר* or *עֶשְׂרִי* *rāhām* or *rāhāmāh* is tr. RV 'vulture' (Lv 11¹⁸, Dt 14¹⁷), AV 'gier eagle'. Of these four, only the last refers to the vulture. It is doubtless *Neophron percnopterus*, Sav., Pharaoh's Hen, which is still called *rakhām* in Arabic. On the other hand, *נֶשֶׁר* *nesher*, which is always rendered 'eagle,' undoubtedly includes a number of the vultures, esp. the lammergeier and the griffon. For the habits of the vulture and for Scripture allusions to them, see EAGLE, GIER EAGLE, OSPRAY, and OSSIFRAGE. G. E. POST.

W

WAFER.—See art. BREAD, vol. i. p. 318.

WAGES.—See SERVANT.

WAGGON.—See CART.

WAIT (from the same root as 'wake' and 'watch') is used in AV both as subst. and verb. 1. As subst. the meaning is a watch, plot, esp. an ambush. The phrases are (a) *Lie in wait*, as Dt 19¹¹ 'But if any man hate his neighbour, and lie in wait for him, and rise up against him and smite him mortally that he die'; Jos 8⁴ 'Behold, ye shall lie in wait against the city, even behind the city.' So 'liers in wait,' as Jg 9²⁵ 'And the men of Shechem set liers in wait for him in the top of the mountains.' (b) *Lay wait*, as Jg 16² 'They compassed him in, and laid wait for him all night in the gate of the city'; Jer 9⁸ 'One speaketh peaceably to his neighbour with his mouth, but in heart he layeth his wait' (RV as AVm 'layeth wait for him'). (c) *Laying of wait*, as Nu 35³⁰ 'But if he thrust him of hatred, or hurl at him by laying of wait.' Udall has 'lay a wait' (*Erasmus' Paraph.* i. 87), 'And in the meane tyme he touched secreetlye the conscience of certayne Phariseis, whiche layed deadly a wayte for Jesus.' And Fuller has 'lay at wait' (*Holy State*, 316), 'An adversary who lay at wait for all advantages.'

2. As verb we find 'wait' in the phrases 'wait for' and 'wait on' or 'upon.' (1) 'Wait for' has three meanings: (a) *Watch for*, equivalent to 'lay wait for,' Job 15²² 'He is waited for of the sword' (*וַיִּחַר עָלָיו הָאֵשׁ*; LXX *ἐντέταλται* [A *ἐντέτακται*] γὰρ ἡδὴ εἰς χεῖρας σιδήρου; Vulg. 'circumspectans undique gladium'; Cov. 'the sward is allwaye before his eyes'; Kautzsch, 'für das Schwert ist er ausersehen'; Ps 56⁶ 'They mark my steps, when they wait for my soul' (*וַיִּחַר עָלָיו הָאֵשׁ*; cf. Ps 71¹⁰ 'And they that lay wait for my soul' (*וַיִּחַר עָלָיו הָאֵשׁ*)). (b) *Expect*, the modern use, Lk 12³⁶ 'Like unto men that wait for their lord, when he will return from the wedding' (*προσδεχομένους τὸν κύριον*

ἐλπύων, RV 'looking for'); Ac 10²⁴ 'Cornelius waited for them' (*ἦν προσδοκῶν αὐτοῖς*, RV 'was waiting for them'); 17¹⁶ 'Now while Paul waited for them at Athens' (*ἐκδεχομένου αὐτοῦ τοῦ Παύλου*); 2 Th 3⁵ 'the patient waiting for Christ' (*ἐκμονή*, RV as AVm 'patience'). (c) The most important use of this phrase is when it refers to the attitude towards God of the patient believer, who is confident that God will yet show Himself to be the enemy of evildoers and the praise of them that do well; it is then almost equivalent to *believe in* or *worship*. Thus 2 K 6²³ 'Behold, this evil is of the Lord; what (RV 'why') should I wait for the Lord any longer?' (*וַיִּחַר עָלָיו הָאֵשׁ*, LXX *τί ὑπομείνω τῷ κυρίῳ ἐτι*); Ps 37⁷ 'Rest in the Lord, and wait patiently for him'; 39⁷ 'And now, Lord, what wait I for? my hope is in thee'; 65¹ 'Praise waiteth for thee, O God, in Sion.' See also Driver, *Par. Psal.* p. 465.

(2) 'Wait on' or 'upon' means: (a) *attend to*, as Nu 3¹⁰ 'And thou shalt appoint Aaron and his sons, and they shall wait on their priest's office'; 8²⁴; 1 Ch 23²⁸ 'Their office was to wait on the sons of Aaron for the service of the house of the Lord'; 2 Ch 13¹⁰ 'the Levites wait upon their business'; Mk 3⁹ 'He spake unto his disciples that a small ship should wait on him' (*προσκαρτερεῖ αὐτῷ*); Ro 12⁷. So Adams, 2 Peter, 35, 'Life . . . which is obnoxious to sin, and waited on with misery.' In this sense 'wait at' is used in 1 Co 9¹³ 'They which wait at the altar' (RV 'wait upon'). (b) The other use is the same as the special biblical sense of 'wait for,' viz. *look for*, *trust to*, nearly *worship*, as Ps 25³ 'Let none that wait on thee be ashamed'; 25⁵, 21 27¹⁴ 104²⁷.

The simple verb is used twice of God's long-suffering towards men, Is 30¹⁸ 'And therefore will the Lord wait, that he may be gracious unto you'; 1 P 3²⁰ 'the long-suffering of God waited in the days of Noah.'

J. HASTINGS.

WALLS.—All over the East, where wood is not plentiful, walls of houses and even palaces have

been built from the earliest times of crude or sun-burnt brick. It is only in certain localities, where stone was plentiful, and in later ages, that stone has been used. Strabo (xvii. 2. 3) tells us that the houses in the cities of Ethiopia were formed by interweaving split pieces of palm wood or of crude bricks, and says (xvi. 1. 5) of Seleucia (Assyria, near Babylon) that on account of the scarcity of timber the beams and pillars of the houses were made of palm wood: they wound ropes of twisted reeds round the pillars, painted them over with colour and drew designs on them; they covered the doors with asphalt. All the houses were vaulted on account of the scarcity of timber. The earliest efforts of construction in Egypt were made in wood, probably like the dwellings now found in Nubia—palm branches interlaced, plastered over with clay and straw, roofs of branches or planks, or faggots of wood. Bricks were an advance upon this. The palaces of Egypt were of very slight construction, stuccoed walls and planks of acacia. In Assyria stone was so scarce that it was only used as an accessory; the bodies of the structures were never composed of it: it was mainly confined to plinths, pavements, and the internal linings of walls. In Chaldaea stone was entirely absent. The mountains which run parallel to the left bank of the Tigris were bare of trees, and the palm and poplar alone yielded wood of any length: the one soft and fibrous, the other brittle and light. Nineveh, Babylon, Egypt, and Jerusalem all drew their timber from the forest of Lebanon. The employment, however, of this excellent wood must always have been rare and exceptional (Lenormant, *Histoire Ancienne*, ii. 298; Perrot and Chipiez, i. 124; Layard, *Discoveries*, 356).

'In Chaldaea the architect was condemned by the *force majeure* of circumstances to employ little more than crude or burnt brick and bad timber; in Assyria he voluntarily condemned himself to the limitations they imposed' (Perrot and Chipiez, i. 125). The Chaldeans could employ neither pier or column, nor bearers or lintels of stone; they were thus debarred from constructing spacious galleries and chambers, and 'consequently their towns were artificial mountains, as solid and massive from base to summit as the natural hills' (ib. 133). The few long and narrow apartments contrived within them could be compared only to caves hollowed out in the face of a cliff. When the arch was discovered it was made frequent use of. A bas-relief recovered by Layard, showing a group of buildings at Kouyunjik erected by Sennacherib in his palace at Nineveh, depicts them as having not only flat roofs, but hemispherical cupolas, and tall conical domes: the same forms are still in use all over that country, the flat roofs usually for dwelling-houses, but yet the peasants' houses as well as the store-houses have often domed roofs of brick.

In building the tower of Babel we are told 'they had brick for stone, and bitumen had they for mortar' (Gn 11³). Herodotus says (i. 179), in regard to the walls of Babylon, 'As they dug the ditches they converted the excavated earth into bricks, and when they had enough they burnt them in the kilns. Finally, for mortar they used hot bitumen, and at every thirty courses of bricks they put a layer of reeds interlaced.' There are many bituminous fountains still to be found springing through the soil between Mosul and Baghdad (Layard, *Nineveh*, ii. 46). See BITUMEN. In spite of the abundance of stone in Egypt, crude brick was extensively used, and the captives taken in war were forced to undertake the erection of public granaries and other buildings in that material for the Egyptian monarch. Wilkinson (i. 50)

refers to the buildings of great size and solidity, found in various parts of the country, of crude brick. At Thebes these buildings consist of walls enclosing sacred monuments and tombs, and some are made with and others without straw.

In Palestine all the earliest remains that have been recovered are of crude brick; and even in the ruins in the mountains, where stone was plentiful, there are no stone remains attributed to an earlier time than that of king Solomon. At *Tell el-Hesi* (Lachish) at least eight ruined cities have been brought to light, one lying over the other, the earliest being attributed to 1700 years B.C., the latest to 500 years B.C. The houses are of crude brick, similar to those of the country at the present day. No indications were obtained whether the roofs were vaulted or supported by beams; probably the latter, judging by the thickness of the walls (Bliss, *Mound of Many Cities*). At *Tell es-Safi* recent excavations of PEF have exposed a wall of defence of stone earlier than the times of the Crusades, but the date is not yet approximated to. The stones are roughly squared rubble, laid in mud and straw, and the interstices filled with mud and small stones from the fields: height of courses 1' 5" to 2'. A few drafted stones occur. Part of the wall is plastered with dark mud and straw, over which is a layer of white mud and straw, made by mixing a powder of unburnt limestone with water. This kind of plaster is used in the Lebanon to-day (*PEFS*, 1899, 195).

Foundations of a city in Egypt.—When a new district was to be added to a city, the ground was prepared by building with crude brick a number of long and thick walls parallel to one another; then cross walls at right angles with the first, chess-board fashion. The square pits thus constructed were filled with earth, broken stone, or anything else within reach. The foundations of the future city were laid upon the mass thus obtained, and they profited by the operation both in health and amenity. The cities of Memphis and Thebes both seem to have been built in this manner (Edouard Mariette, p. 139). Diodorus (i. 45. 4) says there were houses of four and five storeys at Thebes, and attributes them to the time of the fabulous monarch Busires. As a rule we find a ground floor, one floor above that, and a covered flat roof on the top.

Egyptian houses were built of crude brick made of loam mixed with chopped straw. These bricks are usually a foot long and 6 inches wide. The ceilings of the larger rooms were of indigenous or foreign wood, the smaller rooms were often vaulted: the walls of the houses were coated with stucco, and painted with religious and domestic scenes. The galleries and columns of the porch were coloured in imitation of stone, or painted. The ceilings were covered with arabesques and interlacing ornaments of all kinds, while the floors were strewn with nets woven of many coloured reeds (M. Gaillhabaud's *Monuments anciens et modernes*).

Wilkinson (*Anc. Egypt*, iii. 316) states that the brick arch was used 1540 years B.C., and the stone arch 600 B.C. in Egypt, and suggests that it came into use owing to the small quantity of wood in Egypt, and considers that the invention of the arch there may date as far back as 2020 years B.C.* He gives instances of stone monoliths of over 290 tons weight being dragged by manual labour over 500 miles from the quarries: the power to move the mass was the same, whatever might be the distance. They simply put on a sufficient number

* In all probability this date should be carried much further back, for recent excavations at Nippur have shown that in Babylonia the arch of burnt brick was employed prior to B.C. 4000. See BABYLONIA in vol. i. p. 219^b.

of men to move the stone by hauling it along on a sledge. One case he mentions of a single block, 587 tons weight, being transported 138 miles.

The walls of temples and the fortifications of cities required to be of a very solid description, on account of the battering-ram (which see); and as the latter became more scientifically constructed, and other arts of war came into existence, the walls had to be made more and more solid, and the foundations extended deep into the soil or to the solid rock (Lk 6⁴⁸).

There exist a number of instances at the present day of the magnificent walls of cut stone built in early days from the time of Solomon to Herod, at Jerusalem, Hebron, Arak el-Emir, Baalbek, Tyre and Zidon, and Egypt.

At Jerusalem some of the stones in the wall of the temple enclosure, still existing, are over 30 feet long, 8 feet wide, and $3\frac{1}{2}$ feet high, weighing over 80 tons. The ancient walls are in places still over 150 feet in height, and were originally at the corners at least 250 feet in height. The stones are of hard mountain limestone, approximating to marble, and are carefully chiselled, with a sunken draft of about 3 to 5 inches width all round. The stones of the wall surrounding the cave of Machpelah at Hebron are very little inferior in size to those at Jerusalem.

At Baalbek the stones of the wall of the temple are not quite equal in size to those of Jerusalem, and the stone is much softer; but this wall is protected by another one in front built of exceedingly large stones, 3 of which weigh each about 800 tons, and are over 60 feet in length, 17 feet in breadth, and 14 feet in height. The manner in which these stones were cut and brought down from the quarry can be seen in the quarry itself. When a large stone was ready to be brought away, it could be brought down by gravity with not a very great expenditure of labour.

Josephus (*Ant.* XX. x. 7) speaks of square and very white stones used in the temple, the work of king Solomon, 20 cubits long and 6 cubits high; he also speaks (*BJ* v. v. 1) of stones in the temple itself 40 cubits in length. These great stone walls are taken down to the rock for their foundations, while the buildings of Babylon had their foundations usually on the sand near the surface (Perrot and Chipiez, i. 157). The Pharaonic temples were also rather laid on the surface than solidly placed in the ground.

The gardens in Syria formerly, as at present, had stone walls as boundaries (*BJ* v. iii. 2), and narrow paths traversed the gardens of the suburbs (Nu 22²⁴). The bare hillsides were terraced with stone walls and soil brought up from the bottom, so that the bare hills became fertile fields, as is the case at the present day in Spain, Northern India, Java, Japan. This also is carried out at the present day in many parts of Palestine (*BRP* ii. 493, iii. 14).

- ii. The Method of War.
- iii. The Conduct of War.
- iv. Treaties.
- v. The Outlook of the Prophets on War.
- vi. Allusions to War in the NT.

i. THE TERRAIN OF PALESTINE.—The first requisite for understanding the wars of the Bible is a knowledge of the geography of Palestine. We

need to know something about the routes which so unwieldy a traveller as an army can use, the physical and artificial obstacles which hinder it in its march, the places which allow it room for fighting or for encamping, and other similar geographical details. (In reading this article the reader should have open before him the large map of Palestine prefixed to vol. i. of this Dictionary).

The great strategic routes are three in number. There is the important road which, coming from the north and skirting the coast of the Mediterranean, passes Tyre, Mount Carmel, and Gaza, and finally reaches the border of Egypt. Then there is the scarcely less important route, now followed by the railway from Damascus to Haifa, which takes a S.W. direction to the Jordan, and then crosses the whole length of the fertile plain of Esdraelon in a N.W. direction to the neighbourhood of Mount Carmel. The meeting of this road with the first-mentioned in the plain of Esdraelon confers great strategic importance on the plain. There armies could meet, victual themselves, and find room to manœuvre both with footmen and with chariots. There, too, in ancient times stood four of the chief fortresses of Palestine, put there to hinder the free use of the great plain by an enemy (cf. G. A. Smith, *HGHL*² ch. xix. pp. 387–390). The third great strategic route lies east of the Jordan and runs from Damascus through Sela (Petra) to the port of Elath at the head of the Gulf of Akabah.

Besides these three great routes, none of which touched the heart of the land of Israel, some others must be mentioned which gave access to the central range. Two of these are mentioned below as giving strategic importance to Gilgal. A third, starting from the modern Jenin, crosses several small plains and easy passes (cf. *HGHL*² ch. xvi. p. 327), and gives access from the north to the city of Samaria. It is a route which must often have been followed by Syrian invaders. On the west, the hill-country of Judæa was pierced by several rugged and winding passes, the best known being that which is marked by the Upper and Lower Beth-horon. These passes were the scene of much of the irregular fighting which went on between the Philistines and Israel.

Before leaving this subject one possible strategic line, lying for the most part outside Palestine, must be mentioned, i.e. the sea route from the Egyptian Delta to the coast of Palestine. The possession of this line gave the king of Egypt an advantage over the rival power (Assyrian or Babylonian) in the Euphrates Valley, in that it enabled him to threaten his enemy's line of communications by landing troops in his rear. It has been suggested that Pharaoh-neco reached Megiddo partly by the sea route in the reign of Josiah (but cf. *HGHL*² p. 406, note 2), and it is possible that there is an allusion in Dt 28⁸ to the possession of such a route by Egypt (but cf. Driver, *in loco*).

Of localities of strategic importance the plain of Esdraelon has already been noticed. A second spot of similar interest is the plain of Gilgal, the S.W. part of the Arabah or 'plains of Jericho.' Here Israel encamped after crossing the Jordan (Jos 4¹⁹ 10⁶; cf. Jg 2¹), and here the headquarters remained, until a more central place, either Shiloh (Jos 18¹ 22¹² 24¹ [LXX]), or Shechem (Jos 24¹ [MT]), was secured to Israel. From Gilgal a pass leads westwards over the great central ridge by Bethel and the two Beth-horons down to the maritime plain. Some distance north of Gilgal another pass leads up the Wady Farah (*Fāri'ah*), sometimes identified with the Brook Cherith, in a N.W. direction to Shechem. The first of these routes was probably followed by Joshua in his marches on Ai (Jos 8³) and on Gibeon (Jos 10⁶⁻⁷); the second is probably

referred to in Jg 1²²⁻²³, where the conquest of Bethel by the house of Joseph is recorded.

In this enumeration of routes and localities no reference has been made to Jerusalem. Indeed its strategic importance was not great. Neither Alexander of Macedon (*pace* Jos. *Ant.* xi. viii.; cf. Piepenbring, *Histoire*, pp. 590-592), nor Napoleon Bonaparte when on the march to Egypt, deigned to turn aside to Jerusalem. To an Assyrian king engaged in a similar expedition, Lachish and Libnah (2 K 19⁸), both on the edge of the Shephelah (see Map), were each of more importance than the comparatively remote Jewish capital. It was the political influence of Hezekiah over the Philistine malcontents which caused Sennacherib to detach a strong force (2 K 18¹⁷) against Jerusalem. Isaiah was right in holding that it was possible for Judah to maintain a policy of isolation in the face of the clash of the great powers of western Asia. These powers seldom desired to encumber themselves with such 'a burdensome stone' (Zec 12¹) as Jerusalem. Shishak, king of Egypt, did indeed capture the city in the reign of Rehoboam, but only because Solomon had made it a city worth plundering (1 K 14²⁵⁻²⁶). Hazael, king of Syria, 'set his face to go up against Jerusalem,' but commuted his hostility for a payment in money (2 K 12¹⁷⁻¹⁸). Similarly was Sennacherib bought off once at least (2 K 18¹⁵⁻¹⁶). Pharaoh-neco, king of Egypt, slew Josiah at Megiddo and deposed Jehoahaz at Riblah 'in the land of Hamath,' but does not seem to have turned aside to Jerusalem (2 K 23²⁹⁻³⁰). Nebuchadrezzar was at least equally contemptuous. Jehoiakim was in a state of rebellion against Babylon for eight years, but the great king contented himself with sending marauding bands against his vassal. Jerusalem was outside the sphere within which great captains contended with great armies.

Samaria, on the other hand, was comparatively of great strategic importance. It stands on a commanding hill (well shown in Sir R. Temple's *Palestine Illustrated*, p. 180) where the important road from Jenin meets at right angles the broad, 'fat valley' (Is 28¹) which slopes westward towards the plain of Sharon and the Mediterranean. Eastward, passes of no great difficulty lead to the fords of the Jordan. Thus Samaria was strategically as well as politically 'the head of Ephraim' (Is 7⁹).

We have now had occasion to mention representatives of three classes of fortresses in Palestine. On the south-west, Libnah, Lachish, Gezer, and Beth-horon guarded Judah against Egypt, the Philistines, and the inhabitants of the Sinaitic Peninsula. On the edge of the plain of Esdraelon stood Megiddo, Jezreel, and other fortresses closing the different approaches. On the central ridge, Jerusalem and Samaria were strongly fortified. Two classes of fortresses remain to be mentioned. On the border between the northern and southern kingdom Geba and Mizpah and other cities were built to stop the passage of possible fugitives and deserters and to watch the frontier (1 K 15¹⁶⁻²²). Lastly, the great fortresses east of Jordan, of which perhaps Ramoth-gilead was the most important (1 K 22³, 2 K 8²³⁻²⁴), must be mentioned; nor must the watch-towers, built to protect the roads and watch over the pastures, be forgotten (see TOWER).

The geographical conditions of Palestine were such that the kind of warfare best known to the Hebrews must have been the foray. The south of Judah lay open to the Amalekites and other predatory tribes (1 S 30). On the east were the Midianite freebooters (Jg 6²⁻⁴). Against these the Jordan was an ambiguous defence, for, if the invaders could seize one of the fords by surprise, they could hold it with a rearguard against

pursuers while the booty was being safely carried off into the desert. The Philistines (1 S 13¹⁷), the Moabites (2 K 13²⁰), and the Hebrews themselves (David, 1 S 27⁸; Joab, 2 S 3²⁹; and Gad, Gn 49¹⁹) were much given to making raids ('roads,' AV).

ii. THE METHOD OF WAR.—(a) *The Preliminaries*.—Wars were regularly begun in the spring, in order that if possible operations might be concluded before the beginning of winter (cf. 2 S 11¹). Yet winter did not always bring relief from the pressure of war (Jer 8²⁰), and sieges were sometimes prolonged over twelve months, e.g. that of Samaria (three years, 2 K 17⁵) and Jerusalem (eighteen months, 2 K 25¹⁻³).

Something approaching to a declaration of war was sometimes given, e.g. by Amaziah of Judah to Jehoash of Israel (2 K 14⁹), and negotiation was sometimes tried, e.g. by Jephthah with the king of Ammon (Jg 11¹⁴), in order to avert war; but such instances are not common.

Before beginning a war, efforts were generally made to gain religious sanction for the step. Inquiry of God was made before the ark (Jg 20²⁷⁻²⁸ [Heb. and LXX] and 1 S 14¹⁸ [Heb. only]), or before a priest wearing the ephod with Urim and Thummim (1 S 14¹⁸ [LXX only], 1 S 28⁶ [Heb. and LXX], and 1 S 30⁷ [Heb. and LXX]), or through a prophet (Micaiah, 1 K 22¹⁹), or by means of dreams (Gideon, Jg 7¹³), or even through a familiar spirit (the witch of Endor, 1 S 28⁷). Hence the phrase 'to consecrate' a war or warriors; JI 3⁹, Mic 3⁸, Jer 6⁴; Is 13³, Jer 22⁷ 51²⁷⁻²⁸. Moreover, the ark was sometimes carried by Israel into the field (1 S 4³⁻¹¹, 2 S 11¹), and, on the other hand, the Philistines took 'their images' with them (2 S 5²¹). When there was no ark to go forth, individual Israelites were found who carried into battle 'consecrated tokens of the idols of Jamnia' concealed under their garments (2 Mac 12⁴⁰).

The people in general were warned of the approach of an enemy or summoned to war (1) by the blowing of trumpets (1 S 13³, Ezk 33⁴⁻⁶, Am 3⁶); (2) by putting up ensigns on bare heights to mark rallying places (Is 13³), or by kindling fires on suitable hill summits (Jer 6¹ [AV]); (3) by sending messengers throughout the land (Jg 7²⁴, 1 S 11⁷). It was sometimes necessary to rouse a warlike feeling by unwonted appeals to indignation or to fear; in Jg 19²⁹ the Levite sends the pieces of his divided concubine into every part of Israel, and in 1 S 11⁷ Saul sends the hewn pieces of a yoke of oxen throughout Israel with the threat of so destroying the cattle of any who should be slack to obey his call.

In advancing to attack, a leader gave his troops a watchword ('for Jehovah and for Gideon,' Jg 7¹⁸; cf. 2 Mac 8²³ *δοὺς σύνθημα θεοῦ βοηθίας*, also 13¹⁵ *θεοῦ νίκης*); and sometimes a 'pæan' was sung (2 Ch 20²¹, 2 Mac 12²⁷ *καταρξάμενος τὴν μετ' ὁμων κραυγὴν*).

(b) *Strategy as illustrated by campaigns conducted in Palestine*.—Strategy is the art of choosing the right route by which to attack or await the enemy. For an instance of consummate strategy we may take the Philistines' conduct of the campaign of Gilboa (1 S 28-31). Instead of attacking Israel by the direct route through the defensible valleys of the south-west, where chariots could hardly pass, much less manœuvre, the army of Achish, with its chariots and horsemen, struck northward, aiming at the fertile plain of Esdraelon, and drawing Saul away from his Benjamite strongholds. The Israelites failed to close the passes over the eastern end of Mount Carmel, and the Philistines poured into the plain, where they could victual their large army and use their chariots with effect. Saul's hillmen could not meet the enemy in such a place with much hope of success.

Their king was outmarched and outmanœuvred. No wonder that his stout heart trembled when he saw the Philistines in force on this vantage-ground (1 S 28⁴⁻⁶). The battle of Gilboa was from the first only a forlorn hope for Israel. On the other hand, when the Philistines 'came up to seek David' (2 S 5¹⁷⁻²⁰), their strategy was faulty. Despising the enemy, they twice came up the Judæan (or possibly the Benjamite) valleys into the small plain of Rephaim (between Jerusalem and Bethlehem). Twice did David await his opportunity in the hold (v. 17) hard by, and twice did he inflict a severe defeat upon the Philistines. They failed because through over-confidence they chose a route more favourable to the enemy than to themselves.

(c) *Tactics*.—The tactics of the Israelites in the earliest days were very simple, but often very effective. First a surprise gained by stratagem, and then a sudden rush of men in which personal prowess had its full opportunity. For such warfare the strong individuality of the Hebrew race fitted them in a very high degree. The stratagems described in the historical books belong to all periods and are of various kinds.

(1) *Night marches and night attacks* were frequent. Joshua marched all night to the relief of Gibeon, and, it seems, surprised the Amorites at dawn (Jos 10⁹). Mesha (Moabite Stone, line 15) captured Nebo from Israel by similar tactics. Gideon assailed the Midianite camp 'at the beginning of the middle watch' (Jg 7¹⁹), i.e. about midnight. Saul attacked the Ammonites in the morning watch, i.e. shortly before dawn (1 S 11¹¹). Joram, king of Judah, when surrounded by the Edomites, cut his way through them *with his chariots* by night—a great feat, needing a clear night and able leading (2 K 8²¹). (2) An *ambush* was a favourite stratagem. By this Ai was captured (Jos 8¹⁰⁻²⁰), and Gibeah (Jg 20³⁰⁻⁴⁴). The Syrians tried it against Israel without success (2 K 6⁸⁻⁹). With the ambush a pretended flight of the main body was often combined. (3) Similar to the ambush was the device of *giving a deserted appearance to a camp*, in the hope of taking the enemy at a disadvantage when he came to spoil it (2 K 3²⁴, cf. 7¹²). (4) A well-organized force *could be divided* just before an engagement, and the enemy put at a disadvantage by attack from more than one direction (Gn 14¹⁵, 2 S 18³, cf. v. 8).

The usual defensive tactics of the Hebrews consisted of standing in close order, shield touching shield, with spears carried at the charge, and of awaiting the attack of the enemy on higher ground and with the front protected by a wady or other obstacle. Such probably was the array (מַדְרָכָה *ma'drakhāh*) with which they fronted the Philistines in the valley of Elah (1 S 17²¹). In such a position they were unassailable, and things might well remain at a standstill for *forty days* (v. 16 [not in LXX B]). Unless the position could be turned by a flank movement, the only resource left to an assailant was to seek to shake the steadiness of the array by enticing the prominent warriors to leave their posts to engage in single combats. This resource the Philistines in the valley of Elah tried in vain. 'The men of Israel [when they saw Goliath] fled from him [back to their places in the array]' (v. 24).

Israel's simple tactics were really adapted only to broken country, such as the hill-country of Judah, with its caves and deep rugged wadis. The enemy when defeated said, not without truth (1 K 23²³), 'Their god is a god of the hills; therefore they were stronger than we.' For more scientific tactics we have to look to Israel's foes. We see such in use at the battle of Gilboa. Saul, like Harold at Hastings, had formed his army

probably in close order on a hillside up which the enemy must advance to attack. But the Philistines, like the Normans towards the close of the battle of Hastings, prepared the way for the decisive attack by flights of arrows. Saul fell like Harold, pierced through by the archers (1 S 31³). Then, and not till then, the Philistines could trust their chariots and horsemen to make a successful charge up the slope (2 S 1⁶), and a decisive victory was won.

Another good though unsuccessful piece of tactical skill was shown by the Syrians at the battle of Ramoth-gilead. The Syrian king massed his chariots (1 K 22³¹), and endeavoured to obtain a decisive effect by employing them at a decisive point, viz. the person of Ahab. Ahab escaped this danger through his disguise, and was thus able to encourage his army by his presence 'until the going down of the sun.' Thus Israel was repulsed but not routed at Ramoth-gilead.

(d) *Fortresses* played an important part in the wars of Palestine. In the days of the Judges Israel had no fortresses, but had to take refuge from Midianite (Jg 6²) and Philistine oppression (1 S 13⁶) in cave districts and among the mountains. But the land is studded with heights suitable for fortified posts, and under the kings these were crowned with walled cities.

Fortresses (cities 'having gates and bars,' 1 S 23⁷) were surrounded by walls of stone or of sun-dried bricks, built often close to the precipitous sides of a hill or mound.* If there were no precipice near to defend the wall, then a trench (חֶלֶל *hēl*) was added. Samaria had such a trench (1 K 21²² ['wall' AV, 'rampart' RV]); and Jerusalem, though none was needed on the E., where ran the deep valley of Jehoshaphat, probably had one elsewhere (La 2⁵).

The walls of Jerusalem were strengthened with towers and furnished with battlements (Jer 5⁹ 'thy branches' [RV, prob. a poetical term for 'battlements' AV], cf. Zeph 1¹⁶ and 2 Ch 26⁵). On the walls were placed engines for throwing arrows and great stones (2 Ch 26¹⁸).

Of the attack of strong places by the Israelites we have many notices. Jericho was captured by *coup de main* with an ease in which Israel rightly saw the hand of God; the *falling of the walls* seems to be a metaphor describing the failing of the hearts of the defenders (Jos 6³, cf. 2¹¹). Similarly, Judas Maccabeus is said to have captured a strong city by 'rushing wildly against the wall' (ἐνέεισαν ὀπισθῶς τῇ τοίχῃ, 2 Mac 12¹⁵). Sometimes fire was applied to burn the gates or to set fire to a wooden defence (Jg 9¹⁸⁻²⁴); this device is also pictured on the Assyrian reliefs. As early as the time of David the 'mount' or 'bank' (גִּבְעָה *gib'eh*, see below) was employed (2 S 20¹⁵). If these means of attack failed, the besiegers were obliged to maintain a wearisome blockade, until surrender was brought about by famine or treachery. The fall of Rabbah was perhaps hastened by threatened water-famine (2 S 12²⁷). The Syrians (Arameans) probably used engines (1 K 20¹² [RVm]); and the Assyrians, as masters of the art of war, practised regular siege operations. Great shields or screens were raised against the wall (Is 37³³), behind which archers were set to keep under the 'fire' of the defenders. Under cover of this bombardment a causeway was built (perhaps by captives) from the Assyrian camp to the city to be attacked. Rising gradually in height, it was pushed nearer and nearer the city. Such a mound, when it touched the wall, might be used to facilitate an escalade or to bring the battering-ram on a level with the upper part of the wall. Another instrument of attack used

* Compare Flinders Petrie (*Tell el-Hesi*, 1891) and F. J. Bliss (*A Mound of many Cities*, 1894).

by the Assyrians was a movable tower occupied by archers. If these archers succeeded in clearing the wall of its defenders, the tower could then be pushed up to the wall and the place taken by storm (cf. 1 Mac 13⁴⁵⁻⁴⁶). The steps in a siege are enumerated in Ezk 26⁸⁻⁹.

(c) *Payment to warriors on service* was apparently made chiefly in the form of booty. There are, however, some allusions to pay of an ordinary kind. Amaziah is said to have hired 100,000 men from Israel for his expedition against Edom for 100 talents of silver (2 Ch 25⁶). The Assyrian warrior from the time of Sargon was a paid foreigner, not an Assyrian peasant (*KAT*³ p. 64). The Chaldean armies of Nebuchadrezzar were also mercenary (*ib.* p. 109). Antiochus Epiphanes opened his treasury, and gave his forces pay (*δψώνια*, cf. Ro 6²³, 1 Co 9⁷) for a year (1 Mac 3²⁸). But booty meant more to a warrior than pay, as the disappointment of the Israelite mercenaries shows (2 Ch 25¹⁰⁻¹³, cf. Jg 5¹⁹). Booty was to be divided in equal shares between those who went into the battle and those who guarded the camp (1 S 30²⁴⁻²⁵). A chosen part was sometimes dedicated to the Lord (silver and gold, 2 S 8¹¹; sheep and oxen, 1 S 15²¹), or reserved for a leader (1 S 30²⁰).

iii. *THE CONDUCT OF WAR*.—The treatment of conquered enemies was often very severe. David removed the Ammonites from Rabbah and the other cities of Ammon which he captured, and put them to the hardest task-work in the form of hewing stone and making brick (2 S 12³¹). The allied armies of Israel, Judah, and Edom deliberately made a desert of Moab, filling the good land with stones, stopping the wells, and cutting down the good trees (2 K 3²⁵). Joab slew every male whom he found in Edom (1 K 11¹⁶). The still more horrible cruelty of massacring women with child is more often ascribed to the enemy than to Israel itself (the Syrians in 2 K 8¹², Menahem of Israel in 2 K 15¹⁶, Ammon in Am 1¹³).

More reasonable severity was shown by expatriating the flower of an enemy's army (the first Chaldean captivity, 2 K 24¹⁴), breaking down part of the wall of an enemy's city (2 K 14¹³ and 25¹⁰), and taking hostages (2 K 14¹⁴).

Two instances of mildness are worthy of note. Ahab let Ben-hadad of Syria go free on his consenting to a treaty (1 K 20³⁴); 'the king of Israel,' on Elisha's advice, fed and dismissed in safety a detachment of Syrians whom the prophet had taken by stratagem (2 K 6²⁰).

There is some uncertainty as to the treatment of the Canaanites by Israel at the conquest. It is true that, according to the earliest document (JE), only one family, that of Rahab, was saved alive at Jericho (Jos 6²¹⁻²³); that at Ai all persons were put to the sword (8²⁴⁻²⁶); and that at Makkedah five kings were slain in cold blood (10¹⁶⁻²⁷). On the other hand, the passages (Jos 10²⁸⁻⁴³ 11¹⁴⁻²³) which represent the extermination of the Canaanites as carried out by the Israelites from one end of Palestine to the other are usually referred to a later document (D², the work of the redactor of Deuteronomy), and, moreover, these passages cannot be reconciled with the very early document from which Jg 1 is taken, nor again with Jos 15⁶³ 17¹¹⁻¹⁸. It is clear from many precise statements in Joshua and Judges that Israel was not able to carry on a war to the knife; the conquerors were obliged to grant terms to the conquered. It may indeed be objected that Dt 20 (which belongs to the kernel of the book) enjoins the massacre of the Canaanites. But (1) D no less than D² is a later document than JE; (2) it is far from improbable that Dt 20¹⁰⁻¹⁴ contains the earlier law (applicable even to war with the Canaanites), and that the exclusion of the Canaanites from the benefits of this law (vv. 15-18) is due to the author himself, who wrote under the influence of the spirit which was soon to manifest itself in the violent reformation of Josiah (2 K 23¹⁻²⁰). We conclude that the Canaanites were in part massacred, in part reduced to task-work, in part borne with on sufferance, in part taken into Israel by intermarriage.

iv. *TREATIES*.—Treaties of peace were granted to a beaten foe, the most common condition being the payment of an indemnity (Sennacherib to Hezekiah in 2 K 18¹⁴). A modern-sounding treaty

is that made by Ahab with Ben-hadad (1 K 20³⁴): cities captured from Israel were to be restored and the right to trade in Damascus was to be conceded. An instance of a barbarian's treaty is that offered by Nahash of Ammon to Jabesh-gilead (1 S 11²) on the condition that the right eye of every male defender (? or of every inhabitant) of Jabesh-gilead should be put out. Savage as the offer is, it was probably seriously meant.

v. *THE OUTLOOK OF THE PROPHETS ON WAR*.—The earliest prophets show no horror of war as war, but lead or encourage their own people to resist the enemy. Deborah the prophetess rouses her countrymen against Sisera (Jg 4⁴⁻⁹) and gives the signal for the battle (v. 14). Samuel is at the head of the rising against the Philistines (1 S 7³⁻¹², perhaps a late passage, but of importance in this connexion). An unnamed prophet encourages Ahab against Ben-hadad (1 K 20¹³⁻¹⁴). Elisha's prophetic activity is the turning-point in the campaign against Moab (2 K 3¹¹⁻²⁰); and the same prophet, on his deathbed, heartens Joash of Israel in the contest with Syria (2 K 13¹⁴⁻¹⁹). An interesting touch of mercy or of good policy appears in Elisha's treatment of the Syrian prisoners in 2 K 6²¹⁻²². In the writing prophets, however, from Amos onwards we have a wider outlook upon war. War is no longer a mere event; it has become a symbol. The coming Day of the Lord is associated with terrible wars (Am 5-7, Is 13⁶⁻¹⁸, Jl 3 [4]⁹⁻¹⁷). On the other hand, the Latter Days are to be marked by universal peace, between nation and nation and even between man and beast (Is 21⁴ 9²⁻⁷ 11⁶⁻⁹, Mic 4¹⁻⁴; cf. Zec 14⁹⁻¹¹ 16¹⁰).

vi. *ALLUSIONS TO WAR IN THE N.T.*—In the Gospels three references to war, all in Luke, call for notice. In 3¹⁴ στρατευόμενοι ('soldiers on service,' RVm) ask for and receive counsel from John the Baptist. In 14³¹ our Lord takes a lesson from the action of a king in calling a council of war, and in 19⁴³ He prophesies that the enemy will cast up a *bank* (χάρακα) against Jerusalem. On these passages cf. Plummer's *St. Luke*. In the Epistles, St. Paul shows in a dozen references to a soldier's career that he looked at it with interest and even with sympathy. He calls the Christian life 'the good warfare' (1 Ti 1⁶), refers to the soldier's *δψώνια* (1 Co 9⁷), holds up the soldier's ideal of service for imitation (2 Ti 2³⁻⁴), praises the Colossians as an inspecting officer might praise a legion (Col 2⁶), and compares the recovery of the erring for Christ to the taking of captives alive in battle (2 Ti 2²⁶). The apostle, moreover, describes himself in words of startling sternness as waging a warfare *οὐ κατὰ σάρκα* against pride and disobedience in his converts (2 Co 10²⁻⁶). In the Apocalypse there are several references to the great struggle between the saints and the powers of evil. There is 'war in heaven,' which results in the dragon and his angels being cast down to earth (Rev 12⁷⁻¹²). The Beast (τὸ θηρίον) makes war with the saints by commission from the Dragon (13⁷, omitted by AC, etc., has the support of the Syriac text—Philoxenian?—published by Gwynn, 1897). The kings of the whole world (τῆς οἰκουμένης δυνάμεις) are gathered together to Har-magedon for 'the war of the great day of God the Almighty' (16¹²⁻¹⁶). The Word (ὁ λόγος) of God, who 'in righteousness doth judge and make war,' leads the armies which are in heaven to final victory over the Beast (19¹¹⁻²¹).

The general teaching of the NT on war can hardly be better given than in the following words: 'We have seen then so far that war is sanctioned by the law of nature—the constitution of man and the constitution of society; and by the teaching and practice of Christ and of His immediate disciples. Certain limitations are im-

posed, on the ground of expediency, by society; and, in the ideal brotherhood of men to which the Christian gospel teaches all men to aspire, war would be impossible. But, with a view to the necessary process of the attainment of this ideal, war in the abstract is not condemned. Here as always the Christianity of Christ looks to the motive' (Bethune-Baker, *Influence of Christianity on War*, 1888, p. 18).

LITERATURE.—Benzinger (1894), *Heb. Archäologie*, p. 360 ff.; Nowack (1894), *Heb. Archäologie*, i. pp. 357-375 (very full); G. A. Smith, *HGHL* (passim). See also ARMOUR, CAMP, ENGINE, FENCED CITIES. W. EMERY BARNES.

WARD.—The Eng. word 'ward' is another spelling of 'guard.' 'Ward' is the older Teut. form (Anglo-Sax. *weard*), 'guard' came in through the Old Fr. *garder*: cf. wage-gauge, warrant-guarantee. Both forms are used in AV, though, with one exception,* the same words are not translated by both. The form 'guard' had not then been very long in use, but was already freely used synonymously with 'ward.' The Anglo-Sax. *weard* is the same in the masc. = 'a guard,' 'defender,' and in the fem. = 'guarding,' 'defence'; hence 'ward' is used in both these senses, as well as for a body of men on guard and the place in which one is guarded, a prison. Bunyan makes a distinction between 'ward' and 'guard': *Holy War*, p. 94, 'He sent special orders to Captain Boanerges . . . to put them all three in ward, and that they should set a strong guard upon them.'

'Ward' in AV means: (1) A body of men on guard; Jer 37¹² (*pekiduth*, only occurrence; lit. 'oversight,' OHL tr. 'סמל' 'sentinel'); Ac 12¹⁰ (*φυλακή*). (2) The office of guarding, the defence: 1 Ch 12²⁹ (*mishmereth*, RV 'allegiance'); Neh 12⁴⁶ (*mishmereth*). (3) The position of the guard, post: 1 Ch 25⁸ *bis* 'ward against ward' (RV 'for their charges,' Heb. *mishmereth*); 28¹⁶, Neh 12²⁴ (all *mishmār*); Is 21⁸ (*mishmereth*); Jth 8²⁶ (*diarais*, RV 'station'). (4) The place for guarding, prison, cell: Gn 40⁸, 47 41¹⁰ 42¹⁷, Lv 24¹², Nu 15³⁴ (all *mishmār*); 2 S 20² (*mishmereth*); Ezk 19⁶ (*gagar*, only occurrence; RV 'cage'); 1 Mc 14² (*φυλακή*).

The adverbial suffix 'ward,' expressing direction towards a place, was formerly used with great freedom. In AV we find 'to Godward' Ex 18¹⁹, 2 Co 3⁴, 1 Th 1⁸; 'to theeward' 1 S 19⁴; 'to usward' Ps 40⁸, Eph 1¹⁹, 2 P 3⁹; 'to youward' 2 Co 1¹² 13³, Eph 3⁸; and 'to the mercy-seatward' Ex 37⁹, besides the adverbs northward, reeward, thitherward, and the like. Cf. 'To himward' Dt 32⁶ Tind.; 'to themward,' Berners, *Froissart*, 16; 'to Israel warde' Nu 32¹⁴ Tind.; 'to the city-ward,' Berners, *Froissart*, 16; 'whiche waye soo ever warde,' Erasmus, *Crede*, 46. J. HASTINGS.

WARE (Anglo-Sax. *warn*; Skeat thinks the orig. sense was 'valuables' is used in AV (in both sing. and plu.) for merchandise. The sing. occurs Neh 10³¹ (*מִכְרָא*), 13¹⁶ (*מִכְרָא*), 13²⁰ (*מִכְרָא*); and the plu. in Jer 10¹⁷ (*מִכְרָא*), Ezk 27¹⁶ (*מִכְרָא*), AV 'the wares of thy making,' RV 'thy handi-works'), 27²³ (*מִכְרָא*), Jon 1⁸ (*מִכְרָא*). We still retain 'warehouse,' which Coverdale gives as two words, Jer 40¹⁰ 'Therefore gather thou wyne, corne and oyle, and kepe them in youre ware houses.'—See FAIRS. J. HASTINGS.

WARE.—'Ware,' 'aware,' and 'wary' are forms of the same adj., the *a* in 'aware' representing the Anglo-Sax. *ge* (*gewær*, Middle Eng. *iwar*, *ywar*), and the *y* in 'wary' being an addition. 'Ware' occurs in Mt 24⁴⁰ (1611, mod. edd. 'aware'), Ac 14⁶, 2 Ti 4¹⁵. So Lv 5¹⁸ Tind. (5¹⁸ 'And the preast shall make an attonement for him for the ignor-

* The exception is *mishmār*, which is usually tr'd 'ward,' but in Ezk 37⁷ Neh 4²² is rendered 'guard'; RV makes no changes.

ance whiche he dyd and was not ware'); Lk 11⁴ Rhem. 'Woe to you, because you are as monuments that appeare not, and men walking over, are not ware.' Udall (in *Erasmus' Paraph.* ii. 278) uses 'ware' for modern 'wary'; so Erasmus, *Crede*, 127, 'ware and wyse circumspection.' 'Wary' occurs in AV in 2 Es 7²², and 'wariness' in Sir 11¹⁸. J. HASTINGS.

WARS OF THE LORD, BOOK OF THE (מִלְחָמֹת יְהוָה; LXX B ἐν βιβλίῳ [A βιβλίῳ] ἱστορίας τοῦ κυρίου).—An authority quoted in Nu 21¹⁴ to settle a question about the boundary between Moab and the Amorites. In all probability, the other two citations in the above chapter are from the same source. The last of these is indeed referred (v. 27) to a poem circulating amongst the *mōshelim* or reciters of sarcastic verses, but this does not prove that it was not incorporated also in the 'Wars of J'. The book in question is mentioned nowhere else in the OT, for its identity with the 'Book of Jashar,' although contended for by some, cannot be established. From the title we can readily infer the contents of the book. It was doubtless a collection of songs which celebrated the victories gained by Israel in its religious wars from the Mosaic age downwards. The title was chosen by men who delighted to think of J' as Israel's commander-in-chief (יהוה צבאות, 'J' of the hosts [of Israel]'). Cf. the words in the Song of Moses in Ex 15³ 'The LORD is a man of war.'

The meaning of all the three citations in Nu 21 is more or less obscure. The purity of the text is not beyond suspicion, and it may be also, as several critics hold, that some of the extracts refer to events which happened later than the Mosaic age, and that the narrator has only partially succeeded in accommodating the original language to the new context. Stade, for instance, believes that the third quotation has in view incidents that occurred during the wars between Israel and Moab under the dynasty of Omri. The argument of Wellhausen, that the Well-song (vv. 17, 18) should be metaphorically interpreted of the conquest of the Moabite city Beer (well), is plausible but not convincing. If Cornill is right in assigning the whole passage in which the citations occur to E, there is probability also in his conjecture that 'the book of the Wars of the LORD' originated in the N. kingdom. Its composition will in any case hardly be later than B. C. 750.

It is only fair to mention that some deny that Nu 21¹⁴ furnishes any evidence whatever for the existence of a book called 'the Wars of J'. Sayce (*Academy*, 22nd Oct. 1892) would render the passage thus: 'Wherefore it is said in a (the) book, The wars of J' were at Zarahab in Suph,' etc. It may, however, be safely predicted that few will agree to follow this line of interpretation.

AT*, 221; Kittel, *Hist. of Heb. l.* 90; Kautzsch, *Heil. Schr. d. AT*, Bellagen, 136; Budde, 'The Well-song' in *New World*, March 1895; Driver, *LOT* 6 121.

J. A. SELBIE.

WASHINGS.—See UNCLEAN.

WASHPOT (סִרְיָה).—Only fig.: 'Moab is my washpot,' Ps 60⁸ = 108⁸ (LXX Μωὰβ λέβητος τῆς ἐλπίδος μου, Vulg. *Moab olla spei mee*, taking סִרְיָה in its Aram. [cf. Dn 3²⁸] sense of 'trust'). Like the parallel 'Upon (or unto) Edom will I cast my shoe,' the expression appears to combine the ideas of ownership and of contempt. Cf. art. SHOE.

WASP (σφήξ, Wis 12⁸ AV and RVm; RV 'hornet,' see HORNET).—The common wasp, *Vespa vulgaris*, is very abundant in the East. The general colour

of its body is yellow, variegated by a longitudinal black line. Its nest is composed of a papery substance, made by chewing up the wood and bark of trees, and is formed of hexagonal cells, like those of the bee. Wasps swarm in the neighbourhood of houses in the summer, and boldly enter them to feed on the meats, sweets, and fruits on the table. They also frequent the vineyards, esp. where grapes are spread out to dry into raisins. They invade the caldron in which grape juice is boiled down to *dibs*, and shops where sweets and fruits are sold. Other *Vespidæ* are also included under the general title wasp. The hornet belongs to the same tribe, and both of these hymenopterous insects are closely related to the bee.

G. E. POST.

WATCH.—A division of the night. See **TIME**, p. 766^b.

WATCHER (Aram. ܪܝܬܐ, Theod. *etp*).—A title applied to angels in Dn 4¹³, 17, 22 [10, 14, 20]. It means 'wakeful one' (Aq. Symm. *εγρηγορος*), and occurs with great frequency in the (Ethiopic) Book of Enoch (see vol. i. p. 707), as well as in Jubilees (4¹⁵ 8³ 10²) and the Syriac Fathers. It is hardly likely that in Daniel it has already acquired the restricted sense of *εγρηγορος* in these later writings; more probably it is a designation of angels in general. See the Comm., esp. Driver, *ad loc.*

WATER in EV is usually the equivalent of מַיִם or מֵיָא.

In 2 K 18²⁷, Is 36¹³ RV 'water' represents מַיִם and *Kêrê* has מַיִם. In 2 Co 11³⁶ 'waters' stands for *νεκρῶν* (RV 'rivers'). 'Watercourse' is the tr. of מַקְדָּלָה (Job 38³⁵ RV 'waterflood'), of מַיִם (Is 44⁴), and of מַיִם (2 Ch 32³⁰ RV 'spring of waters'). The last phrase is also rendered 'waterspring' (Ps 107³³, 36), and 'spring of water' (Is 41¹⁸ 53¹¹). 'Waterspout' is the tr. of מַיִם (Ps 42⁷ RVm 'cataract'), and 'waterflood' of מַיִם (Ps 69¹⁶).

The verb 'to water' represents various Heb. expressions. It stands in Pr 11²⁶ for the Hiph. of מָצַק ('to throw [rain]'); in Ps 68 for the Hiph. of מָצַק ('to melt'); in Ps 65⁹ for the Piel of מָצַק ('to run over'); in Ps 36¹⁰ for the Qal, in Ps 65¹⁰, Is 16⁹ for the Piel, and in Pr 11²⁶, Is 55¹⁰ for the Hiph., of מָצַק ('to be saturated'); and in Gn 26¹⁰ 29² 7¹⁸, Ex 21¹⁰, Dt 11¹⁰, Ps 104¹³, Ec 2⁶, Is 27³, Ezk 17⁷ 32⁶, Jl 3¹⁸ for מָצַק ('to give to drink'). מָצַק is tr. 'well watered' in Gn 13¹⁰, and 'watered' in Is 58¹¹, Jer 31¹³. In Ps 72⁶ 'showers that water' stands for the apposition מְרִיָּאִים וְיָרֵיָּאִים ('showers—a down-pour'). 'Watering' in Job 37¹¹ is for מָצַק (RV 'moisture'). 'Watering' in Lk 13¹⁵ and 'to water' in 1 Co 3⁶ represent מָצַק, 'to drink water' (1 Ti 5²²) is the tr. of מִשְׁכָּה. 'Waterpot' (Jn 2⁶ 7 4²⁸) is for מִשְׁכָּה, and 'without water' (2 P 2¹⁷, Jude 12) for מִשְׁכָּה. 'To have (i.e. to be supplied with) water' (Jth 7¹³) is for מִשְׁכָּה. 'Tōpazuyōis' (Sir 24²⁰) is tr. 'conduit.'

מָצַק is once rendered by 'washing' (Neh 4²³ RV 'water'). In Jos 11¹⁸ 13⁶ the word is retained as part of a proper name (מִצְרַיִם מִיִּם).

Water is among the commonest and most widely diffused of natural substances, and the Scripture allusions to it are consequently both numerous and varied. At ordinary temperatures it is a liquid, transparent, yet capable of reflecting light from its surface (Pr 27¹⁹). When heated to the boiling point it is converted into invisible vapour (Is 64⁷), and the same process of evaporation takes place gradually at lower temperatures (Job 24¹⁹). When cooled below the freezing point it solidifies into hard, transparent, brittle ice, which is compared to a stone (Job 38²⁰), and to a breastplate (Sir 43²⁰). The water vapour in the air may be condensed by cooling into the small drops of cloud or mist, or the larger drops of rain (Job 36²⁷), or it may be deposited on the surface of objects as dew. If the cold in the atmosphere is sufficiently great,

the moisture may fall in frozen drops as hail, or in feathery ice-crystals as snow (see **CLOUD**, **DEW**, **HAIL**, **RAIN**, **SNOW**). Among the most characteristic physical properties of water is that of quenching fire. The antagonism of these two 'elements' appears in 1 K 18³⁸, Wis 19²⁰.

The water which the earth receives partly flows along the surface in the form of brooks, streams, and rivers, or gathers in ponds, lakes, and seas; and partly sinks beneath the ground, from which it may flow forth again in springs and fountains (Gn 16⁷, Dt 8⁷ etc.), or be recovered by sinking pits and wells (see **WELL**).

Water plays an important part in changing the earth's surface (Job 14¹⁹), but the process is so slow that the streams, etc., which effect it seem to be among the most permanent features of the landscape, and acquire a geographical significance. Thus we have the 'water' of Nephtoi (Jos 15⁷ 18¹⁵), of Jericho (Jos 16¹), of 'the pool Asphar' (1 Mac 9³⁰), of Jordan (1 Mac 9³⁰), and of Gennesar (1 Mac 11⁶⁷); the 'waters' of Merom (Jos 11⁶ 7), of En-shemesh (Jos 15⁷), of Megiddo (Jg 5¹⁹), of Nimrim (Is 15⁹), and of Dibon (Is 15⁹); the 'great waters that are in Gibeon' (Jer 41¹²).

A situation on a navigable river or by the sea gave a city great commercial and other advantages; e.g. Babylon (Jer 51¹⁸) and No (Nah 3⁸, here esp. as a defence, cf. Is 33²¹).

The waters, like the earth and the air, have their population of living creatures (Gn 1²⁰ 21²²), among which only those with fins and scales (i.e. fish) were recognized as clean by the Mosaic law (Lv 11⁹ 10 12 48, Dt 14⁹ 10). Images of fishes (Dt 4¹⁸), and of anything living in the water (Ex 20⁴, Dt 5⁴), were forbidden. The 'dragons in the waters' (Ps 74¹³) appear to have been mythical sea-monsters symb. of Egypt; see **SEA-MONSTER**.

Water is indispensable to all forms of life on the earth, whether animal or vegetable. Vegetation is refreshed by rain, dew, etc., and is specially luxuriant where there are streams or springs to moisten the soil. We read of the effect which the presence of water has on trees (Job 14⁹ 29¹⁹, Ps 1³, Jer 17⁸), cedars (Nu 24⁶, Ezk 31⁴), vines (Ezk 17⁸), willows (Is 44⁴), flags or sedges (Job 8¹¹, Sir 40¹⁶ RV), and lilies (Sir 50⁸). One of these passages (Ezk 31⁴) shows how irrigation was practised in order to convey water from a river to all the parts of the ground under cultivation. Seed was sown beside the waters (Is 32²⁰), and even cast into them, as in Egypt when the Nile is in flood (Ec 11¹). The verdure of river-sides made them a favourite haunt of birds (Ca 5¹²).

Essential to vegetable life, water is equally essential to animals and man. It is enumerated among the necessities of life in Is 33¹⁶, Sir 29²¹ 39²⁶. Among its uses may be noticed—

(a) **Drinking.** Here particular references are unnecessary, except to the water which flowed from the rock in Horeb (Ex 17⁶) and Kadesh (Nu 20¹¹). Next to the absence of water, the greatest of evils was water which for any reason had become undrinkable. This was one of the **PLAGUES OF EGYPT** (vol. iii. p. 889), and similar calamities appear in the Apocalypse (8¹¹ 11⁶). Israel had an experience of bitter water at Marah (Ex 15²⁵).

The explanation of the remedy used by Moses on this occasion is uncertain. The tree may have had the natural property of purifying the water (see Sir 38²). Various plants are used in different parts of the world for a similar purpose. Rosenmüller (*A. u. n. Morgenl.* ii. 28 ff.) mentions *Nellimaran* in Coromandel, *Sassafras* in Florida, and *Yerva Caniani* in Peru. It seems doubtful, however, whether any plant now growing in the Sinaitic desert has such an effect, though Lesseps (*L'isthme de Suez*, p. 10) says he has been told by Arab chiefs that a certain bitter thorn, growing in the desert, is used by them in this way. Burckhardt (*Travels in Syria*, 474) suggests that the berries of the plant called *Gharkad* (*Peganum retusum*) might have been employed, but other travellers have not found them

effectual (Robinson, *BRP* i. 931; Ebers, *Durch Gosen zum Sinai*, 1167.).

The waters of Jericho were bad in Elisha's day (2 K 219.22), but no explanation save a miraculous one can be given of the remedy used in this case.

Drinking water might be fouled by the feet of animals (Ezk 32²⁻¹³ 34¹⁸). Certain bitter potions receive special mention, such as 'water of gall' (Jer 8¹⁴ 9¹⁶ 23¹⁸), and the water mixed with the ashes of the golden calf (Ex 32²⁰). Water mixed with dust from the floor of the tabernacle was used in the ordeal of chastity described in Nu 5.

Water was not only drunk alone, but also mixed with wine (Ps 75⁸, Pr 9², 2 Mac 15²⁰). The incident of the making of water into wine at Cana is given as the earliest of the miracles of Jesus (Jn 2⁶ 4⁴⁶). Water for domestic purposes was usually drawn by women (Gn 24¹³, Ex 2¹⁶, 1 S 9¹¹, Jn 4⁷) or by servants (Dt 29¹¹). The Gibeonites were reduced to this menial office (Jos 9¹⁶). In Mk 14¹³ || the unusual circumstance of a *man* bearing a pitcher of water enables the two disciples to recognize their guide. Supplies of drinking water were carried in skins, larger or smaller (see BOTTLE), and we hear also of vessels of earthenware and stone.

(b) **Washing** of clothes (Jer 13¹), of the hands (Job 9³⁰, Mt 27³⁴), the feet (Gn 24³³ 43²⁴, Lk 7⁴, Jn 13⁵), and the whole person (Jth 10³ 12⁷). The 'pour water upon the hands' is synonymous with being a servant (2 K 3¹¹). In the ceremonial system of the OT, washings occupied a prominent place. The priests were washed at their consecration (Ex 29⁴), and the Levites were sprinkled when they were set apart to their special duties (Nu 8⁷). There was a laver before the tabernacle, in which the priests washed their hands and feet before offering sacrifices (Ex 30¹⁸⁻²¹ 40⁷⁻³²). Special ablutions were required on particular occasions, such as the Day of Atonement (Lv 16²⁴⁻²⁸). The sacrificial flesh was washed before it was burnt (Lv 9¹³ 8²¹). Washing was a frequent process for removing ceremonial defilement (Lv 11²² 15⁵ 17¹⁵, Dt 23¹¹). A specially interesting case is that of recovery from leprosy (Lv 14⁸⁻⁹). In connexion with leprosy and certain other forms of uncleanness *running* water required to be used (Lv 14⁵, 6. 50. 51. 52 15¹³, Nu 19¹⁷). The 'water of separation' used for sprinkling the unclean (Nu 19, He 9¹³) consisted of running water mixed with the ashes of a heifer that had been burnt along with cedar wood and hyssop.

(c) **Cooking**, as in Ezk 24³.

(d) **Medicinal Bathing** (Jn 5²⁻⁴).

In Eastern lands, where so much depends on the presence of water, the distress caused by drought is very great, and is often vividly described in Scripture (Is 10⁴, Jer 14³, Jl 1²⁰). The same result follows when a water-supply is cut off, which was a common operation of warfare and siege. Jehoshaphat and his allies stopped the wells of Moab (2 K 3¹⁹⁻²⁰). Holofernes did the same for Bethulia (Jth 7⁷ 8⁹ 11¹³). Hezekiah, when besieged by Sennacherib, succeeded in reversing this proceeding, and in securing water for the besieged while the besiegers were deprived of it (2 Ch 32³⁻⁴, Sir 48¹⁷). When water is scarce from such causes, it has to be doled out carefully (La 5⁴, Ezk 4¹¹⁻¹⁶). 'Water of affliction' seems to mean a supply that is limited either from scarcity (Is 30²⁰) or as a punishment (1 K 22²⁷, 2 Ch 18³⁶).

Water, though so necessary, is also a source of danger. It may cause death by suffocation (2 K 8¹⁵) or by ordinary drowning. Of the latter the Flood and the overthrow of the Egyptians at the Red Sea are the most notable Scripture instances. In the miracle of Christ's walking on the water (Mt 14²²) we see this natural property for once overcome. Water may be destructive from its force when agitated by storms (Ezk 27²⁶⁻³⁴, Wis

5²², Lk 8²³⁻²⁵), or when rushing along in a torrent (2 S 5²⁰, Rev 12¹⁵), or from its simply submerging the works of man (Ezk 26¹²⁻¹⁹).

'Water' is used for tears (Ps 119¹³⁸, Jer 9¹, La 1¹⁶ 3⁴⁸), and for the liquid that flowed along with the blood from the pierced side of Christ (Jn 19³⁴). The nature of the latter has been much discussed, and all attempts at ordinary physiological explanation seem doubtful. The commentaries must be consulted for the various views that have been suggested. See also MEDICINE (vol. iii. p. 326²). The substance NEPHTHAR (which see) is called 'thick water' (2 Mac 1²⁰ 21. 21. 22).

In the *biblical cosmogony* water held an important place. There was a primitive waste of waters, which was divided into two portions by the firmament. The upper portion was the source of rain. The dry land rose out of the lower portion and was founded upon it. The FLOOD, in which both the waters above and those beneath were let loose (Gn 7¹¹), was a catastrophe provided for by the very structure of the universe (2 P 3⁶). These and similar cosmological ideas appear in Job 28¹⁰, Ps 33⁷ 104²⁻⁶ 148⁴, Pr 30⁴, Is 40¹³, Jth 9¹³ 16¹⁵. While the heathen deified the waters as well as the other forces of nature (Wis 13²), the biblical conception consistently subordinates them to God. He controls the waters of the thunderstorm (2 S 22¹³, Ps 18¹¹ 29⁷ 77¹⁶⁻¹⁷, Jer 10¹³ 51¹⁴). The division of the Red Sea is His work (Ps 78¹², Is 43¹⁶ 51¹⁰). It is in obedience to Him that the water flows from the rock (Ps 114⁸). It is He who moves the sea (Am 5⁸ 9⁶). The voice of God is compared to the sound of many waters (Ps 93⁴, Ezk 43³. Cf. Rev 1¹⁵ 14² 19⁶).

The metaphorical usages of water are numerous. The want of it is an emblem of spiritual need (Ps 42¹ 63¹, Am 8¹¹), and its presence becomes, in some of the most beautiful poetry of Scripture, a figure for *spiritual refreshment* and blessing (Ps 23³, Is 30²⁶ 32² 35⁶⁻⁷ 41¹⁸ 43³ 44³ 49¹⁰ 55¹ 58¹¹, Jer 31⁸, Ezk 47¹⁻¹¹, Jl 3¹⁸, Zec 14⁸, Jn 7³⁸, Rev 7¹⁶ 21⁶ 22¹⁻¹⁷). It represents a blessing which may be neglected (Jer 2¹³ 17¹³ 18¹⁴). It suggests the gratefulness of *good news* (Pr 25²⁵); and *wisdom*, as the drink of the soul, is compared to it (Sir 15³). Water symbolizes the means of *moral cleansing* (Ezk 16⁴⁻⁹ 36²⁵, Eph 5⁶, He 10²²), with which we may connect the whole subject of BAPTISM, and also the conception of Christians as 'born of water' (Jn 3⁵, 1 Jn 5⁶⁻⁸). Bitter drink is a metaphor for *trouble* (Ps 73¹⁰), and water in its dangerous aspect is still more extensively so (Ps 18¹⁶ 32⁶ 46³ 66¹² 69¹⁻² 14 88¹⁷, Is 43³, La 3⁴, Jon 2⁹). *Enemies* are spoken of under a similar figure (Ps 124⁴ 144⁷, Is 8⁷ [Assyria] 17¹²⁻¹³ [the nations] 28²⁻¹⁷, Jer 47³).

Various subordinate metaphors are deserving of notice. Water becomes a figure for *instability* of character (Gn 49⁴), for *weakness and dissolution* (Ps 22¹⁴ 58⁷ 109¹⁸, Ezk 7¹¹), and for *worthlessness* (Wis 16²⁰). *Pride* passes like a ship that leaves no track on the waters (Wis 5¹⁰). The foam of water [or, perhaps better, a chip on a stream, cf. RVm] is an emblem of extreme *transiency* (Hos 10⁷). To give earth and water is a token of *submission* (Jth 2⁷). In Sir 15¹⁶⁻¹⁷ the *choice between life and death* is compared to that between fire and water. The *wickedness of Jerusalem* is likened to the water of a fountain (Jer 6⁷). Stolen water is an emblem for *secret sin* (Pr 9¹⁷), and the drinking of water is a figure for *unlawful love* (Sir 26¹²). To drink the waters of a country is to *conquer* it (2 K 19²⁴, Is 37²⁶), or to *seek alliance* with it (Jer 2¹³). The letting out of water has as its counterparts the *beginning of strife* (Pr 17¹⁴), or the giving of *liberty to a wicked woman* (Sir 25²⁵). *Apostate disciples* are compared to waterless wells (2 P 2¹⁷), or clouds (Jude 12). The *inconsistency of blessing and cursing*

is suggested by the impossibility of fresh and salt water coming from a fountain together (Ja 3¹⁰⁻¹²). The salt in the sea corresponds to *God's wrath against the heathen* (Sir 39²³). The smallness of a waterdrop compared with the sea is an image of *the relation of time to eternity* (Sir 18¹⁰). Deep water is a figure for *wise counsel* (Pr 18⁴ 20²). *Judgment and righteousness* are likened to the waters of a mighty stream (Am 5²⁴). The extent of the sea is made to suggest the universal spread of *God's glory* (Is 11⁹, Hab 2¹⁴).

JAMES PATRICK.

WATERSPOUTS.—Only Ps 42⁷ 'Deep calleth unto deep at the noise of thy waterspouts' (RV 'cataracts'); Heb. מְרִימֵי מַיִם וְקוֹל מְרִימֵי מַיִם; LXX ἀβυσσος ἀβυσσον ἐπικαλεῖται ἐς φωνὴν τῶν καταρακτῶν σου. The only other occurrence of the word מַיִם is in the very obscure passage 2 S 5⁸, so that its meaning is somewhat uncertain, although in late Hebrew it means a *spout or pipe* (cf. Job 38²⁵ 'Who hath cleft a channel for the waterflood?'; מְרִימֵי מַיִם). The reference in Ps 42⁷ is prob. to the numerous noisy waterfalls in a stream swollen by the melting of the snow (see Duhm, *ad loc.*).

WAVE - BREAST, WAVE - OFFERING.—See SACRIFICE.

WAW (letter).—See VAU.

WAX.—See WRITING, p. 945^a.

WAX.—This verb, which means to *grow* (Middle Eng. *waxen*, Anglo-Sax. *weaxan*, allied to αἰξάνειν), is frequently used in AV, and gives another syn. for 'grow,' as in Lk 1⁸⁰ 'And the child grew, and waxed strong (ἐκπαραιοῦτο) in spirit,' 13¹⁹ 'And it grew, and waxed a great tree' (ἐγένετο εἰς δένδρον μέγα, RV 'became a tree,' omitting μέγα with edd.). Cf. Maundeville, *Travels*, 105, 'In Ethiopia, when the children be young and little, they be all yellow; and when that they wax of age, that yellowness turneth to be all black.' The word is sometimes used with scarcely more meaning than 'become,' as Nu 11²³ 'Is the Lord's hand waxed short?' So Mt 26²⁷ Tind. 'And he toke with him Peter and the two sonnes of Zebede, and began to wexe sorrowfull and to be in an agonye'; Lk 11³³ Tind. 'The Pharises began to wexe busye aboute him.' It was, however, formerly used in the sense of *grow or increase*, without an adjective (it is never so used in AV), as Ac 6⁷ Wyc. 'The word of the lord waxed'; Gn 9⁷ Tind. 'See that ye encrease, and waxe.'

J. HASTINGS.

WAY (דֶּרֶךְ, מִסְלָל, מִסְלָלָה), meaning literally either road* or journey, is used by a natural figure for course or manner in a great variety of applications. It is used for God's purpose or action (Ex 33¹³, Job 21³¹ 36³, Ps 67² 77¹³, Pr 8²², Is 26⁸ 40³, Job 21¹⁴ 34²⁷), described by varied epithets of excellence (Ps 25¹⁰, 2 S 22³¹, Ps 18³⁰, Dt 32⁴, Rev 15², Dn 4³⁷, Hos 14⁹, Job 26¹⁴, Ro 11³³), defended against doubt (Ezk 18²⁶⁻²⁹), and contrasted with man's plans and doings (Is 55⁸); also of His commandments (Gn 18¹⁹, Ex 18²⁰ 32², Dt 9¹³ 11²² 31²⁹ Jg 22², Job 23¹¹, Ps 37²⁴ 119¹⁴, Jer 5⁴, Mal 2⁸, Mt 22¹⁶, Mk 12¹⁴, Lk 20¹, Dt 5³³ 8⁶ 10¹² 11²² 19² 26¹⁷ 28³⁰ 30¹⁶, Jos 22⁵, Ps 18²¹ 25⁴ 51¹³ 81¹³ 95¹⁰ 103⁷ 119⁹ 128¹ 138⁵, 2 S 22²², 1 K 2³ 31⁴ 8³⁸ 11²³⁻²⁵, Is 2² 42²⁴ 58² 63¹⁷ 64⁶, Jer 7²³), which He is ready to teach men (Ps 25⁸⁻⁹ 12²⁷ 32⁸ 86¹¹ 119²⁷⁻²⁹ 33³⁷ 139²⁴ 143⁸, Is 30²¹ 35⁸, Jer 32²⁹ 42³, Mic 4², Ps 16¹¹ 119³⁵⁻¹⁰⁵ 23³), and in obedience to which there is reward (Pr 8²¹, Zec 3⁷, Mal 2⁹). Man's conduct generally is spoken of as a 'way' (1 K 2⁴ 8²³, 2 Ch 6¹⁶, Ps 119¹⁻⁹, Ja 5²⁰) or

'ways' (1 S 18¹⁴, Job 4⁸ 13¹⁵ 22³, Ps 39¹ 119²⁸, Ezk 16⁴⁷, Ac 14¹⁶, 1 Co 4¹⁷, Ja 1⁸, cf. Pr 6¹), morally contrasted as good (1 S 12²⁴, 1 K 8³⁸, 2 Ch 6²⁷, Job 31⁷, Ps 1⁶ 101²⁻⁴, Pr 2²⁰ 29⁷, Is 26⁷, Mt 21²¹, Ro 3¹⁷, 1 Co 12³¹, 2 P 2¹⁵⁻²¹) and bad (Gn 6¹², Nu 22³², Jg 2¹⁹, 1 K 13³³, Job 8¹⁹ 22¹⁵, Ps 1¹⁻⁶ 36⁴ 49¹², Pr 4¹⁴⁻¹⁹ 19², Ezk 3¹⁸, Hos 10¹³, Ps 10⁶ 125⁵, Pr 1¹⁹ 2¹²⁻¹⁵ 3³¹ 10⁹ 14² 22²⁵ 28⁶⁻¹⁸, Jer 15⁷). Although man is free to choose his own 'way' (Ps 119³⁰, Pr 7²⁵ 21²⁰ 23¹⁹), hating the evil 'way' (Ps 119¹⁰¹⁻¹⁰⁴⁻¹²⁸), or choosing it (Is 53⁹ 57¹⁷ 59⁸ 65², Jer 3¹, Is 66³), yet training is important (Pr 22⁶), and example, whether for good (Jg 2¹⁷ 2 Ch 20³², 1 K 22³), as David's (2 K 22², 2 Ch 11¹⁷ 17³), or for evil (1 K 15²⁵, 2 K 21²¹, Pr 1¹⁵ 16²⁹ 28¹⁰, Is 3¹², Jer 2¹⁸ 10² 18¹⁸, Ezk 23³²⁻³¹), as of the kings of Israel (2 K 8¹⁸ 16², 2 Ch 21¹⁸⁻¹³ 28²), of the house of Ahab (2 K 8²⁷, 2 Ch 22²), of Jeroboam (1 K 15³⁴ 16²⁻¹⁹⁻²⁸ 22³²), of Balaam (2 P 2¹⁵), and of Cain (Jude 11); but example is not always followed (1 S 8²⁻⁵, 2 Ch 21¹²). As a man's course is well known to God (Job 24²³ 31⁴ 34²¹, Ps 119¹⁰⁰ 139², Pr 5²¹, Jer 16¹⁷), He deals with him according to his deserts (1 K 8³², 2 Ch 6³³, Ps 146⁹, Jer 4¹⁸, Ezk 7²⁷ 11²¹ 16⁴³ 22³¹ 36¹⁹, 1 K 8³⁰, 2 Ch 6³⁸, Job 34¹¹, Pr 14¹⁴, Jer 17¹⁰ 32¹⁹, Ezk 7³ 18²⁰ 24¹⁴ 33³⁰, Hos 4⁸, Zec 1⁹) in spite of occasional appearances to the contrary (Ps 37⁷). But God desires men to consider their 'ways' (Ezk 20⁴³ 16⁶¹ 36³¹⁻³², Hag 1⁵) and turn from the evil (2 K 17¹³, 2 Ch 7¹⁴, Pr 5⁸, Is 55⁷, Jer 7³⁻⁵ 18¹¹ 25⁵ 26³⁻¹³ 35¹⁵ 36³⁻⁷, Ezk 18³ 33¹¹, Jon 3⁸⁻¹⁰, Zec 1⁴), which He hates (Pr 8¹³ 15⁹); and He promises to guide them into the good (Pr 4¹¹ 8²⁰), which He loves (Pr 11²⁰). There are two 'ways' before man (Jer 21⁸, Mt 7¹³⁻¹⁴, cf. Lk 13²⁴⁻²⁵, also *Didache*, i. 1, and *Ep. of Barnabas*, xviii.), one of which leads to life, peace, and happiness (Pr 6²³ 10¹⁷⁻²⁰ 11⁵ 12²⁸ 13⁶ 15²⁴ 16¹⁷, Ac 2²⁸, Ro 3¹⁷, Pr 3¹⁷ 16⁷ 4¹⁸), and the other to death, trouble, and misery (Pr 7²⁷ 13¹⁵ 14¹² 16²⁵ 21¹⁶ 22⁵ 22²⁸, Is 59⁷), in spite of man's illusions (Pr 12¹⁵⁻²⁸ 21²). This close connexion between conduct and condition is shown in the use of 'way' or 'ways' for man's lot as well as his deeds (Gn 28²⁰, Ex 23²⁰, Dt 1³¹, Jos 1⁸, Jg 18⁵⁻⁶, Dt 28²); the literal sense is in these six passages passed over to the figurative, which appears clearly in 2 S 22³³, Ps 18²², Job 3²³ 19⁸ 23¹⁰ 22²² Ps 35⁶). A man may think of ordering his lot after his own wishes (Pr 16⁹, Jer 10²³), but God disposes it according to His own will (Ps 37²³ 85¹³, Pr 2⁸⁻¹², Ps 91¹¹, Dn 5²³), to which it is well for man to commit himself (Ps 37², Pr 3⁹). One lot none can escape, for death is 'the way of all the earth' (Jos 23¹⁴, 1 K 2², cf. Job 16²¹).

The purpose of God, foretold by the prophets (Is 40³, Mal 3¹) and fulfilled in Christ, is described as the 'way of the LORD' (Mt 3³, Mk 1²⁻³, Lk 3⁷⁻⁷⁷, Jn 1²³, Ac 18²⁵⁻²⁶, cf. Ac 13¹⁰), of peace (Lk 1⁷⁹), of truth (2 P 2²), and of salvation (Ac 16¹⁷). Christ Himself is (Jn 14⁶⁻⁶), or has opened up, the way for man to God (Heb 9⁸ 10²⁰); and, accordingly, the Christian religion is spoken of simply as 'the Way' (Ac 9² 19⁹ 22²¹ 24¹⁴), either because Christ claimed to be the Way (Jn 14⁶), or because He had spoken of the narrow way unto life (Mt 7¹⁴); or, lastly, because in Him was fulfilled the prophetic saying regarding the way (Is 40³, Mal 3¹).

A. E. GARVIE.

WAYMARK.—In Jer 31²¹ (20) 'the virgin of Israel' is called on to set up waymarks and make guide-posts to mark the way for the returning exiles. The Heb. word מַסְמָר 'waymark' is מַסְמָר, which apparently means here a small stone pillar, similar to our milestones, with an indication of routes and distances. The only other occurrences of the Heb. term are 2 K 23¹⁷ (of the tombstone of the man of God from Judah; AV wrongly 'title,' RV 'monument') and Ezk 35¹⁰ (of the stone to be set up to guide the burying party

* For an account of the main roadways of Palestine see articles TRADE AND COMMERCE, p. 805^b, and WAR, p. 802^b.

to a corpse; AV and RV 'sign'). In Jer 31 [Gr. 38]²¹ the LXX, confusing with צִיּוֹן (Zion), reads *στῆσον σεαυτὴν*, Σ(ε)ῶν; in 2 K 23¹⁷ it has *σκόπελον*, and in Ezk 39¹⁵ *σημείον*.

WEALTH.—i. *Terms.*—In OT 'wealth' is *tr*²² of *חַיִל* *hôn*, *πλούτος*, etc., *divitiæ*; *חַיִל* *hayil*, *πλούτος*, *divitiæ* [but also, as its proper meaning is 'strength', 'resources', *δύναμις*, etc.]; *טוֹב* *tôbb*, properly 'good', 'prosperity', an Elizabethan sense of 'wealth'; *קוֹחַ* *kôah*, properly 'strength'; *נְכָסִים* *nekhasim*, *τὰ ὑμάρχοντα*, *χρήματα*, *substantia* [only in post-exilic literature; the corresponding Aram. *נְכָסִים* in Ezra is *tr*²³ 'expenses', 'goods']; and in NT of *εὐπλοία*, *acquisition*. 'Wealthy' *tr* in AV *רַחֵם*, Jer 49³¹ ('quiet', 'ease'), but RV (from AVm) 'that is at ease'; 'wealthy place' stands in Ps 16¹² for *רַחֵם* ('saturation'), prob. error for *רַחֵם* 'a spacious place.' The common term for 'riches' is *עָשָׂר*.

ii. *National wealth* would consist in the fertility, etc., of the soil, the minerals, streams, pasturage, population, cattle, etc.; in the neighbourhood of the country to trade-routes, and in natural facilities of intercourse with other nations; cf. PALESTINE, TRADE. Dt 8⁷⁻⁹ describes the land as well-watered, rich in cereals, grapes, olives, figs, iron, and brass. It is possible, however, that these verses come from an exilic editor, and that the colouring is heightened by an exile's fond recollections of the ancient home of his people. The older description 'flowing with milk and honey,' Nu 13²⁷ (JE), suggests that the wealth of the land was chiefly pastoral. Naturally, the settled government of the monarchy fostered trade, and promoted a certain accumulation of wealth, especially in the days when the Israelite States were independent and powerful, and were receiving, and not paying, tribute, e.g. in the days of Solomon (1 K 10¹⁴⁻²⁵) and in the early days of Isaiah (Is 27). Dt 8¹²⁻¹³ looks back to prosperous periods such as these. Nevertheless, in view of the uncommercial character of the people, and the barrenness of large portions of the country, especially in Judæa, Israel can hardly have been wealthy, even in proportion to its population, as compared with great commercial and conquering nations. We gather from the prophets of the 8th cent. that in Israel, as elsewhere, the material well-being of the people generally was greater in the earlier stages of the history, before the development of civilization led to the accumulation of land in large properties.

The Jewish community in Palestine after the Exile was poor, and burdened with tribute to Persia; and, as it seems, with wealthy nobles who preyed upon the necessities of their brethren (Neh 13⁵, Hag 16¹¹ 26¹⁷, Zec 8¹⁰, Mal 3¹¹). Time, no doubt, brought some improvement; and a measure of prosperity resulted from the work of Nehemiah; but the tone of the Psalms and other literature of the Persian and earlier Greek period suggests that the people generally, at any rate, were poor. There was, however, some revival of national wealth under the later Maccabean kings, and still more under the Herods: witness the splendid buildings of Herod the Great. In addition to a settled government, two other causes contributed to produce this result. First, Palestine could not fail to profit in some measure by the growing prosperity of the Roman empire. Secondly, the Jews of the Dispersion often engaged in commerce and became wealthy; the sanctity of the temple brought vast crowds of pilgrims to Jerusalem for the great feasts, and increased the trade of the city; also, devout Jews and proselytes sent costly offerings to the temple. In the thirty or forty years, however, before the fall of Jerusalem, Palestine suffered severely from misgovernment and disorder.

iii. *Individual wealth.*—In the outlying pastoral

districts we meet with men like Nabal in southern Judah (1 S 25) and Barzillai in Gilead (2 S 17²⁷⁻²⁹), rich in flocks and herds and slaves; and their circumstances suggested the terms in which the wealth of the patriarchs is described, e.g. Gn 24³⁵. The chief use which such men had for their possessions was to maintain a great retinue, which gave them power and distinction. Another class of rich men consisted of chiefs, kings, priests, and other great officials, like Gideon, Abimelech, Jephthah, Eli, and the kings of Israel and Judah. Their authority brought them wealth (1 S 8¹¹⁻¹⁷). We learn from the prophets of the 8th cent. (Is 5⁸⁻¹⁰ etc.), that towards the end of the monarchy there grew up a class of great landowners; and Neh 5 illustrates the process. In bad times the 'nobles and rulers' lent money, probably at exorbitant rates, on the security of the land, which became forfeit to them when the borrowers failed to fulfil their obligations. The allusions in the Prophets show that wealth had now become an instrument of luxury and display. Apart from Solomon, we have no instance in the OT of the successful Israelite merchant, of wealth gained by trade.

In the NT wealthy men like Joseph of Arimathea and the young ruler appear upon the scene; such, too, figure in parables (e.g. Lk 16¹⁰⁻¹²), and in the teaching; but none of them play any important part in the history of our Lord or the early Church. Both in the Gospels (Mk 10²³⁻²⁷) and elsewhere (e.g. Ja 5¹⁻⁶) wealth is represented as involving spiritual disadvantages, and as accompanied by high-handed injustice, and by persecution of the Church.

W. H. BENNETT.

WEAN (נָחַ).—For the Eastern usages connected with weaning see art. BIRTH, vol. i. p. 301^b. The meaning of Ps 131¹ ('Surely I have stilled and quieted my soul; like a weaned child upon his mother, my soul is upon me like a weaned child') is that the Psalmist has learned to renounce lofty aspirations, as the weaned child has learned to dispense with its mother's breast.

WEAPONS.—See ARMOUR.

WEASEL (יָחַל *hōled*).—The authority of the LXX γαλή and Vulg. *mustela* (Lv 11²⁹) is in favour of the EV 'weasel,' and others of the *Mustelidae*, as the marten and civet. The authority of the Arab. *khuld*, the cognate of *hōled*, which signifies the *opaka* or mole-rat of the East, would be against the rendering 'weasel,' were it not that cognates often have widely different meanings. In the articles CHAMLEON and MOLE we have given all the evidence that bears on the question. It is perhaps best to follow the LXX and Vulg., and render 'weasel,' which must be held, however, to include other *Mustelidae* in Palestine, as the marten, *Mustela foina*, L. (Arab. *nims*), the ichneumon, *Herpestes Ichneumon*, Fisch. (Arab. *nims* and *zerdi*), and the genet, *Genetta vulgaris*, C. A. Gray (Arab. *nims* and *sammur*), and others.

G. E. POST.

WEAVING (נָחַ 'weave,' נָחַ 'web' or 'shuttle.' Besides AV occurrences, RV gives 'weave in chequer work' for AV 'embroider' [רָצַף] in Ex 28³, and 'weave together' for AV 'wrap up' in Mic 7², where MT נָחַץ is prob. corrupt).—Weaving is closely connected with spinning, as the materials for the loom were, for the most part, products of the spindle. Weaving, like spinning, is a very ancient art, one of the first invented by civilized man, being necessary for the preparation of his clothing, and we find abundant evidence of it upon the monuments. The early proficiency of Egyptian weavers is established by the remains of their textile fabrics, some of their lincen products being like silk to the touch, and equal to our finest

cambric in texture (Wilkinson, *Anc. Egypt*. ii. 161, ed. 1878); and vestures of fine linen are mentioned in the story of Joseph (Gn 41⁴²). The goodly Bab. garment found at Jericho indicates the skill of the Chaldean weavers; and the 'fine linen,' the 'finely wrought garments' (Ex 31¹⁰ RV), and other articles of similar character mentioned in Ex. by P, as prepared for the tabernacle, and the garments of the priests, make it evident that the Hebrews had attained proficiency in the art. Weaving was generally carried on by men in Egypt, but women sometimes engaged in it (Herod. ii. 35; Wilkinson, i. 316, 317), and this seems to have been true of the Hebrews also (2 K 23⁷, Pr 31²⁴). The loom was of various kinds, upright and horizontal, and the woof was pushed both upwards and downwards (Wilkinson, ii. 170, 171). The Hebrews after arriving in Palestine would have a similar variety, but in the desert they might use simpler forms, such as are still found there. Burckhardt (*Bed. and Wah*. i. 67) describes a loom which consists of two short sticks driven into the ground at such distance apart as the width of the piece to be woven requires, and upon these a cross-piece, two other similar stakes with cross-piece being placed at a convenient distance from the first. Upon these cross-pieces the threads of the warp are stretched, the upper and under threads being kept apart by a flat stick. The common loom of the country to-day is quite simple, and has no doubt been used for centuries without much change. Two upright posts are fixed in the ground, which hold the roller to which the threads of the warp are fastened, and upon which the cloth is wound as it is woven. The threads of the warp are carried upward towards the ceiling at the other end of the room, and pass over rollers, and are gathered in hanks and weighted to keep them taut. The different sets are kept apart by reeds. The weaver sits at the cloth-roller and works the shuttle, while the healds are worked by treadles. We have no mention of the loom as a whole in the Bible, but from the incidental notices of various parts we infer that it did not differ greatly from that now in use. Thus we have the *beam*, with which a great spear or its staff is compared (1 S 17⁷, 2 S 21¹⁹, 1 Ch 11²³ 20³), from which we should infer that the cloth-roller is intended. In Jg 16¹⁴ the loom itself may be meant, the word in Heb. (אָרֶגֶת) being derived from the verb to weave, while the word in the other passages (אָרֶגֶת) is from quite a different root. The *pin* (אָרֶגֶת) in the above passage seems to be that which holds the web, i.e. the cloth-roller, for Samson carried it all away attached to his hair. The *shuttle* (אָרֶגֶת) is the emblem of the swift passing of human life (Job 7⁶), and the *thread work* (אָרֶגֶת) or *thrums* (Is 38¹²) which fastens the web, furnishes, by its being cut off at the hands of the weaver, a striking simile for sudden death. These and other notices indicate that weaving was a household word with the Hebrews, and it is quite probable that many families produced their own wearing apparel, as did that of the virtuous woman (Pr 31). The products of weaving were various: fine linen, purple and scarlet, woollen, goats'-hair cloth, tent-cloth, sack-cloth, etc., were produced in abundance. Garments of flax and wool together were forbidden (Lv 19¹⁹, Dt 22¹¹), but stuffs of variegated patterns worked in the loom, perhaps by gold thread, were produced as we know they were in Egypt (Wilkinson, ii. 166). This work may be that of the 'cunning workman,' and of those who 'devise cunning works' (Ex 35³⁵) [see, on these expressions, EMBROIDERY (3)], and certainly it is the clothing 'inwrought with gold' (Ps 45¹³ RV). The high priest's garments seem to have been of this character, woven in one piece (Jos. Ant. III. vii. 4), as we know Christ's coat (χιτών) was (Jn 19²³).

H. PORTER.

WEDDING.—See MARRIAGE.

WEEDS, as tr. of *קוצ' suph*, Jon 2⁶ (6), refers to sea weeds. The Red Sea was called קוצ' because of the numbers of them in its waters (see SUPH). The weeds (*χότρος*) of Sir 40¹⁶ mean the same as our indefinite English term *weeds*.

i. *Introductory. The Sources, monumental and literary.*—The system of weights and measures adopted by a particular nation of antiquity is not merely a subject of interest to the metrologist, but is of importance to every student of the history and development of the human race. In its metrology we have a clue, frequently older than anything to be found in its literature, to the forces at work in shaping the social and economic development of this particular nation, and to the influence, it may be, which it was able to exercise in its turn. The early economic history of a nation or country, in particular, is a subject of which in many cases the student of metrology holds the key. This is to some extent true even of the economic history of the Hebrews, notwithstanding the comparative antiquity of their literature, and the almost entire absence of monumental evidence in the shape of actual weights and measures.

An outline of our still imperfect knowledge of Hebrew weights and measures may be expected to include the following topics:—(1) A presentation of the various systems—weight, measures of length, and measures of capacity—and of the mutual relation of the various denominations within each system; (2) an attempt to determine the absolute value or values of each individual weight and measure in terms of the British imperial system; and (3) the relation of the Hebrew system in its various divisions to the older metrological systems of antiquity. Reference will be made only incidentally to the question of the origin of weights and measures in general, and to the inter-relation of the various systems,—of the weight standards to those of length, and of both to the standards of volume,—subjects of equal interest and complexity, which belong rather to a scientific treatise on metrology. It must suffice at this stage to record the fact that most Continental metrologists are now agreed as regards the most elaborate of the ancient systems, and, it would appear, the source of all or almost all existing systems, namely the Babylonian, that it was constructed with rigid scientific accuracy upon the basis, astronomically ascertained, of the unit of length. A cubic vessel, a fraction of this unit in the side, furnished the unit of volume; the weight of water contained in this unit was the unit of weight (see below, §§ vi. ix.).

The sources from which are derived the materials

for such an outline as has just been sketched are of two kinds—monumental and literary. The former, unfortunately of the most meagre amount, consist of actual measures and weights, including coins, that have come down to us from the various periods of the national life of the Hebrews. The literary sources are, first of all, the books of the Bible, to which the works of Josephus, despite numerous inaccuracies, form an invaluable addition, owing to the frequent valuation of Jewish measures in terms of the contemporary Græco-Roman system. The treatises of the Mishna also contain valuable material for the first two centuries of our era. Finally, we have the late Greek writers on metrology, one or two fragments, in particular, showing accurate knowledge of the later Jewish system (see Hultsch's *Metrologiconum Scriptorum Reliquiæ*, 1864). Under both heads, monumental and literary, may be classed the metrological data furnished by the two great centres of early civilization, Babylonia and Egypt, on the one hand, and on the other by the better-known systems of Greece and Rome.

At every period of their history the Hebrews were alive to the necessity of an accurate system of weights and measures, and of an honest handling of the same. The earliest literary prophets are already found inveighing against the too pliant conscience of their contemporaries who made the ephah small and the shekel great (Am 8⁶); in other words, gave short measure in selling the necessities of life, while weighing the price to be paid against a weight that was unduly heavy. Amos' successors, Hosea (12⁷) and Micah (6^{10a}), were also led to denounce the 'balance of deceit' with its 'bag of deceitful weights,' and the 'scant ephah which is abominable.' Centuries later there is a sad monotony in the complaints of the religious teachers regarding the prevalent tampering with the 'just' weights and measures (Pr 11¹ 16¹¹ 20¹⁰). The first legislative action in the interests of economic righteousness in our extant records is found in the Deuteronomic legislation (Dt 25¹³⁻¹⁶). Here the practice of employing a double set of weights and measures—one above the normal for buying with, and another below it for selling with—is condemned, and 'whole and just,' i.e. accurately adjusted, weights and measures expressly enforced under promise of the Divine blessing. A similar demand for 'a just balance, just weights, a just ephah, and a just hin,' is emphasized in the Law of Holiness (Lv 19^{35a}), and in an important passage of Ezekiel's ideal constitution, to which attention will afterwards be called (Ezk 45⁹⁻¹²). The latest legislation even went so far as to order the periodical cleaning of the weights, scales, and measures, lest their true value and capacity should be impaired by the adhesion of foreign substances (*Baba bathra*, v. 10f.).

THE HEBREW WEIGHT-SYSTEM.—ii. (a) *The Babylonian or 252-grain unit.*—Just as the natural proportions of the human body furnished the earliest measures of length (see below, § vi.), so man in all probability 'made his earliest essays in weighing by means of the seeds of plants, which nature had placed ready to his hand as counters and weights' (Ridgeway, *Origin of Metallic Currency and Weight Standards*, 387). By the beginning of the third millennium B.C., however, both the Babylonians and the Egyptians had left this primitive system far behind them. The former, in particular, as early as B.C. 3000, and probably long before, had elaborated a metrological system which, in its scientific basis and inter-relation of standards, bears a striking resemblance to the metric system of the Continent (see art. BABYLONIA, vol. i. p. 218 f.). The importance of the Babylonian system for our present study is due to the fact, first clearly revealed in the

Tel el-Amarna correspondence, that the early civilization of Canaan was, in all essentials, of Babylonian origin. The grounds on which the older metrologists, such as Boeckh and Brandis, had long before inferred that the Babylonian weight-system had penetrated to Syria and Palestine, and the conclusive proof of the accuracy of this inference afforded by the Amarna tablets, have been given in the opening section of the article MONEY (vol. iii. p. 418), and need not be repeated here. It is essential, therefore, to understand the principle upon which this system was constructed. This was the now familiar sexagesimal principle, characteristic of the Babylonian scheme of numeration, the number 60 holding in this scheme the place of 10 in our decimal system. Thus 111 is not, as with us, $10^2 + 10 + 1$, but $60^2 + 60 + 1$, or 3661. Our division of the hour into 60 minutes, each of 60 seconds, it need hardly be said, is a direct legacy from the banks of the Euphrates. The unit of weight in the developed system was the mina (written ideographically MA.NA, and therefore presumably of Sumerian origin, though possibly Semitic), the Heb. מנא *maneh* (so AV Ezk 45¹², elsewhere 'pound') and the Gr. μνᾶ. The next higher denomination, its sixty-fold, was the talent (Heb. קר, apparently the *gaggaru* of the Amarna letters, in Greek τάλαντον), while below the mina was its 1/60th, the shekel (*shiklu*, Heb. שֶׁקֶל, from *shakalu*, 'to weigh,' hence rendered in Greek by στατήρ from *statēmi* in the same sense, and transliterated by στήλος). The scale may be graphically represented thus—

1 talent = 60 minas = 3600 shekels.

1 mina = 60 „

In the early temple-accounts, dating from B.C. 2000, recently recovered from Tellah in Southern Babylonia, there occurs a subdivision of the shekel into 180 *shé* or grains of wheat, which was afterwards discarded. This subdivision into 60×3 parts is of course an adaptation to the sexagesimal system; but it is worth noting that the prehistorical or natural Babylonian shekel, as it may be called, cannot have been far off the weight of 180 wheat-grains. If the weight of a grain of wheat be taken at the usual estimate of .70-.72 of a grain Troy (originally a grain of barley, according to Ridgeway, *op. cit.* 180 ff.), 180 such grains come to 126-130 Troy grains, which is precisely the weight of the shekel as given by the existing stone weights (see below). As there can be little doubt that the use of the balance was first employed for the precious metals, the shekel, as its name denotes, was almost certainly the earliest unit of weight, as it continued to be, to the exclusion of the mina, in the earlier Hebrew literature (cf. MONEY, vol. iii. p. 420^b for illustrations).

When we pass to the determination of the value of the shekel and the higher denominations in the Babylonian system, we find that this branch of metrology has been almost revolutionized by the discovery in recent years of a few very ancient inscribed stone weights from the earliest centres of civilization in Southern Babylonia. The evidence of these weights may best be represented in tabular form. For full description (with illustrations) reference must be made to the numerous essays of the discoverer, Dr. C. F. Lehmann (see Literature at end of article), esp. to *Das altbabylonische Mass- und Gewichtssystem*, etc., Leiden, 1893.

Here we have unexpected evidence that the double standard, familiar enough in the weights of the Assyrian period, in which each denomination (mina, shekel, etc.) of the one set weighed was *twice* the weight of the same denomination of the other set, was in existence at a very early period, for the weights in question date from B.C. 3000-2500. Weights of the former class are said to be

on the *heavy* standard, those of the latter on the *light* standard. Weight B, it will be found, repre-

| | Description of Weight. | Actual weight in grammes. | Weight of resultant mina in grammes. |
|---|--|---------------------------|--------------------------------------|
| A | Oval stone, about 4 in. long, with inscription in Sumerian, '½ mina, true weight,' etc. | 244.8 | 489.6 |
| B | Similar to A in form and material. Inscription uncertain. Clearly ½ of the foregoing, or ¼ mina. | 81.87 | 491.22 |
| C | Longish barrel-shaped stone of same hard greenstone as A and B. '½ mina, true weight; palace of Nabu-mesir, priest of Marduk'. | 164.3 | 492.9 |
| D | Cone-shaped stone, with long inscription in Babylonian. '1 mina, true weight—copy of weight or standard of Dungi . . . by Nebuchadnezzar . . . king of Babylon' [about 18 grains lost by fracture of the stone, originally 15,105 grains = 979.5 grammes]. | 978.3 | 979.5 |

sents the average mina of the light standard, viz. 491.2 grammes = 7580 grains. The corresponding mina of the heavy standard is therefore 982.4 grammes = 15,160 grains. The following table gives the values of the complete scale:—

VALUES OF THE EARLIEST BABYLONIAN WEIGHTS.

| | HEAVY. | LIGHT. |
|-----------------------------------|-----------------------|---------------------|
| Shekel | 252½ grains | 126½ grains* |
| Mina = 60 shekels | 15,160 | 7580 |
| | circa 2½ lb. avoird. | cir. 1¼ lb. avoird. |
| Talent = 60 minas = 3600 shekels, | | |
| | circa 130 lb. avoird. | " 65 " |

These new values are considerably less in the higher denominations than those previously adopted in metrological studies, which were based on the evidence of numerous lion and duck weights of a much later period from the ruins of Babylon and Nineveh, yielding minas of 15,600 (heavy) and 7800 grains (light standard), and shekels of 260 and 130 grains respectively. From the fact that several of the bronze lion weights bear inscriptions containing, *inter alia*, the phrase '1 mina, ½ mina, etc., of the king,' it has become customary to describe these as belonging to the *royal standard*, to distinguish them from the earlier or *common standard*. In addition to these two standards, Dr. Lehmann has brought forward evidence, to which we propose to add presently, to show that the common standard at some early period received an increase of 5 per cent., yielding minas of circa 16,000 and 8000 grains respectively. Whether or not this increase was intended to be confined to payments made to the royal treasury cannot be ascertained, but there is monumental evidence that Darius Hystaspis added just this percentage to the weights of his time (see the inscribed weight published by Budge, *PSBA* (1888), pp. 464–466; Lehmann, *Verhandlungen d. Berliner Gesell. f. Anthropologie*, etc. 1889, p. 273).

Returning now to the original mina of 15,160 (7580) grains, and shekel of 252 (126) grains, we find from a comparative study of the weight-systems of antiquity that the advancing tide of Babylonian civilization carried them to the shores of the Mediterranean, from whence they passed, in a bewildering variety of forms, to almost every civilized country. Thus, when the first Ptolemy

reorganized the metric system of his new kingdom, he introduced the light mina of 7580 grains as the standard trade weight of Egypt. This mina, again, is exactly 1½ times the Roman pound, or *libra*, of 5053 grains, which is one-third of the corresponding heavy mina. The available evidence, further, goes to show that the shekel of 252 grains was the unit for the weighing of gold adopted by the Hebrews, as it was the gold as well as the trade unit of Babylonia—as has been assumed in the article MONEY (see table, vol. iii. p. 419^b), although, in the light of recent discoveries, to be related in the sequel, and of the preference of the priestly legislation of the Pentateuch for the Phœnician or silver standard of the same table, the assumption of that article requires to be somewhat qualified. Still, when we compare the statement of the Hebrew historian as to the amount of Hezekiah's indemnity imposed by Sennacherib, so far as the amount of gold is concerned, viz. 30 talents (2 K 18¹⁴), with the latter's official account (see Schrader, *KIB* ii. p. 95), where precisely the same amount is recorded, we are bound to infer the identity of the Hebrew and Babylonian talent of gold. Then there is the statement of Josephus with reference to the weight (300 minas) of the beam of solid gold taken by Crassus from the temple treasury: ἡ δὲ μᾶ παρ' ἡμῖν ἰσχύει λίτρας δύο ἡμισυ (Ant. XIV. vii. 1 [Niese, § 106]). This gives a weight of 2½ Roman libras, or 12,630 grains, for the mina of 50 shekels, and 252½ grains for the shekel, or alternatively 126½ grains for the mina of 100 shekels (for this division see below). In either case, the result is the familiar shekel of the early Babylonian system. This yields a Hebrew gold monetary talent of 60 minas or 758,000 grains (c. 108 lb. avoird.). But another statement of Josephus shows that at least an article made of gold might have its weight stated in other terms; for he gives the weight of the golden candlestick, which was a talent according to Ex 25³⁹, as 100 minas (μνᾶς ἑκατόν), adding: Ἑβραῖοι μὲν καλοῦσι κίχχαρες (i.e. ἴσθ), εἰς δὲ τὴν Ἑλληνικὴν μεταβαλλόμενον γλῶτταν σημαίνει τάλαντον (Ant. III. vi. 7 [§ 144]). The mina of this passage is clearly distinct from the mina of the passage just cited, viz. ¼ of 758,000 grains, or 7580, which is the light Babylonian trade mina of 60 shekels of 126½ grains, as shown in the table, § ii. above. This explanation, suggested for the first time, has the merit of preserving the consistency of Josephus as regards the weight of the Hebrew gold talent. On the other hand, inasmuch as the weights of gold and silver in the Priests' Code are expressly stated to have been on the standard of the so-called 'shekel of the sanctuary' (see next §, and MONEY, vol. iii. p. 422), or Phœnician shekel of 224½ grains, 3000 of which yield a talent of 673,500 grains, the explanation of the passage adopted in the previous article (i.e.), that the 100 minas are Attic minas of 6735 grains, is perhaps to be preferred, even at the expense of the Jewish historian's consistency, and despite the fact that the Roman-Attic mina in his day weighed considerably less (see § v. below). These considerations, at least, show the difficulty of arriving at definite results in the absence of monumental data.

The persistence, side by side, of the two standards, the heavy and the light, explains how the heavy mina might by one writer be taken as containing 50 heavy shekels, by another as containing 100 light shekels. Thus it is that the weight of Solomon's smaller shields is given in 1 K 10¹⁷ as three (heavy) minas,* but in the parallel passage

* The mina (ἴσθ) is here first met with in OT. Elsewhere only Exr 280, Neh 771^c (in all three passages rendered 'pound' in EV), Ezk 4612 where it is transliterated 'maneh,' and Dn 523-27.

* This is only 3 grains heavier than the English sovereign, 123.274 grains.

(2 Ch 9¹⁶) as 300 (light) shekels, assuming, that is, that the text of both passages is intact. If the explanation given elsewhere (MONEY, vol. iii. p. 421^b) of the new denomination, *darkemôn*, found only in the historical work, Chronicles—Ezra—Nehemiah, is correct, that we have here a Hebraized form of the Greek δραχμή, we have further confirmation of the prevalence in the Persian and early Greek periods of the light, in preference to the heavy, shekel. The weight of 1000 drachms (AV 'drams,' RV 'darics,' Ezr 8²⁷), for example, is undoubtedly 1000 of the light Perso-Babylonian shekel on the royal standard, viz. 130 grains (see above), the theoretical value of the Persian daric.

The same weight is most probably intended by the unique expression employed to indicate the weight of Ahsalom's hair, viz. '200 shekels after the king's weight' (שֶׁקֶל מֶלֶךְ * 2 S 14²⁶). The context of this verse is now regarded as a post-exilic addition to the original narrative (Budde, Thenius-Löhr, H. P. Smith); and, since the phrase is parallel to the legends on the lion weights of Nineveh, we may safely understand the shekel in question to be the light Persian unit of 130 grains, giving a total weight of 26,000 grains, or 3½ lb. avoirdupois.

If the legend of Bel and the Dragon, as is possible, had its home in Egypt, the '30 minas of pitch' in this curious story (v. 7²⁷ LXX) are the Ptolemaic trade minas, which we have seen to be identical with the light mina of the earliest Babylonian weights; and thus we return at the close of this section to the point from which we set out.

iii. (b) *The new Syrian or 320-grain unit.*—Reference has already been made to the interesting fact that the tribute of the vassal-states of Syria and Palestine in the reign of Thothmes III. (c. 1500 B.C.) when expressed in terms of the Egyptian weight-system, based on the *ket* with its decimal multiple, the *deben* or *uten*, runs to irregular numbers and even fractions of the *ket*, whereas its original weight must have been hundreds and thousands of shekels. Various attempts have been made recently (see Brugsch, *Z. f. Aegypt. Sprache*, 1889, 22 ff., 87 ff., *Z. f. Ethnologie*, 1889, 36 ff.; Lehmann, *Verhandl. d. berl. Ges. f. Anthropologie*, 1889, 272 f.; Hultsch, *Gewichte d. Altertums*, 25 f., 119 f.) to determine the value of the shekel or shekels by which this tribute was weighed. These attempts, however, can yield but doubtful results, owing, for one thing, to the considerable range in the value of the *ket*, as shown by actual weights. Thus, to take a simple illustration, in Thothmes' 34th year 'the tribute of the provinces of the land of Retennu [Syria]' was in 'gold 55 *deben* 8 *ket*' (Petrie, *Hist. of Egypt*, ii. 118). Now, if we take the *ket* as fixed by Lepsius, Hultsch, and others at 140 grains, it will be found that 558 *ket* represent 620 shekels of 128 grains, or 600 shekels of 130.2 grains, on the 'royal' or later daric standard, without a remainder in either case. On the other hand, we have only to take 143.35 grains as a mean value of actual *ket* weights to get 558 *ket* = 80,000 grains, or 10 light minas of the common norm, raised 5 per cent. as explained above. We have been led to this result by fresh evidence, unknown to the writers just cited, to which we now turn. In the

ANCIENT HEBREW WEIGHT (A) FROM SAMARIA.

spring of 1890 Dr. Chaplin purchased at Nablus a small shuttle-shaped stone weight, here reproduced,

* Literally, 'after (the standard of) the king's stone.' That the Hebrew, like the early Babylonian, weights were of stone, is shown by the fact that שֶׁקֶל is elsewhere frequently used in OT in the sense of 'a weight'; cf. Lv 19³⁶, Dt 25¹³, Pr 16¹¹ etc.

on either side of which were engraved a number of early Heb. characters. The correct decipherment and interpretation of these gave rise to a somewhat heated controversy in various periodicals, in which Professors Robertson Smith, Sayce, Driver, and others took part (see *PEFSI*, 1890, 267; 1891, 69; 1893, 22; 1894, 220, 284 ff.; 1895, 187 ff.). With the help of other inscribed weights still more recently discovered by Dr. Bliss in Southern Palestine, one

WEIGHT G.

WEIGHTS D AND E.

ANCIENT HEBREW WEIGHTS FROM SOUTHERN PALESTINE.

of the two doubtful words on the Chaplin weight is now made out with tolerable certainty to be שֶׁקֶל, a Heb. word from the same root as the Arabic *nusf*, meaning 'half,' first suggested by Professor Euting in 1890 (in König's *Eintleit. in d. AT*, 425). The second doubtful word (שֶׁקֶל), on which the controversy mainly turned, is apparently an abbreviation of the familiar שֶׁקֶל (Conder, *PEFSI*, 1891, 69; Clermont-Ganneau, *ib.* 1899, 208, and, more decidedly, *Recueil d'archéol. orientale*, iv. (1900) 24 ff., where a full discussion of these early weights will be found), the limited space available perhaps causing the omission of the p. The evidence of the Chaplin and other weights, five in all, may best be presented in tabular form thus—

EARLY INSCRIBED HEBREW WEIGHTS.

| | Description of Weight. | Actual weight in grains. | Weight of resultant heavy shekel in grains. |
|---|---|--------------------------|---|
| A | Small shuttle-shaped weight of hematite from Samaria, with inscriptions רֶכֶת נֶזֶפֶחַ רֶכֶת נֶזֶפֶחַ { <i>nezepeh</i> —shekel. Illustr. <i>PEFSI</i> , 1890, 267; 1894, 287. | 30.2 | { 313.6
156.8 |
| B | A perforated 'bead' of reddish-yellow stone from Anathoth inscribed שֶׁקֶל. Actual weight 134 grains; before perforation approximately 156 grains (ib. 1893, 321., 257; illustr. Clermont-Ganneau, <i>op. cit.</i> 26). | 156 | 312 |
| C | Small dome-shaped weight of reddish stone from Tell Zakariya, inscribed שֶׁקֶל (Bliss, <i>PEFSI</i> , 1890, 107 f.; illustr. <i>ib.</i> plate 7). | 157.5 | 315 |
| D | Two similar weights; one of white limestone, the other of 'light reddish' stone, with the same legend as B and C. Same provenance as C (Bliss, <i>ib.</i> 183, with illustr.). | 146.7 | 293 |
| E | | 139 | 278 |

The last two, of soft limestone, are evidently much worn, and may be neglected in favour of the better preserved specimens in our determination of the unit here disclosed. Starting from the more extended inscription of the Chaplin weight, the characters of which point to an 8th cent. date, we

note, first of all, the influence of the Babylonian double standard. This alone explains how this tiny weight can be at once the fourth of a whole shekel and the same fraction of a half-shekel, assuming that this is the true sense of *nezeph* (see Clermont-Ganneau, *op. cit.* 30 f.). Further, although of hard hematite, the condition of the inscription shows that it has lost a trifle of its original value, which must have been not less than 40 grains. As it represents a quarter (cf. the קָרַט or quarter-shekel of Saul's servant, 1 S 9⁸), this gives 160 grains for the light shekel, the half or *nezeph* of the corresponding heavy shekel of 320 grains—a result entirely in harmony with the original values of weights B and C. The great importance of these new discoveries lies in the fact that we have here a shekel hitherto unknown in Palestine. Indeed it appears to have been unknown to metrologists until discovered in numerous examples by Flinders Petrie in Naukratis and neighbourhood (Petrie, *Naukratis*, pt. i. 78, 85 f.; *Tanis*, pt. ii. 84, 91 f.; cf. his art. 'Weights and Measures' in *Encyc. Brit.* xxiv. 487 f.). The standard of these weights is named the '80-grain standard' by Petrie, who regards it as derived from 'the Assyrian 5 or 10 shekel weight, binarily divided and used as an independent unit,' since $128 \text{ grains} \times 10 \div 4$ gives 320 grains. While differing with reluctance from so distinguished a metrologist, the writer still adheres to the conclusion he had come to before having an opportunity of consulting the *Naukratis* and *Tanis* volumes, viz. that the new Palestinian weights are derived directly from the Babylonian mina of 16,000–8000 grains, the origin of which has already been fully explained. The shekels of these minas, of course, yield 266–133 grains, on the sexagesimal system; but in the West this system never supplanted what must be regarded as the earlier decimal system. Hitherto it has been usual, it is true, to assume that the Hebrews in early times adopted the sexagesimal system in its entirety—the talent containing 60 minas of 60 shekels each (so even by our most recent authority on Hebrew archaeology, Nowack, *Heb. Arch.* i. 208); but proof of this view is entirely wanting. For the attempt to obtain it from the corrupt MT and the EV rendering of Ezk 45¹² 'twenty shekels, five and twenty shekels, fifteen shekels [= 60 shekels] shall be your maneh,' is grammatically and otherwise inadmissible. The only possible remedy for this passage is, with all recent critics, to accept the reading of the codex A of the LXX, and render: 'five (shekels) shall be five, and ten shekels ten, and fifty shekels shall be your mina'; i.e. the weights in everyday use, like the measures referred to in the verses preceding and following, shall be neither more nor less than the standard value.

In the West, then, we hold that from the first a compromise was effected between the decimal and sexagesimal systems, and that, while the less frequently used talent of 60 minas was retained, the 'raised' minas of 16,000 and 8000 grains were divided by 50 to yield shekels of 320 and 160 grains. The fact to which Petrie calls attention (*Naukratis*, i. 85 f.), that the Egyptian weights of this standard are of large size, averaging 2000 grains, — Petrie's weights, Nos. 483, 486, 1282, 1286, the largest found, are all c. 8000 grains, — seems to tell in favour of the derivation here proposed and against the derivation from a smaller unit. Petrie, however, is of the opinion, to which we were led independently after repeated attempts to find the shekel of the Syrian tribute lists, that the shekel in question is to be found in this new 80-grain unit, which he therefore proposes 'to call in future the Hittite standard' (*Tanis*, ii. 92). On the whole, however, a safer nomenclature would be

the Syrian standard; and certainly the unit must be raised, in deference to the unequivocal testimony of the Chaplin weight, to 160 or 320 grains. The result, then, of the recent discoveries is to show that from the 16th to the 6th cent. B.C. a light shekel was in use in Syria and Egypt of the value of 160 grains, which was at the same time the half of a corresponding heavy shekel of 320 grains, each being $\frac{1}{2}$ of minas of 8000 grains (1 $\frac{1}{2}$ lb. avoirdupois) and 16,000 grains (2 $\frac{1}{2}$ lb.) respectively. Further, this mina of the 320-grain or Syrian standard continued in use in Syria down to the Christian era: witness the inscribed weights from Antioch and neighbourhood, described by Brandis (*Das Münz-, Maas- und Gewichtssystem Vorderasiens*, 156 ff.), one of which bears the interesting legend ΒΑΣΙΛΕΥΣ ΑΝΤΙΟΧΟΥ ΘΕΟΥ ΕΠΙΦΑΝΟΥ ΜΝΑ, and weighs 7960 grains. The smallness of the Palestine weights points, like the tribute lists, to the use of this unit for weighing the precious metals; while the large size of the *Naukratis* weights shows that in Egypt it was rather used 'for domestic and common purposes' (Petrie). So far, then, as our present evidence goes, we may conclude that this ancient unit was in use for all transactions alongside of the Phœnician unit, next to be discussed, until displaced by the latter after the Exile, largely, no doubt, owing to the influence of Ezekiel and the Priests' Code, both these authorities contemplating the latter as the only official unit. It is worth noting, finally, as a notable example of the trustworthiness of tradition, that Maimonides in his $\text{מִשְׁנָה סֵפֶר$, a commentary on the Mishna treatise *Shekalim*, records that the early Heb. shekel weighed 320 grains of barley (i.e. Troy grains), and was supplanted in the time of the second temple by the *zela'* (זֶלָא), the Heb. equivalent of the tetradrachm or heavy Phœn. shekel (see Surenhusius' summary in his preface to the treatise in question, *Mishna*, ii. 177).

iv. (c) *The Phœnician or 224-grain unit.*—Previous to the discovery of the weights described in the foregoing section, the only Heb. unit monumentally attested was the shekel of the coins of the revolts, generally but wrongly known as the Macabean shekel. The usual explanation of the origin of this widely-spread unit (the theoretical value of which may be put at 224 $\frac{1}{2}$ grains, with effective weight averaging 218–220 grains) as a silver unit from the Babylonian gold shekel of 252 grains, on the ratio of gold to silver as 13 $\frac{1}{2}$:1, has been given under MONEY (iii. 419^a). Hultsch, on the other hand (*Gewichte d. Altertums*, 7, *et passim*), finds its origin in Egypt, the shekel of 224 grains being $\frac{1}{2}$ of a mina of 60 shekels, each of the value $\frac{1}{2}$ *ket* (140 grains $\times \frac{1}{2} \times 60 \div 50 = 224$). It is possible, however, that the Phœnician 224-grain shekel is to be derived from the Syrian 160-grain shekel described in the previous section. We have only to assume that in the West gold stood to silver in the more convenient ratio of 14:1; the gold shekel of 160 grains would then be worth ten silver shekels of 224 grains each, since $160 \times 14 = 224 \times 10$. This is at least preferable to Ridgeway's theory based on an assumed ratio between the metals of 17:1 (*Origin of Currency*, 287).

In any case we have to deal with an exceedingly ancient unit, for an Egyptian weight inscribed with the name of Ampî, a priest of the 10th dynasty (c. 2300 B.C.), and marked as 10 units, weighs 2188 grains (Griffith, *PSBA* xiv. 445), yielding a unit of 218.8 grains, which can scarcely be other than the Phœn. shekel of 218–224 grains. Its prevalence in Palestine from the earliest historical period need not be doubted, as it may be confidently assumed to have been the silver, if not, also, the trade shekel of the Phœnician traders in Canaan, whose name Canaanite (כְּנַעֲנִי) came latterly

to signify 'merchant' in general (Zec 11⁷, 11 [LXX], Pr 31²⁴ etc.). It must therefore have existed side by side with the 320 (160)-grain shekel above described. Like the other units of Western Asia, the Phoen. unit had its heavy and light shekels of 224½ and 112½ grains respectively. Fifty of the former or 100 of the latter went to the heavy mina of 11,225 grains (c. 1½ lb. avoird.), and 60 minas, as elsewhere, to the talent (see table, vol. iii. p. 419^b). It is manifestly the shekel intended by Ezekiel (45¹²), who first mentions the subdivision into 20 *gerahs*—a term apparently adopted from the Babylonian, *girsu* being the name of a small silver coin (?) of Nebuchadnezzar's time, and identified by the Alexandrian translators with the Greek *δραχμή* (see, further, MONEY, vol. iii. p. 422). The Priests' Code likewise seems to contemplate its adoption for every transaction with the balance, certainly for silver and gold (Ex 38²⁴), spices (30²⁴), and copper (cf. 38²⁹ with Lv 27²⁵). This is confirmed by the evidence of the Mishna to the weights of the first two centuries of our era (see next §). That the heavy shekel of 220-224 grains, and no other, can be the 'shekel of the sanctuary,' or 'sacred shekel,' we have endeavoured to prove elsewhere (*l.c.*). The '20 shekels of bread' of Ezk 4¹⁰ are doubtless of this standard, probably also the talents of iron of 1 Ch 29⁷; while for the brass and iron of Goliath's armour (1 S 17⁶⁻⁷) we have the choice of the Phoen. and of the new Syrian shekel.

v. (d) *The syncretic weight-system of the Mishna.*

—It has been sufficiently explained elsewhere (MONEY, iii. 426 ff.) how, after the Roman conquest of the East, the drachm of the Greek monetary system became interchangeable with the Roman denarius, reduced in weight, first to 60, and then by Nero to 52½ grains, when it differed but little from the quarter-shekel of 54½ grains, effective weight. Now, since the denarius was a fixed fractional part of the Roman pound, being ¼ of the libra and therefore ⅓ of the uncia, the denarius-drachm was found to be not only useful as money, but exceedingly convenient as a weight. Thus it came to form the unit of the latest Jewish weight-system as reflected in the Mishna. Its divisions and multiples are a tribute to the adaptive genius of the Jewish people, combining, as they do, elements from the systems of Phœnicia, Greece, and Rome, which all had their meeting-ground in the Palestine of the first century. The denarius-drachm itself was named the *zuz* (זוז), and retained the division into six obols (שקל). Two denarii made a (light) shekel, four a tetradrachm (טטראδράχμη), the ancient Heb. (heavy) shekel, of which 25, or 100 *zuz*, went to the mina. For the last the old Heb. term *מנה* was retained, e.g. a mina of flesh (*Sanhed.* viii. 2), of figs (*Peah* viii. 5), of wool (*Khullin* xi. 2). In the two passages last cited, and elsewhere, we meet with the *peras* (פרס) or half-mina. This term most scholars now agree in finding—as first suggested by M. Clermont-Ganneau—in the PERES and U-PHARSIN of Dn 5²⁸⁻²⁹, the mysterious writing on the wall signifying, not as in RVm 'numbered, numbered, weighed, and divisions,' but 'a mina, a mina, a shekel, and half-minas.' The system above sketched may be presented thus, omitting the lowest denomination—

THE LATEST JEWISH WEIGHT-SYSTEM.

| | | | | |
|------------------------|------|------|------|-----------------------------|
| מנה Denarius-drachm | 1 | | | 52½ grs. |
| שקל Shekel * | 2 | 1 | | 105 " |
| טטראδράχμη Tetradrachm | 4 | 2 | 1 | 210 " |
| מנה Mina | 100 | 50 | 25 | 1 5250 ¹ " |
| טלנט Talent | 6000 | 3000 | 1500 | 80 1 315,000 ² " |

Notes.—1 i.e. 12 oz. avoird. 2 i.e. 45 lb.

* The old term 'shekel' was henceforth confined to the true half-shekel, formerly 112 grains; cf. the name of the treatise

The importance of this late Jewish system for our previous investigations lies in the fact that it supplies the evidence, for which one looks in vain in the older Heb. literature, that the Phoen. weight-system has the best claim to be regarded as that on which Jewish trade was conducted not only in the first two centuries of our era, but for several centuries before. It was natural that the mina of this system should be identified with the libra or pound of the Roman weight-system. The latter occurs in the NT only in Jn 12⁶ 19²⁴ (EV 'pound,' λίτρα, whence the *מטרה* of the Mishna, also occasionally *מטרה* מטרה). The talent (Rev 16²¹, cf. Josephus, BJ v. vi. 3 [§ 270] *ταλάντων πέντε*) of 315,000 grains when doubled, i.e. when taken not as 3000 light but as 3000 heavy shekels or tetradrachms, was tariffed on the Roman system as 125 libras, as is testified by a weight with the inscription PONDO CXXV TALENTVM SICLORVM III (3000 shekels, the M for 1000 being omitted), and confirmed by Epiphanius. A large stone weight found at Jerusalem in 1891 (PEFS, 1892, 289 f.), said to weigh 41,900 grammes (c. 646,000 grains), is evidently a heavy talent on this system.

To sum up the result of the foregoing sections, evidence has been adduced for the existence, side by side, in the earlier period of Heb. history of three distinct units of weight—the Babylonian 252-grain unit, the new Syrian 320-grain unit, and, the best attested of all, the Phœnician 224-grain unit, each with its corresponding light unit of 126, 160, and 112 grains respectively. The second probably did not survive the Exile; while the last, in the end, gained the day over both its competitors.

HEBREW MEASURES OF LENGTH.—vi. *Approximate value of the Hebrew cubit.*—The most widespread of all metrical denominations are those measures of length which have been derived from certain parts of the human body—the fingerbreadth or digit, the handbreadth or palm, the cubit (*κύβητος*, *cubitum*, the elbow), or the length of the forearm from the elbow to the tip of the middle finger. The equally convenient 'foot,' however, is foreign to the Heb. system. By the Gr. metrologists of the empire the digit was regarded as the unit: *ὁ δάκτυλος πρῶτος ἔστιν ὡς περ καὶ ἡ μορὰς ἐν τῶν ἀριθμῶν*, so writes Julian of Ascalon (*ap. Hultsch, Metrol. Script. Reliquiae*, i. 200), who proceeds to give the usual denominations of the system in use in his time in Palestine, disclosing the well-nigh universal division of the cubit into 6 palms, each of 4 digits (for exceptions to this division see below). The comparative frequency of the references to the cubit in the OT, however, warrant us in regarding it as the unit of the Heb. system. Before proceeding to the investigation of the length of the cubit, it may be noted at this stage that the Hebrews in their measurements employed both the measuring-rod (מִדְּבָרָה *midbarah* Ezk 40³ etc., LXX and NT *κάλαμος*, Rev 11² 21¹⁶) and the measuring-line (מִדְּבָרָה *midbarah* Jer 31³⁹; also *מִדְּבָרָה* 1 K 7¹⁵, Jer 52²¹ [AV wrongly 'fillet']). The latter was probably used for the larger measurements, one such being mentioned in the Mishna as of 50 cubits in length (*Erubin* v. 4).

The evidence of the OT goes to show that the Hebrews, before and after the Exile, were familiar with two cubits of different lengths. First of all, we find the bed or sarcophagus of Og, the king of Bashan, measured according to 'the cubit of a man' (שֶׁמֶט מִן הָאָדָם Dt 31¹, cf. Rev 21¹⁷); in other words, according to the then customary, everyday cubit (cf. the similar expressions in the original of 2 S 7¹⁴,

Shepalim, dealing with the payment of the temple tax of half a shekel. In Galilee, however, the term *מִדְּבָרָה* was applied to the latter, hence in the Mishna the Galilean *מִדְּבָרָה* is always said to be equal to ½ the *מִדְּבָרָה* of Judæa.

Is⁸, Rev 13¹⁸ etc.). When we consider, in the second place, that the early chapters of Deuteronomy are almost certainly later than the eighteenth year of Josiah, and therefore within the period embraced by the lifetime of Ezekiel, we are led to identify the 'cubit of a man' of the passage cited with the cubit in everyday use among Ezekiel's contemporaries. This prophet, in a passage of the first importance for our investigation, informs us that the measurements of the temple of his vision are not on the standard of the then generally used cubit, but after a cubit longer than the latter by a handbreadth (Ezk 40⁵, cf. 43¹³).^{*} Now, since the proportions and arrangements of Ezekiel's temple are in all essential particulars identical with those of the temple of Solomon, the prophet's aim in the use of this longer cubit can hardly be other than to ensure that his temple shall be a replica of the older Solomonic temple. That this, rather than the possible alternative that Ezekiel is here introducing a new cubit on the Babylonian standard (so Haupt in *SBOT*, 'Ezekiel,' 179f.), is the correct inference from the passage before us, is confirmed by the remark of the Chronicler that the dimensions of Solomon's temple were determined by cubits 'after the former measure' (2 Ch 3³). Ezekiel and the Chronicler, then, are our authorities for the conclusion that the cubit in ordinary use, both before and after the Exile, was shorter by a handbreadth than the cubit employed, for building purposes at least, in the reign of Solomon. In view, further, of the all but unvarying tradition, confirmed by the practice elsewhere, as shown above, that the ordinary cubit contained six palms or handbreadths, we are left to infer that the Solomonic building cubit was a cubit of seven handbreadths.

When we look for further light on this point to the ancient home of all scientific metrology, the result is disappointing. As early as B.C. 3000, the era of Gudea, the Babylonians had discarded the more primitive or natural system of lineal measures for a rigidly scientific system, constructed, like the rest of their metrology, on a sexagesimal basis. On this system fresh light has recently been thrown by the recovery of two early scales of lineal measurement, engraved upon statues of Gudea, from Telloh in Southern Babylonia (see details by C. F. Lehmann in *Verhandl. d. Berliner Gesell. f. Anthropologie*, 1889, 288 ff.; 1896, 453 ff.; *Das altbabyl. Maas- und Gewichtssystem*, 52 ff.).

A short summary with illustration is given by Haupt in Toy's 'Ezekiel' [*SBOT* 179f.]; cf. art. BABYLONIA, vol. i. p. 218^b). The more perfect of the two scales is divided by transverse lines into sixteen subdivisions, each a trifle over $\frac{1}{2}$ in. in length, fifteen of which are considered to represent a quarter of the double cubit, which, as we know from the tablet of Senkereh (*WAI* iv.² 37), constituted the unit of the linear system. This double cubit, then, contained 60 of the *ubānu* or fingerbreadths of Gudea's scale, or about 39 $\frac{1}{2}$ in., which gives a single cubit of 30 digits, or 19 $\frac{1}{2}$ in. Five digits on this system are supposed to have gone to the handbreadth, of which 6 formed the cubit. In addition to this cubit there appears to have been a so-called royal cubit of 33 digits (Herod. i. 178), or 21 $\frac{1}{2}$ in. In all periods of Babylonian history the size of the square bricks for building purposes remained constant at 13 in., which is $\frac{2}{3}$ of Gudea's cubit or $\frac{1}{3}$ of the royal cubit, and is termed by Continental metrologists the Babylonian foot.[†] The primitive Hebrew

measures appear to have remained uninfluenced by this more artificial system.

On the other hand, when we turn to the other centre of early civilization in the East, we find in Egypt a system presenting an exact correspondence with what we have so far learned of the chief Hebrew measure of length (see esp. F. L. Griffith, 'Notes on Egyptian Weights and Measures' in *PSBA* xiv. [1892] p. 403 ff.). Here two cubits were in use from the earliest times—the 'short' cubit of 6 and the 'royal' cubit of 7 handbreadths. Happily, the survival of actual cubit-rods and the measurements of the pyramids and other ancient monuments have made it possible to determine the length of the royal cubit with sufficient accuracy for ordinary purposes as 20.63 in. (Petrie, *Encyc. Brit.*⁹ xxiv. 483^a; cf. Watson, *PEFSt*, 1897, 203; Griffith, *l.c.*). The short cubit, as $\frac{4}{5}$ of the other, contained 17.68 in., 6 palms of 2.95 in., or 24 digits or fingerbreadths of $\frac{7}{8}$ in. We have here, then, the same ratio between the cubits, and the same subdivisions as we found in the case of the Hebrew cubits—facts which render it impossible to avoid bringing the two systems, Egyptian and Hebrew, into more intimate connexion. It would be rash at this stage, however, to propose their original identity until we have had some evidence as to the probable length of the early Hebrew cubit.

Innumerable attempts have been made in the course of the last two centuries to determine the absolute length or lengths of the O.T. cubit. One of the most eminent of living metrologists is reduced to finding 'the sole reliable determination of the Hebrew measures of length' in a metrological table which in its present form is scarcely older than the 14th cent. of our era! From this document, with doubtful cogency, he argues for the identity of the ordinary Heb. cubit with the royal Egyp. cubit (Hultsch, *Metrol.*² 437 ff.). In our own country a few of the more noteworthy values proposed in recent years are as follows:—

| | |
|---|------------|
| Conder (<i>Handbook of the Bible</i> , }
and elsewhere) | 16 inches. |
| Beswick (<i>PEFSt</i> , 1879, 182 ff.) . | 17.72 " |
| Watson (" 1897, 203 ff.) . | 17.70 " |
| Warren (" 1899, 229 ff.) . | 17.75 " |
| Petrie (" 1892, 31) | 22.6 " |
| Petrie (<i>Encyc. Brit.</i> ⁹ xxiv. 484) | 25.2 " |

To these may be added the estimates adopted in Smith's *DB*, from Thenius, of 19.5 in. From these widely-varying results it will be clear to every reader that *reliable data for the exact evaluation of the Hebrew cubit do not exist*. The following is merely a fresh attempt to reach an approximate value.

(a) *The evidence of the Siloam inscription.*—In lines 4 and 5 of this famous inscription may be read: 'and the waters flowed from the outlet [of the spring] to the Pool [of Siloam] one thousand and two hundred cubits.' Now the total distance from the spring to the pool, according to Conder's careful measurements (*PEFSt*, 1882, 122), is 1758 ft., which yields a cubit of 17.58 in. Unfortunately, the number 1200, like the other specification of 100 cubits as the height of the rock above the tunnel, is evidently a round number, so that the value of the cubit as c. 17.6 in. here

which he holds to be identical with the length of the seconds pendulum in the latitude of the astronomer priests of Babylonia! The unit of volume was a cubic vessel, the side of which was a handbreadth, or $\frac{1}{6}$ of the double cubit (c. 3.9 in.); the weight of water it contained constituted the unit of weight, viz. the heavy mina of 15,100 grains (see § ii. above). For a thoroughgoing criticism of Lehmann's views, and of the earlier researches of Oppert in this field, see Johns, *Assyrian Deeds and Documents* (1901), ch. iii. 'Metrology,' pp. 184-278.

^{*} This longer cubit, however, is not, as our EV would lead one to suppose, called by the prophet a 'great cubit' (see 41⁹ RVm). But the original is here confessedly unintelligible.

[†] The whole system of Babylonian weights and measures is based, according to Lehmann, who has made this subject specially his own, on the double cubit (39 $\frac{1}{2}$ in.) of Gudea's scale,

disclosed is only approximate. The measured length, 1758 ft., yields 1193 short Egyp. cubits of 17.68 in. and 1206 of the Gr. cubit of $17\frac{1}{2}$ in. Both the cubits proposed by Flinders Petrie are evidently out of the question (see, further, below).

(b) *The evidence of Josephus.*—All attempts to solve our problem from a comparison of the measurements of the temple area as given by Josephus and in the Mishna treatise *Middoth* ('measurements') with those of the Haram of to-day, are unsatisfactory, for the double reason that the data of the two authorities named are frequently in conflict,—and, at the best, have no claim to be more than roughly estimated, and, in the case of the Mishna, traditional figures,—and that the Haram area has undergone many changes since the 1st cent. of our era. But there is an argument from Josephus which has not hitherto been pressed, viz. the *argumentum e silentio*. It is generally admitted (see W. R. Smith, *Encyc. Brit.*² xxiii. 166) that Josephus makes use of the Roman-Attic cubit ($\pi\rho\acute{\alpha}\chi\upsilon\varsigma$) throughout his historical writings. Thus the side of the square, within which stood the temple of Herod, is given now as a stadium, or 600 Gr. ft. (*Ant.* xv. xi. 3 [§ 400, cf. 415]), now as 400 cubits (*ib.* xx. ix. 7 [§ 221]), which assumes the ratio (3:2) between the cubit and the foot adopted by the nations of classical antiquity. Now Josephus, as we shall see in a subsequent section, frequently gives equations of the Jewish measures of capacity with those of his Græco-Roman readers, and less frequently compares the respective weights and coins; but nowhere, apparently, does he give a single indication of the Heb. cubit differing materially from the Roman-Attic cubit of the 1st cent. Hence, in giving the dimensions of objects described in the OT,—such as Solomon's temple, the tabernacle, etc.,—Josephus renders the numbers of the Heb. cubit by the same numbers of the Gr. cubit. In one case at least he even gives the dimensions of $2\frac{1}{2}$ by $1\frac{1}{2}$ cubits of the original (*Ex* 25¹⁰) as 5 by 3 spans ($\sigma\pi\iota\theta\alpha\mu\eta$), the *spithamé* being the half of the Gr. cubit. Again, the distance of the Mount of Olives from Jerusalem is given by the author of the Acts (1¹²) as 'a Sabbath-day's journey,' which was a very familiar measure of 2000 Heb. cubits (see next §). But Josephus gives the same distance as five stadia (*Ant.* xx. viii. 6 [169]), which are 3000 Gr. feet or 2000 Gr. cubits. These data, then, all go to show that, in Josephus' day at least, the Jewish and Gr. cubits were for practical purposes identical in value. Taking the Roman-Attic foot, as finally determined by Dörpfeld's elaborate researches, as 296 millimetres = 11.65 in. (art. 'Mensura' in Smith's *Dict. of Antiq.*³; Nissen, *Metrologic*²), we obtain 17.47, say $17\frac{1}{2}$ in., as a second approximation to the length of the Jewish cubit in the 1st cent. of our era.

(c) *The evidence of the Mishna.*—Nothing is to be gained from the oft-quoted but purely academic discussion regarding the two cubit-rods, said to have been preserved in chambers over the Shushan gate of the temple (*Kelim* xvii. 9, 10), beyond confirmation of the uniform tradition that the 'cubit of Moses,' i.e. of the Priests' Code, contained 6 palms or 24 digits (*ib.* 10). The true explanation of the cubit-rods of $24\frac{1}{2}$ and 25 digits respectively may be that we have here a confused recollection that the Heb. cubit was originally longer by a fraction of an inch than the Roman-Attic cubit. Rabbi Judah's cubit of 5 palms 'for vessels' (*l.c.*) may be the *gōmed* or short cubit of Ehud's dagger (see next §). A more definite datum for the approximate value of the Mishna cubit is found in *Baba bathra*, vi. 8, where the law prescribes the following as the dimensions of the *hūkīm* (הוֹקִים) or *loculi* in the case of a Jew taking

a contract for the construction of a rock-cut tomb, viz. height 7 palms, width 6 palms, *length* 4 cubits. The last of these dimensions recalls the *ōpyrid* (from *ōpēyo*, 'to stretch'), or the 4-cubit fathom of the Greeks, it having been early observed that the 'stretch' of a well-proportioned man, from tip to tip of his outstretched arms, was equal to his height. Since the Jews were buried without coffins, if we knew their average height, we should have a fair approach to the length of their cubit. They were certainly not a tall people, and in modern times, in the most favourable circumstances, are said to average 5 ft. 6 in. to 5 ft. 8 in. (Jacobs quoted by Warren, *PEFSI*, 1899, 228 f.)* Allowing a margin for the bier, we cannot be far wrong in taking 5 ft. 10 in. as the probable length of the *loculi* contemplated by the later Jewish law, which yields a cubit of $17\frac{1}{2}$ in. as our third approximation. In any case, this passage disposes finally of Conder's cubit of 16 in., which would reduce the average height of the Jews to less than 5 ft. 4 in.!

The latest valuation of the cubit by the distinguished metrologist Flinders Petrie (*PEFSI*, 1892, 28 ff., the tomb-cutters' cubit at Jerusalem) cannot be so easily disposed of. The dimensions contemplated in the Mishna are evidently the use-and-wont dimensions that would satisfy a contract in which no more precise specifications were entered, hence they do not preclude the possibility of larger dimensions being used on occasion. Now Petrie, on the strength of many hundred measurements of the dimensions of actual tombs, contends that the great majority disclose a cubit of 22.6 in., which he maintains (*loc. cit.*) 'should be taken as the standard in future.' This is not the place either to expound or to criticise the methods employed by Petrie here and elsewhere in his metrological works, beyond saying that a considerable element of uncertainty must always attach to them where the results cannot be controlled by literary evidence (cf. Ridgeway's criticism of this method of determining the value of ancient standards of length by measurement alone, in Smith, *Dict. of Antiq.*³ ii. 166), a statement of which an illustration may now be given. In the case of the tombs in question, Petrie finds recurring lengths of about

88.1, 113.0, 132.0, 159.7, 171.9, and 226 in., all pretty certainly even numbers of the same cubit. And it is therefore seen that the multiples

4, 5, 6, 7, $7\frac{1}{2}$, and 10 cubits

are the numbers in question, as we thus reach

22.0, 22.6, 22.0, 22.8, 22.9, 22.6 in.

for the cubit, yielding an average of $22.61 \pm .03$ in. (*loc. cit.* 29). But suppose, taking the first row of figures, we were to say that the multiples

5, $6\frac{1}{2}$, $7\frac{1}{2}$, 9, 10, and 13 cubits

are the numbers in question, we should obtain

17.6, 17.4, 17.6, 17.7, 17.2, 17.4 in.

for the cubit actually a smaller range of variation than is shown by Petrie's own results,—or an average of $17\frac{1}{2}$ in., which is in remarkable agreement with the approximations already obtained. There is therefore a clear alternative before us. Either we must bring down the Siloam inscription to the Roman age, as has indeed been recently proposed, and say that the Jews of that period had finally discarded their native cubit, of which, in that case, we remain in absolute ignorance, in favour of the Græco-Roman cubit, or—which is the preferable alternative—we must hold to the Egyptian origin of both the historically attested cubits of 7 and 6 handbreadths, the latter, originally $17\frac{1}{2}$ in. in length, having been gradually reduced, until in

* Warren here gives some interesting statistics as to the height of the modern Jew; and, although not aware of the above passage of the Mishna, conducts the same argument and decides for a cubit of 17.75 in.

NT times it was equated with the Greek cubit of 17½ in. This Egyptian, as opposed to an alternative Babylonian, derivation is further confirmed by the following considerations: (1) the existence, just referred to, at one period among the Hebrews of two cubits of 7 and 6 handbreadths respectively; (2) the subdivisions (see table) are parallel in both systems, and bear no trace of sexagesimal or Babylonian influence; (3) the smallest unit, the digit, bears a cognate designation in both, 'ezba' in Hebrew, 't'ba in Egyptian, while the corresponding Hebrew unit was named *ubānu* in Babylonian, probably the Heb. *ḥā*; (4) the Heb. *zereth* or span finds its nearest congener in the Egyptian *drt* (Ges.-Buhl, *Lex. s.v.*; cf. similar affinities below, under measures of capacity). The following table shows the values of the Heb. cubits and subdivisions on the basis of the Siloam cubit of 17.58 in., which proves to be the mean between the original Egypt. short cubit of 17.68 and the Gr. cubit of 17.47 in., and is probably the nearest value attainable until further monumental evidence is forthcoming:—

TABLE OF THE HEBREW MEASURES OF LENGTH.

| | Digit. | Palm. | Span. | Cubit. | Value in | | Convenient approximation. |
|------------------|--------|-------|-------|--------|----------|--------|---------------------------|
| | | | | | Mm. | In. | |
| Digit . | 1 | ... | ... | ... | 18.6 | .73 | ¾ in. |
| Palm . | 4 | 1 | ... | ... | 74 | 2.93 | 3 " |
| Span . | 12 | 3 | 1 | ... | 223 | 8.79 | 9 " |
| Cubit . | 24 | 6 | 2 | 1 | 446 | 17.58 | 17½ ft. |
| Cubit of Ezekiel | 28 | 7 | ... | ... | 521 | 20.51 | 17½ " |
| Reed . | 144 | 36 | 12 | 6 | ... | 105.48 | 9 " |
| Reed of Ezekiel | 168 | 42 | ... | ... | ... | 123.06 | 10 " |

No reference has yet been made to the determination of the value of the cubit from the statement of the medieval Rabbis that the smallest unit, the fingerbreadth, was equal to 6 medium-sized grains of barley laid side by side, partly because the tradition is of late origin, and partly on account of the widely diverging results that this method has produced.* Maimonides, writing in Egypt, seems to have been the first to give currency to this mode. He assigned 7 barleycorns to the digit, or 168 to the cubit, apparently identifying it with the royal Egyptian cubit (see Luckemann, *D. jüd. Maasssystem*, 20; Boeckh, *Metrolog. Untersuchungen*, 268 ff., which see also for further details of this method). It is, however, a striking coincidence, to say the least, that the latest and most scientific attempt to determine the Jewish cubit on the basis of the usual Rabbinic valuation of 144 barleycorns yields a cubit of 17.7 in. (Col. Watson, *PEFS*, 1897, 201 ff.), which is practically the short cubit of Egypt.

vii. *Subdivisions and multiples of the cubit in OT and NT.*—It now remains to glance briefly at the subdivisions and multiples of the cubit to be found in the canonical literature. At the bottom of the scale stands the *movás* or *μέτρον σμικρότατον* of the Gr. metrologists, the digit or *fingerbreadth* (עֶזְבָּא only Jer 52²¹; cf. Joseph. *Ant.* VIII. iii. 4, δάκτυλος, and Mishna, *passim*). Four digits naturally went to the palm or *handbreadth* (פֶּדְיָא 1 K 7²⁶=2 Ch 4⁵; עֶזְבָּא in Ezk 40⁵=43¹³ and P), the *παλαιστή* of the LXX and Gr. writers generally. The cubit and the palm were the most frequently used denominations in later times. Bricks for building purposes, for example, are said to have been '3 palms square' (c. 9 in.), not a square span (*Erubin* i. 3).† The *span* (רֶמָס, *span*, Ex 28¹⁶ 39⁹, 1 S 17⁴ etc.) was always half the cubit. Thus a comparison of Ezk 43¹³ with v. 17 shows that the span might be taken as half the royal cubit of 3½ palms. Josephus, we have seen, renders the dimension of the ark of the covenant, in the original 2½ by 1½ by 1½ cubits (Ex 25¹⁰), by twice the number of spans (*Ant.* III. vi. 5 [135]).

* Thenius' cubit of 19.06 in., adopted in Smith's *DB* (art. 'Weights and Measures'), was obtained by this method.

† The Babylonians regularly built with a brick 13 in. square.

In Jg 3¹⁶ the short two-edged sword of Ehud is said to have been a *gōmed* in length (גֹּמֵד, EV 'cubit'). This measure, occurring only in this passage, is explained by the Jewish commentators as a short cubit, the length of the forearm from the elbow to the knuckles or to the second joint of the fingers (see Moore, *in loc.*, and more fully *JBL* xii. 104). It was thus the equivalent of the Gr. *πυγών* or *πυγμή*, and may have been the cubit of 5 palms mentioned in the Mishna (see above).

The cubit itself has been fully discussed in the preceding section, where its apparent Egyptian origin and value have been set forth. At first, naturally, of the same value as the short cubit of Egypt, 17.68 in., it appears to have gradually shrunk, until in the 1st cent. of our era it was practically identical with the Roman-Attic cubit of 17.47 in. By this latter measure, say 17½ in., we may safely estimate the only NT references to the cubit in the literal sense (Jn 21³, Rev 21¹⁷). In Mt 6²⁷, Lk 12²⁸ the cubit is best taken metaphorically, 'which of you can add a "span" to his age?' (cf. RVm).

The only multiple of the cubit mentioned in the OT, and that only by Ezekiel, is the *reed* (רֶעֶד, *kanah*, the Bab. *kanû*, Ezk 40⁵=42¹⁷ etc.) of 6 cubits,—in this case the 'royal' cubit of 7 palms. It does not appear to have come into common use. In the Græco-Roman age we find instead the *fathom* (δρῦν, Ac 27²⁸) of 4 cubits, approximately 6 ft., and the favourite Gr. measure of distance the *stadion* (στάδιον, 2 Mac 12²⁸, Lk 24¹³, Jn 6¹⁹ etc.). The latter contained 600 Gr. ft. or 400 cubits, about 194 yds.; it was thus considerably less than the *furong* (220 yds.), by which it is rendered in our versions. The *mile* (μίλιον, Mt 5⁴; מִילָה, in Hebrew, *Yōma* vi. 4, 8), as its name reveals, was a Roman measure, containing 1000 double paces (*mille passus*), or 5000 Roman ft., equal to 1618 yds. The Romans reckoned their mile as roundly equivalent to 8 stadia. The Jews, on the other hand, reckoned only 7½ stadia or *ris* to the mile (*Yōma* vi. 4), and so obtained a convenient division of the parasang of 30 stadia—another example of the syncretism that pervades the later Jewish metrology.

The largest measure of distance of native Jewish origin was the *Sabbath day's journey* (σαββάτου ὁδός, Ac 1¹³). Its origin was on this wise. Combining the injunction of Ex 16²⁹ with the fact recorded in Jos 3⁴, that the ark preceded the main body of the host by 2000 cubits (c. 1000 yds.), the inference was drawn that the tents of the Israelites in the wilderness were this distance from the ark; and, further, that the said distance might lawfully be traversed on the Sabbath, since the injunction of Exodus (*l.c.*) could not have been meant to exclude the privilege of worship on that day. A square of 2000 cubits in the side was also the prescribed 'suburbs' of a Levitical city (Nu 35⁶). The Jews of later times, as is well known, were able ingeniously to free themselves from the restriction of a single 2000-cubit limit, by depositing at its furthest boundary, before the entry of the Sabbath, sufficient food for two meals. This spot, by a legal fiction, was considered to be the traveller's 'place' in the sense of Ex 16²⁹; he was then able to proceed with immunity for another distance of 2000 cubits. The technical name for this process was the 'mixture of limits' (מִצְחָה עֲרֵמָה), to the regulation and enforcement of which the treatise *Erubin* (mixtures) is devoted. In certain cases the legal distance might be increased to 2800 cubits, which was the estimated diagonal of a square 2000 cubits in the side. A number of boundary-stones, two of which bear the legend מִצְחָה עֲרֵמָה, have been discovered in such relative positions near Gezer (which see) as to suggest that they

probably served to mark the Sabbath 'limit' for that city (*PEFS*, 1899, 118 ff.). (For details as to the mathematical precision with which the Sabbath day's journey was calculated for each town, see Baneth's edition of *Erubin*, also Surenhusius' edition with plates. An English translation is given in Sola and Raphall's selections).

As vaguer measurements of length and distance, finally, may be mentioned the *pace* (2 S 6¹³) and the 'little way' (פְּתִילָה Gn 35¹⁶ 48⁷, 2 K 5¹⁰), also a day's journey (Nu 11²¹, 1 K 19⁴, Jon 3⁴, Lk 24⁴) and three days' journey (Gn 30³⁰, Nu 10³³), distances which naturally varied according to circumstances (see DAY'S JOURNEY, vol. i. p. 573^b).

viii. *Surface measure.*—In OT the idea of 'square' is generally expressed by the passive participle רָבִיחַ (a denom. verb from רָבַע 'four'), rendered 'four square' (Ex 27¹ 28¹⁶ etc.), the dimensions, however, being given as x cubits long and x cubits broad. In later Hebrew we find the more compendious expression ' x cubits by ($\frac{1}{2}x$) x ', as in the Mishna *passim*.^{*} The diagonal of a square was estimated by the Talmudic authorities as $\frac{1}{2}$ of its side (Baneth, preface to *Erubin*, p. 52; see preceding §). The ratio of the circumference (מִקְוֵה) of a circle to its diameter (מִקְוֵה) was taken as 3 to 1 (*Erub.* i. 5).

With regard to the measuring of land, two methods were in vogue in ancient times before and after the application of more scientific methods. The one attested by the consensus of East and West consisted in taking as the standard of measurement the extent of ground which a yoke of oxen could plough in a given time. In Syria at the present day the unit of land measure is the *feddān*, the ground which a yoke of oxen can plough in a day (Post, *PEFS*, 1891, 110), which is variously estimated in different parts of the country (see Schumacher, *Across the Jordan*, 22, and more fully Berghheim, 'Land Tenure in Palestine,' *PEFS*, 1894, 192 ff.). The corresponding Roman measure 'jugerum' vocabatur quod uno jugo boum in uno die exarari posset' (Pliny, *Hist. Nat.* xviii. 9), and was legally fixed at cir. 3016 sq. yards. The second method was by estimating the size of a field by the amount of seed required to sow it. Both methods were known and practised by the Hebrews. Passing by 1 S 14¹⁴ as almost certainly corrupt, we find a reference in Isaiah to '10 acres of vineyard' (5¹⁰, lit. 10 yoke [מִקְוֵה], i.e. of oxen; cf. *jugum* and *jugerum*), which at once suggests the modern *feddān*. Since the Egypt. unit of surface measure was a square 100 royal cubits in the side, called by the Greeks *δρῶμα* (Griffith, *PSBA*, 1892, 410 ff.), we shall not be far wrong if we estimate the Heb. *zemed* as a square of 100 ordinary cubits in the side, and thus the equivalent of a measure of surface presently to be considered; in other words, at about half an acre.[†]

On the other hand, the priestly legislation introduces us to a mode of computing the size of a field 'according to the seed thereof' (Lv 27¹⁶), 50 shekels being fixed as commutation-money for a field requiring 'a homer of barley seed.' But there is almost certainly an earlier reference to this method of mensuration in a hitherto misunderstood passage of 1 Kings. The trench which Elijah is said to have dug round about his altar on Mt. Carmel is described as מִקְוֵה כְּאֵסִי וְכֵן, lit. 'like a house of two seals of seed' (1 K 18³²).

^{*} The MT of Ex 27¹⁸ 'fifty by fifty' cannot be defended. The LXX goes still further astray. The second 'fifty' is corrupted from מֵאָס, which the Samaritan still has (see the writer's forthcoming commentary on *Exodus*, in loc.).

[†] Winckler, *KAT*³ (1902) 339, finds in מִקְוֵה a weight, connecting it with the Assy. *qamadu*, to weigh.

[‡] Strictly 2300 sq. yards with the cubit of 17·6 in.; an acre is 4840 sq. yards.

What does this mean? The AV and RV rendering is impossible, while RVm suggests that the trench had the breadth and depth of a two-seah measure. In reality the writer is here employing a familiar land measure, and indicating the length—not the depth and breadth—of the trench by the amount of surface which it enclosed. It is true there is no further illustration of this mode of expression in our older extant literature, but the evidence of the Mishna, considered in the light of the immemorial practice in Babylonia and Assyria, shows that its absence is accidental (see the Mishna, *passim*, esp. the agricultural treatises and those dealing with contracts). Here the size of a field is uniformly denoted by the amount of seed required to sow it. The standard of measurement was indeed the very expression under consideration, 'the house,' i.e. the field 'of two seahs,' which was fixed as equal in extent to the court of the tabernacle, viz. 100 cubits by 50, c. 1195 sq. yards (under $\frac{1}{2}$ acre). The half of this surface, 2500 sq. cubits (c. $\frac{1}{4}$ acre), was the *beth-seah* (בֵּית סֵאִה), its double 'a four-seah field' or square of 100 cubits in the side. A field of this size is in one place (*Uhaloth* xvii. 1) identified with the obscure מִקְוֵה of 1 S 14¹⁴, which would thus be a later equivalent of the *zemed* considered above.

The whole series of dry measures, to be discussed in the following sections, were used by the Jews of NT times in this way, from the frequently mentioned *beth-rôba* or $\frac{1}{2}$ *kab* plot (104 sq. cubits, *Peah* i. 8, *Baba bathra* ii. 5, etc.) up to the *beth-kôr* (*B. bathra*, vii. 1) of 75,000 sq. cubits, and its multiples. The dimension last given is that of the field of Lv 27¹⁶, mentioned above (for the identity of the *kôr* and the *homer* see next §), which was therefore about 3½ acres in extent. This system of field measurement, although it may be traced in parts of the Roman empire, as, e.g., in the *στρομὸς μῦδιος*, which was a third of the *jugerum* (Hultsch, *Metrol.*³ 616 ff.), had its home in Babylonia, where the field last mentioned would have been described as in Hebrew (*bitu 1 imér ekli*, a one-homer field; see Johns, *Assyrian Deeds*, 219 ff.)—a fact which seems conclusive in favour of the explanation of Elijah's trench given above.

HEBREW MEASURES OF CAPACITY.—ix. *The scales of wet and dry measure.* The value of the *ephah-bath*.—While familiar with such rough-and-ready measures of capacity as the *kômeh* or handful (Lv 27⁵ 6¹⁵) and the *hōphen* (dual, 'two-hands full,' Ex 9⁸, Lv 16¹³, Ezk 10²), the Hebrews from early times had a carefully graduated system both for wet and dry measures, the names and values of which have too frequently been obliterated in our English versions by an indiscriminating fondness for the rendering 'measure.'[†] The relation of the various denominations to each other are happily amply attested, and may be represented in tabular form, by anticipation, thus—

| SCALE OF MEASURES OF VOLUME. | | | | | |
|------------------------------|-----------------|-------|------|------|------|
| Homer-
Kor. | Ephah-
Bath. | Seah. | Hin. | Kab. | Log. |
| 1 | 10 | 30 | 6 | 180 | 720 |
| | 1 | 3 | 6 | 18 | 72 |
| | | 1 | 1 | 6 | 24 |
| | | | | 1 | 12 |
| | | | | | 4 |

Of these the *homer*, *ephah*, *seah*, and *kab* are mentioned in OT as dry measures, the first named

^{*} It is tempting to compare this expression with the *actus*, originally the headland where the plough was turned (Heb. מִקְוֵה), which ultimately became the Roman unit of land measure (120 × 120 ft., c. 1500 sq. yards).

[†] As illustrations of confusion thus caused—a baneful legacy from the LXX—Lk 13²¹ compared with 16⁷ may be consulted, where three denominations, standing to each other in the ratios 1:3:30, are rendered indiscriminately by 'measure' (see next §).

being supplanted in later times by the *kor*; the *bath*, *hin*, and *log* only as liquid measures. The proportions in the table show the influence of the sexagesimal system, while the 'omer' or 'issaron', $\frac{1}{16}$ of the *ephah*, represents a parallel decimal subdivision (see below). It will be noted, further, that the two sets are essentially identical. In the case of the *homer* and the *kor*, also of the *ephah* and the *bath*, this identity is indeed expressly attested by Ezekiel in an important context, where also the latter pair are stated to be a tenth part of the former pair (Ezk 45^{11a}).

Of the absolute values of the various denominations in terms of other and better-known systems, we have no reliable evidence older than the 1st cent. of our era, by which time, as the latest Jewish weight-system so strikingly illustrated, Palestine had become the meeting-place of several systems of metrology, leading to an unavoidable syncretism, and to the identification of native weights and measures with the nearest approximations in foreign systems. Bearing this in mind, we shall now adduce a few of the more useful equations to be found in the *Antiquities* of Josephus.

- (a) VIII. ii. 9 (Niese, § 57), the *bath* (βάρος) is equivalent to 72 *sextarii* (ξέτροι).
- (b) IX. iv. 5 (§ 85), the *seah* (σαάρον = $\frac{1}{4}$ ephah or bath) = $1\frac{1}{2}$ Roman modii, i.e. 24 *sextarii*.
- (c) III. viii. 3 (§ 30), the *hin* (ήν = $\frac{1}{4}$ bath) = 2 Attic choes, i.e. 12 *sextarii*. Cf. III. ix. 4 (§ 234).
- (d) XV. ix. 2 (§ 314), the *kor* (κόρος = 10 ephah-baths) is equivalent to 10 Attic metretai, i.e. 720 *sextarii* (μετρίωνος [read μετρητῶν] Ἀττικῶν δέκα).

Earlier possibly in date than these equations is the evidence of the anonymous fragment *περὶ μέτρων* (Hultsch, *Metrol. Script.* i. 258), where after the definition of the Phoen. *kor* as containing 30 *seahs* it is added: 'the *seah* is $1\frac{1}{2}$ modius,' a definition identical with that of Jerome commenting on Mt 13³². Now, the basis of all these equations is the identification, as a glance at our table will show, of the Hebrew *log* with the Græco-Roman *sextarius*, as is done by the anonymous translator of Lv 14¹⁰ cited *apud* Field, *Origenis Hexapla*, in loc. (cf. *Antiq.* IX. iv. 4 [§ 62], where the quarter *kab* of 2 K 6²⁵, i.e. the *log*, is also rendered by ξέτρον). Evidence to the same effect might be produced from the Mishna, where it is said of the offerings prescribed in the Pentateuch that 'their measure is on the Roman standard' (*Kelim* xvii. 11). The determination of the value of the *sextarius-zestes*, the common unit of the Greek and Roman systems, in terms of our imperial system is therefore an indispensable preliminary to further progress. Two methods are open to us. We may, with Hultsch, start from the theoretical and legal determination of the Roman quadrantal as 80 Roman pounds weight of wine, and the similar determination of our imperial gallon as 10 lb. of water, and so reach a value for the *sextarius* of $\frac{1}{96}$ imperial pint, the value adopted in the tables in Smith's *Dict. of Antiq.*² from Hultsch, *Metrol.*³ (*passim*). Or we may prefer the determination given by the best of the extant Roman measures, the Farnese congius in Dresden, which yields a *sextarius* equal to $\frac{1}{99}$ of a pint. This latter method has the advantage of allowing the *sextarius-log* of the Jewish system to be taken, for the smaller determinations, as the equivalent of our pint, and will be followed in this and the subsequent section. This gives for the *ephah-bath* of 72 *logs*, which is the most convenient measure for detailed examination, the value of 71.28 pints, or approximately 9 gallons (see table below).

It is scarcely to be expected, however, that the

measures of OT times can have been so precisely the equivalent of the Græco-Roman denominations as this identification presupposes, and there are not wanting indications of this in Josephus' own writings and in those of later authors, especially as regards the larger denominations. Are there, then, sufficient data available for reaching a closer approximation of the original values of the Heb. measures? Perhaps the most unsatisfactory of all methods of solving this problem is that frequently attempted, down even to our own day (see Watson, *PEFSt*, 1898), on the basis of the dimensions of Solomon's brazen sea and the lavers of the temple (1 K 7^{22, 23} with parall. in Chron., LXX, and Joseph.).—a solution which the conflicting dimensions in the literary sources named, and our ignorance of the shape of the vessels in question, render only less futile than the converse attempt to deduce from the same conflicting and insufficient data the length of the Heb. cubit! But little more satisfaction is obtained by starting from the Rabbinic theory, that the *log* was equal in cubic content to six medium-sized eggs, as may be seen from the widely divergent results in the writings of previous investigators. The Alexandrian translators (LXX), finally, to whom one naturally turns for the equivalents of the Hebrew measures in the Græco-Egypt. system, are disappointing in the extreme. Here transliterating, there paraphrasing, now omitting and now making a random guess, these translators betray a remarkable ignorance of the contemporary Jewish measures (see next § for ample illustration).

(a) Two features of the system under investigation seem to warrant us in looking once more to Babylonia as its original home, namely the number of *logs* in the *kor* (720 = 360 × 2), as if the *log* were the half of a unit that has now disappeared, and the apparent identity of the *kor* with the Babylonian ideogram *gur* (cf. *kikkar*, talent, with Bab. *gaggaru*). Unfortunately, it must be admitted that, notwithstanding the brilliant researches of Oppert and his fellow-workers, the measures of volume are still the least satisfactory department of Bab. metrology (see esp. the elaborate exposition and criticism in Johns' *Assyrian Deeds*, etc. [1901]). Adopting, however, with due reserve the view of Lehmann and others (cf. above § vi., also Hommel's art. BABYLONIA, vol. i. p. 219) that the unit of volume was the *ka*—which Hommel (*l.c.*) would identify with the Heb. *kab*—equal to an original heavy mina's weight of water (15,160 grains, see § ii. above), we get 1.73 imperial pints as the value of this unit,* 624 pints for a *gur* of 360 *ka*, and 62.4 pints for the assumed original of the Heb. *ephah-bath*. On the other hand, if the measures of volume increased *pari passu* with the weights, the mina of 16,000 grains which has been conclusively proved to have been adopted in the West (§ ii.) would yield a *kor* of 658 pints and an *ephah-bath* of 65.8 pints.

(b) Again, if we follow the clue suggested by the Egyptian affinity in the department of the linear measures, we find an interesting parallel to the treatment of the Heb. measures in the Græco-Roman period. A working equivalent of the *ephah-bath*, we have seen, was obtained by identifying it with the Attic *metretres* of 72 *sextarii*. Now, precisely this same equation was adopted in Egypt under the Ptolemies for a measure with a long pedigree, known in the Ptolemaic ages as the *artabe* (ἀρτάβη).† That this equation of the *artabe*

* The imperial gallon contains 10 lb. (70,000 grains) of distilled water at a temperature of 60° Fahr.

† Wilcken, however, has found no fewer than five different *artabes* in use in Egypt in the Ptolemaic period (*Griech. Ostraka*, i. 740 ff.).

with the *metretes* was a working and not a scientifically exact equation, is evident from the fact that by the native authorities (Griffith, *PSBA* xiv. 435) the *artabe* was defined as containing 80 Egyptian *hin*, the *hin* being a volume of water 5 *deben* in weight (7020–7170 grains, according to the valuation of the *ket*, see § ii.), which works out at a little less or more than 65 pints for the *artabe*. Now, the *artabe* was the lineal descendant of an ancient measure derived from a fraction of the cubit cubed (Griffith, *l.c.*); and since the Egypt. cubits passed to Palestine, there is a *prima facie* case for suggesting, as an alternative to the Babylonian origin of the *ephah-bath*, its derivation from the Egyptian system, with a value of 65 pints.

(c) But there is more reliable evidence than these somewhat hypothetical deductions as to

Epiphanius in his work on weights and measures (edited by Hultsch, *op. cit.*, and by Lagarde in his *Symmicta*), which give to the *ephah* a value ranging from 64 to 66 *sextarii*. For other, mainly speculative, methods of calculation see Watson, *PEFS*, 1898, 109 ff. (7·85 galls.), and Warren, *ib.* 1899, 252 ff. (8·42 galls.).

The result of our investigation, then, is to point to an approximate value for the *ephah-bath* in OT times of 65 imperial pints (36·92 litres). From the necessity of establishing a more convenient working equation in later times, it was regarded in most cases as the equivalent of the Attic *metretes* of 72 Roman *sextarii*, or 9 galls. nearly, on the basis of the identification of the *log* with the *sextarius*. Both these values are given in the following tables:—

TABLE OF HEBREW DRY MEASURES.

| | Log. | Kab. | Omer. | Seah. | Ephah. | Earlier values in | | Later values in | | Approximate values. |
|----------------|------|------|-------|-------|--------|-------------------|--------|-----------------|--------|---------------------|

the actual capacity of the Heb. measures, the most trustworthy in the opinion of such metrological authorities as Hultsch and Petrie being a statement in an unfortunately corrupt passage of Josephus. This author, writing of the famine in the time of Claudius (cf. *Ac* 11²⁸), tells of 70 *kor* of wheat being brought into the temple, and adds—adopting Hultsch's emendation, *Metrol.* 2455—*ὑδίοι δὲ Σικελοὶ μὲν εἰσὶν εἰς κόρος τριάκοντα*, 'Ἀττικοὶ δὲ τεσσαράκοντα εἰς' (*Ant.* III. xv. 3 [321]). In view of the connexion of Sicily with Phœnicia through Carthage, the '30 Sicilian modii' are most probably 30 Heb. *seahs*,—this rendering of the *seah* by *modius* is found in Epiphanius and other writers; cf. *Mt* 5¹⁰ *ὑδίοι* for the *seah*-measure,—while the very precise statement that the *kor* contained 41 Græco-Roman *modii* seems, as Hultsch says, to rest upon actual measurement. Now, 41 *modii* or 656 *sextarii* yield as nearly as possible 650 pints for the *kor*, or 65 for the *ephah-bath*.

(d) In several later Gr. writers (see Hultsch, *Metrol. Script.*, Index under *σάρον*) the *seah* is given as 1½ *modii* instead of, as by Josephus and Jerome, 1½ *modii*, that is, at 20 instead of 24 *sextarii*. Now, in the Mishna there are frequent references to local varieties in the size of the *seah*, *kab*, etc., the Jerus. measures, for example, standing to those of Galilee in the ratio of 5:6,† which is precisely the proportion disclosed by the variant valuations of the *seah* just cited. It is allowable, in the light of these divergent equations, to hold that different authorities made different attempts to establish a convenient equation of the two systems, Jewish and Greek, and that the true value of the *ephah-bath* lay between the two equations of 60 and 72 *sextarii* respectively, which is quite in harmony with the more positive results already obtained. The same conclusion is established by a study of the conflicting data of

TABLE OF HEBREW LIQUID MEASURES.

| Kor | 720 | 60 | 10 | 369·2 | 650 | 405 | 712·8 | 90 „ |

x. *The measures of Scripture.*—It only remains to make a short reference to the individual measures in the canonical and deuterocanonical writings. The *log*, the lowest denomination in both the wet and dry scales, occurs in OT only in the ritual for the purification of the leper (*Lv* 14^{10,24} LXX *κολλη* = ½ *sextarius*) as a measure of oil. Originally about ½ pint, it was in NT times identified with the *sextarius* (or pint), by which it is rendered by a Gr. translator cited by Origen (Field, *Hexapla*, in loc.), and was then used as a dry measure as well, subdivided binarily down to ¼ *log*, the ¼ *log* being specially frequent in the Mishna. The ¼ *log* was also known as the large spoonful (מִן הַכֶּלֶב), the ¼ as the small spoonful (Hertzfeld, *Handelsgesch. d. Juden*, 184). Four *logs* went to the *kab*, which in OT is found only in the corrupt passage 2 K 6²², which speaks of 'the fourth part of a kab' (so RV, AV 'cab').* At the date when this reading arose the *log* was probably still confined to liquids. The LXX render by *τράπων τοῦ κάβου*, while Josephus gives the equivalent *ξέρων* or *sextarius*. Peculiar to the Priests' Code is the next highest dry measure, the 'issaron' (יִסְרוֹן *Ex* 29⁴⁰, *Lv* 14¹⁰ etc.), the tenth deal of our AV, i.e. as RV 'the tenth part of an ephah,' as already once correctly rendered by LXX *τὸ δέκατον τοῦ ἐφᾶ* (*Nu* 15¹). The loaves of the shewbread contained each two 'issarons' (*Lv* 24⁶), transliterated *ἰσαρών* by Josephus, who wrongly gives its value

* The 'omer is here inserted for comparison, though an intruder, as the fractional proportions show; see next §.

† These variations in quantity may also have been due to some extent to the difference between heaped and straked measure; cf. *Baba bathra* v. 11.

* Cheyne, however, would read 'a quarter of a kor of carob-pods,' etc. (*Expos.*, July 1899).

as '7 Attic cotylæ,' or only $3\frac{1}{2}$ *sextarii* ($3\frac{1}{2}$ instead of 6-7 pints). A special name for this measure is found in the story of the manna (Ex 16^{16f.}), viz. the *omer* (עֹמֶר, LXX γυμνος), defined in v.³⁶ as 'the tenth part of the ephah,' the same expression as is found in Lv 5¹¹ 6³⁰ etc. In Ex 16²¹ the term is used of the 'omer-measure.' This decimal division of the *ephah* is another indication of the conflict between the decimal and duodecimal or sexagesimal systems, which met us in connexion with the Heb. weight-system. It was probably confined to priestly circles, as it does not fit into the rest of the system below the *ephah*.

The sixth part of the *ephah-bath* for liquids was the *hin* (הֵין, LXX ε or εἰς [B], but χούρ, Lv 19³⁶), a term apparently of Egypt. origin, the *hennu* (Coptic εἰνε) of Egypt, however, being a much smaller measure (see preceding §). With the exception of Ezk 4¹¹ ($\frac{1}{2}$ *hin* of water), the *hin* occurs exclusively in the Priests' Code in connexion with the offerings of wine and oil that accompanied the meal-offering. Thus we have $\frac{1}{2}$ *hin*, $\frac{1}{3}$ *hin*, $\frac{1}{4}$ *hin*, all in Nu 28¹⁴. The value of the *hin* was $1\frac{1}{2}$ – $1\frac{1}{3}$ galls. The double of the *hin*, the *seah* (שֶׁה, *óárov*), was used exclusively as a dry measure, containing 6 *kabs* (see Mishna, *Menahoth* vii. 1; *Para* i. 1, and oft.). It was the third of the *ephah*, and is therefore to be identified with the *shálsh* (Is 40¹², lit. 'third,' hence Avm 'tierce'). The *seah* is variously rendered by the LXX; but where not given by the general term *μέτρον*, whence our AV 'measure,' it is wrongly identified with the *ephah* (1 S 25¹³) or with the *metretres* (1 K 18²³). The correct *óárov* is found in the later translations of Aquila and Symmachus, but in LXX only in Hag 2¹⁶⁽¹⁷⁾, where no measure is named in the original. In the NT also it appears as *óárov* (Mt 13³, Lk 13³¹ 'three measures of meal'), where it is equal in value to $1\frac{1}{2}$ *modii* (Jerome) or 24 pints, the 'three measures' being, of course, an *ephah* or $1\frac{1}{2}$ bushels of flour.* We have seen in a former section that a *seah* of seed was calculated to sow a surface of 2500 sq. cubits, which thus became the common unit of surface measure.

The most common of the large measures was the *ephah-bath*, originally in all probability equal to 65–66 pints, but in NT times identified with the *metretres* of nearly 72 pints. The *ephah* was used exclusively for measuring grain and other dry substances, the *bath* exclusively for liquids. The former term appears to be of Egypt. origin, and is given as *oipi* by the LXX (cf. Coptic *oipi*) when not rendered by *μέτρον* (both in Ezk 45¹³). On the other hand, they render the *ephah* of Is 5¹⁰ by *τρία μέτρα*, evidently 3 *seahs*, and so expressly in the Targum of this passage (cf. *Menahoth* vii. 1). The $\frac{1}{2}$ *ephah* of Ezk 45¹³ 46¹⁴ is accordingly $\frac{1}{2}$ *seah*. For the *bath* the LXX again use their favourite *μέτρον*, or the absurd *χοινίς* (only 2 pints! Ezk 45¹⁰), only once the correct *βάρος* (Ezr 7²³). The 'hundred measures of oil' (Lk 16⁶) in the unjust steward's accounts were 100 *baths*, or close on 900 gallons. The highest denomination in the system was the *homer* (הוֹמֶר) or *kor* (כּוֹר, EV 'cor' in Ezk 45¹⁴, but generally 'measure'), both used with considerable frequency in OT as a measure of barley (Lv 27¹⁶ etc.), wheat (Ezk 45¹³), and cereals generally. The identity of the *kor* and the *homer*, as each containing 10 *ephah-baths*, with the information that the *kor* was also used for liquids, is given by Ezekiel (45¹⁷). The latter came in time to be the name in ordinary use for both wet and dry measure, and passed to the Greeks as the *kópos* (1 Es 8²⁰). The 'hundred measures of wheat' of Lk 16⁷ are 100 *kors*, at this period equal to more than 1110 bushels. Hosea tells us that part of the price he paid for the

recovery of his unfaithful wife was a homer of barley and a *letheh* (לֶתֶה), which our EV, following Jewish tradition, render as 'half a homer' (Hos 3²), a value which it certainly has in the Mishna.

In the NT we find the names of Græco-Roman measures, although in some cases the terms are not used as measures, but as the names of household utensils. Thus the *xestes* of Mk 7⁴, properly the *sextarius* or pint measure, is here used generally of a cup or other small domestic vessel. The *modius* (μόδιος) of Mt 5¹⁵ and parallels, however, is a classical loan-word for the housewife's *seah*-measure required for the daily provision of the household bread. On the other hand, the 'firkins' of Jn 2⁶ are the Gr. *metretres* of c. 72 pints, which we have seen to be the working equivalent of the *bath*. Apart from its careless use by the LXX, now for *seah*, now for *bath*, it is found 1 Es 8²⁰ (AV 'pieces of wine,' RV 'firkins') and Bel³ (AV 'vessels of oil,' RV 'firkins'). We have seen above that the *metretres* was also the working equivalent in Egypt of the *artabē* (ἀρτάβη, Bel³ AV and RV 'great measures'; also Is 5¹⁰ LXX, another gross miscalculation), which was originally of the same cubic capacity as the *ephah-bath*, i.e. c. 65 pints. The author of the Fourth Gospel represents Mary of Bethany as taking a *λίτρα* (EV 'pound') of ointment of spikenard to anoint our Saviour's feet (Jn 12³). This has usually been understood of the Roman pound, as in Jn 19³⁰; and probably with justice. Hultsch, however (*Metrol.* 720 f., 602), understands by the former *litra* the vessel of horn, in which such unguents were kept by the Roman physicians, with measuring lines on the outside like our modern medicine glasses, and which certainly bore this name. Mention is made, last of all, in Scripture of the small Gr. measure the *choenix* (χοῖνίς, Rev 6⁶) of two *sextarii* or pints as a 'measure' (AV) of wheat.*

LITERATURE.—A. General works on metrology: A. Boeckh, *Metrolologische Untersuchungen*, 1838; J. Brandis, *Das Münz-, Maas-, und Gewichtssystem in Vorderasien*, 1866; F. Hultsch, *Griechische u. Römische Metrologie* 2, 1882 (the standard work on ancient metrology, but already out of date in many parts); also, *Metrolologicorum Scriptorum Reliquia*, 2 vols. 1884; W. M. F. Petrie, art. 'Weights and Measures' in *Encyc. Brit.* 9 1883; H. Nissen, 'Griech. u. röm. Metrologie' in Iwan Müller's *Handb. d. klass. Altertumswissenschaft*, 1892 (also separately); W. Ridgeway, *The Origin of Metallic Currency and Weight Standards*, 1892.—B. Special treatises and essays: Hultsch, *Gewichte des Altertums*, 1898; R. Lepsius, *Langenmaass der Alten*, 1884. On Babylonian metrology: J. Oppert, *L'Étalon des mesures Assyriennes*, 1875 (antiquated); C. F. Lehmann, 'Das altbabylonische Maass und Gewicht und deren Wanderung' in *Verhandl. der Berliner Anthropol. Gesellschaft*, 1889; also in several succeeding years to 1896; the same author's *Das altbabyl. Maas- und Gewichtssystem als Grundlage der antiken Gewichtssysteme*, etc., 1893; C. H. W. Johns, *Assyrian Deeds and Documents*, 1901 (ch. iii. 'Metrology,' very full collection of material). For Egypt: F. Ll. Griffith, 'Notes on Egyptian Weights and Measures' in *PSBA*, 1892 (pp. 403–450); for the Ptolemaic period, U. Wilcken, *Griechische Ostraka*, 1899, i. 738–780. For late Jewish metrology: B. Zuckermann, *Ueber talmudische Münzen und Gewichte*, 1862, *Das jüdische Maasssystem*, etc., 1867. On the general subject of the above article see also corresponding article in Smith's *DB*, and Schrader's articles 'Gewicht' and 'Masse' in Riehm's *HWB* 3; also the relevant sections in Nowack, *Heb. Arch.* 1894, i. 198 ff., and Benzinger, *Heb. Arch.* 1894, 178 ff., and the recent papers on the measures of length and capacity by Col. Watson in the *PEFS*, 1897, 1898, and Sir C. Metrological.

A. R. S. KENNEDY.

WELL.—A distinction is now made in Eng. between the words 'fountain' and 'well' which did not exist when the AV was made. According to its etymology (Anglo-Sax. *wylla* or *wella*, a spring, from *weallan* to surge, boil, and akin to Sansk. *val*

* The vague 'measure,' it may be useful to state here, stands in AV for *ephah* Dt 25^{14f.}, Pr 20¹⁰, Mic 6¹⁰; *kor* 1 K 4²² bis 5¹¹ bis, 2 Ch 2¹⁰ bis 2¹⁵, Ezr 7²²; *seah* Gn 18⁶, 1 S 25¹⁸, 1 K 18²², 2 K 7¹ bis, 16 bis, 18 bis, Is 27³ (but see RV and Comm.); *shálsh* Ps 80⁶, Is 40¹²; *βάρος* (=bath) 1 K 16⁶; *σάπες* (=kor) Lk 16⁷; *εἰς* (=seah) Mt 13³⁵ = Lk 13³¹; *χοῖνίς* Rev 6⁶.

* The same quantity in Sarah's hands (Gn 18⁶) was nearer a nusiel.

to move to and fro), 'well' was used of springing water, and not confined as now to water standing in a hole or stored up in a pit. Thus Chaucer, *Death of Blanche*, 160—

'Ther were a few welles
Came renning fro the cliffes adoun';

Milton, *Lycidas*, 15—

'Begin then, sisters of the sacred well
That from beneath the seat of Jove doth spring.'

In AV 'well' is therefore an accurate rendering of such words as *ayin* and *πηγή*. In RV the attempt has been made here and there, but not consistently, to bring out the modern distinction. See next article.

J. HASTINGS.

WELL (בֵּר, בְּרָ [properly 'cistern'], צֶן, צֶנָן [both = 'fountain'], *πηγή*, *φειά*).—The art of sinking wells for supply of water in the absence of springs or brooks comes down from very early times. Three wells of special interest are noted in the Bible: (1) Abraham's well at Beersheba; (2) Jacob's well near the village of Sychar ('Askar) in Samaria; and (3) the well at the gate of Bethlehem. All these are in existence at the present day. For the first see BERSHEBA and SHIBAH. (2) The digging of Jacob's well is not recorded in the OT, but in the NT we have the interesting account of the conversation between our Lord and the woman of Samaria (Jn 4¹⁻⁶) which took place at this spot. The village of 'Askar, which, according to Conder, is the modern representative of Sychar, stands on the slope of Mount Ebal within sight of Jacob's well.* See further under JACOB'S WELL. (3) The well of Bethlehem, for whose water David thirsted (1 Ch 11¹⁷), is shown to travellers by the roadside on approaching Bethlehem from Jerusalem. There is no reason to doubt that it is the same which existed in the days of David.

Wells in Eastern countries have always been of the highest importance as objects of possession and as historical landmarks. It was one of the special privileges accorded to the Israelites that they should come into possession of wells which they themselves had not digged (Dt 6¹¹),† and they sometimes became objects of strife (Gn 21²⁵). This is not to be wondered at, considering the difficulty of sinking wells into the rock in these early times, and the great value of the water when it had been reached.

E. HULL.

WENCH.—The translators of AV accepted this word from the Bishops' Bible as the tr. of *shipkhah* in 2S 17¹⁷. Wyclif has (1382) 'bondwomman' and (1388) 'handmaide,' Cov. 'damsell,' Geneva Bible 'maid.' The oldest form of the word is *wenche* (from Anglo-Sax. *wenclo*, plu. 'children'), which signified a child of either sex, as *Ancien Rivle*, 334, 'Were and wif and wenche.' Afterwards in the contracted form 'wenche' it was restricted to a female child, a girl, or young woman. Thus Mt 9¹⁴ Wyc. 'Go ye away, for the wenche is not dead, but slepeth'; Mk 5⁴¹ Rhem. 'And holding the wenches hand, he saith to her, *Talitha cumi*, which is being interpreted, *wenche* (I say to thee) arise'; Elyot, *Governour*, ii. 324, 'Achilles . . . for a lytle wenche contoured with Agamemnon.' By 1611 the most frequent use of the word was to denote a servant maid, its meaning (as above) in AV. So Mt 26⁷¹ Tind. 'When he was gone out into the porche, a nother wenche saw him'; Jn 18¹⁷ Rhem.

* *Tent-Work*, 40. Conder says: 'The tradition of Jacob's well is one in which the Jews, Samaritans, Moslems, and Christians alike agree.' *Ib.* 38.

† RV 'Cisterns hewn out which thou hewedst not,' probably both wells and cisterns were intended.

'The wench therefore that was portresse saith to Peter.' But the word was already used in a sense that opened the way to its present deterioration, as Bar 6⁹ Cov. 'Like as a wench that loveth peramours is trynly deckte.' J. HASTINGS.

WHALE.—The EV tr. of two words. 1. *tan*, and its derivatives (see DRAGON and SEA-MONSTER). 2. *κῆτος* (Mt 12²⁰). The latter is the LXX and NT rendering of דָּגָה גָּדוֹל *dāgh gādōl*, 'a great fish' (Jon 1¹⁷). There is no doubt of the existence of whales in the Mediterranean. Large parts of the skeletons of two specimens of the right whale are preserved in the museum of the Syrian Protestant College at Beirut. One of these animals was cast up on the shore near Tyre, not far from the traditional site of the ejection of Jonah, which is at Nebi-Yunus, near Zidon. The other was drifted ashore at Beirut itself. But the gullet of this species would not admit a man. The sperm whale has a gullet quite large enough to enable him to swallow a man. It is probable that one of these monsters occasionally wanders into the Levant. *Kῆtos*, however, includes marine monsters other than the whale, as the *shark*. Sharks exist in the Mediterranean large enough to swallow a man whole. The writer has seen one at Beirut 20 ft. long. They sometimes attain a length of 30 ft. There are abundant testimonies in books of travel and works of natural history to the fact that sharks have swallowed men, and even horses and other large animals, whole (see Pusey). The preservation of Jonah alive in the belly of the fish seems to be intended by the writer to be considered part of a continued miracle. 'The Lord prepared a great fish to swallow up Jonah' (1¹⁷). The Lord heard Jonah's prayer (2¹). 'The Lord spake unto the fish, and it vomited out Jonah upon the dry land' (2¹⁰). But see art. JONAH.

G. E. POST.

WHEAT.—The following Heb. words are used for 'wheat.' 1. *בָּר*, *bār* (Arab. *bur*), is most frequently tr. 'corn' (Gn 41²⁶⁻²⁷, 42²⁵, Ps 65¹⁴, 72¹¹⁻¹⁶, Pr 11²⁵). In four places (Jer 23²⁰, Jl 2²⁴, Am 5¹¹, 8⁴) 'wheat' is the more correct rendering. 2. *דָּגָה*, *dāghān*. This is generic for cereals (see CORN). It is, however, twice tr. in AV 'wheat' (Nu 18¹², Jer 31¹²; RV 'corn'). 'Corn' (generic) is undoubtedly correct. 3. *רִפְחִית*, *riphith*. Once (2S 17¹⁹) tr. in AV 'ground corn,' RV 'bruised corn,' and once (Pr 27²³) AV 'wheat,' RV 'bruised corn.' The Arabs have two ways of preparing this substance. (a) The wheat is boiled, dried in the sun, and then cracked under a wheel or in a mortar. So prepared it is called *burghul*. The fragments are exceedingly hard, and resist the action of weevils and other insects. (b) The wheat is cracked under a hand millstone, without previous boiling. This preparation is called *jerish*. It is quite similar in appearance and properties to our wheaten grits. 'Though thou shouldest bray a fool in a mortar among wheat with a pestle' (Pr 27²²), may refer to the preparation of these grits with a hand mortar, or to the process of pounding grits in a stone mortar with a wooden pestle, with meat, onions, and spices, in making *kibbeh*, the favourite national dish of Bible lands. 4. *חִטָּה*, *hittāh* (Arab. *hintah*). This is the specific word for wheat, as distinguished from other cereals.

Grains of wheat have been found in very ancient tombs in Egypt, and in the ruins at Tell el-Hesi in Palestine. Wheat is first mentioned in Gn 30¹⁴, where its harvest season is designated (cf. Ex 34²², Jg 15¹, Ru 2²³, 1S 6¹³), as also the barley harvest (Ru 1²²). The wheat harvest commences in the lowlands of the Jordan Valley in April, and ends on subalpine Lebanon in August. Wheat was an article of export from Judaea (Ezk 27¹⁷). It was

offered in sacrifice (Ex 34²²), as were all cereals (Nu 18¹² *dāghān* = 'corn,' as in RV, not 'wheat,' as in AV). It was of different qualities (Ps 81¹⁸ 147¹⁴). Some produced 100 grains (Mt 13⁸). This is not an exaggeration in the case of the Egyptian wheat (Gn 41²²), the panicle of which is compound. 'Kidneys of wheat' (Dt 32¹⁴) doubtless refers to the fat grains of the best qualities. It is usual at the present day to cut off bunches of the fattest wheat ears while still green, and toast them in the fire. Other cereals are treated in the same way. Thus cooked, they are the 'green ears of corn dried by the fire, even corn beaten out of the full ears' (AV Lv 2¹⁴, RV 'corn in the ear parched with fire, bruised corn of the fresh ear'), and 'parched corn,' Heb. 'parched' (1 S 17¹⁷ 25¹⁸, 2 S 17²⁸). They are a favourite food of the people a month or so before the harvest. The Arabs call them *ferik*. Nearly ripe ears are rubbed out in the hands, and the grains eaten raw (Lk 6¹ etc.). An ear of corn was called *shibboleth*, which the Ephraimites pronounced *shibboleth* (Jg 12⁶). See SHIBBOLETH.

The wild original of wheat is unknown. Some have suggested that it is derived from *Agilops ovata*, L. Only one species of wild wheat, *Triticum monococcum*, L., is found in Palestine, and that only in northernmost Syria. G. E. POST.

WHEEL.—Various Heb. words are so translated. 1. טוּרְנוֹנִים turnings, wheels. In Jer 18² this word (used elsewhere only Ex 1¹⁶, where prob. = *sella parturientis*) refers to the potter's wheel. In Syria this is commonly two horizontal discs of wood joined together by an upright pillar or axle. On the upper disc the clay is put which is to be formed into a vessel, while the lower one is turned by the feet of the potter. 2. מְרוֹנִים refers to chariot wheels in Ex 14²⁵, Nah 3², Ezk 1¹⁶ etc.; in 1 K 7³⁰, 32². to the wheels of the bases of the lavers of the temple; in Pr 20²⁶, Is 23²⁷, to the rollers of a threshing-waggon. 3. מְרוֹלָה, a rolling thing, a wheel. In Ps 83¹³ it is applied to the dust raised by a whirlwind, 'whirling dust.' In Ec 12⁶ it refers to the wheel of a cistern or well; to chariot wheels in Is 5²⁸, Jer 47³, Ezk 10²⁻¹³ 23²⁴ 26¹⁰; and in Dn 7⁹ to wheels of throne of burning fire. Another form מְרוֹלָה is found in Is 28²⁸, and is applied to the rollers of a threshing-waggon. 4. מְרִיט beat, step, in Jg 5²⁸ probably refers to the noise made by chariots, or to the step of the horses drawing them. It is evident from Scripture that chariots were frequently used in Syria and Palestine, and the wheels must have been very strongly made to withstand the rocky roads over which they were driven. On the old road near the mouth of the Nahr el-Kelb, or Dog River, a few miles north of Beirūt, along which both Assyrian and Egyptian armies passed, the marks of the chariot wheels are still to be seen, deeply engraved in the rock. After the Mohammedan invasion, wheeled carriages ceased to be used, and it was only about the middle of this century that they were reintroduced by Europeans. The wheels of the ancient Egyptian chariots had six spokes (מְרִיטִים), which connected the nave (מְרִיט) with the felloes or rim (בָּר). Slits were made in the tyre, through which bands were passed and fastened round the rim. The axle-tree (רָ) was fixed to the body of the chariot, and its extremities were rounded where they passed through the wheels. The wheels were secured by pins. The wheel evidently had its origin in the roller, then discs of wood were used, and in India wheels are often made of planks of wood nailed together and then cut into a circular shape.

On the 'wheel of nature,' Ja 3⁶ RV, see esp. Mayor, in loc. W. CARSLAW.

WHELP.—בֶּן, lit. 'son' (Job 4¹¹ 28⁶), נֶפֶשׁ (Jer 51³⁸,

Ezk 19² 3², Nah 2¹¹ 12), σκῆνος (1 Mac 3⁴ used of the young of the lion (see LION)); in 2 S 17⁸, Pr 17¹³, Hos 13⁸, of bears' cubs (see BEAR). In the last three passages the Heb. is simply נֶפֶשׁ 'bereaved,' the words 'of her whelps' being supplied in EV.

WHIRLWIND (עָרָב עָרָב, עָרָב עָרָב, טוּרְנוֹנִים *šūphāh*).—The term is applied generally to any violent destructive wind. The same words are often translated in other passages by 'storm' or 'tempest,' e.g. Ps 55⁸ 83¹⁵ (both *šū'ar*); Is 29⁶ (*šū'arāh*); Am 1¹⁴, Jon 1⁴ 13 (all three *šū'ar*). The 'whirlwind' of AV is rendered 'tempest' by RV in Jer 23¹² 25³² 30³ (all *šū'arāh*); 'stormy wind' in Ezk 1⁴ (*rūah šū'arāh*); 'storm' in Job 37⁹ and Is 17¹³ (both *šūphāh*). The term 'whirlwind' is used both in a physical and a symbolical sense. In the former we may take the passage descriptive of the rapture of Elijah in 2 K 2¹, as also that in Job 21¹⁶ 37⁹, Is 17¹³ 21¹, Ezk 1⁴, Am 1¹⁴, Nah 1³, Ps 107²⁵ 148⁸; but in the remaining passages the term is used figuratively: of chariots (Is 5²⁸ 66¹⁵, Jer 4¹³, Dn 11⁴⁰), the passionate acts of man (Ps 55⁸), the ruin brought upon man by his sin (Hos 8¹ and oft.), or the anger of God against the wicked (Pr 1²⁷ and oft.); nor can the term be considered inapt from what we know of the destructive effect of rotatory storms in some countries. To such storms the references in the Bible must be considered to refer; but, strictly speaking, whirlwinds differ essentially from cyclones, which arise from unequal distribution of atmospheric pressure over horizontal areas; whereas whirlwinds, tornadoes, dust-storms, and waterspouts are different forms of atmospheric movement consequent on a vertical disturbance of the equilibrium of the air. When occurring over the sea or inland lakes the rotatory movement gives rise to waterspouts; when over the land, and especially over a sandy desert, a dust-storm, a cause of terror to caravans and wandering Arabs, is the result. As this is the form which is most usual in Bible lands, it may be referred to in a little further detail. When a dust-storm is about to commence, the air is unusually stagnant and sultry; presently a tall column of sand approaches, moving in a certain direction, and drawing into itself as it moves along sand, dust, and light bodies whirling around the centre of the column. Sometimes several of these columns move over the surface, each gyrating independently round its own axis. Observations made on such phenomena appear to show that the air of the surface is strongly drawn in towards the base of each column, and that it ascends along the central axis of the whirlwind. The only course of safety for the traveller over the desert, on the approach of a dust-storm, is to descend from his camel, throw himself on the ground, and completely cover his head with his mantle, till the storm passes away. In the tales of the *Arabian Nights*, and generally in the folk-lore of the East, the travelling dust-pillar is regarded as a favourite abode of the *afrit* or *genius loci*.

During the storms that precede the rain at the end of summer (September and October), the wind hustles along in front of it, to the depth of some three feet above the ground, a vast collection of thistle-tops and various seed-vessels. They hasten along so that before the rain comes they may find each in its little hollow or crevice a resting-place in which to die and become fruitful. In places where the wild artichoke abounds, as in the great open plain between the two Lebanons, the rushing wind snaps off the dry, globular, dahlia-like tops, and urges them along, like the jumping chariots (Nah 3³) of the Assyrian king. They move with military precision, now charg-

ing at the double-quick, and then wheeling to right or left, as if imitating some phantom fogleman, or obeying some ghostly word of command. Thomson is of opinion that this must bethe 'wheel' of Ps 83¹³, *rolling thing* of Is 17¹³ (גלגל); in both instances RV 'whirling dust' (*Land and Book*, S. Pal. 212). The driving power of the storm is exemplified in Ex 10¹³⁻¹⁹, Nu 11³¹, 1 K 19¹¹.

Very often the whirlwind or tempest is accompanied by rain and dark clouds. The wind whistles and moans, and seems to come from all directions at once, flinging out scuds of fine spray and discharging torrents of rain. The cold is often such as to cause loss of life to men and animals. Tents and booths are wrecked, and the 'overflowing shower' (Ezk 38²²) created by it undermines houses and tears down vineyard walls. It is a sort of cloud-burst, and is called by the Arabs a *seil*, that is, a *flood*. Like the suddenness of its onslaught (Pr 1²⁷) is the rapidity of its disappearance (Pr 10²⁵, Is 5²⁸). It is referred to in Ps 18¹⁷⁻¹⁸, Jer 23¹⁹, and its leading features are given in the parable illustration with which Christ closed His Sermon on the Mount (Mt 7²⁵⁻²⁷).

G. M. MACKIE and E. HULL.

WHITE.—See COLOURS, vol. i. p. 458².

WHITE OF AN EGG (חלבון, EV Job 6⁶, RVm 'juice of purslain').—The allusion should perhaps be understood to be to the juice of some insipid plant, probably *Portulaca oleracea*, L., the common purslane. 'White of an egg' (lit., on this view, 'slime of the yolk') is a Rabbinic interpretation, and is still accepted by A. B. Davidson, Duhm, *et al.* The comparison in the other member of the parallelism is with 'unsavoury,' which would be better rendered 'insipid.' G. E. POST.

WHOLE, WHOLESOME.—The Anglo-Sax. *hāl* became in Middle Eng. *hole*; the spelling *whole* is due to a dialectic pronun. (as in whoop, whore *) and obscures the connexion of the word with hale, heal, holy. 'Hole' as well as 'whole' is used by Tindale, as Ex 5¹⁸ 'see that ye delyver the hole tale of brycke.'

1. The earliest meaning is *healthy*, as in Mt 9¹² 'They that be whole need not a physician, but they that are sick' (ol *laxóvres*). So Udall, *Erasmus' Paraph.* i. 28, 'Yf thine iye bee clere and whole, it geveth sight to all the membres'; Hall, *Works*, iii. 461, 'We are not the same men sick and whole'; Calderwood, *History*, 140, 'Mr. Patrick Adamson, called commonly Bishop of St. Andrews, had kepted his Castle, like a fox in a hole, a long time, diseased of a great seditie, as he himself called his disease. . . . When the King cometh to St. Andrews, he becometh a whole man.'

2. Next, *made healthy, healed*, as in Mk 5³¹ 'Go in peace, and be whole of thy plague' (ἰσθὶς ὑγίης); so Tennyson, *Lancelot and Elaine*—

* He called his wound a little hurt,
Whereof he would be quickly whole.

3. Then, *unbroken, entire*, as in Dt 27⁶ 'Thou shalt build the altar of the Lord thy God of whole stones' (RV 'unhewn'); 2 S 1⁹ 'my life is yet whole in me'; Pr 1¹² 'Let us swallow them up alive as the grave; and whole, as those that go down into the pit'; Is 14^{29, 31} 'Rejoice not thou, whole Palestina' (RV 'O Philistia, all of thee'). Cf. Erasmus, *Crede*, 139, 'with pure and whole faith.'

Wholesome occurs in AV but twice, Pr 15⁴ 'a wholesome tongue' (לשון קדושה, LXX *laos glōssēs*, RVm 'the healing of the tongue'), and 1 Ti 6³ 'and consent not to wholesome words' (ὀφθαλμοφθόρα).

* Hot is spelt 'whot' in Dt 9¹⁹ AV 1011.

λόγους, RV 'sound words,' RVm 'healthful'). In both places the word means health-giving, healing. In the latter place there is at least a hint of that moral meaning which 'wholesome' had in older English = soul-healing, *saving* ('heilsam'). This meaning is found in the Pr. Bk. Psalter, Ps 20²⁸. See Driver's *Par. Psalt.* p. 485, and the quotations there. See also art. HEALTH.

J. HASTINGS.

WHORE.—See HARLOT.

WIDOW * (ἁλμᾶνᾱ; χήρα; vidua. The absence of any term for 'widower' shows that the wife was considered of less importance to the husband than *vice versa*).

i. OT AND APOCRYPHA.—The position of the widow varied according to her family. A young, childless widow might return to her father's house and remarry after an interval (Tamar, Gn 38¹¹; Ruth and Orpah, Ru 1⁸⁻⁹). She might also be claimed in marriage by her late husband's brother (Gn 38⁸, Mk 12¹⁹, Ru 1¹²) or nearest kinsman (Dt 25², Ru 3^{12, 13}). In many instances this arrangement would cause serious inconvenience, and provision is made by which the kinsman might be released from his obligation, or might transfer it to some one else (Dt 25^{7, 10}, Ru 4⁴⁻¹⁰). The passages cited show that this Levirate marriage was an actual custom, which, however, was often neglected. A widow with a grown-up son would usually live with him, e.g. Mical's mother (Jg 17¹⁻⁶), apparently a widow in possession of property of her own (cf. 2 S 14²⁸, 1 K 7¹⁴, Jth 8¹⁻⁸). The honourable and influential position of the queen-mother, e.g. Bathsheba (1 K 2¹⁹, cf. QUEEN), illustrates the status of such widows. But there was evidently a large class of widows who were in very poor circumstances. The widow and the fatherless (cf. ORPHAN) are constantly spoken of as suitable objects of charity and special consideration (Dt 14²⁹ 16^{11, 14} 26¹², Job 22⁹ 24¹¹ 29¹³ 31¹⁶, Ps 146⁹, Pr 15²³, Jer 49¹¹), or as liable to suffer injustice (Ex 22²², Dt 10¹⁸ 27¹⁹, Job 24³, Ps 68⁹ 94⁶, Is 1^{17, 28} 10², Jer 7⁶ 22³, Ezk 22⁷, Zec 7¹⁰, Mal 3⁵, Sir 4¹⁰ 35¹⁴). Deut. makes special provisions in favour of widows: their clothing was not to be taken as a pledge (24¹⁷), and the forgotten sheaf of the harvest, and the gleanings of the olive trees and the vintage, were to be left for the stranger, the fatherless, and the widow (24¹⁹, *et passim*).

These needy widows must have belonged to the poorer classes, and have had families of young children; but even the widows and orphans of well-to-do men might be robbed of their property by some kinsman or powerful neighbour, often on some legal pretext (cf. 2 S 14⁷). The widow ranks with the divorced woman as being her own mistress, and therefore capable of taking a binding vow without obtaining the consent of father or husband (Nu 30⁹). A high priest is not allowed to marry a widow (Lv 21¹⁴), nor is any ordinary priest (Ezk 44²²); the latter passage, however, permits a priest to marry the widow of a priest. In 2 Mac 3¹⁶ we read of deposits for widows and orphans in the temple treasury.

ii. NEW TESTAMENT.—Here, too, the widow is spoken of as poor and an object for charity and special consideration (Mk 12⁴¹⁻⁴², Lk 20⁴⁷ 21²⁻³, Ja 1²⁷ *et c.*; cf. Barn. xx. 2; Herm. Sim. i. 8, *et c.*; Ign. *ad Smyrn.* 6, *et c.*; Just. 1 *Apol.* 67; Polyc. iv.). The marriage of widows generally is sanctioned (Ro 7², 1 Co 7³⁹), and, according to RV, the marriage of younger widows is enjoined in 1 Ti 5¹⁴. RVm, however, makes the injunction refer to younger women.

* See also FAMILY, ii. a, vol. i. p. 847; MARRIAGE, ii. 2, vol. iii. p. 269; POVERTY, p. 27 ff.; WOMAN (Deaconess, *et c.*), p. 936².

The charge against the Pharisees, that they devoured widows' houses (Mk 12⁴⁰), is sometimes explained of spoliation under legal forms (Gould), but more commonly, and probably, of sponging on the generosity of foolish women through an ostentatious display of unctuous piety (Holtzmann, Swete, etc.). Thus Swete, 'Schöttgen on Mt 23¹⁴ . . . shows that such a course was familiarly known as כחם פרושין, *plaga Phariseorum*.'

The care of widows was one of the special ministries of the early Church (Ac 6¹⁻⁹). Weizsäcker, however (*Apostolic Age*, i. 56), considers that widows cannot have formed a separate class so soon, and that the language of Acts reflects the conditions of a later time. From 1 Ti 5¹⁶ we gather that the relations of widows tried to shift their responsibility on to the shoulders of the Church; and any woman that has 'widows' is told that she must bear her own burden in this matter; further, the duty of supporting widows is specially urged upon children, grandchildren (5⁴), and other relatives (5⁸). The somewhat lavish charity of the Church at Jerusalem in the days after Pentecost would be a special attraction to the needy, and may account for the apparently large proportion of widows. In considering 1 Ti 5¹⁶ we must remember the large households of the East, comprising relations of various degrees to three or four generations. The 'woman's' 'widows' might be daughters, daughters-in-law, etc. We further gather from 1 Ti 5 that the Church sought to limit its alms to widows of good repute, exemplary piety and beneficence, over the age of sixty; and, from the similarity of this description to those of presbyters and deacons, it seems that the Church required service from these widows in return for maintenance, and that they constituted an order of church officers; and, according to some, corresponded to the deaconesses, of whom we have an example in Ro 16¹ (cf. WOMAN (Deaconess)), and who are described in 1 Ti 3¹¹. It should be noticed, however, that in 1 Ti 5 the writer is chiefly occupied with the burden which the relief of widows imposed upon the Church, and anxious to reduce it in every possible way. Hence the age limit, the exacting conditions as to character, and the repeated urgent appeals to relatives to maintain widows. The character qualification suggests Christian service, otherwise this function of the widows is not referred to. In Tit 2³ the 'aged women' are to be 'teachers of that which is good,' and to train the younger women; but the terms 'aged women,' and, in the previous verse, 'aged men,' are perfectly general.

1 Ti 5, mainly occupied as it is with the subject of poor relief, makes us wonder what was to become of destitute, friendless widows who were under sixty, or who had not reached the requisite standard of piety and beneficence. Did the Church leave them to starve, or allow them to be dependent on casual almsgiving, instead of making regular provision for them? It is sometimes supposed that the roll in 5⁹, on which only those widows were to be entered who possessed the qualifications specified in v. 9⁹, was a register of church officers; and that these 'widows' were distinct from the widows generally whose relief is discussed in the rest of the section. Some such view is supported by v. 11, which objects to the enrolment of young widows because it is likely that they will marry again. If the enrolment simply entitled to relief, this would be no objection; it seems to imply that a woman entering the order of widows pledged herself to remain unmarried in order to serve the Church. Cf. Anna (Lk 23⁷), a widow who devoted her life to religious exercises.

There are two main questions as to the 'widows' of the NT. (i.) Whether they were merely a class of the poor, specially cared for in the distribution of alms, or whether they were an order of church officials. Such an order existed in later times, and continued into the Middle Ages. Polyc. iv. 3 is as ambiguous as 1 Timothy; the terms used of widows, e.g. 'altar of God,' seems to imply an ecclesiastical order; and yet from the context the passage seems to refer to widows generally as distinguished from married women. But from the close of the 2nd

cent. the existence of the order is vouched for by a succession of references in Tertullian, Origen, *Apostolical Constitutions*, etc. It is therefore natural to understand 1 Ti 5 of such an order, but not necessarily Ac 6¹⁻⁹. We cannot carry back to the 1st cent. the exact organization and regulation of the order in later times, but no doubt its duties consisted in devotional exercises, the instruction of women, nursing, and other works of charity.

(ii.) The second question as to NT widows is—assuming that they constituted an order, what was its relation to that of deaconesses? They have sometimes been supposed to be identical; but if 1 Ti 3¹¹ refers to deaconesses, they are probably different from the widows of 1 Ti 5; and widows and deaconesses appear as distinct orders in the early Church, although they seem to be often confused one with the other. The most probable conclusion is that of Sanday-Headlam on Ro 16¹: 'Of the exact relation of the "deaconesses" to the "widows" (1 Ti 5³) it is not necessary to speak, as we have no sufficient evidence for so early a date; it is quite clear that later they were distinct as bodies, and that the widows were considered inferior to the deaconesses (*Apost. Const.* iii. 7); it is probable, however, that the deaconesses were for the most part chosen from the widows.'

For an account of widows in the early Church see art. 'Widow' in Smith's *Dict. of Christ. Antiquities*. W. H. BENNETT.

WIFE.—See FAMILY and MARRIAGE.

WILDERNESS or DESERT.—Both these terms, especially the latter of them, suggest to the English ear ideas which are foreign to the Heb. words which are so rendered in EV. In particular, the popular notion of a sandy waste must be banished from the mind if one is to understand the meaning of 'desert' in the Bible.

1. מִדְבָּר *midbār* (LXX usually ἐρημος) occurs about 280 times in the OT, and is tr^d 'wilderness' by AV except in 12 passages (Ex 3¹ 5³ 19² 23³¹, Nu 20¹ 27¹⁴ 33¹⁶, Dt 32¹⁰, 2 Ch 26¹⁰, Job 24⁵, Is 21¹, Jer 25²⁴), where the tr. is 'desert.' RV renders by 'wilderness' except in Dt 32¹⁰ and Job 24⁵, where it retains AV 'desert,' and Pr 21¹⁰, where it substitutes 'a desert land' for AV 'the wilderness' as tr. of מִדְבָּר. *Midbār* is properly a tract to which herds are driven (from רָרַר 'to drive [herds]'; cf. the Germ. *Trift* and *treiben*), an uncultivated region, but one where pasturage, however scanty, may be found (Ps 65¹³ 12², J1 2²², Jer 23¹⁰; cf. J1 1¹⁰⁻²⁰, Jer 9¹⁰); usually without a settled population (Nu 14³³, Dt 32¹⁰, Job 38³⁸, Pr 21¹⁰, Jer 9²; the alode of pelicans Ps 10¹⁸, wild asses Job 24⁵, Jer 2²⁴, jackals Mal 1³, ostriches La 4³), although in certain districts there might be towns and cities (Jos 15⁶¹⁻⁶², Is 42¹¹) occupied by nomads. The term *midbār* is usually applied to the Wilderness of the Wanderings (Gn 14⁶, Nu 14¹⁶⁻²⁰⁻²³ et al.), or the great Arabian desert (Jg 11³² et al.), but may refer also to any other (Ca 3⁸). In the Wilderness of the Wanderings the following special tracts are distinguished: the Wilderness of SHUR, Ex 15²²; SIN, Ex 16¹ 17¹, Nu 33¹¹⁻¹²; SINAI, Ex 19¹⁻², Lv 7³⁸, Nu 1¹⁻¹⁹ 34¹⁴ 9¹⁻⁵ 10¹² 26⁶⁴ 33¹⁵⁻¹⁶; PARAN, Gn 21²¹, Nu 10¹² 12¹⁶ 13²⁻²⁶, 1 S 25¹; ZIN, Nu 13²¹ 20¹ 27¹⁴ 33²⁶ 34³, Dt 32⁵¹, Jos 15¹; KADESH, Ps 29⁶; ETHAM, Nu 33⁸. In W. Palestine there are: the Wilderness of JUDAH, Jg 1⁶, Ps 63¹⁰⁻¹¹ (cf. Jos 15⁶¹); MAON, 1 S 23²⁴⁻²⁶; ZIPH, 1 S 23¹⁴⁻¹⁵ 26²; BEER-SHEBA, Gn 21¹⁴; EN-GEDI, 1 S 24¹ 2²; TEKOA, 2 Ch 20²⁰; JERUEL, 2 Ch 20¹⁶; GIBEON, 2 S 2²⁴. In E. Palestine: the Wilderness of MOAB, Dt 2⁸; EDOM, 2 K 3⁸; KEDEMOTH, Dt 2²⁸.

Midbār is used figuratively in Hos 2⁸ ('lest I

make her [Israel] as a wilderness' || 'a dry land' זיה ארץ צרה, and Jer 21 ('Have I [Jahweh] been a wilderness to Israel?').

2. אֲרָבָה *‘arabāh* (prob. from a root meaning to be arid; LXX often ἔρημος, but also such renderings as ἀγρός, ἔλος, γῆ ὑπόχωσα) stands for a tract of country whose soil is bare, desolate, unfertile. Its nearest equivalent is ‘steppe’ or ‘desert-plain.’ Apart from its application to the ‘Arabah, the great depression which includes the Jordan Valley, and extends southwards to the Gulf of ‘Akabah (see art. ARABAH, and PLAIN in vol. iii. p. 893b), the term *‘arabāh* is applied to steppes in general. Its renderings in EV are as follows: Job 24^s (|| כִּבְרֵי || בְּלֶמֶךְ || ‘salt land’), AV and RV ‘wilderness;’ Is 33^s, Jer 51^{ss} (in latter || אֶרֶץ צִיָּה || AV ‘wilderness,’ RV ‘desert;’ Am 6¹⁴ AV ‘wilderness,’ RV ‘Arabah;’ Is 35^s (|| כִּבְרֵי || אֶרֶץ || 40^s 41¹⁹ (in both || כִּבְרֵי || 51^s (|| כִּבְרֵי, וְהָרָה, Jer 2^s (|| כִּבְרֵי || 17^s (|| אֶרֶץ סִלְמָה || כִּבְרֵי || 17^s (|| אֶרֶץ צִיָּה || AV and RV ‘desert.’ In the plur. *‘arabōth* the word is used of the ‘plains’ (AV and RV; better ‘steppes’ or ‘desert-plains’) of Moab (Nu 22¹ 26³. ^{ss} 31¹³ 33^{ss}. ^{ss} 35¹³ 36¹³, Dt 34¹) and of Jericho (Jos 4¹³ 5¹⁰, 2 K 25^s [Jer 39^s 52^s]). See art. PLAIN, *l.c.*

3. **קָדָה** (in plur. **קָדָהִים**), from a root meaning *to be waste or desolate*, is 3 times tr^d 'desert(s)' in AV: Ps 102⁶ (|| **קָדָה**); LXX **ἀκατέδωτος**; RV 'waste places'. Is 48²¹ (so also RV; LXX **ἐρημος**), Ezk 13⁴ (RV 'waste places'; LXX **ἐρημοί**). Elsewhere EV offers such renderings as 'waste(s)', 'desolation(s)', 'waste places', 'desolate places': Lv 26³¹, 33, Ezr 9⁹, Is 57¹⁴, 44²⁶, 49¹⁰, 51³, 52⁸, 58¹², 61⁴, 64¹⁰, Jer 7²⁴, 22⁵, 25¹¹, 18 27¹⁷, 44², 6, 22 49¹³, Ezk 5¹⁴, 25¹³, 26³⁰, 29¹⁰, 30 33³⁴, 37 33³⁴, 36⁴, 10, 33 38⁹, Dn 9², Mal 1⁴, Ps 96 109¹⁰, Job 31⁴. The proper application of this Heb. term is to cities or districts *once inhabited, but now lying waste* (cf. the use of **קָדָה** 'devastation' and its cognates in Is 1⁷, 5⁶, 61¹, Jer 42¹⁸, Ezk 35⁷), although it is once (Is 48²¹) used of the Wilderness of the Wanderings. Its nearest Eng. equivalents are 'waste(s)' and 'ruin(s)'.

4. יָדָסָן. — See JESHIMON. 5. צִיָּה *zyyāh* is twice tr^d 'wilderness' in AV: Job 30⁸ (RV 'dry ground': LXX ἀρούρος), Ps 78¹⁷ (RV 'desert,' RvM 'a dry land'; LXX ἀρούρος; here used of the Wilderness of the Wanderings). Its proper meaning is 'dry ground' (cf. אֶרֶץ-צִיָּה of Ps 63¹ ⁽¹⁾, צִיָּה of Is 25² 32², and צִיָּה [AV ' parched ground,' RV 'glowing sand,' RvM 'mirage'] of Is 35⁷). In Is 13³ 34¹⁴, Jer 50³⁹, Ps 74¹⁴, צִיָּה is used of wild beasts of the desert; in Is 23¹³ [unless we emend, with Ols., to צִיָּה, or take the word, with Marti, to mean 'seamen'] and Ps 72⁹ [but prob. read, with Ols., Duhm, et al., צִיָּה] of human inhabitants of these arid tracts.

6. **הָרָא** *tōhā* occurs in the collocation **הָרָא** **לְבַיְתָּא** **לְבַיְתָּא** **לְבַיְתָּא** (LXX *en diŋei kaúματος, en γῆ ἀνιδρω*), lit. 'in the waste of the howling of a desert' = 'in the howling (adj.) waste of a desert' [on the construction see Driver, *ad loc.*], Dt 32¹⁰, where it refers to the Wilderness of the Wanderings. It is tr^d 'wilderness' by AV and RV in Job 12²⁴, and by AV (RV 'waste') in Ps 107⁴⁰ (LXX *en ἀβάρω*). The special sense of this word is that of a wild desolate expanse (Job 6¹⁸ 'they [the caravans] go up into the waste and perish'). It is the term applied to the chaotic confusion that preceded the creation (Gn 1²; cf. Jer 4²³, where the prophet beholds the earth returned to the primeval *tōhā wābōhā*; and contrast Is 45¹⁸ 'He created it not a waste' [but perhaps here the word = 'in vain,' RVml]).

7. The NT terms are *ἐρημία* and *ἐρημος* (the latter used either as adj. with *ὅπου* or the like, or alone, in the fem., with *χωρά* understood). As a rule AV tr. the substantives by 'wilderness' and the adjective by 'desert.' RV changes 'desert' of AV into 'wilderness' in Mt 24²⁶ and Jn 6³¹ as tr. of *ἐρημος*.

Conversely, it changes 'wilderness' of Lk 5¹⁶ 8³ into 'deserts' as tr. of *al ἔρημος*, and into 'a desert place' in Mt 15³³ and Mk 8⁴ as tr. of *ἐρημία*. It also reads 'a desert place' for 'a solitary place' in Mk 1¹⁵ as tr. of *ἐρημος τόπος*.

The wilderness of JUDÆA witnessed the commencement of John the Baptist's ministry (Mt 3¹ ||). An unnamed wilderness, probably the *Quarantania* of tradition, was the scene of our Lord's temptation (Mt 4¹ ||). The words of Ac 8²⁵ 'Arise and go toward the south unto the way that goeth down from Jerusalem unto Gaza: *the same is desert*' (ἀρτή ἐστὶ ἐρημος), have occasioned a good deal of difficulty. If ἀρτή could be taken as referring to δδ3ς, the statement might be justified, for the road that is probably in view actually passes through the desert (so Robinson, *BRP*¹ ii. 514). But it is more natural to refer ἀρτή to Gaza, and this city was, in Philip's time, quite a flourishing one. G. A. Smith (*HGHL* 187) seeks to evade this difficulty by supposing the allusion to be to Old Gaza, by which the road ran, and to which the title ἐρημος may have clung, even if it were not actually deserted. Upon the whole, however, it appears preferable to regard the words 'the same is desert' as a late marginal gloss which has found its way into the text.

On Oriental superstitions about the wilderness as the haunt of demons see art. DEMON, vol. i. p. 590.

J. A. SELBIE.

WILDERNESS OF JUDÆA. — See JUDÆA (WILDERNESS OF).

WILDERNESS OF THE WANDERINGS. — See
EXODUS AND JOURNEY TO CANAAN.

WILL, WOULD.—1. These Eng. words are often used in AV with a significance that is hidden from the reader who does not consult the Heb. or Greek. RV has done much, esp. in the NT, to show their force, but much has yet to be done.

Will was originally an independent verb (Anglo-Sax. *wilian* or *wyllan*, Middle Eng. *wilten*), and expressed, either transitively or intrans., a wish or resolve, as Bacon, *Essays*, p. 77, 'It is common with Princes (saith Tacitus) to will contradictories'; p. 40, 'In evill, the best condition is not to will; the second, not to can.' As an indep. verb 'will' was often followed by an infin., with or without a direct object. Thus Bacon, *Essays*, p. 255, 'The French king willed his Chauncellor or other minister to repeate and say over Fraunce as many times as the other had recited the severall dominions'; Knox, *Hist.* p. 317, 'Thinke not (said hee), Madame, that wrong was done unto you, when you are willed to be subject unto God.'

But as the Eng. verb lost its inflexions, certain verbs, themselves originally independent, were used to form its tenses, etc. One of these was *will*, though in this case it was rather to supply a defect than to replace a lost inflexion, there being no future inflexion in the Eng. verb. * 'Will' did not cease to be an indep. verb when it became an auxiliary; it was used sometimes in the one way, sometimes in the other. And as Elizabethan writers felt at liberty to insert or omit the 'to' before an infin. as they pleased,† it has now become

* 'Shall' was used as the auxiliary of the future before 'will', and, as Earle says (*Philology*, 1304), 'shall has saved all the area it occupies out of the domain of shall'. The *Introd.*, *The Study of English* (Murray, 1894), Earle points out that 'will as an auxiliary' is hardly to be found in Saxon times, it is even strange to Wyclif in the 14th cent., it is not firmly established in the Bible of 1539. It is encroaching upon *shall* and driving it back, but its limits are not yet determined. And the aggressiveness of *will*, which has long ceased in the central places of the language, is still moving at the extremities, like the flapping of the waves on the shore after the subsiding of a storm at sea.

very difficult to distinguish 'will' as an auxiliary expressing the future tense, from 'will' as an indep. verb followed by an infin. without 'to.' Cf. Mt 10²⁶ 'There is nothing covered that shall not be revealed,' with 11²⁷ 'Neither knoweth any man the Father save the Son, and he to whomsoever the Son will reveal him.' The former is a simple future (ὁ οὐκ ἀποκαλύψεται, Vulg. *quod non revelabitur*), the other is the verb *to will* with an infin. of the following verb, the 'to' being omitted (ὃ ἐὰν βούληται ὁ υἱὸς ἀποκαλύψαι, Vulg. *cui voluerit filius revelare*, Rhem. 'to whom it shal please the Sonne to reveale,' RV 'to whomsoever the Son willeth to reveal him').

The attempt has sometimes been made to distinguish the indep. verb 'to will' from the auxil. verb 'will' by their inflexions, 'to will' when indep. being often inflected *will, wilt, willeth or wills*; past *willed*; and the aux. *will, wilt, will, past would*. But this distinction cannot be maintained, the indep. verb being often inflected as the auxiliary. Thus Jg 1¹⁴ 'What wilt thou?' (אִךְ-כִּי, RV 'What wouldest thou?'); Mt 13²³ 'wilt thou then that we go and gather them up?' (θέλεις οὐ, RV as AV); Jn 1⁴³ 'Jesus would go forth into Galilee' (ἠθέλησεν ἐξελθεῖν; Vulg. *voluit exire*, RV 'was minded to go forth'); so *Article*, x. (1553) 'Those that have no will to good things, He maketh them to will, and those that would evil things, He maketh them not to will the same'; *Piers Plouman*, vi. 213—

'And now wolde I witen [= 'know,' inf.] of the what were the best.'

The earlier versions are often a guide to the use of 'will,' 'would,' in AV. But it is often necessary to consult the Heb. or Greek, when it may be considered probable that at least when representing an original indep. verb 'will' and 'would' are themselves independent. The verbs most frequently represented are in OT *ābah*, and in NT *θέλω* and *βούλομαι*, * all meaning to will, purpose, desire. Clapperton (*Pitfalls in Bible English*, p. 90) gives the foll. list of passages which demand special attention: Mt 11²⁷ 15²³ 16²⁴, Mk 6¹⁹, 22, Lk 11²¹, Jn 1⁴³ 5⁴⁰ 7¹⁷, Col 1²⁷, 1 Ti 5¹¹, Tit 3⁸.

2. Occasionally the following verb is omitted after 'will' and 'would,' as Ps 81¹¹ 'Israel would none of me'; Pr 1²⁵ 'Ye . . . would none of my reproof'; 1³⁰ 'They would none of my counsel'; Sir 13^{howling} 'Like will to like.' So Jn 19^{howd}. Rhem. 'Professing that themselves will no king but Caesar, he yeldeth unto them.' Especially is this so with verbs of motion, as Tindale, *Works*, i. 147, 'The wind bloweth where it listeth, and thou hearest his voice, and wottest not whence he cometh, nor whither he will'; Tindale, *Expos.* 23, 'Whosoever will to heaven, must buy it of them'; Ezk 28²³ Cov. 'Beholde o Sidon, I wil upon the, and get me honour in the.'

3. There are passages in AV in which 'will' would now be considered redundant, as Gn 32¹¹ 'I fear him, lest he will come, and smite me' (RV 'lest he come'); Lv 2¹ 'When any will offer a

omitting where we should now insert, and sometimes inserting where we should omit. Cf. *Othello*, ii. iii. 180, 'You were wont be civil,' with iv. ii. 12, 'I durst, my Lord, to wager she is honest.' The omission is found also in Milton, *Sonnet to Mr. Lawrence*—

'Where shall we sometimes meet, and by the fire
Help waste a sullen day?'

And Guest quotes two consecutive lines from the *Mirror for Magistrates*, one of which omits, the other inserts this 'to'—

'And though we owe [= ought] the fall of Troy requite,
Yet let revenge thereof from gods to light.'

* For the distinction between *θέλω* and *βούλομαι* consult Elliott on 1 Ti 5¹⁴, Lightfoot on Philm 1³, Mayor on Ja 3⁴, Sanday-Headlam on Ro 7¹⁸, and esp. 'the full and excellent note' [Sanday-Headlam] in Thayer, *N.T. Lex. s.v. θέλω*.

meat offering unto the Lord' (RV 'when any one offereth'); Mt 9³⁸ 'Pray ye therefore the Lord of the harvest, that he will send forth labourers into his harvest' (RV 'that he send'); Mk 3²⁷ 'No man can enter into a strong man's house, and spoil his goods, except he will first bind the strong man' (RV 'except he first bind').

J. HASTINGS.

WILL.—In this art. the consideration of the teaching of the Bible regarding both the Divine and the human Will is to be included. These may seem at first sight to be subjects of very different kinds; nevertheless, an adequate treatment of either must clearly be impossible if the other is not taken into account. The light of revelation falls upon both the human and the Divine will in the sphere of their relations to one another. We derive our idea of the Divine will in Scripture chiefly, if not entirely, from what we are told of God's mind towards and purpose for man, which have led and lead to action on His part, whereby the action of the human will must necessarily be conditioned. And, further, Scripture is no exception to the rule that the ideas which men can frame or receive about God are affected by their knowledge of themselves. The conceptions commonly formed of the mind and soul of man have ever been transferred to the Divine nature, with more or with less qualification and extension; and this has especially been the case in the absence of philosophical thought, and particularly so in primitive times.

i. *Biblical terms for the act of willing.*—The psychological and metaphysical, and to some extent also the theological, ideas of early ages, and of the majority of men at all times, are to be studied in language. It is, then, first to be observed that there is no word either in OT or NT for the will, as a faculty; and even the act of willing is not contemplated in an abstract manner. As a point of some psychological interest we may also note, that of the two Heb. words in frequent use which seem to describe an act of the will most purely as such (אָמַן in Pi. and אָמַר, one has a negative signification, and the other is almost invariably joined with a negative. (The exceptions are Is 1¹⁹, Job 39⁹). It is in the absence of apparent reason, and in the resistance offered to a pressure from without, that the power of will is most barely presented, and therefore most readily apprehended. We may compare our term 'willfulness.' The latter of the two Heb. words just named is often used of the wrongful assertion of the human will in opposition to the Divine will (e.g. Ps 81¹³ (11), Pr 1³⁰). See also, as regards the former word, Ex 7¹⁴. The notion of an exertion of the will, not for resistance but for the achievement of something, appears to be most distinctly conveyed by אָמַן, in Hiph., but it is not so common as either of the words above mentioned. Lit. it means to *set oneself, determine, undertake, to do something*; a sense which we can trace in the LXX rendering ἀρχεσθαι.

We need also to consider the whole group of words signifying to *desire* (אָמַן, in Pi. and Hithp., and אָמַר), to *take pleasure in* (אָמַר), to *favour* (אָמַר), and אָמַר, to *love* (אָמַר), to *choose* (אָמַר). Where there has as yet been little or no psychological reflexion, such words may, and commonly do, involve the notion of willing. The mind has not become accustomed to distinguish between the motive—whether this consists in some purpose which commands itself to the reason, or a physical want, or external attraction acting upon the senses—and its adoption by the will; nor, again, between the act of the will and the feeling which accompanies its exercise. This is eminently true of the language of OT. In the case of men, indeed,

there is the beginning of a distinction in the prominence given to the phenomena of temptation, but it is not followed out philosophically; while in regard to God, who can effect what He pleases, the distinction naturally does not suggest itself in the same way.

The fact, however, which is perhaps of most significance for us is that all words of this class, without material exception, even those which have the most decidedly physical associations, or which are used frequently in a bad sense, are applied to God no less than to men in the Hebrew OT. Thus *פָּרַץ* to cleave in love to (used of sexual passion, Gn 34⁸), though also more generally for what the mind desires (1 K 9¹⁹), is used of God's love to Israel (Dt 7¹⁰¹⁶), and also of man's love to God (Ps 91¹⁴); while *רָצָה* to covet (Ex 20¹⁷, and Mic 2²) describes God's feeling for Zion, Ps 68¹⁷⁽¹⁶⁾. It is used also of a spiritual desire in man, Ps 19¹⁰⁽¹¹⁾. Some words, such as *נָסַח* to favour, and its subst. *נִסְחָה* favour, grace, *חָרַץ* and *חָרָץ*, with much the same meaning, and *חָרַץ* to choose, have, esp. through their Greek representatives, come to be more particularly connected in our minds with the mysteries of saving grace; but their early history was not dissimilar to the rest, i.e. their transference to God was at first somewhat crudely anthropomorphic. The instance of *אָהַב* to love, to which further reference will be made, should especially bring this home to us.

In the LXX several of these Heb. words are most commonly rendered by *βούλεσθαι*, *θέλειν*, and *εὐδοκεῖν*, which more simply express the act of willing:—all three are used for *פָּרַץ* and *רָצָה*, *οὐ βούλεσθαι* and *οὐ θέλειν* for *פָּרַץ*, *θέλειν* and *εὐδοκεῖν* for *פָּרַץ*; for *חָרַץ*, *θέλειν*, and also *ἐπιθυμεῖν*; for *רָצָה*, *βούλεσθαι*, *εὐδοκεῖν*, and *ἐπιθυμεῖν*. A feeling is, however, manifested in the LXX that some difference of language is advisable in speaking of God; *ἐπιθυμεῖν* is avoided in connexion with Him. *פָּרַץ* also, in the case both of God's love for men and men's love for God, is translated not by *φιλεῖν* but by *ἀγαπᾶν*, though it is to be added that this is, on the whole, the commoner rendering of the word in all contexts, and that *φιλεῖν* is used for the love of wisdom (Pr 8¹⁷ 29³, Wis 8²).

The non-classical word *θέλημα* is many times used both for *פָּרַץ* and *רָצָה*, and for the latter sometimes also *εὐδοκία*.

The usage of NT is based upon, and in the main conforms to, that of LXX. In regard to *θέλημα*, in particular, we may observe that alike in LXX and NT it frequently denotes an individual wish or desire, and hence is used in pl. (Ps 102 (103) 7²¹, Ac 13², Eph 2⁹). But it may also describe such a permanent inclination as shows the bent of the character (Sir 32¹⁷, cf. *θέλησις* in 2 Ch 15¹⁵, and *βούλημα* in 1 P 4⁸). Other noteworthy uses are to be found in Jn 1¹², 2 P 1²¹. In Rev 4¹ the created universe is said to proceed from an act of the Divine will, for in accordance with biblical usage we must understand *θέλημα* to denote an act here rather than a faculty.

ii. *The human will*.—In considering the conception of the human will and its present condition, as well as of the Divine will, to be derived from the Bible, grave subjects which have been treated in other articles (FALL, GRACE, PRE-DESTINATION, and ELECTION) come before us again; but they are to be regarded here, as it were, on their psychological, moral, and metaphysical side, and such a view of them may assist us in rightly apprehending them. At the same time, we may expect that some light will be thrown by the study in which we are engaged on questions which have been debated in the philosophical schools. It is true that little, if any, trace is to

be found in any part of the Bible of direct speculation on the nature and prerogatives either of the human or the Divine will. Nevertheless, through the vivid presentation in Scripture of moral and spiritual truth in its practical bearing on man, important elements in the problems relating both to the will in man and to God's will are brought into relief, and this may contribute to the right solution of those problems.

1. The proposition that the will is free is commonly understood, alike by those who assert and those who deny it, to mean that man has, at least within certain limits, the power of self-determination, of yielding to or resisting motives,—those which arise within him as well as those which plainly have their origin without him,—and of modifying his own character in some degree. The notion of moral freedom, however, which meets us in Scripture is something different from this. It appears there simply as the opposite of the bondage of sin. From this point of view, 'to be free' is to have the power of acting according to one's true nature as God designed it; and those whom we cannot imagine to be any longer capable of doing wrong, like the perfected saints, because no tendency to evil remains in them and they are thoroughly established in holiness, would yet in this sense be free, indeed the only true freemen (Jn 8³²⁻³⁵, Ro 6¹⁷⁻²² 8¹³⁻²¹; cf. also Ja 1²⁵ 2¹²). There is evidently profound truth in this conception: such must be the freedom of God Himself.

2. Nevertheless, Christian theologians of all schools have ever deduced from Scripture that man, originally at least, possessed free will in the common sense of the term, whether they admit that he still retains it to any extent or not. And, indeed, even apart from what is implied in the narrative of the Fall and all subsequent express statements (e.g. Ec 7²⁹, Ro 1²¹⁻²³), this alone is compatible with the Scripture doctrine of God as at once the all-powerful and all-wise and the perfectly good Creator. Man's fallen condition must be due to his own fault. For some good reason God suffered man to be tempted, but He intended that the temptation should be, as it might have been, withstood. Sufficient light had been granted to man to enable him to discern the true good, and power to choose it; yet he chose evil.

It is worthy of note that even those who have been most ready to silence criticism of the morality of the action which is attributed to God in theories of the method and scope of redemption, by alleging that these are matter of Divine revelation, and by declaring that God's ways are not to be submitted to a human tribunal, have yet themselves asserted, and sought to convince men of, the justice of man's punishment on the ground that in Adam he brought it upon himself.

But we must go a step further. The attempt to satisfy the sense of human justice, significant as it is when made in the quarters just indicated, must break down so long as it is supposed that men lost their moral freedom *totally* by the first fall, and therewith all hope of salvation except in so far as they should be visited by irresistible grace, which to some, and even the majority of the race, would never come at all. The Bible, we are bold to affirm, does not support such a position. It is true that it speaks of man as enslaved by sin, as unable to accomplish his own deliverance, as dependent upon God at every step for salvation, and even for the first motions towards good (Eph 2¹⁻⁵, Ro 3², Tit 3⁴⁻⁶, Jn 6⁴⁴⁻⁴⁵). But the strongest statements to this effect, even if they stood alone, could not fairly be made to mean that nothing depends on the consent, or resistance, of man's own will to the work of God in and upon him. And by the sacred

writers who insist most emphatically on man's helplessness by himself, as well as in other parts of Scripture, it is plainly declared, or assumed, that he is responsible for being compliant (Jn 1^{9a}, 5⁶ and 6⁶, Ph 2¹³), and in more general terms for his temper of mind and conduct, and that he will be punished or rewarded on ordinary principles of justice (Ro 2¹⁻¹⁶, 3¹⁰⁻²¹, Jn 7¹⁷); in short, that each man born into the world is put to a probation still, however the conditions of his trial may be affected by the failures and successes of all who have gone before. So that the tragic interest and solemnity of the story of Adam's fall lies not only in the thought of what was lost for the human race from the beginning of its history, but also in its being the type of a conflict between good and evil which is perpetually renewed in the soul of every man.

It is less than the truth to say, as many do, that the recognition accorded in Scripture to the principle of man's moral freedom on the one hand, and its doctrine of grace on the other, present an insoluble antinomy, and that those who accept the authority of the Bible must accept both, though with a sense that they cannot be reconciled. This is certainly a wiser attitude than that of those who virtually deny the one in the interests of the other. It must, however, be admitted on reflexion that the sacred writers themselves do not seem to be conscious of any contradiction; and we cannot but infer that if to us there seems to be one it is largely of our own making, through the effect upon our minds of later controversies and the traditions they have left. The real difficulties in connexion with the conception of the freedom of the will are not, in point of fact, raised through the endeavour to combine in one view those moral and spiritual truths regarding Divine grace and human responsibility to which the Bible bears testimony, nor could they naturally have been indicated there. We gather from its teaching that the Spirit of God is the source of all moral and spiritual good, that Divine grace must be present with and must precede all rightful action of the human will, that this grace is bestowed in some measure upon all, and always with the design of leading on to salvation; but that it rests with man to respond to the Divine love, to yield to the Divine promptings.

Confusion and error have probably been introduced into the subjects disputed by Augustinians, Calvinists, and Pelagians, more through the too narrow notion of Divine grace in which all alike shared—as though it were to be traced only in definite Christian faith and its special fruits, and in the godly of Israel under the Old Dispensation—than from any other cause. Hence the Calvinist has been led to make a distinction between an 'effectual' grace granted in certain cases, and an operation of God's Spirit in other cases which has no saving purpose, and to regard the signs of moral and spiritual life in a multitude of instances as wholly illusory. Hence also, on the other hand, the Pelagian has supposed man to be capable of many kinds of good apart from God. Nowhere does the mistake to which reference has been made appear more clearly as the initial source of error than in the doctrine of certain schoolmen that grace was to be deserved *de congruo*, the authors of which theory evidently aimed at presenting that which they regarded as the truth in Pelagianism in the form in which it would be least open to attack. For here it was supposed that though man could not be finally saved without grace, yet by a character and a course of conduct, in shaping and inspiring which grace had had no part, he could win it. The different opinions here referred to are unscriptural, baseless, and profoundly irreligious. In contrast with all alike we would place

the belief—justified, as we contend, by particular declarations of Scripture, and still more by a comprehensive view of the Divine training of man, which finds its clearest interpretation in the Bible—that no human spirit is left destitute of the life-giving visitations of the Divine Spirit, and that, rudimentary as that moral and spiritual life may be which at first He has sought or seeks to create and to foster, e.g. in the savage or in many even of those who live in Christian lands, no bounds can be set to the growth which may, and which He intends should, result in this world or another, wherever the human will is consentient. This is consistent with our ideas of justice, while at the same time it recognizes man's absolute dependence always upon God's grace, and can afford man no ground for claiming merit in the sight of God; for there can be no merit in his allowing himself to be saved, though he may justly expose himself to blame and loss if he frustrates God's merciful design. Further, it does not lower the supernatural to the level of the natural, though it treats that which is often called mere natural goodness as itself the outflow of a supernatural life, and as one of the lower stages, it may be, in an ascent to the highest saintliness.

3. To the extent, then, at least of giving or withholding that response to the leading of the Divine Spirit of which we have spoken, man is, according to the teaching of Scripture, free. It will, however, be said on behalf of Necessitarianism by adherents of the so-called Experience Philosophy, or Naturalism, that this response itself, and with it every feeling, thought, purpose, so far as they are not determined by causes now external to the individual, are the result of character, which has been itself completely determined and could be fully accounted for, and its products also predicted, if we knew fully the human being's parentage and life-history, as well as his present circumstances, and if the whole combination were not too complex for us to deal with by the aid of any science which we possess or are likely to possess. The force of this reasoning—and it cannot be denied that it has force—lies in the fact that to a very large extent mental phenomena are, or may with a high degree of probability be held to be, subject to Natural Law, and that the rapid and vast extension in our conception of its domain which has in recent times taken place, predisposes us to believe that all our experience may in reality come under it. On the other side, however, it may be urged that the consciousness in man of a power of choice, of a sense of responsibility for his conduct, his conviction often that he might have done better or acted in some way otherwise than he has, and the remorse which he feels, in spite of his readiness to complain of the action of an adverse fate, the blame which he imputes to himself or to others for any lack of loyalty to truth and right, of firmness and of courage, are facts which cannot be satisfactorily explained on the principles of Naturalism. We seem here to be brought face to face with an element in the sources of human character and action which, whatever its laws may be, is not subject merely to laws analogous to those which we can trace in the physical order,—a power of self-determination, a force which within a limited—in each individual a very limited—range is truly creative, a causation which is not merely phenomenal but real. As believers in the biblical revelation, we can suppose only that the all-wise and loving Creator, without diminishing aught from the fulness of His own power, has yet, in making man a spiritual being, imparted to him a certain—by comparison infinitesimal—amount of power like His own, and left him to make an independent use of it with a

view to the discipline and training which he would thus receive, and also to the response which the creature might then render to the Creator, and which would be otherwise impossible (cf. R. Browning, *Christmas Eve and Easter Day*, § 5). On the philosophical side we derive support for this view from many of the ablest thinkers of the past 150 years, from Kant and Hegel onwards, though it is necessary that we should emphasize the separation between the human and the Divine will more decidedly than some of the transcendental school do, in order to guard against Pantheism and against falling again virtually into Necessitarianism, though one of a different kind from that before spoken of.

Before passing on, it may be well to point out to what a small extent there can be any alliance between those theologians who hold that man altogether lost freedom of the will by the Fall, and philosophical Necessitarians of any school. The latter build upon their conception of what has ever been the constitution of man, of nature, and of the universe; whereas the theologians to whom we have referred regard, and must regard, man as, according to his original and true constitution, free. It is only in attempts to prove that man's belief in his own freedom is wholly illusory that they can make common ground; but this is the weakest part of the philosophers' case.

On the other hand, men in general, and that common-sense philosophy which has aimed only at formulating common opinion and at making it self-consistent, show far too little sense of the mystery attaching to the freedom of the will, or of the binding power of character, which, though not so fixed as to be beyond all possibility of being modified even by the action of the will itself, can, in general, only be altered slowly. But Holy Scripture, which lays so much stress on the bondage of sin, the operation of Divine grace, and the appointment of the circumstances of human lives by Divine Providence, cannot be said to ignore the limitations to human freedom. In this connexion it is important to observe that man's responsibility for the use of any freedom that he possesses is not diminished in proportion to the smallness of its amount. He is as much bound to turn to good account what he has if it be but a very little, as if its stock were practically unlimited. So at least he must be on the Scriptural view of his hopes and opportunities. The effort to strive against strongly riveted habits of evil might not seem worth while on the supposition that the time for seeking to undo them was very brief, and that he was left solely to what he could accomplish for himself and to human assistance; but it is otherwise if the influences of the Divine Spirit are at his disposal, and there is a prospect of infinite time in which a change in his nature may be effected. Thus it is that the Bible can give such prominence to the necessities affecting our human condition, and yet inspire and stimulate human endeavour to the utmost.

iii. *The Divine will.*—The created universe is said to proceed from an act of God's will (Rev 4¹, and cf. Sir 43¹⁰; this is, of course, also implied in the language used in Gn 1²⁻⁶ etc., Ps 33⁹ etc.; as regards the creation of man see Ja 1¹⁸). His will furnishes the true end and rule for human action. Very broadly, Jn 7¹⁷, Ro 12², Col 4¹², and in the Lord's Prayer, Mt 6¹⁰; with a more special reference, 1 Th 4³. The Law of the Old Dispensation is not anywhere directly called 'the will' of God, but that it is a principal expression of God's will is plainly suggested in Ro 2¹⁷⁻²⁰. With this passage Jn 8³¹ may be compared, both being put into the mouth of Jews. 'The will of God' is also used specifically of God's purpose of redemption through Christ,

as by our Lord Himself in speaking of His mission, Jn 4³⁴ etc., and also in Ac 22¹⁴, Eph 1⁶. St. Paul and others look for indications of God's will to direct their missionary course (*θηλημα* without art. in 1 Co 16¹² may probably mean God's will, cf. RVm). It is to be recognized in the ordering of events and the variety of human lots (1 P 3⁷).

This last point brings us to the manifestation of God's will in the choice of some for special destinies or for temporal, moral, and spiritual advantages—a subject which, on account both of its peculiar difficulty and its connexion with that of human responsibility, needs particular consideration. We have seen that words used in the case of men to describe preferences of a kind for which we do not ordinarily seek to discover rational motives, and which we are content to treat as matters of individual idiosyncrasy, are applied to God, especially in OT. Such language may serve to teach in a simple way the lesson of the *absoluteness* of the Divine will. It may impress upon our minds the practical truth that when God wills this or that, man's duty lies in submission and obedience, or in humble thankfulness for His unmerited favour, on the part of those whom He exalts and blesses. But it must not be assumed that, when no motive is assigned for God's action, therefore it has not a moral and rational motive. It has to be remembered that if words descriptive of simple desire and attraction and the mere exercise of will are applied to God, so also are those which imply planning and taking counsel with oneself (Is 19¹⁷, Jer 51²⁹, 2 Ch 25¹⁶, Ps 33¹¹, Job 12¹³ etc.). There are, besides, passages in which we are expressly told what the Lord delights in (1 S 15²², Jer 9²⁴, Is 1¹¹ 65¹² 66⁴, Pr 11²⁰ 12²² 15⁸, Ec 5⁴). Indeed all those many declarations in OT, that purity and righteousness of heart and life are required in those who would please God, are here in point; and it is to the principle thus laid down that the elevating effect of the religion of Israel was largely due.

The chief objects, however, of God's favour mentioned in OT are the Israelite nation and David with his royal house. And, in the case of the former at least, it may be said, the freedom of God's election is insisted on. But the language used can scarcely form a basis for a formal doctrine on this subject, and certainly not for a view of it which conveys the notion of arbitrariness. Later generations of Israelites were indeed taught that God's goodness to them was not due to any merit of theirs. But other reasons for it are given: it was part of the purpose which He had been pursuing from the days of their fathers, men of very different worth from themselves, and which He, in whom constancy is so notable a characteristic, could not abandon, and it was connected also with the punishment of other nations for their exceptional wickedness (Dt 9⁴⁻⁶ 8¹⁸).

Special acts of Divine favour are seen in their true place in the light of the revelation of God's character as a whole. There could be no more instructive study in the history of the progress of the knowledge of God than that which is supplied by following out the conception of the love of God in the Bible. We have already touched upon the gradual refinement of the idea as shown in the use of language. But we have to observe also that the love of God spoken of in OT is always a distinguishing love for particular individuals and a particular race. The earliest lesson to be learnt by men, and all that they were capable of understanding, was that the good which happened to themselves was the result, not of chance or fate but of God's appointment, and the proof of His merciful regard. As we pass on to the NT the image is pre-

sented by Christ Himself of the Universal Father who loves impartially all His human children. It is evident that this revelation ought to control all more partial views.

Those who at first were made the recipients of special privileges could not fully enter into the largeness of the Divine intention in their bestowal. But this became apparent when the Church of Christ became the heir of the truth communicated to Israel. The principle of special grace and vocation was not then abandoned. It is indeed written large in human experience, and in the days of the first preaching of the gospel it was manifested in a new and deeper manner than ever before. Its application to individuals took the place of that to a nation, while spiritual blessings absorbed the attention which had been largely occupied by such as were material. But God's purpose in conferring such favours, viz., that those whom He chooses and calls to receive special knowledge, or upon whom any gift is conferred, should be ministers of it to others, is plainly set forth (Gal 1¹⁶, Ro 1¹, 1 P 4¹⁰⁻¹¹, Ro 11¹⁵ 29-32).

V. H. STANTON.

WILL.—See TESTAMENT.

WILL-WORSHIP is the tr. in AV (1611 'will-worship', mod. edd. two words 'will worship,' RV restores 'will-worship') of ἐθελθρησκία in its only occurrence, Col 2². The tr. is probably suggested by the Gen. NT (1537) 'voluntarie worshipping,' where the Geneva translator seems to use the adj. 'voluntary' in the unusual sense of 'arbitrary.' The Gen. Bible (1560) has 'voluntarie religion,' and explains in the marg. 'Suche as men have chosen according to their own fantasie.'

Cran. and Rhem. have 'superstition' after Vulg. *superstitio*. Fulier adopts the word 'will-worship' in *Holy State*, p. 70, 'One Ceremony begat another, there being no bounds in will-worship, wherewith one may sooner be wearied than satisfied.' And Jer. Taylor uses 'will-worshipper,' *Rule of Conscience*, II. iii. 13, 'He that says, God is rightly worshipped by an act or ceremony concerning which himself hath no way expressed his pleasure, is superstitious or a will-worshipper.' These quotations probably explain the Gr. word aright.

J. HASTINGS.

WILLOW TREE (צִיָּטִים *zaphzāphāh*; **WILLOWS**, צִיָּטִים *arābīm* [only in pl.]).—Both these Heb. words appear to be used for the willow, although some consider the latter to be the poplar (see *Oxf. Heb. Lex.* and authorities cited s.v.). The former is the cognate of the Arab. *safsaf*, which is generic for willow. The latter is the cognate of the Arab. *gharab*, which signifies a willow, more particularly the weeping willow, *Salix Babylonica*, L. *Zaphzāphāh* occurs but once (Ezk 17⁹), in a poetical rhapsody concerning the transplanting of a cedar top, contrary to its nature, apparently to the waterside, where a plant from the seed of the land is set out as a willow, and spreads as a vine. *Arābīm* occurs in five places. In all of them the fact that willow trees grow by the watercourses is alluded to. 'Willows of the wādy' (Lv 23⁴⁰) were taken for booths during the Feast of Tabernacles. The lair of Behemoth was among the 'willows of the wādy' (Job 40²³). 'By the rivers of Babylon . . . upon the willows . . . we hanged our harps' (Ps 137²). Moab carried 'riches . . . to the wādy of the willows' (Is 15⁷ AVm 'valleys of the Arabians'). Israel is to 'spring up among the grass as willows by the watercourses' (Is 44⁴). Eight species of willow grow in the Holy Land—*Salix Safsaf*, Forsk., *S. fragilis*, L., the brittle willow, *S. alba*, L., the white willow, *S. Babylonica*, L., the weeping willow, *S. triandra*, L., *S. Caprea*, L., the Capreaean willow, *S. pedicel-*

lata, Desf., the stalked willow, and *S. nigricans*, Fres., the blackish willow (Arab. *bān*). The first four are far more abundant than the latter. One of the peaks of Jebel Mūsā, in Sinai, is called *Rās es-Safsāfeh*, from some willow trees at its base. No allusion is made in Scripture to the economic uses of the willow. Its branches are much used at the present day for basket-work. Willows are planted or grow spontaneously by all watercourses, and are characteristic trees of the landscape. The 'wādy of the willows' (Is 15⁷), LXX φάργγα *Apasas*, Vulg. *torrens salicum*, is probably a wādy at one of the boundaries of Moab, with willows by its watercourses. If it be the southern boundary, it may be the same as נָחַל הַיַּרְדֵּן 'the wādy of the 'Arabah (or of the Willow),' which was the southern border in the days of Amos (6¹⁴), about 70 years earlier. What this was is uncertain. Wādy Kerak, a part of this valley, is said by Irbī to be called *Wādy es-Safsāf* = Valley of the Willow. G. E. POST.

WIMPLES is AV tr. in Is 3²² (only) of מִנְיָקִים (RV 'shawls'). See art. DRESS, vol. i. p. 627^b, and MANTLE, vol. iii. p. 240^a. The word 'wimple' means a covering for the neck (Anglo-Sax. *winpel*, Old High Ger. *wimpat*). Skeat guesses 'a covering from the wind,' taking Anglo-Sax. *win-pel* as from 'wind' and *pell* (Lat. *pallium*) a covering.

WIND (רוּחַ *rūah*; ἀνεμος).—In Palestine the life of man and beast during the rainless summer depends upon the supply of water in the fountains for drinking, and in the brooks and streams for purposes of irrigation. This supply is in proportion to the amount of rain and snow deposited upon the mountains during the previous winter. As the rain is borne inland by the wind, the winds become of the highest importance, and are characterized by their power to produce or prevent rain. Hence the wonderfulness of water supplied independently of both wind and rain (2 K 3¹⁷), and the unnaturalness of wind and clouds that do not produce rain (Pr 25¹⁴, Jude 12).

i. **THE FOUR WINDS**.—Winds claim attention by the periodicity that rules amid continual change, as well as on account of the heat and cold, dryness and moisture, connected with them. The Bible frequently refers to the four winds (Ezk 37⁹, Dn 8⁸, Zec 2⁶, Mt 24³¹, Rev 7¹), and the diversity of specific influence gives individuality to each, and prepares the way for the figurative use of their leading characteristics.

(1) **North wind** (צָפֹן רוּחַ *rūah zāphōn*).—This is distinguished by its coldness and its power of dispersing rain. 'Fair weather (RV 'golden splendour') cometh out of the north' (Job 37²). In Job 37⁹ ('cold out of the north') the literal meaning, unless a special constellation be referred to, is *out of the scattering winds* (RVm). In Pr 25²⁵ 'The north wind driveth away (חָלַל) rain,' RV gives 'bringeth forth rain,' the testimony of the climate, however, being with the former [although the context demands the latter. Perhaps the text is corrupt; cf. Targ. *ad loc.*]. In a day of gloom and persistent rain, if one cloud can be seen moving from the north it is known that in less than an hour the clouds will break up and the sunshine will return.

(2) **South wind** (דָּרֹם רוּחַ *rūah dārōm*).—This wind, whether tempestuous (Is 21¹, Zec 9⁴) or gentle (Ac 27¹³), is always warm, dry if inclined to S.E., and moist if from S.W. Under the S. wind everything is warm to the touch, and, if it prevails for a day or two, all living things become silent under its oppressive heat (Job 37¹⁷). In Lk 12²⁸ it is referred to as a sure sign of heat.

(3) **East wind** (קִידִם רוּחַ *rūah kādim*).—This is

sometimes called a *wind from the wilderness* (Job 1¹⁹, Jer 4¹¹ 13²⁴); it is described as strong and gusty (Ex 14²¹, Job 27²¹ 38²⁴, Is 27⁸, Jer 18¹⁷), and its destructive power was felt at sea (Ps 48⁷, Ezk 27²⁰). It is referred to in Ja 1¹¹, where the expression 'with a burning heat' (σὺν τῷ καύσωνι) is correctly rendered by R^V 'with the scorching wind' (see Driver on Am 4⁹ and Hos 13¹⁵, with references). During summer a light land-breeze usually prevails from sunrise to 9 A.M., and rapidly grows hot under the increasing power of the sun.

(4) *West wind* (א: ר' *ruah yām*).—This is a moist and refreshingly cool breeze. The W. and S.W. winds are the bringers of rain (1 K 18⁴⁴, Lk 12²⁴). If blowing freshly for several days in succession, they will cause a shower to fall even during the dry summer months.

In NT various terms are used to describe the violence of the wind; e.g. 'a great wind' (ἀνεμος μέγας, Jn 6¹⁰); 'a storm of wind' (λαίλαψ ἀνέμου, Lk 8²²); 'a great storm of wind' (λαίλαψ ἀνέμου μεγάλη, Mk 4³⁷); 'a great tempest' (σεισμός μέγας, Mt 8²⁴). 'Tempest' is the translation also of χειμών (Ac 27²⁰), θύελλα (He 12¹⁵). The 'tempestuous wind' (ἀνεμος τυφωτικός, Ac 27¹⁴), called Euroclydon, RV 'Euraquilo,' is the E.N.E. gale now called *levanter*, which prevails over the eastern half of the Mediterranean. In ancient times it troubled the ships of Tarshish (Ps 48⁷) when returning deeply laden to Tyre. See EURAQUILO.

ii. FIGURATIVE SUGGESTIONS.—Wind is the symbol of (1) *vacuity and nothingness*: Job 6²⁵ 15², Pr 11²⁰, Is 41²⁰, Jer 5¹³, Hos 8⁷ 12¹.

(2) *Brevity*: Job 7⁷, Ps 78²⁰ 103¹⁶ 104⁴.

(3) *Freedom*: Pr 27¹⁶ 30⁴, Ec 1⁶, Eph 4¹⁴.

(4) *Power*: Job 21¹⁸ 27²¹, Ps 1⁴ 35⁵ 83¹³, Is 41¹⁰ 57¹³ 64⁶, Jer 49²² 36⁵¹, Ezk 13¹¹ 12¹; Dn 2³², Ja 1⁶ 3⁴.

(5) *The will of God*: Ps 18¹⁰ 15¹⁰: 104³ 148⁸.

G. M. MACKIE.

WINDOW.—See art. HOUSE, vol. ii. p. 435^b, and TEMPLE, p. 700^a.

WINE.—See art. FOOD, vol. ii. p. 33 f., and VINE, p. 868.

WINEBIBBER (Pr 23³⁰ in plu. יַיִן־בֹּכֵי; Mt 11¹⁹, Lk 7³⁴, οἰνοπότης).—The Eng. word comes from Coverdale at Pr 23³⁰; AV is the first to use it in NT. The verb 'to bib' (perhaps from Lat. *bibere*, to drink) is still in use, signifying to keep on drinking, tippie. North (*Plutarch*, 847) speaks of 'Orators that did nothing but bib all the day long'; and Drant, *Horace Sat.* vii. E iv, 'Thou thinkest by sleepe and bibbing wyne, to banishe out all woes.' The Eng. is a lit. tr. of the Heb. and Greek.

WINEFAT (i.e. Winevat).—See FAT.

WINE-PRESS.—See VINE, p. 868.

WINK.—In Ac 17³⁰ the verb to 'wink at' is used figuratively of God's longsuffering, 'The times of this ignorance God winked at' (ὤπεριδῶν, RV 'overlooked'). The same use (also of God) occurs in Wis 11²⁰, 'Thou . . . winkest at the sins of men' (παροψῇ, RV 'overlookest'); and (of parents) in Sir 30¹¹, 'Wink not at his follies' (μὴ παρίδῃς). So Golding, *Calvin's Job*, 559—'Some times God spareth the wicked and winketh at their misdeeds, and that is to their sorer damnation'; and Udall, *Erasmus' Paraph.* ii. 284, 'Suche maner of faultes of children, those that be gentil parentes doe for the most part winke at, which would not suffre greater offences.' J. HASTINGS.

WINNOW.—See AGRICULTURE, FAN, SHOVEL.

WISDOM.—1. *In the age of the Prophets.*—The Wisdom (חָכְמָה *hokhma*) of the Hebrews developed itself originally as an independent intellectual movement, side by side with the religious one, in the form of a half-poetical, half-philosophical * observation of nature. We have the earliest reminiscences of this in the Fable poetry of the OT (Jg 9⁷⁻¹⁵, 2 K 14⁹), and in the traditions which attach to the name of Solomon (1 K 5¹⁰⁻¹⁴ [Eng. 4³⁰⁻³⁴]). The comparison between the latter and the allied creations of Arabia (v. 11⁽²¹⁾), and the description of the material of Solomon's sayings (v. 12⁽²²⁾), show that we have to do here with products not of religious but of secular poetry. This Wisdom was thought of as specially naturalized in Edom (Jer 49⁷, Ob⁵).—The great prophets are upon the whole not favourable to this Wisdom, Is 5²¹ 29¹⁴, Jer 4²² 8² 9²²: they reproach 'the Wise' with conceit and immorality. In the technical language of the prophets, חָכְמָה, i.e. decision by oracle, is attributed to the priests (Jer 18¹⁸, Ezk 7²⁶); נָבִי, 'the word of Jahweh' (= נְבִי Jer. l.c.), to the prophets; נִצְחָה, the faculty of self-determination or devising of measures, to 'the Wise' (Jer. l.c.). Even before the Exile the need made itself felt of fixing the teaching of Jahweh and establishing firmly its contents. It was this that led to the composition of the Book of Deuteronomy. The fierce conflicts with false prophets which had to be waged by Jeremiah and Ezekiel (Jer 23. 29²¹, Ezk 13) tended further in the direction of limiting the influence of prophecy (Dt 18¹⁸⁻²²). The latter decayed to such an extent that in the post-exilic period its silence was painfully felt (Ps 74⁹, 1 Mac 9²⁷). Yet it proved impossible to cause this dry branch on the tree of Israel to put forth shoots afresh.

2. *Post-exilic development of the Wisdom teaching.*—The priests and 'the Wise,' unlike the prophets, found a new sphere for their activity after the Exile; the former in the re-established cultus of the temple, the latter in the carrying forward of the legal religious system which Ezra the scribe took in hand after the Return (Ezr 7⁶⁻¹⁰). Yet it was a considerable time before the effort to confine the whole intellectual life of post-exilic Judaism within the limits of rigid law succeeded. The wave which stirred the nations in consequence of the establishment of the world-empire of Alexander the Great, overflowed the Holy Land as well, and on the other hand carried Judaism far beyond the borders of that land to the interior of Asia and all the coasts of the Mediterranean. Israel came thus everywhere into contact with Greek civilization, for the Greeks were from the earliest times a race of colonists.

3. *The earliest traces of Greek influence.*—The traces of the influence of Greek Wisdom meet us for the first time in the Book of *Proverbs* (2nd cent. B.C.), which, in addition to the practical wisdom of life which it preaches (hence the name חָכְמָה applied to it in Tos. to *Baba bathra*, 14b), is acquainted also with a special artificial form of gnomic wisdom. On חֲכָמָה 'likeness,' 'parable,' attached at first to an object borrowed from the world of nature, or חֲכָמָה לְאָדָם (LXX σκοτεινός λόγος) 'hidden allusion' (Pr 1⁶; cf. חֲכָמָה, ib. and Ezk 17²), cf. Cheyne, *Job and Solomon*, London, 1887, p. 215.

Wisdom is conceived of in Pr 8²² as a separate

* Philosophy proper had no existence, and could have none, among the Hebrews. A process of thought free from presuppositions was unknown to them. G-d and Divine revelation were accepted as fixed points. Accordingly, all that was aimed at was merely to penetrate deeper into the contents of what was given and to define it more precisely. Nor is the form of the *Hokhma* that of the school speech: it is popular. Its problems are not theoretical, but concern questions dealing with the practical wisdom of life or with godliness.

Existence whom Jahweh formed as the first of His works prior to the creation of earthly things (vv. 23-26, cf. v. 22 וְאֵלֶּיךָ; see also Ps 139¹³). The *Hokhma* did not co-operate in the creating of the heavens and the earth, for, according to vv. 26-30a, Jahweh Himself made all things. Hence וְאֵלֶּיךָ of v. 30 cannot be rendered 'master workman' (RV), but, upon the analogy of נֹגֵן of Nu 11¹³ ('guardian of children'), ought to be tr^d 'foster-child' (cf. AV, Aquila ῥιθροπαιστήν, Gunkel [*Schöpfung*, 1895, p. 94] 'Hätschelkind'). The *Hokhma* poet's thought is that Jahweh, after the toils of creation (which, according even to Gn 2², rendered rest necessary), found a diversion, as it were, in this His firstborn before the world, as the child played before His eyes (Pr 8^{30b}). Wisdom is thus, in the mind of our poet, not a principle at work in the forming of the world, since she was only an onlooker at this and at the fashioning of individual objects. She has, according to Pr 8^{1b}, to do with men alone. In these she finds her delight, to them alone she turns with her call to hear instruction (נִשְׁמָר Pr 8³²). It is thus purely ethical aims to which she seeks to lead men, by whom, of course, from the Judaistic standpoint, are meant simply Israelites.

The notion of the Divine *Hokhma* as a separate Existence outside of and over against Jahweh, is, however, as un-Israelitish as possible and absolutely opposed to the monotheism of the יהוה אחד (Dt 6⁴) that had become firmly established since the time of Deuteronomy. It can be explained only as due to the influence of Greek philosophy, according to which the archetypes of things (ἀρχέτυπα ἰδέα, Plato, *Timæus*, p. 29) or the powers of the Divine essence diffused throughout the world (the *κοῦραι ἐννοαί* of the Stoics; cf. C. Wachsmuth, *Die Ansichten der Stoiker über Mantik*, etc. p. 21) are regarded as having a separate existence of their own, although in their relation to the world they are otherwise conceived of than in the Book of Proverbs.

4. *The Jewish doctrine of retribution and the struggles of faith to which it gave rise.*—In other parts of the Book of Proverbs the questions of wisdom in the ordering of the life of a Jew are discussed. Piety appears here as the successful and most advantageous course (27¹, 11¹, 20-22). Virtue is never unrewarded (31¹, 8-10, 16 10^{27a}, 16²⁰). Misfortune befalls only the ungodly (11³¹), for the pious it is only a passing chastisement (31¹¹).—The actual experiences, which were diametrically opposed to such doctrines, led to a period of struggles of faith (Farrar in *Speaker's Apoc.* vol. i., London, 1877, 'The era of difficulties,' p. 416), whose deposit we have in several of the Psalms, in Job, and in Ecclesiastes.

(a) *The Psalms.*—Ps 37 proceeds upon the idea that the good fortune of the wicked has no continuance (vv. 2, 9¹, 17, 20, 26¹, 28). In brilliant poetic language the sudden end of their prosperity is described, and this has the counter-description opposed to it of the exaltation and happiness of the godly which always comes to pass after a transient period of woe (vv. 34, 17b-19, 24¹, 33, 39¹). Since, however, this was contradicted by other experiences which told of wicked men who were prosperous down to the end of their life (Job 21⁷⁻¹⁵, 28, 29-33), the difficulty was not solved. The expedient of declaring that in such cases the punishment overtakes the children of the ungodly (Job 21¹⁹) was nothing more than a palliative, for this punishment extended, according to Ex 20³, only to the third or fourth generation; and it gave no satisfaction at all to the later prophets (cf. Jer 31^{29¹}, Ezk 18²⁻³²), who insisted upon the personal responsibility of the transgressor.—Ps 49 accordingly grappled with the problem afresh and offered the solution that death at all events brings punishment

to the wrong-doer whom continued prosperity has made defiant (v. 7). Then can none deliver him (vv. 8-11), he must leave behind him his ill-gotten wealth (vv. 12, 17-20), and he himself becomes a prey to corruption (v. 14). The godly man, on the other hand, has the sure hope that God will deliver him from death (v. 15, cf. Ps 16¹⁰), and he can enjoy his prosperity, while the wicked die away (v. 15¹⁰). But, seeing that the stroke of death falls in any case at last upon the righteous as well, neither could this solution of the problem be regarded as satisfactory.—Ps 73, in which we can still detect the scars of the fierce conflict which faith had to sustain with doubt (vv. 2-16), followed to some extent the same path, arguing that the prosperity of the ungodly is but fleeting, whereas that of the godly is at last permanent (vv. 17-24, 27). Along with this, it points to a solution which, from the Christian standpoint, indeed, would be perfectly satisfying, namely, that the happiness of the righteous is purely inward, and that this, or in other words the blessedness produced by the fellowship of the heart with God, cannot be torn from them by any suffering of an earthly kind (v. 24¹). But this solution was inadequate from the standpoint of the OT, for the latter demanded outward prosperity for the righteous by way of reward, and outward suffering for the wicked by way of punishment. Equally unsatisfactory as a full answer was the declaration that, in the case of the righteous, suffering is chastening, and, as such, an evidence of Divine love (Pr 3¹¹, He 12⁵⁻⁹), intended to warn them against going on further in sin (Job 33^{10¹}, 17-30), and, on the other hand, purifies them from stains and in this way perfects them (He 12^{10¹}). However correct and beautiful all this is, one does not see why in that case the ungodly, who surely in any case also deserve punishment, receive none. Again, from the OT point of view, the use of such a purifying of the godly could not be apprehended; for if, as frequently happened, the suffering continued till the death of the sufferer, the whole fruit of such purification was lost in Sheol, where godly and ungodly lead the same dreamy existence (Ps 49^{11, 15}, Job 31¹³⁻¹⁹, 77-10 14², Ezk 32¹⁸⁻³²). There even the righteous have no more hope (Ps 6⁵ 30⁹, Is 38^{10, 18¹}, Job 7⁹, 14¹⁰⁻¹²; cf. esp. W. Schwally, *Leben nach dem Tode nach den Vorstellungen des alten Israels*, Giessen, 1892, pp. 59-74). Nor could doubts be solved by the expedient of declaring that in the last resort all are sinners, that none is good but God alone (Job 4¹⁷⁻¹⁹ 14⁴ 15¹⁴⁻¹⁶ 25¹⁻⁶, Mk 10¹⁸), for this supplied no answer to the question why it is, under these circumstances, that the notoriously ungodly so often remain unpunished. But, above all, these attempts at solving the problem all left the main question untouched, how the circumstance is to be explained that God does not fulfil His solemn promise to reward the righteous and to punish the wicked (Dt 28), but almost consistently does the opposite. With loud complaints the godly addressed to God the bitter question why He looks so calmly on this course of things (Jer 12^{1, 2}); and a kind of despair took possession of them (Jer 20¹⁴⁻¹⁸, Job 31¹²). It appeared as if God were asleep (Ps 44²³). The prosperous transgressor asked mockingly, 'Where is now thy God?' (Ps 42^{9, 10}) and triumphantly denied the alleged principle of a Divine government of the world (Ps 10¹³ 14^{73¹¹}).

(b) *The Book of Job.*—The finest exhibition of the problem of the doctrine of retribution on all its sides and in all its depth is afforded by the poem of Job. We have here three [or four] speakers, who state their case from the standpoint of the traditional doctrine; and also in the speeches of their opponent, Job, a large space is devoted to a description of the doctrine he combats. The fundamental dogma of the old doctrine of retribution

is that all suffering is punishment inflicted by an angry God. God turns away offended from man (Job 13²⁴ 19⁷ 23⁸ 30²⁰); or turns the glance of His anger upon him (7¹⁰ 14⁶ 16⁹), meets him as an enemy (19¹⁴ 13²⁴), smites him with the stroke of His hand (13²¹ 30²¹). The storms of trial appear like the attack of an adversary (10¹⁷ 16¹⁸ 19¹⁴), or the threatened onslaught of wild beasts (10¹⁶, cf. Ps 22¹⁸ 17, Is 38¹³). Side by side with this we find the figures of the net (Job 19⁶), the prison (7¹² 13²⁷), darkness, (19^{8b}), the closed-up way (3²³ 19^{8a} *et al.*). The sufferings are described at one time as outward (9²), and again as inward (30²⁷ pains of the entrails). Finally, they carry the man off (9¹⁷ 14¹⁸⁻²⁰). This hostile attitude on the part of God awakens in the mind of the sufferer the fear of further misfortunes (Job 9³⁰ 10¹⁴ 30²³), and therefore with a feeling of despair and hopelessness (3²⁵ 9¹¹ 23⁴), so that he prays merely for a brief respite (7¹⁹ 10²⁰ 14⁹), or even for death (6⁹ 7¹⁵). — The further result of this view of the causes of suffering is that the sufferer torments himself continually with the question why he has incurred this mysterious and, to him, inexplicable anger of God (10²² 13³⁸ 23³⁷), for it appears to him as if he were continually watched by God, who seeks for occasions to punish him for possible transgressions (7²⁰ 13³⁶). — To the sufferer it is peculiarly painful that his associates, friend and foe alike, take the same view of the cause of his woes. They regard him as one thus marked out by God. His enemies with malicious joy seize the opportunity to inveigh against him (16¹⁰ 30¹⁷); his slaves and domestics refuse him obedience (19¹⁸); wife and children and friends shrink from him (19¹³ 21¹ 12⁴); all regard him as a reprobate (17⁹). Whoever should doubt this would call the Divine justice in question, charge God with unrighteousness and untruth, and thus commit the most heinous blasphemy (8³ 34⁷⁻¹²), and he would load himself with new and heavier guilt (11⁴ 15¹³ 33³⁰ 34⁶). The whole duty of the sufferer is, accordingly, by honest self-examination to discover his offence. Such must be *a priori* assumed, for otherwise there would be no suffering, i.e. no punishment, to explain (8¹); and, as no one is perfect (4¹⁷⁻¹⁹ 15¹⁴⁻¹⁶ 25⁴⁻⁵), some kind of guilt will not be difficult to discover. [It might be that the offence was trifling: in that case it was God's aim to deter the man from something worse, 33²⁷⁻³⁰]. Hence the man who denies his guilt reveals a hardened disposition, which will not confess what is certainly there all the same, and which justifies, according to the notions of the time, the heaping of all conceivable evil charges upon his head (ch. 22). — To this doctrine Job objects: in the first place, that at all events the sufferer has a right to complain; in 6⁴ that it is harsh when, instead of offering to the sufferer comfort in his affliction, people upbraid him with the sins they impose upon him (v. 14), repeat with all kinds of variations the familiar theory of the Divine punitive justice and apply this to the unfortunate being before them (12² 13² 16² 19²⁻⁵). Again, it is an easy matter on the ground of pure theory to heap all kinds of charges upon a sufferer's head, charges to which the latter can oppose the partly notorious facts of his blameless life (ch. 31). No doubt, the omnipotence of God makes rebellion on man's part against the strokes of His hand useless, but this does not prove that these sufferings are just (9²² 29⁸ 10¹⁵⁻¹⁷ 12¹⁴ 13¹⁹⁻²¹ 16⁶). Although it is not to be denied that there are terrible instances of Divine judgment upon wrong-doers (19²⁰ 13¹⁰ 16), on the other hand experience shows that good and bad alike are the victims of God's stroke (9²² 12²⁰), and that it goes well with the one and ill with the other, without any merit on the part of the one

or blame on the part of the other (21³²). It often happens even that wicked men enjoy undisturbed prosperity down to their death (12⁵ 21⁷⁻¹³ 30³³ 24¹⁸). — On the other hand, no power in the world, and no alleged doctrine of Divine Providence, however hallowed by time, can tear from the soul of an innocent sufferer the consciousness of his innocence, and compel him, in opposition to the acquitting voice of conscience, to confess himself guilty (10⁷ 13¹⁸ 16¹⁷ 23³⁰ 27³¹). Such a man is entitled to appeal to the better judgment of God Himself, which does not agree with the verdict which men think to discover in the strokes of misfortune that have fallen upon the sufferer (10⁷ 12⁴ 13⁷⁻¹¹ 22¹ 16¹⁹⁻²¹ 17³ 19²³). The very assertion that there is not a single righteous man shows how utterly untenable is the old doctrine of retribution, for in that case it is quite incomprehensible why it often happens that it is just those who are relatively least stained with guilt that are most severely punished, whereas gross offenders go free (8¹² 20¹ 13²³ 14⁴ 17). The negative result of these observations is briefly this: What hitherto it has been the custom to call the exercise of Divine justice in the fortunes of men is nothing more than the exercise of Divine omnipotence, whose resolutions are without any moral quality. These take their place, undistinguished, amongst natural occurrences, be these beneficial or destructive, and affect all men alike. In like manner, individuals are prosperous or the reverse in the affairs of their natural life, without regard to whether they are good or bad. The gifts of prosperity and the blows of adversity, in so far as by these are understood material well-being or suffering, do not depend at all on the moral character of the man, and have no relation at all to the moral nature (the righteousness) of God. Such is the result of an unprejudiced examination of things. The old doctrine of Divine retribution is completely shattered against it. Cf. Goethe's *Faust*, i. —

Fluch sei der Hoffnung! Fluch dem Glauben!
Und Fluch vor allen der Geduld!
Geister-Chor: Weh! Weh!
Du hast sie zerstört,
Die schöne Welt,
Mit mächtiger Faust;
Sie stürzt, sie zerfällt:
Ein Halbgott hat sie zerschlagen!
Wir tragen
Die Trümmern ins Nichts hinüber,
Und klagen
Über die verlorne Schöne.
Mächtiger
Der Erdensöhne,
Prächtiger
Baue sie wieder,
In deinem Busen baue sie auf!

Over against this the following positive structure is reared by one who supplemented the poem (cf. C. Siegfried, 'Job' in Haupt's *SBOT*). He insists that, while Nature, especially in her terrible catastrophes, exhibits merely the working of Almighty power whose immensity overwhelms man (ch. 26), yet in her positive operations, in the variety of her creatures and their mode of life, she reveals an admirable law and order; from which it follows that not merely brute force but also hidden wisdom interpenetrates and controls the life of nature (chs. 38-41). The depths of this wisdom are indeed beyond man's understanding (28¹⁻²⁷), but the analogy of the life of nature leads us to postulate a similar order for the moral world, although it is not in man's power to state its laws. Man has left to him the essence of all wisdom in the practical maxim of life—the fear of Jahweh and the avoiding of evil (28²⁸). The theoretical solution of the problem is thus given up in the Book of Job. Yet the standpoint of faith and of religion is maintained, as in Ec 12¹⁴. — Another solution is proposed in the Elihu speeches, but it

is opposed to the whole tendency of the poem. These speeches trace the sufferings of the righteous to an aim on God's part to purify them morally, and to keep them from sin (33^{17f.} 37-39 36). The object of suffering, that is to say, is here a paedagogic one.

(c) *Ecclesiastes*.—A complete breach with the position of Jewish orthodoxy was reached in the 'Grundschrift' of this book (Q¹; cf. C. Siegfried in Nowack's *Hdkom. z. AT*, 'Prediger und Hoheslied,' Göttingen, 1898), embracing the following passages: 1³-21³, 14b-24a 31-10, 12, 15f. 18-21 41-4, 6-8, 13-16 59¹, 12-16 61-7 71b-4, 12, 26-28 89¹, 14, 10f. 92¹, 2f. 10³-7 (cf. *l.c.* p. 6ff.). We find here a pessimist philosophy radically divorced from Judaism and influenced mainly by Stoicism (cf. *l.c.* pp. 6-10). The book was glossed by an Epicurean Sadducee (Q²), to whom belong 32² 51⁷-19 71¹, 16 81⁶ 94¹, 7-10, 12 101⁹ 117-8a. 9a, 10 121b-7a (*l.c.* p. 10 f.); further, by a *hakkām* (Q³), who defends Wisdom against its disparagement by Q¹, and to whom are attributed 21², 12a 4³ 6³, 9a 711¹, 29 81 91³-18 101-3, 12-15 (*l.c.* p. 11); and, most notably, by a Jewish *hāsīd* (Q⁴; *l.c.* p. 11 f.), who corrected the anti-Jewish views of Q¹. To his hand we owe the passages: 22^{4b}-26a 31¹, 15f. 17 41⁷-51, 3-5, 8b, 1. 81¹⁰-21 71¹, 17, 23-25, 29 82-8, 11-13 91 11⁵, 8b, 9b 121a, 7b. On the other hand, scattered interpolations (Q⁵; *l.c.* p. 12), in the spirit of the old gnostic Wisdom, contain exhortations to a prudent conduct of life: 4⁹-12 52¹, 6a, 6, 11 71a, 5, 6a, 7-10, 18, 20-22 91¹ 10¹, 8-11, 16-18 111-4, 6. A redactor (R¹) put together 1²-12⁷, and supplied this whole with the closing formula 12⁸. Then came particular additions: first epilogue 12^{9a}, which informs the reader as to the personality of Qoheleth and removes the mask of king Solomon; second epilogue 121¹², which assumes an opposite attitude, one opposed to this Wisdom literature; and 121^{12a}, the work of a final redactor (R²), who from the Pharisaic standpoint alludes to a final future judgment, a doctrine with which Q⁴ (31⁷ 11^{9b}) is not yet acquainted (*l.c.* p. 12).

In the genuine parts of the poem the theme 'All is vanity' is treated by Q¹ in a series of parallel arguments. In the first of these it is established that all that happens on earth exhibits an iron law of cycle, in which certain passing phenomena regularly recur (1²-11). All man's efforts to discover a reasonable ground for this arrangement come to nought (vv. 12-16). Qoheleth assures us that he has tried all kinds of expedients to banish the pessimistic disposition produced by the above observation; he has revelled in every species of enjoyment; he has given himself to the most laborious inventions. But all in vain (21-23). The attempt to find consolation in the pursuit of Wisdom (21² 14b, 15f.) has likewise been a complete failure, so that he has ended in blank despair (vv. 17-21a).—The second argument on the theme of 1² shows how the contraries, which characterize all that happens on earth, prove all labour on man's part to be vain. Birth is followed by death, planting by rooting up, etc. (31-9). This law of nature, which always destroys again what it has made (vv. 10, 12, 15), shows that there is no moral principle in the ordering of the world. Consequently there can be none in the case of men either; for, as their existence is not essentially different from that of the beast, no more can their fate be different (31⁶, 18-21). Special arrangements for the good of man are impossible in the plan of the universe.—The third argument (chs. 4, 5) is already interrupted by a number of interpolations. But the hand of Q¹ may still be recognized in 41-4, 6-8, 13-16 59¹, 12-16 in the complaint about human suffering, from which there is no escape, and which is yet so useless, and about the restless and yet fruitless labours of men. Isolated fragments of the following chapters (Siegfried, *l.c.* p. 22) contain complaints of similar experiences,

and wage a special conflict with the Deuteronomic doctrine of retribution. Laws of nature, according to Q¹, not moral laws, rule everything. There is no Divine government of the world. This is proved by the world's course. Man's lot is a continual vain struggle. Pleasures cannot compensate him for this, for they rest upon an illusion. Nor does Wisdom bring any real satisfaction, for the pursuit of her is fruitless.—Amongst the glossators, Q² occupies a purely Epicurean standpoint. Eating and drinking and other sensual indulgences he considers of very real value, and counsels participating in these before the coming of old age when the capacity for enjoying them ceases. Labour, again, is, according to him, not without result, for by it man gains something which procures enjoyment. Hence man is to note the good days and accommodate himself to the evil ones.—The glossator, the *hakkām* Q³, as was already remarked, defends Wisdom against the disparagement of its value by Q¹.—The Pharisee Q⁴ maintains the positions of Judaism against Q¹, namely the Divine causality in the creation and government of the world: the Divine justice, which calls even the exalted to account and protects the law-abiding; the view of premature death, which overtakes the wicked, whereas it is escaped by the godly (Siegfried, *l.c.* p. 11 f.).

5. *The Wisdom teaching in the Apocrypha*.—In the apocryphal literature the Wisdom teaching received abundant attention. (a) *Sirach*.—The standpoint of the sayings of Ben Sira has points of contact with that of Q¹ just described. His 'Wisdom' is out and out Jewish-religious. 'All wisdom is from the Lord, and is with him for ever' (1¹); hence it is unfathomable in its nature, for God alone comprehends it (v. 9). God created it (v. 9), and poured it out on all His works, b.t. in a special manner upon the godly (v. 10), who recognize that the fear of the Lord is the beginning of wisdom (vv. 14-20). From this source flow all ethical rules, which are specialized in rich variety, a course which gives the author occasion for a number of separate expositions (121-162). Once more he turns to the contemplation of the nature of wisdom in 241-307, a section which opens with a call to Wisdom to raise a hymn in praise of herself, to which she responds in 243-12. She glorifies herself as having proceeded out of the mouth of the Highest, and relates how at the Creation she lay upon the earth like a mist (cf. Gn 1² 2⁶). Then she took her seat upon a pillar of cloud (cf. Ex 14¹⁹) and spread her flight through the heights of heaven. But she likewise walked through the depths of the abyss. Sea and dry land have been taken possession of by her, and she has sought a dwelling-place among all nations. But 'the Creator of all things' commanded her: 'In Jacob take up thy dwelling.' Then she received her place in Zion, and flourished there like a fine tree. And so she calls all who long for Wisdom to come and enjoy her fruits. But Wisdom has found its fullest expression in the Book of the Law (242²-29), whose full stream is compared with that of the four rivers of Paradise. With Sirach thus as in Pr 8 (see above, p. 625) Wisdom is not God's intermediary in the creation of the world, but has to do only with men. She seeks a dwelling-place with them upon the already created earth, and finds it in Israel, partly in the Temple worship (24^{10c}), partly in the Book of the Law (24²³).

(b) *Baruch*.—In this book Wisdom appears simply as attached to the book of the commands of God (ch. 4): Israel's misfortunes, which came upon her with the Exile, are due solely to her having forsaken these commandments of life (3^{10c}; cf. Ryssel in Kautzsch's *Apokr. u. Pseudepigr. d. AT*, i. 230-475).

(c) 4 *Maccabees*.—Here the Jewish philosopher of religion starts with the principle that the natural reason (ὁ νοῦς) of man is intended to rule the passions (τὰ πάθη). This is accomplished when the νοῦς chooses a life in Wisdom and thus becomes λογισμός. Only thus can it arrive at the σοφία, which consists in possession of a knowledge of things Divine and human and of their causes (σοφία δὲ τοίνυν ἐστὶν γνῶσις θεῶν καὶ ἀνθρωπίνων πραγμάτων καὶ τῶν τοιούτων αἰτίων, 1¹⁶). But the Wisdom that is recognized must also be desired, the λογισμός must be εὐσεβής λογισμός, thought determining itself to a virtuous life. The best aid to the leading of such a life is the ancestral Law, which teaches us Divine and human things in the worthiest and most suitable manner (ἡ τοῦ νόμου παιδεία, δι' ἧς τὰ θεῖα σεμνῶς καὶ τὰ ἀνθρώπινα συμφερόντως μαθήσασθαι, 1¹⁷). By the help of the prescriptions of the Jewish Law a man will be best able to check perturbations of spirit, for from it we derive trust in God, and the conviction that the enduring of any suffering for virtue's sake brings blessedness. True philosophy thus coincides with εὐσεβεία, and is of value simply as laying a scientific foundation for Judaism (cf. J. Freudenthal, *Die Flavius Josephus beigelegte Schrift über die Herrschaft der Vernunft*, Breslau, 1869; A. Deissmann, 'Das sogenannte vierte Buch der Maccabäer' in Kautzsch's *Apokr. u. Pseudepigr. d. AT*, ii. 177; and, in general, Farrar in *Speaker's Apocrypha*, 415^b-420^a; and art. MACCABEES in vol. iii. p. 194).

In this intellectual movement which defended the Jewish religion with the weapons of Greek philosophy, and embellished it with the grace acquired from Greek education, the BOOK OF WISDOM took its place as an important factor. See the following article. C. SIEGFRIED.

WISDOM, BOOK OF.—i. TITLE.—The title σοφία Σολομώντος rests upon the circumstance that the book in several passages, particularly chs. 7-9 (cf. esp. 9¹⁷), claims to be the words of king Solomon, who passed in general for the patron of didactic composition, as David did of lyric. In like manner the canonical Book of Proverbs received the title 'Proverbs of Solomon' (חכמים שלמה), although in 30, 31¹ other composers of oracles are also introduced as authors. Of Solomon's kingly wisdom we hear in 1 K 3⁷⁻¹⁴. In Sir 47¹²⁻¹⁸ (44-49) he is celebrated as one who filled the earth with dark sayings, songs, parables, and apophthegms, as well as with interpretations which evoked the admiration of all lands. Also in Qoheleth he is regarded as the real founder of the schools of wisdom (Ec 1¹²), and even the sayings of this book are in a way attributed to him as their legendary author (see Siegfried, *Prediger*, p. 1 f.). The author of the Book of Wisdom appears to have been moved by a definite polemical aim in opposition to the Book of Qoheleth, when he chose Solomon as the representative of his views. In 1¹⁰⁻²⁰ he assails with remarkable vehemence the opinions of unorthodox Jews, who incline partly to Stoicism, partly to Epicureanism. These opinions correspond exactly to those put forward in the Book of Ecclesiastes. He reproaches these men with their pessimism, in which they in a manner 'called death unto them by their hands and their words' (Wis 1¹⁶), consumed themselves with longing after this friend, and made a covenant with him (ib.). According to their perverted judgment, life is short and sorrowful (2¹⁴; cf. Ec 6¹² 22²⁷, 3¹⁰ 41¹⁷). Man has no remedy against death, and none can release from Hades (2¹⁶; cf. Kautzsch, *Apokr. i.* 482). The breath of our nostrils (cf. Gn 2⁷) is but as a smoke that ascendeth; thought (ὁ λόγος) is a spark kindled by the heating of the heart [the ancients had no idea of the functions of the brain], and, when this is extinguished, the body is turned

into ashes, and the animating breath is dissipated in the air. Then even the recollection of us fades quickly (2⁴; cf. Ec 2¹⁶ 9¹⁰). Our life is like the passing of a shadow (2⁵; cf. Ec 6¹²). Hence from these circles of thought comes the Epicurean call to enjoy the good things of this life as long as they are within our reach.—Further, there are expressions here and there in Wisdom which recall the late Hebraisms peculiar to Ecclesiastes: e.g. μερίς, Wis 2²⁰=רֶזֶק of Ec 2¹⁰ 3²² in the sense of 'fruit of toil,' 'reward'; καταδυναστεύειν, Wis 2¹⁰, cf. רָצַח Ec 4¹, רָצַח 8⁹ (cf. Farrar, *Apocr. i.* 404^b). To this unbelieving Solomon our author opposes a genuinely Jewish, pious, orthodox Solomon.—That the words of the book are those of the historical king Solomon, our author does not mean to assert, nor could the readers of his time have supposed this to be the case. The Muratorian canon pronounces the Book of Wisdom to be 'a work composed in his honour by friends of Solomon' (*ab amicis Salomonis in honorem ipsius scripta*); Clement of Alexandria, it is true, cites sayings from our book as words of Solomon, but also as those of σοφία; Origen and Cyprian use the book as canonical, but Origen is doubtful of its authenticity (ἡ ἐπιγεγραμμένη Σολομῶντος σοφία, *adv. Cels.* v. 29). Jerome and Augustine give up the Solomonic authorship (see Schürer, *GJV* 3 iii. 381 f.).

ii. LANGUAGE.—D. S. Margoliouth attempted (*JRAS*, Apr. 1890, pp. 263-297) to prove a Heb. original for the Book of Wisdom.* But, in spite of certain phenomena which at first sight favour this theory, J. Freudenthal (*JQR*, July 1891, pp. 722-753) has conclusively shown that both the speech and the form of thought in our book plainly point to a Greek original. Hebraizing expressions are employed by the author because he found these in the LXX, and because he was himself a Jew (cf. Farrar, 404^b, 405^a; Grimm, *Apokr.* 6^a Lieferung, pp. 5, 8); but these expressions do not justify the conclusion that the work was originally composed in Hebrew.—The Greek of the book is indeed not always correct. Our author at times gives words a meaning which is not usual in classical literature (cf. Farrar, 405^a). To this category belong expressions which are particularly characteristic of the Platonic or the Stoic philosophy (Farrar, 407^a; Grimm, 19); compound adjectives, which appear to be in part of the author's own coining (Farrar, *l.c.*; for similar phenomena in Philo see Siegfried, *Philo von Alexandria*, 1874, pp. 46 f., 135). The author shows himself to be also well read in Greek poetry (Farrar, 405^b, 406^a; Grimm, 7); he imitates Greek figures of speech (according to Farrar, 405^b, 406^a, and Grimm, *l.c.*), although not always with success (Farrar, 406^a). Regarding the influence which the Greek of the Book of Wisdom exercised upon the NT, cf. Farrar, p. 408. Our author reveals also an acquaintance with Greek culture, art, and science; in particular, he displays a knowledge of astronomy and natural history (cf. 7¹⁷⁻²⁰), makes reflexions on the origin of idolatry (13¹⁻⁹ 14¹², 15³⁴), etc. Towards the end of his book his creative power gets exhausted, and he begins to repeat himself (11⁴⁴, cf. chs. 16-19). His language, too, degenerates into rhetorical bombast.

iii. GENERAL CHARACTER OF THE BOOK.—In spite of our author's familiarity with Greek culture, and the profundity of his studies, especially in the Platonic and the Stoic philosophy, which may be detected both in his language (Farrar, 407^a) and his world of ideas (Grimm, 19 f.), he was far from feeling, like Josephus and Philo, hampered by his Jewish faith, and far from seeking, like the former, to embellish it with Hellenizing graces, or, like

* His treatment of this book in the *Expositor* (Feb.-March 1900) can hardly be taken seriously.

the latter, to make it more acceptable to the educated classes by allegorizing explanations. Besides, he felt himself, as a worshipper of the true God, too far raised above all idolaters (13¹⁰-14²¹) for this, and too much embittered against those of his countrymen who had allowed themselves to be turned by Greek philosophy away from their ancestral religion to free-thought and immorality (11⁶-24). His Jewish temper shows itself even in the outward form of his work, to which he strove with all diligence to give a genuine biblical colouring. We have seen already (p. 928^b) how closely he attached himself to the LXX and its Hebraisms. Although he is capable of imitating the artistic periodic structure of the Greeks (cf. 12²⁷ 13¹⁷ 11-18), he prefers as a rule the simple Hebrew fashion of clauses connected without particles (cf. Grimm, p. 13). He seeks also, at least in the greater part of 1-12¹⁸, by imitating the Heb. parallelism, to make his book approximate as closely as possible to his model, the Book of Proverbs.

iv. THE AIM OF THE BOOK.—The author's zeal for the Jewish religion, and his orthodoxy, are still more evident in the aim of the Book of Wisdom. The Judaism of his time and environment found itself sorely pressed both from without and from within, and this in proportion to its faithfulness (21⁶, 12-20). It was weakened (31¹⁰-12 41^{4b}-22) by internal dissensions and by apostasy, particularly, it would appear, on the part of the wealthy and influential classes (5³). In addition, it was continually threatened by the spiritual force of Greek culture and philosophy (21⁶). In face of these dangers, the author seeks to provide a sure hold for the professors of the Jewish faith. It is quite intelligible that, face to face with these Hellenized Jews who 'sought after wisdom' (1 Co 12²), he felt himself moved to proclaim the Jewish religion as the true Wisdom, and to make the notion of *σοφία* the centre of his discourse. The choice of this notion was specially happy, because within its sweep could be brought all that the Greek philosophy contained of truth and all that the OT taught about *Hokhma*. We find, accordingly, that the author drew from all these sources. Platonic is his doctrine of amorphous matter (11¹⁷), of the central ideas (13¹ δ *δυν*), of the pre-existence of the soul (81⁶), of the body as hindering elevation to the divine (91⁵; in the expressions *βαρύνει*, *βρῖθει*, and *γεῶδες* there are points of contact with Plato's *Phædo*, 87^b); he Platonizes also in his doctrine of the four cardinal virtues (87). Stoic is his conception of Wisdom as the all-pervading power (72²²-24). On the other hand, his doctrine of Wisdom as an attribute of God is based wholly upon Pr 8. 9. He thinks of Wisdom as immanent in God, as something belonging to the Divine essence (7²⁰), but, on the other hand, also as something independent, existing side by side with God (7²² 8³ 9⁴, cf. Pr 8³⁰), so that he frequently personifies Wisdom (1⁶ 8⁹ 10¹⁶). In one point, however, his conception differs from that of Proverbs. While, according to Pr 8²²-30^a, at the creating of the things in heaven and earth God alone was active, and Wisdom was simply an onlooker (v. 30^b, cf. above, p. 925^a), in the Book of Wisdom (8^{6b}) she is *αἰπερὴς τῶν ἔργων αὐτοῦ* (sc. τοῦ θεοῦ), and makes a selection among God's works, i.e. she determines which of the works whose idea God has formed are to be actually carried out (Grimm). She is an emanation from God (7²⁰), therefore free from all stains, and she pervades all things (17 72⁴), without being in any way infected with the imperfections inherent in them: because she is 'more mobile than any motion,' it is impossible for any of the impurities which belong to things to attach to her.—On the relation of the Wisdom of Solomon to Philo cf.

VOL. IV.—50

Menzel, *De Græcis in libris חכמה et σοφία vestigiis*, 1858, p. 66; Ed. König, *Einkl. in d. AT*, Bonn, 1893, p. 489; Soulier, *La doctrine du logos chez Philon*, 1876, p. 162f.—But, as in Pr 8³¹ 9¹⁶, the special object of interest to Wisdom is man (Wis 7²² 2^{od}). Penetrating into the human understanding, she gives birth to all varieties of theoretical knowledge (8⁶ 8), particularly in the realm of theology, because she is initiated into the knowledge of God (8⁶). She communicates the inspiration of the prophets (8⁹ 9¹⁷), but also the knowledge of earthly things in the sphere of history (8^{6b}), astronomy, chronology, natural science (17²¹-21), art (71^{6b}; cf. Ezk 18³). But in the practical sphere as well Wisdom is the best counsellor of man, for from her comes all morality and virtue (14¹ 7²⁰ 8⁷; cf. Pr 8¹² 18-20, 31-36). See, further, Farrar, p. 420.

v. CONTENTS OF THE BOOK.—(a) The first section (chs. 1-5) describes the conflict which the Divine Wisdom has constantly to carry on with the godless wisdom of the world, and the victory to which she leads those who surrender themselves to her. In the first place (ch. 1) the author addresses himself apparently, in quite a general exhortation, to all rulers and authorities in the world. But as in what follows he deals not with public conditions or the duties of rulers, but with purely inward physico-ethical developments, it is natural to suppose that he has in view not heathen rulers, but powerful and influential personages in his Jewish environment, who, as is evident from 11⁶ 21⁶, had apostatized from their religion and attached themselves to the heathen Government. How high in those days such men might sometimes rise may be seen from the case of the Jewish noble Tiberius Alexander, who a little later was nominated Imperial administrator (*alabarch*) of the whole of the so-called Arabian side of the Nile (Schürer, *GVV* 3 iii. 490). It was only such rulers, of Jewish descent, that our author could hope to reach with his words; he could scarcely expect to be read by heathen ones. The description contained in 1⁶-2²⁰ suits, moreover, only such apostate powerful Jews. Greek philosophy, particularly Epicureanism, had estranged them from their religion (21⁶), and the practical consequences of the new frivolous view of life had speedily shown themselves in abandonment to sensualism and immorality (25⁶). To these men their fellow-countrymen who remained true to their religion were a genuine stone of stumbling. The life of the latter, with its piety and fidelity to the Law, caused them secret shame, and was a constant prick to their conscience. This drove them to hatred and bitter persecution of the 'righteous' (210-20). The author now faces these apostates like a prophet of rebuke, and exposes the vanity of their whole conduct in the passage 21-52. Wholly ensnared by earthly things, they have no idea that man, formed after the image of God, has an eternal destiny (221-23), whose form is only decided in the world beyond (31 *ἐν καιρῷ ἐπισκοπῆς* 'on the day of visitation'; v. 17^b *ἐπ' ἐσχάτων*, *ἐπ' ἡμέρας διαγνώσεως*; v. 18^b 'at the final decision' [the statement varies, it is true, in regard to some points: in 41^{6a} it is a judgment carried out in the next world after death, in 517-23 it is one that takes place in this world in eschatological times]). Then shall it be manifested whose life was the truly profitable one. The ungodly, i.e. those Jews who have despised the Law (31⁶ 420 57), with their whole brood, are exposed in their nothingness (310-12, 18-19 42-5, 18-20). They themselves shall confess their mistake with bitter but vain repentance (53-14). The righteous, on the other hand, who kept by the Law, shall reap the fruit of their strivings (313-15 411 53, 161), and shall pronounce judgment on the ungodly (416 514). The author incidentally controverts the old

Jewish doctrine that premature death is a sign of impiety (Ps 55²³ 102²⁴), holding that it is so only in the case of the wicked (3^{10c}), but not in that of the righteous, whose sufferings are meant simply to try them, and whose death is a rapture to perfect bliss (3¹⁻⁹ 4⁷⁻¹⁷ 5³ 13¹).

(b) The second section (chs. 6-9) sets forth the great advantages of Wisdom. The author here attaches his words in the first instance to the exhortation of 1¹⁻¹⁵ to rulers, on whom he urges (a) in 6¹⁻¹¹ that they in particular are bound in quite a special way to seek after Wisdom, and that they will be held specially responsible if they have ruled without it. Such conduct is all the more culpable, seeing that (β) Wisdom is so easily accessible and so ready to meet those that seek her, 6¹²⁻²². This is followed by (γ) 7¹⁻⁸, a description which Solomon from his own experience gives of the nature of Wisdom; and (δ) 8²⁻⁴ an account by the same king of how he came to attach himself to Wisdom as a life companion; and the whole closes with (ε) 9¹⁻¹⁸ Solomon's prayer for Wisdom.

(c) The third section (10¹⁻¹⁹) recounts, finally, the wonders wrought by Wisdom in the history of Israel: (a) in the period from Adam to Moses, specially down to the passage of the Red Sea, 10¹⁻¹¹; (β) during the wilderness wanderings, 11²⁻¹². This is followed by some general observations (γ) on the folly of the Wisdom-forsaken heathen, who have given themselves over to the worship of natural forces and images of gods, as contrasted with the Israelites who obey Wisdom, chs. 13-15; and (δ) on the remarkable providences of God, whereby the animal-worshipping Egyptians were punished by means of the very same animals which brought deliverance to the Israelites; in which connexion other instances of contrast between the lot of the Egyptians and the Israelites are also insisted upon.

vi. PROGRESS IN THE DEVELOPMENT OF RELIGIOUS DOCTRINE IN THE BOOK OF WISDOM.—(a) In the doctrine of God the central point in the religious system of this book is the thought that the Divine essence is *love*. Whereas the canonical OT regarded Jahweh by preference as the *Lord* of His creatures, who, according to His pleasure, called these into being by His breath, and who by withdrawing that breath causes them to perish (Ps 104^{29, 30}), in the Book of Wisdom Jahweh is full of love to all His creatures, and upholds and spares them because He has pleasure in all that lives. Even the wicked, to whom He gives every opportunity to repent (ῥῶτον μετανοίας, 12¹⁰, cf. He 12¹⁷), God seeks to spare as long as possible. Alongside of this the author's inclination towards Jewish particularistic notions shows itself. God is Father only in relation to the Jews, to the heathen He is Ruler. Sufferings are to the former fatherly chastisement and have an educative value; in the case of the latter they are an expression of anger and a sign of judgment (11^{9, 10}).

(b) In his *anthropology* the author insists pre-eminently upon individual immortality. Of this the canonical OT knew nothing, its point of interest lying merely in the continuance of the people of Israel and the consummating of the kingdom of God amongst them. But the Book of Wisdom recognizes that man, i.e. the individual, was created for incorruption (2²³ 6¹⁹ 12¹); in particular, the righteous live for ever (5^{15a}); the knowledge of the power of God is the root of immortality (15³). It is true that the conception of immortality vacillates between that of a continued personal existence and that of a survival in the memory of posterity (8¹³), or even between the first conception and that of the ideal community of life with Wisdom (8¹⁷), which the righteous enjoy even here during their earthly existence.

On the other hand, a future judgment for the wicked is presupposed in 4²⁰, following up the OT conception of a mockery of the dead in Sheol (4¹⁹, cf. Is 14^{10a}). See, further, Farrar, p. 409.

(c) In the *soteriology* of the book, the late prophetic expectation of a personal Messiah, the Servant of the Lord, recedes. The author knows Him neither as vicarious sufferer nor as deliverer of His people. The Messianic glory consists in the establishment of a kingdom of Jahweh which shall rule over the heathen (3⁹); the righteous exercise personally this sway upon earth (5^{15a}), as happened formerly with Solomon by God's command (8¹⁴). On the attitude of the rest of the Apocryphal books to this question cf. Farrar, 410*, esp. note 3.—Our author maintains rigidly the Jewish doctrine of retribution (δὲ ὅτι τις ἀμαρτάνει διὰ τούτων κολάζεται, 11¹⁰). But his method of expounding this dogma is new. He seeks to show that even the form of punishment corresponds exactly to the sin committed. The Egyptians worshipped animals, therefore they were also punished by means of animals, nay the very animals which they adored (11¹⁰ 15¹⁹ 16¹). They sinned in connexion with water by casting the newly-born children of the Hebrews into the Nile (11⁶), therefore they were also punished by means of blood-red water (ib.).

vii. INTEGRITY OF THE BOOK.—The work is evidently the well-arranged product of a single author. On now defunct hypotheses, which found in it the work of a number of different hands, see Grimm, pp. 9-15, and Farrar, p. 415*. Its integrity, too, may in general be admitted (Grimm, 15 f.). Only the conclusion (19^{18a}) gives the impression of abruptness. Although in general the author's intention is successfully carried out in depicting the wonderful guidance of Israel by Wisdom from the Exodus onwards (Grimm), yet the theme started in v. 12 appears to require somewhat fuller treatment between v. 21 and v. 22, so that the traditional text is here defective.

viii. AUTHORSHIP.—As to the personality of the author various suggestions have been offered. The book has been attributed to Solomon by Clem. Alex. (*Strom.* vi. 120 ff.), Tertullian, Hippolytus (ed. Lagarde, p. 66), *et al.*; to Philo by Jerome, Luther, Joh. Gerhard, *et al.* For these and other conjectures see Grimm, pp. 16-26; Farrar, 412-415*. In view of their untenable character, we consider that we may dispense with a closer examination of them. The probabilities are in favour of an Egyptian Jew who had received a Greek education but had remained true to the Law. His description of Epicureanism, to which many Jews had apostatized (21^{1c}), appears to have been derived partly from Qoheleth. For his further acquaintance with the works of Greek philosophers see above, p. 928*. The beauty of the works of Greek plastic art found him as unimpressible as St. Paul (Ac 17¹⁶). Sculptors and painters are to him lovers of evil, and their work is unprofitable (15^{14c}); works of sculpture are to him nothing but idols (14¹⁰). He has Euhemeristic notions of the motives that led to the making of them (14^{15a}). That he was not a Palestinian but an Alexandrian Jew, is shown by his allusions to the Egyptian animal-worship (15^{12, 19} 16¹⁻⁹). Greek images of the gods (15^{14c}) might then be seen even in Egyptian cities. In favour of the view that the author lived in Alexandria, is the circumstance that both a Greek and a Jewish population were settled there, and that his culture was derived from both these quarters.

ix. DATE.—For the date of the Book of Wisdom, the *terminus a quo* is the Greek translation of the Bible (c. 250 B.C.), the *terminus ad quem* the unquestionable acquaintance of St. Paul with the

book (cf. Grafe, 'Das Verhältniss der paulin. Schriften zur Sap. Salom.' in *Theol. Abhandlungen* C. v. Weizsäcker zu s. 70 *Geburtstage gewidmet*, Freiburg, 1892, p. 251 ff., where in particular the author establishes St. Paul's dependence upon the book in regard to the doctrine of predestination, the condemnation of the heathen, and the conception of the relation of soul and body). Resemblances to the book or influences from the same quarter are discoverable also in the Epistle to the Hebrews (cf. He 1² with Wis 7², He 4¹² with Wis 7²², etc.). The most recent attempts to fix the date vary up and down between 150 B.C. and 40 A.D. (cf. Farrar, 420^b-422^a). The position which the author assumes in the development of Alexandrianism prior to Philo (cf. Siegfried, *Philo von Alex.* 22-24) is in favour of placing him between B.C. 100 and 50. Kuenen (*Hist.-crit. Onderzoek*, § 105¹⁰), it is true, will have it that the book was not composed till the time of Gaius Caligula.

x. TEXT.—The Text is best preserved in cod. Vaticanus (B); it is very good also in cod. Sinaiticus (Σ or S), as well as in the fragments of cod. Ephremi rescriptus (C); it is less satisfactory in cod. Alexandrinus (A) and, with the exception of the excellent cod. 68, in 10 cursives. Swete (*OT in Greek*, vol. ii., Camb. 1891, 2nd ed. 1897, pp. 604-643) uses B in general as the basis of his text, but gives in footnotes all the variants of Σ (S), A, and C. O. F. Fritzsche in his *Libri apocryphi V.T. græce*, Lipsiæ, 1871, gives not only the variants of the above MSS but also those of cod. Venetus (HP 23), etc., as well as those derived from the cursives and the Versions. W. J. Deane (*The Book of Wisdom*, Oxford, 1881) agrees almost entirely with Fritzsche. Noteworthy emendations are to be found in Grimm *ap. Apokr.* 6¹⁰ Lieferung (Lpzg, 1860), and in F. W. Farrar in 'Speaker's Com.' *Apocrypha*, i. (London, 1888) 403-534, as well as in H. Bois, *Essai sur les origines de la philosophie judéo-Alexandrine* (Toulouse, 1890), p. 378 ff.

xi. VERSIONS.—Of the Versions, the Vetus Latinus of Jerome was taken over unaltered into the Vulgate, in the Books of Sirach and Wisdom. The Latin text of the two Wisdoms from the cod. Amiatinus was critically edited for the Wisdom of Solomon by de Lagarde in *Mitteilungen*, Bd. i. 243-284.—Of the Syriac Versions, the Peshitta recension was published in de Lagarde's *Libri apoc. V.T. Syriace*, Lips. 1861; another recension in Ceriani's edition of the cod. Ambros. sæc. vi. (Milan, 1876 ff.); cf. Nestle in *Urtext u. Übersetzungen der Bibel* (a reprint of the art. in *PRE*³), p. 230; Ryssel in Kautzsch's *Apokr. und Pseud. epigr. d. AT*, i. 250-254.—On the Armenian literal Version, the so-called Mechitar Bible, Venice, 1803, cf. Nestle, *l.c.* pp. 155-157; also *PRE*³ iii. 79 on the special editions of the Wisdom of Solomon, from 1824 to 1854.—For recent English translations by Denne and Farrar see above.—The most recent German translation is that of C. Siegfried in Kautzsch's *Apokr. und Pseud. epigr. d. AT*, i. 476-507, with Introduction and short exegetical notes. J. K. Zenger arranged the first section of the book (1¹-6¹¹) in strophes and in verses of from 2 to 3 strophes, and published this in a German translation, with short explanatory notes in the *Ztschr. für kath. Theol.* xxii. [1898] pp. 417-420. In an Appendix he adds Egyptian parallels to ch. 2 from Erman's translation (p. 430 f.).

LITERATURE.—For references see Grimm, *Buch der Weisheit* (cf. *Kgf. ex. et. Hdb. zu den Apokr. d. AT*), pp. 45, 46, and Farrar, *l.c.* pp. 422^b-423. See also W. J. Deane, *The Book of Wisdom*, Oxford, 1881, pp. 42, 43; Zöckler, *Apokryphen*, 1891, pp. 360, 361; Schürer in *PRE*³ i. 652, and *GJV*³ iii. 383 ff.;

Ph. Thielmann, *Bericht über das gesammelte handschriftliche Material zu einer kritischen Ausgabe der latein. Übersetzungen bibl. Bücher d. AT*, Munich, 1900, pp. 207-214. The last-named author has either personally or through others collated 30 MSS. Of these, 27 are complete, while the other 3 contain fragments of the Book of Wisdom. They belong to the 8th-10th centuries, and include Spanish, Anglo-Saxon, pre-Carolingian French, South German, Swiss, Italian texts, as well as the Bibles of Theodulf and Alcuin. In addition, he deals with excerpts from 33 MSS. This had been preceded by Thielmann's studies, 'über den character der latein. Übersetzung der Weisheit Salomonis,' etc., in *Archiv für latein. Lexicographie und Grammatik*, viii. (1893) 235-297, 501-501, ix. (1894) 247-284. According to Thielmann, the unity of the Latin text of Wisdom can be established; see, further, Schürer in *ThLZ*, 1900, No. 12. C. SIEGFRIED.

WIST, WIT, WOT, WITTY.—The parts of the verb 'to wit' (Anglo-Sax. *witan*, Middle Eng. *witen*, 'to know') were: Pres. tense 'I wot,' 'thou wotest,' 'he wot' or 'woteth'; plu. 'we witen'; past tense 'wiste'; past ptp. 'wist'; infin. 'to wit.'

Examples: *I wot*—Maundeville, *Travels*, 72, 'I wot never, but God knoweth'; Knox, *Hist.* 67, 'I wot, and know surely by the Word of God'; Jn 11⁴² Tind. 'I wot that thou hearest me all wayes' (where the tense should be past, *ἔσθω*, Wyc. 'I wiste', Cran. and AV 'I knew', Rhem. 'I did know'). *Thou wotest*—Jn 13⁷ Tind. 'What I do, thou wotest not now, but thou shalt knowe hereafter.' *He wot or woteth*—Tindale, *Expos.* 60, 'He that hateth his brother is in darkness, and walketh in darkness, and woteth not whither he goeth.' *We, ye, they witen* (and later, as in AV, *wot*)—*Piers Plowman*, li. 74—

'Witen all and witnessen that wonen here on earth
That Meed is ymarried more for her riches
Than for holiness or hendenes, or for high kind:
Falseness is fain of her, for he wot her rich.'

Wyclif uses 'they wytheth', *Works*, iii. 107, 'Fader, forgeve hem this gilt, for they wytheth nought what they dooth.' Past tense, *wiste*—Jn 13²⁸ Wyc. 'Noon of hem that saten at the mete wiste wherto he saide to hym'; Tindale has 'wyst', Dt 34⁶ 'No man wist of his sepulchre unto this daye.' Past ptp. *wist*—Mt 12⁷ Tind. 'Wherefore yt ye had wist what this sayinge meneth'; Occleve in *Skeat's Specimens*, p. 22—

'For, yt myn hertes wille wist were and preved
How, yow to love, it stered is and meved,
Ye shulde knowe I your honour and welthe
Thurste and desire, and eke your soules helthe.'

Infin. *wit*—Malory, *Holy Grail* (in Morley's *Eng. Rel.* 38), 'And so they looked upon him, and felt his pulse, to wit whether there were any life in him'; Ex 9⁷ Tind. 'And Pharas sent to wete.' For the phrase 'do to wit' (2 Co 8) see art. Do in vol. i. p. 614^b, and observe the parallel phrases 'give to wit', Rhem. NT, note to Jn 15⁴ 'These conditional speeches, *If you remaine in the vine, If you keepe my commandements*, and such like, give us to wit that we be not sure to persist or persevere, nor to be saved, but under conditions to be fulfilled by us'; and 'let to wit', Cranmer, *Works*, i. 70, 'We let you to wit, that forasmuch as it belongeth unto us,' etc.

In AV there occur: (1) Present tense, 'I wot,' Gn 21²⁸, Nu 22⁵, Jos 2⁵, Ac 3¹⁷, Ph 1²³; ['he] wotteth', Gn 39⁸ 'My master wotteth not what is with me in the house'; 'we wot,' Ex 32¹⁻², Ac 7⁴⁰; 'ye wot,' Gn 44¹⁵, Ro 11². (2) Past tense, 'I wist,' Jos 2⁴, Ac 23⁸; 'he wist,' Ex 34²⁸, Lv 5¹⁷⁻¹⁸, Jos 8¹⁴, Jg 16³⁰, Mk 9⁶, Jn 5¹³, Ac 12⁹; 'ye wist,' Lk 2⁴⁰; 'they wist,' Ex 16¹⁵, Mk 14⁴⁰. (3) Infin. 'to wit,' Gn 24²¹, Ex 2⁴, 2 Co 8¹ ('do to wit').

The Heb. and Gr. are the ordinary verbs 'to know,' *yāda* and *oīda*, except in the last case, where 'we do you to wit' is the tr. of *γνωρίζομεν ὑμῖν*, RV 'we make known to you.'

The infin. 'to wit' is also used as a connecting phrase in Jos 17¹, 1 K 23² 750 1323, 2 K 10²⁹, 1 Ch 72 271, 2 Ch 412 257.10 313, Est 212, Jer 25¹⁸ 34⁹, Ezk 13¹⁶, Ro 8²³, 2 Co 5¹⁹. The fuller phrase is 'that is to wit,' which shows the infin. more clearly, as Mt 23⁸ Tind. 'For one is your Master, that is to wyt Christ, and all ye are brethren'; Tindale, *Works*, i. 87, 'Wherefore they which are of faith are blessed, that is to wit made righteous, with righteous Abraham.' Except in 2 Co 5¹⁹ (*ἵνα*) there is no equivalent in Heb. or Greek.

Wit as a *subst.* occurs in Ps 107²⁷ 'And are at their wit's end' (עָלְמוּ עַל חֵכְמָתָם, lit. as AvM, RVm 'and all their wisdom is swallowed up,' RV 'and are at their wits' [plu.] end'; the AV phrase comes from Cov.; Wyc. has the more lit. 'and al

the wisdom of hem was devourid,' after Vulg. *et omnis sapientia eorum devorata est*; 1 Es 4²⁸ 'Many there be that have run out of their wits for women' (πολλοὶ ἀπενόησαν ταῖς ἰδίας διαβολαῖς διὰ τὰς γυναῖκας); 2 Es 5⁹ 'Then shall wit hide itself' (*abscondetur tunc sensus*); Sir 31²⁰ 'He riseth early, and his wits are with him' (ἀνέστη πρωὶ, καὶ ἡ ψυχὴ αὐτοῦ μετ' αὐτοῦ).

The subst. 'wit' was very common in the cent. preceding the issue of AV. It was losing its tone by 1611, and not only occurs less frequently in AV than in previous versions, but is used more readily in the Preface, with its familiar style, than in the tr. of any of the books. Thus, 'their sharpness of wit'; 'to exercise and whet our wits'; 'opening our wits, that we may understand his word'—all occurring in the Preface. In the earlier versions we find, e.g., He 514 Wyc. 'hem that for custum han wittis exercisid,' so Tind. 'which thorow custome have their wittes exercised,' and all the VSS till Rhem., and AV ('senses', Gr. τὰ εἰσθητήρια); Lk 24⁷ Tind. 'And all that hearde him mervelled at his wit and answers' (so Matt., Wyc. 'prudens', Rhem. 'wisdom', others 'understanding', Gr. σύνεσις); 24⁴⁵ Tind. 'Then opened he their wittes that they myght understand the scriptures' (Rhem. and AV 'understanding', Gr. τὴν νοῦν); Mk 515 Rhem. 'They see him that was vexed of the devil, sitting, clothed, and wel in his wittes.'

The word has some range of meaning, thus: (1) *Sense, meaning*, as Wyclif, *Works*, l. 98, 'Syththe the Pater Noster is the beste prayer that is, for in it mot alle other prayers be closed yf that schulle graciouslyche be hurde of God, therefore scholde men kunne this prayour, and studie the wyt thereof'; Melville, *Diary*, 36, 'A babling of words without wit, at least wisdom.' (2) *Cleverness*, as Hall, *Works*, ii. 69, 'How many shall once wish they had been born dullards, yea idiots, when they shall find their wit to have barred them out of heaven? Say the world what it will, a dram of holiness is worth a pound of wit.' (3) *Understanding, ability to understand*, as Pr. Bk. 1552 (Keeling, p. 379)—

'O Holy Ghost, into our wits,
Send down thine heavenly light';

Elyot, *Governour*, ii. 439, 'A man of grete witte, singuler lernynge, and excellent wisdom.' (4) *Wisdom*, as Ro 11³⁴ Wyc. 'Who knew the witte of the lord, or who was his counsellour?'; Spenser, *Hymn of Heavenly Beauty*—

'O thou most Almightye Spright,
From whom all guifts of wit and knowledge flow.'

Wittingly is found in Gn 48¹⁴: cf. Tind. *Expos.* 177, 'When they espied that the truth could not stand with the honours which they sought in the world, they wittingly and willingly persecuted it.'

Witty occurs in Pr 8¹², Jth 11²³, Wis 8¹⁹. Cf. Mt 11²⁵ Cheke's version, 'which has hidden yees things from wijs and witti men, and hath disclosed the saam to baabs'; Wyclif, *Works*, iii. 88, 'Who wiser than David? or hwo moore witti than Salomon his sone?'

J. HASTINGS.

WITCH, WITCHCRAFT.—See MAGIC, vol. iii. p. 208 f.

WITHS is the tr. in Jg 16⁷⁻⁹ of נָקָה in plu., which means 'bowstring' in Job 30¹¹, Ps 11², and is so tr^d here by Moore, who thinks that it was with cords made from the intestines of animals that Samson offered to be bound, 'green' meaning fresh, not dried, when they would tie better and be less liable to split. But RV tr. the word 'teng-cord' in Job 4²¹, and probably the meaning in Jg 16 is simply 'green ropes.' The Eng. word (usually spelt 'withes') means a tough flexible twig or willow branch. Wyclif uses it in Lv 23⁴⁰ 'withies of the rennyng water,' i.e. willow branches; also in Ps 137, Is 15⁷.

J. HASTINGS.

WITNESS.—For 'tabernacle of witness' (עֵדוּת) Nu 17⁹ 18², 2 Ch 24⁶; τοῦ μαρτυρίου Ac 7⁴⁴ [RV in all 'testimony'] see art. TESTIMONY. 'Witness,' as treated in the present article, represents the following verbs and nouns: [עָנָה, עָנָה (lit. 'answer'); נָקָה and נָקָה (the latter only of things); LXX and NT μαρτυρέω, ἐπιμαρτυρέω, καταμαρτυρέω ('witness against'), συμμαρτυρέω ('witness along with,' 'corroborate'), ψευδομαρτυρέω ('bear false witness'), μαρτύρομαι, διαμαρτύρομαι, προμαρτύρομαι ('witness

beforehand'); μάρτυς (of persons), μαρτυρία, μαρτύριον.

The nouns נָקָה and נָקָה [whose root notion is prob. that of reiterating, hence *emphatically affirming*] are used in two leading senses—

1. *Witness=testimony, evidence* (of things): Gn 31⁴⁴ 48. 52 [JE] the heap of stones that was to witness the covenant between Jacob and Laban, Ex 22¹² 13 [E] the carcass that was to be brought in evidence that the animal entrusted to the keeping of a neighbour had been torn, Dt 31¹⁸ 21 [J] the Song of Moses is to be a witness against the children of Israel if they go astray, v. 26 (D²) the book of the Law is to serve the same purpose, Jos 22²⁷ 28. 34 [P] the altar erected by the 2½ tribes (see art. ED), Is 19²⁰ the altar and the mazzēbah in the land of Egypt, Job 16⁸ Job's miserable condition is a witness against him, Ps 89²⁷ 30 the moon [possibly, but we prefer the interpretation below]. In all these passages נָקָה is used. נָקָה [only E] occurs in Gn 21³⁰ of the seven ewe lambs that are to witness the covenant between Abraham and Abimelech, 31²³ the heap of stones that witnessed Laban's covenant with Jacob, Jos 24²⁷ 28 the great stone set up by Joshua at Shechem to witness Israel's covenant with Jahweh.—Similarly in NT μαρτύριον is used: Mt 8⁴ (|| Mk 1⁴, Lk 5¹⁴) of the gift to be offered by the leper, Mt 10¹⁸ (|| Mk 13⁹, Lk 21³³) the persecutions of Christ's followers, Mk 6¹¹ (|| Lk 9⁵) the dust to be shaken off the apostle's feet [on all these passages see Swete's note on Mk 1⁴], Ja 5² the dust of the rich men's silver and gold to be a witness against them.

2. *Witness* (of persons): (a) of God: Gn 31³⁰ [E] God is to be witness between Jacob and Laban, Job 16¹⁹ 'my witness is in heaven,' 1 S 12⁵ 6 'the LORD is witness against you . . . He is witness,' so v. 8 [reading 'נָקָה' after LXX μάρτυς Κύριος], 20¹³ 'the LORD be witness' [inserting נָקָה before 'נָקָה'], Jer 29²³ against the false prophets Anab and Zedekiah, 42⁹ invoked as a witness by Johanan and his companions (cf. Jg 11¹⁰, where the elders of Gilead say to Jephthah, 'The LORD shall be witness [lit. 'hearer,' עָנָה] between us'), Mic 1³ against the nations, Mal 3⁵ against evil-doers in Israel, Ps 89²⁷ 30 'the witness in the sky, i.e. God [see Driver, *Par. Psalt.*], is faithful'.—Similarly, in NT St. Paul calls God as witness (μάρτυς) to the truth of his words and the purity of his motives, Ro 1⁹, 2 Co 1², 1 Th 2¹⁰, Ph 1⁵.

(b) David (or perhaps the Davidic dynasty personified) was God's witness to the nations, Is 55¹.

(c) Of witnesses in a more or less strictly forensic sense: Jer 32¹⁰ 12. 23. 44 of transfer of property, Ru 4⁹ 10. 11 betrothal (see art. SHOE); usually of testimony in court and in civil and social relations: e.g. Nu 5¹³, Dt 5²⁰ 17, Job 10¹⁷ (fig.), Is 8², Jer 32¹⁰. Note the phrases 'false witness' נָקָה שָׁקֶר (hence Ex 20¹⁶ עֵנֶה עַד שָׁקֶר 'bear false witness' [lit. 'answer (in court) as a false witness'] against' Ex 20¹⁶, Dt 19¹⁵ 16, Ps 27¹², P-61¹⁴ 14⁶; also נָקָה שָׁמַר Dt 5²⁰, Pr 25¹⁸; נָקָה שָׁמַר Pr 12¹⁷ 19⁵ 9; נָקָה שָׁמַר Pr 21²⁸; נָקָה שָׁמַר 24²⁸; נָקָה שָׁמַר 19²⁸, cf. נָקָה שָׁמַר 'witness of [i.e. supporting] violence,' Ex 23¹ [E], Dt 19¹⁶, Ps 35¹¹; 'faithful witness' is נָקָה שָׁמַר Pr 14⁶, or נָקָה שָׁמַר Jer 42⁹, Pr 14⁶; 'at the mouth of witnesses' נָקָה שָׁמַר Nu 35²⁰ [P], or (עֵד) נָקָה שָׁמַר Dt 17⁶ 18 19¹⁵ 16.

The verb [עָנָה], denom. from נָקָה, means in Hiphil [the only instance of Qal is in *Kethibh* of La 21¹³]—(1) 'testify or witness,' in favour of (Job 29¹¹, La 21¹³ [Kere]), or against (1 K 21¹⁰ 12) one, or between two parties (Mal 2¹⁴); (2) 'cause to testify,' i.e. 'take as witness' (Is 8², Jer 32¹⁰ 28. 44), with נָקָה 'against' (Dt 4²⁶ 30¹⁹ 31²⁹); (3) 'protest,' 'affirm solemnly,' 'warn' (Jer 6¹⁰, Neh 13¹⁵), with נָקָה (Gn 44²⁰ 21 [J], Ex 19²¹ [E] 21¹⁹ [Hoph. 'if a protest have been entered'], 1 S 8⁹ 16, 1 K 24², 2 Ch 24¹⁹, Neh 9²¹ 132, Jer 42¹⁹, Am 3¹³); note esp. the instances where God is the subject: Ex 19²³ [J], Dt 8¹⁹ 32⁴⁶, 2 K 17¹³ 15, Neh 9²² 24, Jer 17¹⁷, Zec 9⁶, Ps 50⁷ 81⁹; whence the use explained in art.

TESTIMONY of the term 'testimonies' for God's laws as solemn charges or declarations of the Divine will.

תָּעֵן (lit. 'answer,' 'respond') has the specific sense of 'respond as a witness,' 'testify': with תָּ for Gn 30³³; but usually *against*, Ex 20¹⁶ 23², Nu 35³⁰ [P], Dt 31⁷ 1916¹⁸, 1 S 12², 2 S 1¹⁶, 1 S 39⁵⁹, Mic 6², Jer 14⁷, Ru 1²¹ (?), Pr 25¹⁸; with תָּעֵן Hos 5⁷ 71⁶, Job 16²; with תָּעֵן Dt 31²¹ (+תָּעֵן) 'as witness'.

The testimony of at least two witnesses was required to justify a capital sentence, Dt 17⁶ 19¹⁵, Nu 35³⁰ [P]. Cf. the general saying 'that at the mouth of two witnesses or three every word may be established' (Mt 18¹⁶, similarly 2 Co 13¹, He 10²⁶; also the rule laid down in 1 Ti 5¹⁹ that an accusation is not to be received against an elder except on the information of two or three witnesses); and note the two witnesses against Naboth (1 K 21¹⁰), and against Jesus (Mt 26⁶⁰). Although perjury was punished by the infliction of the same penalty as the false evidence, if accepted, would have involved for the accused (Dt 19^{16a}), we gather from the last two instances (cf. the evidence suborned against Stephen, Ac 6¹³) as well as from the terms of the Ninth Commandment, that amongst the Jews false witness was as common and as easily procurable as it still is in many Eastern courts of justice. The witnesses, in the event of the accused being condemned to death, had to take the leading part in carrying out the sentence, Dt 17⁷, cf. 13¹⁰ (b) and Ac 7⁵⁸.

In the NT the apostles are repeatedly presented in the character of witnesses (μαρτυρες) regarding the life and death and, above all, the resurrection of the Lord Jesus (Lk 24⁴⁸, Ac 1⁸, 2³² 31⁸ 5³¹ 10³⁹, 41 13³¹ 22¹⁶ 28¹⁶, 1 P 5¹; cf. Mt 24¹⁴, Ac 4³⁸). The name μαρτυρος is twice (Rev 1⁵ 31⁴, cf. 1 Ti 6¹³) applied to our Lord Himself; it is used also of the two witnesses of Rev 11³. John the Baptist came εἰς μαρτυρίαν, that he might bear witness concerning the Light (Jn 1⁷). The heroes of faith of the OT are 'the cloud of witnesses' (ρέφος μαρτύρων) of He 12¹. AV tr. μαρτυρος by 'martyr' in Ac 22³⁰, Rev 2¹³ 17⁴, but it is questionable whether the word had acquired this sense in NT times (see MARTYR). RV has 'martyr' only in Rev 17⁶, elsewhere 'witness.' For the 'witness of the Spirit' (Ro 8¹⁶, cf. 1 Jn 5¹⁰) see art. HOLY SPIRIT, vol. ii. p. 409^b.

J. A. SELBIE.

WIZARD.—See SORCERY, p. 606^a.

WOLF.—In all the passages in the OT where AV and RV have 'wolf' the Heb. original is זֶבֶב, LXX and NT λύκος, Vulg. lupus, Arab. dhi'b. The wolf is, unfortunately, quite abundant in the Holy Land, and very destructive to the flocks of sheep and goats, which constitute so large a part of the wealth of the people. It is not surprising, therefore, that the allusions to it and its habits should be frequent. Its insatiableness is the theme of a comparison with Benjamin (Gn 49²⁷). One of the most signal miracles of the triumph of God's kingdom is the change in the habits and instincts of the wolf (Is 11⁶ 65²⁵, Sir 13¹⁷). The princes of apostate Israel are characterized as wolves (Ezk 22⁷). The nocturnal habits of the wolf are noted (Jer 5⁶ עֶרְבָה, 'evenings,' m. 'deserts,' Hab 1⁸, Zeph 3³). The enemies of the truth are wolves (Mt 10¹⁶, Lk 10¹, Jn 10¹²). Hypocrites in the Christian Church are wolves (Mt 7¹⁵, Ac 20²⁹). The wolves of the Holy Land are large, tawny, and usually solitary, or one or two together. They prowl around the flocks and herds, and sometimes get into the folds. They seldom attack men.

G. E. POST.

WOMAN.—

Heb. אִשָּׁה, a form similar to אִישׁ and אִשָּׁה 'man,' but, according to Oxf. Heb. Lex., not derived from the same root, but perhaps from אִשָּׁה, אִשָּׁה, with the sense of 'tender,' 'frail.'

Gn 2²³ (where Luther has *Männin*, Symm. ἀνδρῶν, Vulg. virago) cannot be taken as an authoritative statement of etymology; but it illustrates a popular conception of the relation of the words based on the Heb. tradition of the origin of woman. In three places (Lv 15³³, Nu 31¹⁵, Jer 31²²) AV, followed by RV, has the Eng. word 'woman' for אִשָּׁה, which is literally 'female,' is used for the female of animals (e.g. Gn 6¹⁹, Lv 31⁹), and tr. 'female' when applied to the human race in Gn 17⁵².

Gr. γυνή, which also stands for 'wife,' as does the Heb. equivalent. In Ro 1²⁸ 27 AV is followed by RV in using the Eng. word 'woman' for the Gr. θήλυς ('female'). The diminutive γυναικίσκος occurs in the plural in 2 Ti 3⁸, and is rendered 'silly women' both in AV and in RV.

For information on the social and legal status of woman in Israel see FAMILY and MARRIAGE. There remain to be considered the place of woman in religion, Jewish and Christian, and the treatment of questions affecting woman religiously and ethically by the Scripture writers.

i. IN THE OLD TEST. AND JUDAISM. — While sharing to some extent the universal Eastern conception of the inferiority of woman to man, the Jewish religion of biblical times by no means sanctioned the total subjection of woman subsequently authorized by Mohammedanism or the low view of woman's place in religion taken by rabbinical Judaism. Women seem to have enjoyed considerable rights and privileges in all the Semitic cults. This is apparent in the ancient Arabic cult, in which an important part was played by female divinities.

Most of the *jinns* were female. According to Robertson Smith, 'in old Arabian religion gods and goddesses often occurred in pairs, the goddess being the greater' (*Kinship and Marriage in Early Arabia*, p. 300). The Byzantine writers regarded the worship of Aphrodite as the principal cult at Mecca. This idea is supported by recent research, the white stone being the original Meccan divinity, and the black stone her son, the very name *ka'ba* seeming to point to a supreme female deity. Prostitution, both by married and by unmarried women, in imitation of the conduct of the goddess, was a recognized custom in the ancient Arabian cult. In the various functions of worship, bringing offerings, stroking the sacred stone, etc., women took part as well as men, and in the cult of the dead it was their part to chant the rhythmical dirges. Women were also found in the official position of the *kahins* (seer), originally the chief officer of the Arabian religion.

Woman also has a prominent place in the Babylonian, Assyrian, and Phœnician religions.

This is seen in the prominence given to female divinities. The Babylonian Ishtar was the mother goddess and head of all the gods. Among the Assyrians Astarté is the supreme goddess. It is to a goddess, apparently, that king Mesha devotes the Israelite captives in the inscription on the Moabite Stone. Then women took a prominent part in the worship. There are inscriptions with the words 'handmaid of Melkart,' 'sister of Melkart.' Women, too, were recognized as priestesses and prophetesses. Thus there were priestesses of Ishtar at Uruk.

The OT contains evidence of the lead taken by women in idolatrous rites. Mancah, the mother of Asa, introduced the worship of Astarté (1 K 15¹³). Jezebel in the Northern kingdom supported the prophets of the Phœnician cults and persecuted the followers of J^r (1 K 18⁴ 19); and her daughter Athaliah apparently played the same part in the Southern kingdom (cf. 2 K 8¹⁸ and 2 Ch 21⁴ with 2 Ch 22³ and 24⁷). Jeremiah describes the devotion of the women of Jerusalem to the rites of Ishtar, kneading dough and making cakes which would be shaped like the moon (see QUEEN OF HEAVEN), to represent the goddess (Jer 7¹⁸). If we do not accept Stade's conjecture that 2 K 23⁷ is a gloss, possibly the clause may refer to the work of some of the women in providing sacred garments for the worship of Astarté (i.e. on the suggestion of Peritz that מַנְטָה [χίτων, cf. Lucian *στολῆς*] be substituted for the Massoretic מִנְיָה). Ezekiel mentions the devotion of Jerusalem women to the worship of the Babylonian Adonis, saying, 'There sat the women weeping for Tammuz' (Ezk 8⁴). Women must have had their share in the horrible rites of Molech, which took place in the Valley of Hinnom, as the 'inhabitants of Jerusalem' gener-

ally, without distinction of sex, are accused of having 'filled this place with the blood of innocents' (Jer 19²⁻⁴).

It is therefore quite in accordance with contemporary Semitic custom that woman should take part in the religion of Israel, as Peritz has demonstrated in his exhaustive monograph on the subject, a work to which this article is largely indebted.

1. *The Participation of Woman in the Privileges of Religion.*—(a) *Prayer*, e.g. the instance of Hannah at Shiloh (1 S 1⁹⁻¹⁰).—(b) *Feasts*. In primitive times women attended the periodic religious gatherings of Israel. It was taken for granted that the daughters of Shiloh would be present at the annual feast (Jg 21¹⁶⁻¹⁹). Later, the wives and daughters of Elkanah are found attending the Shiloh festival (1 S 1⁴⁻²¹). Women were present at David's feast and sacrifices on the recovery of the ark (2 S 6¹⁹). The Deuteronomic code makes express provision for the presence of women at the temple festivals. The Jews are exhorted to rejoice with their sons and their daughters (Dt 12¹²). Among those who are to eat the feast we have 'thy daughter' and 'thy maidservant' (v. 18), 'thine household' (14²⁶ 15²⁰), cf. 16¹¹⁻¹⁴.—(c) *Sacrifices*. Women also took part in the ancient sacrifices. When Manohah offered a burnt-offering because the angel of J^h had visited him, his wife joined him in the deed. They both 'fell on their faces to the ground' (Jg 13²⁰), and it was the woman who said, 'If the Lord were pleased to kill us, he would not have received a burnt-offering and a meal-offering at our hand' (v. 23). The Law required the attendance only of men at the yearly feasts (Ex 23¹⁷ 34²³, Dt 16¹⁴); but it did not forbid women to come, and it is evident that custom, which lay behind the Law, allowed the attendance of women. The meaning of the Law was to make this obligatory on men while it was left optional with women, in part, no doubt, owing to the fact that they could not always take the necessary journey. The women of post-exilic times also have their share in religious functions. The presence of women is expressly mentioned in the account of Nehemiah's reading of the Law (Neh 8²⁻³), and again in the description of the sacrifices and rejoicings associated with the dedication of the city walls (12⁴⁸). Certain sacrifices women were forbidden to eat, viz. the flesh of the sin-offering, which was allowed only to males (Lv 6²⁹). This plainly implies that they were allowed to eat of those sacrifices concerning which no such prohibition was made (see W. R. Smith, *RS* p. 379, note 2). The priest's daughters are mentioned with his sons as those who are to share with him in eating sacrificial meat (Lv 10¹⁴). If a priest's daughter is married to an alien she may not eat of the sacrifice, but the privilege will be restored to her on her widowhood or divorce if she has no children (22¹²⁻¹³); cf. Nu 18¹. Women were required to bring sacrifices for purification (Lv 12. 15¹⁹⁻³³).—(d) *Vows*. They were free to take the Nazirite vow (Nu 6²).—(e) *Oracles*. Women could consult oracles, as we read in the case of Rebekah (Gn 25²²).—(f) *Theophanies*. They enjoyed the privilege of theophanies, as in the cases of Hagar (Gn 16^{7a} 21^{17a}), Sarah (18^{9a}), Manoah's wife (Jg 13^{3a}).

2. *Official and other leading Positions in Religion held by Women.*—(a) *Witchcraft*. The lowest form of female influence in this direction is seen in the idea of witchcraft, according to which certain occult powers in dealing with the unseen world were ascribed to women. The witch of Endor was supposed to be holding intercourse with 'a familiar spirit,' which enabled her to call back Samuel from the dead against the will of the great seer (1 S 28^{7a}). The Law attached the death penalty to the crime of sorcery on the part of a woman, in

the con. mand, 'Thou shalt not suffer a sorceress to live' (Ex 22¹⁸). For the purpose of divination women attached some sort of amulets to the arm (πινος Ezk 13¹⁸, which the Hexapla renders *φουλακτήρια*), and also something to the head, both used, according to W. R. Smith, for the purpose of invoking the deity. With this we may compare Rachel's possession of the teraphim. She would hope to perform some occult rite with the idol and obtain an oracle from it (Gn 31¹⁹).—(b) *Mourning*. While the funeral rites and their accompanying lamentations were used for women as well as for men (Jer 16⁷, Mk 5²³), women took a prominent place in the performance of them, just as there were 'mourning women' in Arabic heathenism.—(c) *Tabernacle and temple service*. There were 'serving-women which served at the door of the tent of meeting' (Ex 38⁷; the mention of these women in 1 S 2^{22b} is generally regarded as an interpolation). No account of the service of these women is given anywhere in the OT. The LXX has in Exodus τῶν νηστευσασῶν αἱ ἐνστήουσας, but in 1 Sam. τὰς γυναῖκας τὰς παρεστῶσας; Vulg. *quæ excurabant*, and Targ. and Syr. have 'who prayed' and 'who came to pray,' manifestly no more than a loose paraphrase of the original Hebrew נָזַד, a word frequently used in the Priestly Code for some sort of Levitical service in the tabernacle (e.g. Nu 4²³). The statement that the laver of brass, etc., were made out of the mirrors of 'the serving-women which served' (we might read 'which had served,' reading נָזַד as a pluperfect), seems to imply that this service was no longer going on. Thus the sentence points to an ancient custom which had been abandoned. Except that some ritual service associated with the priest's sacrificial work is implied, it is impossible to say what the work of these women had been.—(d) *Music, singing, and dancing*. Women appeared in choral dances on occasions of great victories and other sources of rejoicing (e.g. Ex 15²⁰, Jg 11³⁴, 1 S 18⁶, Ps 68²⁶). In company with singing men, women were also engaged in the temple choir (Ezr 2⁶⁵). The register of returned exiles contains a reference to 'two hundred forty and five singing men and singing women' (Neh 7⁶⁷). We are left to conjecture what their special function was, but the fact that there were subsequently men and women singers in the temple points to the conclusion that a guild of singers in connexion with public worship had been formed as early as the Exile.—(e) *Prophecy*. Women appear from time to time in the history of Israel as inspired prophetesses. Miriam is called a 'prophetess' (Ex 15²⁰), and is associated with her brother Aaron in exclaiming, 'Hath J^h indeed spoken only by Moses? hath he not spoken also by us?' (Nu 12²). The prominence of Miriam appears also in Mic 6⁴ 'And I sent before thee Moses, Aaron, and Miriam' (see MIRIAM). Deborah appears both as a prophetess and as a judge (Jg 4⁴⁻⁵). See DEBORAH. Huldah appears as a prophetess to whom the messengers of Josiah applied when they were directed to 'inquire of the Lord' (2 K 22¹³⁻²⁰). See HULDAH. In Neh 6¹⁴ 'the prophetess Noadiah' [but see NOADIAH] appears among 'the rest of the prophets' hired by Tobiah and Sanballat to hinder the restoration of Jerusalem, who must therefore be regarded either as heathens or as false Jewish prophets. It is manifest that the appearance of a prophetess in Israel was quite exceptional. The prophetic guilds did not include women; they consisted only of 'sons of the prophets.' A prophetess was, like Amos coming from his farm work, not trained for office, but inspired and compelling respect by her gifts and the power of her utterances. No law forbade her to speak; no custom hindered her from rising to a position of great influence.

ii. IN THE NEW TEST. AND CHRISTIANITY.—

The freedom and prominence of woman in the early Church, compared with the restraint and suppression commonly observed in Eastern civilization, are to some extent developments of contemporary Jewish customs. Women moved freely about in society, and were present at the table of hospitality, though it cannot be shown that in Palestine they partook of the meals in common with men. They went up to the temple to worship, but were there limited to the privilege of using the 'court of the women,' and could not advance so near the altar as men were permitted to go. They united in the worship at the synagogue, apparently sitting by themselves apart from the male worshippers. Now that Conybeare has gone some way towards vindicating the *De Vita Contemplativa* as a genuine work of Philo, it is possible to appeal to that treatise as a witness to customs current in the time of Christ. The following extract describes the arrangements of public worship of the Therapeutæ or Egyptian Essenes:—

'And this common holy place to which they all come together on the seventh day is a twofold circuit, being separated partly into the apartment of the men, and partly into a chamber for the women; for women also, in accordance with the usual fashion there, form a part of the audience, having the same feelings of admiration as the men, and having adopted the same sect with equal deliberation and decision; and the wall which is between the houses rises from the ground three or four cubits upwards, like a battlement, and the upper portion rises upwards to the roof without any opening, on two accounts: first of all, in order that the modesty which is so becoming to the female sex may be preserved; and, secondly, that the women may be easily able to comprehend what is said, being seated within earshot, since there is then nothing which can possibly intercept the voice of him who is speaking' (*De Vit. Contemp.* 3).

The phrase 'in accordance with the usual custom there' shows that this participation in the Sabbath worship of men and women, but with some degree of separateness, was the common Jewish form of procedure. The illustration of a battlement, the upper portion of which reached the ceiling, indicated a wall perforated near the top with square holes. We cannot infer from this description that the separation was by the same means and to the same extent in the synagogues of ordinary Jews. All that is implied is that the sexes did not mingle in public worship, though they joined in the same acts of worship. In the simple room known as a *προσευχή* (Ac 16¹³) there could have been no elaborate barriers of separation. Paul and Silas seem to have entered freely into the society of Lydia and the other devout women at Philippi. No office in the synagogue appears to have been open to women. The limited education commonly enjoyed by all women but those of the wealthy and leisured class would necessarily debar them from much influence in intellectual regions. The Jews paid great attention to the education of children; but whenever we meet with an explicit statement on the subject we read only of boys. Thus Josephus says that Moses 'commanded to instruct children' (*c. Apion.* ii. 25), and 'we take most pains of all with the instruction of children' (*ib.* i. 12); but when he is more explicit he states that Moses prescribed 'that boys should learn the most important laws' (*Ant.* iv. viii. 12). Philo and the Talmud follow on similar lines (see Schürer, *HJP* II. ii. 27). The inference is that all young children were taught the elements of religion by their parents, but that when it came to the question of more exact instruction about the Law, in the synagogue schools, this was confined to boys.

1. *The Prominence of Women in the NT.*—Women come to the front with reference to the life of our Lord. This is especially the case in the Third Gospel, St. Luke delighting in gathering information concerning women and in showing their part in the Gospel story. It cannot be maintained that the Magnificat, though ascribed

to the Virgin Mary, was actually composed by her. It is more consonant with ancient literary custom to suppose that the evangelist supplies hymns of the Jewish or Christian Church to express the sentiments of the persons whom he represents as uttering them. But, while we may not venture to designate the mother of Jesus as a poetess, Anna is distinctly represented as a prophetess who spent all her time in worship in the precincts of the temple (Lk 2³⁶). Our Lord's teaching and healing ministry was carried on among women as freely as among men. The means for the support of Christ and His apostles appears to have been chiefly derived from the contributions of women: this was in accordance with custom, women sometimes contributing largely towards the support of Rabbis (see Plummer, *Intern. Com.* on Lk 8¹⁻³). Women were prepared to perform the last offices for the dead on the body of Jesus. In the early apostolic age it was to the house of a woman that St. Peter went, after his liberation from prison during the persecution by Herod, to meet a considerable group of disciples ('where many were gathered together,' etc., Ac 12¹³). We cannot infer that the whole Church was accustomed to meet in this house, as has been often assumed, for the majority were not present on this occasion, nor was St. James, since St. Peter says, 'Tell these things unto James, and to the brethren' (v. 17). At Joppa, Tabitha was a woman disciple highly honoured for her 'good works and alms deeds' (Ac 9³⁶). St. Paul's first convert in Europe was a woman, and he and his companions stayed at her house (18^{14, 15}). At Philippi, where this occurred, there were other women who laboured with the apostle (Ph 4²⁻³). Priscilla is mentioned before her husband in regard to their teaching of Apollos, as though she took the lead (Ac 18²⁶). Timothy's faith is to be encouraged with memories of his mother's and grandmother's earlier faith (2 Ti 1⁵). One NT Epistle (*viz.* 2 John) appears to have been written to a woman, though this is doubtful (see JOHN, EPISTLES OF). Women figure largely in the symbolism of the Apocalypse, e.g. 'the woman Jezebel, which calleth herself a prophetess' (Rev 2²⁰, see JEZEBEL, n.), the 'woman arrayed with the sun' (12¹⁶), the woman representing 'Babylon the Great' (17¹⁶).

2. *The Gifts of Women and the Exercise of them.*—There were no women among the Twelve Apostles, to whom special gifts of healing were given by our Lord. There is no proof that women disciples were not included among the Seventy (Lk 10¹⁻²⁰), but there is no evidence that there were any, and the nature of the mission renders it improbable. No miracle is ever attributed to a woman. Still, as there were women in the churches among whom gifts of healing were said to be distributed, and no exception in their case is named, it cannot be denied that they may have shared in these as in other gifts. No book of the NT claims to be written by a woman; but Harnack assigns the authorship of Hebrews to Priscilla. Women were present at the day of Pentecost when the gift of the Spirit was bestowed (*cf.* Ac 1¹⁴ and 2¹⁷), and must have shared in it, since St. Luke, referring to the whole company, says of the appearance of the tongues, that 'it sat upon each one of them' (2³). Its result was prophecy (v. 18), and prophecy is the specific gift, the exercise of which at Corinth by women St. Paul refers to (1 Co 11⁵), a gift which he prefers in honour to all others (14²). The apostle assumes that women prophesy and pray in the church, only directing that they do so veiled. A little later he orders women to 'keep silence in the churches' (14³⁴). This seems to imply that on further reflection he thought it not sufficient to protect their modesty that women should wear veils while

preaching or praying, and therefore forbade their exercise of the gift of prophesying in public at all. But observe, (a) this was at Corinth, a most dissolute city, where 1000 women were devoted to immorality at the shrine of Aphrodite on the Acrocorinthus, and therefore where it was most important to preserve the modesty of the Christian women from any suspicion or temptation; and (b) in the context of the second passage St. Paul does not again mention prophesying or praying, but says, 'It is not permitted unto them to speak' (λαλεῖν, which might be rendered 'talk'). This looks as though the apostle were now thinking of mere chattering, or, at best, questioning, especially as he adds, 'And if they would learn anything, let them ask their own husbands at home' (v. 22). The ground of the prohibition is more than the requirements of modesty; it is the idea of the subjection of married women to their husbands ('but let them be in subjection,' *ib.*). Possibly there was a temporary and local reason for this apostolic precept in the condition of the Corinthian Church at the time. The apostle's words suggest the idea that in some cases the new, large family brotherhood and sisterhood of the Church was threatening to submerge the original relationships of the home. That must be prevented. But that the apostle holds to a certain subjection of woman in general must be inferred from his appeal to Genesis (3¹⁶). This, however, is to be considered rather as a matter of order than a question affecting the spiritual status of women. When referring to the latter, St. Paul lays down the principle that in Christ 'there can be no male or female' (Gal 3²⁸). It has been said that the apostle was inconsistent with the principle here enunciated when giving his specific directions to the Corinthians (McGiffert, *Apost. Age*, p. 305). But he had also said 'there can be neither bond nor free' (Gal 3²⁸), and yet he sent the slave Onesimus back to his master (Philem 12). In both cases he supported established customs for the time being while enunciating great principles which would ultimately abolish them. Thus the NT leads to the emancipation of woman as to the abolition of slavery, not by sudden revolution from without, but by gradual evolution from within. St. Paul's lofty conception of marriage (Eph 5²²⁻³²), while including the subjection of women, involves the dignity of womanhood. Even under the restrictions required at the time, it is manifest that women enjoyed more liberty and were more on an equality with men in the church than in the synagogue. There could have been no such separation as Philo(?) describes. 1 Cor. plainly indicates that women took part with men at the *Agapé*. They must have been in view if it was requisite for them to be veiled. Their prophesying before the Church involves their being in the presence of the whole community. Doubtless, the sexes were so far divided as that the men and women sat in separate groups, since this was the custom in the churches of early patristic times. That the kiss of Christian brotherhood and sisterhood was not restricted between the sexes is plain from the fact that in later times it was subject to abuse, which led to the restriction being imposed upon it. Athenagoras (A.D. 177) quotes some apocryphal writing under the designation of 'the Logos' in rebuke of the abuse, which says, 'If any one kiss a second time because it gives him pleasure,' etc., and again, 'Therefore the kiss, or rather the salutation, should be given with the greatest care, since, if there be mixed with it the least defilement of thought, it excludes us from eternal life' (*Legat. pro Christianis*, 32). Clement of Alex. condemns 'the shameless use of the kiss, which ought to be mystic' (*Pedagog.* iii. 11). Tertullian remarks on the reasonable complaint of a pagan

husband that his wife should 'meet any one of the brethren to exchange a kiss' (*ad Uxor.* ii. 4). Accordingly the custom was altered, the earliest instance of the new regulations appearing in the *Apostolical Constitutions*: 'Let the clergy salute the bishop, the men of the laity salute the men, the women the women' (*Const. Apostol.* viii. 2. See *Dict. of Chr. Ant.*, art. 'Kiss').

3. *Offices held by Women.*—There were no women apostles. The elders were all men, in accordance with the invariable custom of the synagogue. It is given as a sign of the 'contempt' into which religion had fallen in the 5th cent., that women were found to be acting as priests at the altars, a complaint implying that this was an innovation previously unheard of (see *Dict. of Chr. Ant.*, art. 'Women'). Two offices are said to have been held by women in the NT Church—the office of the Deaconess and that of the Widow.—(a) **Deaconesses.** There is no certain description of the office of deaconess in the NT. We meet with deacons in Ph 1¹ and in 1 Ti 3⁸⁻¹², but without any clear reference to deaconesses, though in the latter passage deacons' wives are referred to; and there is mention of women in the course of the directions about the deacons (v. 11), and before the mention of their wives, which seems to suggest that women deacons are meant. Earlier than this, Phœbe of Cenchrea is called 'a servant of the Church' (Ro 16¹). The word is δiakonos, RVM 'deaconess.' In the earlier parts of the *Apostolical Constitutions* (ii. 28, iii. 15), ἡ δiakonos is the title of the deaconess; later we have διακονισσα (viii. 19, 20, 28). See Sanday-Headlam, *in loc.*, also Lipsius, who considers that Phœbe's work would be care of the sick and of strangers. The fact that she went with a letter of recommendation suggests that she was travelling in the service of the Church. She must have been a woman of wealth and social standing, which gave her importance apart from her office, as she is called *προστάντις*, i.e. 'patroness.' See PHŒBE. The earliest definite reference to deaconesses is in Pliny (*Ep.* x. 96), '*Quo magis necessarium credidi ex duabus ancillis, quæ ministræ dicebantur, quid esset veri et per tormenta querere.*' The title 'ministræ,' by which Pliny says these 'hand-maidens'—surely in a humbler position than that of Phœbe—were known, is the Latin representative of δiakonoi and διακονισσαι; the former of which titles would probably have been in use in Bithynia. There is nothing in the NT to identify the deaconesses with the 'widows' of the Pastoral Epistles; and if 1 Ti 3¹¹ refers to deaconesses, they must be in a distinct office, as they are mentioned apart from the widows, to whom reference is made later (5³⁻¹⁶). See Lightfoot, *Com. on Ph.*, Dissertation on Chr. Ministry, p. 189. We have no description of the work of deacons and deaconesses. But the significance of the title, pointing to service in distinction from the work of ruling entrusted to the elders or bishops, implies that they would have the care of the poor, 'serving tables' like 'the seven' (Ac 6²⁻⁴). The division of labour effected in the appointment of the seven is also implied in the Pastoral Epistles, since, while the bishop is required to be a capable teacher (Tit 1⁹), that is not said of the deacon; much less, then, could it have been required of the deaconess. Priscilla's instruction of Apollos, in conjunction with her husband, is not associated with any office.—(b) **Widows,** see WIDOW.

LITERATURE.—See the works named in the articles on FAMILY and MARRIAGE; also Peritz, *Woman in the Ancient Hebrew Cult*; W. R. Smith, *RS*; Stade, *Geschichte*; Schwally, *ZATW* xi. p. 176 ff.; Schechter, *Studies in Judaism*; Wellhausen, *Reise arabischen Heidentums*; Allen, *Christian Institutions*; Bartlet, *The Apostolic Age*; McGiffert, *Hist. of Christianity in the Apost. Age*; the *Internal. Critical Comm.* and the *Hand-Commentary* on passages referred to. W. F. ADENEY.

WOOD.—See GROVE, FOREST, TREE.

WOOL (רֶשֶׁת *zemer*; גֵּז, גִּזְזָה, Arab. *jazzah*, 'a fleece').—Wool was an important article of commerce (2 K 3⁴ [part of the tribute of king MESHAI], Ezk 27¹⁸), and woollen fabrics formed a representative element in Oriental wealth (Mt 6¹⁹, Jn 5⁵). It was also an indication of social rank (Mt 11⁸, Lk 7²⁵). The soft raiment (τὰ μαλακὰ) worn in kings' houses was not the rough homespun of the shepherd's cloak, but prob. like the close smooth-faced broadcloth still woven in the East, with native dyes in grey-blue, moss-green, and various brown and purple tones. Until recently the emirs of the Lebanon prohibited the peasantry from wearing such cloth. A many-folded Oriental suit of woollen cloth must have always been costly, and in modern use it is kept for high family occasions and religious festivals. Esau's 'goodly' garment was under his mother's personal charge (רֶשֶׁת גֵּז Gn 27¹⁵), and Tyrian cloth was valuable enough to be stored up as an ancestral heirloom (רֶשֶׁת Is 23¹⁵).

Great care had to be taken to protect woollen cloth from the ravages of moths (Is 50⁹, Lk 12²⁹). In Is 51⁸ mention is made both of the moth (רֶשֶׁת *ash*, Arab. *uththah*) and the worm (רֶשֶׁת *gās*, Arab. *gās*, Gr. *σῆς*). In Arab. the former is the small silvery moth, and the latter word indicates the destructive larvae.

The Israelites were forbidden to wear clothing made of interwoven wool and linen, called רֶשֶׁת שְׂאֵתֶנֶז. The context, Lv 19¹⁹ Dt 22¹¹, seems to indicate that the objection was to the mixture as such. The matter is the subject of discussion in the Mishna (*Kilaim* ix. 1), and Josephus briefly states that the reason was because such cloth of wool and linen was the special dress material of the priests (*Ant.* iv. viii. 11). It is one of the tit-bits of rabbinical conscientiousness to discuss whether a man wearing a woollen coat, of which the buttons are sewn on with linen thread, is wearing *sh'atnez*, and so breaking the Law.

Wool was the standard of lustrous whiteness (Ps 147¹⁶, Is 1¹⁸, Dn 7⁷, Rev 1¹⁴), as goats'-hair or sack-cloth was of intense black (Rev 6¹²).

G. M. MACKIE.

WORD (λόγος, ῥῆμα).—Commenting on Dt 8³, Philo says (*Leg. Alleg.* iii. 61), τὸ μὲν γὰρ σλόμα σὺμβολον τοῦ λόγου, τὸ δὲ ῥῆμα μέρος αὐτοῦ. The definition of ῥῆμα, as an isolated specific affirmation in contrast with λόγος, a connected whole, though for the most part tenable, cannot be universally accepted. In LXX both words are used indifferently as tr. of רֶשֶׁת, and sometimes λόγος is found, where on the ground of this distinction we might have expected ῥῆμα (Is 50⁴). In the familiar phrase, 'the word of the Lord came,' 'word' is rendered in the historical books, now by λόγος (2 S 24¹¹, 1 K 6¹¹ 12²³ 16¹ etc.), now by ῥῆμα (1 S 15¹⁰, 2 S 7⁴, 1 K 17⁸ 19⁹ etc.); but in the prophetic books (with the possible exception of Jer 1¹, where the translation is inexact) λόγος is invariably used to denote the message which God revealed to the prophet that he might declare it to the people in His name. It may be noted that, in referring to the call of the Baptist—'the word of the Lord came unto John' (3²)—St. Luke uses ῥῆμα. The choice of ῥῆμα may be accidental; or he may have done so designedly to mark the contrast between the word that came to the Baptist and the word (λόγος) proclaimed and revealed by Christ.

At a very early date, if not at the very beginning of the Church, ὁ λόγος was used κατ' ἐξοχήν to designate the special revelation of grace given in and by Jesus Christ (Lk 1², Ac 4⁴ etc.). Our Lord appears to have so described His message (Mt 13²⁰, Mk 4¹⁴). St. Mark thus summarizes the teaching of Jesus (2²). At the institution of the diaconate the

apostles characterize their own distinctive duty as a steadfast continuance in the ministry of the word (Ac 6⁴); it is represented as the exclusive subject and substance of the proclamation of the early missionaries of the cross (Ac 8⁴ 17¹¹ etc.); it is found in the earliest as well as in the latest of the Epistles of St. Paul (1 Th 1⁹, 2 Ti 4²). By describing the gospel in this way, the speakers or writers meant to imply that it was the perfect and authoritative word which was to supersede all other words that God had spoken to men. In relation to its origin it is the word of God (Lk 8¹¹, Ac 4³¹, 1 Co 14³⁶, He 4¹², 1 P 1²³); in respect of its method of communication it is the word of hearing (1 Th 2¹³, He 4²); as to its nature it is the word of the kingdom (Mt 13¹⁹), of truth (2 Ti 2¹⁵), of life (Ph 2¹⁶); it is pre-eminently the word of salvation (Ac 13²⁶), of reconciliation (2 Co 5¹⁹), the word of the cross (1 Co 1¹⁸). (See Cremer, *Bib. Theol. Lex.* pp. 392, 393; Trench, *N.T. Syn.* 289, 337). For Word in the personal sense see LOGOS.

JOHN PATRICK.

WORLD.—'The world,' in that meaning of the term from which others that are in use may be most clearly derived, denotes a system known to man through his senses, to which he himself on one side of his nature belongs, but from which, as a personal being, he can and usually does regard himself as distinct. It is a portion of the material universe, and may even stand for the whole of it where man's knowledge of nature is limited. It will be our chief aim in this article to examine the view taken in OT and NT of this material system, and of man's actual as well as his true relation to it.

i. IN OLD TESTAMENT.—עוֹלָם, which is commonly rendered 'world' both by AV and RV, is not a word of larger meaning than עָרֶץ 'earth'; indeed, so far as a distinction can be drawn between them, it has the narrower application. [Cf. art. EARTH, and see esp. Pr 8³¹ עָרֶץ עוֹלָם = RV 'his habitable earth,' also Job 37¹⁷]. The two words constantly occupy the corresponding places in the parallelisms of Heb. poetry (Ps 19⁴ 24¹ etc.). עָרֶץ occurs only in poetry, and the word 'world' may have been thought to have somewhat more poetic associations, and have been adopted for this reason to translate it. עוֹלָם is never rendered by 'earth' either in AV or RV; עָרֶץ is rendered by 'world' only at Ps 22⁷, Is 23¹⁷ 62¹¹, and Jer 25³⁶ in AV, and only at Job 37¹⁷, Is 23¹⁷, and Jer 25³⁶ in RV. In these last two places 'earth' was reserved to tr. עָרֶץ].

There is no single word in OT which describes the material universe, even as it was conceived by the Hebrews. The phrase 'heaven and earth' is used to convey that notion (Gn 1¹, Ps 89¹¹, Jer 10¹² 51¹⁵ etc.). Both עָרֶץ and עוֹלָם are also distinguished from the seas or the sea (Gn 1¹⁰, Ps 98⁷).

Heaven and earth by their vastness and stability, and by the rich variety, excellence, and beauty of that which they contain (cf. the expression 'the fulness of the world' and 'of the earth,' Ps 50¹² and 24¹ etc., as also 'the sea and its fulness,' Ps 98⁷); the sea kept under firm restraint for all its raging; the sun, moon, and stars observing their regular times and seasons, were felt to be constant witnesses to the power and wisdom of God, of Jehovah the God of Israel, who is the Creator and ruler of all (Am 4¹³ 5⁸, Is 48¹³ 51¹², Jer 5²² 10¹² 51¹⁵, Ps 19¹⁻⁶ 24¹⁻² 8. 33⁶⁻⁹ 29. 89¹¹ 93. 95⁴⁻⁵ 104). To their testimony even the heathen might be expected to pay heed (see esp. Ps 19¹⁻⁶). In this sense even inanimate things praise God (Ps 96¹⁰⁻¹² 98⁸⁻⁹ 148). Moreover, His care for His creatures was recognized, as shown in the regular provision which He has made for their sustenance. He is their guardian, the source of life and happiness to all

living things (Gn 8²², Ps 33⁵ 36⁵⁻⁹ 65⁵⁻¹³ 103⁴ 104²⁷⁻³⁰ 147⁸⁻¹⁷, Job 10¹²). But He was believed, too, to manifest Himself in a special manner in the more exceptional and terrible aspects of Nature, in storm and earthquake, in drought and pestilence. By means of these He had fought and was expected to fight on the side of His own people against their enemies (Ex 15, Jg 5²⁰⁻²¹, Am 9⁵⁻⁸, Ps 18⁷⁻¹⁵ 48⁶⁻⁷ 68⁷⁻⁹ 76³⁻⁹ 77¹¹⁻²⁰ 78, 83¹³⁻¹⁶ 97³⁻⁶ 105, 106⁷⁻¹⁰ 111, 114, 144⁵⁻⁸), or punished Judah and Israel (Am 4⁶⁻¹¹) or individuals (Ps 107) for their sins. Those proofs of His presence and operation which are regular, and those more unusual ones where there has evidently been some particular end in view, are remarkably brought together in some passages (Ps 74¹³⁻¹⁸ 89¹⁰⁻¹⁴ 136).

With the rise and development of the doctrine of WISDOM, interest in Nature was greatly stimulated, a more careful observation of particular facts, and even a certain kind of speculation upon her laws, were encouraged, but all under the guidance of a strongly religious spirit (Pr 8²²⁻³¹, Job 28⁷⁻¹⁴ 28, 36²²⁻³⁹, 40⁶⁻⁴¹. Comp. Wis 7¹⁷⁻²², Sir 43. A similar bent may be noted in a work belonging to another class of literature, En. 72-82 and 2-5).

So far we have spoken of the impression made upon the minds of devout and inspired Heb. prophets, psalmists, and philosophers by the contemplation of that order of which the earth forms a part. But the earth itself was specially thought of by them as the spacious dwelling-place of mankind, divided into its many races, tribes, and kingdoms. [See such expressions as 'kingdoms,' 'peoples,' 'inhabitants' of 'the earth,' or 'the world,' Gn 22¹⁸, Jos 4²⁴, 2 K 19¹⁵⁻¹⁸, Is 26⁹⁻¹⁸ 37²⁰ etc.]. Hence, further, both עֲרֶץ and אֶרֶץ (ה) are used by themselves for mankind, which is capable of doing right and wrong and of knowing God, and which shall be judged by God (Gn 6¹¹, Ex 9¹⁶, Nu 14²¹, Gn 18²⁵, 1 S 2¹⁰, Ps 2⁸, Is 38¹¹, Ps 9⁸ 10¹⁸ 33⁹ 96¹³ etc.). But when we speak of mankind in these relations we must beware of thinking primarily of a collection of responsible individuals, as from our modern habits of thought we may be apt to do. In accordance with the point of view of the OT, 'the earth' in this use of the term must be understood to mean 'the nations of the earth'; the judgment of nations and the homage that should be paid by the nations generally to the God of Israel are intended in the passages in question. 'Earth' is also used in a sense akin to our phrase 'human society' in Ps 75³ ('the foundations of the earth' = 'the principles on which human society rests'; cf. Pr 30²¹). In the following places, however, it seems to describe men as men—Jos 23¹⁴, Is 24¹⁸⁻²⁰ 26¹⁸, Jer 50⁴⁶ 51²².

The last-mentioned use may possibly be associated with the idea of man's origin (Gn 2⁷ and 3¹⁹, Ps 146⁴), though it is to be remembered that in these places the words used are אָדָם and אָדָם. But at Ps 10¹⁸ the expression אָדָם מֵאֶרֶץ 'mortal man from the earth' may most naturally be explained thus. The little value of man and his transitoriness are in this way brought home to the mind. No moral signification seems to attach to this 'earthiness' of man. It does not imply earthliness of aims and principles. On the other hand, a notion analogous to this is suggested in at least one passage (Ps 17¹⁴) where another word עָלָם, sometimes translated 'world,' in sense of *time* (Arab. *ḫalāḍa* 'abide,' 'endure') is used. [At Ps 39⁵ 89⁴⁷ and Job 11¹⁷ it is rendered 'age,' 'time,' 'life'; but at Ps 17¹⁴ 49¹ and Is 38¹¹ (implying here עָלָם for עָלָם) 'world' both in AV and RV. In the former of these passages, however, 'mortals of time' would give a good sense]. An excessive devotion to the things of this present life, which are the things of sense, is here indicated such as to

constitute a type of character. This is an interesting anticipation of NT thought. Another point of interest is the analogy between the use of עָלָם, a word denoting time, and the subsequent use of אֱלֹהִים. Another word עָלָם, to the meaning of which אֱלֹהִים still more closely approximates, is also translated 'world' at Ec 3¹¹ AV and RV (not RVM). In later Hebrew it did bear at times this sense, but it is more than doubtful whether it has it here. (See esp. the commentaries of Nowack-Hitzig in the *Kurzgef. Com.*, and E. H. Plumptre, in *loc.*).

ii. APOCRYPHA.—In the Books of Wisdom and 2 Maccabees we are introduced to the important word κόσμος in the sense which it acquired among the Greeks through philosophic usage. The LXX of OT has the word, but only in its earlier meaning of 'adornment,' or as a rendering of עֲרֶץ 'host' (Gn 4¹, Dt 4¹⁹ etc.); while עָלָם and אֶרֶץ are there translated by γῆ and οἰκουμένη (ἡ) almost always by γῆ, and אֶרֶץ by οἰκουμένη; there are, however, a few cases in which these renderings are interchanged, all in Isaiah). But in the Apocrypha, i.e. in the two books of the Apocrypha above mentioned, it occurs repeatedly as a name for the material universe, which is its most common signification there. The Most High is again and again described by such phrases as 'the Creator of the world,' 'the Ruler of the world.' For the word in this sense comp. Plato, *Gorgias*, 503; Aristotle, *de Mund.* 2. The thought of order, and of the beauty arising therefrom, which the word by its derivation suggested, is naturally associated with this application of it, and may well have been present to the mind of the author of the Book of Wisdom in his use of it at 11¹⁷. Other passages, interesting in connexion with his view of the κόσμος, are 1¹⁴ and 7¹⁷. In 5²⁰ and 16¹⁷ reference is made to the co-operation of the world, i.e. the forces of nature, in the work of moral retribution and the defence of the righteous, in full agreement with OT thought, though the language is somewhat different. Man's birth is described as an entry into the world, 7⁶ (some MSS, however, read βίωσ). The position assigned to him in it is, in accordance with Gn 1²⁸⁻²⁹, Ps 8⁶, that he should 'rule the world—διέστη τὸν κόσμον—in holiness and righteousness' (9⁹). For this reason, too, it would seem, Adam is somewhat strangely called 'the first-formed father of the world' (10¹). But the world has, through human perversity, become the scene of idolatry and moral corruption, and therewith death has been admitted into it, though this is attributed to the envy of the devil (14¹²⁻³¹ 22⁴, cf. Ro 5¹²).

There does not seem to be a passage in which κόσμος, either in this book or in 2 Mac., denotes mankind exclusively, for at Wis 6²⁴ where the world is said to be benefited by the large number of the wise, and at 14⁶ where the ark is spoken of as 'the hope of the world,' the whole of creation may be thought of as associated with men.

Before passing from the Apocrypha we may observe that in Wis 13⁹ there is a use of αἶψα which may help to show how it came to have at times almost the sense of 'world.'

iii. NEW TESTAMENT.—We have noticed one or two places in the Book of Wisdom in which κόσμος appears to denote simply this earth and its inhabitants. Two interesting examples are referred to by Liddell and Scott (*sub voce*) of the use of the word in much the same way in public inscriptions of the end of the first or beginning of the 2nd cent. A.D. Nerva is called σωτήρ τοῦ πάσης κόσμου, and Trajan σωτήρ τοῦ κόσμου. See Boeckh, *CIG* 1306, 334. In NT many more instances of its having this meaning will come before us, as well as of other meanings which arise out of this one. It is necessary to ask at once whether we ought to

attempt to carry the original meaning of 'order' through all these applications of the word [Westcott, Comm. on *Gospel according to St. John*, Additional Note at end of ch. 1, on κόσμος, tries to do this]. Its sense is not anywhere restricted to denote the earth in classical literature. It is there used sometimes of the heavens alone; and indeed there is reason to think that the Pythagoreans, who are credited with having been the first who employed it to express a philosophical conception, applied it thus. And we can readily understand that the heavenly bodies with their regular motions might impress them with their order and beauty. The earth, too, might well come to be included under the term κόσμος, as forming one member of a great system in which there was true relation of parts. But it is not so easy to see how by itself it could have been regarded as 'an ordered whole.' It must be remembered that the ancient mind was not penetrated as the modern is with the thought of law in nature. On the other hand, the possibility that the 'cosmopolitanism' of the Cynics and Stoics influenced common speech is not to be overlooked. Yet it should be observed that their phrase κόσμον πολίτης had a different force from that which 'citizen of the world' has to our ears. In the mouth of the Stoic it expressed the conviction that the universal system and law, the polity of the great City of Zeus, in which every man had his own place, conditioned his life and determined his obligations. To the Cynic, on the other hand, —if we may take the passage in Lucian, *Blow πρᾶσις* §§ 7-10, as a correct representation of the teaching of Diogenes and his school,—it meant, indeed, that he was unfettered by ties of country and could make his home anywhere, but the reason for this was that his life was composed of the simplest, most universal elements. The saying attributed to Socrates by Plutarch (*Περὶ Φυγῆς*, § 4, 600 f.)—that he was himself not Athenian nor Hellene, but citizen of the world (κόσμιος)—should also be compared, where in the context Plutarch quotes the saying of Plato that man is οὐράνιος. The use of κόσμος with that particular limitation of its meaning which we are considering may have been facilitated in a measure by this language of the schools. To a still greater degree, probably, it was due to the fact that the earth seemed, especially perhaps to the Hebrew mind, to be incomparably the most important part of the created universe, to which the heaven with its lights, properly speaking, belonged, as a canopy over it. But the question for us is, not so much what the history of this usage was, but whether the notion of order was usually present to the mind of those who employed it as the NT writers do. We can conceive that it might have been to that of St. Paul (cf. Ac 17²⁴), but it does not seem probable in the case of others, and indeed the idea is not suggested in connexion with the term κόσμος by any context in which it is used, even in St. Paul's Epistles. And when our world was viewed in its ethical aspects it seemed to Christian apostles to be, not a realm of order but a scene of disorder; and their teaching substantially is, that it could not be an order while God was left out of account, though there is no evidence that they formulated their thought to themselves exactly in this way.

We have seen what range of meaning γῆ and ὕψος have in OT, and have observed that γῆ and οἰκουμένη are used in LXX to render them. In connexion with the meanings of κόσμος it is not unimportant to notice that there are in NT parallel or closely similar passages in one of which γῆ or οἰκουμένη is found, and in the other κόσμος. Comp. Mt 4⁹ with Lk 4⁹, Mt 24¹⁴ and 26¹³, Mt 5⁵ with Ro 4¹³, Jn 3³¹ and 8²². Yet, even though κόσμος at times seems to have much the

same meaning as γῆ or οἰκουμένη in many passages of LXX, it was felt to be a preferable word for many purposes. In spite of the usage of LXX there was danger of confusion in employing οἰκουμένη, which was applied by Greeks and Romans specially to the Græco-Roman world. [This word occurs most frequently in the writings of St. Luke, and most often with the meaning just indicated]. Κόσμος may also more readily have suggested a comprehensive idea, so as to include more at least than γῆ did; it suggested the idea of a whole, if not necessarily of an ordered whole. The philosophical associations which still clung to the word also made it more suitable when the intention was to signalize certain principles which underlay and governed the entity in question. It may be observed that οἰκουμένη occurs but once in St. Paul's writings (Ro 10¹⁸), and there in a quotation from LXX; γῆ also is met with there comparatively rarely.

We proceed to review the use of κόσμος in NT more in detail. Our object in doing so will be to mark differences between various writers, and also to some extent in the same writers, in the denotation of the term, and in the conception implied when that which is denoted is the same. It will be seen that there are instances in all the chief groups of writings of its standing for (1) the material universe, (2) our world as containing mankind, but without the connotation that the world or men have certain ethical characteristics. The ethical signification of the word appears to be confined to the Epp. of St. Paul, the Gospel and Epp. of St. John, the Ep. of St. James, and 2 Peter; though there is a possible exception when the kingdoms of the world and their glory are offered as a temptation (Mt 4⁸), and the possession of the whole world is compared with the true interests of the soul (Mk 8³⁶, Mt 16²⁶, Lk 9²⁵); we may in these places be intended to gather that worldly dominion and wealth are even of themselves dangerous to the soul. Further, we ought to be better able to form for ourselves a clear and complete view of the conception as a whole presented in the teaching of NT and in individual writers, after marking aspects of it which are severally prominent in particular passages. The idea thus obtained we must take with us in order that we may fully feel the force of other passages. This is specially true in the case of St. John's writings. Thus, when in Jn 13¹ it is said that the hour had come that Jesus 'should depart out of this world unto the Father,' and that He had 'loved his own which were in the world,' some thought of what the world is must have been present to the mind of the evangelist. It is, moreover, obvious that where St. John uses the word in successive, or nearly successive, clauses or sentences—as he does again and again in chs. 14-17—though from each occurrence the same notion cannot be gathered fully, it would be a mistake to regard them disconnectedly. The word has one meaning in the thought of the writer, though he may not be equally conscious of all its elements at every moment, and though he is still less able to convey the whole of it at once to others, but lights up first this, then that part of it, after his characteristic manner.

1. The material universe, the heaven and earth which were created at the beginning, most frequently in the phrase αὐτὸ κατισχυλὸς κόσμου, or others similar to this, Mt 24-1 25³⁴, Lk 11⁵⁰, Jn 17²⁴, Ro 12², Eph 1⁴, 1 P 1²⁰, He 4³ 9²⁶. In Jn 11⁹ we read of the natural light of this world; in 1 Co 8⁴ 14¹⁰ ὁ κόσμος seems to be equivalent to the Latin phrase *in rerum natura*.

1 Co 4⁹ belongs, perhaps, here. Angels are added probably as distinguished from the world; men, on the other hand, as a particular and important part of it.

2. The earth, but rarely without reference to that which it contains, and especially to its human inhabitants.

(a) The scene of human life, the abode of mankind, Ro 5¹² 13, 2 Co 1¹², Eph 2¹², 1 Ti 1⁶ 6¹⁷, He 10⁵, 1 P 5⁴, Jn 1⁹ 6¹⁴ 11²⁷, 1 Jn

41.2.17. In Jn 21²⁵ little more seems to be implied than the extent of space included.

(b) The earth, together with all the treasures it contains, and including, no doubt, dominion over men, Mt 4⁸, Mt 16²⁶=Mk 9³⁶=Lk 9²⁶, Ro 41³, 1 Co 32².

(c) The scope appointed for the work of the missionaries of the gospel; it is to be preached throughout the world: Mt 514 18²⁸, Mt 2613=Mk 14⁹, Mk 1613, Ro 1⁸, Col 1⁶, Ph 214, 1 Ti 316.

3. Idiomatic and peculiar uses—

(a) A rhetorical expression for the great majority of people in a particular place, as in French, 'tout le monde,' Jn 1219.

(b) Equivalent almost to the modern phrase 'the public.' 'Show thyself to the world' = 'court publicity,' Jn 7⁴, cf. 18²⁰.

(c) Means of sustenance for the body is called *βίη τοῦ σώματος*, 1 Jn 317.

(d) 'The tongue of a world of iniquity,' Ja 3⁶.

(e) The world before the Flood, He 117, 2 P 2⁵ 3⁶. The population of the world, then, and its accumulations of wealth and the products of its labour are no doubt chiefly in view; yet the comparison in 2 P 3⁶ with 'the heavens and the earth that now are,' suggests a sweeping away at that time of the old order of nature.

4. The term used with ethical significance.

(a) As material and transitory the world presents a contrast with that which is spiritual and eternal. In this way St. Paul seems to regard it in the very important passages Gal 4³ 6⁴, Col 2⁸ 20. So we gather from comparing them together and from their contents (see Lightfoot, *in loc.*). The instances with which the apostle is dealing illustrate the general principle to which he refers. The Law and its ordinances belong to an external sphere. Now things outward (= 'the things that are seen' of 2 Co 418) have for St. Paul lost all their value through Christ's death, in comparison with the things spiritual, and this ought to be the case with all Christians. He is not thinking of the world as evil. Indeed the Law, which is 'of the world' in the sense defined, has been used by God for the rudimentary instruction and discipline of the Israelites, and so may other things which are of the world be used. Elsewhere, also, he allows for a certain use of them, which must, however, be sparing and kept in strict subordination to higher considerations, 1 Co 7³¹ 34; cf. Lk 12³⁰. This view of the world is hardly to be traced in St. John's writings; a darker one appears, we shall find, there, upon which St. Paul dwells less.

(b) Devotion to the things of the world produces a certain temper of mind, which under the sense of loss is manifested in that 'sorrow of the world' which is not 'according to God,' 2 Co 710. There is a scale for estimating men and things, which may be in a measure true relatively to the things of this world, but which is, to say the least, altogether incomplete, 1 Co 12² 23 413, Ja 2⁵. The world has a fancied wisdom which does not know God, 1 Co 120 21 319, Jn 110; it cannot receive the Spirit of Truth, Jn 1417. There is, in short, a spirit of this world, 1 Co 212. Those in whom this spirit is described as being 'of the world' or 'of this world' (Jn 8²⁹, 1 Jn 4⁴ 5); and, by contrast, Christ's disciples as 'not of the world' (Jn 151¹⁹ 171¹; cf. also 1 Co 510 and 1123).

The state of the world arising from the influence of this spirit is one of dire moral corruption, Eph 2², 1 Jn 215-17, Ja 127 44, 2 P 14 220.

(c) The world denotes the mass of men who are hostile to the truth and to the followers of Christ, or at least indifferent to it and them, Jn 77 1630 33, 1 Jn 31 34 45.

(d) The world is dominated by the Evil One, Jn 12³¹, 1 Jn 4⁴ 510.

(e) The world as the object of judgment and of saving mercy, Ro 3¹⁹ 1112 15, 1 Co 6², 2 Co 519, Jn 129 316-19 423 633 31 512 36 90-124 47. Primarily, of course, men are the objects of judgment, and that individually. But this is not all that is meant. In view of the general use of the term *κόσμος* and of OT language, we must think, also, of a judgment upon mankind collectively, and on the manner of life and environment which it has made for itself, and in a sense, too, on the whole creation with which it is so intimately connected; and so also with regard to salvation (cf. Ro 819c).

(f) The Holy Spirit has a special office in regard to the world, distinct from that which He exercises towards believers (Jn 1613-11).

(g) The Christian can through his faith overcome the world; i.e., no doubt, alike its spirit in himself, the opposition of worldly men, and the world's ruler (1 Jn 4⁴ 54-5).

5. The word *αἰών*—which signifies properly a period of time, but a much longer one than we mean by an age, probably indeed the whole period during which the present order of nature has continued and shall continue—is used in many places with much the same connotation as 'world.' It is often rendered by this word both in AV and RV, though by 'age' in RVm and at He 6³ in RV. *Αἰών* and *κόσμος* are brought into close connexion at 1 Co 12² and Eph 24 3. This 'son' is contrasted with that which is to come (Mt 123, Mk 1030, Lk 1820, He 6³). We read of its cares (Mt 1322=Mk 419); its sons (Lk 163 2034); its rulers, i.e. the kings and great ones of the earth (1 Co 24 8); its wisdom (1 Co 120 26 322); its fashion, to which the Christian must not be conformed (Ro 122). It is evil (Gal 14), and under the dominion of the Evil One (2 Co 44). This use of *αἰών* with an ethical signification is not difficult to understand, easier indeed than the corresponding and commoner one of *κόσμος*. It is otherwise with the expression at He 12 *παύσηται τοῦ αἰῶνος*. Here *αἰών* seems to mean 'the sum of the "periods of time," including all that is manifested in and through them' (see Westcott, *in loc.*). But to regard creation primarily with reference to time, and not

merely to time as a general condition, but to periods of time, is not natural for us; it would seem to have been more so for the Hebrew mind (cf. the Rabbinic use of *olam*). It may be worth while to note that the original sense of the Eng. word 'world' by its derivation is 'age of man.' In the Gospel and Epp. of St. John and the Apocalypse *αἰών* occurs only in the phrase *εἰς τὸν αἰῶνα* and similar expressions.

The conception of the world which we have been considering is characteristic of Christianity. There is nothing like it in the philosophy or religion of Greece and Rome. It differs widely also from the belief found in the various forms of Gnosticism, in Manichæism, or Neoplatonism, and in Oriental systems to the present day, that matter is essentially evil, or necessarily at best a hindrance and burden to the spiritual nature. From the Christian point of view things material constitute indeed a grave danger owing to the misleading fascination which they have for the minds of men, strengthened, as it is, through the subtle influence of habits of thought and opinions which have grown up in human society, and which are based upon a false estimate of the value of the wealth and honours of this world. To such an extent are men governed by wrong motives and aims in this respect, that any one who, with singleness of purpose, sets himself to act with reference to God and His glory is likely to feel himself more or less alienated from and placed in a position of antagonism to his kind. The little handful of Christians in the first age must have experienced this sense of estrangement with peculiar acuteness. But at the same time they had been taught, and they believed, that the world in its origin came from God, and also that, bad as its present condition was, it was salvageable—that alike the men who are of it and the things that belong to it may be redeemed from sin and sinful uses and consecrated to the glory of God.

In conclusion, we may observe that the order of nature is appealed to in NT as well as in OT in proof of the existence, the power, and the goodness of God (Ac 1417, Ro 1²⁰), but the same stress is not laid upon the more exceptional phenomena as signs of His presence.

LITERATURE.—Art. on *κόσμος* in Cremer's *Bibl.-theol. Lexicon*; Westcott's *Commentary on St. John*, Additional Note at end of ch. 1.
V. H. STANTON.

WORM.—The following Heb. words are tr. 'worm' in AV. 1. *q̄p sās, sās, tinea* (Is 51⁹), is undoubtedly the same as the Arab. *sās*. It is the grub of the moth, *āsh*, Arab. *uth*, mentioned in the same passages. See MOTH. 2. *רִמְמָה rimmāh*=maggots, bred in putrefying vegetable (Ex 16²⁴) and animal (Job 7³ 171⁴ 21³⁰ 24²⁰, Is 14¹¹) substances. Once man is declared to be such a maggot (Job 25⁶). 3. *תֹּלַע tōlē'ah, tōlē'ah, tōlē'ath*: (a) a maggot, generated in putrefying vegetable (Ex 16²⁰) and animal (Is 14¹¹ 66²⁴) substances; (b) a worm which gnaws and blights plants (Dt 28³⁰, Jon 4⁷). The number of these is very large in the Holy Land; (c) figuratively to denote the weakness of man (Job 25⁶, Ps 22³, Is 41¹⁴). *תֹּלַע* and *רִמְמָה* are used also of the *coccus* (see CRIMSON, SCARLET). Earth worms do not seem to be included in the meaning of any of the above names. The term 'worms' (AVm 'creeping things,' RV 'crawling things') of the earth; *רֶמֶס רָמִים, LXX σείοντες γῆν* (Mic 7¹⁷), is probably generic for all reptiles and worms which burrow in the ground. It certainly does not refer to any genus or species. The worms of which Herod died (*σκώληξ*, Ac 12³) may have been maggots bred in a gangrenous mass. Josephus says that he died five days after he was smitten. *Σκώληξ* is also mentioned in Apocr. (Sir 10¹¹ 19¹, 1 Mac 2²⁰).

G. E. POST.

WORMWOOD (*לְאֵנָה la'ănāh*).—A generic word for the species of *Artemisia*. It is always spoken

of as a bitter and deleterious plant. The root, in Arab. and perh. in Heb., signifies 'to curse,' *La'dnah* is mentioned with gall (*rōsh*, Dt 29¹⁸, Jer 9¹⁵ 23¹⁵, La 3¹⁰, Am 6¹³). It is the summing up of the career of a strange woman (Pr 5⁴). Figuratively it signifies calamity (La 3¹⁵) and injustice (Am 5⁷). The great star which fell from heaven (Rev 8¹¹) is called 'Wormwood' (*Ἀψυθος*). In point of fact, the excessive dread which the Hebrews had of most bitter substances was founded not on clinical experience but on prejudice. Camels, at least, eat more or less of the species of *Artemisia*, of which there are five in Palestine and Syria, all known in Arabic by the name *bu'aiterān*. They are *A. monosperma*, Del. (Arab. *'adāh*), *A. Herba-Alba*, Asso. (Arab. *shih*), *A. Judaica*, L., *A. annua*, L., and *A. arborescens* (Arab. *dhokn-esh-sheikh*). They are composite plants, mostly of the interior tablelands, esp. of the deserts. Their growth in desolate places, added to their bitterness, gave them their bad reputation. G. E. POST.

WORSHIP, both as subst. and verb, was formerly used of reverence or honour done to men as well as to God, and so occurs in Lk 14¹⁰ 'then shalt thou have worship in the presence of them that sit at meat with thee' (δῶξα, RV 'glory'). The word is a contraction of *worship* (from Anglo-Sax. *weorth* 'worth,' with the suffix *scipe*, Eng. *ship*, Ger. *schaft*, akin to *shape*). It is used of men in earlier versions frequently. See Driver, *Par. Psalt.* s.v. for the Pr. Bk. Psalms. Cf. also for the subst., Wyclif, *Works*, iii. 156, 'Men abstenen in werre, with myche fastyng and payne, to wynne worship of the worlde and to anoye hir enmyes'; Nu 24¹¹ Tind. 'I thoughte that I wolde promote the unto honoure, but the Lorde hath kepthe the backe from worshepe'; Job 14²¹ Cov. 'Whether his children come to worships or no, he can not tell.' And for the verb, Jn 12²⁶ Wyc. 'If ony man serue me, my fadir schal worship hym'; Pr. Bk. *Marriage Service*, 'With my body I thee worship.' J. HASTINGS.

WORSHIP (IN OT).—See PRAISE (IN OT) and TEMPLE.

WORSHIP (IN NT).—Christian worship grew out of the Jewish synagogue worship, to which, in its early forms, it bore considerable resemblance. Our Lord with His disciples visited the synagogues at Capernaum (Mk 1²¹ 3¹) and Nazareth (Mk 6²); and, as He preached in the synagogues of Galilee generally (Mk 1²⁹, Lk 6⁵), He must have taken part in the public worship. When St. Paul was on his missionary tours he invariably sought out the synagogue, or, if that were wanting, the *proseuchē* (Ac 16¹³), no doubt joining in the Jewish worship. See SYNAGOGUE. It was only by degrees that Christian worship came to supersede synagogue worship in the Church. At first the meetings of the Christian brotherhood, which of course were held in private, were quite distinct from the Sabbath worship, and Jewish Christians would go to the synagogue on the Saturday and to their own meeting on the Sunday. The Epistle of St. James seems to imply that the community there addressed consisted of the worshippers in some synagogue who had accepted Christianity as a body, and who then continued to meet in the building, but as a Christian Church, so that the writer, referring to the place of worship where the Church assembled, could call it 'your synagogue' (Ja 2²); but von Soden understands the word συναγωγῇ here to mean 'assembly,' see *Hdcom.* in *loc.*; Bennett allows that it may mean the Jewish place of worship 'if the Epistle is very early,' though preferring 'assembly' as RVm, see *Century Bible*, in *loc.*). The separation of Christian from Jewish

worship was brought about under various influences, viz. (1) Jewish antagonism, leading to the expulsion of the Christians from the synagogue; (2) Church development, giving more importance to the worship carried on in the Christian assembly and stamping it with an individual character, thus rendering attendance at the Jewish synagogue superfluous and incongruous; (3) the conversion of the heathen on the lines of Pauline liberalism, dispensing with circumcision, so that the Gentile Christians could not be regarded as proselytes to Judaism. As these free Hellenistic Christians increased in number, and before long became the majority of the Apostolic Church, the necessity for maintaining Christian worship quite apart from the synagogue would be apparent to all but the narrow Judaizers.

i. **TEACHING AND PRACTICE OF JESUS CHRIST.**—The only worship that our Lord expressly required was private worship, as when He warned His disciples against the Pharisaic ostentation of praying 'in the synagogues [private prayers] and in the corners of the streets, and bade them enter their 'inner chamber' and pray to their 'Father which is in secret' (Mt 6⁶). His teaching about prayer deals with the subject of personal prayer, encouraging individual faith with regard to specific petitions (e.g. Lk 11¹⁻¹³). In one place He commends the united prayer of two persons for a common end (Mt 18¹⁹); but this refers to a special emergency, and has no bearing on public worship. On the other hand, He assumed that His disciples took part in public worship; He did not need to command a universal practice which He sanctioned by Himself following it. Whenever our Lord's own praying is referred to, this is not connected with public worship. Most frequently it is associated with mountain solitude. In this worship He was either entirely alone or praying by Himself in the presence of disciples rather than praying with them. Still, is it quite accurate to say that He never prayed together with other men? Must He not have done this in the synagogue? The incident of the woman of Samaria contains His most significant utterance on the subject of worship, in which He denies the peculiar efficacy of sacred places (Jerusalem claimed by the Jews, Gerizim claimed by the Samaritans), and affirms that, for the future, worship must be 'in spirit,' i.e. internal, not merely in external functions, and 'in truth,' i.e. in accordance with the nature of God and our true relations with Him as at once 'Spirit' and 'Father' (Jn 4²³⁻²⁴). That this teaching influenced the Church, rendering the dedication of sacred buildings superfluous, is apparent from Justin Martyr's answer to Rusticus (c. 165 A.D.) who had inquired, 'Where do you assemble?' Justin said, 'Where each one chooses . . . because the God of the Christians is not circumscribed by place; but, being invisible, fills heaven and earth, and everywhere is worshipped and glorified by the faithful' (*Martyrdom*, 2).

ii. **APOSTOLIC TEACHING AND CUSTOM.**—As the Church gradually emerged from the synagogue specific Christian worship, as distinguished from the customary Jewish worship, came to be shaped on lines indicated by the principles of the new faith.

(a) *Times.*—The NT contains no regulations concerning stated days and hours for worship. In so far as Jewish Christians still followed the law and customs of their people, they observed the Sabbath and the great feasts. St. Paul frequented the synagogues on the Sabbath (e.g. Ac 13¹⁴, 44 16¹³ 17²); much more must this have been the case with less liberal Jews in the Church. St. Paul also took some account of the annual festivals, e.g. desiring to be at Jerusalem for the

Pentecost (Ac 20¹⁶, 1 Co 16⁸). But he held himself to be free from any obligation in regard to sacred seasons, and never laid any such obligation on his converts, even bidding the Colossians let no man judge them 'in respect of a feast day or a new moon or a Sabbath-day' (Col 2¹⁶). The Galatians are rebuked because they 'observe days, and months, and seasons, and years' (Gal 4¹⁰). But, while no especial sanctity of seasons was recognized by St. Paul, of necessity a certain periodicity was requisite for public worship in the Greek as well as in the Jewish Church. At Jerusalem, over and above the temple worship, which they shared with other Jews, the disciples had their own private assembly. As no mention is made of their attendance at the synagogue, though the temple is named, it seems probable that they gave up this custom in Palestine—perhaps from the time when Jesus was expelled from the synagogue. Thus a necessity would arise to institute some worship in its place. But that was never done formally, nor did it come about suddenly. The Christian worship arose from another cause; it grew out of the fellowship of Christian brotherhood. The origin of this worship is indicated in the statements that the new converts—doubtless associated with the older Christians—'continued steadfastly in the apostles' teaching and fellowship (*κοινωνία*), in the breaking of bread and the prayers' (Ac 2⁴²); that 'day by day, continuing steadfastly with one accord in the temple, and breaking bread at home, they did take their food with gladness and singleness of heart, praising God,' etc. (v. ⁴⁶). This seems to imply a daily meeting, which must have been early in the morning or at night, so as not to interfere with the common work of life. Probably the statement applies only to the time of primitive enthusiasm. We meet with nothing of the kind later. The custom of the Church, both Jewish (cf. Jn 20¹⁹ and v. ²⁶) and Greek (Ac 20⁷; 1 Co 16²), was to meet on the first day of the week. See LORD'S DAY. The NT contains no reference to any yearly Christian festivals. The Paschal controversy in the 2nd cent. reveals a very early practice of keeping Easter, and Polycarp's association with St. John seems to connect this with apostolic times, especially as the apostolic precedent is cited. Irenæus states that Polycarp, visiting Rome in the time of Anicetus (c. 155 A.D.), 'had always observed it [i.e. on the 14th Nisan, the date in dispute] with John, the disciple of our Lord, and the other apostles with whom he had associated' (Euseb. *HE* v. 24). But the identification of the date with the Passover—the very question discussed by Polycarp—points rather to St. John's Jewish custom of keeping the Passover than to the institution of Easter as an independent Christian festival. It indicates that, in late apostolic times, the surviving apostles, being Jews, when they kept the Passover, associated this with our Lord's last Passover, and so with His death and resurrection. Similarly, the Pentecost continued down from Jewish times as a Jewish festival adopted by the Church to commemorate the gift of the Holy Spirit as late as the 2nd cent. (Tertullian, *de Idol.* c. 12; *Const. Apost.* v. 20). Subsequently it was divided into the feast of the Ascension and Pentecost proper (Whitsunday), and lost its Jewish associations. Epiphany was not known till the end of the 2nd cent. (Clem. Alex. *Strom.* i. 21), and then as a Gnostic festival, Christmas appearing still later.

(b) *Places.*—The Jerusalem Christians worshipped 'in the temple' (Ac 2⁴⁶). This would be in common with other Jews and according to Jewish custom. The prayer would be private and personal—like the prayers of the Pharisee and the publican in the parable. Similarly, when 'Peter

and John were going up into the temple at the hour of prayer, being the ninth hour' (Ac 3¹), this must have been for private prayer. There could have been no public Christian worship there. If the phrase *κατ' οίκον* (2⁴⁶) should be rendered 'at home,' as in RV, this would not point to Church fellowship as in AV, where we read 'from house to house.' But when the Christians met at Jerusalem it was in a private house, using an 'upper room' (*ὑπερῶον*, Ac 1¹³), perhaps the same room as the 'guest chamber' (*κατάλυμα*), also called 'a large upper room' (Lk 22^{11, 12}), in which Jesus took the Last Supper with His disciples. When St. Peter was liberated from prison, he went to the house of Mary, the mother of Mark, and found *many* gathered together there praying (Ac 12¹²). The word 'many' does not suggest that the whole Church was there assembled. But the Church could only meet in such a place. There were no buildings for Christian worship before the end of the 2nd cent. (see Schaff, *Ante-Nicene Christianity*, i. p. 199). St. Paul frequently refers to the Church in a house (Ro 16⁵, 1 Co 16¹⁹, Col 4¹⁵). Once only, and that as late as the Pastoral Epistles, do we meet with the expression 'the house of God' (1 Ti 3¹⁵); but probably the word 'house' here means 'family' (cf. 2 Ti 1¹⁴, Tit 1¹). See von Soden, *Hdcom. in loc.*

(c) *Persons.*—The apostles naturally took the lead in conducting public worship when they were present. It would appear that, at Troas, St. Paul conducted the Lord's Supper, himself breaking the bread (Ac 20¹¹). This is the only passage in the NT in which the distribution of the elements by any person, other than our Lord Himself, is mentioned. Elsewhere, the references to the Lord's Supper, in apostolic times, simply tell us of the Christians partaking of it together. The NT references to the functions of Church officers are confined to administration, discipline, and teaching; they are silent in regard to worship. From the fact that the bishops took the lead in the worship of the sub-apostolic age, we may conclude that the elders in the Jewish Churches, and the bishops in the Greek Churches of NT times, had some pre-eminence in the conduct of worship. But from the example of Corinth—the one Church concerning the internal life of which we have any fulness of information—it is apparent that this was not always the case; for 1 Cor. shows that there it was open to any member of the assembly to offer prayer or give utterance to a hymn of praise or a message of exhortation, even women praying and prophesying. If there were any who were more especially looked to for these offices they were the prophets (1 Co 14²⁹), not the bishops, and the *Didaché* makes it certain that these were different persons. That, too, is apparent from Eph 4¹¹, where the bishops must be looked for among the 'pastors' rather than among the 'prophets.'

(d) *Method.*—The proceedings of the best-known Church—that at Corinth—suggest that there was no settled order for the conduct of public worship in the apostolic Churches. It would not be safe to treat this one Church as typical of all other Churches, especially as St. Paul has occasion to rebuke its irregularities. Still, in doing so, he lays down no rules beyond that of mutual deference (1 Co 14³⁰); nor is anything approaching a rubric, except that of the Lord's Supper, to be found in the NT, or in any primitive Church writing, earlier than the *Didaché*. It is probable that, throughout the apostolic age, the worship of the Church was always centred in the Lord's Supper, combined with the Agapé. St. Paul gives directions for the conduct of the Lord's Supper on the authority of Christ, from whom the particulars

concerning the institution of the ordinance had come down to him (1 Co 11²³⁻²⁶). The rest of the service seems to have been left to the impulses of individual members as they felt moved by the Spirit (McGiffert, *Apostolic Age*, p. 520 ff.). If, however, the Christians met twice in the day, it is probable that the morning assembly was for prayer and praise, and the evening meeting for the Agapé, the arrangement we find in Bithynia in the reign of Trajan (c. 112 A.D.). Pliny writes, 'It was their habit on a fixed day to assemble before daylight and sing by turns a hymn to Christ as a god.' He adds that they 'bound themselves with an oath . . . not to commit theft,' etc., and says, further, 'After this was done, their custom was to depart, and meet together again to take food,' etc. (*Ep.* x. 96). The following functions would certainly be found in the primitive Christian worship: (1) Prayer (1 Co 14^{14, 15}). (2) Praise, either by individual utterance (v.²⁶), or in hymns sung in common. The example of their Lord would encourage the early Christians to employ the Jewish Psalter, which appears to have been always used in the Church (Mt 26³⁰). Then we have fragments of Christian hymns scattered over the NT (e.g. Ac 4²⁴⁻³⁰, perhaps Eph 1³⁻¹⁴, 5¹⁴, 1 Ti 3¹⁶), especially those of the Apocalypse (4⁸⁻¹¹ 5^{9, 10, 12, 13} 7¹² 11¹⁷ 12¹⁰⁻¹² 15³⁻⁴ 19^{1, 5, 7}). The Canticles in St. Luke—the *Magnificat* (1⁴⁴⁻⁴⁵), the *Benedictus* (vv.⁶⁸⁻⁷⁹), the *Gloria in Excelsis* (2¹⁴), and the *Nunc Dimittis* (2²⁹⁻³²)—though possibly of pre-Christian origin, were probably found by the evangelist in use in the worship of the Churches, together with more specially Christian hymns. The passage from Pliny's letter, cited above, shows that in Bithynia, early in the 2nd cent., the singing was antiphonal (*carmenque . . . dicere secum vicissim*). See HYMN. (3) Lessons. St. Paul's frequent allusions to the OT, even in letters to Greek Churches, presuppose a knowledge of the LXX among his readers. This would be read in Christian worship after the analogy of the synagogue, though perhaps the Law would be omitted and preference would be given to Messianic prophecies. Possibly, *logia* of Jesus were also read and facts of His life recited. St. Paul expected his Epistles to be read in the meetings of the Churches (1 Th 5⁷, Col 4¹⁶), but only the OT was treated as Scripture. (4) Prophecy. The inspired utterance, so named, came from any member of the Church who felt the afflatus of the Spirit (1 Co 14¹), though it was especially expected from those who were recognized as prophets (v.²⁹). The Thessalonians were warned not to check this gift or despise the exercise of it (1 Th 5²⁰). But they were to use their own intelligence, accepting the good and rejecting what did not approve itself to their judgment (v.²¹). (5) Other gifts—tongues, exorcism, etc. (6) Contributions. The Corinthians were to put by, on the first day of each week, their contribution towards the fund for the poor of Jerusalem (1 Co 16¹). St. Paul's language implies, not that they were to bring it to the assembly every week, but that they should make up an amount at home by weekly instalments. The gifts for the Agapé, however, would be brought every week, and the apostle requires them to be divided among the brethren. Out of this subsequently grew the communion collections, which were sent to the poor, the sick, and confessors in prison (Justin Martyr, 1 *Apol.* 65-67).

(e) *Object*.—Christian worship in NT times is usually offered to God as Father through Jesus Christ as His Son (see Ro 1⁸, Eph 1³ 3¹⁴). The Aramaic 'Abba' appears to have been adopted by Greek-speaking Christians as the peculiar title for God in the Churches (see Ro 8¹⁵). But, while this was the normal type, worship was sometimes

offered to Christ and prayer addressed to Him. Some indefiniteness attaches to this subject, partly owing to the two senses in which the Gr. word προσκυνεῖν is used, and partly owing to the ambiguous usage of the title κύριος. Liddon claimed many instances of the worship of Jesus during His earthly life, mostly on the strength of the use of the word προσκυνεῖν in the Gospels, viz. Mt 2¹¹ 8² 9¹⁸ 14²⁸ 15²⁵ 17^{14, 15} 20²⁰ 28^{9, 17}, Lk 7^{37, 38} 17^{15, 16} 24^{51, 52}, Jn 9³⁵⁻³⁸ 20^{17, 28} (*Bampton Lectures*, 1866, vii. 1). But it cannot be proved that in any of these cases (except the last, and there the word 'worship' is not used) more than an act of homage and humble obeisance is intended. Josephus uses the word προσκυνούμενοι of the high priests (*BJ* IV. v. 2). In the second case cited (Mt 8²), which occurred quite early in our Lord's public ministry, it cannot be supposed that the leper actually offered Divine honours to Christ. The physical act of prostration in profound humility, and as rendering great honour, is all that can be meant. In another case (Mt 17¹⁴) the word προσκυνεῖν is not used, but we have γονυπετῶν (kneeling). Still it is to be observed that this homage was reserved for Christ alone, being repudiated by St. Peter (Ac 10^{25, 26}) and by the angel in the Apocalypse before whom St. John had prostrated himself (Rev 22^{8, 9}). The homage offered to Christ would vary in its significance from the simple prostration of the leper before the Great Healer to the adoration of Mary Magdalene and Thomas in presence of the risen Christ, its significance depending wholly on the idea of His nature that had been attained, and therefore not to be determined by the mere statements of the outward acts which we find in the Gospels. It is inappropriate to introduce the case of the dying malefactor (Lk 23⁴²) as an instance of prayer to Christ (Liddon). This was a simple request without the element of worship.

But one effect of the resurrection was to develop so exalted a conception of Christ in the Church that homage which cannot be distinguished from worship came to be addressed to Him. Thus Ananias of Damascus, when addressing Jesus in a vision (since it was in a vision, we cannot cite this as an act of prayer to Christ, because, in this vision, Jesus appears to Ananias and a conversation takes place), describes Christians as 'all that call upon thy name' (Ac 9¹⁴; cf. v.²¹ 'them which called on this name'). The same expression is used by St. Paul (1 Co 1²). The form of words is a Hebraism, used in the OT of the worship of Jehovah—יהוה בָּרַךְ אֱמֻנָה (Gn 4²⁶ 12⁸, 2 K 5¹¹), and St. Paul cites an OT passage where it occurs with reference to God and applies this to Christ (Ro 10¹³). St. Stephen commends his spirit to Jesus, and prays to Jesus as Lord for the pardon of his enemies, in language closely resembling that which Jesus addressed to God (Ac 7^{59, 60}, cf. Lk 23^{42, 46}). St. Paul refers to Jesus Christ in association with 'God himself' as exercising a directing Providence for the help of which he prays (e.g. 1 Th 3¹¹, 2 Th 2^{16, 17}, Ph 2¹⁹). Various forms of benediction imply a reference to Christ (e.g. Ro 16²⁰, 1 Co 1³). St. Paul writes of praying to 'the Lord,' evidently meaning Christ, but in language which suggests an allusion to the Jewish thought of Jehovah (e.g. 2 Co 12^{8, 9}). The author of Hebrews claims for Christ OT language referring to the worship of God (He 1^{6, 10-12}). According to the Fourth Gospel, 'all men are to honour (τιμᾶσι) the Son, even as they honour the Father' (Jn 5²³). In the Apocalypse, direct worship is offered to Christ as 'the Lamb.' The prayers of the saints are presented to Him (Rev 5⁸), and hymns are sung in honour of Him (vv.^{9, 11, 12}). In the sub-apostolic age prayer is usually offered to God through Christ, rather than directly to Christ Himself

(e.g. 1 Clem. 59-61; *Didachē*, 9, 10); but Ignatius (*ad Rom.* 4) and Polycarp (*ad Phil.* 1, 12) use the language of prayer concerning Christ; and the ancient homily, called 2 *Clement*, begins, 'Brethren, we ought so to think of Jesus Christ as of God' (see Harnack, *Hist. of Dog.* i. iii. 6).

According to Pliny, the Christians were in the habit of meeting to 'sing a hymn to Christ as God' (*carmenque Christo quasi deo dicere*,—*Ep.* x. 96). There is no indication of saint-worship or of the adoration of the Virgin Mary in the NT; nor do we there meet with the distinction between the adoration (*ἀσπείλα*) due to God alone, and the lower form of prayer to saints (*δουλέλα*, *invocatio*) observed from the time of Augustine. St. Paul rebukes the worship of angels, associated with Jewish Gnosticism (*Col* 2¹⁸).

W. F. ADENEY.

WOT.—See WIT.

WRATH.—See ANGER.

WRESTLING is twice referred to in EV of OT and once in NT. The Heb. terms are—1. *קָרַח* (in Niph.), * of Jacob's wrestling at Peniel, *Gn* 32²⁴. 23 (*LXX* *παλαῶ*). On the word-play between *ne'ebak* and *Jabbok* see vol. ii. p. 530*, note †. 2. *קָרַח*, in Rachel's saying: 'With mighty wrestlings (*naph-talim*) have I wrestled (*niphtalti*) with my sister and have prevailed,' whence she is said to have given to Bilhah's son the name NAPHTALI, *Gn* 30⁶. The word means 'twist oneself' without being specifically confined to wrestling.

Wrestling, which was a familiar spectacle at the games in any Greek city, supplies a metaphor to St. Paul in *Eph* 6¹² 'For our wrestling is not against flesh and blood,' etc. (*οὐ κατὰ σάρκα, κ.τ.λ.*). For a description of wrestling contests see Smith's *Dict. of Gr. and Rom. Ant.*, s.v. 'Lucta.'

WRITING.—I. THE ANTIQUITY OF WRITING.—The practice of writing in the countries of the nearer East goes back to a remote and indefinite antiquity. Looking only at the nations connected in some measure with Palestine, we find evidence of the use of written characters at a date far earlier than the beginnings of anything that can be called definite Hebrew history. In Egypt, inscriptions have been found containing the name of Menes, the first king in the first dynasty known to subsequent Egyptian chroniclers, whose date cannot be much later (and may be earlier) than B.C. 5000, while other inscriptions are believed to belong to yet earlier rulers. These are inscribed upon stone: the earliest extant example of writing upon papyrus is one found at Sakkara in 1893, containing accounts dated in the reign of Assa, the last king of the 5th dynasty (c. 3580-3536 B.C.). To the same date purports to belong the first recorded literary composition in Egypt, the Proverbs of Ptah-hotep, preserved in the Papyrus Priece, though the papyrus itself is of a much later date (c. 2500 B.C.). In Babylonia, inscriptions are extant of Sargon I., who flourished about B.C. 3750; while the thousands of tablets found at Telloh prove the free use of writing among the Sumerian

inhabitants of Babylonia at an even earlier date, which cannot be placed lower than B.C. 4000. From Palestine itself we have no remains of so early a period; but the tablets of Tel el-Amarna (see § iii.) include several letters written by the governors of cities in Palestine to their masters in Egypt in the 15th cent. B.C.; and recent excavations at Knossos in Crete have brought to light a large quantity of inscribed tablets, partly hieroglyphic, but mainly linear in script, in characters as yet undeciphered, which must also be assigned to about the middle of the second millennium B.C. How far these are to be regarded as the ancestors of Greek writing is a point still undetermined; but they complete the proof that in the countries surrounding Palestine, and probably also in Palestine itself, writing was an art well known and familiarly practised for many centuries before the earliest examples of Hebrew writing at present extant.

LITERATURE.—Arts. BABYLONIA, EGYPT, above; Petrie, *Royal Tombs of the First Dynasty at Abydos*, 1900, *Hist. of Egypt*, i. 81; L. W. King, *Encyc. Bibl.* i. 439-442; A. J. Evans, *Annals of the British School at Athens*, 1890-1900, pp. 65-68.

ii. MATERIALS.—Many materials were used in Palestine and the adjoining countries for the reception of writing at various times. (a) **Stone** is almost everywhere the earliest material on which writing has come down to us. The earliest inscriptions in Egypt and Babylonia are on stone. Stone is also used for the Hittite inscriptions in northern Syria and Asia Minor; and in Palestine itself the earliest considerable examples of writing are the MOABITE STONE and the SILOAM inscription (see § iii.). The Hebrew books, moreover, mention the use of stone in the earliest periods of their history. The Law given to Moses on Mt. Sinai is said to have been written on 'tables of stone' (*Ex* 31¹⁸ 34¹. 20). Moses commanded the people, when they passed over Jordan, to set up great stones, covered with plaster, and to write the Law upon them (*Dt* 27². 3, cf. *Jos* 8³⁰. 25). Job desires that his words might be graven in the rock for ever with an iron pen and lead (*Job* 19²⁴). In Phœnicia and Greece, similarly, the earliest extant examples of writing are inscriptions upon stone. (b) **Clay** was used predominantly in Assyria and Babylonia, the records and literature of which countries have come down to us mainly in the form of tablets of clay, on which characters in cuneiform writing have been inscribed while it was soft (see BABYLONIA). The discovery at Tel el-Amarna, in Upper Egypt, of similar tablets, containing the correspondence of the governors of the Syrian provinces and others with their Egyptian masters (see § iii.), shows that this kind of writing was the normal form of official correspondence between Egypt and Syria, at any rate in the time of the 18th dynasty (c. 1400 B.C.). The Knossian tablets also are of sun-baked clay. In *Ezk* 4¹ the prophet, in captivity in Assyria, is directed to draw a plan of Jerusalem upon a tile (Heb. *lēbhēnāh*, *LXX* *πλαῖθος*). (c) **Wood** was largely used in many countries, in the form of tablets. In Greece it appears to have been the principal material in use before the introduction of papyrus, and to have continued to be employed for special purposes long after that date. The earliest mention of writing in Greek literature (Homer, *Il.* vi. 169) describes a message written *ἐν πίνακι πικτυῶ*. The laws of Solon were written upon wooden tablets (*δῆρες* and *κύβηες*, Arist. *Birds*, 1354; Plut. *Sol.* 25). Tablets, whitewashed in order to receive ink better, were employed for official notices in Athens in the 4th cent. B.C. (*γραμματεῖα λελευκωμένα*, *πίνακιοι λελευκωμένοι*, Ar. *Ab.* Πολ. 47, 48); a set of such tablets, used for private purposes at Panopolis in Upper Egypt about the 7th cent. after Christ, is now in the British Museum (Add. MS 33369).

* This word may be a denom. from *קָרַח* 'dust,' and mean 'get dusty' (cf. *κόμης*, *καπνίζω*), or may be a dialectical variant of *קָרַח* 'clasp,' 'embrace.'

Wooden boards, inscribed in the one case with lines from Homer, in another with part of the *Phenissae* of Euripides and the *Hecale* of Callimachus, are in the British Museum and the Rainer Collection at Vienna respectively, both having been found in Egypt. Many wooden tablets with Egyptian writing are also in existence, and Egyptian monuments represent scribes in the act of using such tablets. In Is 30⁸ and Hab 2³ the 'tablet' or 'table' [Heb. *lúah*, LXX *πυξίον*] is no doubt wooden. The 'tables' [same Heb.] of the heart, metaphorically spoken of in Pr 3³, may be regarded either as wood or, in the light of Jer 17¹, more probably as stone. It is not always possible to tell whether the writing upon tablets mentioned by ancient authors is upon the wood itself or upon wax or some similar material with which the wood was covered. Wax was certainly used sometimes, and in later periods wax tablets were the commonest form of note-books in Greece and Italy. Herodotus mentions such a tablet (vii. 239), and Cicero, Martialis, and other authors refer to them very frequently. Many examples of them are still extant, notably those discovered at Pompeii.* (d) **Bark** is said by Pliny (*HN* xiii. 11) to have been used for writing before papyrus was known, and it continued to be used in the West, though rarely, as late as the 5th cent. after Christ (Martianus Capella, ii. 136; though it is not quite clear that the books so described are intended to be contemporary productions). From its name, *liber*, comes the Latin word for 'book.' (e) **Linen** also was used in Italy in ancient times (*libri lintei*, Livy, iv. 7, x. 38). The largest extant example of Etruscan writing is upon linen (in the museum at Agram). Linen was also used by the Egyptians for this purpose. (f) **Lead** was used in Greece and Italy, and probably elsewhere. Pausanias (ix. 31. 4) mentions a leaden plate which he saw at Helicon, inscribed with the *Works and Days* of Hesiod; but the principal use to which lead (and other metals) was put as writing material seems to have been to receive magical incantations and charms. Such tablets have been found, and mention of them is frequently made in magical papyri. (g) **Potsherds** (στράκα) were used at Athens to receive the names of persons on whom sentence of banishment (*ostracism*) was to be pronounced. In Egypt they were very plentifully used for accounts, and especially for tax receipts; in the Coptic period passages of Scripture and quasi-literary pieces were also inscribed upon potsherds. (h) **Leather** plays a far more important part in the history of writing, especially of the Bible. It was used in Egypt; leather rolls are extant from about B.C. 2000, and papyri of later date refer to documents written on skins as far back as the 4th dynasty. On the Assyrian monuments scribes are shown holding rolls which appear to be of this material. The Persians used leather to contain the royal records (*βασιλικὰ διφθέρα*, Ctesias, *ap.* Diod. ii. xxxii. 4). Similarly, Herodotus states that the Ionians of Asia Minor formerly used skins of sheep and goats, and that many barbarous peoples continued to do the same in his own time. In the OT, leather or skins are not expressly mentioned, but it is practically certain that this material was largely used, and was, in fact, the principal vehicle of Hebrew literature in historical times. The use of books in roll form is mentioned

in Ps 40⁷, Jer 36², etc., Ezk 2⁹; and the roll form implies the use of either leather or papyrus (vellum not having been yet invented, and bark, so far as is known, never having been employed in Palestine). Papyrus might, no doubt, have been introduced into Palestine from Egypt, and there is a recorded case of its being sent to Phœnicia in the 11th cent. (*Zeitsch. f. ägypt. Sprache*, 1900, p. 11); but there is no evidence of its general use at this date. On the other hand, the mention of the 'scribe's knife' (*ta'ar hassôphêr*, LXX τὸ ξυρτὸν τοῦ γραμματέως) in Jer 36 (43)²² probably indicates that the roll destroyed by Jehoiakim was of leather; since a knife (for the purpose of erasures) was part of the equipment of a scribe writing upon leather or vellum, but could not be used on so delicate a material as papyrus. In Nu 5²³ it is implied that writing could be washed off with water; but this was the practice in the case of papyrus as well as leather, so that the passage is inconclusive. Clearer evidence is given by later writers. In the Letter of Aristeas the copy of the Law sent from Jerusalem to Egypt for the purpose of the version of the LXX is expressly said to have been written on διφθέρα. Further, the Talmud requires all copies of the Law to be written on skins, and in roll form; and this regulation, which still remains in force for volumes intended for use in the synagogue, no doubt points back to an ancient tradition. All the evidence, in fact, seems to go to show that the OT Scriptures were habitually written on prepared skins, for which, in course of time, vellum was probably substituted in the case of ordinary copies (as distinct from synagogue rolls). It is not improbable that in St. Paul's request (2 Ti 4¹³) for τὰ βιβλία, μάλιστα τὰς μεμβράνας, the latter word refers to copies of parts of the OT.*

(i) **Papyrus**.—If skins probably played the most important part in the early history of the Hebrew Scriptures, the papyrus plant certainly did so in the case of the Greek. The papyrus plant (*cyperus papyrus*), which formerly grew in great profusion in the Nile (though now confined to the higher part of its course), was used from a very early date in Egypt as a material for writing. The earliest extant papyrus MS dates from the 5th dynasty (see § i.), and from about the 12th dynasty onwards many such volumes are known, with writings in all the varieties of Egyptian script—hieroglyphic, hieratic, and demotic. From Egypt the use of papyrus spread into the neighbouring countries, and it was the universal material for book-production in Greece and Italy during the most flourishing periods of their literature. The LXX version of the OT was produced in Egypt under the Ptolemies, and there can be no doubt that it was written upon papyrus, like the hundreds of Greek documents of that period which recent discoveries in that country have brought to light. So, too, with the books of the NT. These were written in Greek, in various parts of the Greek-speaking world—in Asia Minor, in Greece, in Rome, etc.; and there is no reason to doubt that they were written on papyrus in the ordinary way. The only books which may have been originally written in Palestine are St. Matthew and St. James; but these, it must be remembered, would not at first be written as sacred books, so that the rules applying to the OT would not apply to them. They, too, must almost certainly have been written on papyrus; and on this material the Greek OT and the NT must have circulated habitually, if not exclusively, until the 4th cent. of our era.—The method of manufacture of papyrus is described by Pliny (*HN* xiii. 11–13). The

* Sir H. M. Stanley (*Cornhill Magazine*, Jan. 1901, pp. 60, 61) records that on his first visit to Uganda, in 1875, portions of the NT, translated or paraphrased by him and his companions, were written on 'thin and polished boards of white wood, about 16 by 12 inches. . . . During the three months I remained with Mtesa, the translations which we made from the Gospels were very copious, and the principal events from the Creation to the Crucifixion were also fairly written out, forming quite a bulky library of boards.'

* The suggestions that the μεμβράνας were blank sheets of vellum, or note-books (which were sometimes made of vellum at that date), or account-books, seem inconsistent with the importance evidently attached to them.

pith* of the stem of the plant was cut into thin strips, which were laid side by side to form a sheet. Another layer of strips was then laid upon the first, at right angles to it, so that the whole sheet was composed of two layers, in one of which the fibres ran horizontally, in the other perpendicularly. The two layers were attached to one another by moisture and pressure, with or without the addition of glue.† The sheets (*κολληματα*, *schedæ*) so formed were dried and polished, and were then ready for use. They could be used singly, as for letters, accounts, and the like; or a number of them could be joined together, so as to form a roll. According to Pliny, the manufacturers prepared rolls (*scapi*) consisting of not more than 20 *schedæ*; but a scribe who required more to contain the work he was copying could attach a second roll to the first, and cut off so much of it as might not be needed. The length of papyrus rolls, as actually used, varies greatly. In ancient Egypt, when books were largely used for ceremonial and ritual purposes, they were often of excessive length; the longest at present known measures 144 ft. But for practical use much more moderate dimensions were necessary, and no Greek literary papyrus is known which exceeds 30 ft. The height varies from 15½ to about 5 in.; about 9 or 10 in. is a common height for a literary papyrus. The writing is normally on that side of the papyrus on which the fibres lie horizontally, i.e. parallel to the length of the roll (*recto*); the *verso* is only used either when the scribe's matter exceeds the papyrus at his disposal, so that after filling the *recto* he is forced to continue on the *verso*, or (a commoner case) when the *recto* has already been used to receive some other writing. A roll of the first description (whether its material be leather or papyrus) is that mentioned in Ezk 21⁰ (cf. Rev 5¹), which was 'written within and without; and there was written therein lamentations, and mourning, and woe.' The multitude of calamities is indicated by the writing extending over both sides of the roll. An example of a roll so written occurs in a magical papyrus in the British Museum (Pap. exxi.). Opisthograph rolls of the second description imply that the writer employed papyrus already once used, either because he was too poor to get any other, or too remote from a town where it might be obtained, or that the matter he wished to write was too unimportant to justify the use of fresh papyrus. Thus rough accounts are frequently written on the back of used papyrus; or schoolboys' copies, as in the case of the papyrus which bears on its *verso* the Funeral Oration of Hyperides, roughly written in a schoolboy's hand; or we may have a literary work, written for the private use of an individual, not for sale or for a public library, as in the case of the *Ἀθηναίων Πολιτεία* of Aristotle, which is written on the back of farm accounts. Such literary MSS might, no doubt, occasionally come into the market as cheap copies, but they would form no part of the regular

* Dziatzko (*Untersuchungen*, pp. 31, 32) suggests that in ancient Egypt the fibres of the bark were used as well as the pith, the exclusive use of the latter being introduced after the Greek occupation; but there is no authority for this distinction, and an examination of early Egyptian papyri does not reveal any essential difference in the method of their manufacture. Moreover, since Pliny states that even that part of the pith which was nearest the bark made material too coarse for writing purposes, the bark itself must have been still more unsuitable, and could not produce such excellent material as the papyri of the 18th and even earlier dynasties.

† Pliny's words, 'turbidus liquor vim glutinis præbet,' are variously interpreted to mean that the muddy water (of the Nile) 'gives strength to the glue' (*glutinis*, dat. plur.) or 'answers the purpose of glue' (*glutinis*, gen. sing.). Dziatzko (*op. cit.* pp. 84, 85) states that a chemical examination of some fragments of papyrus disclosed no trace of glue between the layers, but showed that it had been applied to the surface, presumably to smooth and strengthen it. Certainly it is not always possible to discern glue, but sometimes it appears to be present.

book trade. That the habitual use of them implied poverty, appears from Lucian (*Vit. Auct.* c. 9), where it is one of the signs of the poverty-stricken disciple of Diogenes. The writing on papyrus was disposed in columns (*σειλίδες*), the width of which, if not dictated by necessity, as in the verses of a poem, is generally from 2 to 3½ in. in the case of literary MSS of good quality. In copies written without regard to appearances (like the *Ἀθ. Πολ.*), it might be considerably more. The title of a work was normally written at the end. The inner edge of the roll, or both edges, might be provided with a wooden roller (*δυσφάλος*), and volumes which claimed elegance of appearance were probably always provided with them. Commoner copies were not so provided, but the edges were then generally strengthened by an extra strip of papyrus, to prevent tearing. A *σιλλυβος*, or thin strip of papyrus or vellum, was attached to the outside of the roll, bearing the title of the work; such a *σιλλυβος*, bearing the title of Sophron's *Mimes*, has been discovered at Oxyrhynchus (Ox. Pap. 301, now Brit. Mus. Pap. 801). The roll might be enclosed in a cover (*φαιδής*), to protect it from damage, and stored in a wooden case (*capsa*) with several others.—The roll form of book continued in common, if not universal, use until the 3rd cent.; but from that date onwards (under the influence, no doubt, of the increasing use of vellum) papyrus books in codex form (like modern books) begin to be found, and the roll form gradually drops out of use. The earliest fragments of the Greek Bible are written in the codex form, which seems to have been preferred by the Christian converts. Vellum superseded papyrus as the material for the best books in the 4th cent., but papyrus continued to be employed for inferior copies until the 7th cent. In 640, however, the Arabs conquered Egypt, and, by stopping the export of papyrus, struck the death-blow to its use as a vehicle of Greek and Latin literature. It continued to be used in Egypt to some extent for accounts and for Coptic documents; but its literary importance was at an end.

(k) **Parchment or vellum.**—This material may be regarded as a special development from the use of skins, described above; but it occupies a far more important place in the history of literature than its parent. According to Varro (*ap. Pliny, HN* xiii. 11), it originated at Pergamum under Eumenes II. (B.C. 197–158), when the king of Egypt, anxious to cripple his rival's growing library, forbade the export of papyrus. The king of Pergamum accordingly reverted to the use of skins, which had formerly been general in Asia Minor (see above); but the skins were made more suitable for literary purposes by a special preparation, and the material thus produced received from its place of origin the name of *περγαμηνή*, whence our *parchment*. Parchment differs from leather in not being tanned; the skins are merely stretched and dried, the hairs being removed from the one side and the flesh from the other, and the whole being smoothed with pumice. In modern usage the flesh side is also dressed with chalk; the special methods, if any, of preparing ancient parchment are unknown. The skins used are principally those of sheep, lambs, and calves, but those of goats, asses, and swine may also be used; and specially fine vellum is provided by antelopes. Strictly speaking, vellum denotes the material manufactured from calves (and antelopes), and parchment that provided by sheep, etc.; but practically no distinction is made between them, and the term *vellum* is applied to all kinds of dressed skins used for the purposes of writing. Of the character of the vellum MSS of Pergamum nothing is known; but it is certain that the material did not come into general use for literary purposes, in

other countries, until a much later period. At Rome, in the 1st cent. B.C. and the 1st and 2nd cents. after Christ, there is evidence of the use of vellum, but only for note-books and for rough drafts or inferior copies of literary works (Cic. *ad Att.* xiii. 24; Hor. *Sat.* ii. 3; Martial, xiv. 7. 184, etc.; Quintilian, x. 3. 31). A fragment of a vellum MS, which may belong to this period, is preserved in Brit. Mus. Add. MS 34473, consisting of two leaves of Demosthenes, *de Fals. Leg.*, in a small hand, which appears to be of the 2nd century. The use of vellum for note-books, which would be shaped according to the analogy of wax tablets, the form of note-book previously existing, naturally led to the evolution of the *codex*, or modern book form; and the rise of vellum into favour for literary purposes is also the rise of the *codex*. This appears to have taken place during the 3rd cent., the final victory of vellum and the *codex* form being achieved in the early part of the 4th century. When Constantine founded his new capital, he instructed Eusebius to have fifty MSS on vellum (*συνδρια ἐν διφθέραις*) prepared by skilled calligraphers for the churches in it (*Vit. Const.* iv. 36, A.D. 331); and about the middle of the century the library of Pamphilus at Caesarea (consisting largely of the works of Origen), which had fallen into decay, was restored by Acacius and Euzoios, who had the damaged volumes replaced by vellum ('in membranis instaurare conati sunt,' Jerome, *Ep.* cxli.). The spread of Christianity probably had much to do with the change, by creating a demand for complete copies of the Scriptures. No papyrus roll of ordinary dimensions could hold more than one of the longer books of the NT, and a set of some 30 or 40 rolls would be necessary for the entire Bible; while the whole could be gathered into a single *codex* of not immoderate size. Examples of such *codices* from this very period remain in the celebrated *Codex Vaticanus* and *Codex Sinaiticus*, and probably also in the earliest copies of Virgil. The vellum of these early MSS ranks with the very finest in quality. For special magnificence, the vellum was sometimes dyed purple, with letters of silver or gold. The existence of such MSS in the 4th cent. is proved by Jerome's denunciation of them ('in membranis purpureis auro argenteoque descriptis,' *Pref. in Job*; 'inficiuntur membranae colore purpureo, aurum liquescit in litteras, gemmis *codices* vestiuntur,' *ad Eustochium de custod. virg.*).

To this period may perhaps be attributed the *Codex Veronensis* of the Old Latin Gospels; but most of the purple MSS now extant are of later date. Those of the Greek Gospels are all attributable to the 8th cent. (the *codices* known as *Evangelii*, N, N^a, Z, Φ, and one recently brought from Sinope to Paris, the latter and N^a being written in gold letters, the others in silver, with gold only for the sacred names). Other purple MSS are the *Codices Palatinus* and *Sareitanus* (5th cent.), *Vindobonensis* and *Brixianus* (6th cent.) of the Old Latin Gospels, the *Vienna Genesis* (6th cent.), which also has painted miniatures, the *Gothic Gospels at Upsala* (6th cent.), the *Metz Gospels* and *Psalter of St. Germanus at Paris* (6th cent.), the *Zürich Greek Psalter* (7th cent.), the *Vulgate Gospels* written by Godescalc for Charlemagne (A.D. 781), the *Hamilton Gospels*, now in America, and two other copies of the Gospels at Paris (8th cent.). The last four, all written in the time of Charlemagne (to which more of the same and subsequent periods might be added), have letters of gold; the earlier MSS are in silver. Among special curiosities of ornamentation may be mentioned two leaves gilded all over, with lettering in blue, containing the tables of Eusebian Canons, from a copy of the Greek Gospels, of the 8th cent., in the British Museum, and two books of prayers written on black vellum in gold and silver letters, of the 15th to 16th cents., at Vienna.

The sheet of vellum having been prepared for use, it was folded into quires, a process which causes hair-side to face hair-side, and flesh-side flesh-side throughout the volume. Quires are found of various sizes, eight leaves being the commonest number. In Greek MSS the flesh-side normally begins the quire in Latin MSS the hair-side. Lines

were ruled on the vellum with a blunt-pointed instrument, generally on the hair-side, making a furrow on that side and a ridge on the flesh-side. After the use of vellum had become well established, the writing was generally arranged in two columns to the page, sometimes less, but very rarely more. The earliest MSS, however, show a larger number, the *Cod. Sinaiticus* having four columns to the page, and the *Codd. Vaticanus* and *Patiriensis* (5th cent.) three. It is probable that the use of narrow columns which this involves is a reminiscence of the narrow columns habitually found in papyri, from which these MSS were almost certainly copied. A revival of this practice is occasionally found in later MSS, as in Brit. Mus. Royal MS I D ii, containing part of the LXX, of which four quires are written with three columns to the page; or the great Bibles containing Theodulf's recension of the *Vulgate*, which also have triple columns.

(l) **Paper**, the ultimate survivor in the competition between the various vehicles of literature, is of much less importance for the history of writing than either papyrus or vellum, on account of the lateness of its appearance in Europe and Western Asia. The date of its invention is unknown, but there seems to be no doubt that it was first manufactured in China. About the middle of the 8th cent. it became known to the Arabs, perhaps as a result of their conquest of Samarcand, in 704, and factories were established in Baghdad and elsewhere. Specimens of their workmanship have been found in Egypt, dating from an early period in the Arab occupation of that country. To this paper the names *charta* (often with the epithet *Damascena*) and *papyrus* were applied, since it served to take the place of the material formerly known by those names. From the Arabs the knowledge of paper passed, after a considerable lapse of time, to the Spaniards and Italians. The earliest known specimens are of the 12th cent., but it was only slowly that the new material made headway against the supremacy of vellum for literary purposes. Towards the end of the 14th cent. it began to be used with some freedom in the book trade, and during the 15th cent. it was coming to supersede vellum for ordinary purposes, even before the invention of printing dealt the fatal blow to the older material. It was formerly supposed that the earliest paper, introduced into Europe from the East, was made from cotton wool, and a distinction was drawn between cotton paper and linen paper. Microscopic examination, however, shows that this is a delusion, and that no such thing as paper made wholly of cotton has ever existed. The name *bombycina*, which is used to describe the Oriental paper, has probably nothing to do with the material out of which it was made, but is a corruption of *bambycina*, from *Bambycè*, in Syria, where it was manufactured. The materials out of which it was usually manufactured were hemp or flax, for which woollen cloth was subsequently substituted, and eventually (in the 14th cent.) linen rags. Water-marks, which do not occur in Oriental paper, were introduced by European manufacturers in the 13th cent. The earliest known specimen is on paper used in the district of Ancona in 1293.

(m) The *implements of writing* have naturally differed according to the various materials on which they had to be employed. A sharp, pointed metal instrument, known to the Greeks as *στυλος*, Lat. *stilus*, was used for writing on clay or wax tablets (cf. Job 19²⁴, Jer 17¹). On papyrus the *reed* (*κάλαμος*, *calamus*) was used (cf. 3 Jn¹³ *διὰ μέλανος καὶ καλάμου*), and possibly also on leather (cf. Ps 45¹, where the LXX has *κάλαμος γραμματέως*). Metal pens in the form of a reed or quill have been found in the so-called Grave of Aristoteli at Eretria,

and (of the Roman period) in Italy and Britain. The quill pen is first mentioned by an anonymous biographer of Theodoric the Goth (c. 500) and by Isidore of Seville (c. 600).—The earliest form of ink (*μῆλας*, *atramentum*, *ἐγκαστόριον*, *incaustum*, whence *ink*) appears to have been either the juice discharged by the cuttle-fish (Persius, iii. 13) or a mixture of soot and gum. This often gives excellent results, the ink of the Greek papyri, even from the earliest times (3rd and 2nd cent. B.C.), being often admirably black. This kind of ink did not sink deeply into the material on which it was laid, and could be washed off without much difficulty; on papyrus this was the ordinary method of deletion on a large scale. Gall-apples are not mentioned until the 5th cent. (Martianus Capella, iii. 225), but were probably used considerably earlier. Metallic inks were not used with papyrus, but must have been adopted early in the history of writing upon vellum; it is to

the Hebrews. The uncertainty which attends the dating of the earlier books of the OT and of the materials upon which they are based, makes it dangerous to draw any conclusions from the references in them to the practice of writing. The discovery (in 1887) of the Tel el-Amarna tablets (Fig. 1), near the site of the capital of Amenophis IV., containing correspondence, in cuneiform characters and in Babylonian dialect, between the Egyptian governors or vassal princes in Palestine and Syria and the king and his ministers in Egypt, proves that writing was practised in Palestine at a date either a century before the Exodus (if that event be assigned to the reign of Merenptah, as commonly held), or contemporary with the Hebrew entry into the Promised Land, according to the alternative chronology. There is also no difficulty in believing that Moses, having been brought up in the Egyptian court (cf. Ac 7²²), was acquainted with the art of writing; though, of

(Brit. Mus. BU. 88-10-13, 75.)

this element that the erosion seen in so many early vellum MSS (e.g. the Codex Vaticanus and the Codex Alexandrinus) is due. In the Middle Ages a less corrosive ink is generally used. Some beautiful specimens remain from about the beginning of the 8th cent., e.g. the Codex Amiatinus and the Lindisfarne Gospels. Many recipes for ink are recorded in mediæval MSS; the principal ingredients are gall-apples, vitriol, and gum.

LITERATURE.—Birt, *Das antike Buchwesen*, 1882; Gardthausen, *Griechische Paläographie*, 1879; Thompson, *Handbook of Greek and Latin Palæography*, cc. ii-iv, 1893; Dziatzko, *Untersuchungen über ausgewählte Kapitel des antiken Buchwesens*, 1900; Pietschmann, *Leder und Holz als Schreibmaterial bei den Ägypten* (Sammlung bibliothekswissenschaftlichen Arbeiten, Hft. 8), 1895; Karabacek and Wiesner, *Das arabische Papier* (Mitth. aus d. Sammlung d. Papyrus Erzherzog Rainer, ii. 87 ff.), 1887; Buhl, *Canon and Text of the OT*, Eng. tr. § 74, 1892; Kenyon, *Palæography of Greek Papyri*, ch. ii. 1899; Wattenbach, *Das Schriftwesen im Mittelalter*, 1896.

iii. HEBREW WRITING.—It is impossible to fix with any precision the beginning of writing among

course, this fact in itself proves nothing as to his actual and immediate authorship of the books ascribed to him. The name Kiriath-sepher (Jos 15¹⁸) is held by Sayce and some others (but see Moore, *Judges*, 26 f.) to mean 'city of books,' which might indicate even the existence of a library (perhaps such a one as that of Ashurbani-pal at Nineveh) or record-office; and one interpretation of *shēbet sōphēr* in Jg 5¹⁴ (LXX B *ἐν πάβῳ διηγήσεως γραμματέως*, AV 'the pen of the writer,' RVm 'the staff of the scribe'; but RV 'the marshal's staff') finds a reference to writing in what is universally admitted to be a very ancient document. It is not until much later, however, that indubitable evidence of Hebrew writing is found. The earliest extant specimens are on the *bowls of Baal Lebanon* (see ALPHABET, vol. i. p. 73), the earliest of which may date from c. 1000 B.C., and the *Moabite Stone*, erected by MESHAI, king of Moab, about 850 B.C., to commemorate his own revolt against Jehoram. This

is written in a dialect scarcely differing from Hebrew, and in the ancient Hebrew characters, which were a development from the original Phœnician alphabet (ALPHABET; for facsimile see MOAB). It is followed by the *Siloam inscription*, attributed to the reign of Hezekiah (c. 700 B.C.) or Manasseh (c. 650 B.C.), the characters of which are a modification of those on the Moabite Stone. Somewhat later still, probably, are the inscriptions on the jar-handles found by Dr. Bliss at Tell ej-Judeideh, which are assigned approximately to 650-500 B.C. (PEFSI, 1900, pp. 207, 341).

Of actual Hebrew writing in the old characters we have no remains, since our earliest extant MSS belong to a period long after the adoption of the square characters; but their appearance may be learnt from the MSS of the Samaritan version of the Pentateuch, the Samaritans having retained the ancient alphabet when the Jews abandoned it, after the Captivity, in favour of the Aramæan characters, which represented a different line of descent from the original Phœnician alphabet.

which were to be used in the services of the synagogue. These must always be leather rolls, not in modern book form; and they must be written with the most scrupulous care.

'A synagogue roll must be written on the skins of clean animals, prepared for the particular use of the synagogue by a Jew. These must be fastened together with strings taken from clean animals. Every skin must contain a certain number of columns, equal throughout the entire codex. The length of each column must not extend over less than 48 or more than 60 lines; and the breadth must consist of thirty letters. The whole copy must be first lined; and if three words be written in it without a line, it is worthless. The ink should be black, neither red, green, nor any other colour, and be prepared according to a definite receipt. An authentic copy must be the exemplar, from which the transcriber ought not in the least to deviate. No word or letter, not even a *yod*, must be written from memory, the scribe not having looked at the codex before him. . . . Between every consonant the space of a hair or thread must intervene; between every word the breadth of a narrow consonant; between every new *parashah*, or section, the breadth of nine consonants; between every book, three lines. The fifth book of Moses must terminate exactly with a line; but the rest need not do so. Besides this, the copyist must sit in full Jewish dress, wash his whole body, not begin to write the name of God with a pen newly dipped in ink, and

FIG. 2.—HEBREW PENTATEUCH CODEx, 9TH CENT.
(Brit. Mus. MS Or. 4445, reduced).

The old characters remained in use on coins of the Maccabæan period, but they had fallen out of use for literary purposes long before the time of our Lord, and there can be no doubt that the books read by Him (e.g. Lk 4¹⁷) were written in the square alphabet, in which the smallness of the letter *yod* justified the metaphor of Mt 5¹⁸.^{*} The square characters of the earliest period were not identical in form with those of the MSS now extant, but they were their direct ancestors. So far we have very little light as to the appearance of the MSS in which the Hebrew Scriptures were preserved; it is only when we reach the period of the Talmud (c. 300-500) that we find those principles being laid down which, stereotyped by the Massoretes, have given us the MSS now extant (Fig. 2). Minute directions are given for the copying of the Scriptures, especially of those volumes of the Law

^{*} An isolated survival of the old alphabet occurs in the case of Aquila, in whose Greek OT the name Jehovah was regularly written in these characters. Origen's statement to this effect has been confirmed by the fragments of Aquila recently discovered at Cairo, and now at Cambridge (Burkitt, *Fragments of Aquila*, 1897, cf. Taylor, *Genizah Fragments*, p. 261.).

should a king address him while writing that name he must take no notice of him' (S. Davidson, *Text of the OT*, p. 89).

Vowel-points are never added in synagogue rolls. Originally absent from Hebrew writing altogether, vowels were first represented, when some special need required their indication, by the semi-vowels *ו*, *י*, *ה*, and sometimes *א*, technically known as *matres lectionis*. The insertion of these signs gives what is known as the *scriptio plena*, their omission the *scriptio defectiva*. The date of the introduction of this device is uncertain, but it must be later than the production of the LXX. The more complete and satisfactory system of vowel-points was introduced about the 7th century. An alternative system, in which the points are supralinear instead of infralinear, is found in the oldest dated MS (the St. Petersburg Codex of the Prophets, A.D. 916), and in some others: this is supposed to have been practised at Babylon (but not exclusively even there), but never gained general acceptance. Vowel-points are habitually inserted in MSS other than synagogue rolls, but it was a rule that the consonantal text should be written

independently, and the points added by a different scribe. — *Accentuation* was probably introduced into Hebrew writing at about the same date as vowel-points (5th–7th cents.), and used to denote the logical interrelation of the several words in the sentence, as well as their vocal modulation in public reading. — *Separation of words* is effected in the Moabite and Siloam inscriptions by the insertion of a dot; but the frequent mistakes in the division of words in the LXX, and the subsequent introduction of the 'final letters,' show that in early MSS Hebrew writing, like Greek and Latin to a much later period, was undivided. The use of the five 'final letters,' to indicate the ends of words, belongs to a date intermediate between the version of the LXX and the Talmud, a period in which most of the *minutiae* in the practice of the scribes probably originated. — *Divisions of the text* in Hebrew MSS are of various kinds. The larger divisions, corresponding roughly to our chapters, are the 'open' and 'closed' sections. Open sections begin a new line in the MSS; and if the previous section has ended at the end of a line, a whole line is left blank before the new section begins. Closed sections follow on in the same line as the end of the previous section, a blank space only being left between; or, if the previous section ends too near the end of a line to admit of this, the next line is indented. Late MSS sometimes insert the letters *so* or *sa* in the blank space, to indicate an open or a closed section respectively. In the Law the MSS agree generally in their distribution of open and closed sections, but in the Prophets and Hagiographa there is considerable divergence, indicating difference of tradition in different Massoretic schools. This section-system was certainly introduced before the time of Jerome, and probably before the period of the Mishna. — Another form of division was into *sedarim*, or lections suited to a three-years' cycle of the reading of the Law. The Pentateuch is divided into 167 *sedarim*, while of the other books, which were similarly divided, the Former Prophets have 77, the Later Prophets 107, and the Hagiographa 81. Side by side with this was a one-year cycle of the reading of the Law, which was in use in Babylonia, involving a division of the Law into 54 *parashiyoth*. These are indicated in the MSS, with a mnemonic mark to show the number of verses in each *parashā*. Verse-division is rarely found in synagogue rolls; in MSS in book form having accents and vowel-points it is regularly practised. The earliest method of indicating the end of a verse is by placing a *šiluk* (:) beneath the final letter; subsequently the double point or colon (*šoph pašuk*) was introduced. The verses were carefully numbered by the Massoretes, as a precaution against interpolation; but the systems of division practised by the Babylonian and Palestinian Jews respectively differed considerably, and the one now in use differs from both of these, being apparently due to the Massoretes.

The margins of Hebrew MSS play an important part in their character, since they generally contain the Massorah and certain kinds of various readings. The *Massorah*, or body of traditional commentary on textual matters, is of two kinds — the Greater and the Lesser Massorah. The Greater Massorah generally occupies the upper and lower margin of the page, while the Lesser is placed in the outer side margin. Between the columns come the various readings known as the *Kēre* and *Sevirin* (see TEXT OF OT). The places of the Lesser Massorah and the various readings are, however, sometimes interchanged. Often, too, the Hebrew text is accompanied by an Aramaic paraphrase, either in parallel columns or between the lines. — On the paleography of Hebrew MSS

it is not necessary to dwell. Changes in the manner of writing between the 9th cent. (the date of our earliest MS) and the invention of printing were slight, and the best authorities differ considerably in their attribution of dates on the handwriting alone. Moreover, in view of the stereotyped character of the text preserved in all extant MSS, not so much depends on the precise assignment of dates as in the case of Greek MSS.

iv. GREEK WRITING ON PAPYRUS. — We are far better situated with regard to knowledge of the manner in which the Greek Bible was written than is the case with the Hebrew Bible; for, whereas the earliest extant Hebrew MS is separated by more than a thousand years from the date of composition of the latest Hebrew book of the OT, we have (thanks to the discoveries made in Egypt within the last twelve years) Greek MSS as early as the date at which Greek first began to be used as a vehicle for the Scriptures. From the first half of the 3rd cent. B.C. onwards we have a continuous stream of Greek MSS (not indeed biblical, but showing how the biblical MSS must have been written), at first exclusively on papyrus, but from the 4th cent. after Christ also on vellum.

Greek writing upon papyrus falls into two categories, *literary* and *documentary*, the former being used primarily for works of literature, but at times also for documents of special importance, such as petitions to the great magistrates; while the latter, primarily used for all sorts of non-literary documents (receipts, contracts, accounts, letters, etc.), was also occasionally employed for private copies of literary works. Both classes have therefore to be taken into consideration with regard to the transmission of the sacred text. So far as the LXX is concerned, indeed, the non-literary hand is not of much importance, since there is no reason to suppose that the version circulated to any great extent among other than literary classes. Copies were, no doubt, occasionally made in the common hand for poor people or for private use; but it is not likely that this happened to such an extent as materially to affect the textual tradition. With regard to the NT the case is different, as will be shown below.

The literary hand of the 3rd cent. B.C., at the time of the production of the LXX, is known from the papyri extracted by Prof. Petrie from the cartonnage of some mummy cases found by him at Gurob in 1889, of which the best, from a paleographic point of view, are the fragments of the *Phædo* of Plato and the *Antiope* of Euripides. These are written in a very small uncial hand, neat and firm, in columns about 6 in. high and 2½ in. wide. According to a rough calculation, two rolls of about 35 ft. each would be required to contain the Book of Genesis in the style of writing employed in the *Phædo* MS; and, even with a taller column and greater economy of space between the lines, it is certain that such a book could not have been contained in a single roll of normal length. The uncial hand on papyrus admits of occasional ligatures between the letters, so that the distinction between uncial and cursive hands is less sharply marked on papyrus than on vellum. Besides the small literary hand just mentioned, the early Ptolemaic papyri show a larger and rougher uncial hand, likewise used for literary purposes, but probably for cheaper and less carefully executed copies. The non-literary hands of the period are various, but for the most part are very cursive, with broad letters freely spaced out and large ligatures.

In the 2nd cent. B.C. two forms of literary hand are again found in existence (and it must be remembered that the extant evidence is still scanty, so that no description is likely to be exhaustive) — one (exemplified by the papyrus of Hyperides in *Athenogenem* at the Louvre) being a square, firm hand, larger than that of the Petrie *Phædo*, while the other (contained in a rhetorical papyrus, also at the Louvre) is smaller, weaker, and more sloping. The non-literary hand is generally less straggling than in the previous century, the larger forms of it being often very handsome, and the smaller neat and flowing. The 1st cent. B.C. is a period of transition, the Roman conquest of Egypt

leading gradually to a marked change of hand. Of literary papyri, few can be quite certainly attributed to this century, but there are strong grounds for placing the Herculaneum rolls here, with a few others from Egypt. The Herculaneum papyri show a number of rather small, business-like hands, without much ornament, written in narrow columns on papyrus of moderate height, and from these a good idea may be formed of the appearance of a MS of the LXX in the generation preceding the birth of our Lord.

For the 1st cent. of the Christian era, and especially for the second half of it, during which the books of the NT were written, we have fairly good evidence as to the current literary hand, and ample for the non-literary hand. The literary hand is rather larger than was usual in the Ptolemaic period, with well-rounded curves and not infrequent ligatures; a graceful style of writing, and, at its best (as in a papyrus of the *Odyssey* in the British Museum), very handsome. It is not likely, however, that the authors and early copyists of the books of the NT often had writing of this excellence at their disposal. A better example of the style in which the autographs of the NT may

forthcoming. Under these circumstances, the NT Scriptures must have circulated much in privately written copies. A good example of such a copy of a literary work in a non-literary hand is provided by the papyrus of Aristotle's *Ἀθηναίων Πολιτεία*, written at the end of the 1st cent. on the back of used papyrus, in four different hands, of which three are cursive and one a rough uncial. The cursive hands use abbreviations freely for common words and terminations (e.g. / = *ἐστί*, γ' = *γάρ*, κ' = *καί*, κ' = *κατά*, τ' = *τῆν*, τ' = *τῆς*, τ' = *τῶν*), and the possibility must be reckoned with that similarly written MSS enter, to some extent, into the textual history of the NT. The common hands of the Roman period are small and very cursive, and errors in transcription would consequently be easy; to say nothing of the probable want of habits of literary exactness among many of the copyists. No doubt, many well-written copies were also produced, especially in the great towns where Christian communities were strong; and these would have a good chance of preserving a pure tradition, since

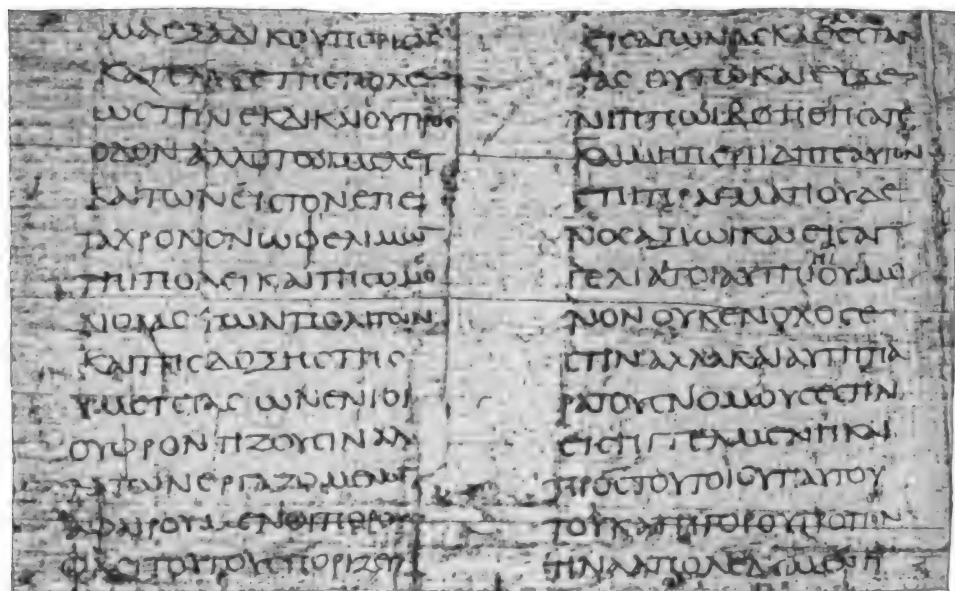

FIG. 3.—GREEK PAPYRUS ROLL, LATE 1ST CENT.
(Brit. Mus. Pap. 115, Hyperides, *pro Euzenippo*)

have been written is provided by a MS of Hyperides in the British Museum, written in the latter part of the 1st cent. in a hand akin to the best contemporary non-literary MSS (Fig. 3). Even, however, when the author's autograph or the first transcripts were produced by competent scribes, the conditions of circulation among the Christian community make it practically certain that the Scriptures must often have been copied by private persons, unskilled in the art of writing, and thinking, not of producing a volume fit for the book market, but of reading for themselves, or transmitting to their friends, the all-important narrative of the Master's life. Throughout the first three centuries of the Christian era the books of the NT must have circulated mainly in channels outside the ordinary book trade. Public libraries did not require them; churches must often have lost their copies in times of persecution; professional scribes, unless they happened to be Christians, would not be employed to transcribe them; and in country places skilled calligraphy would not be

the literary hand of the 1st and 2nd cents. is clear and good, increasing in size, and perhaps in showiness, as time goes on. The most calligraphically elaborate papyri extant (two copies of the *Iliad*, bk. ii., at Oxford and in the British Museum) probably belong to the 2nd century.

In the 3rd cent. a new element enters into consideration, namely the adoption of the codex form, the roll form continuing alongside of it for a period which cannot be exactly defined. At first the codex form was inferior, as a style of book production, to the roll form, being an adaptation to literary purposes of a form which had hitherto been adopted mainly for memoranda and rough drafts. There are signs, however, that it was early taken into use among the Christians for their private copies of the Scriptures. The evidence at present available is too scanty to justify dogmatism, but it certainly is the case that several of the earliest examples of the codex form contain Christian writings, and that the majority of papyri of the 3rd cent. containing Christian writings are in

the codex form. Of the NT, two fragments are extant which are assigned to the 3rd cent., and three of the 4th; all these are in codex form. Of the OT there are three fragments of the 3rd cent., of which one is certainly from a codex, and one is uncertain. In addition, the Oxyrhynchus fragment containing alleged sayings of our Lord is a leaf from a codex of the 3rd century. It appears, therefore, that the codex form was generally used among Christians at an earlier date than among people in general; for of 21 non-Christian papyri assigned to the 3rd cent. only two are written in this form. These early Christian codices are not showy specimens of the calligrapher's art; on the contrary, they are somewhat roughly written, unornamental productions, generally of small size, suitable, it may be thought, for easy conveyance and easy concealment. This fits in with what has been said above as to the character of the MSS in which the books of the NT circulated before the recognition of Christianity by the State. Prof. Hort has observed (*Introd. to NT*, § 352) that the Codex

middle of the line, that of a comma; and at the foot of the line, that of a semicolon. In a few extant papyri these distinctions are observed; but oftener they are neglected, and the dot is placed above the line to denote all values.—*Acenutation* is not unknown, as it is in the earliest vellum uncials, but is rarely and sporadically applied. No papyrus MS has accents fully and systematically supplied, but some of the best-written of them (notably the Bacchylides MS) have them fairly plentifully. Less well-written MSS have fewer of them, and MSS in non-literary hands practically do not have them at all.—*Separation of words* is not found, except in a few cases where ambiguity might result: here a single point is sometimes used to indicate the correct division. This is again especially the case in carefully written MSS, which are always more fully supplied with aids to comprehension than their commoner kindred. It is not at all likely that any of the early copies of the books of the NT were supplied with accents or punctuation, or had any indication of the division of words.—The use of *abbreviations* in non-literary hands has been mentioned above. In addition to the symbols there described, a common method of abbreviation is to drop the termination of a word, writing the last letter which is retained above the line: e.g. *αυτ* or *αυτ* for *αυτ* or *αυτ*, *πρωτ* for *πρωτος* or *πρωτης*, *πρωτ* for *πρωτος*, and so on. Abbreviation by the omission of letters from the middle of a word is not practised, except in the common theological compendia (*κ*, *θ*, *ζ*, *ω*, *α*, *ε*, *λ*), which are found from the 3rd cent. onwards.

FIG. 4.—GREEK UNICIAL CODEX, 5TH CENT.
(Codex Sarravianus, Leyden University Library, reduced.)

Ephraemi in the Apocalypse must have been copied from a MS composed of small leaves; and it is possible that it was such a one as those which we have been describing,—a private copy, without beauty of workmanship, and perhaps without much attention to precise accuracy of transcription. From this predilection for the codex form even on papyrus, the Christian Church was well prepared to make use of it when vellum began to come to the front as the material for book production.

Before considering, however, the progress of palaeography upon vellum, it will be as well to say something as to the *minutiae* of Greek writing upon papyrus. In ordinary literary papyri, the writing is arranged in narrow columns, often leaning to the right, in uncial characters of medium size (smaller than is usual upon vellum), admitting of ligatures between them to a limited extent. Enlarged initials are not used. Pauses in the sense are indicated (if at all) by small blank spaces in the text, often accompanied by a *paragraphus*, or short horizontal stroke below the first letters of the line in which a sentence ends.—*Punctuation* in the ordinary sense is very rarely found in prose MSS, but it occurs sporadically in a few MSS. In one or two very early MSS a double dot, like a colon, is used to separate sentences; but usually only a single dot is employed. According to the strict system, developed by the Alexandrian grammarians, a dot placed above the line has the value of a full stop; in the

LITERATURE.—Thompson, Kenyon, Birt, Gardthausen, *opp. cit.*; Blass, art. 'Paläographie,' in Müller's *Handbuch der klassischen Altertumswissenschaft* (1892); Grenfell and Hunt, *Oxyrhynchus Papyri*, pts. i. ii. (1899-1900).

v. GREEK UNICIAL WRITING ON VELLUM.—The supersession of papyrus by vellum has been described in § ii. The supersession, however, was not immediate and absolute; for it is clear that copies of the Scriptures continued occasionally to be inscribed on papyrus as long as the material itself was accessible. Fragments of such MSS are in existence (such as a Psalter in the British Museum, and the Books of Zechariah and Malachi in a MS at Heidelberg) which are attributable to the 7th cent.; and much later than this no Greek MS on papyrus can be, on account of the Arab conquest, which closed Egypt to the Christian world. But from the 4th cent. onwards papyrus takes a secondary place. From that century we have the Vatican and Sinaitic Codices, and we know by tradition of the 50 volumes prepared for the churches of Constantinople; and it is not likely that any papyrus MS, extant or hereafter to be

discovered, can be put into successful comparison with these. From this time forward, moreover, there was nothing to prevent the free multiplication of copies of the Scriptures, with all the resources of trained penmanship. The textual tradition of the NT henceforth runs, not through private copies, but through the great churches and libraries; and if Constantinople and Cæsarea used vellum, there is no reason to doubt that their example was followed in Rome and Antioch and even Alexandria; indeed there is good reason for believing, on palæographical grounds, that the Vatican and Sinaitic Codices, and still more the Codex Alexandrinus, were produced in Egypt. It is therefore to vellum MSS that we must look for the custodians of the sacred text from about the date of the Council of Nicæa.

The palæography of vellum MSS has been studied much longer than that of papyri, and rests on a far wider consensus of competent opinion. It may therefore be treated more briefly here. The earliest vellum MSS show a resemblance to the papyri, not only in the use of narrow columns (see § ii.), but in the handwriting themselves. It appears that, when vellum was taken into use

begins in the middle of a line, the first letter of the first complete line) not only projects into the margin, but is considerably enlarged. In later MSS still these enlarged initials become the subject of ornamentation, until we reach the magnificent illuminated initials of the Middle Ages. In the 8th cent. the style of writing grows generally heavier, and there is more distinction between the thick and thin strokes of a letter. In many MSS, too, the characters are larger, especially in the purple MSS, which are a notable feature of this period. In Egyptian MSS of this period (e.g. the Codex Marchalianus of the Prophets) a somewhat stiff and angular style is adopted, which is akin to the hand found in Coptic MSS. After the 8th cent. the best age of uncial writing is past. In the 7th cent. the writing began to assume a sloping form,—always a sign of degeneracy,—and to compensate for its loss of natural strength and firmness by excrescences in the shape of exaggerated knobs and bars at the extremities of the letters. Added to this a tendency to lateral compression is found, which culminates in the so-called 'Slavonic' uncials which dominate the 8th and 9th centuries. In these, whether upright or sloping, the letters are heavy and angular, and tall in proportion to their width. A letter like O, instead of being a circle, is compressed into an oval, or even a diamond shape; while T, K, Γ, and other letters have large bars at the ends of their projecting limbs. A reaction occurs in the 10th cent., when a return to the square and well-rounded characters of the 4th to 6th cents. is seen; but by this time the day for uncial writing was past, and its place was to be taken by a smaller and less cumbrous style.

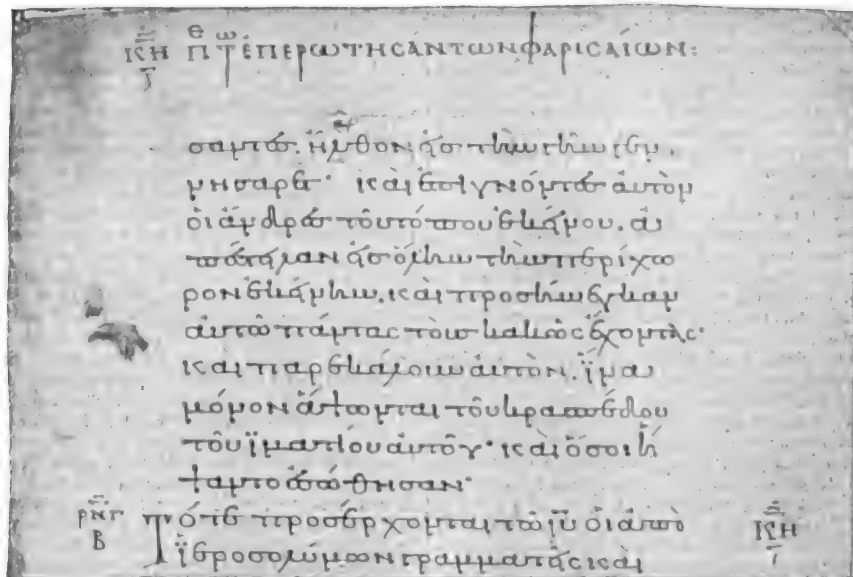

FIG. 5.—GREEK MINUSCULE CODEX, 10TH CENT.
(Brit. Mus. Add. MS 11300).

for the best copies of literary works, the scribes abandoned the sloping and somewhat inelegant writing which is characteristic of the papyri of the 3rd cent., and cast back to the better models of an earlier period. The uncial* characters of the Vatican and Sinaitic Codices appear to be modelled on the best papyrus MSS of the 1st and 2nd cents., a square, upright uncial of medium size, written with much simplicity of style. Ligatures between letters are entirely eschewed, and no cursive element appears in the writing at all. The Cod. Vaticanus has no punctuation or accents by the first hand, no separation of words, no enlarged initials, no projection of letters into the margin to denote a new paragraph. The same is the case with the Cod. Sarravianus (Fig. 4) of the Pent., probably of the early 5th century. The Cod. Sinaiticus differs only in the last detail, the first letter of a new paragraph projecting very slightly into the margin, but without enlargement. In the Cod. Alexandrinus, assigned to the first half of the 5th cent., the hand is larger and heavier, the number of columns on a page is reduced to two, and the first letter of a new paragraph (or, if the paragraph

LITERATURE.—Thompson, *op. cit.*; Gardthausen, *op. cit.*; *Palæographical Society*, facsimiles of MSS; Omont, *Facsimiles des plus anciens manuscrits grecs . . . de la Bibl. Nat.* 1892; Kenyon, *Facsimiles of Biblical MSS in the Brit. Mus.* 1900.

vi. GREEK MINUSCULE WRITING.—The great defect of uncial writing as a vehicle of literature was its cumbrousness. Written without ligatures, in large, heavily-formed letters, it occupied more time and more space than its predecessor on papyrus, and could not be adapted to the production of cheap or handy volumes. Up to the 7th cent. this need was supplied, as has been shown above, by copies upon papyrus; and the failure of the supply of this material drove the scribes ultimately to the production of a substitute. Further, as uncial writing degenerated, it lost its sole recommendation—the beauty of the volumes written in that style; and the way was open to a successor. Both these wants were supplied by an adaptation of the cursive style of common writing to the purposes of literature. It is not to be supposed that uncials were ever the sole manner of writing in existence. From the earliest point at which

* The term is derived from an expression of Jerome's (*præf. ad Job.*), 'uncialibus' ('inch-long'), ut vulgo aiunt, *litteris*, and is applied to writing in capital letters, each formed separately, as distinct from the smaller minuscule style, introduced in the 9th cent., which lent itself easily to cursive writing. In vellum MSS the distinction between uncial and minuscule is clearly marked; but on papyrus it is less evident, and uncial writing on papyrus, as stated above, admitted not infrequently a cursive element.

we have extant remains of Greek writing (3rd cent. B.C.), cursive writing is found in existence side by side with uncial; and common-sense tells us that this must always have been the case, such writing being required for ordinary use, quite apart from the needs of book production. We now have plentiful examples of Greek cursive writing from the 3rd cent. B.C. to the 7th cent. after Christ, with a few specimens from the 8th cent.; and it is only through the accident of the Arab conquest of Egypt that we are unable to trace its development on into the 9th cent. The extant evidence, however, is enough to show that the minuscule hand which was taken into use for literary purposes in the 9th cent. is the direct descendant of that which is found in the Byzantine papyri of the 6th and 7th centuries. The forms of nearly all the letters are the same; only the exuberances of the Byzantine style are repressed, the size of the characters (which is often considerable) reduced, and the whole made far more calligraphic. The Greek minuscule MSS of the 9th and 10th cents. are, in fact, as beautiful examples of writing as exist anywhere; and at the same time the economy in space and labour, as compared with the coarse Slavonic uncials which preceded them, is very considerable (Fig. 5). The effect of the reformation upon the textual tradition of the Greek Bible was very great. The multiplication of copies was rendered infinitely easier, the possession of them was placed within the reach of a much wider circle, and the consultation of the Scriptures was greatly facilitated. The extant uncial MSS of the NT number less than 200, the extant minuscules are nearly 3000; and though much must be allowed for the greater antiquity of the former style (and consequently greater certainty of the destruction of MSS), very much of the disparity must be due to the increased ease with which the minuscule could be produced.

Into the details of Greek minuscule writing from the 9th cent. to the 15th it is not necessary to enter here. When all are so far removed from the original autographs, little turns on the precise date of a minuscule MS of the Bible. It is the character of the text contained in them, and the evidence thence derivable as to the archetypes from which they are descended, that make them valuable or the reverse. Moreover, it is not possible to describe the successive styles of minuscule writing, with the slight variations by which the typical hand of one century can (more or less precariously) be distinguished from that of another, without a copious use of facsimiles. For these the reader may be referred to the publications of the Palaeographical Society or the series of facsimiles of dated MSS in the Bibliothèque Nationale issued by M. Omont. These illustrate at once the predominant hands of the successive centuries, and the uncertainty which must always attend the precise fixing of undated MSS, owing to the sporadic reappearances of the various hands at considerable intervals of time.

The earliest extant dated minuscule MS is dated in A.D. 835 (the Uspensky Gospels); and in the course of this century, though the uncial style was by no means yet extinct, the minuscule hand was perfected into a style of great beauty. It is a firm, upright hand, rather square in character, and sometimes leaning slightly backwards. The letters are frequently linked together, but only in small groups. The breathings are angular ($\text{~} \cdot \text{~} \cdot \text{~}$), the accents small and inconspicuous. The characters are pure minuscule, without intermixture of uncial forms. The writing stands upon the lines ruled in the vellum. Towards the end of the 10th cent. a change is made in this respect, and the writing frequently depends from the ruled lines. Uncial forms of certain letters (such as η , θ , ρ) creep in again among the minuscules. A looser style of writing is adopted, the letters being less firm and square, and more freely spaced out. This is especially characteristic of a number of MSS of classical authors written about the 11th cent., and the same tendencies continue progressively in the succeeding centuries. In the 11th cent., too, the rounded breathing makes

its appearance, and in the 12th it is definitely established as the usual form. In the 12th cent. the minuscule hand is often large and somewhat handsome, though without the compactness of the earlier style; but from this point it degenerates more decisively. The forms of the letters become more irregular, accents are larger and more conspicuous, the practice of contraction is introduced, which in later MSS increases to such an extent as to render them unintelligible except after a special study of the various marks of abbreviation. Accents also are frequently formed in one stroke with the letters, and in every respect the tendency to cursiveness increases. The Renaissance, with its revival of interest in Greek in the West, and the increased demand for handsome specimens of Greek writing which it produced, led to some improvement in calligraphy; but here the invention of printing stepped in, and the handiwork of the scribe was superseded by the mechanical precision of the press.

LITERATURE.—The authorities cited in § v.: Omont, *Facsimilés des manuscrits grecs datés de la Bibliothèque Nationale du IX^e au XIV^e siècle*, 1890, and *Facsimilés des manuscrits grecs des X^e et XI^e siècles*, 1887; Wattenbach and von Velsen, *Exempla Codicum Graecorum litteris minusculis scriptorum*, 1878.

vii. LATIN WRITING.—It does not come within the scope of this article to consider all the forms of writing in which the Bible has circulated; but the Latin version holds such a unique position, as the Bible of the West, and one of such special interest to us, that a short description of Latin writing may be useful. Of its early stages, before the general adoption of vellum, we have much less knowledge than in the case of Greek; for the papyri found in Egypt, which are our chief source of information of the pre-vellum period, contain but very few examples of Latin writing. Even the papyri of Herculaneum are almost wholly Greek; and though we know that papyrus was the main material of book production throughout the whole of the most productive period of Roman literature, and continued to be employed for literary purposes as late as the 7th cent., and for certain official purposes (notably papal rescripts) down to the beginning of the 11th cent., we have no literary works of any substantial size now extant on this material, with the exception of a few papyrus codices of the 6th and 7th cents., long after the victory of vellum had been accomplished. We have nothing to show us what the first editions of Cicero and Caesar, of Virgil and Horace, or even of Tacitus and Pliny, were like. The history of the Latin literary hand begins, where the history of the Greek literary hand began until recently, with the rise of vellum. Of the early non-literary hand we have rather more evidence, in the shape of a few papyri and a considerable number of wax tablets; and this may have been used, like the Greek non-literary hand, for the dissemination of the Scriptures in very early times. On this point, however, there is at present no evidence.

On vellum the history of Latin writing follows substantially the same course as the Greek. It begins with an elaborately-written majuscule hand, in which all the letters are separate; and this is ultimately superseded by a minuscule hand, which from the 9th cent. to the 15th is the universal vehicle of literature. In the majuscule type of hand, however, distinctions are introduced which find no place in Greek. The earliest phase is that of writing in *capitals*, in which rounded forms of letters are rare, the general character being the same as that of inscriptions upon stone. These, again, are subdivided into *square capitals*, in which the letters are even in height and square in build, and *rustic*, in which the horizontal strokes are very short in proportion to the perpendicular. Of square capitals very few specimens now remain (notably two fragmentary MSS of Virgil), and it seems clear that they were used only for *éditions de luxe*, and never were the form of writing exclusively in use. The shapes of the letters are essentially the same as in rustic capitals, only they are increased in breadth. The two styles are contemporaneous, and of the two the rustic style is unquestionably that which was in common use. It is also the earlier in date, going back to the papyrus period (e.g. a Roman military roll of A.D. 158, *Pal. Soc. ii.* 165); while the heavier square capitals can hardly have been written except on vellum. Rustic capitals are found in the great early MSS of Virgil, the Romanus and Palatinus of the 4th cent., and the Mediceus of the 5th; also in the Bembinus Terence (4th-5th cent.), the Paris Prudentius (4th cent.), and even as late as the Psalter falsely attributed to St. Augustine, but really of the early 8th cent., and the Utrecht Psalter of the 9th cent. Commoner, however, than the rustic hand,—at any rate from the 4th cent. onwards,—is the other form of the

majuscule hand known as *uncial*. In this style many of the letters (notably A D E H M), which are angular in the capital hand, are rounded into curves, and vertical strokes are habitually carried above or below the line of writing. This is the hand found in the earliest extant MSS of the Latin Bible, such as the Codd. Vercellensis (4th cent.), Veronensis and Palatinus (4th-5th cent.), Bobbiensis (5th-6th cent.), and other fragments of the Old Latin version; and from the 6th cent. onwards it ousts the capital style from the field, with the exception of a few isolated examples, such as those mentioned above. At first rather a small and irregular hand, without much pretension to beauty, it improves in regularity, firmness, and handsomeness up to the beginning of the 8th cent.; the MSS of that period, such as the Lindisfarne Gospels and the Cod. Amiatinus, being probably the most magnificent examples of Latin writing in existence. Meanwhile there was a tendency to intermix minuscule forms with uncials in writing of a less formal character, and this, which is known as the *half-uncial* style, is found as early as the 6th cent. adopted into use for literary purposes (e.g. a MS of Hilary at Rome, written not later than A.D. 500-10). Subsisting side by side with the uncial style, the half-uncial hands paved the way for a general adoption of minuscules, which thus comes by an easier and less abrupt transition than in the case of Greek. On the one hand, the majuscule style had been gradually toned down successively from capital to uncial, from uncial to half-uncial; on the other, the cursive hand in daily use for common purposes was raised into the various 'national' hands, Lombardic, Visigothic, and Merovingian, which, though inelegant enough, were still book-hands of a kind. By the 8th cent. the old literary hands had been broken up, and their place taken by these various species of mixed hands which had neither the beauty of the majuscule nor the ease and simplicity of the cursive. From this state of chaos Latin calligraphy was rescued by the reforms introduced in the reign and under the inspiration of Charlemagne. The Caroline reform, accomplished principally at the school of Tours, under the direction of Alcuin of York, evolved a style of writing which was at once graceful and clear, easy both to write and to read, which was destined to supersede the various national hands then in existence, and form the foundation of the minuscule hand which was the vehicle of literature until the invention of printing. To the Caroline minuscule style belong the Bibles containing the recensions of the Vulgate text by Alcuin himself and by Theodulf of Orleans; while the beautiful uncials of the various contemporary 'Golden' Gospels, produced perhaps in the palace schools at Aachen, show how the best traditions of the 8th cent. could be carried on.

It is impossible here to follow the developments of Latin palaeography in all their details. For the history of the biblical text perhaps the most notable is the compressed hand of the 13th cent., in which so many Bibles are still extant. Coming after the bold and handsome hand of the 12th cent., its rigidity and compression are very noticeable. The scribe seems anxious to economize space to the last degree; and this, aided by the very thin vellum then in use, enables him to produce Bibles in a comparatively small compass. It is natural to connect this activity on the part of the scribes in multiplying copies of the Bible with the activity of the scholars of the University of Paris at this same period in revising and stereotyping its text; the whole testifying to an increased interest in the reading of the Scriptures, which may perhaps be attributed to the influence of St. Louis. In the 14th and 15th cents. it is only necessary to point out the divergence of styles in the north and south of Europe; the northern countries developing a heavy character, which, imitated by the printing-press of Gutenberg, was the parent of the 'black-letter' type of the Mazarin Bible and other early printed books; while in Italy a happier taste led to a renaissance of the Caroline style in the beautiful Italian hand from which, through the intermediary of Aldus and the other printers of the south, our modern types are derived.

LITERATURE.—Thompson, *op. cit.*; *Palaeographical Society*, facsimiles; Marini, *I Papiri Diplomatici*, 1805; Wattenbach and Zangemeister, *Exempla Codicum Latinorum litteris majusculis scriptorum*, 1876-79; Delisle, *Album Palaeographique*, 1887; Kenyon, *Facsimiles of Biblical MSS in the British Museum*, 1900.

viii. PALIMPSESTS.—A few special subjects remain to be noticed. One peculiar class of MSS consists of palimpsests, or MSS from which the original writing has been removed in order that the material may be used again. With papyrus this could hardly be done. The material would not stand scraping with a knife, and, although ink could be removed with a sponge, it does not appear that this could be effected (at any rate without considerable damage to the surface) except when the ink was fresh and had not sunk deeply in. Certainly it is very seldom that traces of an earlier writing are observable on papyrus. Since the writing was in the first instance confined to one side of the roll, the *verso* was still left open for use by a later possessor when writing material ran short; and further than this it does not seem to have been usual or possible to go. With vellum

it was different. The tougher material admitted of the use of the knife, with which the scribe is habitually represented in medieval miniatures, and many instances are known of MSS in which the original writing has been scraped or washed off, and a later work substituted. Such MSS are known as *palimpsests* ('scraped again,' *πάλιν* and *ψάω*); and, since the original writing is seldom wholly obliterated, it is often possible to decipher it in whole or in part. The most notable MSS of the Bible in this category are the Codex Ephraemi (C) at Paris, the Codex Nitriensis (R) in the British Museum, and the Sinaitic Codex of the Old Syriac version. In the first instance the upper writing is Greek, in the two others Syriac. Other biblical palimpsests are the Codex Dublinensis (O of the LXX, Z of the Gospels), Codex Cryptoferratensis (I of the LXX), the Codices I¹⁻⁷, P, Q, T¹, W¹, W² (in part), Z, T, T², of the Gospels, M, P, Z, of the Acts, R of the Pauline Epistles, t of the Old Latin Gospels, s of the OL Acts, *que* of the OL Pauline Epistles, the Fragmenta Wirceburgensia of the OL Pentateuch and Prophets, some leaves at Vienna of the OL Kings, a Reichenau fragment of the OL Psalms, some Vatican and St. Gall fragments of the OL Prophets, and some fragments of the Pauline Epistles in Gothic at Milan. In most of these MSS the original writing is of the 5th or 6th cent.; the upper writing is of various dates.

LITERATURE.—Scrivener, *Introd. to Text. Crit. of NT*; Gregory, *Prolegomena to Tischendorf's NT Grace*; Swete, *Introd. to the OT in Greek*.

ix. STICHOMETRY AND COLOMETRY.—A *στίχος* (lit. 'row') is used primarily to mean a line of poetry. Hence it comes to denote a length of writing equal to an average line of poetry, and in this sense is used as a unit of measurement for literary purposes. Books are described as possessing so many *στίχοι*, and scribes were paid according to the number of *στίχοι* written by them. Thus Dionysius of Halicarnassus (vi. 1126) states that the extant works of Demosthenes contained 50,000 or 60,000 *στίχοι*; and the edict of Diocletian, *de pretiis rerum venalium*, fixes the scribe's pay at 25 denarii per 100 *στίχοι* for the more expensive style of writing, and 20 denarii for the second quality. Galen (*de Placit. Hipp. et Plat.* viii. 1) expressly states that the unit of measurement was the average Homeric hexameter, reckoned at 16 syllables (it was independently calculated by Ch. Graux as 37-38 letters, but Galen's statement shows that the syllable was the basis of calculation actually adopted). Rendel Harris has argued that the average iambic line of 12 syllables was also employed at times, and that this is, in fact, the second quality mentioned in the edict of Diocletian; but explicit confirmation of this hypothesis has not yet been obtained. The system of stichometry was also applied to Latin MSS, though evidences of its use are less numerous. A 4th cent. MS in the Phillips Library at Cheltenham (Mommensen, *Hermes*, xxi.) contains a computation of the contents of the works of Cyprian in *στίχοι* which are the average Vergilian hexameter. The number of *στίχοι* in the various books of the Bible is stated in many MSS, no doubt for the purpose of calculating the scribe's pay; but there are considerable discrepancies in the figures. The oldest extant tables of biblical stichometry are the Cheltenham list (which includes the biblical books as well as Cyprian), a list (applying to the Pauline Epistles only) in the Cod. Sinaiticus (N), a list in the Cod. Claromontanus (D^{msl}), a list in an 8th cent. Freisingen MS at Munich, published by C. H. Turner, and the list of Nicephorus in the 9th cent.: for the figures see Swete, *Introd. to the OT* in

Greek, p. 346; Scholz, *Prolegomena to the NT*, vol. i. p. xxviii; Turner, *Journ. Theol. Stud.* ii. 236. The division into *στίχοι*, which is purely mechanical, must be distinguished from the division of texts into *κῶλα* and *κόμματα*, which is a division into clauses according to the sense. Some MSS are thus written, not continuously, but in short sense-lines of varying length, presumably in the first instance to facilitate reading aloud. Such *colometry* was a special feature of the edition of the Acts and Epistles by Euthalius, and appears now in the chief MS of that edition, H of the Pauline Epistles. It is also used in the bilingual MSS, D D₂ E₂, in order to keep the two versions more exactly parallel than they would be in continuous script, and to facilitate comparison between them. Between *κῶλα* and *κόμματα* there is no clear distinction, but the latter denotes somewhat shorter clauses than the former.

LITERATURE.—Gruen, *Revue de Philologie*, 1878, p. 97; Diels, *Hermes*, xvii, 1882; J. Bédard Harris, *Stichometry*, 1893; Thompson, *op. cit.* ch. vi.

x. LIBRARIES.—In conclusion, it may be useful to give some account of the manner in which books were preserved in ancient and mediæval times. The most ancient library of which we have precise knowledge is that of *Ashur-bani-pal*, king of Assyria (B.C. 668–626), the contents of which have actually come down *en masse* to the present day. It was not founded by Ashur-bani-pal, having existed under his predecessors, Sargon, Sennacherib, and Esarhaddon; but it was under his patronage that it assumed its great proportions. He set himself deliberately to collect books, sending scribes to make copies of works in other libraries, and instructing scholars to compile vocabularies of the Sumerian and Assyrian languages. In 1850 this library was disinterred by Sir H. Layard from the mounds of Kouyunjik, and its contents, amounting to over 20,000 tablets, are now in the British Museum. The tablets appear to have been laid on shelves, grouped in classes, and labelled. They included historical, literary, theological, magical, and scientific works, as well as letters, contracts, and other business documents; and the library was apparently accessible to the people in general. —In *Egypt* there must have been depositories of the papyrus rolls, which were produced in large numbers from very early times; probably, the literature being almost wholly theological, they were preserved in or about the temples. Diodorus Siculus (i. 58) states that Osymandias, who has been identified with Ramses I., possessed a large library; and two officials of his time are described as librarians. But no details are known of these early Egyptian libraries. —Nor have we express mention of libraries in *Palestine* in pre-Christian times,* though the references in the Books of Samuel and Kings to other books suggest the probability of the existence of some repository where these works might be consulted (2 S 1¹⁸, 1 K 11⁴¹ 14¹⁹, 20 15²³ etc.). —In the early history of *Greece*, even when her literature was at its height, libraries (as distinct from public record offices, which certainly existed in Athens and presumably elsewhere) play but a small part. Pisistratus is stated to have formed a library, which was taken to Persia by Xerxes, and restored long after by Seleucus Nicator (*Aul. Gell.* vi. 17). Athenæus (i. 4) mentions libraries belonging to Polycrates of Samos, Nicocrates of Cyprus, the archon Euclides, the poet Euripides, and Aristotle. The latter is said by Strabo to have been the first person to collect books; and indeed it is evident that his works could not

have been produced without a library. After his death his library was preserved at Scepsis; and, after having been sold to Apellicon of Teos and brought to Athens, it was ultimately taken by Sulla to Rome. The two most famous libraries of the Greek world, however, were those of Pergamum and Alexandria. The former, founded by Attalus I. and Eumenes II. at the end of the 3rd cent. and beginning of the 2nd cent. B.C., flourished greatly for a century and a half, but ultimately was transported by Mark Antony to Alexandria to replace that which had been destroyed by fire in Caesar's wars. It is said to have consisted of 200,000 rolls at that time. The library of Alexandria, founded perhaps by Ptolemy I., was especially encouraged by Ptolemy II. (Philadelphus). It was a department of the great Museum, and every effort was made to gather into it all extant literature, and to attract the best scholars to accept posts in connexion with it. According to the well-known story embodied in the letter of Aristæus, it was in connexion with the establishment of the Alexandrian library, and at the express desire of Ptolemy Philadelphus, that the production of the LXX was undertaken. The main library, in the Museum, is stated to have been destroyed during the siege of Caesar in Alexandria, and thenceforth the principal Alexandrian library was that of the Serapeum, which previously had held a secondary place. This in turn suffered greatly at the sack of the Serapeum by Bishop Theophilus in 390, so that it is doubtful if much was left to be destroyed by the Arabs in 641. From the date of the foundation of these two great libraries, public libraries, previously almost unknown in Greece, seem to have become common. Polybius (xii. 27) in the 2nd cent. B.C. speaks as if they would naturally be found in most large towns. At *Rome* they were of later growth. Private collections of books must certainly have been known to Varro, and Cicero's library was an extensive one for those days. Æmilius Paullus and Lucullus brought back libraries from their wars in the East. Caesar planned the establishment of a public library; but the execution of it was left to Augustus, who, however, had been slightly anticipated by Asinius Pollio. From this point public libraries, often in connexion with temples, became common in Rome, as elsewhere. A concrete example of a library, though on a small scale, is provided by that at Herculaneum, in which the papyrus rolls, now in the Naples Museum, were found. It was a very small room, with shelves round the walls, on which lay the rolls (1756 in number); and a cabinet, also containing rolls, stood in the middle of the room.

Coming to Christian times and Christian literature, it must have been long before anything in the nature of a library was required. The only books with which Christians, as such, had to deal were those of the OT and NT, and the few books which for a time hovered on the border of the Canon, such as the Epistles of Clement and Barnabas, the Shepherd of Hermas, the Gospel of Peter, and the like. These would either be in private possession or the property of a Church, which would also, in time, require something in the nature of service books. The earliest Christian libraries, therefore, apart from the small collections which an individual might have, were attached to churches; but even these could not attain to any considerable size, so long as they were liable to dispersion in the days of persecution. The earliest of which we have individual knowledge is that which Pamphilus († A.D. 308) established at Cæsarea, consisting primarily of the works of Origen. Here the great scholar's *Hexapla* and *Tetrapla* were preserved, and the colophons of several MSS (notably the Codd. Sinaiticus and Marchalianus, and

* Little importance attaches to the statement in 2 Mac 213 about Nehemiah founding a library (καταβαλλόμενος βιβλιοθήκην).

Cod. H of the Pauline Epistles) testify to the use of these autographs for the purposes of revision. On the adoption of Christianity as the religion of the State, a library was founded by Constantine in his new capital, which was greatly increased by his successors. With the institution of monasticism, monasteries as well as churches became the homes of libraries. Pachomius, the founder of monasticism in Egypt, required his monks to study the Scriptures, and his rules (Migne, *Patr. Græc.* xl.) clearly imply ready access to manuscripts. Throughout the Eastern empire, though learning was never so exclusively the possession of the clergy as it became in the West, the large majority of scribes were connected with churches or monasteries. Naturally, this is especially the case with MSS of the Bible or theological works; but in the list of scribes of Greek MSS of all kinds, whose names are on record, by far the most are monks or clerics (Gardthausen, *Griech. Pal.* p. 302 ff.). In the West, so long as the old Roman civilization remained, private and public libraries continued to exist throughout the empire, and the great provincial mansions of the nobility were well stocked with books, literary culture being one of the marks of that leisured and luxurious section of society.* The irruptions of the barbarians swept this civilization away. The pagan institutions for the preservation and multiplication of literature went to the ground, and the sole libraries which continued to exist were those of churches, and especially of monasteries. Benedict, like Pachomius in the East, prescribed reading as one of the special duties of his monks, thereby establishing a tradition which became an honourable characteristic of monasticism in general, and of the Benedictines in particular. In the early part of the Middle Ages, learning flourished most in the north of England, which was made famous by the scholarship of Bede and by the excellent schools of Wearmouth and Jarrow. From the north of England proceeded what are perhaps the most beautifully written MSS that Latin scribes ever produced—the Codex Amiatinus and the Lindisfarne Gospels. The history of these MSS establishes a point of some importance, namely the ease with which books were transferred from one part of Europe to another. The Lindisfarne Gospels was certainly transcribed from an exemplar brought from Naples; and the Codex Amiatinus, which must have been copied from the same or a similar volume, was itself (though it is one of the largest MSS in existence) conveyed from England to Rome as a gift to the Pope. From England learning spread southward to France and Switzerland; and while Alcuin founded the famous school of Tours, from which a new tradition of calligraphy came forth to influence all Europe, Irish monks founded (and to a large extent peopled) St. Gall, which became the centre of learning and of writing in the Rhone valley and the adjacent countries. As monasticism grew and the monasteries became rich, so did their libraries increase. Monte Cassino, Bobbio, Grotta Ferrata, in Italy; Fleury, Cluny, Corbie, St. Germain des Prés, in France; Fulda, Reichenau, in Germany; St. Gall, in Switzerland; Canterbury (both St. Augustine's and Christ Church), Rochester, St. Albans, York, Durham, in England,—these are only a few of the most famous monasteries whose libraries were

special homes of literature in the ages preceding the invention of printing. The accommodation for books was at first neither large nor luxurious. The early buildings of monasteries show no place for a library. The books (apart from such precious ones as were placed in the shrine of the patron saint) were stored in cupboards (*armaria*) along the sides of the cloister, or in recesses in its walls; and in the cloister the monks read and copied them. In course of time the cloister windows adjoining the books were glazed as a protection, and the elder monks, at least, had 'carrells' or pews in which they could sit at their work. As books multiplied, increased provision had to be made for them. In the Cistercian houses, small cupboard-like rooms were introduced, in which the books lay upon shelves round the walls, much after the fashion of the Roman library at Herculaneum. In the 14th and 15th centuries larger rooms were provided, generally above some earlier building; and here the books could be arranged in regular bookcases. Libraries are provided for also in the statutes of the earliest colleges at the universities; and the manner of them can be realized from examples still extant, as in the Laurentian library at Florence. Sometimes the books lay on desks, sometimes they stood on shelves, with desks below or above on which they could be placed for consultation. In either case they were normally attached to their place by chains, so that they could not be carried away without permission. For the copying of MSS special *scriptoria* were provided in the great monasteries, and monks with a turn for literature were told off for this duty; so that in many places (as at Grotta Ferrata or St. Albans) distinct traditions of penmanship were established, and special styles, whether of historical chronicles or of illuminated miniatures, were cultivated. For a long time these were practically confined to monasteries. Only with the revival of learning did literature and art issue out to the world in general; and then the end of the reign of manuscripts was at hand. In the 15th and 16th centuries we find many scribes (especially the Greek scribes in Italy) and many miniaturists who were certainly laymen; and so, before the decline of monasticism was accomplished, its special work as the exclusive guardian of literature was done, and the secular world was ready to take into its own keeping the heritage of learning which the monks had been so largely instrumental in handing down to it.

Z

ZAANAN (זָאנָן; B^{ab} AQ* *Σενναδρ*, Q* *Σενναδρ*).—A place mentioned, along with SHAPHIR and BETH-EZEL in Mic 1¹¹, where there is a characteristic word-play: 'the inhabitress of Zānān went (*yāzēah*) not out' (for fear of the enemy). Zānān is generally considered to be the same as **Zenan** (זֵנָן; B *Σεννά*, A *Σεννάμ*, Luc. *Σενάμ*) of Jos 15³⁷, an unidentified town in the Shephelah.

ZAANANNIM.—In Jos 19³³ 'the terebinth of Bēzā'anaim' (בְּזָאֲנַיִם) is mentioned in defining the boundaries of Naphtali, while in Jg 4¹¹ 'the terebinth of Bēzā'anannim' (בְּזָאֲנַנִּים); RV gives in both passages 'the oak' (m. 'terebinth') in Zaanannim' is the site of the encampment of Heber the Kenite and the scene of Sisera's murder by Jael. There can be little doubt that ז is not the preposition but part of the name (a conclusion which is strongly supported by the absence of the art. from זאנן), and that the form בְּזָאֲנַנִּים deserves the preference (see Dillm. *Jos. ad loc.*). The LXX has in Jos 19³³ B *Βεζανειμ*, A *Βεζαννιμ*, Luc. *Σενναρειμ*; in Jg 4¹¹ it translates, B *καρυοφυλλοντων* [γρ βε covetous], A *δυσπαισμενων* [confusing with *שננים*].

The site of Bēzā'anaim is quite uncertain. It is difficult, not to say impossible, to reconcile some of the other data in Jg 4 with the statement in v. 11 that it was 'by Kedesh,' if by the latter is meant KEDESH-NAPHTALI. Equally unsuitable is the Kedesh of Issachar (? *Abu Kadeis*) between Taanach and Megiddo. Conder (*Tent-Work*, ii. 132), favoured by G. A. Smith (*HGHL* 395), identifies Bēzā'anaim with *Khirbet Bessūm*, E. of Tabor, and takes Kedesh to be *Kadish*, a ruin on the shore of the Sea of Galilee, S. of Tiberias. Cheyne (*Encyc. Bibl.* i. 571), somewhat arbitrarily, emends בְּזָאֲנַנִּים to קִדְשֹׁנִים, supposing the reference to be to a Kidshon or Kadshon in Issachar, whose inhabitants would be called Kidshonim. Upon this theory the words זאנן אחרקס of Jg 4¹¹ must of course be viewed as a gloss. (See, further, Moore, *Judges*, pp. 121, 125 f.; G. A. Smith, *l.c.*; Neubauer, *Géog. du Talm.* 225).

On the difficulties of the narrative of Jg 4 see artt. BARAK, DEBORAH, SISERA.

J. A. SELBIE.

ZAAVAN (זָאָוָן).—A descendant of Seir, Gn 36²⁷ (A *Ζουκάμ*)=1 Ch 1⁴² (B *Ζουκάμ*, A *Αζουκάμ*, Luc. *Ζαυάν*). The tribe of which he appears here as the eponymous head has not been identified.

ZABAD (זָבָד, prob. a contraction for זָבָדָה or זָבָדִּי).—The word זָבָד and others formed from it occur as proper names in Palmyrene and Nabatean inscriptions (Lidzbarski, *Nordsem. Epigraph.* p. 265). Fuller forms are ZEBADIAH, ZABDIEL='my gift is Jehovah' or 'God.' G. B. Gray (*HPN* 222 f.) points out that there are in the OT about 36 persons bearing the name Zabad or names formed from it. Of these, 23 occur in Chron. alone. No more than 3 are mentioned in pre-exilic books. In the case of one of these (and we may add possibly in that of the other two) the text is doubtful, and the original may not have included the element *Zabad*. He draws the conclusion: 'The historical character, therefore, of persons bearing one of these names and mentioned only by the Chronicler seems to me suspicious.' Cf. Nos. 1. 2.

* It is sometimes difficult to be certain whether the same name in different passages refers to one or to more persons.

Zabad occurs in the OT as the name of the following:—1. One of the links in the genealogy of the Judahite family Jerahmeel, 1 Ch 2³⁶. (*Zaβēd*) 11⁴¹ (B *Zaβēr*, A *Zaβār*). Cf. GENEALOGY, § IV. 12, *Sheshan*.

1 Ch 2³⁴⁻⁴¹ is an appendix to the account of the clans of Jerahmeel, which is closed in v. 33 by the subscription: 'these are the sons of Jerahmeel.' A doubt has been raised as to the identity of Zabad ben Nathan ben Attai ben Sheshan and Ahlai (אֶחְלַי) his wife in 231-37, and Zabad ben Ahlai, one of David's mighty men, in 11⁴¹. Siegfried-Stade and *Oxf. Heb. Lex.* regard the former as a family name, and the latter as an individual. There can be little doubt that the Chronicler intended to identify them. The historical value of the sections in which this Zabad is mentioned is uncertain. Kittel (*SBOT*) regards 234-41 as one of the latest additions to Chronicles; Kautzsch (*Bibel*), however, refers it to an ancient source; while Gray (*HPN* 235) says of the section as a whole: 'The character of the thirteen names presents nothing inconsistent with the genealogy being genuine.' He is, unfortunately, doubtful about the names in which we are specially interested. 'The only names which appear to me suspicious are זָבָד [Zabad] and, in a less degree, אֶחְלַי [Attai].' 1 Ch 11^{41b-47}, a passage peculiar to Chron., is the direct continuation of vv. 28-41a, which = 2 S 23²⁴⁻³⁹. Possibly, therefore, vv. 41b-47 are from the same ancient source as the rest of the list, and were accidentally omitted from Samuel (so Kautzsch, Kittel, etc.). The concluding note in 2 S 23³⁹, 'thirty and seven in all,' is transposed by LXX, and the number 37 does not correspond with the list. But Gray (*op. cit.* 229 ff.) holds that if vv. 41b-47 is based on an ancient document, the text is very corrupt. Possibly Zabad b. Nathan (1 Ch 2³⁶) is the same as Zabud b. Nathan, Solomon's priest and 'king's friend' in 1 K 4⁵. The latter occurs in some texts and versions (see ZABUD, and cf. No. 3) as *Zacur* or *Zacurr*, so that we might read for Zabad in 1 Ch 2³⁶ *Zacar*, a contraction of the familiar *Zechariah*. In some scripts of Heb. *Zacar* (זָכָר) and *Zabad* (זָבָד) can hardly be distinguished. Cf. JOZACAR. If Zabad is accepted, and 1 Ch 2³⁴⁻⁴¹ is regarded as based on some old genealogy setting forth the relations of clans, the apparent occurrence of Zabad as an Ephraimite clan in 1 Ch 7²¹ may indicate that the clan was at one time reckoned to Judah, and at another to Ephraim; or that it was ultimately divided between the two tribes. Note also the Elishama in 2²⁴ and 7²².

2. A link in an Ephraimite genealogy, 1 Ch 7²¹ (*Zāβēd*), ending apparently in a certain 'Ezer and Elead,' who were slain by the men of Gath. Zabad in MT is the son of Tahath and the father of Shuthelah. In LXX⁸, however, the genealogy is much shortened, and it is Zabad who is slain—thus, 'And the sons of Ephraim, Sothalath. The sons of Laada, Noome, his son, Zabad his son: and the men of Gath killed him.' It is pointed out in SHUTHELAH that Zabad (זָבָד) here is probably a corruption of 'and Bered' (בֶּרֶד) repeated from v. 20.* If so, this Zabad disappears. If, however, Zabad is retained here, cf. No. 1.

3. In 2 Ch 24²⁸ the name of one of the murderers of Joash is given as Zabad (B *Zaβēl*, A *Zaβēθ*), the son of Shimeath the Ammonitess. 2 K 12²¹ has Jozacar. Perhaps we should read here *Zacar* (Kittel, *SBOT*); cf. JOZACAR.—4. 5. 6. Three laymen of the time of Ezra, who had married foreign wives, whom they promised to divorce: (a) Ezer 10²⁷ of the benē Zattu (B *Zaβaδāδ*, A *Zaβāδ*; 1 Es 9²⁸ *Zāβaδos*, cf. SABATUS). (b) Ezer 10²⁸ of the benē Hashum (B *Zaβēl*, A *Zaβāδ*; 1 Es 9²⁸ B *Σαβανναους*, A *Βανναους*, cf. SABANNEUS). (c) Ezer 10²⁸ of the benē Nebo (B *Σεβμ*, A omits both this and the following *Zebina*; 1 Es 9²⁸ *Zaβaδaias*, cf. ZABADAIAS). Apparently *Zebina* is omitted. One of the two, *Zabad*, *Zebina*, may be due to accidental repetition.

W. H. BENNETT.

ZABADÆANS (*Zaβaδaioi*).—The name of an Arab-

* So also GENEALOGY, VII. b 4, and in *Encyc. Bibl.* Hogg, art. 'Ephraim,' 12, and Hervey quoted by Hogg. The present writer arrived at this view independently.

ian tribe defeated by Jonathan (1 Mac 12³¹). The Pesh. form of the name seems to mean *Zubaidæans*, i.e. Banu Zubaid, which was the name of a famous Arabian family; and indeed derivatives from the root *Zbd* form many proper names in Arabic and Nabatean (the name substituted for Zabadæan by Jos. *Ant.* XIII. v. 11), though the verb itself in its old sense 'to give' is not found in Arabic. The name of the tribe defeated by Jonathan is thought to be retained in *Zebdany* or *Zabadani*, 'a well-known district between Damascus and Baalbek, where the river of Damascus rises' (Yākut, ii. 913). The plain of Zebdany is thus described by Conder, *Tent-Work in Palestine*, i. 249: 'It is flanked on the west by the ragged and castellated ridges of the Anti-Lebanon, and on the east by a range of equal height. The plateau is bare and treeless, except towards the north, where are groves of poplar. Through the centre runs the river, its course marked by green bushes.' The situation of the plain seems to agree with the movements recorded in 1 Mac. exceedingly well. *Beth Zabdai*, to which allusion is sometimes made in the Rabbinic writings, and which some have connected with this place, has been shown by Kohut (*Aruch Completum*, ii. 68) to belong to a different region. D. S. MARGOLIOUTH.

ZABADEAS (Ζαβαδάας, AV Zabadaias), 1 Es 9²⁵ = Zabad, Ezr 10².

ZABBAI (זבאי).—1. One of the descendants of Bebai who had married a foreign wife, Ezr 10²⁵ (BA Ζαβού, Luc. Ζαβούθ); called in 1 Es 9²⁵ *Jozab-dus*. 2. Father of Baruch who assisted in the rebuilding of the wall, Neh 3³⁰ (BA Ζαβού, & Ζαβούθ, Luc. Παββαι). The *Kêrê* has, perhaps rightly, זבאי *Zaccal*, a name which occurs in Ezr 2⁹ (B Ζαχού, A זכא, Luc. Ζαχαρίας) = Neh 7¹⁴ (BN Ζαβού, A Ζαχούθ, Luc. Ζαχαρίας), and is the origin of the *ZACCHÆUS* of 2 Mac 10¹⁹ and the NT.

ZABBUD (זבבד, *Kêrê* זבבד *Zaccur*; B. om., A Ζαβούδ, i.e. זבד [cf. 1 K 4³], Luc. Ζαχούθ).—An exile who returned with Ezra, Ezr 8¹⁴. In 1 Es 8¹⁰ זבבד is apparently corrupted into *ISTALCURUS*.

ZABDEUS (Ζαβδαῖος), 1 Es 9²¹ = Zebadiah of the sons of Immer, Ezr 10²⁰.

ZABDI (זבדי? 'gift of Jah,' or perh. 'my gift,' or 'gift to me'; NT Ζεβεδαῖος, ZEBEDEE).—1. The grandfather of Achan, Jos 7¹. 17. 18 (B Ζαμβελ, A Ζαβελ, Ζαμβελ, Luc. Ζαβδ(ε)λ), called in 1 Ch 2⁶ *Zimri* (B Ζαμβελ, A Ζαμβελ). 2. A Benjamite, 1 Ch 8¹⁹ (B Ζαβδελ, A Ζαβδελ, Luc. Ζεβδελ). 3. An officer of David, 1 Ch 27²⁷ (B Ζαχβελ, A and Luc. Ζαβδελ). 4. A Levite, Neh 11¹⁷ (B om., A Ζεχβελ, Luc. Ζεχβελ); but read probably זכרי *Zichri*, as in || 1 Ch 9¹⁵.

ZABDIEL (זבדיאל 'my gift is El').—1. Father of one of David's officers, 1 Ch 27² (BA Ζαβδελ, Luc. Ζαβδ(ε)λ). 2. A prominent official, overseer of 128 'mighty men of valour' in Nehemiah's time, Neh 11¹⁴ (B Βαδ(ε)λ, A Ζοχρ(ε)λ, Luc. Ζεχρ(ε)λ). 3. An Arabian who put Alexander Balas to death and sent his head to Ptolemy, 1 Mac 11¹⁷ (Ζαβδ(ε)λ), Jos. *Ant.* XIII. iv. 8 (Ζαβδελος).

ZABUD (זבד 'bestowed').—The son of Nathan, 'priest' and 'king's friend' (see art. *PRIESTS AND LEVITES*, p. 73), 1 K 4⁵ (B Ζαβούθ, A Ζαββούθ, Luc. Ζαχούθ, i.e. זבד).

ZACCAI.—See **ZABBAI**.

ZACCHÆUS (Ζαχαῖος), the same name as *Zaccai*

('pure') in the OT (Ezr 2⁹, Neh 7¹⁴).—1. The publican. All that we know of him from the Bible is to be found in Lk 19¹⁻¹⁰. He was a Jew,* and a chief official amongst the publicans in and about Jericho, where a considerable amount of revenue was raised from the palm-groves and balsam (Joseph. *Ant.* XV. iv. 2). Zacchæus had therefore great opportunities for growing rich. He was a man of short stature. Anxious to see Jesus, he climbed up into a sycamore tree† to be above the throng that surrounded our Lord. On coming to the place, Jesus called to him to come down, and invited Himself to his house. This delighted Zacchæus, though the bystanders murmured at the choice of lodging which our Lord had made. He declared his anxiety to be liberal to the poor, and to make fourfold restitution to any whom he had wronged. His wish to do right won from Christ the declaration: 'To-day is salvation come to this house, forasmuch as he also is a son of Abraham. For the Son of man came to seek and to save that which was lost.' In the *Clementine Homilies* (iii. 63), Zacchæus, after being companion of St. Peter, is made by him bishop of Cæsarea. By 'Prædestinatus' he is said to have combated the errors of Valentinus and Ptolemæus (a disciple of Valentinus),‡ though this is chronologically impossible. There is no early authority for making Zacchæus a bishop at all. A Zacchæus is mentioned by the Talmud as living at Jericho, the father of the celebrated Rabbi Jochanan ben-Zachai.

2. An officer of Judas Maccabæus, 2 Mac 10¹⁹.

H. A. REDPATH.

ZACCUR (זכור).—1. A Reubenite, Nu 13⁴ (B Ζαχούρ, A Ζαχού, Luc. Ζαχούθ). 2. A Simeonite, 1 Ch 4³⁵ (B om., A Ζαχούθ, Luc. Ζαχούθ). 3. A Merarite, 1 Ch 24²⁷ (Ζαχούθ). 4. An Asaphite, 1 Ch 25² (B Ζαχούθ, A Ζαχούθ) 10 (B Ζαχούθ, A Ζαχούθ), Neh 12³⁵ (Ζαχούθ). 5. One of those who assisted Nehemiah to rebuild the wall, Neh 3³ (B Ζαβούθ, A and Luc. Ζαχούθ). 6. One of those who sealed the covenant, Neh 10¹³ (B Ζαχούθ, A Ζαχούθ, Luc. Ζαχούθ), prob. same as mentioned in 13¹⁵ (BA Ζαχούθ, Luc. Ζαχούθ). 7. Ezr 8¹⁴ *Kêrê*. See **ZABBUD**.

ZACHARIAH (Ζαχαρίας, whence AV *Zacharias*).—In His denunciation of the Pharisees and the guilty nation of the Jews, our Lord declares that the innocent blood of the prophets is to be required of them, 'from the blood of Abel the righteous unto the blood of Zachariah the son of Barachiah, whom ye slew between the sanctuary and the altar' (Mt 23³⁵, cf. the || Lk 11⁵¹). The reference is almost certainly to the murder of Zechariah (see **ZECHARIAH**, No. 11) recorded in 2 Ch 24²⁰⁻²². This is far more likely than the view held by some, that the Zachariah intended is the father of John the Baptist (see **ZACHARIAS**), who, according to Origen (*Com. in Matt.*), was killed in the temple. The reason why Jesus fixes upon a murder in the time of king Joash (c. 840-800 B.C.) is probably because the Books of Chronicles already in our Lord's day came last in the Canon of the OT. 'It was equivalent to an appeal, in Christian ears, to the whole range of the Bible from Genesis to Revelation' (Ryle, *Canon of the OT*, p. 141).

Some difficulty is occasioned by the designation 'son of Barachiah.' The Zechariah of 2 Chron. was the son of the high priest Jehoiada. The only 'Zechariah the son of Berechiah' known to us is the prophet who was contemporary with

* Tertullian (*adv. Marc.* iv. 37. 1) says that he was a Gentile. This is contradicted by the 'son of Abraham' of Lk 19⁹.

† Not the tree commonly called sycamore, but one with fig-like fruits and leaves like those of the mulberry tree.

‡ See Harnack, *Geschichte der altchristlichen Litteratur*, vi. l. p. 791.

Haggai (cf. Zec 1¹). There may be a confusion with him on the part of the evangelist Matthew [Luke omits the designation 'son of Barachiah'] or of a glossator.*

ZACHARIAS (*Zaxaplas*).—1. 1 Es 1⁸ = Zechariah, one of 'the rulers of the house of God' in Josiah's reign, 2 Ch 35⁹. 2. In 1 Es 1¹⁸ (LXX 1⁴) Zech. stands in place of Heman, the singer of David's time, in the parallel passage 2 Ch 35¹⁵. 3. 1 Es 6¹ 7³ the prophet Zechariah. 4. 1 Es 8³⁰ = Zechariah of the sons of Parosh, Ezr 8³. 5. 1 Es 8³⁷ (B *Zaxaplat*) = Zechariah of the sons of Bebai, Ezr 8¹¹. 6. 1 Es 8⁴⁴ (LXX 4²) = Zechariah, one of the 'principal men and men of understanding' with whom Ezra consulted, Ezr 8¹⁶. 7. 1 Es 9²⁷ = Zechariah of the sons of Elam, Ezr 10²⁸. 8. 1 Es 9⁴⁴ = Zechariah, one of those who stood upon Ezra's left hand at the reading of the Law, Neh 8⁴. 9. 1 Mac 5¹⁸. 10. Father of Joseph, a leader in the Maccabean war under Judas Maccabaeus. 10. Lk 1⁸ etc. Father of John the Baptist. See following article.

ZACHARIAS (*Zaxaplas*).—Father of John the Baptist (Lk 1⁸ etc. 3⁴). He was a priest of the course of ABIJAH, one of the twenty-four courses into which from the time of the Chronicler at least (1 Ch 24⁷⁻¹⁹) the families of the priests that had returned from Babylon were divided (see Schürer, *HJP* II. i. 216, 219). The course of Abijah was the eighth of these courses, and had now been brought up for its week's service in the temple. The lot for that particular day's service (see Edersheim, *The Temple*, p. 129ff.) had fallen to the house of Zacharias, and to Zacharias himself the duty of offering incense in the Holy Place. While performing this service he had a vision, and the Angel of the Lord announced that his aged wife should have a son, who should be called John, and be the forerunner of the Messiah. Asking a sign he was struck dumb, and recovered speech only after having the child named John at his circumcision. The Song of Praise which is put in his mouth, the *Benedictio* (Lk 1⁶⁷⁻⁷⁹), celebrates in prophetic strains the glorious fulfilment of Israel's Messianic hope. With the song he drops completely out of the pages of canonical Scripture.

ZACHARY (*Zacharias*), 2 Es 1⁴⁰.—The prophet Zechariah.

ZADOK.—1. The most important of the many persons who bore this name was the founder of the leading branch of the priesthood in Jerusalem. We have no reliable information concerning his origin or his early history. He comes before us first in a list of David's officers, where we are told that 'Zadok the son of Ahitub, and Ahimelech the son of Abiathar, were priests' (2 S 8¹⁷).

The text of this verse is obviously corrupt. Ahimelech was murdered at Nob, and his son Abiathar was David's attendant and priest to the end of his reign. If Ahitub, in our passage, is the priest mentioned in 1 S 14³ he can hardly have been Zadok's father, for we are certainly meant to understand that Zadok did not belong to the descendants of Eli (1 S 23³, 1 K 2²⁷). Comparing 1 S 22²⁰ it would seem that 2 S 8¹⁷ should run: 'Abiathar the son of Ahimelech, the son of Ahitub, and Zadok, were priests.'

Zadok and Abiathar appear again when David fled from Jerusalem before Absalom. They purposed accompanying him and taking with them the ark, but the king bade them return with it to the city, watch the course of events, and send him news (2 S 15³⁶).

According to the Vulg. (*Ovidens*) and many modern versions, he addresses Zadok as a seer. 'Art thou not a seer?' (AV and RV text 2 S 15³⁷). But the Heb. will not bear this rendering.

* A Zechariah 'the son of Jeberachiah' is mentioned in Is 52, but it is quite unlikely that he was thought of in Mt 23³⁴.

VOL. IV.—61

and it is difficult to be content with any pointing or translation of it. The LXX זָדוֹק ('*Idrak*') is better. Wellhausen (*Text der Bb. Sam.* p. 177) proposes to read זָדוֹק בֶּן־אֶחֱיָהּ: if the two words are a late insertion this would be an improvement. In any case, there is no reason for believing that Zadok bore the title of 'seer.'

At the close of David's reign Abiathar joined the party of Adonijah (1 K 1⁷), but Zadok gave in his adhesion to Solomon (v. 9), and was ordered by the king to anoint him (v. 34). When Solomon had made sure of his position he deposed Abiathar from the priestly office, 'and Zadok the priest did the king put in the room of Abiathar.' This event has influenced the earlier narratives in Samuel, where Zadok is from the first put before Abiathar.

There can be no doubt that the descendants of Zadok continued during many centuries to take the lead amongst the priests of the temple. The Deuteronomic reform raised them to an even higher position than they had occupied previously, for it denied the legitimacy of all sacrifices offered elsewhere than at Jerusalem, and thus brought the provincial priesthood into discredit. Ezekiel went further. To him the sons of Zadok were the only legitimate priests (40⁴⁶ 43¹⁹ 44¹⁵ 48¹¹); the rest of the Levites, because of their unfaithfulness, were to be degraded, nothing but the menial work of the sanctuary being left in their hands (44¹⁰⁻¹⁴).

The Chronicler's accounts require separate treatment. 1 Ch 12⁸ states that amongst 'the heads of them that were armed for war, which came to David to Hebron, to turn the kingdom of Saul to him,' was 'Zadok, a young man mighty of valour, and of his father's house twenty and two captains.' As he is said to have been of the house of Aaron, we cannot wonder that Josephus (*Ant.* VII. ii. 2) identifies him with the priest. But the narrative as a whole is conceived in a totally different spirit from those in Samuel, and the details do not command our credence. The numbers alone are sufficient to condemn it. Equally unsatisfactory are the genealogical lists in which Zadok's descent from Eleazar is traced (1 Ch 6⁴⁻¹⁵, 50³³ 24⁹). Their object is to make out that the Zadokite priests belonged to the elder branch of Aaron's descendants, and the descendants of Eli to the younger branch of Ithamar. The most cursory inspection reveals their artificial construction and their unreliableness. The utmost we can gather from the Chronicler is the fact that after the return from the Exile some families which traced no connexion with Zadok managed to vindicate their right to minister at the altar (1 Ch 24⁷⁻⁴), but that his representatives were both more numerous and more highly placed (1 Ch 24³, 27¹⁷; 1 S 23³, 34 points in the same direction). See, further, art. PRIESTS AND LEVITES.

The MT vocalization, זָדוֹק, is probably mistaken. The LXX frequently has Ζαδδουκας, a transliteration of זָדוֹק. From Ζαδδουκας was derived Ζαδδουκας, although it cannot be hesitatingly affirmed that the SADDUCEES took their name immediately from the original Zadok. There can, however, be no doubt as to their close connexion with the priestly aristocracy.

2. In 2 K 15³⁵, 2 Ch 27¹, we are told that Jotham succeeded Uzziah, his father, and that his mother's name was Jerusha, the daughter of Zadok. In the statements concerning the accession of a king it is not usual to give the maternal grandfather's name; possibly, therefore, Jotham's grandfather was a person of considerable importance, not improbably a priest.—3. Neh 3⁴ mentions a Zadok, son of Baana (בְּנֵי), as one of Nehemiah's willing helpers in rebuilding the city wall. His father seems to be mentioned as one of those who came to Jerusalem with Zerubbabel, Ezr 2², Neh 7⁷.—4. Zadok, the son of Immer, Neh 3², repaired the wall 'over against his own house,' on the east side of the city, near the horse-gate. We have no

means of deciding positively whether he is to be identified with the bearer of the same name in a later passage of the book. But there is no conclusive reason against the identification. Zadok 'the scribe' is appointed by Nehemiah to be one of the 'treasurers over the treasures' (Neh 13¹³). He would seem to have been a priest. Shelemiah the priest and himself are distinguished from the Levites. Ezra's example shows that the priest may also be the scribe. In this case Zadok must have been the head of 'the children of Immer.'—5. Zadok is distinguished from the priests as one of 'the chiefs of the people' who sealed the covenant (Neh 10²¹).—6. 1 Ch 6¹², compared with Ezr 7² and Neh 11¹¹, appears to refer to a high priest of the name of Zadok later than the founder of the line. But it is impossible to rely on these lists, and, in any event, nothing is known of the man.

Mt 14 mentions a SADOE (Σαδός) as one of the progenitors of Joseph, the husband of Mary. Josephus (*Ant.* xviii. 1. 1) states that one Zadok, a Pharisee, assisted Judas of Galilee (Ac 5³⁷) in rousing the people against the 'enrolment' under Quirinius (Lk 2¹). Jost (*Gesch. des Judenthums*, ii. 29) refers to a Zadok who is mentioned in the Talmud as having fasted forty years, until the destruction of Jerusalem. He propounds a theological puzzle first to Rabbi Joshua and next to Rabban Gamaliel, who give him discordant answers. Thereupon Joshua is publicly rebuked and put to shame by Gamaliel (*Bech.* 36a).

J. TAYLOR.

ZAHAM (צח).—A son of Rehoboam, 2 Ch 11¹⁹ (B'Ροολλάμ, A Ζαλάμ, Luc. Ζάμ).

ZAIN (ז).—The seventh letter of the Hebrew alphabet, and as such employed in the 119th Psalm to designate the 7th part, each verse of which begins with this letter. It is transliterated in this Dictionary by z.

ZAIR (ציר).—According to the MT of 2 K 8²¹, Joram, in the course of his campaign against Edom, 'passed over to Zair' (B eis Ζειώρ, A om.). In the parall. passage 2 Ch 21⁹ the Heb. is 'passed over with his princes' (צירציר; LXX μετά τῶν ἀρχόντων), which may be confidently pronounced to be a corruption of the text in Kings. The latter itself is unfortunately not certain. No place of the name of *Za'ir* being mentioned elsewhere, it has been conjectured that *Zo'ar* (Ewald, *el al.*) or *Séir* (cf. Vulg. *Seira*) should be read. The latter, however, is somewhat vague, and against the claims of *Zo'ar* may be urged the LXX Ζειώρ, whereas that name is elsewhere reproduced by Σηρώρ (cf. Buhl, *Edom.* 65, who also objects to Conder's suggested identification of *Za'ir* with *ez-Zuweira* S.E. of the Dead Sea).

ZALAPH (צלף; B Σελέ, A and Luc. Σελέφ).—The father of Hanun, who assisted in repairing the wall, Neh 3³⁰ [the text is a little suspicious, 'the sixth son' being a somewhat peculiar note, which, however, is supported by the VSS].

ZALMON (צלμών; Σελμών; *Salmon*).—1. The place mentioned in Ps 68¹⁴ is considered by some commentators to be the same as Mount Zalmon (Jg 9⁴⁵)—the hill, near Shechem, on which Abimelech and his people cut down boughs to set 'the hold' of the house of El-berith on fire. There is, however, nothing in Ps 68 to lead to the belief that the Psalmist intended to refer to an underfeature of Mount Gerizim, which is mentioned in the OT only in connexion with an incident that had no influence on the history of the Israelites. The central idea of the psalm is the selection of Zion as the abode of God, in preference to Sinai whence the Law was given, and to 'the mountain of Bashan' which had looked down upon the memorable overthrow of Og and his army. The earlier verses contain a retrospective glance at the journey of the Israelites from Sinai onwards, through the desert, under the immediate leading and guidance

of God, and their triumphant occupation of Canaan after vanquishing all their enemies. In this victorious progress, one of the most striking incidents was the complete overthrow of Og, near Edrei, on the plains of Bashan,—a victory which long lingered in the national memory (Ps 135¹ 136²⁰),—and Zalmon should probably be looked for in that region. Some suppose that Zalmon means 'darkness,' and connect it with the 'darkly' wooded hill near Shechem, but this meaning would be equally applicable to the basalts and volcanic hills of Bashan. Zalmon may have been a portion of Bashan, or one of the summits of *Jebel Hamran*, or Mount Hermon. (In Jg 9⁴⁵ the LXX reads ὄρος Ἐρμών for Mount Zalmon). The allusion to the snow is supposed by some to refer to ground white with the bones of Canaanites slain in battle; but this is rather straining the meaning. Possibly the words refer to an actual fall of snow in Zalmon during the battle with Og.

2. One of David's heroes, 2 S 23²⁸. See ILAI.

C. W. WILSON.

ZALMONAH (צלמונה, Σελμονά).—The station in the journeyings of the children of Israel, following Mt. Hor, in the itinerary of Nu 33, and mentioned there only in vv. 41, 42. Nothing is known as to its position. It must have been in the neighbourhood of Punon, the station following; and, if the identification in art. PUNON be accepted, its site would be approximately determined.

The Gr. rendering is identical with that of Hashmonah, as has been noticed in art. HASHMONAH; but the same rendering also occurs for Azmon of Nu 34¹⁵ in A, Ἀζαμονά in P, and in AF of Nu 33²⁹ for Hashmonah. Ewald's proposed modification of the text, which would separate Mt. Hor from Zalmonah by inserting vv. 36-41a after Hashmonah, has been given in art. EXODUS, vol. i. p. 806^b.

A. T. CHAPMAN.

ZALMUNNA.—See ZEBAH.

ZAMBRI (B Ζαμβρι, A Ζαμβρις, AV Zambis), 1 Es 9³⁴ = Amariah, Ezr 10⁴².

ZAMOTH (Ζαμόθ), 1 Es 9³² = Zattu, Ezr 10⁴⁷.

ZAMZUMMIM (צמזמ; LXX Ζοζομμιν, A Ζοζομμιν, F Ζοζομμιν).—In the archaeological notice, Dt 2²⁰⁻²³, said (v. 20) to have been the name given by the Ammonites to the 'Rephaim,' who once inhabited their land, but had afterwards been expelled by them,—a people 'great and many and tall, like the Anakim' (comp. the similar note in vv. 10, 11 respecting the 'Emim,' the prehistoric occupants of the territory possessed afterwards by Moab, and in v. 12 respecting the Horites, the original occupants of Edom). The REPHAIM were a people, reputed to have been of giant stature, who left remains or memories of themselves in different parts of Palestine,—cf. e.g. the 'Vale of Rephaim' Jos 15⁸ al. S.W. of Jerus., and the description of Og, king of Bashan, as 'of the remnant of the Rephaim,' also 2 S 21^{16, 18, 20, 22} RV; and the Ammonites called those Rephaim who, in prehistoric times, had inhabited their own territory by the name 'Zamzummim.' This is all that is known about them. As regards the name, *zamzumah* in Arab. is a *distant and confused sound*, and *zizim* is the *low hum of the Jinn* heard in the desert at night (Lane, 1248 f.), whence W. R. Smith (*ap. Driver* on Dt 2²⁰) thinks with Schwally that the name meant properly *whisperers, murmurers*, and denoted the spirits (cf. Is 8¹⁹) of the old giants, which 'were still thought to haunt the ruins and deserts of East Canaan.' But of course this is only a conjecture: we do not *know* that the root *zamzama*, with its Arabic meaning, was in use in Ammonitish. Cf. ZUZIM. S. R. DRIVER.

ZANOAH (צנאי).—1. A town in the Shephelah, Jos 15³¹ (B Τανώ, A and Luc. Ζανώ), Neh 3³² (BA

Zarw, Luc. Zawnw) 11³⁰ (BA om., $\Sigma\epsilon\alpha$ ms. inf. Zawnw, Luc. Zawnw), 1 Ch 4¹⁸ (BA Zawnw, Luc. Zawnw). In the last cited passage Jekuthiel is said to have been the 'father' of Zanoah. The place, it is generally agreed, is the modern Zanu'a, S.E. of Zoreah (Robinson, *BRP* 2 ii. 61). 2. A place in the mountains, Jos 15³⁶ (B *Zakanael* [combining נב and the following נב], A Zarw, Luc. Zawnw), possibly Zânûta S.W. of Hebron (*SWP* iii. 404), although Dillm. objects that this is too far south.

ZAPHENATH-PANEAH (ⲫⲁⲛⲉⲁⲛⲁⲥ, Ψονθοφανήχ).

—The name given by Pharaoh to Joseph (Gn 41⁴⁵). Far-fetched attempts of the ancients to explain it by Hebrew have found no favour amongst modern commentators, the name being evidently intended for Egyptian. In 1886 Krall connected it with a well-known Egyptian type of name (*zd*+divine name+*e-f'nh*) meaning 'Said Amon (Bast, Mont, etc.), he liveth', and in subsequent years Steindorff established its identity more closely (*Zeitschrift für Ägyptische Spr. u. Alterthumskunde*, 1889, 41, 1892, 50). The Massoretic vocalization of the name is wrong: so also are the Greek forms in the LXX and elsewhere. But the consonants in the Hebrew text are a precise transliteration of those in * $\Sigma\epsilon\text{-}\Pi\text{-}\Pi\text{-}\Theta\text{-}\Phi\text{-}\alpha\text{-}\nu\text{-}\eta\text{-}\chi$, which would be approximately the pronunciation of a hieroglyphic

name * $\text{𓆎} \text{𓆏} \text{𓆐} \text{𓆑} \text{𓆒} \text{𓆓} \text{𓆔} \text{𓆕}$. 'Said God, he liveth.' A Greek mummy-label of the Roman age preserves an example of the same formation *Καμεντεβωνχ*, where *Μωνθ* (shortened to *Μεντ*) is the divinity (Steindorff, *l.c.*). This type of personal name grew extremely common in the period of the Deltaic dynasties (22nd–26th): earlier, it is extremely rare, and has not yet been traced before the end of the 20th dynasty. Probably many details in the story of Joseph date from the 26th dynasty (B.C. 666–525), there being much intercourse between Egypt and Palestine at that period. The compound with *p ntr* 'The God' ($\Pi\text{-}\Pi\text{-}\Theta\text{-}\chi$ shortened to $\Pi\text{-}\Pi\text{-}\Theta$) has not yet been found on Egyptian monuments: it is probably a monotheistic touch added by a Hebrew familiar with Egypt and the Egyptian language. F. LL. GRIFFITH.

ZAPHON (ⲫⲁⲗ, 'north').—A city E. of Jordan, assigned to Gad, Jos 13²⁷ (B *Zaphn*, A and Luc. *Zaphn*). It is named also in Jg 12¹, where ⲫⲁⲗ should be rendered 'to Zaphon' (RVm) instead of 'northward' (AV and RV). LXX in the latter passage: B, translating, *eis Boppān*; A and Luc., not recognizing the ⲫ locale, have, respectively, *Κεφεινά* and *Σεφηνά*. Eusebius and Jerome (*OS* 2 219, 75; 91, 26) mention an Amathus 21 miles south of Pella, and the same place is referred to by Josephus (*BJ* I. iv. 2 [if the text be correct]) as the strongest fortress on the Jordan, and as the seat of one of the *synedria* instituted by Gabinius (*Ant.* XIV. v. 4). This is the modern *Amūteh*, a little north of the Jabbok, at the mouth of Wādy er-Rugeib. There appears to be no reason (in spite of Buhl, *GAP*, 259) to doubt the Talmudic tradition that Amathus represented the ancient Zaphon (see Neubauer, *Géog. du Talm.* 249).

Zaphon is probably connected with ⲫⲁⲗ Ziphon (Gn 46¹⁶), or (more correctly) ⲫⲁⲗ Zéphon, with gentilic name *Zephonites* (Nu 26¹⁵; LXX *Σαφών*, *Σαφω(ε)ι*), described as a 'son' of Gad.

ZARAIAS (*Zapalas*).—1. (A *Zapías*, AV Zacharias) 1 Es 5⁸=Seraiah, Ezr 2²; Azariah, Neh 7⁷. 2. 1 Es 8² (B om.), one of the ancestors of Ezra, called Zerachiah, Ezr 7³, and Arna, 2 Es 1². 3. 1 Es 8³¹=Zerachiah, the father of Eliehoenai, Ezr 8⁴. 4. 1 Es 8³⁴=Zebadiah, son of Michael, Ezr 8⁸.

ZARAKES (B *Zárkos*, A *Zarákēs*, AV Zaraces), 1 Es 1³⁰ (LXX 30). He is there called brother of Joakim or Jehoiakim, king of Judah, and is said to have been brought up out of Egypt by him.—The name apparently is a corruption, through confusion of ז and ר , of Zedekiah, who was a brother of Jehoiakim, 2 K 24¹⁷. The verse of 1 Es. is entirely different from the corresponding passage in 2 Ch 36¹⁶.

ZARDEUS (B *Zepallas*, A *Zardalas*, AV Sardeus), 1 Es 9²⁸=Aziza, Ezr 10²⁷.

ZAREPHATH (ⲫⲁⲣⲉⲫⲁⲥ; LXX and NT *Σαρεπτα* [A in 1 K 17⁹ *Σεφθά*]).—The Arab. village of *Šarafend* lies on a promontory about eight miles south of Zidon. On the shore in front of it are the scattered remains of what must have been a considerable town, the Zarephath or *Sarepta* of the Bible. This was possibly also Misrephoth-maim of Jos 11⁸ 13⁶ [but see MISREPHOTH-MAIM]. Zarephath originally belonged to Zidon (1 K 17⁹), but passed into the possession of Tyre after the assistance rendered by the fleet of Zidon to Shalmaneser IV. in B.C. 722 in his abortive attempt to capture insular Tyre. In Lk 4³⁶ it is again called a city of Sidon (RV 'in the land of Sidon'). Zarephath is included in the list of towns captured by Sennacherib when he invaded Phœnicia in B.C. 701. It was the town in which Elijah lodged during the years of famine (1 K 17^{9–24}). In the middle of the present ruins, by the shore, stands a shrine of St. George, occupying the place of the Crusaders' Chapel, which was built on the traditional site of Elijah's upper room. The rewarded faith of the Gentile woman of Sarepta was recalled by Christ in the synagogue of Nazareth, and the allusion gave deep offence to His hearers (Lk 4³⁶). Here may have lived the Syro-Phœnician woman whose faith was greatly commended by Christ, and whose daughter was healed by Him (Mt 15^{21–28}, Mk 7^{24–30}).

G. M. MACKIE.

ZARETHAN (ⲫⲁⲣⲉⲥ).—When the Jordan was divided, the waters rose up in a heap 'at ADAM, the city that is beside Zarethan' (Jos 3¹⁶, LXX om.). One of Solomon's commissariat officers had in his district 'all Bethshean which is beside Zarethan, beneath Jezreel' (1 K 4¹², LXX om.). The bronze castings for the temple were made in the Jordan district 'at the ford of Adamah [reading, with Moore, ⲫⲁⲣⲉⲥ for MT ⲫⲁⲣⲉⲥ (AV and RV 'in the clay ground')] between Succoth and Zarethan' (1 K 7⁴⁶). In the parallel passage 2 Ch 4¹⁷ the name appears as *Zeredah* ⲫⲁⲣⲉⲥ (B corruptly *ⲫⲁⲣⲉⲥ* ⲫⲁⲣⲉⲥ [? = ⲫⲁⲣⲉⲥ ⲫⲁⲣⲉⲥ], A ⲫⲁⲣⲉⲥ ⲫⲁⲣⲉⲥ ⲫⲁⲣⲉⲥ , Luc. *Σαριδαθά*), which is named in 1 K 11³⁶ (B and Luc. *Σαριδά*, A *Σαριδά*) as the birthplace of Jeroboam, and in Jg 7² [where read ⲫⲁⲣⲉⲥ *Zeredah* for ⲫⲁⲣⲉⲥ *Zerērah*; B *ⲫⲁⲣⲉⲥ*, A om., Luc. *καὶ ἡ συντηγμένη*] in connexion with the flight of the Midianite host.

Zarethan or Zeredah cannot be precisely located, but must be sought in the vicinity of *ed-Dāmieh* (the city of Adam of Jos 3¹⁶). The proposal (van de Velde, Knobel, *et al.*) to identify with *Karn Sartabeh*, the great landmark of the Jordan Valley, must be rejected on phonetic and other grounds (see Dillm. *Jos. ad loc.*; Moore, *Judges*, 212 f.; Kittel, *Könige*, 34; Buhl, *GAP* 181).

J. A. SELBIE.

ZATHOES (*Zathōs*, AV Zathoe), 1 Es 8³², probably stands for Zattu. The name does not appear in the Heb. of the corresponding passage Ezr 8³², which should be corrected by 1 Es. so as to run 'Of the sons of Zattu, Shecaniah the son of Jahaziel.'

ZATHUI (B *Zatōn*, A *Zaθουι*), 1 Es 5¹²=Zattu, Ezr 2⁸, Neh 7¹³; called also Zathoes, 1 Es 8³².

ZATTU (זַטּוּ).—The name of a family of exiles that returned, Ezr 2³⁵ (B *Zathoud*, A and Luc. *Zathoud*) = Neh 7¹³ (B *Zathoud*, A *Zathoud*): several members of this family had married foreign wives, Ezr 10²⁷ (B *Zathoud*, A *Zathoud*, Luc. *Zathoud*); its head sealed the covenant, Neh 10¹⁴ (15) (B *Zathoud*, A *Zathoud*, Luc. *Zathoud*). The name of this family has dropped out of the Heb. text of Ezr 8⁶; see SHECANIAH, No. 2.

ZAZA (זָזָא).—A Jerahmeelite, 1-Ch 2³⁵ (B 'Ozdu, A 'Ozdu, Luc. *Zaza*). The initial 'O of BA is due to taking the ' of MT זָזָא as part of the name, and not as the particle = 'and.'

ZEALOT.—See CANANÆAN.

ZEBADIAH (זְבַדְיָה and זְבַדְיָה 'J' hath bestowed'; cf. the names זְבַדְיָה and זְבַדְיָה).—1. 2. Two Benjamites, 1 Ch 8¹⁰ (B 'Afaβadid, A 'Afaβadid, Luc. *Zabadid*)¹⁷ (BA *Zabadid*). 3. One of those who joined David at Ziklag, 1 Ch 12⁷ (B *Zasidid*, A *Zasidid*). 4. One of David's officers, son of Asahel, 1 Ch 27⁷ (B 'Aβeias, A *Zasidias*, Luc. *Zasidias*). 5. An exile who returned with Ezra's second caravan, Ezr 8⁸ (*Zasidias*, A *Zasidias*, Luc. *Zasidias*); called in 1 Es 8³⁴ *Zaralas*. 6. A priest, of the sons of Immer, who had married a foreign wife, Ezr 10³⁰ (B *Zasidid*, A *Zasidid*, Luc. *Zasidias*); called in 1 Es 9²¹ *Zabdeus*. 7. A Korahite, 1 Ch 26³ (B *Zaxaplas*, A and Luc. *Zasidias*). 8. One of the Levites sent by Jehoshaphat to teach in the cities of Judah, 2 Ch 17⁸ (B *Zasidias*, A *Zasidias*). 9. An officer of king Jehoshaphat, entrusted with judicial functions, 2 Ch 19¹¹ (B *Zasidias*, A *Zasidias*, Luc. *Zasidias*).

ZEBAH and **ZALMUNNA** (זֶבַח 'victim,' זַלְמוֹנָא 'shade, i.e. protection, withheld'; *Zésee*, *Zelmana*; Jg 8²⁻²¹, Ps 83¹¹).—The narrative of Gideon's pursuit of these two Midianite kings (Jg 8²⁻²¹) cannot be a continuation of the foregoing verses (7²²⁻²³); it must be derived from another source, attached abruptly, and with the loss of its opening verses, to the story of the defeat of Midian. So far from a victory having been just won, it seems such a remote possibility that the men of Succoth and Peniel treat Gideon with derision as he passes them on the track of the two kings (8⁶⁻⁸). The kings were returning to their country, laden with spoil (8²⁴); they were not in flight, and had no thought of being pursued (8¹¹), otherwise they would have used the advantage which their camels (8²⁶) gave them to effect their escape. We gather, in fact, from this narrative (8²¹) that Gideon's expedition against Zebah and Zalmunna was not part of the general campaign against Midian, but a private enterprise of personal revenge. On one of their raids, probably on this very one from which they were returning, the two Arab chieftains had murdered Gideon's brethren at Tabor, doubtless a place near Ophrah (8¹⁸). To Gideon, as next of kin, fell the duty of avenging their blood. Collecting 300 of his clan, he followed the enemy across the Jordan, attacked them unexpectedly at Karkor, captured the two kings, and, after exhibiting them as his prisoners to the men of Succoth, carried them back in triumph, probably to his home at Ophrah (Moore). There he slew them with his own hand, when his young son refused to be their executioner, the two kings meeting their fate with barbaric courage. The execution was a religious act as well as an act of blood-revenge, and may well have taken place before the altar (Smend, *AT Religionsgeschichte*, 128). Human victims were similarly sacrificed after the return from a victorious campaign (Jg 11³⁰⁻³²), or as the chief portion of the spoil (1 S 15³³). W. R. Smith, (*RS* 397 n.) compares the choice of Gideon's young

son as executioner of the kings with the choice of 'young men' or 'lads' as sacrificers (Ex 24⁶), and illustrates from the custom of the Saracens, who charged lads with the execution of their captives. The pronunciation of the names Zebah and Zalmunna represents merely a popular etymology, which gave a contemptuous meaning, 'victim,' 'protection withheld,' to the names of the kings. The first syllable of Zalmunna may be the name of a deity *Zalm*, found in Aramaic inscriptions from Teima (*CIS* pars. II. cxiii, cxiv), perhaps also in the Phœnician *Zadam* (*Zalam*) - *ba'al* (*CIS* i. cxxxii), called in Greek *Ζαλαμβώ*, or -*as*; see Hoffmann, *ZA* xi. 244 f. On the other hand, the names may be merely symbolic, and not the actual names of the two kings (so Noldeke, *Die Amalekiter*, 9 n., and Stade, *GVI* i. 190).

G. A. COOKE.

ZEBEDEE (*Zēbedaios*; Heb. זְבִידִי 'gift of J', or, more properly, Aram. זְבִידִי; raising the question why the name is not spelt *Zabdiaos*, as in the OT [1 Es 9²¹ etc.], but *Zēbed*). On Jewish bearers of this name see Jastrow, *Dict.* 377, where also a local name זְבִידִי, 'probably in Galilee,' is mentioned).—The father of the apostles James and John (Mt 4²¹) and the husband of Salome (Mt 27⁵⁶, Mk 15⁴⁰). Zebedee followed the occupation of fisherman on the Sea of Galilee, and was apparently in easy circumstances, to judge from the mention of his 'boat with the hired servants' (Mk 1³⁰). This is also borne out by the facts that his wife was one of the pious women who afterwards ministered to the Lord of their substance (Mt 27⁵⁶⁻⁵⁸, Lk 8²⁻³); and that his son John was personally known to the high priest (Jn 18¹⁶), and had the means of providing for the mother of Jesus (Jn 19²⁷). Zebedee himself comes before us directly only in connexion with the call of his sons; and, from his raising no objection, it has been conjectured that he himself was a disciple of John the Baptist, as his sons certainly were, and by him had been taught to regard Jesus as the Messiah. Whether he ever became an active follower of Jesus it is impossible to say. The subsequent silence of Scripture regarding him would incline one to think not, unless this silence is to be explained by Zebedee's death soon after his sons' call.

According to Barhebræus (on Mt 10³) and the *Book of the Bee*, the sons of Zebedee belonged to the tribe of Zebulun; according to the *Gospel of the Twelve Apostles* (ed. Harris, p. 26), to the tribe of Issachar.

G. MILLIGAN.

ZEBIDAH (so RV, following *Kēthidā* זְבִידָה; AV follows *Kēre* זְבִידָה *Zebudah*).—The daughter of Pedaiah of Rumah, and mother of king Jehoiaikim, 2 K 23³⁶ [MT omits in || 2 Ch 36⁵]. In Kings the LXX has: B 'Ιελλὰ θυγάτηρ 'Εδεῖλ ἐκ Κρουμά, A Εἰελλὰ θυγάτηρ Εἰεδδὶλὰ ἐκ 'Ρυμά; in 2 Chron.: AB Ζε(κ)χωρὰ θυγάτηρ Νηρελον ἐκ 'Ραμά; Luc. has in both passages 'Αμυτὰλ θυγάτηρ 'Ιερεμίου [confusing with Zedekiah's mother, 24¹⁸].

ZEBINA (זְבִינָה).—One of the sons of Nebo who had married a foreign wife, Ezr 10³² (B *Zarβud*, A om., N *Zarβeud*, Luc. *Zēberel*). See ZABAD, No. 6.

ZEBOIM.—One of the five Cities of the Plain, Gn 10¹⁹ (זְבוֹיִם) 14², Dt 29²³ (זְבוֹיִם) (*Kēth*, in all זְבוֹיִם, *Kēre* זְבוֹיִם, Hos 11⁸ (*Kēth*, זְבוֹיִם; *Kēre* זְבוֹיִם, the * being regarded as quiescent; AV and RV here *Zebolm*). The LXX has uniformly *Σεβω(ε)ιμ* (but in Dt 29²³ (22) AF *Σεβωειμ*). According to Böhme (on Neh 1-6, p. 3) the word is punctuated in MT upon the analogy of זְבוֹיִם 'hynnas,' and so as to avoid suggesting זְבוֹיִם, זְבוֹיִם, or זְבוֹיִם 'gazellea.'

The site has not been identified. Upon the

general question of the situation of the five Cities of the Plain see art. ZOAR.

ZEBOIM.—1. 'The ravine of Zebō'im' (צִבְעוֹיִם 'ravine of the hyenas'; BA Γαί ῥήν Σαυελ, Luc. Σαβαίρ) is named in 1 S 13¹⁸ in describing the route followed by one of the bands of Philistine marauders. It is prob. the *Wady el-Kelt* or one of its branches (Buhl, GAP 98; G. A. Smith, HGHL 291 n. 1). The name *Wady abū dabā* ('Hyæna gorge') is still applied to a ravine in this neighbourhood, though perhaps not to the identical one referred to in 1 Samuel. The same locality appears to be referred to in the Zebaim (BA om., Σαβοειμ, Luc. Σαβωειμ) of Neh 11²⁴. 2. Hos 11². See ZEBOIM.

ZEBUL (זְבֻל; Ζεβουλ, = 'height,' 'high dwelling' (?), perhaps shortened from '(God's) dwelling' or from (Baal-)zebul).—Jg 9^{28, 30, 33, 38, 41}, Abimelech's officer (*pekid*) and governor (*sar*) of Shechem. By his loyalty and resource he dealt successfully with an insurrection against his master's authority in Shechem. It was an insurrection of Shechemites against Abimelech, who was only half a Shechemite by birth and had usurped his position (so Moore, *Judges* 255 ff., whose arguments are convincing). The interpretation of 9²⁸ is uncertain; Moore reads 'served' for 'serve ye' (זָכַרְתִּי לָכֶם), and explains, 'Abimelech and Zebul were formerly the servants of Shechem; why then should Shechemites serve them now?' Others take the insurrection to have been one of Israelites against Shechemites (e.g. Wellhausen, *Composition* 353 f.; Robertson Smith, *ThT* xx. 1886, 195-198); but this does not agree well with the rest of the narrative. See, further, ABIMELECH, N. 3.

G. A. COOKE.

ZEBULUN (זְבֻלֹן, זְבֻלָּן, זְבֻלָּן; Ζαβουλών, Zabolon).—The first and second forms of the name in Heb. are used interchangeably; the third occurs only in Jg 1³⁰. Two explanations of the name are given in Gn 30^{19, 20}. In the first (from E) Leah exclaims with אֵלֶיךָ אֵלֹהִים אֵתִי וְכָרָה לִּי 'God has gifted me with a good gift,' וְכָרָה לִּי being made equivalent to לִי. In the second (from J) she cries, הִצַּקְתִּי אֵשׁ 'this time my husband will dwell (lie) by me,' Zebulun receiving a meaning like 'neighbour' or 'borderer' (Dillmann). From an Assyr. root the meaning 'will exalt (esteem) me' has been suggested, and Delitzsch (*Genesis, in loc.*) points out that this agrees with the LXX rendering *alperiei*; it seems doubtful, however, whether *zabulun* means more than to *carry* or *bear* (not to *lift up*).

Zebulun appears in the lists of Jacob's sons, and as the ancestor of the tribe (Gn 46¹⁴, Nu 26²⁸). An old Jewish tradition says he was the first of the five brethren presented by Joseph to Pharaoh (Targ. pseudo-Jon. on Gn 47²). So far as our records go, the man and his life are wrapped in obscurity. The chief tribal families are three, at the head of which stand Zebulun's three sons: Sered, Elon, and Jahmeel, said to have been born in Canaan before the settlement in Egypt (Gn 46¹⁴).

In the desert journey Zeb. was placed with Issachar in the camp of Judah, eastward of the tabernacle. These marched in the van, under the standard of Judah (Nu 27⁹). The tribe then numbered 57,400 men capable of bearing arms, and the headman or 'prince' was Eliab, son of Helon (Nu 1^{3, 30, 27}). Gaddiel, son of Sodi, represented Zeb. among the spies (Nu 13¹⁰). At Shittim, after the camp had been devastated by the plague, the warriors of Zeb. are given at 60,500 (Nu 26²⁷). Elizaphan, son of Parnach, acted with the representatives of the other tribes in the division of the land (Nu 34²⁵). At Shechem, Zeb. the youngest son of Leah, and Reuben, who had fallen from

honour, are placed with the sons of the handmaids, over against the other six sons of Rachel and Leah, to make equal division of the tribes (Dt 27¹³). Zeb. earned no special distinction either under Moses in the wilderness, or under Joshua during the Conquest. In the second division of territory the lot of Zeb. came up third (Jos 19¹⁰), and there fell to him a stretch of country, richly diversified, with sylvan vale, fruitful plain, and breezy height.

The boundaries of Zeb. cannot now be traced with any certainty. As described in Jos 19¹⁰⁻¹⁶ it marched with Issachar on the S., Naphtali on the E. and N.E., and Asher on the W. and N.W. The eastern boundary probably ran from Tabor, along the W. border of Naphtali, as far north as *Kefr Anān* (Hannathon); turning westward, it skirted the district of *er-Rāmeḥ*, reaching the eastern border of Asher down the vale of *Abilin*, in which lies *Jafāt*, which some identify with Iphtah-el, or down *Wady el-Kurn*, further to the north (Conder); thence it passed southward to the lip of Kishon, opposite *Tell Kaimūn* (Jokneam). We can hardly even guess at the southern boundary. Chisloth-tabor, or Chesulloth (*Iksāl*), and Daberath (*Debūrieh*) seem to be given to Zeb. in v. 12; but in v. 13 the former, and in 21²⁸ the latter, are assigned to Issachar. Tabor, possibly the city on the mountain, 1 Ch 6⁷⁷ places in the land of Zebulun. If *Debūrieh* belonged to Issachar, this would mean possession of at least part of the mountain, perhaps the western and southern slopes. If the two tribes shared the mountain, this may be alluded to in Dt 33¹⁹. It is the most striking feature in the landscape, and round it sacred associations from of old were sure to gather. Other identifications proposed are precarious, and, if established, would produce a very peculiar borderline. *Tell Shadūd* may be identified with Sarid, by the substitution of *d* for *r*. In that case *Ma'ul* cannot be Marala, as it lies not westward, but a little east of north from *Tell Shadūd*; and not only the change of *r* to *l*, but also the intrusion of *ain* before *lamed*, must be accounted for. Again, it is difficult to conceive the line running from *Tell Shadūd* past *Iksāl* to *Debūrieh*, and then doubling back upon *Yafa*, as the identification of this last with Japhia would require. The authority for locating Gath-hepher at *el-Meshed* is very slender, and the name, which is of some antiquity, is against it. The line indicated for the western border of Naphtali seems to throw the boundary of Zeb. further to the east; so also the identification of Nahalal with *Ain Mahil*.

The Blessing of Jacob (Gn 49¹³), which dates from the time of the Judges, or at latest not after Solomon, apparently gives Zeb. access to the sea. 'Zebulun, towards the strand of the sea he settles, he himself towards the strand of the ships, and his rear to, or towards, Zidon' (Dillm.); this is supported by Josephus (*Ant.* v. i. 22; *BJ* III. iii. 1). The boundaries between the tribes and the land held by the Canaanites must have varied from time to time, and possibly then Zeb. held an approach to the shore, perhaps through the gorge of Kishon and along the base of Carmel. But the words may mean only that the sea was near and easily reached; that Zeb. bordered on the coast, i.e. the coast-lands, and not the sea itself. Delitzsch translates, 'Zebulun, near to the coast of the sea shall he dwell, yea he, near to the coast of the ships, and his side leans on Zidon.' The reference to Zidon is obscure: Zeb. never approached that city. Possibly the name of their chief city is given to the rich coast-lands, including Acre, from which the Phœnicians were never driven out (Jg 1³¹). The much later writer in Joshua (P) knows nothing of any 'outgoing' of the territory to the Mediterranean. 'The way of the sea' (Is 9¹), the

great highway of commerce from north and east to the harbour at Acre, which passed through a large part of his land, and brought Zeb. into contact with the trade of the world, would itself enable him to 'suck the treasures of the sea' (Dt 33¹⁹).

In Zeb. four cities were given to the Levites—Jokneam, Kartah, Dimnah (Dillm. and others read Rinmon), and Nahalal (Jos 21^{34, 35}). Of these, Kitron (identical with Kartah [see art. KARTAH]) and Nahalal (probably 'Ain Mahil') remained in the hands of the Canaanites, and so could not be occupied by the Levites (Jg 1³⁰). In 1 Ch 6⁷ [Heb. ²²] only Rimmono (Rummaneh) and Tabor are named, the latter corresponding with no name in the former list.

What is said of the territory of Naphtali (see art. NAPHTALI) applies generally to Zeb., although the mountains of Naphtali north and north-east rise to a much greater height. *Jebel Kaukab* (1850 ft.) is a prominent feature of the western landscape, and *Jebel es-Sikh*, N.W. of Nazareth, crowned by *Neby Sa'in*, commands one of the finest and most comprehensive views in N. Palestine. The Plain of Asochis, *el-Battauf*, is not so large as Esdraelon, but is equally rich and fruitful. Olive groves flourish in the valleys, and most villages have orchards or vineyards, protected by cactus hedges.

Only one judge is mentioned as rising in Zebulun, viz. ELON, who judged Israel ten years (Jg 12^{11, 12}). But the tribe seems always to have produced men of warlike energy and enterprise. 'Marched . . . from Zeb. those who carry the muster-master's staff' (Jg 5¹⁴; 'officers who had charge of the enumeration and enrolment of troops' [Moore]). Called by Barak to the conflict with Sisera (Jg 4^{6, 10}), their patriotic devotion and prowess are specially celebrated in Deborah's song (Jg 5^{14, 18}). Gideon summoned them to the strife with Midian (Jg 6³⁵). To David at Hebron came from Zeb. 50,000 men of war 'who were not of double heart' (1 Ch 12²⁵); nor were gifts lacking from the produce of well-cultivated land (*ib.* 12⁴⁰). Under David the headman of the tribe was Ishmaiah, son of Obadiah (1 Ch 27¹⁹). In response to Hezekiah's invitation, despite the scoffing of others, some from Zeb. humbled themselves and went to Jerusalem, where, although not 'cleansed according to the purification of the sanctuary,' they were welcomed and allowed to eat the pass-over (2 Ch 30^{10, 11, 18, 19}). Doubtless, Zeb. shared the fate of Naphtali when, along with other districts, Galilee was carried into captivity by Tiglath-pileser (2 K 15²⁹, cf. Is 9¹).

The peasant farmers of Zeb. lent strength to the Jewish army in the war of independence, and their soil witnessed some of the fiercest encounters. Jotapata (*Jefat*) made a heroic defence against the Romans (*BJ* VII.). Sepphoris became the centre of Roman administration in the district (*Ant.* XVIII. ii. 1; *BJ* III. ii. 4). Here for a time were the headquarters of the Jewish Rabbis before they settled in Tiberias (*Jost, Judenthum*, ii. 16 ff.). Through the territory of Zeb. from the springs at Sepphoris to the hill of *Haftin*, the Crusaders marched to their overthrow at the hands of Saladin. It is the chief glory of Zeb. that it afforded the infant Saviour a safe asylum; that on its breezy uplands, in the free atmosphere of the north, His frame grew to maturity, and mind and heart were prepared for His mighty task.

Members of this tribe are called **Zebulunites** (זְבֻלֹנִי, *Zabulonon*, Nu 26²⁷). The title זְבֻלֹנִי 'the Zebulunite,' is also applied to Elon the judge (Jg 12^{11, 12}).

W. EWING.

ZECHARIAH (זְכַרְיָה and זְכַרְיָה; *Zachar'ia* and *-las*).
—1. Brother of Ner and uncle of Saul (1 Ch 9²⁷),

one of the ten sons of Jeiel or Jehiel, patriarch of Gibeon in Benjamin. He is called **Zecher** in 1 Ch 8³¹. 2. A Levite, one of the sons of Korah, firstborn son of Meshelemiah (1 Ch 9^{21, 23-24}). 3. A Levite, whose place was among the brethren of the second degree under the chief singers Heman, Asaph, and Ethan (1 Ch 15^{18, 20}). 4. A priest in the time of David (1 Ch 15²⁴), one of the seven appointed to blow a trumpet before the ark. 5. A Levite, of the family of Kohath (1 Ch 24²⁵). 6. A Levite, of the family of Merari (1 Ch 28¹¹). 7. Father of Iddo (1 Ch 27²¹). 8. One of the princes of Judah in the days of Jehoshaphat (2 Ch 17¹). 9. A Levite, one of the sons of Asaph (2 Ch 20¹⁴). 10. Son of Jehoshaphat (2 Ch 21³), to whom, with his brethren, his father gave large gifts of silver and gold, together with certain fenced cities. Along with the other sons of the king he was slain by his brother Jehoram on his accession to the throne. 11. Son of Jehoiada the priest (2 Ch 24²⁰). After Jehoiada's death, Joash, who had yielded to the evil counsels of his princes, was privy to the conspiracy against Zech., because he reproved the idolaters and announced God's judgment against them. He was stoned with stones at the commandment of the king in the court of the house of the Lord. His dying words, 'The Lord look upon it and require it,' were long remembered. See also ZACHARIAH. 12. A prophet, living in the earlier part of Uzziah's reign, i.e. before the middle of the 8th cent., about B.C. 770, who exercised a powerful influence for good upon the king (2 Ch 26³). He is described as having 'understanding in the vision of God,' or giving 'instruction in the fear of God.' 13. Son of Jeroboam II., king of Israel (2 K 14^{29, 15-17}). It would seem that his father's death had been succeeded by a period of confusion, and probably the interval of at least ten years between the father's death and the son's succession had been spent in incessant conflicts between rival claimants of the throne. Jeroboam died in the twenty-seventh year of Uzziah, and Zech. succeeded in the thirty-eighth year of that monarch's reign (2 K 15³). It may very well be that Zech. was a brave soldier and a capable ruler like his father, but all that the sacred historian records of him is that, in respect of character and moral conduct, he followed his fathers in evil-doing. He did that which was evil in the sight of the Lord, as his fathers had done; he departed not from the sins of Jeroboam the son of Nebat, wherewith he made Israel to sin. After a reign of six months he was slain by a conspirator Shallum, who himself survived only one month. With Zech. ended the dynasty of Jehu, according to the word of the Lord (2 K 10³⁰), 'thy sons of the fourth generation shall sit on the throne of Israel.' 14. A man of high repute in Isaiah's day (Is 8³). When faithful witnesses were required to attest a solemn prophetic roll, this Zech. was chosen along with Uriah the priest. He is described as son of Jeberechiah, and may possibly be the same as the Asaphite mentioned in 2 Ch 29¹³, as Delitzsch suggests (see No. 16). Diestel (in Schenkel, v. 130) would identify him with the prophet of Uzziah's time (see No. 12); but this cannot be, for the prophet referred to evidently died in the earlier years of Uzziah's reign, whereas this Zech. is represented as living in the days of Ahaz. Riehm suggests his identification with the father of Hezekiah's mother (No. 15). 15. The father of Abi or Abijah, the mother of king Hezekiah (2 K 18², 2 Ch 29¹). Murphy thinks he may be identified with the prophet mentioned in 2 Ch 26³; but this is extremely improbable. 16. A reforming Asaphite under Hezekiah (2 Ch 29¹³), who took part in the cleansing of the house of the Lord. 17. Head of a house of the

Reubenites (1 Ch 5⁷), one of the brethren of Beerah, who as one of the princes of the Reubenites was taken away captive into Assyria by Tiglath-pileser in the days of Pekah king of Israel, about B.C. 734. 18. A Levite, one of the sons of Kohath (2 Ch 34¹²), in the days of Josiah. In the work of repairing the temple, about B.C. 620, this Zech. was one of the overseers. 19. One of the rulers of the temple under Josiah (2 Ch 35⁶). As Hilkiah mentioned immediately before was chief priest, Zech. was probably second priest (זָכַרְיָהוּ כֹהֵן, like Zephaniah in Jer 52²⁴, 2 K 25¹⁸). He is also named in 1 Es 1⁹. See ZACHARIAS, 1. 20. The prophet. See next article. 21. One of the family of Parosh or Phoros, who accompanied Ezra from Babylon to Jerusalem in B.C. 458 (Ezr 8³, 1 Es 8³⁰). 22. Son of Bebai (Ezr 8¹¹), leader of the twenty-eight sons of Bebai who returned to Jerusalem with Ezra. 23. One of the chief men with whom Ezra consulted at the river Ahava or Theras near Babylon (Ezr 8¹⁶. See also 1 Es 8³⁴). 24. A descendant of Elam, one of the people who had taken foreign wives, and who undertook under Ezra's reformation to put them away (Ezr 10²⁶). See also 1 Es 9²⁷. 25. One of the descendants of Perez (Pharez), son of Judah, whose descendant, Athaliah, was one of the heads of the children of Judah settled in Jerusalem after the return from Babylon (Neh 11⁴). 26. Called the son of the Shilonite (Neh 11⁵), a descendant of Shelah, son of Judah, whose descendant, Manasseh, was one of the heads of the children of Judah settled in Jerusalem after the return from the Exile. 27. Son of Pashhur, a priest and courtier under Zedekiah, whose descendant, Adaiiah, was one of the priests settled in Jerusalem under Nehemiah (Neh 11¹²). 28. An Asaphite, son of Jonathan, who, 'with musical instruments of David, the man of God,' took part with Ezra in giving thanks at the dedication of the wall of Jerusalem (Neh 12³⁵). 29. A priest, one of the blowers of trumpets at the dedication of the wall of Jerusalem, who took part in that thanksgiving service (Neh 12⁴¹).

ZECHARIAH, BOOK OF.—

i. The genuine prophecies of Zechariah (chs. 1-8).

ii. The activity and significance of the prophet.

Literature:

iii. Chs. 9-14: (1) Contents; (2) Relation of the different parts to one another; (3) Date of the various components; (4) Religious and theological value of these chapters.

Literature.

i. THE GENUINE PROPHECIES OF ZECHARIAH (CHS. 1-8).—The Book of Zechariah includes within it passages belonging to very different dates and proceeding from different hands. The superscriptions that appear in 9¹ and 12¹ divide the book into two larger parts: (1) chs. 1-8, (2) chs. 9-14.

For Zechariah, the contemporary of Haggai, who is named in 1¹, all that has to be taken into account is chs. 1-8, which fall into three divisions: (a) 1¹⁻⁶ a call to repentance, based upon an allusion to the impotence of the fathers and the consequent judgment that overtook them. They and the prophets are gone, but God's word still abides in force.—(b) 1⁷⁻⁹ the nocturnal visions of Zechariah, with an appendix 6¹⁰⁻¹⁵. In eight visions, which are explained to him on each occasion by the *angelus interpretis*, the prophet gives, as it were, a compendium of the eschatological hopes that animated him. The exposition of these is followed up by the direction in 6^{10a} to him to take of the silver and gold brought by the deputies of the Babylonian Jews, and to have a crown made for the *Zemah*, i.e. for Zerubbabel. This crown is then to be laid up in the temple as a memorial of the deputies. Side by side with Zerubbabel is to be

Joshua as priest, and peaceful relations are to subsist between the two. Then shall the peoples come from far and help to build the temple of Jahweh. (The text of this passage has not come down to us intact, but has obviously undergone revision in order to obscure the difference between these hopes and the actual history. By aid of the LXX the original text may be reconstructed).—(c) Chs. 7. 8. Taking occasion from the question addressed to the priests and prophets whether the fast-days observed during the Exile were still to be kept up, the prophet points to the impending Messianic time, for which a moral reformation is the indispensable prerequisite. Then shall the fast-days become joyous festivals, when men from all peoples shall join themselves to the Jews in their pilgrimages to Jahweh, because they have heard that God has fixed His dwelling-place with them.

ii. THE ACTIVITY AND SIGNIFICANCE OF THE PROPHET.—According to 1¹⁻⁷, Zechariah was a son of Berechiah and a grandson of 'Iddo, the latter of whom is mentioned as the head of a priestly family which returned from the Exile (Neh 12⁴). Zechariah will thus have been presumably somewhat young when he began his prophetic work amongst his people. We are told in 1¹ that he came forward, like Haggai, in the second year of Darius (Hystaspis), but two months later than that prophet; he continued to labour till the 7th month of the fourth year (cf. 7¹). In this way his whole activity would appear to have been confined to rather less than two years. The political background is the same as in Haggai, namely, the violent commotions which the accession of Darius produced in the north-eastern portion of his empire. A feeling of profound depression had laid hold of the community at Jerusalem; Jahweh, it was felt, had not yet had compassion upon His people, He yet remained far from them. Zechariah strives to reanimate the hopes of his co-religionists, and to rekindle faith in the time of consummation, which will speedily set in; and it would appear that he was at least partially successful (cf. 7¹⁵). An indispensable condition of the arrival of the Messianic era is the building of the temple; for as the commencement of the judgment formerly showed itself when the glory of Jahweh was seen by Ezekiel (cf. ch. 10) to forsake the temple, so upon the day when Jahweh once more makes His abode with His people all the distress of the time shall come to an end; in short, this dwelling of Jahweh in the temple is the *sine qua non* of the dawn of the Messianic age (cf. 8¹⁵). Hence Zechariah, like Haggai, concentrates all his energies upon the task of inducing the people to undertake the work of building the temple. It is from this point of view that one can understand Zechariah's view of the priesthood as the security for the coming of the *Zemah*, i.e. the Messianic King (cf. 3^{8a}).—Zechariah's endeavour to reanimate the hopes of his contemporaries explains also the central place which Messianic prophecy occupies in his book. The whole of the nocturnal visions turn essentially upon the Messianic expectations of the time, and in ch. 8 as well he has regard to these, so that from this book we can construct a pretty complete picture of the Messianic hopes that were then entertained. The central figure is the Messianic King, whom Zechariah, with reference to Jer 23⁵ (33¹⁵), calls the *Zemah* and identifies with Zerubbabel, although a redactor, who had regard to the actually existing relations, has sought to substitute the high priest Joshua for Zerubbabel. It is true, indeed, that even with Zechariah himself the high priest holds a highly significant place: he represents the community before Jahweh, and has at all times free access to Him. Cf. also the articles EZRA-NEHEMIAH, HAGGAI, and ZERUBABEL.

In Zechariah, as in Haggai, we note the disappearance of immediate prophetic inspiration. Connected with this is the circumstance that the message is communicated to the prophet by the angel of Jahweh (cf. Ezk 40³⁰), and that his visions are no longer the outcome of intuition but rather of deliberate reflexion. Hence the *angelus interpres* is a standing figure in them. Side by side with the *angelus interpres* we have the *mal'akh Jahweh* and the *Satan*, the latter of whom also is thus obviously to be thought of as included among the messengers of God. The greater prominence thus assumed by angels is the result of the more transcendental character to which the idea of God has attained: Jahweh is One who is enthroned on high above men, and whose dealings with them must be through the medium of angels. Here for the first time we encounter *ha-satan*, still indeed as an appellative. It is not till 1 Ch 21 that it attains the character of a proper name. The Book of Job appears, in its idea of the *Satan*, to occupy a position intermediate between these other two. See, further, the article *SATAN*, above, p. 408^b. —Not without significance, perhaps, for further development is the conception here met with of Sin as an independently existing power. Personified as a woman, she is carried off to the land of Shinar, i.e. the land of destruction (cf. 5¹²). This last designation is considered, indeed, to include not only Shinar, but the whole heathen world; in Zechariah, as in Haggai, the way is paved for the notion so clearly defined in Daniel of the kingdom of God and the kingdoms of the world. Here the opposition is not yet sharply marked; here, partly as an after-effect of Deutero-Isaianic ideas, but partly also as a consequence of a vivid consciousness of being the bearers of the true religion and of being 'righteous,' in contrast with the 'ungodly Gentiles' (cf. 1¹⁵ 2¹²), we meet with the thought that from all peoples those seeking for salvation shall flock to Jerusalem and dwell there, and that Jahweh will own them as His people (cf. 2¹¹. 3²⁰).

iii. CHAPTERS 9-14.—(1) *Contents*.—Ch. 9 opens with the announcement of judgment upon Damascus, Tyre, Zidon, and the Philistines. Jahweh Himself protects Jerusalem and its inhabitants. Jerusalem is to be the seat of the Messianic King, who will enter the city riding upon an ass, the animal of peace. For He works not with secular resources, but by His word puts an end to the strife among the nations. For the sake of the blood covenant Jahweh brings back the captives of Zion. Judah and Ephraim, together with Zion, are to be the weapons wherewith He subdues the sons of Javan. Then will Jahweh feed His people like a flock in His land which is so good and fair.—After a short interlude, in which the Israelites are called on to ask rain from Jahweh, instead of turning to teraphim and soothsayers (10¹⁻²), comes 10²⁻¹¹: Jahweh threatens the shepherds and the goats; He removes them, and native leaders put themselves at the head of Judah, which with Jahweh's help overcomes those that ride upon horses. But Jahweh will have pity on the house of Joseph and will bring them back, so that they shall be His as if He had never cast them off. From Egypt and Assyria He will bring them back to Gilead and the

Lebanon district, but the land will not suffice for them. Jahweh will be their strength, and in His name shall they boast. But the cedars of Lebanon and the oaks of Bashan shall howl because the forest is destroyed, the shepherds bewail the loss of pasturage, the lions roar because the glory of the Jordan Valley is gone.—In 11⁴⁻¹⁷ we have a narrative of what has occurred in recent times; the prophet is to put the contents of his preaching in pictorial form, as it were, before the eye. He receives the commission to take the place of the worthless shepherds in feeding the sheep. He took the two staves 'Graciousness' and 'Union,' in order to represent in a way the principles by which he meant to be guided. In like manner he cut off the three shepherds in one month. But soon he became disgusted with the sheep, and they abhorred him. Therefore he broke the two staves, and now received the commission to act the part of a foolish shepherd, for such an one Jahweh is to set over them by way of punishment. The conclusion of this threatening of 11¹⁷ is supplied by 13⁷⁻⁹: Jahweh will smite the shepherd, so that the sheep shall be scattered.—12¹⁻¹³ form a whole: the heathen, and with them Judah, besiege Jerusalem, but from Judah judgment goes forth upon the heathen, while Jerusalem itself remains peacefully in its place. Jahweh has at first helped the Judahites, that the pride of the house of David and of the inhabitants of Jerusalem might not become too great. Then Jahweh protects Jerusalem, the heathen who are moving against her are destroyed by Him. Then shall the inhabitants of Jerusalem look back to him whom they once pierced, and they lament over him as one does over an only son.* Then Jahweh opens for the house of David and its inhabitants a fountain for purification, then He roots out the names of the idols, and destroys the prophets, and expels the spirit of uncleanness out of the land.—Ch. 14 begins once more with a reference to an attack by the nations upon Jerusalem; the city is taken, the houses destroyed, half of the inhabitants go into captivity. Then Jahweh appears for her defence, treads upon the Mt. of Olives, which divides under His feet, and the other half of the inhabitants make their escape through the new valley thus formed. There is no more interchange of light and darkness, of heat and cold, but one day. Living waters flow from Jerusalem eastwards and westwards. Jahweh rules as king over the whole earth. The flesh of the peoples who fight against Jerusalem shall moulder away while they are yet alive, but the remnant shall all come to Jerusalem to worship Jahweh and to keep the Feast of Tabernacles.

(2) *Relation of the different parts to one another*.

—In seeking to answer this question, the circumstance must be kept in mind that in these chapters events are frequently described not in their actual chronological order, but the final result emerges first, and the description follows of the way in which God brings about this result. Taking this into account, it will be seen that there is no occasion, with Rubinkam, to separate 9¹⁻¹⁰ from vv. 11²; the latter verses supply an account of the incidents that precede the advent of the peaceful King. On the other hand, 10¹⁻² has a very loose connexion with ch. 9. 10² might be from the same hand as ch. 9; in the latter there was only a passing allusion to the return of the captives, in 10² this has the central place; as in 9¹² Syria is the subject of Divine judgment, so here it is *ḥayyā*, which in late Hebrew stands for Syria.

It is very questionable, however, whether 11⁴⁻¹⁷ and 13⁷⁻⁹ are from the same hand as chs. 9 and 10. No decisive grounds can be alleged in favour of

* For the text of this passage, and the use made of it in Ja 1967, see art. QUOTATIONS, p. 164^b.

identity of authorship; on the contrary, there is a marked diversity in so far as it is only at 11¹⁷, which has its continuation in 13⁷⁻⁹; that the outlook into the future begins.—Ch. 12 is not, as Cornill (*Einführung*², p. 203) maintains, the necessary complement of 11¹⁷; in fact, the striking difference of diction makes it impossible to ascribe both chapters to the same hand. Seeing, further, that ch. 13 is undoubtedly closely bound up with ch. 12, a material objection to Cornill's opinion emerges. In ch. 13 the writer holds in abhorrence those who make a public claim to be prophets; Jahweh will make an end of such, just as He sweeps idolatry and the spirit of uncleanness out of the land. On the other hand, in 11¹⁷ the prophet in his experiences is to represent in a way the conduct of the people, and the 'Canaanites (traffickers) of the flock' (reading *הַקָּנָאִיִּים* for *הַקָּנָאִיִּים*), who watch his conduct, are to recognize that it is the word of Jahweh that determines his action. We cannot assent to Rubinkam's separation of 13¹⁻⁶ from ch. 12, which is justified neither by the language nor the contents; the features in the picture of the last days mentioned in 13¹⁷ complete the picture of ch. 12.

On the other hand, ch. 14 must certainly be assigned to another pen than 12¹⁻¹³. According to ch. 12, the destructive judgment is executed upon the heathen before Jerusalem, while the city itself stands fast; but, according to ch. 14, Jerusalem is captured by the heathen, the houses destroyed, etc. According to 13¹, a fountain is opened for the house of David and the inhabitants of Jerusalem for the purpose of purification, whereas the fountain of 14⁸ obviously serves different ends altogether. As little can we think of a connexion of ch. 14 with chs. 9 and 10, as is plain from the opposition between 14¹⁴ and 9¹⁰.

The result of our examination is that we have the following independent pieces: (i.) 9. (10¹⁴.) 10²⁻¹¹; (ii.) 11⁴⁻¹⁷ 13⁷⁻⁹; (iii.) 12¹⁻¹³; (iv.) ch. 14.

(3) *Date of the various components.*—(i.) 9. (10¹⁴.) 10²⁻¹¹. Of decisive weight for fixing the date is 9¹³, where the *בְּנֵי יוֹון* ('sons of Greece') are named as the principal enemies of the people of Jahweh. The place here assigned to the Greeks carries us to the time subsequent to Alexander the Great. This conclusion is not opposed by 10¹⁰, where Asshur and Egypt are mentioned, for, as was noted above, *אַשּׁוּר* became in later days a name for Syria. It is from this same point of view that 9¹⁴ becomes for the first time intelligible: the word of Jahweh is directed against the land of Hadrach and Damascus, i.e. against the empire of the Seleucids. Thus also we understand certain other features in the picture of the future: the gracious favour shown to Ephraim and the turning again of her captivity, as well as her reunion with Judah, all this has come, since the time of Ezekiel, to be a fixed point in the eschatology of the prophets. The figure of the Messianic King is not opposed to the above date, for it is only an apparent identity that subsists between 9¹⁰ and 15³. As a matter of fact, this King is quite passive, His form almost disappears, to make room for that of a *homo spiritualis*. Characteristic of the same period are passages like 9⁷, where the return to Jahweh finds expression partly in the observance of Levitical laws about food, a notion utterly impossible in the pre-exilic period. A more precise dating for these chapters is unattainable, on account of a lack of clear allusions to the historical situation.

(ii.) 11⁴⁻¹⁷ 13⁷⁻⁹. This section contains allusions to certain contemporary occurrences, but they are unintelligible to us, partly owing to the probably defective text that has come down to us, but partly also to our very inadequate information regarding considerable periods of the post-exilic

history. This alone may be regarded as beyond doubt, that we are pointed to a time after the Exile: what is said in 11¹⁷ about the shepherds, as well as the similar expressions in v.⁹, can be understood only in the light of their dependence on Ezk 34. The shepherds are to be understood as the native authorities, especially the high priest. It is of the latter that we must understand the *רִי* of 11¹⁷ and the *נָזִיר* of 13⁷,—he is, as it were, Jahweh's companion; *קָרִיב* and *כִּבְרִיב* (11¹⁷) must be foreign rulers, who are hence fittingly called *הַמֶּלֶךְ הַזֶּה* (11⁷⁻¹¹). Wellhausen is inclined to see in 11¹⁷ a reflexion of the incidents in the last decade before the outbreak of the Macabæan revolt, which witnessed rapid and violent changes of the high priesthood.

(iii.) 12¹⁻¹³ bears, throughout, the post-exilic stamp. (a) The campaign of the heathen against Jerusalem is dependent upon Ezk 38 f. The thought that Jahweh in the first instance helps Judah, lest Jerusalem may exalt herself yet more, cannot be properly understood at any period earlier than that at which Jerusalem had become the rallying-point for the Diaspora of the whole Jewish world, and when the glory of the city and her temple was reflected also upon her rulers and her inhabitants. —(b) 13¹, too, points to dependence on Ezekiel, although his viewpoint has been transformed under the influence of notions of the Levitical period, as these find expression in the custom described in Nu 19.—(c) We are pointed to the later post-exilic period by the juxtaposition of *הַיָּמִים הַהֵם* and *הַיָּמִים הַהֵם* (12¹²), which would have been an impossibility in pre-exilic times. And the whole description in 12¹¹ carries us to a time after the Exile.—(d) A late date is also indicated by the hostility breathed in 13² against prophecy, i.e. against those who come forward publicly, clothed in a hairy mantle. The place of these had been taken by anonymous and pseudonymous prophetic authorship. Our chapters lie upon the line of development, whose culmination is indicated in views like those expressed in 1 Mac 4⁴⁶ 9²⁷ 14⁴¹, cf. *Sanhed.* 11a.

(iv.) Ch. 14 likewise belongs to later post-exilic times. (a) This chapter also is dependent on Ezk 38 f. It is true that the thought of the latter is transformed in quite a peculiar fashion, without our being able to recognize the motive for the change, but this cannot prevent our admitting the dependence which is unmistakably present in 14¹⁴. —(b) In 14¹¹ we are probably carried to the period after Malachi, for this verse is dependent on Mal 3²⁴; it is probable, moreover, that v.⁹ is in conscious opposition to Mal 1¹¹.—(c) It is only during the later post-exilic period, when the Jewish Diaspora went on pilgrimage to Jerusalem from all parts of the world to hold the festivals, that we can understand the thought expressed here (v.¹⁰) that the converted heathen proclaim their conversion by a pilgrimage to Jerusalem to keep the Feast of Tabernacles.—(d) It is only during the same period that the notion of holiness expressed in v.²⁰ is intelligible, a notion which once more shows the influence of Ezekiel.

(4) *Religious and theological value of these chapters.*—We stand no longer upon the ground of prophecy properly so called, but of anonymous eschatological writing. Certain stereotyped features of eschatology recur. The writers are very strongly influenced by ancient prophecy; for the most part by its religious rather than by its ethical contents. Ethical features indeed recede far behind religious. Very marked is the influence of the Levitical period. The Messianic King still appears, it is true, in 9⁹, but He is a comparatively otiose figure which might be left out without damaging the connexion. He is no longer the leader in the conflict against enemies, but exclu-

sively Prince of Peace, with an extremely passive character. The conception of the final King had at this time assumed a pale cast, that it might be able to take on other colours, namely those of the priest and the prophet.—Highly significant is the conception of the Kingdom of God as embracing the whole world. Jahweh is King over all the earth, and, as He is one, His worship is also one (cf. 14^b). But this universalism has a strong Levitical colouring, as is shown especially by the closing verses of ch. 14 with their weighty emphasis upon the purity of the theocracy. The ordering of everything on the basis of the dominion of holiness, in other words the supremacy of the Law,—this is the end of the process of development.

Eckardt, it is true, maintains that the spiritual uniqueness of Deutero-Zechariah consists in the freedom with which he extends the theocratic universalism over the whole religious situation of his time. From passages like 14^a 13^a 9^a Eckardt draws the conclusion that, according to Deutero-Zechariah, the heathen world unconsciously worships Jahweh in the person of its own gods, that in its ceaseless gropings and strivings it seeks Him without any clear notion of what it is doing. Deutero-Zechariah, he holds, goes beyond Mal 1^a and Is 26¹³; for while Malachi exhibits a view which, carried to its logical conclusion, must end in syncretism and indifference, and while Is 26¹³, on the other hand, shows a large-heartedness which might readily be abused to cover cowardly subservience and denial of the truth, Deutero-Zechariah in his universalism has avoided these errors. So far from seeing in idolatry only a readily excusable error in calculation, he considers that heathenism must be overcome in the most terrible conflict. Eckardt admits that the views of Deutero-Zechariah have a Levitical tinge, but urges that his universalism is not brought to a stand by the wall of the Law, but breaks through it whenever it presents itself as an obstacle. Ch. 14, it is true, lays great stress upon Levitical purity, but it is clear from the context, especially from the closing words of v. 21, that for the writer the building up of the Kingdom of God culminates in piety of soul, just as the Levitical purity of the last days passes over into inward purity. Nay, from 14¹⁹, where he renders נָשָׂא by 'sin-offering', Eckardt draws the conclusion that the particularistic narrow-mindedness of the laws about atonement is then to be overcome by the universalism of Divine grace, for there shall be a *hullath* even for the peoples who defiantly refuse to join in the prescribed pilgrimage to Jerusalem.

An accurate unprejudiced exegesis, however, shows these contentions of Eckardt to be irreconcilable with the text. In view of the condition of things described in 14¹⁶⁻¹⁹, how can the statement that there shall be no more a Canaanite in the house of Jahweh be made to justify the inference that 'the building up of the Kingdom of God shall be founded on piety of soul'? Or how can 14⁹ 'Jahweh's name shall be one' give rise to the notion that at present Jahweh is worshipped under a variety of names? In any case no support to this notion is given by 9^a, which cannot mean that the eyes of the heathen world are turned towards Jahweh. 9^a alone would suffice to turn the scale against Eckardt, for in this verse the conversion of the Philistines is to evidence itself (1) by their eating no more of εἰδωλόθυτα, and (2) by their submitting to the Levitical laws about food, 'for Jahweh removes the abomination between their teeth.' It is beyond question also that in 9^a we have not a promise, in contrast with Dt 23^a, but a threatening, as the context shows. Eckardt's view is thus shown to be untenable on exegetical grounds.

LITERATURE.—B. G. F. Flügel, *Die Weissagungen welche bey den Schriften des Propheten Zacharias beygebohen sind, etc.*, 1784; W. Hengstenberg, *Beiträge*, i. W. NOWACK.

ZECHER (זְכֵּרִי).—A son of Jehiel the 'father' of Gibeon, 1 Ch 8³¹ (B Ζαχαίρ, A Ζαχαίρ, Luc Ζεχαίρ); called in 9⁷ Zechariah.

ZECHRIAS (B Ζεχρίας, A 'Εφερίας, AV Ezcrias), 1 Es 8¹.—Azariah, a priest in the line of Ezra, Ezr 7¹.

ZEDAD (זֶזֶד [the name occurs only with ז locale, זֶזֶד]).—One of the points mentioned in defining the Northern border of the Promised Land in Nu 34⁸, and again in Ezekiel's ideal picture, Ezk 47¹⁵. The reading is uncertain, the Sam. having in Numbers זֶזֶד; LXX in Numbers, B and Luc. Ζαρδάκ, A Σαδδὰκ, F Σάδδὰκ; in Ezekiel, BA Σελδαμμά. If the reading זֶזֶד is followed, the site is unknown; for, as Dillmann points out, the *Sadad*, on the road from Riblah to Karyaten (accepted by Wetzstein, Mühlau, Furrer, *et al.*), is much too far to the east and north. If we read זֶזֶד, as we should probably do, the place may perhaps be identified (so van Kasteren, *RB*, 1895, p. 30) with *Khirbet Serādā*, N. of Abil, E. of Merj 'Ajūn, towards Hermon.

ZEDEKIAH (זְדַכְיָהּ, זֶדְכְּיָהּ only in 1 K 22¹¹, Jer 27¹² 28¹ 29² 'righteousness of J^h'), LXX Ζεδεκιά, Ζεδεκίας, Ζεδεκίου; Vulg. *Sedecias*.—1. Son of Chenaanah, and one of Ahab's four hundred court prophets (1 K 22¹¹ 24 25, 2 Ch 18¹⁰ 22 24). When Jehoshaphat demanded that a prophet of J^h should be consulted about the proposed expedition to Ramoth-gilead, Zedekiah came forward in that character in order to forestall Micaiah ben-Imlah. He produced horns of iron and apparently presented them to Ahab as from J^h, with a Divine commission: 'Thus saith the LORD, With these shalt thou push the Syrians, until they be consumed.' He maintained his attitude in the presence of Micaiah, and ventured to insinuate a doubt as to the source of the inspiration of the latter: 'Which way went the spirit of the LORD from me to speak unto thee?' The sharp retort in which Micaiah reaffirmed the coming defeat of Israel does not seem to have weakened the infatuation of the two kings. The lying spirit prevailed.

Josephus (*Ant.* viii. xv. 4) embellishes this story, and transposes the incidents of it. He puts a speech to Ahab into Zedekiah's mouth, in which he tries to prove Micaiah to be a false prophet because of his disagreement with Elijah as to the place of Ahab's future death, and concludes by proposing a practical test: 'When struck by me, let him injure my hand as Jadaas dried up the right hand of king Jeroboam when he wished to arrest him.' Zedekiah then smites Micaiah, and as nothing happens to him, Ahab is convinced. The incident of the iron horns follows.

2. A prophet, one of the captives deported to Babylon with Jehoiachin. He and another, named Ahab, are denounced by Jeremiah (29²¹⁻²³) for gross immorality as well as for falsely prophesying a speedy restoration from Babylon. It was probably their action as political agitators that brought on them the cruel punishment of being roasted in the fire by order of Nebuchadrezzar. Jeremiah

prophesied that their fate would be proverbial. Zedekiah was son of MAASEIAH, who is probably to be identified with the priest whose son, 'the second priest' Zephaniah, was put to death at Riblah by Nebuchadrezzar (2 K 25^{18,27}). 3. Son of Hananiah, one of the princes in the reign of Jehoiakim (Jer 36¹²).

4. The last king of Judah (SEDEKIAS in 1 Es 1⁶, Bar 1⁵). He was the youngest son of Josiah and full brother of Jehoshaz (2 K 23³¹ 24¹⁸; in Jos. *Ant.* x. vii. 2, 'Jehoiakim' is a blunder for 'Jehozaz'). In 1 Ch 3¹⁸ his name precedes that of SHALLUM or JEHOAHAZ, perhaps on account of the latter's insignificance, while in the following verse and in 2 Ch 36¹⁰ he is represented as son of Jehoiakim, perhaps as having been his successor. These variations are instructive as showing the degree of inaccuracy which may exist in biblical genealogies. The direct account of this reign is contained in 2 K 24¹⁷⁻²⁵, Jer 39¹⁻⁷ 52¹⁻¹¹, 2 Ch 36¹⁰⁻²¹. Considerable light is also thrown on this period by the prophetic writings of Jeremiah and Ezekiel, especially the narrative portions of Jeremiah which are here enumerated in their chronological order: chs. 24. 27. (Gr. 34.) 28. (35.) 29. (36.) 21. 37. (44.) 34. (41.) 38. (45.) 39¹²⁻¹⁸ (46¹⁵⁻¹⁸) 32. (39.) 33. (40.) 39¹⁻¹⁴ (46¹⁻⁵). There is, in fact, more contemporary material available for the construction of the history of this reign than of that of any other Hebrew monarch; yet there are few of which there is so little definite to record.

Zedekiah's eleven years' occupancy of the throne was but the last sigh of the expiring Davidic dynasty, one episode in the struggle of Egypt and Babylon for the mastery. The king himself was a weak man in a false position. As a private citizen he might have had an inoffensive and respectable career, for he was of an amiable disposition and religiously inclined, but in the Davidic vine he was 'no strong rod to be a sceptre to rule' (Ezk 19¹⁴). Josephus in one passage (*Ant.* x. vii. 5) credits him with *χρηστότης καὶ δικαιοσύνη*. This is sufficiently evidenced in his dealings with Jeremiah. On two occasions we read of formal deputations from the king to the prophet (Jer 21¹ 37³), 'Inquire, I pray thee, of the LORD for us,' 'Pray now unto the LORD our God for us'; and when this State recognition was no longer possible, Zedekiah proved the sincerity of his own personal convictions in secret consultations (Jer 37¹⁷ 38¹⁶). It is noteworthy, too, that the only occasions on which we read of Zedekiah's exerting his authority are when he mitigated the rigour of Jeremiah's imprisonment (37²¹) and sanctioned his deliverance from the miry dungeon (38¹⁰), see also Jer 38¹⁶; and so it was promised to him, in marked contrast with the fate of Jehoiakim (Jer 22^{18,19}), that he should die in peace and be buried as a king (Jer 34^{4,5}). Jeremiah, in fact, never adopts a harsh tone when speaking of him. Others also felt the same personal attraction. They looked back on him as 'the breath of our nostrils, the anointed of the Lord . . . of whom we said, Under his shadow we shall live among the nations' (La 4²⁰). On the other hand, Ezekiel, whose moral and political judgment was uninfluenced by personal contact with the king, speaks of Zedekiah in terms of unqualified censure. He is the 'deadly wounded wicked one.' The prophetic sentence of deposition anticipates the act of man (Ezk 21²⁵⁻²⁷). Ezekiel, in fact, is at one with the pro-Egyptian party in regarding Jehoiachin as *de jure* king. He dates his visions not by the years of Zedekiah's reign, but by those of king Jehoiachin's captivity. On other grounds it is difficult to avoid feeling sympathy with the pro-Egyptian party in Jerusalem. In comparison, indeed, with the exiles in Babylon,

they were as bad figs, 'very bad, that cannot be eaten, they are so bad' (Jer 24, see also Ezk 5⁴ 11¹⁸⁻¹⁹ 14²⁸ 22. 33²⁴⁻²⁶), but their patriotism was sincere if perverted, while Zedekiah's throne rested upon a renunciation of national ambitions. This is clearly marked in the words of Ezekiel (17^{13,14}). 'The king of Babylon . . . took of the seed royal and made a covenant with him; he also brought him under an oath, and took away the mighty of the land: that the kingdom might be base, that it might not lift itself up, but that by keeping of his covenant it might stand.' In other words, it was Nebuchadrezzar's policy to reduce the Jewish nation to impotence and at the same time attach it to himself by motives of self-interest, and thus control the powerful fortress of Jerusalem. Josephus (*Ant.* x. vii. 1) gives the terms of the oath under which Zedekiah was brought: 'That he would surely guard the country for him, and neither make any political changes nor favour the Egyptians.' Accordingly, the hopes of the national party centred round Jehoiachin, whom they hoped to restore to the throne (Jer 28⁴). Zedekiah's disloyalty, therefore, was directly against his own personal interests; but he was quite passive in the hands of the man or faction that happened to be nearest to him at the time; as Josephus says (*Ant.* x. vii. 2), 'As long as he heard the prophet speaking these things, he believed him and agreed to everything as true, and believed that it would be to his advantage; but then his friends used to corrupt him and draw him away from the suggestions of the prophet to whatever course they wished.' We have here an echo of the taunt-song which Jeremiah (38²⁴) puts into the mouth of the women of the royal harem: 'Thy familiar friends have set thee on, and have prevailed over thee: now that thy feet are sunk in the mire, they are turned away back.' 'The princes' to whom allusion is here made, seem in this reign to have usurped most of the executive power. They tried and sentenced Jeremiah on a charge of desertion (Jer 37¹⁴). They reduced the king to abject terror (37¹⁷ 38²⁸). There was truth as well as pathos in the words with which he surrendered his best friend to them: 'The king is not he that can do anything against you' (38⁵). In a ruler such weakness is the greatest crime, and in the case of Zedekiah it was aggravated by the fact that 'the princes' for the most part belonged to the pro-Egyptian party to which Jeremiah and Ezekiel (Jos. *Ant.* x. vii. 2) were opposed, and which encouraged the idolatrous reaction which followed on the death of Josiah. That reaction was now in full force (see Ezk 8 and 11). And yet it is not so much for abetting false or irregular worship that the prophets condemn Zedekiah as for breach of faith. The oath of fealty which he made to Nebuchadrezzar struck men as being of a peculiarly binding nature. He 'made him swear by God' (2 Ch 36¹⁹) and place his hand under his thigh (Ezk 17¹⁸). The lofty and stern morality of the Hebrew prophets did not palliate Zedekiah's subsequent violation of this solemn promise on the ground that it had been made to a heathen. On the contrary, 'Thus saith the Lord God: As I live, surely *mine* oath that he hath despised, and *my* covenant that he hath broken, I will even bring it upon his own head' (Ezk 17¹⁹). The new name *Zedekiah* which he now received in place of *Mattaniah*, in token of vassalage, very possibly has reference to the righteousness of J^h which was appealed to on this occasion; and this again may well be 'the circumstantial origin' of the Messianic aspirations after the Shoot of the Davidic stock whose name is 'J^h is our righteousness' (Jer 23^{5,6}).

It is difficult to say how long Zedekiah remained negatively loyal to the Chaldeans, but in his fourth

year (B.C. 590) his allegiance was so far questionable that the rulers of Edom, Moab, Ammon, Tyre, and Sidon (Jer 27⁹), incited thereto by their prophets and diviners, were emboldened to send envoys to Jerusalem in order to induce Zedekiah to join a league for the purpose of throwing off the Babylonian yoke. The prophets and diviners of Israel, too, both in Jerusalem and Babylon, were fomenting a similar agitation, uttering definite predictions that 'shortly' (Jer 27¹⁶), 'within two full years' (Jer 28³), would all the vessels of the LORD's house and Jeconiah himself be restored to their native land. The silver vessels which Zedekiah is said (Bar 1⁹) to have made to take the place of the gold ones served to emphasize the national humiliation. It seems to us unaccountable that the peoples of Syria could have had such provincial imaginations, so little sense of proportion, as to expect the speedy fall of the empire of Nebuchadrezzar. On the other hand, it must be remembered that the rise of Chaldaea was of very recent date, the sudden collapse of Nineveh must have made anything seem possible, and belief in the inexhaustible resources of Egypt was a tradition in the East. The prestige of centuries dies hard. In opposition to such men as Hananiah and Shemaiah at Jerusalem (Jer 28¹ 29²⁴), and Ahab and Zedekiah at Babylon (Jer 29²⁴), Jeremiah as chief prophet of the pro-Chaldaean party declared that resistance to Nebuchadrezzar was premature, futile, and suicidal, since supremacy had been assured by God to Babylon for 70 years.

With characteristic energy Nebuchadrezzar at once set about crushing the incipient revolt. He made examples of the agitators at Babylon, 'roasting them in the fire' (Jer 29²²), and at the same time apparently sent to demand explanations from his vassal at Jerusalem. It is possible that the mission of Elasah and Gemariah (Jer 29³) to Babylon should be referred to this date; in any case Zedekiah's personal attendance was required, and he journeyed to Babylon before the close of his fourth year, accompanied by a leading member of the pro-Chaldaean party, Seraiah (Jer 51³⁶). There is no reason to doubt the sincerity of the protests of loyalty which Zedekiah doubtless made at this time. He had, in fact, everything to lose by the defeat of Chaldaea, but he counted for nothing in the struggle of factions at Jerusalem, which continued as before, intense, sordid, monotonous. In his fifth year Ezekiel (1² 4²⁻⁷) sees the fate of Jerusalem to be inevitable. The dominant party had an infatuated confidence in the impregnability of their fortress, 'This city is the caldron, and we be the flesh' (Ezk 11³); and as it was hopeless to expect any help from the exiles in Babylon, these latter—the real depositories of the Messianic hope—came to be regarded as outcasts: 'Get you far from the LORD; unto us is this land given for a possession' (Ezk 11¹⁸). This was the state of feeling in Jerusalem in the sixth year of the reign.

Psanmetichus II., who died in 589, was succeeded on the throne of Egypt by his brother Apries (Uahibri), and Zedekiah was induced to 'send his ambassadors into Egypt that they might give him horses and much people' (Ezk 17¹⁶). Edom, Moab, and Philistia now held back, but Judah committed itself to an alliance with Tyre (Ezk 26⁷ 29¹⁸), Ammon, and Egypt against Babylon. This took place, according to Josephus (*Ant.* x. vii. 3), at the close of Zedekiah's eighth year; but the prophecy of Ezekiel (21) in which reference is made to it seems to be dated (20¹) in his seventh year. In any case it was not until his ninth year, the tenth day of the tenth month, that the Chaldaean army actually invested Jerusalem. The delay is easily accounted for. At the time when war was actually

declared, Nebuchadrezzar was probably engaged in reducing Elam or Susiana (Jer 49³⁴⁻³⁹), and when he did turn his attention to the Egyptian coalition he was uncertain whether he should first attack Ammon or Judah (Ezk 21³⁰⁻³²). Finally, he established himself at Riblah, whence he despatched expeditions against Tyre and Jerusalem respectively. The division sent against Zedekiah, before settling down around the capital, reduced the smaller fortresses of Judah; Lachish and Azekah alone held out (Jer 34⁷). It was a day never to be forgotten (2 K 25¹, Jer 39¹ 52⁴, Ezk 24¹, Zec 8¹⁸). Some, the king himself included, at last recognized the fact that deliverance from this danger would be a miracle comparable to one of the LORD's wondrous works of old time (Jer 21²). The general alarm, indeed, was such as to cause a religious revival, one feature of which was a renewal, with the patriarchal ceremonial (Jer 34¹⁸⁻¹⁹), of the covenant, and in particular a solemn engagement was made by all the people that they would in future observe the law as to the manumission of slaves (Ex 21², Dt 15¹²). Their zeal for this enactment may have been quickened by a desire to increase the number of defenders of the city.

Meanwhile the Egyptian army, commanded by Apries in person, was advancing from the south to the relief of his ally (Jos. *Ant.* x. vii. 3), and captured Gaza, and compelled the Chaldeans to raise the siege of Jerusalem. Josephus (*l.c.*) states that the two armies met in a pitched battle, and that the Egyptians were put to flight and driven out of all Syria. From Jer 37⁷ we should infer no more than that Pharaoh was forced to retreat to his own land. The Chaldaean army had no sooner withdrawn than the base people of Jerusalem broke faith with their slaves and reduced them to bondage again—a step which called forth an indignant protest from the prophet (Jer 34¹³⁻¹⁷). Meanwhile there were constant desertions to the Chaldaean army (Jer 37¹³ 38¹⁹ 39⁹ 52¹⁸), caused at least in some measure by the predictions of Jeremiah. The burden of his utterances during the siege was that the city and all its contents was doomed, but that individual deserters would save their own lives (21⁹ 38²⁻¹⁷). We cannot wonder then that the anti-Chaldaean party regarded him as a dangerous traitor (38¹), and viewed with suspicion his relations with the king. In fact, after he had been sentenced to imprisonment, Zedekiah could only see him by stealth (37¹⁷ 38¹⁸).

The relieving force having been completely repulsed, the besiegers once more closed round the doomed city. Josephus displayed a true historical spirit in describing the siege in the light of his own experiences. It must have been an almost exact counterpart, in the desperate courage and the horrors of it, to the siege under Titus. There were the same circles of forts to keep the blockade, the battering-rams against the gates, the 'mounts' built high to overtop the city walls (2 K 25¹, Jer 32²⁴, Ezk 4² 17¹⁷ 21²² 26⁸⁻⁹), while the besieged strained all their powers of mind and body to erect counter works, destroying even the royal palace to find building material (Jer 33⁴). But deadlier than the missiles of the Chaldeans were the pestilence and the famine (Jer 21⁴⁻⁷ 32³⁶ 34¹⁷ 38²⁻⁹, La 5¹⁰, Ezk 5¹²⁻¹⁶ 17, Bar 2²⁸), with the supreme horror of cannibalism (Jer 19⁹, La 2¹⁹⁻²³ 4¹⁰, Ezk 5¹⁰). The city yielded at last to famine (Jer 52²), and on the ninth day of the fourth month, in the eleventh year of Zedekiah's reign, about midnight the six generals who had been conducting the siege entered through a breach and sat in grim state in the middle temple gate (Jer 39³; Jos. *Ant.* x. viii. 2; cf. Ezk 9²).

In the confusion that followed, Zedekiah with his household and most of the surviving defenders

of the city broke through the cordon of the besiegers; they were betrayed, however, by some of the deserters, and had only succeeded in reaching the plains of Jericho when they were overtaken. The unfortunate king was conveyed to Riblah to the presence of Nebuchadnezzar, who 'spoke with him of judgment,' taxing him, according to Josephus, with perjury and ingratitude. With a refinement of cruelty his eyes were put out, but not until he had seen the slaughter of his children.

Josephus calls attention to the remarkable manner in which the fate of Zedekiah fulfilled two apparently discrepant prophecies of Jeremiah and Ezekiel respectively. 'Thine eyes shall behold the eyes of the king of Babylon, and he shall speak with thee mouth to mouth, and thou shalt go to Babylon' (Jer 34³), and 'I will bring him to Babylon, to the land of the Chaldeans; yet shall he not see it, though he shall die there' (Ezek 12¹³).

In all probability, Zedekiah did not long survive his misfortunes. We hear no more of him. The hope of Israel henceforth centres round the more innocent captive, his nephew Jeconiah (2 K 25²⁷).

5. A 'prince' who 'sealed unto the covenant' at Nehemiah's reformation (Neh 10¹).

N. J. D. WHITE.

ZEEB.—See OREB.

ZELA(H).—A Benjamite city, Jos 18²⁸ (זֵלָה, LXX οἰκ.), where was the family burying-place of Saul (2 S 21¹⁴ זֵלָה [here RV needlessly confuses by writing Zelah], LXX ἐν τῇ πλευρῇ [taking it for זֵרָא 'side']). Its site has not been discovered.

ZELEK (זֵלֶק).—An Ammonite, one of David's heroes, 2 S 23³⁷ (B' זֵלַיָּה, A Σβλεγι, Luc. Σαλαδδ) = 1 Ch 11³⁹ (B Σίλη, A Σέλληκη).

ZELOPHEHAD (זֵלֹפְהָד).—A Manassite who died during the wilderness journeyings, leaving no male issue. His five daughters successfully asserted their claim to the inheritance of their father (Nu 26³³ 27¹⁻⁷ 36¹⁻¹², Jos 17³, 1 Ch 7¹⁵). See vol. ii. pp. 129^b and 341^b. The LXX readings are: B Σαλπαδ except in 1 Ch 7¹⁵ Σατπαδδ; A Σαλπαδδ except in Jos 17³ Σαλφαδδ (bis).

ZELZAH.—In 1 S 10³ Samuel tells Saul: 'When thou art departed from me to-day, then thou shalt find two men by Rachel's sepulchre in the border of Benjamin זֵלְזָה.' The last word is rendered by AV and RV 'at Zelzah.' But there are grave reasons for suspecting the correctness of this. No place of such a name is known to us, nor should we expect any further definition after the specific mention of 'Rachel's sepulchre.' The LXX translates by ἀλλομένους μεγάλη 'leaping mightily' (Ew. 'in grosser Eile'); ἀλλομένους = οὐλῶν (v.⁶). But, as Driver points out, though οὐλῶν may mean (metaphorically) *leap upon*, we are not justified in attributing to πῶν absolutely the sense of *leaping*. Moreover, μεγάλη as an adverb does not occur elsewhere in the LXX, and Wellh. is doubtless right in regarding it as simply a Heb. word written in Greek letters and transformed into something significant in Greek (for other instances of a similar kind see Driver, *Text of Sam.* 60 n.). He himself takes ἀλλομένους μεγάλη to be doublets which have arisen from the words ἐν Σηλώμ ἐν Βακαδδ which are found in several MSS after the word Βεθαμεν. Sec, more fully, his *Text d. Bücher Sam.* 73 f.; and cf. Driver and Löhr, who take practically the same view of the passage.

ZEMARAIM (זִמְרַיִם).—A city of Benjamin, apparently in the vicinity of Bethel, Jos 18²³ (B Σαρά, A Ζεμαριμ, Luc. Ζαμαρειμ). It prob. gave its name to Mt. Zemaraim ('זִמְרַיִם, τὸ ὄρος Σομορών'), in the hill-country of Ephraim, 2 Ch 13⁴, from which the

Chronicles makes Abijah harangue Jeroboam and his army. It is generally identified with *es-Sumra* to the north of Jericho (*PEF Mem.* iii. 174, 212 f.; Buhl, *GAP* 180, *et al.*); but Dillm. (*Jos. ad loc.*) doubts the correctness of this, holding that the place (see Berth. on 2 Ch 13⁴) ought to be sought to the south of Bethel, and not far to the east where *es-Sumra* lies.

ZEMARITE (זִמְרִי).—Name of a tribe said to be one of the sons of Canaan and placed between Arvad and Hamath, Gn 10¹⁸ = 1 Ch 1¹⁸ (A Ζαμαραιος, E [in Gen.] Ζαμαρειος). The name seems akin to Zemaraim of Jos 18²³. The Arabian geographers mention several places with similar names; but the juxtaposition of this name with Arvad suggests comparison with Sumur of the Tel el-Amarna tablets, in which the two names figure more than once side by side. So 150. 59 (ed. Winckler): 'The people of Arvad have made a treaty to take away Tyre; Tyre they could not conquer, but Sumur they did conquer.' From 81. 13 it appears to have been a port, and is identified by Winckler with Botrys. In the fragmentary narrative contained in these tablets it appears to have been repeatedly taken, destroyed, and rebuilt. A place named Simyra, considerably to the north of Botrys, is mentioned by the classical geographers (Strabo, xvi. ii. 12; Pliny, *HN* v. 77; Ptol. v. xv. 4), and was supposed by Michaelis to retain a trace of the name given in Genesis (so also Schrader, *KAT* 105; Dillm. *Gen. ad loc.*, *et al.*).

D. S. MARGOLIOUTH.

ZEMIRAH (זִמְרָה).—A son of Becher, 1 Ch 7⁸ (B' Ζαμαρίας, A Ζαμαρίας, Luc. Ζαμαριά).

ZENAN.—See ZAAANAN.

ZENAS (Ζηνάς).—In Tit 3¹ St. Paul exhorts Titus to bring or, more probably, send forward (πρόπεμψον) on their journey Zenas and Apollos with great care (σπουδαίως), that nothing may be wanting to them, and describes Zenas as τὸν νομικόν, i.e. 'the lawyer.' This may mean a lawyer in the secular sense, but more probably one skilled in the Jewish law (cf. Lk 7³⁰ 11⁴⁵ 14³). Just above, the same word is used about disputes concerning the Law (Tit 3⁹ 'But avoid . . . strivings about the law, μάχας νομικάς').

A. C. HEADLAM.

ZEPHANIAH.—1. The prophet. See ZEPHANIAH, BOOK OF, where also the name is discussed. 2. A Kohathite, mentioned among the ancestors of Heman the singer (1 Ch 6³⁰). 3. Son of Maaseiah the priest in Jerusalem in the time of Zedekiah the king and Jeremiah the prophet. He belonged to the court party opposed to making any terms with Babylon, and inclined to trust to the help of Egypt. Though thus opposed to the policy of Jeremiah, he showed a good disposition towards the prophet by letting him see the letter which he had received from Shemaiah in which Zeph. was urged to stop every mad prophet, and was called in question for not having rebuked Jeremiah for prophesying that the Babylonian captivity would continue (Jer 29²⁵⁻²⁸). He was sent by Zedekiah to Jeremiah to ask of the Lord through His prophet deliverance from Nebuchadnezzar, and carried back God's message to the king. He was then sent again to inquire as to the proposed league with Egypt (Jer 21¹ 37²). As next in rank to Seraiah, grandson of Hilkiah (1 Ch 6¹⁴), Zeph. is called *second priest*, ἡγχα(ν) כֹּהֵן (2 K 25¹⁸). On the occasion of the final overthrow of Jerusalem by Nebuzaradan, in B.C. 587, Zeph. was taken, along with Seraiah and others, down to the king of Babylon at Riblah, and was there put to death. 4. The father of one Josiah, into whose house in

Jerusalem the messengers from the Jews remaining in Babylon went (*Zec* 6¹⁰⁻¹⁴). As this occurred some sixty-seven years after the death of the son of Maaseiah, there is not much probability in the suggestion that he may be identical with the father of Josiah. It is not, however, by any means impossible. J. MACPHERSON.

ZEPHANIAH, APOCALYPSE OF.—A Jewish apocryphon, probably similar in contents to the *Ascension of Isaiah*. It is named in each of the two lists of OT apocrypha that have come down to us, viz. the *Stichometry of Nicephorus*, and an anonymous list found in *Codex Bezae Cantabrigiae*, and three other codices (*Schürer, HJP* II. iii. 125 ff.). The only extract known is given by Clemens Alex. in his *Stromata*, v. xi. 77, where, after quoting from Moses, Euripides, and Plato to the effect that true worship does not require material temples, he says: 'Are not these (sayings) like those of Zephaniah the prophet? "And the spirit of the Lord took me and brought me up into the fifth heaven and showed me angels called lords . . . dwelling in temples of salvation and singing praise to God, ineffable, most high." The occupants of the fifth heaven are named also in *Ascension of Isaiah*, 4³²; *Slav. Enoch*, 18¹; *Testaments*, *Levi*, iii. 3; *Chagigah*, 12b.

Fragments of a Christianized Coptic recension of the *Apocalypse of Zephaniah* were discovered at Akhmim and published by S. Bouriant in *Mém. de la mission archéol. au Caire*, 1885. A Germ. translation by Stern appeared in the *Ztschr. f. ägypt. Sprache*, etc., 1886, p. 115 ff.; and the same fragments, with additions, and along with a fairly complete Coptic recension of the *Apocalypse of Elias*, have been edited by Steindorff in *TU*. The question of how much belongs to the *Apocalypse of Zephaniah* and how much ought to be assigned to an unidentified Apocryphal, is not yet settled (cf. James in *Encyc. Bibl.* i. 256).

Literature.

i. **THE WRITER.**—The title of the book reads: 'The word of the LORD, which came unto Zephaniah, the son of Cushi, the son of Gedaliah, the son of Amariah, the son of Hezekiah, in the days of Josiah, the son of Amon, king of Judah.' The name *Zephaniah* (זפניה, LXX Σοφορίας; cf. the name זפניהל in No. 107 of the Phen. inscriptions in *CIS*) means 'he whom J' has hidden or protected,' and is borne in the OT by three men (see art. ZEPHANIAH) besides the author of the prophecy before us. It has plausibly been inferred that the Hezekiah named in the title is the Judean monarch of that name (so Hitzig, followed by most moderns). This would account for the genealogy of Zephaniah being carried back four generations, whereas the usual practice in the case of the prophets is to name only their father (cf. Is 1¹ 'Isaiah the son of Amoz,' Jer 1¹ 'Jeremiah the son of Hilkiah,' Ezk 1³ 'Ezekiel the son of Buzi,' Jl 1¹ 'Joel the son of Pethuel'). No argument against this conclusion can be drawn from the absence of the title 'king of Judah' after Hezekiah's name. This title could have been inserted only somewhat awkwardly, seeing that it had to be appended also to Josiah's name, and may have been felt to be unnecessary in

the case of so well-known a name as that of Hezekiah. Zephaniah's great-grandfather, Amariah, will thus have been a younger brother of king Manasseh, and no difficulty in the way of Zephaniah's being a contemporary of Josiah is occasioned by the circumstance that the succession Hezekiah—Manasseh—Amon—Josiah appears to contain a generation fewer than Hezekiah—Amariah—Gedaliah—Cushi—Zephaniah. For we learn from 2 K 21¹⁻¹⁹ that Manasseh was 45 years old when his son Amon was born, a date at which his brother Amariah might easily have had a grandson (Cushi). Zephaniah may thus have been as old as, or even older than, Josiah. If the prophet belonged to the royal family, all the greater interest attaches to his strictures upon 'the princes and the king's sons' (1⁸⁻⁹). He was, clearly enough, a dweller in Jerusalem (note his familiarity with the various localities of the city, the Fish Gate, the Second Quarter, the MAKTESH [1¹⁰⁻¹¹], and esp. the words in 1⁴ 'I will cut off the remnant of Baal from this place').

ii. **CONTENTS OF THE BOOK.**—The prophecy falls into two unequal divisions, the first and larger of these being occupied with threatenings, the second with promises.

A. The Threatening, 1²⁻³⁷.

A destructive judgment, universal in its scope, is proclaimed in terms which recall those that heralded the approach of the Deluge (*Gn* 6¹; cf. also *Hos* 4² and *Ezk* 38¹⁹); man and beast, the fowls of the heaven and the fishes of the sea, the stumbling-blocks with the wicked, are to be cut off (12²).

The word זכור in v. 3 is doubtful. In its only other occurrence (in the sing. זכור Is 38) it means 'overthrown name,' 'ruin,' which of course does not suit here; and even the rendering 'stumbling-blocks' (i.e. idols; cf. the use of the cognate זכור in *Ezk* 14²⁻⁷) is hardly appropriate to the context. Schwally would emend זכור [G. A. Smith prefers *Hiph.* זכור] 'and I will cause (the wicked) to stumble' (cf. v. 17 'they shall walk like blind men'). LXX reads καὶ ἀβυσσῶν αἱ ἀβύσσους (= זכור זכור). Wellh. and Now. (cf. Davidson) regard the words זכור זכור זכור as an interpolation of a late glossator, who missed a definite allusion to the sweeping away of idols in the general destruction.

In particular this judgment will overtake idolaters and syncretists in Judah and Jerusalem (vv. 4-6). The 'day of the Lord' (on this conception see the references in art. QADIAH, vol. iii. p. 578^a) is at hand; He has prepared a sacrificial feast (cf. Is 13³ 34⁶, Jer 40¹⁰, Ezk 39¹⁷), where the victims are the people of Judah, and to this the instruments of His vengeance (prob. the Scythian hordes; see below under 'Date') as 'sanctified' guests (cf. 1 S 16²⁰⁻²⁶) are invited (v. 7). From the royal house downwards all classes are guilty, and shall share in the terrors of that day (vv. 8-11).

Nowack's transposition of v. 8^a and v. 8^b ('I will punish the princes and the king's sons, who fill their master's house with violence and deceit; and I will punish all who leap over the threshold, and all who clothe themselves with foreign apparel') is perhaps somewhat arbitrary, but it is attractive. As the clauses stand, the 'leaping over the threshold' is connected in such a way with the 'filling of their master's house with violence and deceit,' as to amount to a charging of the royal princes with house-breaking. Perhaps the prophet means to bring such a charge against them (Davidson, *et al.*); but, on the other hand, there is much to be said in favour of the supposition that what he has in view is their imitation of a foreign (Philistine [see art. CHRETHITES, vol. i. p. 377^a]) custom of leaping over the threshold in entering a house. Upon Nowack's arrangement of the clauses, this habit and the aping of foreign manners in dress fall into line with one another.

In that day Jahweh will search Jerusalem with lanterns (cf. for the figure *Lk* 15⁸), and hunt from their hiding-places (cf. *Am* 9⁹) the men who are now sunk in religious indifferentism and who say, 'The Lord will not do good, neither will he do evil' (v. 12; cf. *Ps* 10⁴ 14¹ etc., and, for the proverbial

expression, Is 41²⁵, Jer 10⁵). The utter ruin and the war alarms of that day are further described in vv. 14-18.

Then in 21-3 the prophet turns to his countrymen with an appeal yet to seek the LORD, if perchance they may be hid in the day of His fierce anger, when the Philistines (vv. 4-7), Moab and Ammon (vv. 8-11), Cush (v. 12), and Assyria (vv. 12-18) shall be overwhelmed.

There is no sufficient ground for Wellhausen's supposition that in 21 the situation and tone are somewhat different from those of ch. 1, a difference due to the choice of the coast road by the Scythian host, and a consequent anticipation on the part of the prophet that Judah might, after all, escape the storm.

Vv. 4-7 and 12-18 are in the *finch* measure (see LAMENTATIONS, vol. iii. p. 20^b, and POETRY, above, p. 5), although the rhythm is, now at least, in several instances imperfect.

In 31-7 Jerusalem is once more the subject of denunciation, as the rebellious, polluted, oppressing city, whose princes, judges, prophets, priests, are all alike unfaithful to their duty, and whose inhabitants have failed utterly to learn the lesson God meant to teach them by His judgments upon the nations. V. 8 appears to form the connecting link between the Threatening and—

B. *The Promise*, 3^a-20.

The faithful in Jerusalem are to wait till the judgment is accomplished, when all peoples shall be brought to serve the LORD with one consent (vv. 9-10). Israel's sinfulness and pride shall be no more, they shall trust in the name of the LORD and shall dwell safely (vv. 11-13). The book closes with a triumphant call to the people to rejoice in the LORD who dwells in their midst, and who gives to them a high and honourable place amongst the nations (vv. 14-20).

The general sense of these closing verses is clear, but there is some uncertainty as to details, as the text is in several places more or less corrupt (see below, § 1v.).

iii. DATE AND UNITY.—1. The title of the book assigns the prophecy, as we have seen, to the days of king Josiah. So far as ch. 1 is concerned, the correctness of this date is almost universally admitted, even by those who do not regard the title as an original part of the book.

The only important exception is Ed. König (*Einleit. in d. AT* 352 f.), who would assign the prophecy to the period of reaction that followed the death of Josiah (B.C. 608). But, while much in the book would suit such a date, there is one circumstance which appears sufficient to condemn König's view, namely the absence of any censure upon the king in 18. This is suitable in the case of Josiah but not of Jehoiakim (see G. A. Smith, *Twelve Prophets*, ii. 39 f.).

But the reign of Josiah (B.C. 639-608) is crossed by an important dividing line in the year 621, the date of the reformation on the basis of the Deuteronomie law-book. On which side of this line does our prophecy naturally range itself? We have no hesitation in reaching the conclusion that the description of the idolatrous practices in 14-6 and of the whole religious, moral, and social condition of things in 18-20 (not to speak of 31 etc.), points to a period prior to the year 621. This opinion, which is the prevailing one among scholars (of moderns it may suffice to name A. B. Davidson, Driver, G. A. Smith, Wellhausen, Nowack, Cornill, Budde, Strack), is opposed for various reasons by Delitzsch (in *PRE* 2), Kleinert (in Lange's *Bibelwerk*), and Schulz (*Com.* 1892), who would date the prophecy subsequent to the reforms of B.C. 621.

The argument for a late date, which is drawn from supposed echoes of Deuteronomy (e.g. Zeph 12. 13. 17 compared with Dt 28^{20, 30}), need not detain us, for it is weak in the extreme. Nor can any great weight be laid upon the expression 'the remnant of Baal' in 14, as if this were an allusion to the survival of Baal-worship after the drastic measures adopted against it by Josiah in 621. For (a) it is possible that the original text was

'the names [מִשְׁמֵה instead of מִשְׁמֵה; LXX τὰ ὀνόματα] of Baal'; cf. Hos 21⁷ 'I will take away the names of the Baalim out of her mouth,' and Zec 13² 'I will cut off the names of the idols out of the land.' Or (b) מִשְׁמֵה may be taken in the sense of 'the rest' = 'every vestige,' so that the meaning will be 'I will wholly root out Baal-worship,' 'I will cut it off till not a trace of it is left' (cf. Is 14²² 'I will cut off from Babylon name and remnant'); so A. B. Davidson, Wellhausen, Nowack. Probably the same sense should be attributed to the קִרְיָה of Am 1⁸ and the קִרְיָה of Am 4¹² 9¹. Or (c), even if the expression be taken in its narrowest sense, the 'remnant of Baal' may refer to the Baal-worship which survived the reforms which, if we can trust the Chronicler (2 Ch 34²⁴), Josiah had undertaken six years previously. Besides, as A. B. Davidson points out, *Baal* may stand here for any kind of false worship, even that which is nominally offered to Jahweh. On the CHEMARIM see article under that title.

A difficulty in the way of assigning the prophecy to the earlier part of Josiah's reign has been felt owing to the mention of 'the king's sons' in 18, seeing that it is impossible that Josiah, who could not have been much over 21 years of age at the time (cf. 2 K 21¹⁻³), could have had sons capable of perpetrating the outrages attributed to them in v. 2. But here again (a) it is not unlikely that the LXX ὁ οἶκος τοῦ βασιλέως [i.e. מִשְׁמֵה instead of מִשְׁמֵה] has preserved the original reading—'the king's house.' Or (b) 'the king's sons' may mean simply members of the royal family (who had a king, but not necessarily the reigning king, among their ancestors); cf. 1 K 22²⁰, 2 K 11², Jer 36³⁶ [see Hitzig-Graf] 38⁴. Owing to the youth of the king, his relatives at court would have all the freer scope for their malpractices.

The early date for which we are contending is further supported by the prophet's allusions to an approaching foe, whom he does not name, but who is with much probability identified by most moderns with the Scythians, whose incursions are referred to by Herodotus (i. 102 ff.), and who probably passed along the Philistine seaboard, c. 626 B.C. [This explanation is in every way preferable to that of Schwally, who supposes the foe to be Egypt (see A. B. Davidson, p. 98, for a conclusive refutation of Schwally)]. These Scythian hordes appear also to have been the subject of Jer 4⁶⁻⁷ in its original form, and to have suggested the imagery of Ezk 38¹⁶. In the year 626 Josiah would be 21 years of age, and Zephaniah possibly a little older. The latter and Jeremiah probably began their prophetic activity in one and the same year (626).

The present position of the book, both in MT and LXX, between Habakkuk and Haggai proves nothing, for the arrangement of the Twelve is in other instances (e.g. JOEL and OBADIAH) demonstrably unchronological. The proper place of our book is between Nahum and Habakkuk.

2. While ch. 1, with the possible exception of a few expressions which may have found their way from the margin into the text, is universally attributed to Zephaniah, and dated by the great majority of scholars within the first half of Josiah's reign, there are considerable differences of opinion as to the unity and the date of the rest of the book.

Kuenen (§ 78. 5-8) accepted the genuineness of all but 314-20, which, on account, chiefly, of differences both in tone and situation from the rest of the prophecy, he was inclined to make post-exilic (c. 536 B.C.). He defended 21-31 against Stade (*GVF* i. 644 n. 3), who denied to Zephaniah also the whole of ch. 3.—Wellhausen (followed pretty closely by Nowack) is suspicious of 22-3, he rejects vv. 8-11, and treats ch. 3 as a later supplement, added in two stages, vv. 1-7 and vv. 8-20, upon the analogy of Mic 1-6 and vv. 7-20.—Budde (followed by Cornill, *Einleit.* 2 § 35. 3) [contrast his more conservative position in 2 § 31. 3]) would admit 21-3 31-37. 8-6 [in this order] 11-15 as in harmony with Zephaniah's situation and a suitable sequel to ch. 1; he

rejects the whole of 24-15 mainly because Israel appears in these verses as the victim instead of as the perpetrator of wrong (the conception in ch. 1); 30-10 are excluded as breaking the connexion between v. 8 and v. 11, while vv. 14-20 are declared to be a later lyrical epilogue to vv. 11-13. —Schwally allows to Zephaniah nothing outside ch. 1 except 213-15 and possibly 21-4, holding 28-12 to be exilic and ch. 3 post-exilic. He concedes, however, that 31-7 'may be' Zephaniah's. —G. A. Smith accepts the whole of ch. 2 except vv. 8-10 (the oracle against Moab and Ammon, which is suspicious for reasons noted below) and v. 11 which breaks the connexion between v. 7 and v. 12. In 31-13 he considers vv. 8-10 to be 'obviously an intrusion,' while v. 8 should possibly precede v. 6, as Budde proposes. He has no doubt about attributing vv. 14-20 to the end of the Exile or the period after the Return. —Driver remarks that 211 seems to be out of place, and that 314-20 is somewhat doubtful, although even here, the picture being of course an imaginative one, 'the question remains whether it is sufficiently clear that it was beyond the power of Zephaniah's imagination to construct it' (LOT⁶ 342f., where the author adds a reference to his discussion on Mic 77-20). —Davidson considers it quite possible that 24-15 has in various places been expanded, but defends the genuineness of ch. 2 as a whole. He allows that 310 should possibly be omitted, but otherwise vv. 1-13 appear to him to be genuine, although they might suggest that the passage was later than ch. 1. Towards vv. 14-20 he holds the same attitude as Kuenen, recognizing in them quite a different situation from that of the rest of the book. —König would apparently accept the whole book as genuine, with the exception of that part of the title which refers the prophecy to the days of Josiah.

As to ch. 2, there will be little question that Schwally, in arguing against the genuineness of vv. 1-3, built too much upon the occurrence of *uy* and *my* in v. 3 (cf. the criticisms of Bacher, Budde, and Davidson). Yet there is force in the remark of Nowack, that while the *word* *uy* occurs in the older literature (Nu 12³ [E], Am 8⁴, Is 11⁴), the *notion* has not yet assumed there that ethico-religious stamp which it bears in Zeph 2³, and for which we must look for parallels to the later Psalms. No doubt, as an argument this is 'rather precarious' (Davidson, p. 101); but an instinctive feeling may be stronger than logic, and we confess that, like Wellh. and Nowack, we 'cannot repress a doubt' of the genuineness at least of v. 3, which with its 'Seek ye the LORD, ye meek of the earth,' 'seek righteousness, seek meekness,' has a decidedly late ring to our ears.

The objections taken to 24-15 in general are singularly pointless (see Davidson or G. A. Smith), but vv. 8-11 can hardly be defended. The oracle against Moab and Ammon (vv. 8-10) denounces these peoples for an attitude towards Judah which seems out of place in Josiah's reign; their territories were not on the line of the Scythian invasion of Egypt *via* Philistia [but see, as bearing on this argument, Davidson, p. 99]; and, further, the verses are not, like those that precede and that follow, in the *kinah* measure. This last circumstance tells very strongly against their originality. Then v. 11, if it belongs to Zephaniah at all, is certainly out of place. The omission of these four verses gives a good connexion between v. 7 and v. 12.

It may be held with some confidence that 314-20 emanates from the period of the Return. Its entire difference of tone from ch. 1 and from the opening verses of ch. 3 is unmistakable. The language reminds us of Deutero-Isaiah, and the eschatology of Ezekiel. Like Am 9¹¹⁻¹⁵ and Mic 77-20, the verses were probably introduced into their present place to relieve a sombre background, this having been only imperfectly accomplished in the instance before us by vv. 11-13. In all probability vv. 9-10, which interrupt the connexion and spoil the antithesis between v. 8 and v. 11, should also be assigned to the same or a similarly late hand. There does not appear to be any adequate ground of suspicion against the rest of ch. 3, making due allowance, of course, for textual corruptions (see next section).

iv. LITERARY CHARACTERISTICS, CONDITION OF TEXT, etc.—The style of Zephaniah is, upon the whole, clear and forcible; several of his figures

are striking (e.g. 1¹² 'I will search Jerusalem with lanterns,' * *ib.* 'the men that are thickened upon their lees,' v. 17 'they shall walk like blind men'). Powerful and awe-inspiring is his description of the day of the Lord in 1¹⁵⁻¹⁸, whose opening words in the Vulg. *Dies ira, dies illa*, commence also the well-known hymn of Thomas of Celano. We have a passage of exquisite beauty in 3¹¹⁻¹². It is true, as Davidson points out, that, as compared with Nahum's description of the destruction of Nineveh, Zephaniah's prophecy of the same event is somewhat general and lacks the power of the other prophet's impassioned oratory; but this difference may be due partly to the fact that the picture in the one case is painted from the imagination, and in the other is the work of one who had beheld the kind of scenes he depicts. To a considerable extent Zephaniah borrows from his predecessors, esp. from Isaiah and Amos (cf. 12-3 with Hos 4²; the description of the day of the Lord with Is 2¹⁹⁻²¹, Am 2¹⁴ 5²⁰; 1¹⁵ with Am 5¹¹; 1¹⁸ with Is 10²² 28²²; 24-15 with Am 12-23).

There are traces in Zephaniah of the phenomena that characterize late Hebrew. It is partly, indeed, on account of some of these marks that Wellh. doubts the genuineness of 3¹⁻⁷ (note נגאלה and ינה in v. 1, מלח in sense of *fields* in v. 6, פקד in sense of *command* in v. 7). For further instances see G. A. Smith, ii. 37 n. 1, who also gives on the preceding page a list of rare grammatical forms and phrases found in this book. Of *hapax legomena* may be noted נגיל in 1¹¹, נח and נחל (?) in 2⁴, סכס and סכר in 2⁹, ארוה (?) in 2¹⁴, נקא (= נקד) in 3¹, נקס (Qal) in 3⁸, בננוח (if correct; see Ges.-Kautzsch, § 124e) in 3⁴, נורו in 3⁸, נקח (different from Ezk 8¹¹) and פני (?) in 3¹⁰. See also 2¹⁸, v. ^b RV (Aram.).

The text of Zephaniah is, unfortunately, in several places in rather a corrupt condition, and contains some suspicious words: in some cases, however, it can be corrected with the help of the LXX, and in others Wellh. and others have made plausible emendations (e.g. in 1¹⁵⁻¹⁸ 2¹. 2. 6. 7. 14 3¹ 5), though naturally uncertainties still remain. For particulars we must refer to G. A. Smith, *Twelve Prophets* (ii. 35-37, 56-74), or, more fully, to Nowack's Commentary.

v. RELIGIOUS VALUE.—The abiding value of the Book of Zephaniah rests mainly upon three foundations: (a) the profoundly earnest moral tone of the prophet, with his deep sense of the sin of injustice and oppression, and inflexible demand for purity of heart and conduct; (b) his doctrine of the disciplinary value of suffering. God's judgments are meant to humble and chasten Israel, and when she has learned this lesson she trusts in God alone (3⁷⁻¹¹⁻¹²). In vv. 9-10, a later addition to the book, the same principle is applied to the heathen. Their lips are purified (נקה here in the same sense as in 1 S 10⁹) by suffering, so that they become fit to call upon the name of the LORD. (c) The wide outlook of the prophet's philosophy of history, his doctrine of Divine Providence. The apparently irresponsible Scythians come upon the scene at the moment God needs their presence; the various nations are overtaken by the Divine judgment, in order that God's purpose may be accomplished of blessing not only the Jewish people but the whole world.

A universalism akin to that expressed in Jn 4²¹ etc. has sometimes been attributed to Zephaniah upon the ground of 2¹¹ ('men shall worship him, every one from his place') 3⁹⁻¹⁰; but in the first-named passage the words we have italicised are of uncertain meaning (but see Davidson), and all three passages lie under strong suspicion of belonging to a later age than that of Zephaniah.

It may be added that the Book of Zephaniah is

* This verse gave rise to the mediæval pictures of St. Zephaniah carrying a lantern in his left hand.

one of those from which the figure of the Messianic king is entirely absent. The standpoint of the prophet was indeed such as almost necessarily to preclude the appearance of any such conception.

LITERATURE.—Driver, *LOT*² (1897), pp. 340-343; Wildeboer, *Litt. d. A.T.* (1896) pp. 189-193; the *Eindeutungen* of Cornill³ (§ 35. 3), Ed. König (1893), pp. 352-354; Strack⁵ (1898), p. 100 f.; Baudissin (1901), pp. 550-555.

'Zephaniah' in *Encyc. Brit.*⁹; Buhl on Zeph 21.14 317f. in *ZATW* (1885), p. 183 ff.; Schwally, 'Das Buch Zephaniah', *ib.* (1890) p. 165 ff.; Bacher on Zeph 23. 24. (1891) pp. 185 f., 200 ff.; Budde, *SK* (1893), p. 303 ff.; Bachmann, 'Zur Textkritik des Propheten Zephaniah', *ib.* (1894), p. 641 ff. J. A. SELBIE.

ZEPHATH (זפח; B and Luc. Ζεφέρ, Α Ζεφέρ).—See **HORMAH**, and add to the literature there Dillm. on Nu 14⁴⁰ and Moore on Jg 1¹⁷.

ZEPHATHAH.—According to MT of 2 Ch 14¹⁰ (9) Asa joined battle with ZERAH the Cushite in the valley of Zephathah (זפחא) at Mareshah. No such place is known to us elsewhere in OT, and it is not unlikely that the LXX κατὰ βορρᾶν [i.e. κατὰ βορρᾶν instead of κατὰ βορρᾶν] Μαρεσῶν, 'to the north of Mareshah,' has preserved the original reading.

ZEPHI, ZEPHO.—A son of Eliphaz, and one of the 'dukes' of Edom, Gn 36¹¹, 15 (זפח Zepho, LXX Ζωφάρ) = 1 Ch 1³⁶ (זפח Zephi, BA Ζωφάρ, Luc. Σεφουφ). It is impossible to decide between the claims of the two forms of the name, nor can its ethnological signification be determined.

ZEPHON, ZEPHONITE.—See **ZAPHON**.

ZER (זר).—A 'fenced' city of Naphtali, Jos 19³⁸. It follows **Ziddim** (properly *Hazziddim* [with art.]). The LXX tr. v.³⁰ καὶ αὐτὸς τεύχῃσιν τῶν Τυφίων [i.e. Τύρος], Τύρος [i.e. זר], αὐτὸς, but it is difficult to suppose that this can be correct. *Hazziddim* may be the modern *Haṭṭin*, near *Karn Haṭṭin*, N.W. of Tiberias (so Talm.; see Neubauer, p. 207). The identity of Zer is quite uncertain. Conjectures as to the site are noted in Dillm. *Jos. ad loc.*

ZERAH (זרח; LXX Ζάρα, Ζάρε; Mt 1³ Ζαρά).—1. One of the sons of Reuel, the son of Esau by his Canaanitish, or Ishmaelite, wife, Basemath (Gn 36¹², 17, 1 Ch 1³⁷). The name appears again as that of the father of Jobab, one of the early kings of Edom (Gn 36³³, 1 Ch 1⁴⁴). 2. The younger born of the twin sons of Judah by Tamar his daughter-in-law. The peculiar circumstances of his birth are made to account for his name (Gn 38³⁰ [JJ]). He gives his name to the **Zerahites** (Nu 26³⁴). Of this family was Achan the son of Zabdi (*Zaḥḥai*, LXX Jos 7¹; Zimri, 1 Ch 2⁶), who took of the spoil of Ai contrary to the Divine command. Zerah's sons are mentioned 1 Ch 9⁶, and Pethahiah (Neh 11²⁴) is one of his descendants. He finds a place along with PEREZ his twin brother in the genealogy of our Lord (Mt 1³). 3. A son of Simeon, and the founder of a family of **Zerahites** within that tribe (Nu 26¹³, 1 Ch 4²⁴); called also **Zohar** (Gn 46¹⁰, Ex 6¹⁵). 4. A Levite name, borne by a Gershonite (1 Ch 6²¹) and by a Kohathite (1 Ch 6⁴¹). 5. The name of the Cushite (2 Ch 14⁹⁻¹⁵) who invaded Judah in the reign of Asa (c. 911-871 B.C.),

VOL. IV.—63

and suffered a disastrous defeat at Mareshah in the south-west of the land.

The invasion of Judah by Zerah the Cushite is unknown to secular history, and rests solely upon the authority of the Chronicler. This circumstance, together with the fact that the name of Zerah the Cushite does not appear in any list of the kings of Egypt, has led Wellhausen (*History of Israel*, p. 207), Stade, and others to pronounce the narrative unhistorical. It is, they say, an invention conceived for the purpose of making the historical overthrow of Rehoboam into a triumph on the part of his descendant: it had its origin at the time when Cushites ruled in Egypt, and transferred a condition of affairs which was true of a later time to the days of Asa. But this is an excess of historical scepticism. There is nothing in the inscriptions inconsistent with the narrative of the Chronicler.* There is so little known, says Wiedemann (*Geschichte von Alt. Ägypten*, p. 155), from the time of Osorkon I. that it cannot be considered beyond the bounds of probability for an Ethiopian invader to have made himself master of the Nile Valley for a time in his reign, and for him and not Osorkon I. to be the Zerah of the Chronicler.† Zerah was identified by Champollion (*Précis du Système hiéroglyphique*², pp. 257-262) with Osorkon I., the second king of the 22nd dynasty; and the identification has been accepted by Ewald and others. The discovery of M. Naville in the ruins of Bubastis (*Bubastis*, pp. 50, 51 f.; Sayce, *IICM* p. 363) goes rather to connect the invasion with Osorkon II., who is made to declare on a monument that 'the Upper and Lower Rutennu have been thrown under his feet.' This would show that Osorkon II. had been engaged in a campaign in Palestine, which is designated Upper Rutennu in the geographical language of Egypt. Hommel (*AHT* p. 315 n.; cf. Hall, *Light from the East*, p. 32) thinks that Zerah and his Cushites were from South Arabia, a view which is favoured by the character of the spoils,—tents, sheep, and camels,—as well as by the very name Zerah, which resembles Zirkh or Dhirih, a royal name in the newly-found Sabæan inscriptions. This view is favoured, too, by the designation of the people as 'Amalekites' in the LXX (2 Ch 14¹⁵), which may be compared with the *banu Ma'in*, the Ma'in of the same inscription.†

LITERATURE.—In addition to references given above see Sayce, *Egypt of the Hebrews*, p. 111; Maspero, *Struggle of the Nations*, p. 714; McCurdy, *HPM* i. 259; Herzog, *PRE*² xvii. 478.

T. NICOL.

ZERAHIAH (זרחיה; 'J' hath arisen or shined, cf. Sab. זרחיה).—1. A priest, an ancestor of Ezra, 1 Ch 6¹⁵, 61 [Heb. 5³³ 6³⁶], Ezr 7⁴ (B in all Zapad; A Zapalas, Zaplas, Zapad). 2. The father of Eliehoenai, Ezr 8⁴ (B Zapad, A Zapad).

ZERED (זרע).—The torrent-valley (*nahal*) of Zered is named in the itinerary of Israel's journeyings, Nu 21¹² (B Zāper, A Zāpe, Luc. Zāpeθ), immediately prior to their crossing of the Arnon, and in Dt 2¹³ as the point that marked the close of the 38 years' wanderings. It is probably either the *Sail Sa'idah* (Knobel), the principal confluent of the Arnon from the S.E. (Burckhardt *Syrien*, 633), or the *Wādī Kerak* (Ges., Hitz., Keil, Dillm., G. A. Smith, Buhl). The objection to the *Wādī el-Ahsā* (Wetzstein in Del. *Genesis*⁴, 567 f.; Tristram, *Land of Moab*, 49 f.) is that this *wādī* must have formed the S. boundary of Moab on the side of Edom, whereas Iye-abarim, the station before the crossing of the Zered, is shown by Nu 21¹¹ to have been in the wilderness to the E. of Moab (see Driver, *Deut.* 38).

ZEREDAH, ZERERAH.—See **ZARETHAN**.

ZERESH (זרש; B Ζωραδ, A Ζωραδ).—The wife of HAMAN, Est 5¹⁰, 14 6¹³. Jensen (see Wildeboer, 'Esther' in *Kurzer Hdkom.* p. 173) compares the Elamite goddess *Kirisa* or *Girisa* (suggesting to read זרש). The explanations of the name from the Persian are doubtful.

ZERETH (זרע).—A Judahite, 1 Ch 4⁷ (B Ἀρεθ, A Zāpeθ, Luc. Zāpeθ).

ZERETH-SHAHAR (זרע שחר).—A Reubenite town, Jos 13¹⁹ (B Ζεραδὰ καὶ Σελω, A Zāpeθ καὶ Σωρ). Its site has not been identified, although in

* Of course his numbers (680,000 men in Asa's army, 1,000,000 in Zerah's) are, as frequently happens, incredibly large.

† See, however, the criticism of this hypothesis of Hommel's in Ed. König's *Fünf neue arab. Landschaftsnamen*, 1902, pp. 53-57.

the vicinity of *Mkaur* (Machærus) the hot springs *es-Sara* and the volcanic mountain *Hammât es-Sara* may contain reminiscences of the ancient name (Buhl, *GAP* 268).

ZERI.—See **IZRI**.

ZEROR (זֶרֶר).—An ancestor of Saul, 1 S 9¹ (BA 'Αρῆδ, Luc. Σαπδ).

ZERUAH (זֶרְיָה).—The mother of Jeroboam, 1 K 11²⁶ (B and Luc. om., A Σαροῦδ) 12^{24b} (BA Σαρεῖδ, B* 'Αρεῖδ). In the latter passage, which is an addition of the LXX, it is further stated that she was a harlot (πόρνη).

ZERUBBABEL (זְרֻבָּבֶל; LXX and NT Ζοροβάβελ, Zorobabel).—

The etymology and the meaning of the name are doubtful. It is often taken as = Heb. זְרָרָה 'begotten of' (i.e. in) Babylon'; but proper names with a passive participle as one element are scarcely, if at all, found in Hebrew, though frequent enough in Assyrian (Gray, *HPN* 201, n. 1; Driver, *Text of Sam.* 14; Nestle, *Marginalien*, 7 f.). The same objection applies to the explanation זְרָרָה 'dispersed of Babylon'; while philology and the fitness of things are both opposed to van Hoonacker's (*Zorobabel*, 44 f.) explanation זְרָרָה 'crush Babylon.' Upon the whole, we should perhaps accept the view of Ed. Meyer (*Entstehung des Judenthums*, p. v) who makes it a Bab.-Assyr. name and punctuates *Zēru-Babel* = 'seed or offspring of Babylon.' The name is said to occur in Bab. documents as *Zēr Babilū* (Strassmaier, *Inscr. von Nabonid.* 113, l. 13, *Inscr. von Darius*, 128, l. 2, 297, l. 2).

Zerubbabel played an important part in connexion with the return of the Jews from exile. Of Davidic descent, he is generally called the son of *Shealtiel* or *Salathiel* (Ezr 3², Hag 1¹, Mt 1¹² etc.), who was one of the sons of Jehoiachin, the captive king of Judah (1 Ch 3¹⁷). In one passage, 1 Ch 3¹⁸, the MT (perhaps by a textual error; the LXX has Σαλαθιήλ) makes him the son of *Pedaiah*, who was Shealtiel's brother. He probably came to Jerusalem along with the first band of exiles, under the leadership of *Sheshbazzar*, who is not to be identified with him, and who may have been his uncle, the *Shenazzar* of 1 Ch 3¹⁸. See article *SHESHBAZZAR*, p. 493.

In direct opposition to Ezr 3⁷ and 4³ (the latter of which has, without any warrant, been set down as an interpolation)* it is contended by de Saucy and others that Zerub. came to Jerusalem not under Cyrus, but in the second year of Darius Hystaspis; and appeal is made, in support of this opinion, to 1 Es 3-5⁶ and Jos. *Ant.* xi. iii. These last two authorities are indeed but one, for the Jewish historian simply follows, with modifications of his own, the narrative of 1 Esdras. As to 1 Esdras itself, it is possible that it has sometimes preserved a true reading where this has been lost by the MT (see Esdras, vol. i. p. 759b), and hence where the narrative is parallel with the Heb. Ezra we may occasionally get help from it, but it is more than questionable whether we ought to attach weight to its testimony as to facts where it contradicts the canonical book. As a specimen of the hopeless confusion that reigns in 1 Esdras, we may adduce the position occupied by 215-25 (= Ezr 4⁹⁻²³), which is more out of place than even in the Heb. edition, while the independent narrative in 3-5⁶ introduces Darius Hystaspis as if he for the first time gave the exiles permission to return, although this has already in 21⁸ been traced to Cyrus. This section (3-5⁶) is not translated from the Hebrew, but is either a free composition of the author or borrowed by him from a Greek source. Its hero Zerub. is introduced as one of the bodyguard of Darius Hystaspis, who as a recompense for the skill with which he had conducted an argument (about the relative power of Wine, the King, Woman, and Truth) received permission from the king to return to Jerusalem and to build the temple. The details of this story are no doubt apocryphal, but it is possible that a substratum of truth underlies it. — Zerub. may have headed an embassy to Darius to invoke his aid against the Samaritans and other opponents of the Jews (cf. Jos. *Ant.* xi. iv. 9).

According to Ezr 3-4⁸ (narrative of the Chronicler), Zerubbabel, along with Jeshua the high priest

and others, soon after their arrival in Jerusalem (in the seventh month) set up an altar for burnt-offerings, kept the Feast of Tabernacles, and took steps for the rebuilding of the temple, whose foundations were laid in the second month of the second year of their arrival, amidst ceremonies which the Chronicler describes in his characteristic fashion (31-13). Owing, however, to the opposition of 'the adversaries of Judah and Benjamin,' this act was followed by seventeen years of inactivity, until, in the second year of Darius (B.C. 520), and largely owing to the stimulus supplied by the prophets Haggai and Zechariah, the work was resumed in earnest (Ezr 5¹). A new delay, occasioned by the suspicions of Tattenai, 'governor on this side the river,' and others, was ended by an appeal to Darius himself, who ordered that the work should be allowed to proceed (61¹⁰). The temple was finished and dedicated four years later (61¹⁶).

(a) There has been much discussion as to the date when the foundation of the temple was really laid. In Ezr 3¹² this is distinctly asserted to have been done by Zerub. and Jeshua in the second year after their arrival in Palestine (i.e. 537). On the other hand, it certainly appears from Ezr 5³, Hag 1¹⁴, 215-18, Zec 8⁹, that the foundation was not laid till seventeen years later (520). The discrepancy may be removed by the suggestion of Driver (*LOT* 547) that the ceremony of Ezr 3¹² was of so purely formal a character that Haggai could afford to ignore it. It is quite conceivable that the fulfilment of the project formed in 537 had to be postponed till 520, for, not to speak of the opposition of the Samaritans (Ezr 4¹⁰), the character of Cambyses (529-522), the successor of Cyrus, and notably his expedition to Egypt (527), would be unfavourable to the prosecution of the building. Others (see Literature below) prefer to suppose that the Chronicler, for obvious reasons, antedated the laying of the foundation by over fifteen years, while on the other hand he did substantial justice to the real course of events by representing the work of building as not seriously taken in hand till the second year of Darius.

(b) A more serious question is raised by Havet ('La modernité des prophètes' in *Revue des deux mondes*, 1889, p. 799 ff.), Imbert (*Le temple reconstruit par Zorobabel*, 1888), and Howorth (*Academy*, 1893), who contend that the Darius of Ezr 4⁵ is not Darius Hystaspis (522-485), as we have hitherto taken for granted, but Darius Nothus (424-404). The rebuilding of the temple is thus brought down a whole century (422 instead of 520). The strongest argument in support of this theory is the mention in Ezr 4⁷ of *Ahasuerus* (i.e. Xerxes) and *Artaxerxes* (Longimannus) in such a way as apparently to imply that Darius of 4⁵ is Nothus. But it has long been suspected (cf. Driver, *LOT* 547 f.; Cornill, *Einleit.* 288) that the section Ezr 4⁵⁻²³ is out of place and should follow ch. 6. It really refers to events that happened in the time of Nehemiah, and describes opposition to the rebuilding, not of the temple but of the city and walls. How the Chronicler came to insert this section where he did, is a question we will not undertake to answer; but that even he was capable of supposing that a century elapsed between 41, when Zerub. and Jeshua stand at the head of the community, and 51, when under their directions the building of the temple is pushed on, is inconceivable.

The only other reason for identifying Darius with Nothus is found in Ezr 6¹⁴ 'according to the decree of Cyrus and Darius and Artaxerxes king of Persia.' But it is abundantly evident from the context that *Artaxerxes* is here an interpolation due to *prolepsis* on the part of a scribe who had in his mind the services rendered to the Jews by that monarch in the time of Ezra and Nehemiah. The identity of the Darius of Ezr 4⁵ with Hystaspis is further evident from Zec 7-12, where the 70 years must date from either 597 or 586, and in either case 70 (a round number) will bring us to the reign of this king. Apart from any other consideration, is it credible that a whole century would have been suffered to elapse between the Return and the rebuilding of the temple, seeing that the latter institution had since Josiah's reforms assumed such importance? The Chronicler could not in his narrative allow seventeen years, not to speak of a century, to pass before steps were taken to restore the building, hence perhaps his statement that the foundations were laid shortly after the Return, and about the same time as the altar was re-erected. So clearly does Imbert perceive the force of these considerations, that he admits that shortly after the Return a temple was built by *Sheshbazzar*, which was afterwards destroyed, when or by whom we are not told, and then finally came Zerub., a contemporary of Darius Nothus, and restored it. Imbert most arbitrarily alters the text of Ezr 6¹⁴ so as to read 'Darius the son of Artaxerxes' instead of 'Darius and Artaxerxes.' The latter, as in Ezr 4, is held to be Longimannus, who, according to Imbert, is distinguished from Mnemon (under whom he places the activity of Ezra and Nehemiah) by having his name written זְרֻבָּבֶל, while the latter monarch appears

* Howorth (*Academy*, 1893, p. 174 f.) is wrong in asserting that the first four verses of Ezr 4 are not found in the parallel passage in 1 Esdras. Strangely enough, Sayce (*HCM* 543) falls into the same mistake. As a matter of fact, Ezr 41-4=1 Es 543-55.

* Van Hoonacker (*Zorobabel*, 63 ff., *Nouvelles Études*, 105 ff.) labours hard, but it seems to us unsuccessfully, to put a different interpretation on the language of Haggai and Zechariah.

as **שְׁשִׁבַּזָר**. (This is pure fancy; the interchange of **ז** and **ב** is so common as to be a very precarious foundation for an argument of any weight). Imbert is even able to tell us that the Book of Ezra originally contained an account of the building and the destruction of Sheshbazzar's temple, but that a later generation suppressed this, supplying its place by the list of names in Ezr 2, which was borrowed from Neh 7. It is needless to say that for all this there is not the slightest historical evidence.

The Darius, then, with whom Zerub. was contemporary, was beyond all reasonable doubt Darius Hystaspis.

How long Zerub. occupied a position subordinate to Sheshbazzar we do not know, but in the beginning of the reign of Darius he was **pehah** or governor of Judah (Hag 1¹⁴ etc.). His history subsequent to the building of the temple is involved in hopeless obscurity. He is not named even in connexion with the dedication (Ezr 6¹⁵). A Jewish tradition relates that he returned to Babylon and died there. It is possible that Darius, after the troubles that broke out during his reign, may have preferred to have a scion of the ancient dynasty of Israel under his eye rather than run the risk of his presence in Judaea stimulating projects for the restoration of the Davidic monarchy. Of the sons of Zerub. (1 Ch 3¹⁹) we know absolutely nothing. Zerub. is mentioned in Sir 48¹¹ in 'the praise of famous men.'

In recent years new interest has been given to the personality of Zerubbabel by the extremely able and ingenious work of Sellin, *Serubbabel: ein Beitrag zur Gesch. der messian. Erwartung und der Entstehung des Judenthums*, 1898. Sellin seeks to make out that, at the instigation of the prophets Haggai and Zechariah (cf. Hag 2²³, Zech 4⁸ etc.), Zerub. was actually raised to the throne of Judah, and the Messianic kingdom thus set up, but that he was soon overthrown by the Persians and put to death. The martyr king was even supposed by Sellin to be the suffering Servant of Is 53. The evidence in support of these conclusions is very skilfully marshalled, but one has a feeling that fancy plays too large a part in Sellin's reconstruction of the post-exilic history, and, so far as the argument rests upon Is 53 and kindred passages, it will have no weight with those (and their number is increasing) who refuse to see in the Servant an individual instead of a collective sense (cf. esp. Ed. König, *The Exiles' Book of Consolation*, 1899, and Budde, *Die sogenannten Ebed-Jahwe-Lieder*, 1900). [The identification of the Servant with Zerubbabel is abandoned by Sellin in his *Studien zur Entstehungsgesch. der jüd. Gemeinde nach dem Bab. Exil.*, 1901].

The investigations of Professor Kusters led him to conclusions which, if accepted, involve a complete recasting of the traditional opinions about the Return from exile, and the influence of that event upon Israel's subsequent history. Founding partly on the undoubted fact that a great many Judahites were never carried into exile at all, Kusters contended that the temple was rebuilt, not by the returned exiles, but by the people of the land (at the generally accepted date 520-516). While Driver and Ryle are satisfied that the Chronicler gives in Ezr 3⁸⁻¹³ a substantially correct account of what transpired, Cheyne accepts Kusters' results. He agrees, indeed, with Wildeboer, that Kusters went too far in denying that any exiles at all returned at the accession of Cyrus, but is of opinion that the real Return was not till that headed by Ezra at Nehemiah's second visit (432). The story of the Return and the building of the temple as told by the Chronicler is, upon Kusters' theory, constructed with a view to glorifying the **gōla** (exiles) at the expense of the '**am-hā'ārez** (people of the land). Zerubbabel and Jeshua may have done all that is recorded of them, but they need never have been

in Babylon at all. Kusters' conclusions have been combated, especially by Wellh., Ed. Meyer, and van Hoonacker (see Literature below), from different points of view, and it may be safely asserted that, if it has been the fashion to attribute too much to the **gōla** and too little to the remnant of Judah, the brilliant Leyden professor went to the opposite extreme.

LITERATURE. — Kuenen, *De chronologie van het Persische tijdvak*, 1890 [*Gesam. Abhandl.* 212 ff.]; de Sauley, *Étude chronol. des livres d'Est. et Neh.*, 1886; Imbert, *Le temple reconstr. par Zorob.*, 1888; Stade, *GV I* (1888), II, 98 ff.; Driver, *LOT*³ (1897), p. 545 ff.; Ryle, *Ezra and Nehemiah* (Camb. Bible), 1898; Howorth, 'Real character and importance of 1 Esdras' in *Academy*, 1898, pp. 18, 60, 106, 174, 826, 824, see also *PSBA* xxiii. 147, 805; A. van Hoonacker, *Zerubbabel et le second temple*, 1892; Wellhausen, *JG*³ (1897), p. 157 ff.; Schürer, *GJV*³ (1898), II, 827 ff. (*HJP* II, III, 177 ff.); P. Hay Hunter, *After the Exile* (1890), I, 50 f., 156 f., 219 f.; C. C. Torrey, *The Composition and Hist. Value of Ezr-Neh.*, 1896; Sayce, *HCM* 589 ff.; Schrader, 'Die Dauer des zweiten Tempelbaues,' in *SK*, 1867, pp. 460-504 (the first notable attack on the historicity of Ezr 3; Schrader's view has been adopted by Kuenen, Stade, Marti, Ryssel, König, and many others). Kusters' epoch-making work, *Het herstel van Israël in het Persische tijdvak*, 1894, was criticised by Wellhausen upon the whole adversely (though he concedes a good deal to him), in *GGN* (1895, No. 2, 'Die Rückkehr der Juden aus dem bab. Exil' [to which Kusters replied in *ThT*, 1895, p. 549 ff.]), and has met with much more uncompromising opposition from van Hoonacker (*Nouvelles Études sur la restauration juive*, 1896, cf. also his art. 'The Return of the Jews under Cyrus,' in *Expos. Times*, viii. [1897] 351 ff.), and Ed. Meyer (*Entstehung des Judenthums*, 1896; Meyer was severely criticised by Wellh. in *GGN*, 1897, p. 89 ff., and replied in a pamphlet, 'Julius Wellhausen und meine Schrift *Die Entstehung des Judenthums*,' the controversy turning especially upon the genuineness of the documents professedly quoted by the Chronicler, which is affirmed by Meyer against Kusters and Wellhausen). As was noted above, Kusters' conclusions have been largely accepted by Wildeboer, *Lit. d. AT*, 411 f., 419 f., and Cheyne, *Introd. to Isaiah*, xxxiii-xxxix, *JRL* 5 ff.

J. A. SELBIE.

ZERUIAH (זְרֻיָּה, in 2 S 14¹ 16¹⁰ 23⁸⁷; זְרֻיָּה, LXX Σαρουείδ and Σαρουείδ; *Saruia*). — The mother of David's officers, Abishai, Joab, and Asahel. Her husband's name is never mentioned, and the three heroes are always referred to as 'the sons of Zeruiah' (once in 1 Sam., 13 times in 2 Sam., 3 times in 1 Kings, and 7 times in 1 Chronicles). This fact may simply imply that Zeruiah's husband died early and was forgotten; or it may signify that the mother of these famous men was herself so remarkable a woman that her husband's name was comparatively unworthy of preservation; or it may be an interesting relic of the ancient custom of tracing kinship through the female line.

In the genealogy given in 1 Ch 2, Zeruiah and Abigail are mentioned as sisters of the sons of Jesse (2¹⁹). The expression seems to imply that they were not daughters of Jesse, and in 2 S 17²⁵ one of the two, Abigail, is called the daughter of Nahash. On this passage Stanley bases the conjecture that Jesse's wife was the mother of Zeruiah and Abigail by a previous marriage with Nahash, king of the Ammonites; but Budde prefers to emend זְרֻיָּה into יִשָּׁה (Jesse). See NAHASH.

J. STRACHAN.

ZETHAM (זֶתָם). — A Gershonite Levite, 1 Ch 23⁹ (B Zetham, A Zaiθam) 26²² (B Zetham, A Zotham, Luc. in both passages Zetham).

ZETHAN (זֶתָן). — A Benjamite, 1 Ch 7¹⁰ (B Zaiθan, A Hθan, Luc. Zethan).

ZETHAR (זֶתָר). — A eunuch of king Ahasuerus, Est 1¹⁰ (BA 'Aθaraθ). The Heb. form of the name is compared by Oppert (*Esther*, 25) with Pers. *zaitar*, 'conqueror.'

ZIA (זִיָּא). — A Gadite, 1 Ch 5¹³ (BA Zoē, Luc. Zēa).

ZIBA (זִיבָּא, זִיבָּא in 2 S 16¹; B Zaiβā, A Ziβā, and in 2 S 16¹ 2³⁴ Ziββā; *Siba*). — A servant or slave (זִבָּא) of the house of Saul (2 S 9²). The Philistine invasion, which was so fatal to his master's house, probably gave him his liberty (cf. Jos. *Ant.* vii. v. 6), and he comes on the scene at the head of a

household of his own, consisting of 15 sons and 20 slaves (2 S 9¹⁰). He is consulted by David, who wishes for Jonathan's sake to show kindness to any surviving representative of the house of Saul, and informs the king of the existence of MEPHIBOSHETH, Jonathan's lame son, in the obscurity of Lo-debar (2 S 9⁴). When David thereupon receives Mephibosheth into his own house as a permanent guest, and confers upon him the estate which had belonged to Saul, Ziba is appointed Mephibosheth's land-steward (2 S 9⁹⁻¹⁰). At a later period, Ziba dexterously turns Absalom's rebellion and Mephibosheth's weakness to his personal account. To display his own loyalty, he fetches David a large supply of provisions during the latter's flight across the Mount of Olives, and at the same time, apparently without any grounds, accuses his master of having gone over to the enemy in the hope of obtaining the kingdom of Saul. For this sinister service Ziba is rewarded with a grant of all Mephibosheth's property (2 S 16⁴). When the rebellion is stamped out, and the king returns to Jerusalem, Mephibosheth is able to rebut the false charges made against him by his treacherous servant. The king might justly punish Ziba, but in the hour of victory he is in a conciliatory mood. If Ziba has not been faithful to his master, he has at any rate been loyal and serviceable to his king. David accordingly contents himself with restoring half the property of Saul to Mephibosheth and confirming Ziba in the possession of the other half (2 S 19²⁴⁻³⁰). J. STRACHAN.

ZIBEON (זִבְעֹן). — Gn 36^{2, 14, 20, 24, 29}, 1 Ch 1^{38, 40} (Σεβρών except 1 Ch 1³⁸ Α Σεβρών). See ANAH.

ZIBIA (זִבְיָה). — A Benjamite, 1 Ch 8⁹ (Β' Ίεβιά, Α Σεβιά, Luc. Σαβιά). This and the name **Zibiah** may be connected with זִבְיָה, fem. זִבְיָה 'gazelle,' as totem.

ZIBIAH (זִבְיָה). — The mother of Joash of Judah, 2 K 12¹⁽²⁾ = 2 Ch 24¹ (ΒΑ' Ίεβιά). See also ZIBIA.

ZICHRI (זִיכְרִי). — 1. A grandson of Kohath, Ex 6²¹ (B Zexpe, A Zexpi), misspelt in modern edd. of AV *Zichri*, although ed. of 1611 has correctly *Zichri*. 2. 3. 4. 5. Four Benjamites, 1 Ch 8¹⁹ (B Zaxpel, A Zexpi), v. 23 (B Zexpel, A Zoxpi), v. 27 (B Zaxpel, A Zexpi), Neh 11⁹ (B Zexpel, A Zexpi), and so in the next three occurrences. 6. An Asaphite, 1 Ch 9¹⁵ || Neh 11¹⁷ (see ZABDI, No. 4). 7. A descendant of Eliezer, 1 Ch 26²². 8. A Reubenite, 1 Ch 27¹⁶. 9. A Judahite, 2 Ch 17¹⁶ (B Zapel, A Zaxpi). 10. Father of a captain in Jehoiada's time, 2 Ch 23¹ (B Zaxapiá, A Zaxapias). 11. A mighty man of Ephraim, 2 Ch 28⁷ (B 'E'xepel, A 'E'xepi, Luc. Zaxapias). 12. A priest in the days of Joiakim, Neh 12¹⁷ (B⁹ A om., B¹⁰ a ms lat Zexpel, Luc. Zaxapias).

ZIDDIM. — See ZER.

ZIDON (זִידֹן and זִידֹן; Σ(ε)ιδών, Arab. *Saida*). — The ancient city of Zidon lay 20 miles to the S. of Berytus (Beyrout), and about the same distance to the N. of its great rival Tyre. It was situated behind a small promontory, and, like Tyre and Jaffa, owed its maritime existence and commercial prosperity to a ledge of rock lying off a short distance from the shore. In the case of Zidon, this reef, with its detached islets rounding the N. side of the promontory, presented half a mile of breakwater, and afforded an excellent protection to its shipping. On the S. side of the promontory there was another harbour, more capacious, but less sheltered. The section of Phœnician plain belonging to Zidon stretched from the river Tamyras,

Arab. *Damár*, half-way between Zidon and Berytus, down to Zarephath, 8 miles S. of Zidon.

i. **EARLY ASCENDENCY**. — Zidon is considered to have been the most ancient of the Phœnician cities. On her coins she claims to be the mother of Hippo, Citium, and Tyre, and the name of Zidon is mentioned in the Egyptian records as far back as B.C. 1500. It is referred to as a city in Gn 10¹⁹, and Josephus (*Ant.* i. x. 2) states that it received its name from the eldest son of Canaan (Gn 10¹⁵). According to another derivation it owed its name, like Bethsaida of Galilee, to the fishing carried on in its waters. This is in agreement with the allusion to Zidon in *Anast. Pap.* i. to the effect that the fish at Zidon were as numerous as grains of sand. Zidon appears to have taken the lead in the development of industrial exchange among both the civilized and barbarous nations bordering on the middle and eastern divisions of the Mediterranean. In this way the vessels of Tyre on their longer and more perilous voyages still continued to be spoken of as vessels of Zidonian commerce. When the Phœnician traffic in cloth, brass, slaves, etc., is referred to in the Homeric poems, it is to Zidon, not Tyre, that reference is made (*Il.* vi. 290, xviii. 743; *Od.* iv. 618, xiv. 272-285, xvi. 117, 402, 404). Vergil (*Æn.* i. 446) in the same way calls Dido Zidonian, though he mentions Tyrian colonists, and gives his hero a Tyrian steersman, Palinurus. It may have been in this sense, as referring to the general protectorate of Zidon, that it is spoken of in Gn 49¹³ as reaching down to the border of Zebulun. This early pre-eminence of Zidon continued from the time of Egyptian decline after Ramses II. down to the unsuccessful conflict with the Philistines (B.C. 1252), provoked by the seizure of Dôr as a dyeing station. For an account of the colonial expansion of the Phœnicians see art. PHœNICIA.

ii. **POLITICAL HISTORY**. — The public fortunes of Zidon were closely connected with those of Arvad and Tyre. These and the other Phœnician cities, although constantly attacked by one or other of their powerful military neighbours, seldom united under any leadership for the welfare of all. The town of Tripoli is said to have been occupied by residents originally belonging to three separate Phœnician towns, and to have been named from their three permanently separate quarters. They sometimes, however, combined against one of their own cities, as when Alexander sailed down upon devoted Tyre with a fleet of over 200 vessels, chiefly Phœnician, collected from the ports of Zidon, Cyprus, and Rhodes. One reason for such independence was that each town was nominally under the protection of its own deity, who, as his name, Bâal-Zidon, 'Lord of Zidon,' or Melkarth, 'King of the city,' implied, was expected to defend its rights and promote its fortunes. In the case of Tyre and Zidon, commercial jealousy also had an important influence.

(1) *Zidon under Assyria*. — Zidon came into relationship with Assyria by acknowledging the suzerainty of Ashur-bani-pal in B.C. 877. This position of nominal dependence, with permission to trade with Assyria, soon changed into a more exacting tributary relationship under Shalmaneser II. and Tiglath-pileser, and led to open rebellion in the reign of Shalmaneser IV. (B.C. 727), and to the complete subjugation of the country by Sennacherib in B.C. 701. About B.C. 676 Esarhaddon conquered Zidon, and, after beheading its king, 'Abd-Melkarth, demolishing the citadel and palace, and killing most of the inhabitants, transported the remainder of the population to Assyria, and called the town 'Ir-Esarhaddon ('city of Esarhaddon').

(2) *Zidon under Babylon*. — The authority of

Assyria came to an end with the Scythian invasion (B.C. 630-610) and the attack of the Medes in the year 606. The interval of respite gave the Phœnicians an opportunity of consulting for their own better protection against Babylon and Egypt, and at this time Zidon and the other cities agreed to follow the leadership of Tyre (Ezk 27⁸). The alliance seems to have extended beyond the coast towns to Edom, Moab, and Ammon; and Jeremiah was instructed to give the LORD'S message to the deputation sent to Jerusalem (Jer 27³). When Pharaoh-neco marched out of Egypt to invade Mesopotamia in B.C. 608, king Josiah of Jerusalem, in fidelity to the cause of Babylon, endeavoured to arrest him, and lost his life in doing so. Soon after, when in 605, at the great battle of Carchemish, Nebuchadnezzar defeated Neco, Phœnicia was overrun and laid waste by the savage soldiery of Babylon. So cruel was their treatment of the conquered cities that the yoke of Egypt seemed light in comparison, and in 588 they all rebelled, including Judæa. Another invasion followed, with its attendant sufferings. Judæa hastened to submit (2 K 24¹⁻¹², 2 Ch 36⁶), but Tyre justified the hegemony committed to her by enduring a long siege, submitting to Nebuchadnezzar in 585. By this humbling of Tyre (Ezk 28), Zidon was brought once more to the front, and maintained her position as chief of the cities till the overthrow of the Bab. kingdom by the Persians under Cyrus in 538.

(3) *Zidon under Persia, Greece, and Rome.*—A period of rest was enjoyed during the reign of Cyrus (B.C. 540-529). Afterwards the Phœnician cities were required to pay a light annual tax, and on demand to supply transport ships and war vessels to the king of Persia. They were allowed to have their own kings and administration, and their condition was much better than it had been under the Assyrians and Babylonians. In B.C. 351, as the power of Persia began to wane, Zidon took the lead in organizing a Phœnician revolt against Artaxerxes Ochus, king of Persia. In the punitive invasion that followed, Zidon was captured and reduced to ashes, as many as 40,000 perishing in the flames (Diod. Siculus, xvi. 40-44).

After the battle of Issus (B.C. 333), Zidon, with the other cities of Phœnicia, except Tyre, surrendered to Alexander, and Zidon contributed a large contingent of vessels to assist Alexander in his attack on the insular fortress. During the confusion that followed the death of Alexander, Zidon was at different times under Egyptian and Seleucid rule until, in A.D. 198, it passed to the latter, and became rapidly Hellenized. A school of Philosophy sprang up at Zidon, to which was added the school of Law and Jurisprudence transferred from Berytus after the earthquake there in A.D. 551. Under the Romans Zidon enjoyed, along with Tyre, the rights of a free city, having its own magistrates and municipal government. During the 12th and 13th cents. it was frequently taken and retaken by the Crusaders and the Saracens.

The modern Arabic town of 10,000 inhabitants lies along the shore of the N. harbour, with its ancient wall, crowded houses, narrow streets, and shaded bazaars. The gardens adjoining the town are irrigated from the river Awāly (Bostrenus), which enters the sea two miles N. of Zidon. These gardens are covered with fruit-trees, chiefly orange, and in early spring, when the dark foliage is variegated with fragrant blossom and golden fruit, and the banks of the water channels are beautiful with violets, Zidon may still claim the epithet of the Greek poet Dionysius, who called her *ἀνθεμόεσσα*, 'the flowery city.' In these gardens pillars and blocks of carved stone and ancient coins are continually being found. In 1855 the tomb of king Eshmunazar, probably of the 3rd cent. B.C., was

discovered. A few years ago a much larger and more important discovery was made of a subterranean burial chamber, with side-rooms containing ornamental sarcophagi, one of which was at first pronounced that of Alexander the Great.

iii. *BIBLE ALLUSIONS.*—Except during the time of friendly contact produced by the building of the temple (1 Ch 22²), and its restoration in the time of Ezra (Ezr 3⁷), the general tone of reference to Zidon is that of hostility. 'Great Zidon' was on the border of the portion assigned to Asher (Jos 19²⁸), but the Zidonians remained unconquered, and proved a source of danger and temptation to Israel (Jos 13⁸, Jg 13¹ 3¹ 10⁶). They are mentioned with Amalek and Midian as having aggressively oppressed Israel (Jg 10¹², where perhaps Phœnicians in general are meant). The marriage of Ahab with the Zidonian Jezebel is denounced as a sin surpassing that of Jeroboam (1 K 16³¹). The Zidonians are held up to abhorrence as having sought to make merchandise of captured Israelites, and of using the sacred vessels of the Lord at their heathen shrines (Jl 3⁵). Zidon, with the other world powers, is to drink the cup of the Lord's fury (Jer 25²²), and it is seen lying cast away and forgotten along with its companions in oppression, Asshur, Elam, and Egypt (Ezk 32³⁰). Zidonians were among the multitudes who went forth to hear Christ (Mk 3⁸), and the sin of Tyre and Zidon is made to compare favourably with that of the impervious cities of Galilee (Mt 11²¹⁻²², Lk 10¹³⁻¹⁴). The Syro-Phœnician woman whose daughter was healed came from the coasts of Tyre and Zidon (Mt 15²¹⁻²⁸, Mk 7²⁴⁻³⁰), and Jesus, after this miracle, passed through Zidon (Mk 7³¹). Zidon again appears with Tyre in the conciliatory interview with Herod in A.D. 44 (Ac 12²⁰), and, finally, was visited by St. Paul on his voyage to Rome (Ac 27³).

ZIDONIANS (זִידוֹנִי, or, more commonly, זִידִי; *Σιδωνιοί, Φοινίκες*).—From originally meaning the inhabitants of the city of Zidon (1 K 11¹⁵⁻²³, 2 K 23¹³) the name came to be applied generally to all the cities of the same race, being thus = Phœnician.

LITERATURE.—Kenrick, *Phœnicia*; Rawlinson, *Hist. of Phœnicia*; Thomson, *Land and the Book*.

G. M. MACKIE.

ZIHA (זִיחָא, in Neh 7⁴⁶ זִיחָא).—The name of a family of Nethinim, Ezr 2¹³ (B *Σουθιά*, A *Σουαδ*, Luc. *Σουδδαλ*) = Neh 7⁴⁶ (B⁹ *Σηδ*, A¹⁴ *Ολαδ*, Luc. *Σουλαλ*), Neh 11³¹ (B⁹ A om., N⁹ a ms lat *Σιδλ*).

ZIKLAG (זִיקְלָג, in 1 Ch 12¹⁻²⁰ זִיקְלָג; B *Σικελάκ* except Jos 19⁵ 1 S 27⁶ *δα* *Σικελάκ*, 1 Ch 4³⁰ *Ἰκλάδ*, 12¹ *Σωκλά*, v. ²⁰ *Σωγλάμ*; A *Σικελάγ* except Jos 19⁵ *Σικελάδ*).—A Judahite (Jos 15³¹) or Simeonite (19⁵, 1 Ch 4³⁰) town, which, in the time of Saul, was in Philistine hands and was assigned to David as his headquarters by ACHISH (1 S 27⁶, 2 S 1¹ 4¹⁰, 1 Ch 12¹⁻²⁰). It was plundered by the Amalekites during the absence of David, who, however, overtook and defeated the marauders (1 S 30¹⁻²⁰); see art. DAVID, vol. i. p. 560. It is mentioned as inhabited by Judahites after the Captivity, Neh 11²⁸.

The site of Ziklag has not been identified with certainty. The most probable of the sites proposed appears to be the ruin *Zuhailika*, discovered by Conder and Kitchener in 1877, lying E.S.E. from Gaza. This ruin occupies three low hills, and is at a distance of about 4 miles N. of *Wady es-Sheri'a* (prob. the Besor of 1 S 30⁹⁻¹⁰⁻²¹). This identification is favoured by Mühlau (in Riehm's *HWB*² 1866^b), Buhl (*GAP* 185), Dillm. (*Jos.* 527, where other less probable suggestions are mentioned), *et al.* J. A. SELBIE.

ZILLAH (זִילָה, *Σελλάδ*).—One of LAMECH'S two wives, Gn 4¹⁹. ²²⁻²³. See ADAH, No. 1.

ZILLETHAI (זִלְתַּי).—1. The name of a Benjaminite family, 1 Ch 8²¹ (B Σαλθ:ι, A Σαλει, Luc. Σελαθι). 2. A Manassite who joined David at Ziklag, 1 Ch 12²⁰ (BΣ Σεμαθει, A Γαλαθι, Luc. Σιλαθι).

ZILPAH (זִלְפָּה).—A slave-girl given to Leah by Laban, Gn 29²¹ (P), and by her to Jacob as a concubine, 30⁹ (J); the mother of Gad and Asher, vv. 10-13 (J), 35²⁶ 37¹ 46¹⁸ (all P). The LXX (A) has Ζελφά throughout.

ZIMMAH (זִמְמָה).—The name of a family of Ger-shonite Levites, 1 Ch 6²⁰ (B and Luc. Ζεμμά, A Ζαμμά) v. 43⁽²⁷⁾ (B Ζαμμάμ, A Ζαμμά, Luc. Ζεμμά), 2 Ch 29¹² (BA Ζεμμάθ, Luc. Ζεμμά).

ZIMRAN (זִמְרָן).—A son of Abraham and Keturah, Gn 25⁹ (A*E Ζεβράν, A* Ζεμβράν, D^{all} Ζουβράν) = 1 Ch 1³² (B Ζεμβράν, A Ζεμράν). The ethnological signification of the word is doubtful. Possibly Knobel is right in connecting it with the Ζαβράμ of Ptolemy (vi. vii. 5), W. of Mecca, on the Red Sea. We may perhaps compare also the ZIMRI of Jer 25²³. The name is derived from זִר, 'mountain-sheep or -goat,' this animal having doubtless been the totem of the clan.

ZIMRI (זִמְרִי 'mountain-sheep' [see Gray, *HPN* p. 97, note 2]; BΣ Ζαμβρι, AF Ζαμβρι; in 1 Ch 8²⁶ A Ζαμρι; Vulg. *Zambri*, but in Chron. *Zamri*).—1. A prince of the tribe of Simeon, son of Salu (Nu 25⁶⁻¹⁴ [P], 1 Mac 2²⁶). While the congregation of Israel in general were expressing repentance for having joined in the impure worship of Baal-peor, Zimri shamelessly and ostentatiously continued in it. This outrage fired the zeal of Phinehas, who followed him and his partner into the alcove (זִמְרִי) and slew them both. 2. Son of Zerah, and grandfather or ancestor of Achan (1 Ch 2⁶, which also represents him as brother of the four sages who are mentioned in 1 K 4³¹). He is called Ζαβδι in Jos 7¹. 3. A Benjaminite, lineal descendant of Saul (1 Ch 8³⁶ 9⁴²). 4. King of Israel (1 K 16⁹⁻²⁰). He had been captain of half the chariots under Elah, and made use of his position to conspire against his master, whom he assassinated while the latter was drunk. Even amongst the series of deeds of violence that ushered in the constant changes of dynasty in the Northern Kingdom this act of Zimri seemed peculiarly atrocious. 'Is it peace, thou Zimri, thy master's murderer?' was the bitter taunt flung down by Jezebel at Jehu as he entered the gate of Jezreel (2 K 9³¹). And in the formula which closes the narrative of the reign of the historian specially notes 'the treason that he wrought' (v. 20). Zimri's *coup d'état* apparently had no general support, the people following either Omri or Tibni, and his brief reign of seven days only enabled him to accomplish the extirpation of the family of Baasha, which had been predicted by Jehu the son of Hanani (v. 3). The distance between Gibbethon and Tirzah leads us to infer that Omri must have marched at once on the capital, and that he met with scarcely any resistance. Zimri perished in the ashes of the royal palace to which he had himself set fire. 5. 'All the kings of Zimri' are mentioned in the same verse, Jer 25²³ (Gr. 32¹¹) with those of Elam and the Medes as amongst those who were to drink the cup of the fury of the LORD. There is considerable doubt as to what place is meant, or even as to the genuineness of the phrase. It is omitted in LXX (BNA), but Aquila seems to have read it. Delitzsch thinks that a place called Namri in the inscriptions of Shalmaneser II., and situated in north-west Babylonia, is referred to; but Schrader (*COT* ii. 107) discredits this opinion, without suggesting any rival theory. N. J. D. WHITE.

ZIN (זִין; *Ziv*, *Ziv*; *Sin*), Nu 13²¹ 20¹ 27¹⁴ 33³⁶ 34¹, Dt 32⁶¹, Jos 15¹⁻³.—A region passed through by the Israelites in their journeyings. The most exact indication of its position is given in Nu 34 and Jos 15. These passages (in which the boundary of Judah is traced in almost identical terms) refer to 'the wilderness of Zin' in v. 1 of both, and further describe the boundary thus: '... and pass on to Zin' (Nu v. 4 ... '[... and passed along to Zin (Jos v. 3) ...] ... to Kadesh-barnea'). The Hebrew is identical in both passages זִין זָרַךְ, but the *nun* is without *dagesh* in Numbers.

These are the only places where the word *Zin* occurs by itself, and it seems to denote a place or limited area from which the region round about was named 'the wilderness' of Zin, the expression which occurs in all the remaining passages cited above.

In Nu 13²¹ 'the wilderness of Zin' is named as the southern limit from which the spies began to search the land. In Nu 33³⁶ it is given as one of the stations in the journeyings. The brief note, 'the same is Kadesh,' serves to explain the following verse ('And they journeyed from Kadesh' ...). Nu 20¹ records the arrival of the children of Israel 'in the wilderness of Zin' in the first month [the year is not stated], and the following vv. 1-13 relate the events which took place at Meribah. The remaining two passages, Nu 27 and Dt 32, which are duplicates, refer to the punishment of Moses for his offence at 'the waters of Meribah of Kadesh in the wilderness of Zin.'

Hence it may be inferred (a) that the Wilderness of Zin formed part of the southern boundary of Judah at its eastern end towards the Dead Sea; (b) that Kadesh was included within its limits. A reference to art. *PARAN* leads to the further conclusion that the wilderness of Paran must have been adjacent to that of Zin, so that Kadesh was regarded as in either territory.

The LXX and Vulg. render both *Sin* and *Zin* by Ζῖν, Ζεῖν, *Sin*; but in Nu 34, Jos 15 the LXX renders Ζῖν by Έρμα; AF Ζεῖμα in Numbers, A Ζεῖν in Joshua. Vulg. has *Scana* in Numbers, *Sina* in Joshua. The close similarity between the events recorded in Ex 17 and Nu 20 (noticed in art. *MARIBAH*), and other points of resemblance between occurrences before and after Sinai, suggest a further question whether *Sin* and *Zin*, the *Sin* of the pre-Sinai and the *Zin* of the post-Sinai narrative, may be variations developed in the course of tradition. Both names are found only in the Hexateuch, and there is no geographical indication of later times to guide us. The hypothesis does not appear improbable, but the narrative in its present form indicates two regions bearing different names. On the supposition of a Sinai to the E. of the Arabah, these two 'wildernesses' would be much closer together than on the traditional hypothesis. A. T. CHAPMAN.

ZINA.—See *ZIZA*.

ZION (צִיּוֹן; B Ζειών, but Ζιών in Am 1⁸ and in 28 places in the Psalms; A Ζιών, but in Is 1⁸ 2³, Jer 26¹⁸, La 2⁴, Jl 2¹ 15, and in 6 places in the Psalms Ζειών, and in Ca 3¹¹, Is 31⁹, Jer 8¹⁹ Ζιώ; in Ca 3¹¹ B omits. In Apoc. and NT Ζιών, *Sion*, where the AV, following the Greek, has *Sion*, the RV *Zion*).—The stronghold (צִבְרָה) of Zion was the castle, or acropolis, of the 'city of the Jebusites' (Jg 19¹¹); see art. *JEBUS*. Its position must have been one of great natural strength, for it was regarded by its garrison and its inhabitants as impregnable, and when David laid siege to it he was received with taunts and jeers (2 S 5⁶⁻⁸, 1 Ch 11²; cf. Jos. *Ant.* vii. iii. 1). 'Nevertheless, David took the stronghold of Zion, the same is the city of David ... and David dwelt in the stronghold and called it the city of David. And he built round about from Millo and inward' (2 S 5⁷⁻⁹, 1 Ch 11²⁻⁵). In two other passages (1 K 8¹, 2 Ch 5²) Zion is directly identified with the city of David by the expression 'the city of David which is Zion.' Within the

* For the meaning of 'wilderness' see art. *JEZUMOK*.

city walls David built a palace (2 S 5¹¹, Neh 12²⁷), round which were gathered the houses of his warriors (2 S 11¹); and pitched a tent for the ark of Jahweh (2 S 6¹²⁻¹⁷, 1 Ch 15²⁰ 16¹). Before his death, David purchased the threshing-floor of Araunah the Jebusite, upon which was erected, afterwards, the altar of the temple (2 S 24^{18, 25}, 1 Ch 21^{18, 26}); and when he died he was buried in the city of David (1 K 2¹⁰, Neh 3¹⁶).

The exact position of the stronghold within the later Jerusalem is one of the most important of the disputed points connected with the topography of the Holy City. In the article JERUSALEM it is shown that the ancient city stood on two spurs, or hills, separated from each other by a deep ravine. The western and higher spur is identified by Christian tradition with Zion; on the eastern and lower the temple was built. The western spur is broad-backed, and, so far as its original form is known, there is no broken ground or conspicuous feature upon it that would naturally be selected as the site of a castle such as those usually erected for the protection of an ancient hill-town. Moreover, there is no spring; and when, at a later date, the spur was covered with houses, this deficiency had to be met by the construction of reservoirs and aqueducts. The earliest settlement at Jerusalem cannot therefore be placed on the western spur. The eastern spur, on the other hand, is, for the most part, a narrow ridge of rock, upon which there are good natural positions for the construction of a hill-fort or castle. One such position is that which was occupied by the Macedonian Akra and the Herodian Antonia; another is the point, south of the present Haram esh-Sherif, at which the Tyropæon ravine most closely approaches the valley of the Kidron. In that valley, at the foot of the eastern slope of the spur, rises the only true spring at or near Jerusalem—GIHON, now the Fountain of the Virgin.

The evolution of Jerusalem cannot have differed greatly from that of other ancient cities. The earliest settlement would naturally have been on the eastern spur, and it probably consisted of a village on the slopes above the spring, with a small fort on higher ground to which the people could fly on the approach of an enemy.

By about B.C. 1400 Jerusalem had become, according to the Tel el-Amarna letters, the fortified capital of a small district; and such it appears to have been when the Hebrews entered Palestine. The natural disadvantages of its position for trade, and the scarcity of fertile land in its vicinity, were against rapid growth; and there is no reason to suppose that, when taken by David, it was larger than other hill-towns in Palestine, or that it had spread beyond the limits of the eastern spur. The topographical argument in favour of placing the stronghold of Zion on this spur rather than on the western, is supported by the historical notices.

The temple area, which is now enclosed by the walls of the Haram esh-Sherif, was *above* the city of David, and was not regarded as forming part of it (1 K 8¹⁻⁴, 2 Ch 5²⁻³; cf. 2 S 24¹⁸). And the statements of Nehemiah (3^{16, 18} 12²⁷, cf. 2¹⁴), which place the stairs of the city of David, the palace of David, and his tomb between the pool of Shelah (SILOAM) and the temple, absolutely exclude the western spur as a possible site for the city of David. With this, too, agree the identification by Micah (4⁸) of the 'tower of the flock' with 'the Ophel of the daughter of Zion'; the references in Ezekiel (43^{7, 8})

to the proximity of the royal palace and sepulchres to the temple; and the apparent connexion of Zion and the temple in Ps 78^{60, 69} and Jer 50²⁸. Perhaps also there may be an allusion to the relative positions of Zion and the temple in Ps 48³ 'Mount Zion, on the sides of the north, the city of the great King.' Throughout the OT there are passages which have no meaning, if Zion and the temple hill were two separate topographical features. Zion is the holy hill or mountain (Ps 2⁶, Jl 2¹), the chosen habitation of Jahweh (Ps 91¹ 74² 76³ 84⁷ 132¹³, Is 8¹⁸ 60¹⁴, Jer 8¹⁹, Jl 3^{17, 21}, Zec 8³). There He manifests Himself (Ps 14⁷ 20² 53¹²⁸ 134³, Am 1³); and there He must be worshipped and praised (Ps 65¹⁻³, Jer 31⁶, Jl 2^{1, 16}). Hence Mount Zion, the intangible mount, the city of the living God, is employed in the NT as the type of heaven (He 12^{18, 22}, Rev 14¹). At the same time the name Zion is given, in some instances, to the whole city (Ps 126¹ 146¹⁰, Is 1²⁷ 10³⁴, La 1⁴; cf. the common expression 'daughters of Zion'); and in others it is mentioned as if it were a separate quarter of Jerusalem (2 K 19³¹, Ps 51¹⁸, Is 30¹⁹ 64¹⁰, Jer 26¹⁸, Jl 3¹⁶, Am 1², Mic 3¹², Zec 1¹⁷; cf. the distinction between Jerusalem and the quarter in which the kings were buried in 2 Ch 28²⁷).

In 1 Maccabees, written c. B.C. 100 by some one who was well acquainted with the localities, Zion is identified with the temple hill (4^{37, 38} 5³⁴ 7³⁰ etc.), and so it is in 1 Es 8¹, 2 Es 5²⁵, Sir 24¹⁰, and Jth 9¹³. Josephus, who does not mention Zion, says (*Ant.* vii. iii. 1) that David took the lower city and the Akra (both of which he elsewhere places on the eastern spur), and (iii. 2) that, after driving the Jebusites out of the Akra, David rebuilt Jerusalem, called it the city of David, and dwelt in it.* The Rabbis,† without exception, place the temple on Zion, and Origen distinctly states (*in Joan.* 4^{19, 20}) that the Jews did so in his day. Eusebius (*in Is.* 22¹) and Jerome apparently (*in Is.* 1²¹ 22¹) take the same view; but elsewhere they identify Zion with the western spur, and in this agree with the Bordeaux Pilgrim (*Itin. Hieros.*). From the 4th cent. onwards Zion is always identified with the south part of the western spur. This identification first appears after the official recovery of Golgotha, and it possibly owes its origin to the feeling that, without a Zion, the 'New Jerusalem' of Constantine would be incomplete and inferior in sanctity to the 'Old Jerusalem' with its temple on the lower ground to the east.

The identification of Zion with the eastern spur satisfies the topographical conditions and the historical evidence until the 4th cent. A.D. But the spur is now so completely covered with deep rubbish that its original form is unknown, and the exact position of the stronghold can be determined only by extensive excavations. The fort was probably small, for its builders could have had in view only the protection of the spring and the little town on the slopes above it. Lightfoot (*Op.* i. 553, ii. 187), Fergusson (*Essay on the ancient topog. of Jerus.* p. 55 ff., 1847), and a few other writers, place Zion immediately north of the temple; but, if the words of 1 K 8¹⁻⁴ (cf. 2 S 24^{18, 19}) are to be taken literally, it must have been to the south of the Holy Place of the Jews. In this direction, on a site so situated as to command the spring, it has been placed by Birch (*PEFS.* 1878, pp. 129, 178), Stade (*GVI* i.

* Josephus adds (iii. 2) that David took possession of the Upper City, which he called (*BJ* v. iv. 1) the fortress (*ἀκρόπολις*), and joined the Akra to it. This possibly refers to the first enclosure of the western spur, which David may well have undertaken towards the close of his reign, when the development of trade had greatly enriched the kingdom.

† Some of the copper coins struck during the war of Vespasian and the rebellion in Hadrian's reign bear the legends *Λιγ'υλλάθ Ζιων*, 'Deliverance of Zion,' and *Χθέρυθ Ζ.*, 'Emancipation of Zion.' See art. MOSBY, vol. iii. p. 431.

* Notice here 'bring up' : so regularly in OT people go up from the palace to the temple (Jer 26¹⁰), and down in the opposite direction (2 K 11¹⁹, Jer 22¹ 36¹²). If, however, the palace had been on the western spur (2520-50 ft.), the temple (2440 ft.) would have been below it.

315 f.), Robertson Smith (art. 'Jerusalem' in *Encyc. Brit.* 1881), Sayce (*PEFSt*, 1883), von Alten (*ZDPV* ii. 18 ff., iii. 116 ff.), Klaiber (*ZDPV* iii. 189 ff., iv. 18 ff.), Guthe (*ZDPV* v. 271 ff., 1883), G. A. Smith (in *Encyc. Bibl.* 2418), and the majority of recent authorities. Guthe (*l.c.*) believed that his excavations proved the existence of a wide, deep ditch or hollow, cut through the hill, in a N.W. direction, from the Virgin's Fount to the Tyropæon Valley. But his excavations were not complete, and the view that he found the ditch of the stronghold must be accepted with reserve.

The identification of Zion with the western spur is accepted by Reland, Robinson, Ritter, Williams, de Vogüé, Stanley, Conder, and others; but, as will have been seen, it is exceedingly difficult to reconcile with the statements of the OT.

The following view may be suggested. When David took Jerusalem it was a hill-town on the south part of the eastern spur, with a small castle or acropolis, called Zion, situated at a convenient spot to the south of the present Haram esh-Sherif. After David's capture of the city he at once commenced to rebuild and strengthen its fortifications, especially those of the stronghold and Millo.* Towards the end of his reign, when a period of great prosperity had set in, he commenced the enclosure of the western spur; and his work on both spurs was continued by Solomon (1 K 9^{15, 24} + 11²⁷), Hezekiah (2 Ch 32⁵; cf. Is 22⁹), and Manasseh, who 'built an outer wall to the city of David, on the west side of Gihon in the valley' † (2 Ch 33¹⁴). The stronghold of Zion became the city of David, and this name was soon extended to the town at the south end of the spur. When the town spread northward, Zion was connected with the central part of the spur, on which lay the royal buildings and, adjoining them on the north, at the top of the hill, the temple area; and so it became a sacred name for the spot upon which the temple, the dwelling-place of Jahweh, stood. Afterwards, the name was frequently applied by prophets and poets to the temple enclosure, to the eastern spur, and to the holy city of Jerusalem.

In the time of Hadrian there was, according to Epiphanius (*de Mens. et Pond.* xv.), a small church on the western spur, which marked the site of the house—that of the mother of Mark—at which the apostles met after the Ascension. This church, apparently the same as that called by Cyril of Jerusalem the 'Church of the Apostles,' became in later years the basilica of holy Zion, or the 'Mother Church' on Zion. This tradition now attaches to the church of the Syrian monastery, which claims to be the oldest ecclesiastical establishment at Jerusalem. There was also a Church of St. Peter, or 'House of Caiaphas,' which is mentioned in the 5th cent. as being distinct from that of Zion (*Brev.*; Theodosius, *De loc. sanct.*; see discussion in *Antoninus Martyr*, App. ii. P. P. Text Series, vol. ii.). C. W. WILSON.

ZIOR (צִיּוֹר).—A town in the hill-country of Judah, Jos 15²⁴ (B *Σῶβρ*, A *Σῶρ*). It is prob. to be identified with the modern village *Sa'ir*, about 6 miles N.N.E. of Hebron. A pretended grave of Esau is shown at the place, the origin of this tradition being probably the similarity of the names *Sa'ir* and *Se'ir* (see Mühlau in Riehm's *HWB*² 1871^a; Guérin, *Judée*, iii. 150 f.; *PEF Mem.* iii. 309, 379; Buhl, *GAP* 158). The Zior of Jos 15²⁴ can have nothing to do with the *Σῶρ* (Sior) of Eusebius and Jerome (*OS*³ 293, 19, 20;

* See art. MILLO, and cf. Stade, *GVII* i. 343.

† This passage shows that the palace was higher than, and therefore to the north of, the 'city of David.'—Ed.]

‡ This wall was built apparently to give more efficient protection to the passage leading to the Virgin's Fount, which was discovered by Sir C. Warren.

151, 1–3), which is described as between *Ælia* (Jerusalem) and Eleutheropolis (Beit Jibrin).

ZIPH (צִיפ).—1. A son of Jehallelel, 1 Ch 4¹⁸ (B *Λαμαχελ*, A *Ζιφαλ*, Luc. *Ζιφ*). 2. A city of Southern Judah, Jos 15²⁴ (B om., A *Ἰθραῖφ* [combining *Ziph* and the preceding *Ithnan*], Luc. *Ζελφ*). Its site has not been recovered. 3. A city in the hill-country of Judah, Jos 15²⁵ (B *Ὀζελβ*, A and Luc. *Ζελφ*, cf. 1 Ch 2²³ [*Ζελφ*]; fortified by Rehoboam, 2 Ch 11⁸ (B *Ζελβ*, A *Ζελφ*, Luc. *Ζιφ*). The wilderness of Ziph (צִיפ) was one of the refuges of David (see vol. i. p. 564^b) when fleeing from Saul, 1 S 23^{14, 15, 24} 26^{1, 2}. The gentile name *Ziphites* (צִיפִּי and צִיפִּי; LXX *Ζιφῆται*) occurs in 1 S 23^{18, 24} [LXX only] 28¹, Ps 54^{11a}. Ziph is the modern *Tell Zif*, S.E. of Hebron (Robinson, *BRP*¹ i. 492, 498; Guérin, *Judée*, iii. 159 ff.; G. A. Smith, *HGHL* 306 n.; Buhl, *GAP* 163). Jerome (*OS*³ 159, 14) misstates its distance from Hebron as 8 M.P., whereas it is under 5 (Roman) miles (Robinson).

ZIPHAH (צִיפָּה).—A son of Jerahmeel, 1 Ch 4¹⁸ (B *Ζαφά*, A *Ζαφά*, Luc. *Ζιφά*).

ZIPHION.—See ZAPHON. **ZIPHON**.—See SIBIRAIM.

ZIPPOR (צִיפּוֹר, twice [Nu 22¹⁰ 23¹⁸] צִיפּ).—Father of BALAK king of Moab, Nu 22² 4. 10. 16 23¹⁸, Jos 24⁹, Jg 11²⁵ (all *Σεπφώρα*). The name, which doubtless in this case and in that of *Zipporah* has a totemistic significance, means 'sparrow.'

ZIPPORAH (צִיפּוֹרָה; *Σεπφώρα*).—One of the daughters of the priest of Midian, Ex 2¹ 22 (J), wife of Moses and mother of Gershom. According to 18² (E) she had another son.* For the part played by her in connexion with the circumcision of Gershom, 4^{24a} (J), see art. CIRCUMCISION, vol. i. p. 443^a. Zipporah, who was a Midianitess, cannot of course be the 'Cushite woman' (see vol. iii. p. 442^b note†) of Nu 12¹. On the name *Zipporah* see preceding article.

ZIV.—See art. TIME, p. 765^a.

ZIZ.—The ascent (AV wrongly 'cliff') of *Ζιζ* (צִיז) *צִיז*; BA *ἡ ἀνάβασις Ἀσὰε*, Luc. . . . *Ἀσῶδ*) is only once mentioned in the Bible (2 Ch 20⁹), and is generally classed among unidentified sites. The context, however, leaves no doubt in the mind of the present writer as regards identification. It is the ascent to a cliff, rising above the plain of the Dead Sea near En-gedi on the edge of the tableland or wilderness of Judæa (see EN-GEDI). Conder says of this spot: 'On the south are the wolds of the Negeb plateau, with the plains of Beersheba beyond. On the east is the "Solitude," with white peaks and cones of chalk, and deep and narrow watercourses, terminated by the great pointed cliff of Ziz, above Engedi, and by the precipices over the Dead Sea, 2000 ft. high' (*Tent-Work in Palestine*, p. 244). The gorge lying at its base offers one of the few ways of ascent from the western shore of the Dead Sea to the tableland of Judæa, and, on the occasion in connexion with which Ziz is mentioned, was selected by the hosts of Ammon, Moab, and Edom for a combined attack on the kingdom of Judah in the reign of Jehoshaphat. The attack, however, in answer to prayer, proved disastrous to the invaders (cf. *HGHL* 272).

E. HULL.

ZIZA (צִיזָּה).—1. A Simeonite chief who took part in the raid on Gedor, 1 Ch 4²⁷ (B and Luc. om.,

* The 'sons' of MT in Ex 4²⁰ is from the hand of a redactor. See art. MOAB, vol. iii. p. 439^a note f.

A Zoufā. 2. A son of Rehoboam, 2 Ch 11²⁰ (B Zefā, A Zefā).

ZIZAH (זִיזָה).—A Gershonite Levite, 1 Ch 23¹¹. The name, prob. by a copyist's error, appears in v.¹⁰ as Zina (זִינָה). LXX has in both verses Zefā. One Heb. MS, cited by Kennicott, also reads זִיזָה in v.¹⁰.

ZOAN (זֶן, Tānis, Tanis. The Coptic *Jani* resembles the Hebrew and the Arabic *Sān*, but a Christian Coptic MS, containing a list of bishops, bears witness to the Greek pronunciation with *T*. [Amelineau, *Géographie de l'Égypte*, 1893, p. 413f.]).—A city of Egypt which the LXX by their rendering identify with the city known to the Greeks as Tanis. It is described by Greek writers as a 'great city' (Strabo, *Meineke*, c. 802; Stephanus Byzant. in his list of cities), and the branch of the Nile on which it was situated was called from it the Tanaitic mouth. The city declined in importance when the river which flowed by it ceased to be a main waterway; and the surrounding country, which in ancient times was rich pasture ground, is now salt marsh and lake. An insignificant collection of dwellings (known as *Sān* on the Muiz canal), chiefly inhabited by fishermen who ply their trade on the neighbouring lake Menzaleh, marks the site of this once flourishing city. But widely scattered around are ruins which bear witness to its former greatness. From very early times it was a centre of worship, and successive dynasties enriched the city with costly buildings and obelisks which (such is the opinion of those who have explored the site) equalled, perhaps in some respects surpassed, many of the temples which have been more fortunately preserved.

The references to this city in Is. and Ezk. are in accord with the testimony of the monuments and of Greek writers. Isaiah (19¹¹⁻¹³ 30⁴) describes it as the abode of princes and counsellors, and Ezekiel (30¹⁴) includes it in a list of the principal cities doomed to destruction. The note in Nu 13²² that 'Hebron was built seven years before Zoan in Egypt,' opens up a wide field of conjecture, but yields little by way of certain inference. Hebron was regarded as an ancient city, existing in the time of Abraham, and the note implies that Zoan also was an ancient city, built before the migration of the Hebrews into Egypt; but whether anything more (such as community of origin) is suggested by the comparison is doubtful. The question of most interest to the biblical student in connexion with Zoan is: Was this city, already flourishing when Israel came into Egypt, in any way connected with their sojourn there? It is known that in Exodus the name Zoan does not occur. Rameses is mentioned (Ex 12²⁷) as the place from which the children of Israel set out on their journeyings. But in Ps 78, which recounts the wonders which God had wrought for Israel, 'the field of Zoan' is twice mentioned (vv. 12, 42) as the scene of the plagues. The Psalmist may have used this expression as a poetical parallelism to 'the land of Egypt,' just as Isaiah places the 'princes of Zoan' in parallelism with the 'counsellors of Pharaoh,' and the only inference to be drawn from the passage is that the Psalmist knew Zoan as a very important city. It is possible that the use of Zoan may be due to a tradition not elsewhere preserved. Ebers (*Durch Gosen zum Sinai*, p. 498) gives an inscription in which the words 'the field of Zoan' occur.

Brugsch asserts that Ramses II. transferred his court to Zoan, strengthened its fortifications and founded a new temple city; that the place was called Pi Ramessu, the city of Ramses, and that the new Pharaoh who 'knew not Joseph' can be no other than Ramses II. (*Egypt under the*

Pharaohs, ii, 94, 96, 99). These statements if accepted go far towards locating the children of Israel at the time of their departure. But Egyptologists do not agree in interpreting the monumental evidence. In the articles PITHOM and RAMESSES will be found the opinions of Naville and others who are not prepared to adopt Brugsch's identification. This at least may be said of the site now occupied by *Sān*. Its position on the Nile, in or near to what was the land of Goshen, its known antiquity and importance, mark it out as a residence of the Pharaohs and a probable dwelling-place of Israel in bondage.

A. T. CHAPMAN.

ZOAR (זֶרַח, זֶרַח; LXX usually Ζήρωρ, but Gn 13¹⁰ Ζογopa, Jer 48³⁴ Ζογορ; Vulg. always Segor; Jos Zoapa and Zoap).—The name of one of the 'cities of the Plain' (or Oval; Heb. *Kikkār*; see PLAIN, 4), near the Dead Sea, mentioned in Gn 13¹⁰ 14²⁻³ (where its former name is said to have been *Bela* בֵּלָא), 19²² (where its name is explained, by a popular etymology, as signifying 'littleness,' and it is said to have been spared, on account of its smallness, at the time when the other 'cities of the *Kikkār*' were destroyed, vv. 22, 30, Dt 34³ (in Moses' view from Pisgah: 'and the *Kikkār*, the plain [*biḥāh*; PLAIN, 3] of Jericho, as far as Zoar'), and as a city of Moab, Is 15², Jer 48⁴ (read prob. with LXX [ἀναγγέλλετε εἰς Ζογορ], Ew., Graf, *al.* 'make a cry to be heard unto Zoar'), v. 34.

These are all the biblical notices of Zoar. Though no place bearing the name is at present known, it is, however, mentioned repeatedly by post-bibl. writers, down to the Middle Ages, as an important place lying at the S. end of the Dead Sea. Jos. says that it was still called *Zoap* in his day (*Ant.* i. xi. 4), and states that the Dead Sea extended—as the context implies, from *Jericho*—for 580 stadia 'as far as Zoara [*μέχρι Ζοαράν*] of Arabia' (*BJ* iv. viii. 4). Euseb. (*Onom.* 261) says that the Dead Sea lay between Jericho and Zoara; and states (231, s.v. Βαλα) that it had a Roman garrison, and that the balsam and the palm still grew there, testifying to the ancient fertility of the locality. Ptolemy (v. 17. 5) speaks of it as belonging to Arabia Petraea; Steph. of Byz. calls it a *κώμη μεγάλη ἢ φρούριον*; in the ecclesiastical *Notitiae* it is mentioned as an episcopal see in Palaestina Tertia, which was represented at the Council of Chalcedon, A.D. 451 (Reland, *Palaest.* 215, 217, 223, 226, 1065; cf. 230). Under the name Zughar (Zughar, Sughar, Sukar) it is often mentioned by the mediæval Arabic geographers (see Tuch, *Genesis* 2, 280 f.; or, more fully, Guy le Strange, *Pal. under the Moslems*, 1890, 286-92) as situated one degree S. of Jericho (Abul-feda), at the 'end of the Dead Sea,' in a hot and unhealthy valley, but nevertheless an important commercial centre, capital of the province of esh-Sherāh or Edom (p. 39), a station on the great trade route between the Gulf of Akabah and Jericho, two days' journey from the latter place, and famous for its dates and indigo (cf. *HGHL* 506 f.).* From its proximity to Zoar, the Dead Sea is often called by these writers the 'Lake of Zughar.' The Crusaders also mention 'Segor' (cf. the Vulg. above) as pleasantly situated, with many palm trees, so that it was even called by them 'Villa Palmarum' and 'Palmer' (cf. Knob. on Gn 19²⁰⁻²² [fuller than Dillm.]; Rob. *BRP* ii. 517-9).

As regards the *precise* position of Zoar, it was argued by Robinson (*l.c.*) that the notices of Jos. and Eus., though they implied that Zoar was near the S. end of the Dead Sea, did not necessarily fix it at that end; and that as Jerome (on Is 15²) says

* Le Strange shows very clearly that Merrill (*East of Jord.* 233) is in error in saying that the Arab. geographers place Zughar at the N. end of the Sea.

that Luhith was between Areopolis and Zo'ar, the most natural site for it would be (see the maps) at *el-Mezra'a*, in the midst of a verdant stretch of woodland and pasture-ground behind the barren promontory *el-Lisān*, just where the Wādy Kerak, flowing down from above the old citadel of Kerak, fertilizes the soil on the E. side of the Dead Sea.* The same site was adopted by Tuch (*l.c.* 281 f.). Wetzstein, however, in an important Excursus on Zo'ar at the end of Delitzsch's *Genesis*⁴ (1872), p. 564 ff., pointed out that it was not consistent with the *data*: the mediæval Zo'ar was one of the six stations on the usual caravan-route from Aila (Elath) by Hebron to Jerus.: it was two days' journey from Aila to Ghamr el-'Arabah, two more to Zo'ar, and two more to Hebron: *el-Mezra'a*, as a glance at the map will at once show, is entirely out of the line of this route (for Tuch was in error in supposing that it passed along the E. side of the Dead Sea and crossed the Jordan by Jericho: no road is possible along the E. side of the Sea); nor would the steep and narrow W. Kerak be, as Tuch supposed, a practicable route for Baldwin's army to take when marching to the relief of Kerak, for a handful of men could have effectually barred its progress (cf. Tristram, *Moab*, 65, 67-9, esp. 68). Pulcherius, moreover, accompanied Baldwin on an expedition from Jerus. to Petra, passing Hebron and Zo'ar on the way; but again, if Zo'ar was at *el-Mezra'a*, it would have taken them strangely out of their course. Accordingly Wetzstein supposes with great plausibility that Zo'ar lay near the S.E. corner of the Dead Sea, in the verdant and tropically-wooded oasis, some 6 miles long by 1-3 broad (see Tristram's Map, and pp. 329 f., 333 f., *Moab*, 46 f., 50-52; Rob. ii. 113; Grove in Smith, *DB* iii. 1182, § 26; Gautier, *Autour de la Mer Morte*, 1901, p. 52 f.), fertilized by the waters of the Wādy el-Aḥsā ('the W. of the sand-wells'), flowing down from the S.E., and called now, from the high and smooth sandstone-range rising up behind it, the *Ghōr es-Sāfiyeh* ('the Hollow of the Smooth (cliff)'). And an Arabic authority (Dimashki, c. 1300), *ap. le Strange* (p. 292), expressly places Zughar here. In the curious mosaic map of Pal., also, discovered in 1896 in a basilica at Mēlebāh in Moab, and belonging probably to the 5th or 6th cent. A.D., BAAAK [LXX for *Bela*] H KAI ZOOPA, with a palm-tree beside it, is placed clearly at the S.E. corner of the Dead Sea.†

On the South of the Dead Sea the character of the soil is very different: there is here a large saline morass, *es-Sebkha* (above, p. 512* note*), some 6 miles broad and 10 long, bounded on the N. half of its W. side by the cliffs of rock-salt called *Jebel Uḍum* (vol. I. p. 575b, iii. 152), consisting of fine mud brought down by the wādy on the S.W. and S. and mingled with drainings of the *Jebel Uḍum*: this is entirely destitute of vegetation, and only passable with danger and difficulty (see descriptions in Rob. ii. 112; Tristram, *Land of Jer.* 326-9; Gautier, *op. cit.* 48-52). The Wādy Ghurundel divides the *Sebkha* from the *Ghōr es-Sāfiyeh*.

At present there is nothing in the *Ghōr es-Sāfiyeh* but a wretched village of reed huts, enclosed by a reed stockade, with camps round about, inhabited by Bedawis (Tristram, 330; Gautier, 53 f., with views, 48, 56); and Wetzstein (p. 568 f.) thinks that, from the climate, there could never have been a much more substantial place here; but he points to a castle which may well have been the site of the *φρούριον* mentioned in ancient times; and perhaps the ancient Zo'ar stood in a higher and more healthy situation than the actual floor of the *Ghōr* (cf. the two ruins to the S.E. a little way up the W. el-Aḥsā [Tristram, *Moab*, 46-49]).

* Tristram, *Moab*, 60, 64. The map at the end of Tristram's *Land of Israel* shows very distinctly the different fertile spots on the shores of the Dead Sea. The elevations will be best learned from G. A. Smith's large *Topogr. and Phys. Map of Pal.* † See Lagrange, *La mosaïque géogr. de Mādaba*, in the *Rev. Bibl.*, April 1897, (in which the *East* is at the top), and p. 173.

The usually accepted site of both Zo'ar and of the other 'cities of the *Kikkār*' has been at the S. end of the Dead Sea; but it was argued by Mr. (afterwards Sir G.) Grove in Smith's *DB*, s.v. 'Zo'ar', that they were at the *North* end of the Sea; and this view has been followed since by Tristram (*L. of Jer.* 354 ff.), Conder (*Tent-Work*, 154, 207 f., 210), and other English writers (cf. above, arts. GOMORRAH and SODOM). The principal grounds upon which it is supported are (1) that in Gn 13¹⁰ Lot is said to have seen from near Bethel (v. 3) 'all the *Kikkār* of Jordan', and afterwards to have dwelt in the 'cities of the *Kikkār*', whereas the S. end of the Dead Sea is not visible from near Bethel, and a plain situated there would not naturally be called the 'Plain of Jordan'; (2) that the S. end of the Dead Sea is not visible from Nebo, as it is implied in Dt 34² (quoted above) that Zo'ar was; (3) that Gn 14⁷, which states that Chedorla'omer, coming up from the S., after smiting the Amalekites in Hazizon-tamar (= Eng-edi, 2 Ch 20⁹), proceeded to the Vale of Siddim, implies that this vale, and consequently the cities of the *Kikkār* (which were near it), were at the N. end of the Sea. It is true, the language of Gn 13¹⁰ ll. 12b does not seem to suggest that the narrator (J) pictured the part of the *Kikkār*, to which Lot would naturally descend from Bethel, as separated from Sodom by the Dead Sea, with practically no passage along either shore: on the other hand, this conclusion is not necessary; the narrative may well be condensed, and Lot may not then and there have directly 'moved his tent as far as Sodom.' The evidence that the post-bibl. Zo'ar was at the S. end of the Dead Sea clearly cannot be resisted: and in the case of what must anciently have been a well-known place, it seems scarcely likely that the Zo'ar of Josephus was on a different site from the biblical Zo'ar. Further, as regards (1), *Kikkār* does not mean 'Plain', but 'Round', and it may thus have been applied to the entire basin in which both the lower Jordan and the Dead Sea lay, the '*Kikkār* of the Jordan' (Gn 13¹⁰ ll. 1, K 7^b) being in particular the part of it including the lower course of the Jordan: in Gn 13¹⁰, also, it is not said that Lot saw the exact part of the *Kikkār* in which the cities were (for 'all' must be an exaggeration, even if the cities were at the N. end of the Dead Sea, since only a part of the plain there is discernible from near Bethel); (2) the view described in Dt 34² includes many points (as Dan) not actually visible from Nebo (Thomson, *L. and B.* iii. 653), and v. 3 implies naturally that Zo'ar was at some distance off, not a place at the foot of Nebo (Tell Shaghūr, Conder, *Heth and Moab*³, p. 154 f., 6 m. N.E. of the Dead Sea, in spite of the facts that Shaghūr does not correspond phonetically to Zo'ar, and that Tell Shaghūr is not distinguishable from Rās Shaghūr, *ib.* p. 137); (3) the route from Eng-edi to the N. end of the Dead Sea, whether inland (across a succession of steep hills: Rob. i. 526-32) or along the coast (by wading or clambering round promontories: Rob. i. 506 n.; Tristram, *Land of Jer.* 252, 274, 278, 284 f.), is much more impracticable for an army than that to its S. end: according to others also, Hazizon-tamar is not Eng-edi at all, but the Tamar of Ezk 47¹⁹ 48², a village on the road between Elath and Hebron (*Onom.* 210, perhaps (Rob. ii. 202) *Kurruḥ*, 22 m. S.W. of the S. end of the Dead Sea).

And, in fact, there are biblical *data* which, when considered carefully, appear to support the S. site. To say nothing of Dt 34², just referred to, it is observable that Zo'ar is always spoken of as a *Moabite* town, and never claimed as an Israelite or (Jos 13¹⁵⁻²¹) Reubenite town, as it naturally would be if it lay at the N. end of the Sea; Ezk. also (16⁶) describes Sodom as being on the 'right' (i.e. the south) of Jerus. (Samarina being on its 'left', or north), which shows that he did not picture it at the N. end of the sea (which is due E. of Jerusalem). The S. site is accepted by the great majority of recent authorities, as Knob., Del., Keil, Dillm. (on Gn 19²⁰), Riehm, *HWB*; Socin, *ZDPV*, 1880, p. 81; Buhl, *Geogr.* 271 f., 274; G. A. Smith, *Expos.*, Dec. 1896, p. 413, *HGHL* 678 (cf. 505-8); Clermont-Ganneau, *PEFS*, 1886, p. 20; Blanckenhorn, *ZDPV*, 1896, p. 54 f. (who gives further particulars).

On the singular argument by which Hommel (*AHT* 198-9) seeks to show that *Bela* (Gn 14²*) is mentioned in Assyrian under the name *Malik. Malgu*, etc., see Johns (in the *Expositor*, Aug., 1896, pp. 158-60), who shows that it rests upon a series of misreadings and misunderstandings.

The site of Zo'ar carries with it the site of the other 'cities of the *Kikkār*', which (Gn 19) may have formed a group by themselves, but cannot have been at any great distance from Zo'ar. Provided, therefore, it may be assumed (see SIDDIM, VALE OF) that in Abraham's time what is now the shallow S. part of the Dead Sea was the 'Vale of Siddim,' and the morass *es-Sebkha* a fertile plain (like the present *Ghōr es-Sāfiyeh*), it may reasonably be supposed that the other four cities were situated on this plain; an earthquake, how-

ever, took place, producing on the one hand an eruption of petroleum, which, igniting, destroyed the four cities (Triatram, *L. of Isr.* 353 f.; Dawson, *Egypt and Syria*, p. 125 ff.), and on the other hand a subsidence of the soil, which caused the 'Vale of Siddim' to be covered by the waters of the Dead Sea, and the plain on which the four cities were situated to become the saline morass, now called es-Sebkha (cf. the descriptions of the site of the overthrown cities, Dt 29²², Zeph 2²; Is 13²², Jer 49¹⁸ = 50⁴⁰).

S. R. DRIVER.

ZOBAB (זֹבָב or זֹבָב; Σωβά [A in 2 S 8¹² and 2 in 1 Ch 19⁶ Σωβά].—One of the numerous kingdoms into which the Aramæans on the north and north-east of Palestine were divided. Apart from the short notice of the wars of Saul (1 S 14⁴⁷), which is probably the work of a later editor (see SAMUEL, I. AND II.), the first mention of Zobah or Aram-zobah occurs in the reign of David in connexion with his war against Hanun, king of the Ammonites (2 S 8³², 10¹²). In the fuller and more accurate account of this campaign, given in 2 S 10¹², it is stated that the Ammonites hired the Syrians (or Aramæans) of BETH-REHOB and of Zobah, together with Ish-tob, king of Maacah,* to assist them in repelling the expected invasion of the Israelites. Despite this important reinforcement, the Ammonites failed to withstand the Israelites under Joab and Abishai, and both they and their allies were forced to take refuge in flight. The Aramæans, however, seem to have realized that a wider issue than that of the temporary support of Ammon was involved in their struggle with the newly developed kingdom of Israel; for, owing to the enforced inactivity of the two great empires of Egypt and Assyria, it was obvious that the supremacy (for the time being) over northern Palestine would rest with the stronger of the two rival dynasties of Aram and Israel. Hence we find Hadadezer, king of Zobah, making further and more strenuous efforts to overwhelm the Israelite kingdom. To this end he assembled all the forces at his command, and with the aid of the powerful kingdom of Damascus (following 2 S 8³ rather than 10¹²: see below) again took the field. The opposing armies met at Helam; but the Israelites, this time under the command of David himself, once more proved victorious, and compelled the Syrians to accept terms of peace. It would appear from 1 K 11²² that this battle had an important bearing on the history of Syria; for, according to the notice there preserved, a certain Rezon, son of Eliada, took advantage of the defeat of Hadadezer to desert. Accompanied by a troop of men he fled to Damascus, where he set up a kingdom, and became 'an adversary to Israel all the days of Solomon.'

It cannot be denied that, at first sight, the impression of Zobah conveyed by the biblical narrative is that of a large and powerful kingdom in the north of Palestine, exercising sovereign sway over all the Aramæan tribes. Hence the majority of scholars, until recently, have placed it vaguely between Damascus and Hamath, the nearest approach to a definite site being that of Nöldeke, who assigns it to the neighbourhood of Emesa. As regards its *site*, this impression is confirmed by the Assyrian monuments (Schrader, *KGF* p. 122, *KAT* p. 182 f., art. 'Zobah' in Riehm's *HWB*; Fr. Del. *Par.* p. 279 f.); but the idea of its *importance* seems to be derived very largely from the

fact that (according to the present text of 2 S 10¹², cf. 8³) Hadadezer, king of Zobah, exercised control over the distant Aramæan tribes living 'beyond the River.' But a comparison of the two accounts of David's wars with the Ammonites and the Aramæans (2 S 8 and 10) shows clearly that the account given in 2 S 8³⁻⁸ is mainly the work of a later editor, who probably also substituted the phrase 'that were beyond the River' (10¹²) for the original 'of Damascus' * (on the relation of 10¹² to ch. 8 see SAMUEL, I. AND II., p. 390). On the ground of its importance, therefore, and of the extent of influence, there is no need to place Zobah so far north as the kingdom (or city) of that name mentioned in the Assyrian tribute—or geographical lists (see above). Moreover, a closer examination of the history of the two campaigns makes it more probable that Zobah lay considerably further south. The order in which the Aramæan tribes are mentioned in 2 S 10¹² (Beth-rehob, Zobah, Maacah) is decidedly against the northern theory, for both Beth-rehob and Maacah lay to the S. or S.W. of Damascus, and apparently their territories bordered on that of Ammon: we should expect, therefore, to find the kingdom of Zobah in the same neighbourhood. Hence Winckler (*Gesch. Isr.* p. 137 f.) is no doubt right in identifying Zobah, or Aram-zobah, not with the Assyrian Šubiti (or Šubutu) lying to the N. of Damascus, but with the place of the same name, S. of Damascus and in the neighbourhood of the Haurān, mentioned by Assurbanipal in the account of his campaign against the Arabian king Jauta (Rassam-Cylinder, vol. vii. ll. 110-112; see *KIB* ii. p. 217). Winckler (p. 141 f.) is inclined to go even further and to identify Zobah with Beth-rehob, but the evidence which he adduces is scarcely convincing.

It is possible that the editor who is responsible for 2 S 8³⁻⁸ confused the two Zobahs, for the two cities of Zobah which he mentions, Berothai (= Berothah, Ezk 47¹⁶) and Bethah (1 Ch 18⁸ TIB-HATH, probably the modern *Ṭebah*), were situated N. of Damascus. In addition to the authorities cited, see also Tompkins in *PEFSI*, April 1885, pp. 108 f., 113. J. F. STENNING.

ZOBEBAB (זֹבֶבָב).—A Judahite, 1 Ch 4⁸ (B Ζαβαβ, A Ζωβηβ, Luc. Ζαβηβ).

ZOHAR (זָהָר).—1. Father of Ephron the Hittite, Gn 23²⁵ (Σάαρ). 2. The name of a Simeonite family, Gn 46¹⁰ (A Σάαρ, D Σάα), Ex 6¹⁶ (Σάαρ); called in Nu 26¹⁵ and 1 Ch 4²⁴ **Zerah** (in former, BA Ζάρα; in latter, B Ζάρες, A Ζάραε, Luc. Ζάρα). 3. The name of a Judahite family, according to the *Kêrê* of 1 Ch 4⁷ (זָהָר) and Zohar, which was followed in AV of 1611). The *Kêthibh* is זָהָר which in modern edd. of AV appears as 'Jezoar' (an incorrect transliteration of זָהָר) and in RV as 'Izhar' (i.e. זָהָר).

ZOELETH, THE STONE (זֶהֱלֶת אֶבֶן 'the serpent's stone'; B Αἰθὴ τοῦ Ζωελεθ, A τὸν λίθον τοῦ Ζωελεθ).—The spot at which Adonijah prepared a sacrificial feast for all those who supported his claims to the throne of David (1 K 1⁹). The stone was doubtless a *mazzēbā*, and marked the site of an old Canaanite sanctuary. In ancient times 'living water' was regarded as inhabited by *jinn*, usually in the form of a serpent or dragon; cf. 'the dragon's well' (Neh 2¹³): hence such water was

* 2 S 10¹². Read as Wellhausen and Klostermann—זֹבָב וְיִשְׁתּוֹב מֶלֶךְ מַאֲכָה 'and the king of Maacah, Ish-tob, and with him (12,000 men)', omitting the awkward 'with a thousand men.' In the parallel passage (1 Ch 19⁶), the Chronicler gives the sum-total as 32,000 men (i.e. 20,000 + 12,000): he obviously, therefore, did not include the extra thousand (see Klostermann *ad loc.*).

* This seems more prob. than the substitution of 'Damascus' for 'beyond the River,' which was suggested in SAMUEL, I. AND II.; see also Budde, *Richter u. Sam.* p. 250, note 3. Winckler, *Gesch. Israel* i. p. 137 f., indeed, rejects the whole of 10¹²⁻¹³ as redactional, arguing with some force that v. 12 really forms the conclusion to v. 6¹⁴; but, with the exception of the phrase 'beyond the River,' there seems no justification for doubting the genuineness of the passage.

itself sacred, and the source whence it issued usually became the site of a temple (see W. R. Smith, *RS*² 170 f.). The actual position of the stone is somewhat uncertain, and depends on the identification of En-rogel; the name seems to have been preserved in the modern *ez-Zhoeléh* (see art. EN-ROGEL and the authorities there cited). Wellhausen (*Skizzen*, iii. 171) suggests that the name Zohelēth may be connected with the Arabic *Zuhāl* = Saturn.

J. F. STENNING.

ZOHETH (זֹהֶת).—A descendant of Judah, 1 Ch 4²⁰ (B *Zōdā*, A *Zōxāḥ*, Luc. *Zaúθ*).

ZOOLOGY.—See NATURAL HISTORY.

ZOPHAH (זֹפָח).—An Asherite, 1 Ch 7³⁵ (B *Zōxāḥ*, A *Zōphāp*, Luc. *Zōphā*)³⁶ (B *Zōphās*, A *Zōphā*, Luc. *Zōphā*).

ZOPHAI (זֹפַי).—An ancestor of Samuel, 1 Ch 6³⁰ (11) (*Zōph(e)í*) = ZUPH of v. 30 (10) and 1 S 1¹.

ZOPHAR (זֹפָר).—The third in order of Job's three friends, described in the LXX as 'king of the Minæans' (Job 2¹¹). Probably the chief of a tribe on the borders of Idumæa.

ZOPHIM.—The 'field of Zophim' (זֹפִים אֶרֶץ, LXX *ἐλς ἀγροῦ σκοπιδν*) was one of the spots to which Balak took Balaam to view Israel, Nu 23¹⁴ (JE). It is questionable whether we have here a proper name; the Heb. expression means literally 'field of viewers or lookers out' (note the addition 'to the top of Pisgah'). Such 'places of watching' (מִצְפֵּה) were naturally situated frequently on the tops of hills (see MIZPAH, vol. iii. p. 400*). On the impossible combination *Ramathaim-zophim* of 1 S 1¹ see art. RAMAH, p. 198*.

ZORAH (זֹרָה; BA *Zapad*, with the following exceptions: B in Jos 15³⁰ om., 19⁴¹ *Zapad*, Jg 13² *Zapad*; A in Jg 13²⁰ *Zapad*, 18² *Apad*; in Neh 11²⁰ B* A om., N* * *Zapad*, Luc. *Zapad*).—A town allotted to Judah, according to Jos 15³⁰; but elsewhere spoken of as Danite, Jos 19⁴¹, Jg 18² * 11 (coupled with ESHTAOL); specially noted as the home of SAMSON, Jg 13²⁵, who was buried between Zorah and Eshtaol, 16³¹. It was fortified by Rehoboam, 2 Ch 11¹⁰, and is mentioned in Neh 11²⁰ as peopled by Judahites after the Captivity. The gentilic name *Zorathites* (זֹרָתִים) occurs in 1 Ch 2³³ (ol *Zapathaites*) 4² (B *δ'Apadēl*, A *δ'Zapadēl*, Luc. *Σαλαθιῆλ*) and prob. 25⁴ (where read *Zorathites* זֹרָתִים for *Zorites* זֹרִיתִים; B *δ'Hoapadēl*, A *δ'Hoapadēl*, Luc. *δ'Zapadēl*). In the latter verse the name *Manahathites* (Manahathites) is a reminiscence of Manah the father of Samson.

Zorah is the modern *Šurrah* on the northern side of *Wādī es-Surrah* (the Valley of Sorek) opposite *Ain Shems* (Beth-shemesh), which lies on the southern side. This corresponds with the statement of Eusebius (*OS*² 293, 29) that it was 10 miles from Eleutheropolis on the road to Nicopolis. It is mentioned under the name *Zarān* in the *Travels of a Mohar* (Sayce, *HCM* 344), and as *Zurkha* in the Tel el-Amarna letters (Winckler, No. 173; Petrie, No. 265) as attacked by the Khabiri.

LITERATURE.—Robinson, *BRP*² iii. 153; Guérin, *Judée*, ii. 15 ff.; Baedeker, *Pal*³ 163; G. A. Smith, *HGH* 218; Buhl, *GAP* 90, 195. J. A. SELBIE.

ZORITES.—See ZORAH.

ZOROASTRIANISM.—An account of the ancient religion of Iran, the religion of the Parsis at the present day, finds its place in a Bible Dictionary,

not because of direct references to it in the Bible which need elucidation,—for these are exceedingly few,—but because of the widely-held opinion that some of the most important later developments of Judaism were profoundly affected by contact with Persian beliefs. The developments in question affect Angelology, Demonology, and the doctrine of the Resurrection. In the present article only that will be described which directly concerns the parallel phenomena in the religion of Israel.

1. The *Mazdayasna* ('worship of Mazda') is variously known as Mazdeism, Zoroastrianism, or Parsism. Its basis is the worship of a supreme deity, *Ahura Mazdāh*, or *Ormazd* ('the Lord Wisdom'), beneath whom stand six highly abstract archangels called *Amshaspands* (*Amesha Spenta*, 'immortal holy ones'), and a large number of angels (*yazata*), who are mostly nature-powers dethroned from the divine position they held in the days when the ancestors of Iranian and Indian tribes lived together as one people. The sacred book of the religion, the *Avesta*,* contains some ancient hymns which appear to come from *Zarathushtra*, called by the Greeks *Zoroastros*. He is probably to be regarded as a real person, the reformer to whom may plausibly be assigned the monotheistic doctrine of the religion, and the philosophic system which attempts to solve the problem of Evil. This system involves an evil spirit, *Angra Mainyu*, or *Ahriman* ('destructive spirit'), who with his hosts of demons (*daēva*) presides over all evil things in the world and wages war with Ahura and the good creation, till the time when evil will be finally destroyed. Among the most powerful of the good spirits are the '*fravashis* of the pious.' A *fravashi* is part of a man's identity, dwelling in heaven but powerful to aid on earth. It belongs to good men past, present, and to come. It shares the fortunes of its earthly counterpart, when a living man; and if that man becomes evil, it apparently ceases as a *fravashi* to be. The good Zoroastrian had a code of simple and generally high-toned morality to observe, hampered by a complicated and often extremely foolish ritual, which is probably to be laid to the account of alien priests who fastened on the religion during the later Achæmenian reigns. After death, the pious receive a blissful immortality with Ahura in the 'House of Song,' while the *daēva*-worshippers are condemned to torment in the 'House of the Lie.' Ultimately the world is to be renewed under *Saoshyant* ('one who shall save')—a being miraculously descended from Zoroaster, after purification by the 'ordeal of molten metal,' which will consume all that is evil.

2. Such is, in the barest outline, the faith of Zoroastrianism. The only other preliminary left for us to determine here is the date at which this system had penetrated countries inhabited by Jews. It is obvious that if Judaism owed any of its eschatology, or its doctrine of angels and demons, to this foreign influence, Zoroastrianism must have been firmly established in Babylonia or Media before the Book of Daniel was written, and presumably generations before. The date of the *Avesta* is a warmly disputed question; but for our present purpose this matters little, for the doctrines which find parallels in Judaism are universally admitted to be early, on the witness of classical writers, from Herodotus downwards. That

* Its main divisions are the *Yasna* (abbreviated *Yt*), which includes the oldest part, the *Gāthās*, or hymns; the *Yashts* (Yt), hymns in honour of old nature powers; and the *Vendidad* (Vd), the Leviticus of Parsism. Many of the most important of the 'Rabbinic' writings of Parsism are translated by Dr. E. W. West in the *Sacred Books of the East* (SBE). In this series also is found the best translation of the *Avesta* itself, by Darmesteter and Mills.

these doctrines were prevalent 'in the cities of the Medes,' and other regions inhabited by Israelites during and after the Exile, may also be regarded as certain. Moreover, it is fair to argue that the Jews would be predisposed to look favourably on the religion of their liberator Cyrus. (That the early Achæmenian kings did hold what may be fairly described as Zoroastrian faith, may be assumed as probable, though not at all certain.) At present we have to show how far the Zoroastrian and the later Jewish systems coincide, and examine what reason there is for assuming that foreign influence affected the development of Judaism. Before discussing this question, we may deal with the few passages of the Bible and Apocrypha in which direct allusion is made to Zoroastrian institutions.

3. There are two allusions in the Prophets which have caused no little difficulty, since both of them refer to pre-exilic times. In Jer 39¹² RAD-MAG appears to be the Babylonian title of an official head of a sacred caste, like the Magian *δνειροπλάς* of Astyages in Hdt. i. 108. By itself this passage is not decisive: Tiele (*Religionsgesch.* ii. 110f.) would deny the connexion of the Rab-mag with Median Magi, and make him no religious officer at all.* Tiele has not dealt with the very remarkable passage, Ezk 8^{1st}, which creates a strong presumption that there were Magi outside Zoroastrianism, whose influence was felt at Jerusalem before the Exile. The prophet sees sundry 'abominations' in the temple, the worst of which are sun-worshippers who 'put the branch to their nose.' This 'branch,' despite Gunkel, must be the *barsom*, or 'bundle of fine tamarisk boughs' (Strabo, xv. 3. 14), which the Parsi priest of today holds up to his face at worship. Now, if this were 'a distinctively Persian rite' (Davidson, *in loc.*), it would be 'hardly probable at so early a date in Israel.' But it is only Magian, and not Persian at all. It belongs to the mass of ritual which the Magi contrived to graft long after this time upon the Mazdayasna, hitherto almost destitute of ceremonies and priestly rites. If, then, this characteristically Magian rite has penetrated as far as Jerusalem in the 7th cent. B.C., it is no longer 'improbable' (Tiele) that these famous medicine-men should have 'come from Media to Babylon.' On the contrary, their success at Jerusalem is more easily explained if they had already a footing at Babylon.

4. The presence of Parsism in *Tobit* is so clear that we may fairly discuss it at this point. That *Ἀσμοδαῖος* (B' *Ἀσμοδαῖος*) is *Aēshma dāeva*, 'the demon Wrath,'† has been generally accepted, though no very successful attempt has been made to account for this and other Parsi traits in a Jewish romance. A key to the character of the book may perhaps be found in the recognition of a Median folklore story which a Jewish author has adapted: see the details of this theory worked out in a paper by the present writer in *Expos. Times*, March 1900. The following will be included among the features of the original story. (1) The scene is in Media, a meeting-place of Iranian and Semitic, and especially in 'Zoroastrian Ragha' (*Ῥάγαι τῆς Μηδίας*, 9^a N.). (2) The demon *Aēshma*, as is natural in a popular story, has enlarged his functions to include 'Lust, hard by Hate,' his Avestan attribute. His opponent in the Median original would be *Sraosha*, the angel 'Obedience,' whom Parsism sets in

special antagonism to *Angra Mainyu's* arch-fiend *Aēshma*. Behind him doubtless stands the 'grateful dead man' of the folk-tale, found widely in the East,* on which Hans Andersen based his *Traveling Companion*. Raphael therefore is ultimately substituted for the dead man of To 2⁷. (3) The extraordinary emphasis laid on the duty of burying the dead strongly recalls the *Vendidad*, and it seems clear that the Jewish adapter has simply substituted burial for the Parsi 'Tower of Silence,' on which the vultures strip the bones. Great merit is accumulated when the faithful Parsi, with a companion,—it is mortal sin to do it alone,—removes a corpse thither from polluting the sacred earth. In the original, therefore, the prototypes of Tobit and Tobias must have done this pious work together. Moreover, a *dog* was necessary, that his glance might exorcise the corruption fiend.† Hence the entirely otiose and un-Jewish dog which survives in To 6² (N) and 5¹⁷ 11⁴ (B). In addition to this, there is a clear reference in 4¹⁷ (B) to the *draona*, the 'corpse-cake.'‡ (4) There seem very clear allusions (see 6¹², and note the attempt at explanation in N: also cf. 3¹⁵ and 3¹⁷) to the idea of the merit of marriage with near kin. Now this, in the form of first-cousin-marriage, has always been prominent in Parsism.§ The Magi went further, and made themselves notorious in antiquity by their vehement preaching of incestuous unions, to which they attributed extraordinary virtue. In the Median *Tobit* no doubt Raguel and the hero were brothers, so that 7⁴ (N) may be taken literally. (5) The charm by which Tobit's blindness is healed is very much like one found in the *Shāh Nāme* of Firdausi; see the story in Atkinson's epitome (*Chandos Classics*), p. 106. The parallel suggests that in the Median story the blindness may have been caused by demons' enchantment; the fish in 6² looks also like a demon. (6) In 8² (N, the original text clearly) the demon flies *ἀεὶς εἰς τὰ μέγαρα Αἰγύπτου*. That the original Aramaic || *בְּרִים* was a blunder for *בְּרִים* was suggested by Kohut,¶ and in spite of Nöldeke's objection seems highly probable. *Māzindarān* was especially the land of sorcery; and on Mt. *Dimāvand* therein (cf. *ἀεὶς* in 8²) the hero *Thraētaona* 'bound' (*συνεβόησεν* *αὐτὸν καὶ ἐπέθηκεν, ἰδ.*) the old serpent *Azhi Dahāka*. (7) The seven angels of 12¹⁸ may in the original have been the *Amshaspands*, who are often made seven by the addition either of *Ahura Mazda* or of *Sraosha*. If this is so—and it is not really necessary—we have the only distinctively Zoroastrian feature in *Tobit*; the rest are probably Magian, and may well antedate the Zoroastrian reform. But, of course, we have no means of dating the original story. It is noteworthy that there is practically no eschatology in the book; if its original was untouched by Zoroastrianism proper, this would be natural. It follows that we cannot rely much on *Tobit* as a channel for Parsi influences on Judaism. The utmost, therefore, that the book teaches us is that Israelites dwelling in Media were not strongly prejudiced against their neighbours (cf. 14⁴), nor perhaps impervious to their religion.

5. To the category of direct references belongs, according to general belief, the story of the *MAGI*

* See a close parallel in F. H. Groome's *Gypsy Folk-Tales*, No. 1. In his note he gives a list of parallels elsewhere. Add Hinton Knowles, *Folk-Tales of Kashmir*, p. 40. A folk-tale closely connected with *Tobit* may be seen in *The Story of Ahikar* (ed. Harris, Lewis, and Conybeare).

† See Geiger, *Civilisation of E. Iranians*, i. 85 ff.

‡ West, *SBE* v. 283 l. Also cf. Hartland, *Legend of Perseus*, ii. 288-312.

§ Technically known by the Pahlavi term *Khoētuk-das*.

¶ Assuming the truth of Rendel Harris's thesis, *Amer. Journ. of Theol.* 1899, p. 641 ff., esp. p. 654.

|| Geiger's *Jüd. Zeitsch.* x. To this paper, vitiated by an impossible theory of anti-Parsi polemic and a very late date for *Tobit*, are due several points in (3)-(6) here.

* He compares the Assy. *mag* 'great,' so that the word would mean 'prince'; cf. *מָגִי* in Jer. l.c. But is this distinctive enough, where other classes of officers are mentioned side by side with him?

† The translation 'covetous or lustful,' given above under *Ἀσμοδαῖος*, is based only on an assumed etymology, and finds no support in Parsi texts. Note that the two words have become one, the Avesta here, as in *Ahura Mazda* and *Angra Mainyu*, keeping them separate.

in Mt 2. The assumption that the name is strictly used is as old as the early Syriac commentators on Matt.,* but it is curious that there is so little corroborative evidence. Discussion here is hampered by the necessity of assuming the investigation of Magianism in general. The difficulty lies in the very limited attestation which the most authentic sources of orthodox Parsism give to the connexion of the stars with *fravashis*. We have a very striking identification of stars with representative spirits of a community in Rev 1³⁰. Meanwhile, we may note that although the Avesta and the Pahlavi scriptures but faintly encourage this association, there is a remarkably strong consensus of tradition connecting the Magi with star-lore. It is a side of their activity which would naturally be strengthened by connexion with Babylon (see § 3, above). The extent to which these Magi were orthodox Zoroastrians must remain doubtful. It seems fair to assume that the star did for them represent the *fravashi* of a great one just born. If we insist on Avestan doctrine, that star must have been a brilliant new star, and not a planet, for these were considered malign; there seem, however, to be traces of an opposite view, so that this need not be decisive against Kepler's theory. The question remains why they expected a *king*, and a *king of the Jews*; a prophet or 'saviour' (*saoshyant*) would seem a more natural idea. It is possible that we may fall back on the oneiromancy traditionally associated with the Magi† (cf. Mt 2¹²), and suppose that they interpreted the meaning of this new star by the help of an unrecorded dream. It must be noted, however, that both dreams and star-lore are extra-Avestan, though not inconsistent developments of the system as we know it. It is only provisionally that we may cherish the belief that the earliest Gentile homage to the Lord Christ was paid by priests of the lofty religion which in earlier times was perhaps privileged to stimulate within Judaism the growth of the doctrine of the Resurrection.

6. Such are the biblical passages in which direct allusion to Parsism may be traced or reasonably suspected; sundry more doubtful examples may be left to the end of this article. We pass on to a much more important question. It being granted that during and after the Exile great numbers of Jews were living in Mazdayasnian countries, have we reason to believe that the development of certain doctrines among these Jews was stimulated by what they knew of corresponding doctrines in Parsism, and that in this way the history of doctrine in Judaism was vitally affected? The essential parts of our problem may be stated in terms of Ac 23⁸, where (if we may include demons under 'spirits') the Sadducees represent the older Judaism, the Pharisees the newer, which arose after the Jews came in contact with Parsism. *Post hoc*, obviously: is it also *propter hoc*? A detailed examination of Parsism will show the marked likeness between the two religions in respect of eschatology and spirit-lore. Is this coincidence, or has one religion affected the other? If the latter, which is the debtor, or is the obligation mutual? Finally, if foreign influence on Judaism is to be postulated, have the claims of Babylon or Hellas a prior right to be heard? The last question is rather beyond our present range; but we may at least plead that Parsism is incomparably nearer to the faith of Israel than any other religion can pretend to be, and that its influence is antecedently more likely to have been felt. The case for the independent development of Judaism may be seen in the articles on

ESCHATOLOGY, ANGEL, and DEMON. But weighty authorities bespeak at least respectful hearing for the theory that the development of Jewish doctrine was stimulated by the knowledge of a creed which contained full-grown dogma that within Judaism was only in germ.* It is natural to assume that gratitude to the Persians as their deliverers, to whom the Jews owed the protection which made the birth of the Jewish Church possible, may have predisposed them in favour of religious ideas wherein thinkers could recognize what was latent in their own faith.

7. In *Eschatology* one ground of hesitation to accept a measure of Parsi influence has been the doubt whether the Resurrection is a truly ancient doctrine in Parsism.† The doubt is entirely groundless: the mere fact that Darmesteter himself, the great champion of a late date for the Avesta, acknowledges the Resurrection as a doctrine of Achaemenian antiquity, might silence questioning. The important differences between Parsi eschatology and the various systems which struggled for recognition among the Jews during the last centuries B.C. are drawn out by Charles, *Eschat.* p. 135 f. These divergences are fatal to any theory of *borrowing*, but they do not affect the assertion that the Jewish belief 'can hardly have developed without Persian stimulus' (Cheyne). It is generally conceded that OT passages speaking of an individual resurrection do not appear until a period when Persian stimulus is historically possible, when the knowledge that the Persians held this belief could encourage thoughtful Jews to develop their own doctrine in a thoroughly Jewish form. In this case the foreign influence would show itself by the absorption of details, minor doctrines or illustrations of doctrine. Now these are forthcoming, if not beyond dispute in individual cases, yet to an extent making coincidence improbable. Among these are the following:‡ Is 24²² is allowed by Charles, a hostile witness (*Eschat.* pp. 116 n., 159), to show probable traces of Parsism: the imprisonment of evil powers before their final punishment may be compared with Bund. 3⁴⁸ (*SBE* v. 19), which seems to represent an Avestan picture of war in heaven, followed by the binding of the fiend, as in the Apocalypse. In Is 65¹⁷ 66²² a new heaven and earth, following the final judgment and destruction of evil, is parallel with the *frashō-kereti*, 'renewing,' which in Parsism follows the 'ordeal of molten metal' (§ 1). This last, the *ayō-khshusta*, somewhat resembles the figure of Mal 3⁴. The four periods in Daniel have a very close parallel in the Pahlavi *Bahman Yasht* (*SBE* v. 193); but in this very late work it seems more reasonable to assume indebtedness to the Bible, as on p. 197 there is an apparent imitation of Lk 16^{10d}, and on p. 203 of Mic 7⁶.§ A characteristic of Parsism from the first is, however, recognizable in the new manner of looking upon general human history, and in the reckoning of millennia, which became prominent in apocalyptic. Parsi phraseology has been found (Cheyne, *OP* 440) in Is 26⁹, where the 'dew of lights' is compared with 'the illimitable, self-created lights' of 'the Best

* See Kuenen, *Rel. of Jer.* iii. 32 ff.; Grätz, *Hist. of Jews*, i. 441 ff.; Ewald, *OT and NT Theol.* pp. 72-78; Nöldeke in Geiger's *Zeitschr.* x. 233 ff.; Renan, *Hist. Jer.* iv. 156; King, *The Gnostics* 2, p. 120; Bousset, *ThLZ* xxiv. 513; and esp. Cheyne, *JRL* 257 ff., *Nineteenth Cent.* for Dec. 1891, etc.

† So, among others, Schultz, *OT Theol.* i. 330; Schwally, *Leben n. d. Tode*, § 38. The latter observes that only two Avestan passages are quoted for the doctrine. He ignores the witness of Theopompus. Jackson (*JOS* xv., lix.) adds *Ys* 307, a Gathic text.

‡ The word *paradise* is not included among these, because it has developed its theological meaning entirely on Jewish soil. The Avestan *pairi-daēza*, equated by Spiegel, is an *av.* *lay.*, equivalent in meaning to its congener *παράδεισος*.

§ P. 211 (§ 54) has a less decided resemblance to Rev 12¹².

* See Gottheil, 'References to Zoroaster' in the *Driester Classical Studies*, pp. 24-51.

† E.g. in *Idd.* i. 107.

World of the blest, shining, all illuminated' (*Vd* 19²⁰), but this does not illustrate the *dew*, for which Schwally rightly denies comparison with the *Haoma*.^{*} A more hopeful parallel may be seen when we note the Parsi view of the Dawn as a daily parable of the Resurrection—an idea witnessed in Vedic India by the phrase making the dawn the 'banner of immortality' (*Rgveda*, iii. 81. 3): for Parsism see Darmesteter, *Ormazd et Ahriman*, p. 239. There seems no adequate reason to deny the possibility of this conception in Psalms of the Persian period; and in Ps 49¹⁴ 17¹⁵ its presence is highly probable. The LXX, as Cheyne observes, shows the doctrine of the Resurrection unmistakably, as in Is 26¹⁹, Job 19²⁵, Ps 15 65 (title). Passing on to the Apocrypha, *Enoch* shows some decidedly Parsi traits: note the transformed heaven and earth (45⁴⁻⁵), and the mountain of God's throne set in the south (18), compared with *Secrets of Enoch* 10, where a hell is placed in the north,—this connotation of north and south is exceedingly common in Parsi books. The Slavonic *Enoch* is notable as an early witness for the idea of seven heavens (see HEAVEN), which appears in late Parsi books,[†] but not in the Avesta, where there are four. In the Apocalypse, which seems to have assimilated not a little Parsism, presumably through earlier Jewish apocalyptic, we have the millennium, the binding and subsequent destruction of the 'old serpent' (see § 4 (6)), the assault of Satan on heaven and his casting down to earth (cf. *SBE* v. 19), the blasting of a third part of the sky (*ib.* 164 and 17), all of which can be more or less illustrated from Parsi sources: closer still are the parallels which may be seen in some late Parsi writings described by West, *ib.* lviii f. It is not till the Talmudic period that we get direct imitations without that thorough assimilation which makes all the comparisons hitherto noted individually disputable: for Talmudic-Parsic eschatology see Kohut in *ZDMG* xxi. 552-591. One interesting example may be quoted, as it has been used to illustrate Jn 11,—the adoption by the Rabbis of the Avestan doctrine that the departing soul hovers three days near the corpse and takes its flight on the fourth.[‡]

8. In *Angelology* the influence of Parsism was also confined to subsidiary points, but is more marked. A tradition is preserved in the Jerusalem Talmud (*Rosh-hashana*, p. 56) that 'the names of the angels came up with them from Babylon,' which may be taken as meaning 'from the Exile' in general. This coincides with the fact that the practice of naming angels, and placing them in an ordered hierarchy, does not appear before the Return. Except, perhaps, in the case of a few Talmudic angels,[§] no parallels are to be expected between Hebraic names and Persian originals. As before, we are at most to postulate Persian stimulus behind the remarkable contrast between the impersonal angels of early Jahvism and the individualized and ordered celestial beings of Daniel, Zechariah, and the NT—still more of the Apocrypha.¶ The 'seven spirits' of Rev 1⁴ 8² En 90²¹⁷ ¶ (? cf. Zec 3⁹ 4² and the 'watchers' of Dn 4¹⁷) may be linked with the Amshaspands by their appearing first in Tobit (12¹⁵): the sacred number would recommend the idea, and the Jews probably met with it in a form they would approve, with

Sraosha (Raphael's prototype in Tobit) making up the seven, instead of the Deity himself (see § 4 (7)). There is exceedingly good reason for regarding as Parsic the national angels ('princes') of Dn 10¹³.²⁰ 12¹, the decisive argument being that *Israel* has an angel other than J" (contrast Sir 17¹⁷). This makes a strong case for recognizing here the *fravashi*—a doctrine the more likely to be assimilated in that it had a (less developed) analogue in Babylonian religion. In the Apocalypse the conception comes out in the 'angels' of the churches. The *fravashi* of a nation or community is a conception found in three Avestan passages: see Mills' version of Ys 17¹⁸ (*SBE* xxxi. 259). The two NT allusions (Mt 18¹⁰, Ac 12¹⁵) confirm the doctrine of *fravashis* for individuals; but that the doctrine, whatever its origin, is completely assimilated may be seen from the apparent fact that the nation has its *fravashi* long before the individual. The latter may indeed have been developed out of the former, just as in the doctrine of the Resurrection. In Parsism, of course, the individual came first. The *yazatas* are fairly paralleled by genii in *Enoch* 61¹⁰ 69²², and in the Apocalypse by angels who watch over waters (16⁵, cf. Anāhita), fire (14¹⁶, Parsi *Ātare*), sun (19¹⁷, Hvare), wind (7¹, Vāta). In all these parallels, however, we find the Parsi suggestion, if such there be, thoroughly assimilated. The *fravashi* is no longer a being necessarily good, but becomes a complete spiritual counterpart of the nation (Daniel) or the church (Apocalypse), and capable therefore of declension and punishment.^{*} Similarly, the 'angels' of the little ones are nearest the throne (Mt 18¹⁰), because representing those who have not learned to sin. The study of St. Paul's attitude to these doctrines is instructive in more ways than one.† He accepts an elaborate ranking of spirits. The air, as in Parsism, is made the arena of strife between good and evil angels:‡ the spirit world is a reflex of the earthly in the inextricable mixture of contending powers. But he accepts these beliefs only as enhancing the supremacy of Christ: cf. He 1⁴ 2², Rev 2². Like Zoroaster, centuries earlier, he found his contemporaries in danger of a virtual polytheism (cf. Col 2¹⁹), and set them free by magnifying the one Divine Being whose transcendence made worship of mere angels impossible. In doing this, Zoroaster simply tried to ignore the deities of the faith he reformed, with the result that after his death they came back like a flood, losing little in position by their formal subordination, as angels, to Ahura Mazda. St. Paul was able to accept fearlessly the angelology he found, while greatly lessening its importance, and achieving a permanent success in raising Christ to an unapproachable height above the spirit world.

9. Much of what has been said can be repeated for *Demonology*. It would be absurd to think of Satan and his angels as borrowed from Angra Mainyu and the *daevas*. The Semites had demons enough of their own, and the Satan doctrine in Parsism and in Judaism developed in very different ways. We may still believe that the ranking of demons and the elevation of one spirit to their head may have been stimulated by Parsism. There are native forces which largely account for the difference between earlier and later Jahvism in this respect; but when we find the Jews, after historical contact with Persians, advancing to a position

* The Indian *Soma*—the juice of a sacred plant, endowed in Veda and Avesta with miraculous qualities.

† Kohut, *N.Y. Independent*, Jan. 11, 1894. For other Parsic traits in this *Enoch* see Charles's ed. p. 74.

‡ The doctrine was probably taken from Parsism, but it is found elsewhere: Dr. J. G. Frazer quotes it from modern Greece and from Calabria.

§ Kohut (*Angelot*, pp. 43-45) has one or two plausible equations. For Philo, see Siegfried, *Philo*, p. 141.

¶ Charles notes here that the 'seven first white ones' come from the Amshaspands.

* Cf. Weber, *Jüd. Theol.* 2 p. 170f.; also Söderblom in *Rev. Hist. Rel.* xl. 266ff.: on the whole subject see the writer's paper, 'It is his Angel,' in *JTS*, 1902.

† See Beyschlag, *NT Theol.* ii. 100ff. Mazdeism had probably mixed with indigenous cults in Cilicia (see *Rev. Hist. Rel.* xxxvi. 261), so that St. Paul may have been acquainted with it in youth.

‡ Against this view of Eph 2² see Findlay (in *Expos. Bible*), p. 103. He observes that the Rabbis regarded the atmosphere as Satan's abode—'a notion foreign to Scripture.' They, at any rate, may well have got the notion from Parsism.

more and more like theirs, it is hard to suppose the movement entirely independent. Stave well shows that the teaching of the Prophets, especially Deutero-Isaiah, tended to an absolute denial of existence to heathen deities; yet as early as 2 Ch 28²² the gods of Damascus are real, and before long they and other foreign gods are firmly established as demons. The striking contrast between this development and that towards which the Prophets led is explained satisfactorily by the *daevas* of Parsism, who were to some extent themselves the deities of hostile tribes. The earlier history of Jewish and Parsi demonology may differ widely; but the doctrine of the NT might be broadly enunciated in terms which would accurately describe Zoroaster's own teaching, while that of the Talmud has much in common with accretions found in the Vendidad and the Pahlavi patristics. In both NT and Gathas, Evil is a lying and murderous spirit, which in the beginning chose evil thoughts, words, and deeds, and which has ever since the Fall* tempted mankind, with the aid of fiends who afflict the bodies and souls of men. In both, men are called to join in the strife which shall end with the destruction of Evil in hell. Could we believe that a pure Gathic religion was ever preached within the Jews' hearing, the historical connexion of the two systems would be almost indisputable. But the very corruptions of later Parsism must have helped to recommend it to the popular Jewish mind, which was equally in bondage to the fear of evil spirits and the foolish ritual that pretended to control them. It is noteworthy that Judaism deliberately forsook suggestions from its earlier writings—the Serpent of Gn 3 and Azazel in Lv 16—when it formed a new demonology with 'the Satan' as prince of evil. We naturally seek a foreign body whose attraction has drawn it from its proper course. Without pursuing this subject in detail, we may note in conclusion that in the Apocalypse, where parallels with Parsism (however explained) are especially numerous, there is a deep-seated connexion of thought in the characteristic balancing of the heavenly and the infernal—e.g. the devil, the beast, and the false prophet as the 'anti-trinity of hell' (see Milligan, *Baird Lecture*, p. 110 ff.). It seems reasonable to suppose that the author would readily make use of imagery from a system so subtly resembling his own. There is significance then in the identification of the Serpent of Gn 3 with Satan (12⁹), whose binding and subsequent destruction is narrated in striking accordance with the Parsi story of Azhi Dahāka (above, § 4 (6)). We may perhaps fairly add that Azhi Dahāka is especially connected with Babylon,† a coincidence which might be claimed as no mere accident—the less so as in the Pahlavi *Bahman Yasht* (*SBE* v. 234) we find the serpent Azhi, in his brief release before his final destruction, swallowing 'one-third of mankind, cattle, sheep, and other creatures of Auharmazd.' The obvious parallels in the Apocalypse are only discounted by the impossibility of proving that the Pahlavi translator is here faithful to his original Avestan text, now lost. (See above, § 7).

10. The question of Parsi influences upon the ESSENEs is raised by Lightfoot's dissertation (in *Comm. on Col.* pp. 387-389). He accepts (like Hilgenfeld) links with Parsism in (1) dualism, (2) sun-worship, (3) angelolatry, (4) magic, (5) striving after purity. Other points might be plausibly added, such as their white garments, the value set on truth, their devotion to agriculture, etc. (Their unbloody offerings must not be counted here, for Mazdeism has always had a sacrifice of flesh, as well as the libation and the Haoma offering). It

must be allowed that there is little really distinctive here, except the sun-worship—the one point in which Cheyne (who in other respects endorses Lightfoot's view) thinks Josephus inaccurate.* Moreover, there was Magian sun-worship which was not Zoroastrian, as in Ezk 8¹⁶ (see § 3, above). Essene dualism seems to owe nothing to that of the Vendidad, which has no philosophical theory of the inherent evil of matter and no trace of asceticism. The most conspicuous features in the picture Josephus draws are alien from the spirit of Parsism. In their psychology and eschatology one or two surface parallels are neutralized by deep-seated divergences. Thus in Mazdeism the pre-existent souls (*fravashis*) came to earth voluntarily, to join in the warfare against evil, not *ἰσχυρὴν τινι φύσιν κατασπώμεναι*. And in denying the Resurrection in favour of the immortality of the soul, the Essenes betray affinity with Hellenistic Judaism (especially the Book of Wisdom): note that Gritz and Montet trace the latter doctrine to Neoplatonism, recognizing Parsi influence only in the former. Unless Josephus (*Wars*, II. viii. 11) is entirely drawing on imagination, we must admit, with Söderblom, that Greek influence is demonstrable in their paradise beyond the sea, while the solitary Parsi feature, the hell *zōrōdēs* καὶ χεῖμερος, is not sufficient to support an argument.

11. Sundry miscellaneous comparisons may be mentioned, and among them those given by Darmesteter in his attempt to prove that Parsism borrowed from Judaism. (1) Philo's *Λόγος* (mostly Neoplatonic) originates Vohu Manah ('the Good Mind'). (2) The enactments of Pentateuchal and Avestan law are regularly introduced with the formula, '(God) saith to (the lawgiver)'. (3) Ahura creates the world in six periods—heaven, water, earth, plants, animals, man.† (4) Mankind in the Avesta descends from one couple, and the name *Mashya* signifies 'man,' ‡ like מֶשֶׁךְ. (5) Sin begins with the first man. (6) Ahura bids king Yima collect in a subterranean palace the finest types of the human race, animals, and vegetables. When three destructive winters have depopulated the earth, this 'Var' shall open and re-people it with a higher race.§ (7) Yima's successor has three sons, between whom the world is parted as among the sons of Noah. (8) Zarathushtra holds converse with Ahura on a mountain before promulgating the Law. (9) Zarathushtra had three precursors in his religion, as Moses had the three patriarchs. (10) The Avesta, like the OT, is divided into Law, Prophecy, and Miscellaneous Literature. Darmesteter tries to show that these parallels must be interpreted by Parsi borrowing. As he has convinced no one, the point need not be argued. It is enough to say that (1) the really Avestan elements in these comparisons are demonstrably far too old to have been borrowed; (2) some features may come from Babylonian or even Accadian antiquity, influencing Hebrew and Parsi alike; (3) most of the parallels are obviously fortuitous, proving nothing even when presented apart from a setting which greatly modifies the resemblance. That some of the later parts of the Avesta (and, *a fortiori*, Pahlavi writings) may have been influenced by Judaism is likely enough. Thus Horn|| thinks that the Fall is late in Parsism and due to the Hebrew, also that the virgin-birth of Saoshyant¶ owes something to Is 7¹⁴. Sundry biblical and Talmudic

* *Expos. Times*, II. 206.

† Cf. Cheyne, *OP* 283.

‡ Strictly mortalia.

§ See Geldner's tr. of *Vd 22a*. in Usener, *Sintfautagen*, p. 208 ff.; Cheyne (*Encyc. Bibl.* s.v. 'Deluge') remarks that it seems influenced by the Hebrew.

¶ *Med. u. Pers.* p. 330 (in Hellwald, *Kulturgech.* pt. 6).

¶ This is a good example of a parallel made plausible by selective description: the Parsi story is a most extravagant marvel, to be classed with the miraculous births described in Hartland's *Legend of Perseus*, I. 133 ff.

* If we may read Yima's fall in Yt 32⁹: Tiele denies.
† See Yt 5²²; and Darmesteter's note (*Le ZA* II. 375).

parallels may be seen in Kohut, *JQR* ii. 223 ff. and ii. 231 ff. The period of the Babylonian Talmud seems to have brought a closer contact with Parsism. But these later contacts lie outside our range, as also does the Parsi heresy of Mani—if such it really be.*

12. The Book of *Esther* might reasonably be expected to show traces of Persian religion. But though strong Persian influence is betrayed by the loan-words (see Scheftelowitz, *Arisches im AT*), we cannot with certainty fix on anything of value for the questions we are discussing here. The Persian origin of the Feast of PURIM, which has received new importance from the theory of J. G. Frazer (*Golden Bough*², iii. 150-198), is examined elsewhere. An attempt has lately been made by H. Winckler† to find the names of the Amshaspands Vohumanah and Ameretāt in those of Haman and Hammedatha. It appears probable that these two archangels' names underlie the Ἠμανοῦ καὶ Ἀναδάτου (? Ἀμαρδάτου), Περσικῶν δαιμόνων of Strabo (p. 512): it is clear that the names only have been borrowed in this Pontic appropriation, so that we need not consider the character of the Avestan originals. If the book really starts from an old story celebrating the victory of native Babylonian gods, Marduk and Ishtar, over the foreign divinities answering to 'Vashti' and 'Haman,' we should have to treat it as a composition essentially parallel with *Tobit*, as explained in § 4, above, that is, as a tale whose original significance was unknown to or ignored by a Jewish adapter writing with purposes of his own. In that case Jensen's identification of Haman and Vashti as *Elamite* deities is clearly preferable to Winckler's, which demands that Persian deities should suffer humiliation. But the whole theory will have to reckon with the explanation of all these names from Persian alone, as set forth in the new work of Scheftelowitz named above.

13. Two further comparisons may be added from the various suggestions of Prof. Cheyne. The later Jewish practice of prayer at dawn was, he thinks, prompted by Parsi usage—a point which would be hard to prove. He draws an interesting parallel between the 'Wisdom' of OT sapiential books and the *āna khratu*, 'heavenly wisdom (?)', of the Avesta. But even if this translation were safe, the conception is almost isolated in the Avesta, and it would be better to compare the Amshaspand Vohumanah, a personification strikingly resembling the Wisdom with whom J' created the world. His rising up to welcome the soul of the good man as it enters *Garō demāna* is in agreement with Wisdom's φιλαρθεμία. The sex of the impersonation answers to another Amshaspand, Armaiti, the 'daughter of Ahura.' It is obviously impossible to assert, or to deny, that the one conception springs out of the other, or owes something to it, so long as the dates of the several literatures permit association.

14. To the foregoing, more or less plausible, contacts may be added one which has been rather too ingeniously pleaded by a scholar of great learning, but without meeting with much acceptance. In *ZDMG* xxx. 716 ff. Rabbi A. Kohut tried to prove an 'anti-Parsic bias' in Deutero-Isaiah. It will be enough in general to refer to the criticism by de Harlez in *Rev. d. questions historiques*, April 1877. One passage, however, cannot be so summarily set aside. In Is 45' commentators since Saadya have seen a polemic against Persian dual-

ism, a view from which the most recent writers have begun to recoil. If we are to recognize an allusion to some foreign dualistic ideas, it is more probably Magian doctrine than anything we could suppose held by Cyrus. It happens that in the Gathas (*Ys* 44^b) we find Ahura addressed as 'the artificer of light and darkness, sleep and waking, dawn, noon, and night.' A yet more important parallel is the imprecation in Darius' great inscription (*Beh.* 4⁷⁸⁻⁸⁰), 'may Auramazda slay thee . . . and whatever thou shalt do, may Auramazda destroy that for thee.' It is clear therefore that even in the reign of Darius, Persian religion could have used the language of Is 45', merely substituting Auramazda's name for that of J'. The idea, therefore, of a veiled polemic against Cyrus' religion must be abandoned.

15. The student will have realized from the foregoing paragraphs that it is no easy task to sum up in the case before us, and that a verdict of 'not proven' is about as much as we can expect in the present state of our knowledge. The difficulty is one which confronts us everywhere in the study of ancient religions in Western Asia, in which certain ideas seem to float about with a freedom that vetoes almost any attempt to fix their parentage. The general independence of Israel's religious development has certainly come out more clearly from the investigation. Of the Hebraists hardly any will allow more than a trifling weight to Persian influence, and even Prof. Cheyne speaks in his latest utterances with more hesitation than he did.* On the Iranian side an able and exhaustive examination has been made in the new work on eschatology by Söderblom (named below), whose results are almost entirely unfavourable to the doctrine of Persian elements in Judaism. He notes how unlike anything in Judaism is the Avestan hell, a place of cold and stench and poison, not of fire—which was, of course, too sacred an element to be applied thus: on the other hand, the underground Hades, divided into two parts, for pious souls and sinners, is essentially Greek. He would allow no genuine contacts of Judaism and Parsism until a late epoch. Thus he compares with 1 Th 4th the passage in *Yt* 19, where through the work of Saoshyant the world is renewed, the dead arise, and the living are endowed with immortality (p. 224). If this is supposed to be more than an accidental parallel, we may place it with the Pauline passages in § 8, above. Söderblom remarks on the uniqueness of the conception in 2 P 3rd, of the earth brought out of water and reserved for fire: this aspect of the future is essentially an Indo-Germanic idea, being found in India, Iran, Greece, Gaul, and Iceland (p. 204). In sharp contrast to this adaptation of a nature myth he sets the purely poetical and spiritual conception of Deutero-Isaiah as to the 'new heaven and new earth' (p. 285). Looking back upon the narrow range of the parallels noted in § 7, we shall probably do well to allow Persian influence in Eschatology only some weight in stimulating what was none the less a native growth in Judaism. It may, however, have prompted the sudden change from a Resurrection of the Just (with some conspicuous sinners) to a Universal Resurrection: so Bousset, with a half consent from Söderblom (p. 317). The presence of Persian ideas in the Apocalypse can hardly be denied; and they can be reasonably explained from the adoption of Zoroastrian imagery in earlier apocalyptic.† In Angelology and Demonology we

* See Darmesteter and Jackson: Söderblom *denies* (*Rev. Hist. Rel.* xi. 427 ff.). See Harnack, *Hist. of Dogma*, iii. 330.

† In his *Altoriental. Forsch.*, 3rd series, I. 1. (1901). On Omanos see Jensen, *Hittiter u. Armenier*, p. 181; on Hammedatha, *ib.* p. 204 n.

seem justified in regarding the foreign influence as present in the elaborate ordering and ranking of spirits. In the former we have a very probable Zoroastrian feature in the 'representative angels'; while in the latter we may assign to the same cause the breaches of continuity (1) in the abandonment of earlier ideas, like Azazel and the Serpent, in favour of the Satan; (2) in the changed view of the gods of the nations, who were at first treated as real gods, then became 'nothings,' and finally developed into demons. It is an interesting result of these concessions, if allowed, that the New Testament is very much more concerned with them than the Old.

LITERATURE.—The fullest discussion will be found in Stave, *Über den Einfluss des Parsismus auf das Judentum* (1898: see summary of it in *Crit. Rev.* July 1900, p. 823 ff., and an important review in *Rev. Hist. Rel.* xl. 266 f., by Söderblom); Obeyne, *OP* 394-452, *Expos. Times* ii. 202, 224, 243 ff., *Enc. Bibl.* s.v. 'Angel,' and in *Kohut Studies* (1896). The relations between Parsism and Rabbinic Judaism were examined by Schorr in his Hebrew periodical *He-Haluz*, vii and viii (1885) [not seen], who was closely followed by Kohut, *Jüd. Angelol. u. Dämonol.* (1886). The question is well discussed from the Biblical standpoint by M. Nicolas, *Des Doctrines Religieuses des Juifs* (1860). See also Kohut in *ZDMG* xxi. 552 ff., xxv. 59 ff.; Geiger in his *Jüd. Zeitschr.* iv. 72 ff., x. 113 ff.; Schwally, *Leben nach d. Tode*, p. 149 ff.; Moulton in *Thinker*, i. 401 ff., ii. 308, 490 ff., *Expos. Times*, ix. 852 ff., *Crit. Rev.* vi. 8-14, x. 99-106; Söderblom, 'La Vie Future d'après le Mazdéisme' (*Ann. du Musée Guimet*, 1901), esp. pp. 361-321. Too late for use came E. Bäckén's *Die Verwandtschaft der jüd.-chr. mit der pers. Eschatologie* (1902), a very full, if somewhat uncritical, collection of parallels.

J. H. MOULTON.

ZOROBABEL.—See ZERUBBABEL.

ZORZELLEUS (Β Φαηζελλαῖος, Α Ζορζελλεος, AV *Berzelus*), 1 Es 5³⁸. See BARZILLAI.—A daughter of his, named Augia, is mentioned as married to Addus, the ancestor of a priestly family, who could not trace their genealogy at the return under Zerubbabel. The same change of the initial letter occurs in the LXX of Ezr 2⁶¹ (Β Ζαρβελλαῖ, Α Ζερβελλαῖ; but in the same verse Β Βερζελλαῖ, Α -Ι).

ZUAR (זואר).—Father of Nethanel the head of the tribe of Simeon, Nu 1⁸ 2⁸ 7¹⁸ 2⁸ 10¹⁸ (all *Zwγdnp*).

ZUPH (זופ).—1. An ancestor of Elkanah and Samuel, 1 S 1¹ (B *ἐν Νασεῖβ* [reading *ηκωβ* for *ηκωβ*], A *Σούρ*, Luc. *Σώφ*), 1 Ch 6³⁵ (20) (*Kérē*; the *Kēthibh* has זף *Ziph*; BA *Σούφ*, Luc. *Σουφί*), called in v. 2⁸ (11) *Zophai*. 2. The land of Zuph (זופ *ṣṣ*; B *ἡ Σελφ*, Α *ἡ γῆ Σελφ*, Luc. *ἡ γῆ Σιφά*), 1 S 9⁸, probably derived its name from having been originally settled by the family of Zuph (Driver, *Text of Sam.* 2). The gentile name *Zuphite* (זופי) probably underlies the name *Ramathaim-zophim* of 1 S 1¹ (see art. RAMAH, p. 198*). Neither the *Sôba* of Robinson (*BRP*² ii. 18 ff.) nor any other known site can be said to contain any certain trace of the name Zuph.

ZUR (זר 'rock').—1. A Midianite prince slain by the Israelites (Nu 31⁸). His daughter COZBI was killed, along with the Simeonite ZIMRI, by

Phinehas (25¹⁸). In Jos 13²¹ he is described as one of the (allied or vassal) princes of Sihon (סִּיחֹן *ṣṣ*); but this note is due to a harmonizing redactor (see Dillm. *ad loc.*). 2. The name of a Gibeonite family settled at Jerusalem, 1 Ch 8³⁸ (B and Luc. *Σούρ*, A *Ἰσοῦρ* [i.e. *זר* 'and Zur']), 9³⁸ (BA *Ἰσέλ* [i.e. *זר*], Luc. *Σούρ*).

ZURIEL (זוריאל 'my rock is El').—A Merarite chief, Nu 3³⁸ (*Σουριήλ*). On the precarious inferences which have been drawn by Hommel from the composition and meaning of this and the names *Zurishaddai*, *Pedahzur*, and *Elizur*, see art. ROCK, p. 290.

ZURISHADDAI (זוריאל 'my rock is Shaddai or the Almighty').—Father of Shelumiel the chief of the tribe of Simeon, Nu 1⁸ (B *Σουρισαδαι*, AF *Σουρισαδαι*) 2¹⁸ BA *Σουρισαδαι*, F *Σουρισαδαι*) 7²⁸ 10¹⁸ (LXX in all three *Σουρισαδαι*). On the name see reference under ZURIEL.

ZUZIM (זוזימ; LXX *θονη ισχυρ*,—confusing with *ισχυρ* or *ισχυρ*; Symm. *Ζουζομμεν*; Pesh. *זוזימ* (pl.) 'the mighty'; Vulg. *Zuzim*).—In Gn 14⁸ one of the prehistoric peoples whom Chedorla'omer is said to have smitten on his expedition against the kings of the Pentapolis, described as resident in 'Hām' (which see), and mentioned between the 'Rephaim' of ASHTEROH-KARNAIM (in Bashan) and the 'Emim' (Dt 2¹⁰) of the region occupied afterwards by Moab. The locality indicated corresponds to what was afterwards the territory of the Ammonites, which is said in Dt 2²⁰ to have been occupied originally by the ZAMZUMMIM; and hence it has often been supposed that the two names were in some way or another different designations of the same people,—a scribal error having found its way into one of the two passages, or the old prehistoric name having become modified in form in the course of oral transmission. In Babylonian *m* and *w* are represented by the same characters; and hence Sayce (*HCM* 160 f.; *Expos. Times*, viii. 463) very ingeniously explained the difference by the conjecture that in Dt 2²⁰ the name appears as it was actually pronounced,—or at least nearly so (*Zuzim* for *ZaWZeWim*), while in Gn 14⁸ it appears as it was written by a scribe who was translating from a Bab. document (*ZaMZeMim*), and did not know what the true pronunciation was. However, before this theory can be accepted, better proof is needed than has hitherto been produced that Gn 14 was really translated from a Bab. original; the strongly Hebraic style and colouring of the chapter do not favour the supposition. Whether the name is in any way connected with that of *Ziza*, a place 10 m. S.E. of Heshbon, and 20 m. S. of Rabbath-ammon, a military station in Roman times, mentioned also in the Middle Ages (see Dillm.), and still possessing remains of massive forts and other indications of its former importance (Tristram, *Moab*, 182-190), must be left an open question.
